"(1) during the period beginning on January 1 of the calendar year preceding the year of the general election, or in the case of a special election for the seat of a United States Senator, during the period beginning on the day on which the seat was vacated, and ending on the day the certification is made, the candidate and the candidate's authorized committees have received contributions in an amount at least equal to the lesser of—

"(A) $650,000; or

"(B) the greater of—

"(i) $150,000; or

"(ii) 10 cents multiplied by the voting age population of the State;

"(2) all contributions received for purposes of paragraph (1) have come from individuals, and no contribution received from an individual, when added to all contributions to or for the benefit of the candidate from the individual, was taken into account to the extent that the contributions from that individual exceed $250;

"(3) the candidate and the candidate's authorized committees have not expended for the primary election more than the amount described in subsection (b)(1);

"(4) the candidate and the candidate's authorized committees have not expended for any runoff election more than the amount described in subsection (b)(2);

"(5) at least 75 percent of the amount of contributions received for purposes of paragraph (1) have come from individuals residing in the candidate's State;

"(6) at least one other candidate has qualified for the same general election ballot under State law;

"(7) the candidate and the candidate's authorized committees—

"(A) have not made and will not make expenditures for the general election that exceed the general election spending limit applicable to the candidate under section 503(b), unless permitted to do so under section 504(a)(2);

"(B) will not accept any contributions in violation of section 315;

"(C) will not accept any contribution for the general election except contributions from any individual who resides in the candidate's State, which, in the aggregate, do not exceed $25, except as permitted by this Act;

"(D) will deposit all payments received under this section in an account insured by the Federal Deposit Insurance Corporation from which funds may be withdrawn by check or similar means of payment to third parties;

"(E) will furnish campaign records, evidence of contributions, and other appropriate information to the Commission; and

"(F) will cooperate in any audit and examination conducted by the Commission pursuant to section 507; and

"(8) the candidate intends to make use of the benefits provided in section 504.

"(d) For the purposes of subsection (c)(1) and section 504(a)(2)(B), in determining the amount of contributions received by a candidate and the candidate's authorized committees—

"(1) no contribution other than a gift of money made by a written instrument that identifies the person making the contribution shall be taken into account;

"(2) no contribution made through an intermediary or conduit referred to in section 315(a)(8) shall be taken into account;

"(3) no contribution received from a person other than an individual shall be taken into account, and no contribution received from an individual shall be taken into account to the extent such contribution exceeds $250 when added to all other contributions made by that individual to or for the benefit of such candidate since the date specified in paragraph (4); and

"(4) no contribution received prior to January 1 of the calendar year preceding the year in which the general election is held or received after the date on which the general election is held shall be taken into account, and in the case of a special election, no contribution received prior to the date on which the seat was vacated or received after the date on which the general election is held shall be taken into account.

"(e) The threshold amounts in subsection (c)(1) shall be increased at the beginning of each calendar year based on the increase in the price index as determined under section 315(c), except that for purposes of determining such increase, the term 'base period', as used in section 315(c) shall mean the calendar year of the first election after the date of enactment of the Senatorial Election Public Funding and Campaign Act of 1990.

"LIMITATIONS ON EXPENDITURES

"SEC. 503. (a) No candidate shall—

"(1) make expenditures from the personal funds of the candidate or the funds of a member of the immediate family of the candidate; or

"(2) incur personal debt,

in excess of $20,000 in connection with the candidate's campaign for the Senate during an election cycle.

"(b)(1) Subject to paragraph (2), no eligible candidate may make expenditures for a general election in excess of the lesser of—

"(A) $5,500,000; or

"(B) the greater of—

"(i) $950,000; or

"(ii) $400,000 plus 30 cents multiplied by the voting age population of 4,000,000 or less, plus 25 cents multiplied by the voting age population over 4,000,000,

plus any amount permitted under paragraph (3) and section 504 (b) and (c).

"(2) No eligible candidate in a State with no more than 1 transmitter for a commercial very high frequency television station licensed to operate in the State, who receives a benefit under section 504, may make expenditures for a general election in excess of the lesser of—

"(A) $5,500,000; or

"(B) the greater of—

"(i) $950,000; or

"(ii) $400,000 plus 45 cents multiplied by the voting age population of 4,000,000 or less, plus 40 cents multiplied by the voting age population over 4,000,000,

plus any amount permitted under paragraph (3) and section 504 (b) and (c).

"(c) The amount otherwise determined under this section shall be increased by the amount of contributions for the general election from any individual residing in the candidate's State which, in the aggregate, do not exceed $25.

"(c) No candidate who is otherwise eligible to receive benefits under this title for use in a general election may receive such benefits if the candidate makes expenditures for the primary election in excess of the lesser of—

"(1) $2,750,000; or

"(2) the amount equal to 67 percent of the limitation on expenditures for the general election determined under subsection (b).

"(d) No candidate who is otherwise eligible to receive benefits under this title for use in a general election may receive such benefits if the candidate makes expenditures for a runoff election in excess of an amount equal to 20 percent of the limitation on expenditures for the general election determined under subsection (b).

"(e) For purposes of this section, the amounts set forth in subsections (b), (c), and (d) shall be increased at the beginning of each calendar year based on the increase in the price index as determined under section 315(c), except that for purposes of determining such increase, the term 'base period', as used in section 315(c), means the calendar year of the first election after the date of enactment of the Senatorial Election Public Funding and Campaign Act of 1990.

"(f)(1) The limitation stated in subsection (b) shall not apply to expenditures by a candidate or the candidate's authorized committees from a compliance fund established to defray the costs of legal and accounting services provided solely to insure compliance with this Act, if—

"(A) the compliance fund contains only contributions (including contributions received in excess of any amount necessary to defray qualified campaign expenditures pursuant to section 313) received in accordance with the limitations, prohibitions, and reporting requirements of this Act, and does not contain any funds received by the candidate pursuant to section 504(a);

"(B) the amount of contributions to and expenditures from the compliance fund do not exceed 10 percent of the limitation on expenditures for the general election determined under subsection (b); and

"(C) no transfers are made from the compliance fund to any other accounts of the candidate's authorized committees.

"(2) If, after a general election, a candidate determines that the costs of necessary and continuing legal and accounting services require contributions to and expenditures from a compliance fund in excess of the limitation stated in paragraph (1), the candidate may petition the Commission for a waiver of such limitation up to any additional amount that the Commission may authorize, the determination of which shall be subject to Federal review under section 508.

"(3) Any money remaining in a compliance fund when a candidate decides to terminate or dissolve the compliance fund shall be—

"(A) contributed to the United States Treasury to reduce the budget deficit; or

"(B) transferred to any fund of a subsequent campaign of that candidate.

"(f) If during a primary election period or runoff election period preceding a general election, independent expenditures aggregating more than $10,000 are made or obligated to be made in opposition to a candidate or for the opponent of a candidate, the limitations stated in subsections (c) and (d), as they apply to such candidate, shall be deemed to be increased for that primary or runoff election in an amount equal to the amount of such independent expenditures made during the primary election period or runoff election period.

"ENTITLEMENT OF ELIGIBLE CANDIDATES TO BENEFITS

"SEC. 504. (a)(1) Except as otherwise provided in section 506(c)—

"(A) an eligible candidate who is a major party candidate shall be entitled to a payment under section 506 in an amount equal to the general election spending limit applicable to the candidate under section 503(b) (without regard to paragraph (3) thereof); and

"(B) an eligible candidate who is not a major party candidate shall be entitled to matching payments under section 506 in an amount equal to the amount of each contribution received by the candidate and the candidate's authorized committees.

"(2) In determining the amount of contributions for the purposes of paragraph (1)(B)—

"(i) the provisions of section 502(b) shall apply; and

"(ii) the contributions required by section 502(a)(1) shall not be eligible for matching payments under this title.

"(3) The total amount of payments to which a candidate is entitled under paragraph (1)(B) shall not exceed 50 percent of the difference between—

"(A) the general election spending limit applicable to the candidate under section 503(b) (without regard to paragraph (3) thereof); and

"(B) the amount required to be raised by such candidate to establish eligibility under section 502(c)(1).

"(b) An eligible candidate shall be entitled to—

"(1) the broadcast media rates provided under subsections (b) and (d)(3) of section 315 of the Communications Act of 1934 (47 U.S.C. 315);

"(2) mailing rates provided in section 3629 of title 39, United States Code;

"(3) payments under section 506 equal to the total amount of independent expenditures made or obligated to be made in the general election by any person in opposition to, or on behalf of an opponent of, the eligible candidate, as such expenditures are reported by such person or determined by the Commission under section 304(f); and

"(4) if an eligible candidate's opponent who is not an eligible candidate either raises aggregate contributions or makes or becomes obligated to make aggregate expenditures for the general election that exceed the general election spending limit applicable to the eligible candidate under section 503(b)—

"(A) in the case of an eligible candidate who is a major party candidate, a payment under section 506 (in addition to payments to which the candidate is entitled under paragraph (1)) in an amount equal to—

"(i) two-thirds of the amount of the general election spending limit applicable to the eligible candidate under section 503(b) (without regard to paragraph (3) thereof), in a case in which the opponent either raises aggregate contributions or makes or becomes obligated to make aggregate ex-

penditures for the general election that exceed 100 percent of the applicable general election spending limit; and

"(ii) one-third of the amount of the general election spending limit applicable to the eligible candidate under section 503(b)) (without regard to paragraph (3) thereof), in a case in which the opponent either raises aggregate contributions or makes or becomes obligated to make aggregate expenditures for the general election that exceed 133⅓ percent of the applicable general election spending limit; or

"(B) in the case of an eligible candidate who is not a major party candidate, matching payments under section 506 (in addition to payments to which the candidate is entitled under paragraph (1)) equal to the amount of each contribution received by such eligible candidate and the candidate's authorized committees, except that in determining the amount of each such contribution—

"(i) section 502(b) shall apply; and

"(ii) threshold contributions required to be raised under section 502(b)(1) shall not be matched,

to the extent that aggregate payments to a candidate under this subparagraph do not exceed 50 percent of the amount of the general election spending limit applicable to the candidate under section 503(b)) (without regard to paragraph (3) thereof).

"(c) An eligible candidate who receives payments under paragraph (1)(C) or (2) of subsection (b) may spend such funds to defray expenditures in the general election without regard to the general election spending limit applicable to the candidate under section 503(b).

"(d)(1) An eligible candidate who receives benefits under this section may make expenditures for the general election without regard to subparagraph (A) of section 502(a)(7) or subsection (a) or (b) of section 503 if any one of the eligible candidate's opponent who is not an eligible candidate either raises aggregate contributions or makes or becomes obligated to make aggregate expenditures for the general election that exceed 133⅓ percent of the general election spending limit applicable under section 503(b).

"(2) A candidate who receives benefits under this section may receive contributions for the general election without regard to subparagraph (C) of section 502(a)(7) if a major party candidate in the same general election is not an eligible candidate, or if any other candidate in the same general election who is not an eligible candidate raises aggregate contributions or makes or becomes obligated to make aggregate expenditures for the general election that exceed 75 percent of the general election spending limit applicable to the candidate under section 503(b).

"(d) Benefits received by a candidate under this section shall be used to defray expenditures incurred with respect to the general election period for the candidate. Such benefits shall not be used—

"(1) to make any payments, directly or indirectly, to such candidate or to any member of the immediate family of such candidate;

"(2) to make any expenditure other than expenditures to further the general election of such candidate;

"(3) to make any expenditures which constitute a violation of any law of the United States or of the State in which the expenditure is made; or

"(4) to repay any loan to any person except to the extent the proceeds of such loan were used to further the general election of such candidate.

"CERTIFICATION BY COMMISSION

"SEC. 505. (a) No later than 48 hours after an eligible candidate files a request with the Commission to receive benefits under section 506 the Commission shall certify such eligibility to the Secretary of the Treasury for payment in full of the amount to which such candidate is entitled, unless section 506(c) applies. The request shall contain—

"(1) such information and be made in accordance with such procedures, as the Commission may provide by regulation;

"(2) a certification that the candidate has raised contributions in the applicable threshold amount stated in section 502(b)(1) and has met all other requirements to become an eligible candidate; and

"(3) a verification signed by the candidate and the treasurer of the principal campaign committee of such candidate stating that the information furnished in support of the request, to the best of their knowledge, is correct and fully satisfies the requirements of this title.

"(b) Certifications by the Commission under subsection (a) and all determinations made by the Commission under this title shall be final and conclusive, except to the extent that they are subject to examination and audit by the Commission under section 507 and judicial review under section 508.

"ESTABLISHMENT OF FUND; PAYMENTS TO ELIGIBLE CANDIDATES

"SEC. 506. (a)(1) The Secretary shall maintain in the Presidential Election Campaign Fund (referred to as the 'Fund') established by section 9006(a) of the Internal Revenue Code of 1986, in addition to any other accounts maintained under such section, a separate account to be known as the 'Senate Account'. The Secretary shall deposit into the Senate Account, for use by eligible candidates, the amounts available after the Secretary determines that the amounts in the fund, plus the amounts of revenue the Secretary projects will accrue to the fund during the remainder of the period ending on December 31 of the year of the next Presidential election, equal 110 percent of the amount the Secretary projects will be necessary for payments under subtitle H of the Internal Revenue Code of 1986 during such remainder of such period. The monies designated for the Senate Fund shall remain available without fiscal year limitation.

"(2) On May 15 of each year following the year during which a regularly scheduled biennial Senate election has occurred, the Secretary shall determine the amount in the Senate Fund, and determine whether that amount, plus the amount of revenue the Secretary projects will accrue to the Senate Account (based on the computation made by the Secretary with respect to the fund, as provided in paragraph (1)) during the period beginning on such date and ending on December 31 of the year of the next regularly scheduled biennial election, exceeds 110 percent of the total estimated expenditures of the Senate Account during that period. If the Secretary determines that an excess amount exists, the Secretary shall transfer the excess to the general fund of the Treasury of the United States.

"(b) Upon receipt of a certification from the Commission under section 505, the Secretary shall promptly pay to the candidate named in the certification, out of the Senate Account, the amount certified by the Commission.

"(c)(1) If at the time of a certification by the Commission under section 505 for payment to an eligible candidate, the Secretary determines that the monies in the Senate Account are not, or may not be, sufficient to satisfy the full entitlement of all such eligible candidates, the Secretary shall withhold from such payment such amount as is necessary to ensure that an eligible candidate will receive a pro rata share of such candidate's full entitlement. Amounts so withheld shall be paid when the Secretary determines that there are sufficient monies in the Senate Account to pay such amounts, or portions thereof, to all eligible candidates from whom amounts have been withheld, but, if there are not sufficient monies in the Senate Account to satisfy the full entitlement of an eligible candidate, the amounts so withheld shall be paid in such a manner that each eligible candidate receives a pro rata share of the candidate's full entitlement. The Secretary shall notify the Commission and each eligible candidate by registered mail of the reduction in the amount to which that candidate is entitled under section 505.

"(2) If the application of this subsection results in a reduction in the amount to which an eligible candidate is entitled under section 505 and payments have been made under this section in excess of the amount to which the candidate is entitled, the candidate shall be liable for repayment to the Senate Account of the excess under procedures that the Commission shall prescribe by regulation.

"EXAMINATION AND AUDITS; REPAYMENTS

"SEC. 507. (a)(1) After each general election, the Commission shall conduct an examination and audit of the campaign accounts of 10 percent of the eligible candidates of each major party and 10 percent of all other eligible candidates, as designated by the Commission through the use of an appropriate statistical method of random selection to determine, among other things, whether such candidates have complied with the expenditure limits and other conditions of eligibility and requirements of this title.

"(2) After each special election, the Commission shall conduct an examination and audit of the campaign accounts of each eligible candidate in such election to determine whether such candidates have complied with the expenditure limits and other conditions of eligibility and requirements under this title.

"(3) The Commission may conduct an examination and audit of the campaign accounts of any eligible candidate in a general election if the Commission, by an affirmative vote of four members, determines that there exists reason to believe that the candidate has violated any provision of this title.

"(b) If the Commission determines that any portion of the payments made to a candidate under this title was in excess of the aggregate payments to which such candidate was entitled, the Commission shall so notify the candidate, and the candidate shall pay to the Secretary an amount equal to the excess.

"(c) If the Commission determines that any part of a payment benefit made to a candidate under this title was not used as required by this title, the Commission shall so notify the candidate and the candidate shall pay to the Secretary an amount equal to 200 percent of the amount of the benefit that was used otherwise than as permitted by this title.

"(d) If the Commission determines that a candidate who has received benefits under this title has made expenditures which in the aggregate exceed by 5 percent or less the general election spending limit applicable to the candidate under section 503(b), the Commission shall so notify the candidate, and the candidate shall pay to the Secretary an amount equal to the amount of the excess expenditure.

"(e) If the Commission determines that a candidate who has received benefits under this title has made expenditures which in the aggregate exceed by more than 5 percent general election spending limit applicable to the candidate under the limitation set forth in section 503(b), the Commission shall so notify the candidate, and the candidate shall pay the Secretary an amount equal to three times the amount of the excess expenditure.

"(f) Any amount received by an eligible candidate under this title may be retained for no more than 60 days after the date of the general election for the liquidation of all obligations to pay general election campaign expenses incurred during the general election period. At the end of 60 days any unexpended funds received under this title shall be promptly repaid to the Secretary.

"(g) No notification shall be made by the Commission under this section with respect to an election more than 3 years after the date of such election.

"(h) All payments received under this section shall be deposited in the Senate Account.

"CRIMINAL PENALTIES

"SEC. 507A. (a) No candidate shall knowingly or willfully accept benefits under this title in excess of the aggregate benefits to which the candidate is entitled or knowingly or willfully use such benefits for any purpose other than one permitted by this title or knowingly or willfully make expenditures from the candidate's personal funds, or the personal funds of the candidate's immediate family, in excess of the general election spending limit applicable to the candidate under section 503(b).

"(b) A person who violates subsection (a) shall be fined not more than $25,000, or imprisoned not more than 5 years, or both. Any officer or member of any political committee who knowingly consents to the making of an expenditure in violation of subsection (a) shall be fined not more than $25,000, or imprisoned not more than 5 years, or both.

"(c)(1) It is unlawful for any person who receives any benefit under this title, or to whom any portion of any such benefit is transferred, knowingly and willfully to use, or authorize the use of, such benefit or such portion except as provided in section 504(d).

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than 5 years, or both.

"(d)(1) It is unlawful for any person knowingly and willfully—

"(A) to furnish any false, fictitious, or fraudulent evidence, books, or information (including any certification, verification, notice, or report) to the Commission under this title, or to include in any evidence, books, or information so furnished any misrepresentation of a material fact, or to falsify or conceal any evidence, books, or information relevant to a certification by the Commission or an examination and audit by the Commission under this title; or

"(B) to fail to furnish to the Commission any records, books, or information requested by it for purposes of this title.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than 5 years, or both.

"(e)(1) It is unlawful for any person knowingly and willfully to give or accept any kickback or any illegal payment in connection with any benefits received by a candidate, or an authorized committee of a candidate who receives benefits under this title.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than 5 years, or both.

"(3) In addition to the penalty provided by paragraph (2), any person who accepts any kickback or illegal benefit in connection with any benefits received by a candidate or an authorized committee of a candidate pursuant to the provisions of this title shall pay to the Secretary for deposit in the fund, an amount equal to 125 percent of the kickback or benefit received.

"JUDICIAL REVIEW

"SEC. 508. (a) Any action by the Commission made under this title shall be subject to review by the United States Court of Appeals for the District of Columbia Circuit upon petition filed in that court not later than 30 days after the Commission action for which review is sought. It shall be the duty of the Court of Appeals, ahead of all matters not filed under this title, to advance on the docket and expeditiously take action on all petitions filed pursuant to this title.

"(b) Chapter 7 of title 5, United States Code, applies to judicial review of any agency action, as defined in section 551(13) of title 5, United States Code, by the Commission.

"PARTICIPATION BY COMMISSION IN JUDICIAL PROCEEDINGS

"SEC. 509. (a) The Commission may appear in and defend against any action instituted under this section and under section 508 either by attorneys employed in its office or by counsel whom it may appoint without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and whose compensation it may fix without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title.

"(b) The Commission may, through attorneys and counsel described in subsection (a), institute actions in the district courts of the United States to seek recovery of any amounts determined under section 507 to be payable to the Secretary.

"(c) The Commission may, through attorneys and counsel described in subsection (a), petition the courts of the United States for such injunctive relief as is appropriate in order to implement any provision of this title.

"(d) The Commission is authorized on behalf of the United States to appeal from, and to petition the Supreme Court for certiorari to review, judgments or decrees entered with respect to actions in which it appears pursuant to this section.

"REPORTS TO CONGRESS; REGULATIONS

"SEC. 510. (a) The Commission shall, as soon as practicable after each election, submit a full report to the Senate setting forth—

"(1) the expenditures (shown in such detail as the Commission deems appropriate) made by each eligible candidate and the authorized committees of that candidate;

"(2) the amounts certified by the Commission under section 505 for payment to each eligible candidate;

"(3) the amount of repayments, if any, required under section 507, and the reasons for each such repayment; and

"(4) the balance in the fund, the Senate Account and any other account maintained in the fund.

Each report submitted pursuant to this section shall be printed as a Senate document.

"(b) The Commission may prescribe such rules and regulations in accordance with subsection (c), conduct such examinations and investigations, and require the keeping and submission of such books, records, and information, as it deems necessary to carry out its functions and duties under this title.

"(c) Thirty days before prescribing any rules or regulation under subsection (b), the Commission shall transmit to the Senate a statement setting forth the proposed rule or regulation and containing a detailed explanation and justification of such rule or regulation.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 511. There are authorized to be appropriated to the Commission such sums as are necessary for the purpose of carrying out the Commission's functions and duties under this title.".

SEC. 3. SENATE ACCOUNT.

(a) INCREASE IN CHECK-OFF AMOUNTS.—Section 6096(a) of the Internal Revenue Code of 1986 is amended—

(1) by striking "$1" each place it appears in that subsection and inserting "$3"; and

(2) by striking "$2" each place it appears in that subsection and inserting "$6".

(b) PUBLIC EDUCATION EFFORTS.—The Director of the Internal Revenue Service and the Federal Election Commission shall take steps to increase the resources available to the Senate Account through public education efforts aimed at increasing the number of individuals who choose to contribute to the fund through the voluntary check-off.

SEC. 4. BROADCAST RATES.

Section 315 of the Communications Act of 1934 (47 U.S.C. 315) is amended—

(1) by amending subsection (b) to read as follows:

"(b)(1) The charges made for the use of any broadcasting station by any person who is a legally qualified candidate for any public office in connection with such person's campaign for nomination for election, or election, to such office shall not exceed—

"(A) during the 45 days preceding the date of a primary or primary runoff election and during the 60 days preceding the date of a general or special election in which such person is a candidate, the lowest unit charge of the station for the same amount of time for the same period; and

"(B) at any other time, the charges made for comparable use of the station by other users thereof.

"(2) Notwithstanding subparagraph (A) of paragraph (1), a candidate for the United States Senate shall not be entitled to the rate specified in that subparagraph during the 60 days preceding a general election, but may be charged the rate specified in subparagraph (B) of that paragraph, unless—

"(A) the candidate is an eligible candidate within the meaning of section 501(5) of the Federal Election Campaign Act of 1971; and

"(B) the candidate is identified or is identifiable during at least 50 percent of the broadcast time of the candidate's political announcement or advertisement.";

(2) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(3) by inserting immediately after subsection (b) the following new subsection:

"(c) A licensee shall not preempt the use, during any period specified in subsection (b)(1), of a broadcasting station by a legally qualified candidate for public office who has purchased such use pursuant to the provisions of subsection (b)(1).".

SEC. 5. REPORTING REQUIREMENTS.

(a) ADDITIONAL REQUIREMENTS.—Section 304 of the Federal Election Campaign Act of 1971 (2 U.S.C. 434) is amended by adding at the end thereof the following new subsections:

"(d)(1) Not later than the day after the date on which a candidate for the United States Senate qualifies for the ballot for a general election, as that term is defined in section 501(5), or, if such candidate is a candidate in a State which has a primary election to qualify for such ballot after September 1, within 7 days after the date such candidate wins in such primary, whichever occurs first, each such candidate in such election shall file with the Commission a declaration whether the candidate intends to make expenditures in excess of the general election spending limit applicable to the candidate under section 503(b).

"(2) A declaration filed pursuant to paragraph (1) may be amended or changed at any time within 7 days after the filing of the declaration, and may not be further amended or changed.

"(e)(1) A candidate for the United States Senate who qualifies for the ballot for a general election, as that term is defined in section 501(5)—

"(A) who is not eligible to receive benefits under section 502; and

"(B) who either raises aggregate contributions or makes or becomes obligated to make aggregate expenditures for the general election that exceed 75 percent of the general election spending limit applicable to the candidate under section 503(b) for such Senate election,

shall file a report with the Commission not later than 24 hours after such contributions have been raised or such expenditures have been made or obligated to be made, or not later than 24 hours after the date of qualification for the general election ballot, whichever is later, setting forth the candidate's total contributions and total expenditures for such election. Thereafter such candidate shall file additional reports with the Commission not later than 24 hours after each time additional contributions are raised or expenditures are made, or are obligated to be made, which aggregate an additional 5 percent of such limit. A candidate shall continue to file such reports until the candidate has raised aggregate contributions or made or has become obligated to make aggregate expenditures equal to 133⅓ percent of the general election spending limit applicable to the candidate under section 503(b).

"(2) The Commission, not later than 24 hours after such a report has been filed, shall notify each candidate in an election who is eligible to receive benefits pursuant to this title of the filing of such report, and after an opposing candidate has raised aggregate contributions or made or has become obligated to make aggregate expenditures in excess of the applicable general election spending limit, the Commission shall certify, pursuant to subsection (i), such eligibility to the Secretary of the Treasury for payment of any amount to which such eligible candidate is entitled.

"(3) Notwithstanding the reporting requirement established in this subsection, the Commission may make its own determination that a candidate in a general election, as such term is defined in section 501(5), who is not eligible to receive benefits under section 504, has raised aggregate contributions or has made or has become obligated to make aggregate expenditures for such election that exceed general election spending limit applicable to a candidate under section 503(b). The Commission, not later than 24 hours after making such determination, shall notify each candidate in the general election involved who is eligible to receive benefits under section 504 about the making of such determination, and shall certify, pursuant to subsection (i), such eligibility to the Secretary of the Treasury for payment of any amount to which any such candidate is entitled.

"(f)(1) All independent expenditures, if any (including those described in subsection (b)(6)(B)(iii)), made by any person after the date of the last Federal election with regard to a general election, as such term is defined in section 501(5), and all obligations to make such expenditures incurred by any person during such period, if any, shall be reported by such person to the Commission as provided in paragraph (2), if such expenditure or obligation is described in such paragraph.

"(2) Independent expenditures by any person referred to in paragraph (1) shall be reported not later than 24 hours after the aggregate amount of such expenditures incurred or obligated exceeds $10,000. Thereafter, independent expenditures referred to in paragraph (1), made by the same person in the same election, shall be reported not later than 24 hours after each time the aggregate amount of such expenditures incurred or obligated, not yet reported under this subparagraph, exceeds $5,000.

"(3) Each report under this subsection shall be filed with the Commission and the Secretary of State for the State of the election involved and shall contain—

"(A) the information required by subsection (b)(6)(B)(iii); and

"(B) a statement filed under penalty of perjury by the person making the independent expenditures, or by the person incurring the obligation to make such expenditures, as the case may be, that identifies the candidate whom the independent expenditures are actually intended to help elect or defeat. The Commission shall, not later than 24 hours after such report is made, notify each candidate in the election involved who is eligible to receive benefits pursuant to section 504(a)(1)(C), about the making of each such report, and shall certify such eligibility to the Secretary of the Treasury for payment in full of any amount to which any such candidate is entitled.

"(4)(A) Notwithstanding the reporting requirements established in this subsection, the Commission may make its own determination that a person has made independent expenditures, or has incurred an obligation to make such expenditures, as the case may be, with regard to a general election, as defined in section 501(5), that in the aggregate total more than the applicable amount specified in paragraph (2).

"(B) The Commission shall, not later than 24 hours after such determination is made, notify each candidate in the election involved who is eligible to receive benefits under section 504(a)(1)(C) about the making of each determination under subparagraph (A), and shall certify, pursuant to subsection (i), such eligibility to the Secretary of the Treasury for payment in full of any amount to which such candidate is entitled.

"(g)(1) When 2 or more persons make an expenditure or expenditures in coordination, consultation, or concert (as described in paragraph (2) or otherwise) for the purpose of promoting the election or defeat of a clearly identified candidate, each such person shall report to the Commission, under subsection (f), the amount of such expenditure or expenditures made by such person in coordination, consultation, or concert with such other person or persons when the total amount of all expenditures made by such persons in coordination, consultation, or concert with each other exceeds the applicable amount provided in such subsection.

"(2) An expenditure by a person shall constitute an expenditure in coordination, consultation, or concert with another person when—

"(A) there is any arrangement, coordination, or direction with respect to the expenditure between the persons making the expenditures, including any officer, director, employee or agent of such person;

"(B) in the same 2-year election cycle, 1 of the persons making the expenditures (including any officer, director, employee or agent of such person) is or has been, with respect to such expenditures—

"(i) authorized by such other person to raise or expend funds on behalf of such other person; or

"(ii) receiving any form of compensation or reimbursement from such other person or an agent of such other person;

"(C) one of the persons making expenditures (including any officer, director, employee or agent of such person) has communicated with, advised, or counseled such other person in connection with such expenditure; or

"(D) one of the persons making expenditures and such other person making expenditures each retain the professional services of the same individual or person in connection with such expenditures.

"(h)(1) Every political committee, as defined in section 301(4), active in non-Federal elections and maintaining separate accounts for this purpose shall file with the Commission reports of funds received into and disbursements made from such accounts for activities which may influence an election to any Federal office. For purposes of this section, activities that may influence an election to any Federal office include—

"(A) voter registration and get-out-the-vote drives directed to the general public in connection with any election in which Federal candidates appear on the ballot;

"(B) general public political advertising that includes references, however incidental, to clearly identify Federal and non-Federal candidates for public office, or that does not clearly identify Federal candidates but urges support for or opposition to all the candidates of a political party or other candidates in a classification or context which includes Federal candidates; and

"(C) any other activities that require an allocation of costs between a political committee's Federal and non-Federal accounts reflecting the impact on Federal elections in accordance with regulations prescribed or Advisory Opinions rendered by the Commission.

"(2) Reports required to be filed by this subsection shall be filed for the same time periods required for political committees under section 304(a), and shall include:

"(A) a separate statement, for each of the activities in connection with which a report is required under paragraph (1), of the ag-

gregate total of disbursements from the non-Federal accounts; and

"(B) supporting schedules, providing an identification of each donor (except donors whose aggregate donations do not exceed $200 in a calendar year) together with the amount and date of each donation with regard to the receipts of the non-Federal account that comprise disbursements reported under subparagraph (A).

"(3) Reports required to be filed by this subsection need not include donations made to or on behalf of non-Federal candidates or political organizations in accordance with the financing and reporting requirements of State laws, or other disbursements from the non-Federal accounts in support of exclusively non-Federal election activities, if such donations or disbursements are governed solely by such State laws and not subject to paragraph (1).

"(i) The certifications required by this section shall be made by the Commission on the basis of reports filed with such Commission in accordance with the provisions of this Act, or on the basis of such Commission's own investigation or determination, notwithstanding section 505(a).

"(j) Not later than 15 days after a candidate for the Senate qualifies for the primary ballot under applicable State law, such candidate shall file with the Commission a declaration stating whether or not such candidate agrees to expend from the candidate's personal funds, or the funds of the candidate's immediate family, or incur personal loans, in connection with the candidate's campaign for such office, in the aggregate of $250,000 or more, for the election cycle.

"(k)(1) A candidate for the United States Senate who expends from the candidate's personal funds or the funds of the candidate's immediate family, or incurs personal loans, in connection with the candidate's campaign for such office, in the aggregate in excess of $250,000, for the election cycle, shall file a report with the Commission not later than 24 hours after such expenditures have been made or loans incurred. Thereafter the expenditures referred to in this paragraph shall be reported not later than 24 hours after each time the aggregate of additional expenditures or loans exceeds $10,000.

"(2) Not later than 24 hours after a report has been filed under paragraph (1), the Commission shall notify each candidate in the election who is eligible to receive payments under section 504 of the filing of each such report.

"(3) Notwithstanding the reporting requirements in this subsection, the Commission may make its own determination that a candidate for the United States Senate has made expenditures from the personal funds of such candidate or the funds of any member of a candidate's immediate family or incurred personal loans in connection with the candidate's campaign aggregating in excess of $250,000, or thereafter in increments of $10,000 during the election cycle. Not later than 24 hours after making such determination, the Commission shall notify each candidate in the general election who is eligible to receive benefits under section 504 of the making of each such determination.".

(b) CONTENTS OF REPORTS.—Section 304(b) of the Federal Election Campaign Act of 1971 (2 U.S.C. 434(b)) is amended—

(1) in paragraph (2) by striking "for the reporting period and calendar year," and inserting "for the reporting period and calendar year in the case of committees other than authorized committees of a candidate, and for the reporting period and election cycle in the case of authorized committees of candidates,";

(2) in paragraph (3)—

(A) in subparagraph (A) by inserting after "calendar year," the following: "in the case of committees other than authorized committees or in excess of $200 within the election cycle in the case of authorized committees,";

(B) in subparagraph (F) by inserting after "calendar year," the following: "in the case of committees other than authorized committees or in excess of $200 within the election cycle in the case of authorized committees,"; and

(C) in subparagraph (G) by inserting after "calendar year," the following: "in the case of committees other than authorized committees or in excess of $200 within the election cycle in the case of authorized committees,";

(3) in paragraph (4) by striking "for the reporting period and calendar year," and inserting "for the reporting period and calendar year in the case of committees other than authorized committees of a candidate, and for the reporting period and election cycle in the case of authorized committees of candidates,";

(4) in paragraph (5)—

(A) in paragraph (A) by inserting after "calendar year" the following: "in the case of committees other than authorized committees or in excess of $200 within the election cycle in the case of authorized committees; and

(B) by striking the semicolon at the end thereof and inserting the following: ", except that if a person to whom an expenditure is made is merely providing personal or consulting services and is in turn making expenditures to other persons who provide goods or services to the candidate or the candidate's authorized committees, the name and address of such other person, together with the date, amount, and purpose of such expenditure, shall also be disclosed;"; and

(5) in paragraph (6)(A) by striking "calendar year" and inserting "election cycle".

(c) DEFINITIONS.—Section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431) is amended—

(1) in paragraph (4) by adding at the end thereof the following:

"Whether a committee, club, association, or other group of persons has received contributions within the meaning of this paragraph shall be determined by the Commission on the basis of facts and circumstances, in any combination, demonstrating a purpose of influencing any election for Federal office, including the representations made by any person soliciting funds about their intended uses; the identification by name of individuals who are candidates for Federal office, as defined in paragraph (2) of this section, or of any political party, in general public political advertising; and the proximity to any primary, run-off, or general election of general public political advertising designed or reasonably calculated to influence voter choice in that election.";

(2) in paragraph (8)(B) by—

(A) inserting "except for purposes of reporting and disclosing, pursuant to section 304, such amounts in excess of $200," at the beginning of clauses (v) and (viii); and

(B) inserting at the end thereof the following:

"(C) The exclusions provided in clauses (v) and (viii) of subparagraph (B) shall not be exclusions from the definition of contributions for purposes of reporting contributions as required by section 304, and all such contributions shall be reported.";

(3) in paragraph (9)(B) by—

(A) inserting "except for purposes of reporting and disclosing, pursuant to section 304, such amounts in excess of $200," at the beginning of clauses (iv) and (vi); and

(B) inserting at the end thereof the following:

"(C) The exclusions provided in clauses (iv) and (vi) of subparagraph (B) shall not be exclusions from the definitions of expenditures for purposes of reporting expenditures as required by this Act, and all such expenditures shall be reported.";

(4) in paragraph (13) by striking "mailing address" and inserting "permanent resident address"; and

(5) by adding at the end thereof the following new paragraph:

"(20) The term 'election cycle' means—

"(A) in the case of a candidate or an authorized committee of a candidate, the period beginning on the day after the date of the most recent election for the seat that the candidate seeks and ending on the date of the next general election; or

"(B) in the case of other persons, the period beginning on the first day following the date of the most recent general election and ending on the date of the next election.".

SEC. 6. LIMITS ON CONTRIBUTIONS BY MULTICANDIDATE POLITICAL COMMITTEES AND SEPARATE SEGREGATED FUNDS.

(a) LIMITS.—(1) Section 315(a)(2) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)(2)) is amended—

(A) in subparagraph (A) by striking "$5,000" and inserting "$2,500";

(B) in subparagraph (B) by striking "or" at the end thereof;

(C) in subparagraph (C) by—

(i) striking "$5,000" and inserting "$2,500"; and

(ii) striking the period at the end thereof and inserting a semicolon; and

(D) by adding at the end thereof the following new subparagraphs:

"(D) to any candidate for the office of Member of, or Delegate or Resident Commissioner to, the House of Representatives and the authorized political committees of such candidate with respect to—

"(i) a general or special election for the office of Representative in, or Delegate or Resident Commissioner to, the Congress (including any primary election, convention, or caucus relating to such general or special election) which exceed $100,000 (or $125,000 if at least 2 candidates qualify for the ballot in the general or special election and at least 2 candidates qualify for the ballot in a primary election relating to such general or special election), when added to the total of contributions previously made by multicandidate political committees and separate segregated funds, other than multicandidate committees of a political party, to such candidate and the candidate's authorized political committees with respect to such general or special election (including any primary election, convention, or caucus relating to such general or special election); or

"(ii) a runoff election for the office of Representative in, or Delegate or Resident Commissioner to, the Congress which exceed $25,000 when added to the total of contributions previously made by multicandidate political committees and separate segregated funds, other than multicandidate committees of a political party, to such

candidate and the candidate's authorized political committees with respect to such runoff election;

"(E) to any candidate for the office of Senator and the authorized political committees of such candidate with respect to—

"(i) a general or special election for such office (including any primary election, convention, or caucus relating to such general or special election) which, when added to the total of contributions previously made by multicandidate political committees and separate segregated funds, other than multicandidate committees of a political party, to such candidate and the candidate's authorized political committees with respect to such general or special election (including any primary election, convention, or caucus relating to such general or special election) exceeds an amount equal to 30 percent of the amount provided in section 315(i); or

"(ii) a runoff election for the office of United States Senator which exceeds, when added to the total of contributions previously made by multicandidate political committees and separate segregated funds, other than multicandidate committees of a political party, to such candidate and the candidate's authorized political committees with respect to such runoff election, an amount equal to 30 percent of the limitation on expenditures provided in section 315(j) for runoff elections; or

"(F) to any State committee of a political party, including any subordinate committee of a State committee, which, when added to the total of contributions previously made by multicandidate political committees and separate segregated funds, other than multicandidate committees of a political party, to such State committee exceeds the greater of—

"(i) 2 cents multiplied by the voting age population of the State of such State committee; or

"(ii) $25,000.

The limitation of subparagraph (F) shall apply separately with respect to each two-year Federal election cycle, covering a period from the day following the date of the last Federal general election held in that State through the date of the next regularly scheduled Federal general election.".

(2) Section 315 of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a) is amended by adding at the end thereof the following new subsections:

"(i) For purposes of subsection (a)(2)(E)(i), such limitation for the election cycle shall be an amount equal to the lesser of—

"(A) $5,500,000; or

"(B) the greater of—

"(i) $900,000; or

"(ii) 67 percent of the sum of—

"(I) $400,000; and

"(II) 30 cents multiplied by the voting age population of 4,000,000 or less, plus 25 cents multiplied by the voting age population over 4,000,000.

"(j) For purposes of subsection (a)(2)(E)(ii), such limitation for the election cycle shall be an amount equal to the lesser of—

"(A) $5,500,000; or

"(B) the greater of—

"(i) $900,000; or

"(ii) 20 percent of the sum of—

"(I) $400,000; and

"(II) 30 cents multiplied by the voting age population of 4,000,000 or less, plus 25 cents multiplied by the voting age population over 4,000,000.".

(b) INCREASES IN LIMITS.—Section 315(c) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(c)) is amended—

(1) in paragraph (1) by striking "subsection (b) and subsection (d)" and inserting "subsections (b), (d), (i), and (j)"; and

(2) in paragraph (2)(B) by striking the period at the end thereof and inserting "as applied in subsections (b) and (d), and the term 'base period' means the calendar year of the first election after the date of enactment of the Senatorial Election Public Funding and Campaign Act of 1990, as applied in subsections (i) and (j).".

(c) EXPENDITURES BY NATIONAL AND STATE COMMITTEES.—Section 315(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(d)) is amended—

(1) in paragraph (1) by striking "(2) and (3)" and inserting "(2), (3), (4), and (5)";

(2) by adding at the end thereof the following new paragraphs:

"(4) No congressional campaign committee may accept contributions from multicandidate political committees and separate segregated funds, during two-year election cycle, which, in the aggregate, exceed 30 percent of the total expenditures that may be made during such election cycle by that campaign committee on behalf of candidates for Senator, Representative, Delegate, or Resident Commissioner pursuant to paragraph (3).

"(5) No national committee of a political party may accept contributions from multicandidate political committees and separate segregated funds, during two-year election cycle, which, in the aggregate, are in excess of an amount equal to 2 cents multiplied by the voting age population of the United States.

"(6) The limitations contained in paragraphs (2) and (3) shall apply to any expenditure through general public political advertising, whenever made, which—

"(A) clearly identifies by name an individual who is, or is seeking nomination to be, a candidate in the general election for the Federal office of President, Senator or Representative; and

"(B) does not constitute a direct mail communication designed primarily for fundraising purposes that makes only incidental reference to a Federal candidate.".

SEC. 7. INTERMEDIARY OR CONDUIT.

Section 315(a)(8) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)(8)) is amended to read as follows:

"(8)(A) For purposes of this subsection—

"(i) contributions made by a person, either directly or indirectly, to or on behalf of a particular candidate, including contributions which are in any way earmarked or otherwise directed through an intermediary or conduit to such candidate, shall be treated as contributions from such person to such candidate; and

"(ii) contributions made by a person either directly or indirectly, to or on behalf of a particular candidate, through an intermediary or conduit, including all contributions delivered or arranged to be delivered by such intermediary or conduit, shall also be treated as contributions from the intermediary or conduit, if—

"(I)(aa) the contributions made through the intermediary or conduit are in the form of a check or other negotiable instrument made payable to the conduit or intermediary rather than the intended recipient; or

"(bb) the conduit or intermediary is a political committee, other than an authorized committee of a candidate, within the meaning of section 301(4), or an officer, employee or other agent of such a political committee, or an officer, employee or other agent of a connected organization, within the meaning of section 301(7), acting in its behalf; and

"(II) the conduit or intermediary is required to register as a lobbyist or lobby organization as defined under the Federal Regulation of Lobbying Act (2 U.S.C. 266), or an officer, employee or other agent of such an organization.

"(B) The limitations imposed by this subsection shall not apply to—

"(i) bona fide joint fundraising efforts conducted solely for the purpose of sponsorship of a fundraising reception, dinner, or other event in accordance with rules and regulations prescribed by the Commission by—

"(I) two or more candidates;

"(II) two or more national, State, or local committees of a political party within the meaning of section 301(4) acting on their own behalf; or

"(III) a special committee formed by either two or more candidates or one or more candidates and one or more national, State, or local committees of a political party acting on their own behalf; or

"(ii) fundraising efforts for the benefit of a candidate which are conducted by another candidate within the meaning of section 301(2).

In all cases where contributions are made by a person either directly or indirectly to or on behalf of a particular candidate through an intermediary or conduit, the intermediary or conduit shall report the original source and the intended recipient of such contribution to the Commission and to the intended recipient.".

SEC. 8. INDEPENDENT EXPENDITURES.

Section 301(17) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431(17)) is amended by adding at the end thereof the following new sentence: "An expenditure shall constitute an expenditure in coordination, consultation, or concert with a candidate when—

"(A) there is any arrangement, coordination, or direction with respect to the expenditure between the candidate or the candidate's agent and the person (including any officer, director, employee or agent of such person) making the expenditure;

"(B) in the same election cycle, the person making the expenditure (including any officer, director, employee or agent of such person) is or has been—

"(i) authorized to raise or expend funds on behalf of the candidate or the candidate's authorized committees;

"(ii) serving as an officer of the candidate's authorized committees; or

"(iii) receiving any form of compensation or reimbursement from the candidate, the candidate's authorized committees, or the candidate's agent;

"(C) the person making the expenditure (including any officer, director, employee or agent of such person) has communicated with, advised, or counseled the candidate or the candidate's agents at any time on the candidate's plans, projects, or needs relating to the candidate's pursuit of nomination for election, or election to Federal office, in the same election cycle, including any advice relating to the candidate's decision to seek Federal office;

"(D) the person making the expenditure retains the professional services of any individual or other person also providing those services to the candidate in connection with the candidate's pursuit of nomination for

election, or election to Federal office, in the same election cycle, including any services relating to the candidate's decision to seek Federal office;

"(E) the person making the expenditure (including any officer, director, employee or agent of such person) has communicated or consulted at any time during the same election cycle about the candidate's plans, projects, or needs relating to the candidate's pursuit of election to Federal office, with—

"(i) any officer, director, employee or agent of a party committee that has made or intends to make expenditures or contributions, pursuant to subsection (a), (d), or (h) of section 315 in connection with the candidate's campaign; or

"(ii) any person whose professional services have been retained by a political party committee that has made or intends to make expenditures or contributions pursuant to subsection (a), (d), or (h) of section 315 in connection with the candidate's campaign; or

"(F) the expenditure is based on information provided to the person making the expenditure directly or indirectly by the candidate or the candidate's agents about the candidate's plans, projects, or needs, if the candidate or the candidate's agent is aware that the other person has made or is planning to make expenditures expressly advocating the candidate's election.".

SEC. 9. INDEPENDENT EXPENDITURE BROADCAST DISCLOSURE.

Section 318(a)(3) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441d(a)(3)) is amended by striking the period at the end thereof and inserting the following: ", except that when a person makes an independent expenditure through a broadcast communication on any television station, the broadcast communication shall include a statement clearly readable to the viewer that appears continuously during the entire length of such communication setting forth the name of such person and, in the case of a political committee, the name of any connected or affiliated organization, and when a person makes an independent expenditure through a newspaper, magazine, outdoor advertising facility, direct mailing or other type of general public political advertising, the communication shall include, in addition to the other information required by this subsection—

"(A) the following sentence: 'The cost of presenting this communication is not subject to any campaign contribution limits.'; and

"(B) a statement setting forth the name of the person who paid for the communication and, in the case of a political committee, the name of any connected or affiliated organization and the name of the president or treasurer of such organization.".

SEC. 10. PERSONAL LOANS.

Section 315(a) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)) is amended by adding at the end thereof the following new paragraph:

"(9) For purposes of the limitations imposed by this section, no contributions may be received by a candidate or the candidate's authorized committees for the purpose of repaying any loan by the candidate to the candidate or to the candidate's authorized committees.".

SEC. 11. REFERRAL TO THE DEPARTMENT OF JUSTICE.

Section 309(a)(5)(C) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437g(a)(5)(C)) is amended by striking "may refer" and inserting "shall refer".

SEC. 12. EXTENSION OF CREDIT.

Section 301(8)(A) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431(8)(A)) is amended—

(1) by striking "or" at the end of clause (i);

(2) by striking the period at the end of clause (ii) and inserting "; or"; and

(3) by adding at the end thereof the following new clause:

"(iii) with respect to a candidate for the office of United States Senator and the candidate's authorized political committees, any extension of credit for goods or services relating to advertising on broadcasting stations, in newspapers or magazines, by direct mail (including direct mail fund solicitations) or other similar types of general public political advertising, if such extension of credit is—

"(I) in an amount of more than $1,000; and

"(II) for a period of more than 60 days after the date on which such goods or services are furnished, which date in the case of advertising by direct mail (including a direct mail solicitation) shall be the date of the mailing.".

SEC. 13. REDUCED RATES FOR MAIL.

(a) REDUCED RATES.—Subchapter II of chapter 36 of title 39, United States Code, is amended by adding at the end thereof the following new section:

"§ 3629. Reduced rates for certain Senate candidates

"The rates of postage for matter mailed with respect to a campaign by an eligible candidate (as defined in section 501 of the Federal Election Campaign Act of 1971) shall be—

"(1) in the case of first-class mail matter, one-fourth of the rate currently in effect; and

"(2) in the case of third-class mail matter, 2 cents per piece less than mail matter mailed pursuant to paragraph (1),

subject to the condition that the total paid by such candidate for all mail matter at the rates provided by paragraphs (1) and (2) shall not exceed 5 percent of the general election spending limit applicable to such candidate under section 503(b) of the Federal Election Campaign Act of 1971.".

(b) TECHNICAL AMENDMENT.—The table of sections for chapter 36 of title 39, United States Code, is amended by inserting after the item relating to section 3628 the following new item:

"3629. Reduced rates for certain Senate candidates.".

SEC. 14. DISCLOSURE.

Section 318(a) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441d) is amended—

(1) by striking the period at the end of paragraph (3) and inserting "; and"; and

(2) by adding at the end thereof the following new paragraph:

"(4) if paid for or authorized by a general election candidate for the Senate, or the authorized committee of such candidate who has not agreed to abide by the expenditure limits in section 503, such advertisement or announcement shall contain the following sentence: 'This candidate has not agreed to abide by the spending limits for this Senate election campaign set forth in the Federal Election Campaign Act.'.".

SEC. 15. EXCESS CAMPAIGN FUNDS.

Section 313 of the Federal Election Campaign Act of 1971 (2 U.S.C. 439a) is amended by striking "political party;" and all that follows through the end of the section and inserting "political party.".

SEC. 16. POLITICAL COMMITTEE POSTAL RATES.

Section 3626(e) of title 39, United States Code, is repealed.

SEC. 17. CERTIFICATION BY PRESIDENTIAL CANDIDATES ACCEPTING PUBLIC FUNDS CONCERNING COMPLIANCE WITH FUNDRAISING AND EXPENDITURE LIMITATIONS.

Section 9006 of the Internal Revenue Code of 1986 is amended by adding at the end thereof the following new subsection:

"(d)(1) In order to be eligible to receive any payments under this section, a candidate described in subsections (b) and (c) shall certify to the Commission, under penalty of perjury, that during the Presidential primary and the general election period, the candidate and the candidate's authorized committees and agents have not solicited, received, or spent, and will not solicit, receive or spend, directly or indirectly, any funds in connection with a Federal, State, or local election, including funds for get-out-the-vote, voter registration, and generic campaign activities, unless such funds are subject to this Act, including its limitations and prohibitions.

"(2) For the purposes of this subsection, the term 'agent' includes a person—

"(A) who is, or has been, authorized to raise funds;

"(B) who is, or has been, an officer of an authorized committee;

"(C) who is, or has been, receiving any form of compensation or reimbursement from a candidate or a candidate's authorized committees; and

"(D) who has, or has had, actual oral or written authority, either express or implied, to make or authorize the making of expenditures on behalf of a candidate or to authorize the receipt of contributions on behalf of a candidate.".

SEC. 18. SOFT MONEY.

(a) LIMIT.—Section 315(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(d)), as amended by section 6(c), is further amended—

(1) by redesignating paragraphs (3), (4), (5), and (6) as paragraphs (4), (5), (6), and (7);

(2) by inserting after paragraph (2) the following new paragraph:

"(3) A State committee of a political party, including any subordinate committee of a political party, may not make any expenditure in connection with the general election campaign of any candidate for President of the United States who is affiliated with such party which exceeds an amount equal to 4 cents multiplied by the voting age population of that State (as certified under subsection (e) of this section).".

(b) DEFINITIONS OF CONTRIBUTION AND EXPENDITURE.—Section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431) is amended by repealing the following clauses: clause (x) and clause (xii) of subsection 431(8)(B) and clause (viii) and clause (ix) of subsection 431(9)(B).

(c) AMOUNTS SOLICITED, RECEIVED, OR SPENT IN CONNECTION WITH A FEDERAL ELECTION.—Section 315 of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a), is amended by adding at the end thereof the following new subsection:

"(k)(1) Any amount solicited, received or spent by a national, State or local committee of a political party, directly or indirectly, shall be subject to this Act, if such amount is solicited, received or spent in con-

nection with a Federal election. No part of such amount may be allocated to a non-Federal account or otherwise maintained in, or paid from, an account that is not subject to this Act. This section shall not apply to amounts described in section 301(b)(9)(B)(viii).

"(2) For the purposes of this subsection, the term 'in connection with a Federal election' includes any activity that may affect a Federal election including but not limited to the following:

"(A) voter registration and get-out-the-vote activities;

"(B) generic activities, including any broadcasting, newspaper, magazine, billboard, mail, or similar type of communication or public advertising; and

"(C) campaign materials that identify a Federal candidate, regardless of any other candidate who may also be identified.".

SEC. 19. FEDERAL ELECTION COMMISSION REFORM.

(a) INCREASE IN MEMBERSHIP.—Section 306(a)(1) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437c(a)(1)) is amended—

(1) by striking "6 members" and inserting "7 members"; and

(2) by amending the last sentence thereof to read as follows: "No more than 4 members of the Commission appointed under this paragraph may be affiliated with the same political party, and such appointments shall be made in a manner to assure that the same political party shall not have 4 or more members affiliated with such party on such Commission for 2 succeeding years.".

(b) TERMS.—Section 306(a)(2) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437c(a)(2)) is amended to read as follows:

"(2)(A) Members of the Commission shall serve for terms of 7 years, except that of the members appointed after April 30, 1989—

"(i) one of the 2 members appointed for the term beginning May 1, 1991, shall be appointed for a term of 6 years;

"(ii) one of the 2 members appointed for the term beginning May 1, 1993, shall be appointed for a term of 6 years; and

"(iii) one of the 2 members appointed for the term beginning May 1, 1995, shall be appointed for a term of 6 years.

"(B) One additional member of the Commission shall be appointed for a term beginning May 1, 1989, and shall be appointed for a term of 5 years.".

SEC. 20. SEVERABILITY.

If any provision of this Act or any amendment made by this Act, or the application of any such provision to any person or circumstance, is held invalid, the validity of any other such provision and the application of such provision to other persons and circumstances shall not be affected thereby.

SEC. 21. EFFECTIVE DATE.

(a) IN GENERAL.—Except as provided in subsection (b), this Act and the amendments made by this Act shall become effective for any election held in 1992 or thereafter.

(b) IMMEDIATE EFFECTIVE DATE.—The amendments made by sections 3, 7, 8, and 9 shall become effective on the date of enactment of this Act.

ANALYSIS OF THE SENATORIAL ELECTION PUBLIC FUNDING AND CAMPAIGN ACT OF 1990

The Senatorial Election Public Funding and Campaign Act of 1990 is based on S. 137, as reported out of the Senate Rules Committee. It amends S. 137 as follows:

1. Provides for a system of voluntary full public funding of general election campaigns.

2. Creates an exemption from spending caps under S. 137 for contributions of $25 or less from voters within the candidate's state.

3. Provides that broadcast advertisements by eligible candidates may not be preempted for other advertisements, while insuring that they pay the lowest or pre-emptible rate.

4. Increases the "check-off" on individual tax returns from $1 to $3, and directs that the FEC and IRS publicize the check-off to increase voluntary participation in public funding of campaigns.

The anticipated cost of the legislation, should all candidates participate in each election cycle, would be approximately $60 million for an average election cycle. By comparison, public funding for elections, through the 50 percent tax deduction applicable until 1986, cost about $230 million per election cycle.

PURPOSE OF THE BILL

The purpose of the Senatorial Election Public Funding and Campaign Act of 1990 is to amend the Federal Election Campaign Act of 1971 to provide for a voluntary system of spending limits and public benefits for Senate general elections, including public funding for general elections, to limit contributions by multicandidate political committees and separate segregated funds to candidates and party committees, to extend and improve reporting and disclosure requirements, and to improve other provisions of the Act as amended.

PUBLIC BENEFITS FOR SENATE ELECTIONS

Like S. 137, this bill establishes a voluntary system of spending limits tied to public benefits for candidates to the United States Senate in general elections, including public funding of general elections, beginning in the first election held in 1992. The bill establishes a number of conditions to which a candidate must agree as a condition of eligibility for public benefits.

To be eligible for public benefits, a candidate must have received contributions from individuals in an amount based on the population of the State from which the candidate seeks office. The qualifying threshold of contributions would range from $150,000 in the less populated States to $650,000 in the States with the highest populations based on the formula of 10 cents multiplied by the voting age population of the State. Such contributions must be raised from individuals in amounts of $250 or less, with at least 75 percent from in-state donors.

All candidates who wish to receive public benefits must agree to limit expenditures in the general election campaign to $400,000, plus 30 cents times the voting age population of the State up to four million population, plus 25 cents times the voting age population in excess of four million, but in no case less than $950,000, nor more than $5.5 million. Participating candidates would also be limited in expenditures or loans of their personal and immediate family's funds to $20,000; in expenditures in a primary election to the less of $2,750,000 or 67 percent of the State's general election limit; and in expenditures in a runoff election to 20 percent of the general election spending limit. All such limits will be annually adjusted to account for inflation, and an additional 10 percent of the general election limit will be allowed for legal and accounting fees spent to insure compliance with the Act.

A participating candidate will be entitled to receive in the general election: public funds to the amount of the spending cap; lowest unit rates for broadcast advertising (with additional requirement that the candidate must be identified or identifiable during at least 50 percent of such broadcasts); lower postal rates for first- and third-class mailings (up to 5 percent of the general election limit); and direct payments equal to the total independent expenditures made against that candidate or for his opponent in the general election.

The Supreme Court in *Buckley* v. *Valeo*, 424 U.S. 1, 57 (n. 65) 85–76 (1976) has upheld as constitutional voluntary expenditure limitations on campaign spending by candidates who receive public benefits. While those candidates who do not accept public benefits may not be subject to such limitations, they are required by this bill to file certain reports.

EXEMPTION FOR SMALL IN-STATE DONATIONS

The bill exempts donations from individuals who reside in the candidate's State of $25 or less from the spending caps in the bill, by permitting candidates to be eligible for public funding and the other public benefits set forth in the Act regardless of how much they raise in in-state contributions of $25 or less.

OTHER PROVISIONS

The bill provides for eligible candidates to receive the lowest unit rate for broadcast advertising, with such advertising not being subject to pre-emption; increases the check-off on individual returns from $1 to $3; and authorizes the FEC and IRS to publicize the check-off to increase participation.

OTHER REFORMS FROM S. 137

The bill retains all reforms contained within S. 137, as described in the Report of the Rules Committee on S. 137.

APPLICABLE SPENDING CAPS AND PUBLIC FUNDING

A chart setting forth the applicable spending caps and public funding amounts for general elections is attached.

VOLUNTARY EXPENDITURE LIMITS FOR SENATE ELECTIONS AND PUBLIC FUNDING

State	VAP (1990)	Election cycle limit	General election limit (public funding)	Primary election limit	Qualifying threshold
Alabama	3,010,000	$2,176,010	$1,303,000	$873,010	$301,000
Alaska	362,000	1,586,500	950,000	636,500	150,000
Arizona	2,575,000	1,958,075	1,172,500	785,575	257,500
Arkansas	1,756,000	1,586,500	950,000	626,500	175,600
California	21,350,000	8,250,000	5,500,000	2,750,000	650,000
Colorado	2,453,000	1,896,953	1,135,900	761,053	245,300
Connecticut	2,479,000	1,909,979	1,143,700	766,279	247,900
Delaware	504,000	1,586,500	950,000	636,500	150,000
Florida	9,799,000	5,093,083	3,049,750	2,043,333	650,000
Georgia	4,639,000	2,938,783	1,759,750	1,179,033	463,900
Hawaii	825,000	1,586,500	950,000	636,500	150,000
Idaho	710,000	1,586,500	950,000	636,500	150,000
Illinois	8,678,000	4,625,065	2,769,500	1,855,565	650,000
Indiana	4,133,000	2,727,528	1,633,250	1,094,278	413,300
Iowa	2,132,000	1,736,132	1,039,600	696,532	213,200
Kansas	1,854,000	1,596,854	956,200	640,654	185,400
Kentucky	2,760,000	2,050,760	1,228,000	822,760	276,000
Louisiana	3,109,000	2,225,609	1,332,700	892,909	310,900
Maine	917,000	1,586,500	950,000	636,500	150,000
Maryland	3,533,000	2,438,033	1,459,900	978,133	353,300
Massachusetts	4,576,000	2,912,480	1,744,000	1,168,480	457,600
Michigan	6,829,000	3,853,108	2,307,250	1,545,858	650,000
Minnesota	3,224,000	2,283,224	1,367,200	916,024	322,400
Mississippi	1,852,000	1,595,852	955,600	640,252	185,200
Missouri	3,854,000	2,598,854	1,556,200	1,042,654	385,400
Montana	588,000	1,586,500	950,000	636,500	150,000
Nebraska	1,187,000	1,586,500	950,000	636,500	150,000
Nevada	833,000	1,586,500	950,000	636,500	150,000
New Hampshire	828,000	1,586,500	950,000	636,500	150,000
New Jersey	5,903,000	4,945,204	2,961,200	1,984,004	590,300
New Mexico	1,074,000	1,586,500	950,000	636,500	150,000
New York	13,600,000	6,680,000	4,000,000	2,680,000	650,000

VOLUNTARY EXPENDITURE LIMITS FOR SENATE ELECTIONS AND PUBLIC FUNDING—Continued

State	VAP (1990)	Election cycle limit	General election limit (public funding)	Primary election limit	Qualifying threshold
North Carolina	4,929,000	3,059,858	1,832,350	1,227,608	492,900
North Dakota	481,000	1,586,500	950,000	636,500	150,000
Ohio	8,090,000	4,379,575	2,622,500	1,757,075	650,000
Oklahoma	2,371,000	1,855,871	1,111,300	744,571	327,100
Oregon	2,123,000	1,731,623	1,036,900	694,723	212,300
Pennsylvania	9,199,000	4,842,583	2,899,750	1,942,833	650,000
Rhode Island	767,000	1,586,500	950,000	636,500	150,000
South Carolina	2,558,000	1,949,588	1,167,400	782,158	255,800
South Dakota	519,000	1,586,500	950,000	636,500	150,000
Tennessee	3,685,000	2,514,185	1,505,500	1,008,685	368,500
Texas	12,038,00	6,027,865	3,609,500	2,418,365	650,000
Utah	1,076,000	1,586,500	950,000	636,500	150,000
Vermont	425,000	1,586,500	950,000	636,500	150,000
Virginia	4,615,000	2,928,763	1,753,750	1,175,013	461,500
Washington	3,545,000	2,444,045	1,463,500	980,545	354,500
West Virginia	1,394,000	1,586,500	950,000	636,500	150,000
Wisconsin	3,612,000	2,477,612	1,483,600	994,012	361,200
Wyoming	339,000	1,586,500	950,000	636,500	150,000

[1] For States with runoff provisions, the limits would be as follows: Alabama—$260,600; Arkansas—$190,000; Florida—$609,950; Georgia—$351,950; Mississippi—$191,120; North Carolina—$366,450; Oklahoma—$222,260; South Carolina—$233,480; South Dakota—$190,000; Texas—$721,900.

Mr. BIDEN. Mr. President, I am very pleased today to join with my colleagues Senator KERRY and Senator BRADLEY in introducing the Senatorial Election Public Funding and Campaign Act of 1990.

We are introducing this bill for one reason: the present system of funding campaigns doesn't work. Everyone knows it doesn't work and that change is needed.

Moderate reform, however, is not enough.

Since I came to the Senate in 1973, we have had two opportunities to enact real and meaningful campaign finance reform. The first time was after Watergate. The American people truly wanted fundamental change. Unfortunately, we missed that opportunity.

The second opportunity is now. We must not let it pass. To continue the existing trends in campaign finance is to threaten the foundation of our democratic system.

As important as clean air, or child care, or crime legislation are, I believe the single most significant thing Congress can do is improve our ability to govern well; the single most important act would be to change the way in which the electoral system functions—the way we choose our leaders and finance our campaigns.

There are two things driving the debate at the moment:

First, the public is demanding change; and

Second, my colleagues are in agreement that, within the present system, no matter how well intended or how scrupulously they act, they are vulnerable. They are vulnerable to accusations about their association with anyone who contributes to their campaign.

The only question is what is the best reform to enact? Since 1973, I have felt that the most straightforward, most direct, and most significant change we can make to the electoral process in America is to provide for public funding of Senate campaigns—just as we do for our Presidential campaigns.

Public funding would allow candidates—incumbents and challengers alike—to compete more on the basis of merit than on the size of the pocketbook. Too often, private money in political campaigns is funny money with unfunny results. Public funding would free candidates from potentially corroding dependence on personal or family fortune or the gifts of special interest backers—be they those of business, organized labor or conservative or liberal interests.

In 1974, in an article I authored for the Northwestern University Law Review, I said:

There are three principal reasons why existing campaign financing practices should be reformed. First, an electoral system supported solely by private contributions affords certain wealthy individuals or special interest groups the potential for exerting a disproportionate influence over both the electoral mechanism and the policy-making processes of the government. Second, the concept of American democracy presumes that all citizens, regardless of personal wealth, have equal access to the political process. Under the present system of financing, however, the individual of moderate means lacks the financial resources necessary to mount an effective campaign and, therefore, is precluded from attaining public office. Third, our current method of financing campaigns tends to "lock-in" incumbents by making it extremely difficult for a challenger to mount a successful campaign.

In 1990, the reasons for reforming the campaign financing system are stronger than ever.

Mr. President, I ask unanimous consent that the full text of the law review article be printed in the RECORD.

In closing, I want to encourage my colleagues to support public funding of campaigns and not stop short of real and important change to the system. As Thomas Paine once wrote: "A thing moderately good is not as good as it ought to be. Moderation in temper is always a virtue; but moderation in principle is a species of vice."

I commend Senator KERRY for his leadership in developing this proposal. I urge my colleagues to join with me, Senator BRADLEY, and Senator KERRY and support this important legislation.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Northwestern University Law Review]

PUBLIC FINANCING OF ELECTIONS: LEGISLATIVE PROPOSALS AND CONSTITUTIONAL QUESTIONS

(By Joseph R. Biden, Jr.*)

During my campaign for the United States Senate in 1972, I paid a visit to certain leaders of a labor union whose members worked in the aircraft industry, and who intended to contribute $5,000 to the campaigns of various Senate candidates. It was an honest and open procedure, and payment was by check. They asked what my chances of winning were, and I explained for perhaps the hundredth time of the campaign why I thought I would win. I want to emphasize that no one asked me to promise my vote on any particular issue, but they did ask, "Well, Joe, had you been in the ninety-second Congress, how would you have voted on the SST? [1] And while you are at it, how would you have voted on bailing out Lockheed?" [2] A candidate does not have to be very sophisticated to know the correct answers to such questions posited by labor leaders.

Later in the campaign, when I began to show strength in the polls and it looked as though I might win, thirteen multi-millionaire Republicans from my state invited me to cocktails. The spokesman for the group said, "Well, Joe, let us get right to it. You are a young man, and it looks as if you may win this damn thing, and it appears that we underestimated you. Now, Joe, we would like to ask you a few questions. We know that everybody running for public office feels compelled to talk about tax reform, and we know that you have been talking tax reform, particularly capital gains and gains for millionaires by consequence of unearned income." Then one man leaned over, patted me on the knee in a fatherly fashion, and said—as if to say it was just among us—"Joe, you really don't mean what you say about capital gains, do you?" Again, I knew that the right answer to that question was worth $20,000 in contributions.

I did not give the "correct" answers in either instance, and accordingly, I received no money. But it is no secret that, in similar situations, other candidates have not hesitated to answer "correctly," feeling that it is better to win their elections even while compromising certain principles, than to lose with all their principles remaining intact.[3] Certainly few politicians would choose to be included in a second edition of *Profiles in Courage* at the expense of a long and productive political life. To say the least, a political system which requires such a choice deserves serious re-examination. On the basis of such an inquiry, I have concluded that the present system of campaign financing should be reformed, and a system of public financing of elections consistent with constitutional mandates adopted.[4]

POLITICAL DARWINISM: THE POOR GET POORER AND THE RICH GET ELECTED

There are three principal reasons why existing campaign financing practices should be reformed. First, an electoral system supported solely by private contributions affords certain wealthy individuals or special interest groups the potential for exerting a disproportionate influence over both the electoral mechanism and the policymaking processes of the government. Second, the concept of American democracy presumes that all citizens, regardless of personal wealth, have equal access to the political process.[5] Under the present system of financing, however, the individual of moderate means lacks the financial resources necessary to mount an effective campaign and, therefore, is precluded from attaining elective public office. Third, our current method of financing campaigns tends to "lock-in" incumbents by making it extreme-

Footnotes at end of article.

ly difficult for a challenger to mount a successful campaign.[6]

The source of most of our present problems is the high cost of running for election. In 1972, for example, the average reported expenses for candidates winning closely contested elections[7] to the House of Representatives was more than $100,000.[8] In elections with no incumbent running, the House candidates spent an average of $89,000[9] while their counterparts in Senate elections spent an average of over $450,000.[10] On the other hand, candidate running against incumbents were generally outspent by a margin of two-to-one.[11] These averages, however, tell only part of the story. Certain individual campaigns cost as much as $320,000 for the House of Representatives and $2,300,000 for the Senate.[12] Furthermore, the most expensive House campaigns were run by those candidates who managed to unseat an incumbent. The ten victors over incumbents in 1972 spent an average of $125,000, compared to $86,000 for their opponents.[13] Because of a deficiency in the reporting requirements of the Federal Election Campaign Act of 1971,[14] the exact amount spent in the presidential campaign of 1972 is not known. It has been reliably estimated, however, that President Richard M. Nixon's campaign cost approximately $46 million and Senator George McGovern's $36 million.[15]

Not only are campaign expenses high, but they are increasing at an alarming rate.[16] To the general public this trend may seem disturbing; to a potential candidate, it poses an often insurmountable financial barrier. Without great personal wealth,[17] there is only one way for a candidate to be able to run a competitive race, and that is through donations. Although other reasons motivate an individual to donate money to a political campaign,[18] all too often a contribution is made with the hope of gaining influence with the candidate should he win the election.[19] As Represenative John Anderson, an Illinois Republican, has said:[20]

"[T]he cliches and the nice rationalizations of the defenders of the status quo aside, the fact is that the wealthy and the special interests do not simply contribute to campaigns; they invest in candidates and in officeholders." Such donations are necessarily tainted: minimally they succeed in gaining access to the office holder,[21] at worst, they "buy" his vote.[22] Even if funds are donated without a suspect motivation, the public perceives these transactions, especially the very large ones,[23] as constituting a sale rther than a gift.[24] Whether such a view is justified or not, the resulting lack of confidence that arises concerning public officials is, to say the least, distressing,[25] and reason enough to reform the law in this area.

Special interest group contributions also cause problems for elected candidates. An office holder is frequently forced to choose between the suspicion which results from voting in accord with the position of his major contributors and the prospect of losing financial support from those contributors by failing to do so.[26] The legislator's dilemma may be particularly acute when to vote his convictions would appear to generate a conflict of interest because of certain campaign donations.[27] Furthermore, an interest group tends to have selfish concerns about government; its interest is not necessarily consistent with the public welfare. Frequently, various interest groups contributing funds to campaigns of public officials have conflicting interests among themselves, and some type of "balance of power" is struck. Rarely, however, do any of these groups represent the ordinary citizen,[28] who all too often is ignored in the councils of government. Even if every segment of the public could be represented by its own interest group contributing funds to various candidates, I hardly think it desirable to have a "government by auction."

A second reason for reform is to allow a wider range of individuals to participate as effective candidates. Under our current system of private financing, candidates, typically, are weathly individuals.[29] The explanation for this fact is simple: generally only the wealthy are able to amass, either through personal resources or contributions from friends, the vast sums of money needed to finance an effective campaign for public office. Many a candidate has had to mortgage his house to finance his campaign,[30] or at least to keep his campaign going until private donations were received.[31] Moreover, all too often money flows to those who have it; in other words, unless a candidate is able to finance his campaign himself, nobody else will be willing to finance it for him. For example, Representative Bertram Podell has said:[32]

"When I ran for Congress the first question asked me was whether I could finance my own campaign. If I had said, "No, I cannot," I would not have been a candidate. When you mention candidates for public office, you are only mentioning men of affluence."

The existing system of campaign financing discriminates not only against the person of modest means, but also against other classes of people such as non-whites[33] and women.[34] In part, this is explained by the fact that these two groups have little access to wealth.

A third reason for reforming our system of campaign financing is that in our time incumbent members of Congress are virtually assured of re-election. Since 1954, well over ninety percent of all incumbents seeking reelection to the Congress have been victorious.[35] Furthermore, those who have gained re-election generally do so without a great struggle. Typically, only about fifty of the four hundred thirty-five elections for the House of Representatives are seriously contested,[36] while in the remainder, the race is a rather one-sided affair.

Of course, it is to be emphasized that many reasons unrelated to the financing of campaigns help explain why incumbents are so successful in gaining re-election.[37] For example, incumbents are generally better known than their opponents and during their terms of office can usually gain the attention of the news media through press conferences, announcements and other official ceremonies. In addition, they have the benefit of their office and large staffs, paid for at government expense, and the ability to create goodwill through such tasks as cutting government red tape on behalf of constituents. Also most legislators quite properly avail themselves of the "franking" privilege by sending constituents news letters which during an election campaign serve as a free source of name identification and thereby accentuate the disparity in power between an incumbent and his opponent. In re-election campaigns, these benefits have been estimated to give each incumbent a minimum financial advantage of $16,000 over his challenger.[38]

Moreover, one of the incumbent's foremost advantages over his opponent is his ability to raise funds. During the 1972 congressional campaigns, incumbents generally out-raised and out-spent their opponents by a margin of two-to-one.[39] The reasons for this disturbing statistic are not difficult to discern. In the eyes of many contributors a campaign contribution is effective only if made to a winner and, judging from prior performance, an incumbent is the most likely to win—again. In the words of Democratic Senator William Proxmire of Wisconsin:[40]

"The point is that the incumbent gets the big contribution because the people who are making contributions want to make them to the winners and not to the losers."

The effect of this resulting financial imbalance is devastating on the challenger, who generally must spend at least as much money as the incumbent, if not more, to have any hope of victory. To gain at least a chance of winning, a challenger is obliged to raise a sizable amount of money early in a campaign, but he often cannot raise the money because he has such a slim chance of winning a competitive race.[41] The result under the current system is a vicious and often fatal circle. Furthermore, the challenger must spend valuable time even late in the campaign to solicit contributions, time that could be better spent seeking votes. On the other hand, the incumbent, being virtually assured sufficient funds, can devote his full attention to the hustings. The importance of this factor was acknowledged in a joint statement issued by a bipartisan group of fifty-five unsuccessful candidates for the House of Representatives in 1972, released through the Center for Public Financing of Elections:[42]

"We found that incumbents uniformly outraised and outspent us by substantial margins. We found that while we were putting our own savings on the line, and begging and borrowing from family and friends, many incumbents had easy access to large pools of special interest money from Washington and elsewhere. . . .

Some people have expressed concern that public funding would unfairly help the incumbents. As recent candidates, we know that simply is not true. The challenger could never be at a greater disadvantage than he or she now is."

This financial imbalance and the resulting competitive disadvantage has prompted an official of Common Cause to remark that the United States no longer has a two-party system under the Republicans and Democrats; it has a one-party system under the Incumbents.[43]

Thus, the problems inherent in our current system of private campaign financing are clear. It provides a selected few individuals—generally distinguished by their wealth—a disproportionate say in the workings of government. It excludes all but those with great wealth or access to it from any hope of achieving elective office. Furthermore, by giving incumbents virtual life terms, it destroys the competitive political system upon which our government is supposedly based. Finally, the present system places what amounts to an often intolerable burden on the candidate. As Democratic Senator Hubert Humphrey of Minnesota has said:[44]

"I have been in a number of campaigns, and I enjoy the campaigns. I like them. But the most demeaning, disgusting, depressing and disenchanting part of politics is related to campaign financing."

Put rather simply, there must be a better way.

WHAT KIND OF REFORM WILL WORK?

Although the need to change the present system is apparent, the formula for doing so is not so obvious. Many preliminary questions must be considered before deciding upon what type of campaign financing reform should be enacted.[45] The difficulties involved in adopting a fair and workable system are reflected in the large numbers of bills which have been introduced in Congress. Recently, the Senate passed the Federal Election Campaign Act Amendment of 1974.[46] A bill that provided for the public financing of federal elections. Prior to passage of this bill numerous others dealing with election reform had been introduced in both the Senate [47] and the House of Representatives.[48] In addition, President Nixon has put forward his own proposals for campaign financing reform.[49] Before discussing the specific provisions of these proposals, it will be useful to outline the existing laws regulating campaign financing.

DISCLOSURE, CHECK-OFFS, AND MEDIA LIMITATIONS

The two most recent major enactments dealing with campaign financing are the Presidential Election Campaign Fund Act,[50] also known as the Dollar Check-Off Act, and the Federal Election Campaign Act of 1971.[51] The main provisions of the Campaign Act of 1971 concern media spending, funding of one's own campaign, and disclosure of political contributions. Under the Act, candidates in the general election for a federal office are limited to media expenditures of ten cents for every person of voting age in the district, or $50,000 whichever is greater.[52] No more than sixty percent of this money may be used for advertising through the electronic media.[53] The Act also limits the amount which a broadcasting station may charge a candidate for a political advertisement of the same class and amount of time broadcast during the same period of the day.[54] Candidates in a presidential primary have a ceiling on expenditures for radio or television time similar to that of an individual running for the senate from that state.[55] These limitations had the effect in 1972 of limiting candidates for the Senate from, for example, Wyoming to the minimum of $50,000 in total media expenditures, while candidates from California would have been limited to $1,394,000.[56] In addition, the Act limits the amount which a candidate or a member of his immediate family [57] can contribute to his own campaign. Candidates for the Presidency and the Vice-Presidency are limited to expenditures of $50,000 out of family funds; candidates for the Senate are limited to $35,000; and candidates for the House of Representatives are confined to a contribution not in excess of $25,000 from family resources.[58] Finally, the Act is best known for its disclosure requirements. Candidates are required periodically [59] to make reports of all receipts and expenditures, including the names and addresses of all contributors of more than $100 and all persons to whom expenditures of over $100 have been made.[60] Political committees, defined as organizations which make expenditures or accept contributions of over $1,000 in a calendar year,[61] are also covered by these requirements.[62] These reports are made to the Secretary of the Senate by Senate candidates, to the Clerk of the House of Representatives by House candidates, and to the Comptroller General by presidential and vice-presidential candidates.[63] In addition, reports must be filed with the Secretary of State of the state in which the candidate seeks election, or in the case of presidential and vice-presidential candidates, of each state in which an expenditure is made.[64] These disclosure requirements made available reliable information on campaign financing for the 1972 elections, for the first time in American history, at least after the April 7th deadline.[65]

The Dollar Check-Off Act represents the first real breakthrough in history in the area of public funding of campaigns. Under this Act, every taxpayer may designate one dollar, or two dollars in the case of a joint return, to be deposited in a Presidential Election Campaign Fund.[66] The money in the Fund is to be used to cover the campaign expenses of presidential general elections. The candidates of major parties—those which received twenty-five percent of the popular vote in the previous election [67]—are, if they so choose, entitled to receive fifteen cents for every person of voting age in the country to be used to finance their campaigns, provided that they meet a number of conditions.[68] First, they must not exceed in expenditures the amount of their share of the public fund and must accept no private contributions,[69] second, they must keep certain financial records for inspection by the Comptroller General.[70] A candidate of a minor party—defined as one whose candidate received between five percent and twenty-five percent of the popular vote in the preceding presidential election [71]—may be funded in the same proportion to the major party subsidy as its previous popular vote bears to the average popular vote of the major parties.[72] A minor party accepting federal funding, unlike a major party, would be allowed to accept private contributions, but only up to the limit of major party funding.[73] A party which received less than five percent of the total popular vote in the previous election is termed a "new party," [74] and is eligible to receive retroactive federal funding if it receives at least five percent of the vote in the current election. If this condition is met, the party's subsidy is calculated by the same formula as the subsidy of a minor party, except that figures for the current election are used.[75] The new party formula may also be used by minor parties, subject to offset for whatever funds it received under the minor party formula.[76]

In its first year of operation, only slightly over three percent of the taxpayers availed themselves of the check-off privilege.[77] A major reason for the disappointing participation in the program was that the check-off was included on a separate form in the income tax materials and was not only difficult to find, but also was not described in understandable language.[78] Many citizens were unaware of its existence and unaware that the dollar donation did not increase their personal tax liability.[79] Thus, the check-off's failure in the initial year of operation did not necessarily indicate a lack of public interest in public campaign financing. Fortunately, in 1974 the check-off box is being placed at line eight of page one on both the long and short tax form. It should be both conspicuous to and understandable by the taxpayer.[80]

REFORM PROPOSALS

CANNON BILL

In April, 1974, the Senate passed and sent to the House the Federal Election Campaign Act Amendments of 1974,[81] a bill which provides for the federal financing of campaigns for federal office. In addition the bill imposes limitations on overall campaign expenditures and contributions to a candidate.[82] The funding is optional and extends to both primary and general elections. The proposal provides for matching grants in the primary elections, based on contributions of $250 or less for President and $100 or less for Senator or Representative.[83] Primary candidates would be allowed to spend eight cents times the voting age population, except that candidates for Senator and Representative from one-district states would be allowed to spend at least $125,000, and candidates for Representative from all other states at least $90,000.[84] Candidates in presidential primaries would be allowed to spend twice the amount allowed Senate candidates from that state.[85]

Major party candidates [86] who opt for public funding could receive in the general election a subsidy equal to the full amount of the expenditure limitations.[87] For all federal candidates the spending limit is twelve cents per voting age person, except that candidates for Senator or Representative in one-district states are allowed at least $175,000 and all other candidates for Representative at least $90,000.[88] Minor party candidates [89] would be allowed funding based on past or current performance.[90] All other candidates would be allowed retroactive funding based on current performance.[91] To make monitoring of spending easier, candidates would be required to establish a central committee and campaign depositories, through which all money must be channelled.[92] The system is to be supervised by an independent commission.[93]

Contributions to a candidate are limited to $3,000 by an individual and $6,000 by a committee or organization. No individual may donate more than $25,000 in total contributions in a year. Other provisions of the bill would amend the equal time provision of the Communications Act of 1934,[95] provide for financial disclosure for all federal office-holders and candidates,[96] and change the date and time of federal elections.[97]

The Cannon bill represents only one approach to the question of public financing of elections. Numerous alternatives to it have been suggested in other recent proposals. Since the bill must be passed by the House and signed by the President before it becomes law, an examination of these other proposals is useful. For example, the House could pass legislation that differs from the Cannon bill, and incorporates provisions taken from these other proposals. Also, even if the House enacts the Cannon bill, the President could veto it; in which case one of these presently dormant bills could be revived. Finally a discussion of the alternative proposals provides a useful framework for analysis of the policy questions relating to public financing of elections.

THE NIXON PROPOSAL

On March 8, 1974, President Richard M. Nixon delivered a message to the Congress setting forth his proposal with respect to campaign financing.[98] In the President's view "the single most important action to reform campaign financing should be broader public disclosure." [99] To this end Mr. Nixon proposes that all candidates in federal elections be required to designate one committee to handle all campaign funds, and that indirect private contributions through organizations be severely limited.[100] In addition, to augment the reform implemented by the disclosure requirements, the President recommends that there be limits placed on individual contributions to campaigns.[101] The President, however, specifically opposes both ceilings

on total campaign spending by a candidate and the public financing of elections.[102]

THE HART BILL

The Congressional Election Finance Bill of 1973[103] proposed by Senator Hart is one of the leading congressional bills providing for public financing of elections. Covering nomination and election to Congress but not to the presidency.[104] the bill is most notable for its requirement of a threshold showing of support to qualify a candidate for public funding. A candidate of a major party,[105] if he chooses to participate in the optional program, must post a security deposit of twenty percent of the subsidy which he is entitled to receive.[106] The security deposit, composed of small contributions,[107] will be refunded to the contributors if the candidate receives a minimum percentage of the vote in the election.[108] If the candidate fails to receive an even small percentage of votes, he must repay the entire subsidy to the government.[109]

The amount of the subsidy is sufficient to run a relatively strong campaign.[110] Minor party candidates are eligible to receive a smaller subsidy.[111] In addition, a candidate may supplement the subsidy to which he is entitled with money raised from small private contributions.[112] Those candidates who elect not to receive public fundings are not limited either in spending or in contributions.[113]

THE KENNEDY-SCOTT BILL

The Federal Election Campaign Act[114] introduced by Senators Kennedy and Scott, passed the Senate in late 1973 as a rider to a debt-ceiling bill, but was not enacted into law at that time.[115] It would extend the Dollar Check-Off Act[116] to congressional general elections but not to primaries, and would increase the amount of the check-off from one dollar to two dollars, or to four dollars on a joint return.[117] Private contributions would be prohibited by the Kennedy-Scott Bill in all federal general elections, but again not in the primaries.[118] The amount of the subsidy would tend to maintain present spending levels.[119]

THE STEVENSON-MATHIAS BILL

The Federal Election Finance Act of 1973,[120] introduced by Senators Stevenson and Mathias, relies heavily on private financing and provides for public financing in all federal general elections, but not in primaries.[121] The subsidy is optional, but the bill provides an overall spending ceiling on all primary and general election campaigns somewhat higher than that contained in the Campaign Amendments Bill of 1973.[122] On the other hand, the provisions of the two bills limiting private contributions are similar.[123] Candidates may receive up to one-third the maximum spending amount from the public treasury[124] and may qualify for funding in one of two ways, past performance and submission of petition signatures.[125]

THE MONDALE-SCHWEIKER BILL

The Mondale-Schweiker Bill, also known as the Presidential Campaign Financing Act of the 1973.[126] provides public financing for presidential candidates only. It utilizes a variation of the Dollar Check-Off Act[127] for purposes of the general election and a system of matching grants in the pre-nomination campaign. Each dollar designated by the taxpayer will be matched by the treasury in the general election.[128] with candidates able to supplement the subsidy with private funds.[129] For pre-nomination campaigns, the fund matches small contributions once the candidate has amassed a "trigger."[130] The proposal contains relatively generous spending and contribution ceilings.[131]

THE CRANSTON BILL

The Clean Election Financing Act of 1973,[132] introduced by Senator Cranston, provides for a financing system in all federal elections which depends to a very great extent on public subsidies. The program is to be funded on a variation of the Dollar Check-Off Act,[133] and grants matching payments in the primaries and flat subsidies in the general elections. Individual private contributions are severely limited,[134] whereas spending ceilings are generous.[135] To qualify for subsidies in pre-nomination campaigns, candidates must raise a "trigger fund" from small contributions,[136] they are then entitled to receive matching payments in the proportion of four dollars for every one dollar raised from private contributions of limited amounts.[137] In general election campaigns, the system provides a grant to major party candidates of eighty percent of the spending limit.[138] Candidates of other than major parties receive smaller subsidies.[139]

THE CLARK BILL

The Comprehensive Election Reform Act of 1974,[140] introduced by Senator Clark, would virtually eliminate the role of private financing in all federal primary and general elections while providing for generous public subsidies based on the Check-Off Act to both candidates and political parties. Under the proposal, primary candidates would qualify for funding by submitting petition signatures.[141] In general elections, major party candidates would be given full funding, and minor party and independent candidates partial funding based on past or current performance.[142] Private money would be prohibited except in petition drives and minor party and independent campaigns.[143] The subsidy would be subject to repayment according to the candidate's electoral performance.[144]

THE ANDERSON-UDALL BILL

The Clean Election Act of 1973,[145] introduced in the House by Representatives Anderson and Udall, is another matching payment proposal and is perhaps most notable for its provision for free broadcasting time for candidates. The campaign subsidy is provided in all federal primary and general election campaigns.[146] The proposal is unique among the bills in that, in presidential general election campaigns, funding is to be made to party committee rather than to the candidates themselves,[147] the idea being to allow party committees to play a key role in the campaigns of presidential nominees. Once a candidate or committee has amassed a small "trigger fund," [148] the first $50 of each contribution[149] is matched by the government, until a certain level of subsidy is reached.[150]

Under the proposal for free broadcasting time—to be called "Voter's Time"—federal candidates in general elections may qualify for a certain number of prime time blocks of television time to be aired, in most cases, simultaneously[151] over all stations in the district. Each broadcast must include a substantial live appearance of the candidate and be of a format designed to promote rational political discussion, to illuminate campaign issues, and to give the audience insight into the abilities and personal qualities of the candidate.[152]

THE BIDEN PROPOSAL

The Cannon Bill, as recently passed by the Senate, is a significant step towards the enactment of a plan of publicly financed elections. For this reason I voted in favor of its passage. However, in the process of formulating my own thoughts on the issue of campaign financing. I find that I differ from the Cannon Bill in certain respects. The following is a discussion of what I would propose ideally as a plan for public financing.

Briefly, my proposal would cover both nomination and general elections for all federal offices. It would provide federal subsidies to candidates for nomination based both on petition signatures and on security deposits from small contributions. For general elections it would provide funding for major party candidates, with funding up to the major party amount for other candidates based not on past performance, but on petition signatures or security deposits. Public funding would be adequate to run a competitive race. In addition, subsidies in kind would be given. Small private contributions would be allowed, but cash contributions of $50 or more would be prohibited as well as large contributions from a candidate's personal or family funds. In an effort to offset constitutional objections that expenditure limitations are an infringement on the first amendment, total campaign spending would be limited at either a high level or not at all. To enforce the plan, an independent elections commission would be created. Most importantly, candidates would be required to maintain one central "checkpoint" to monitor all financial transactions.

WHICH ELECTIONS TO COVER?

The deficiencies of our present method of financing campaigns are found throughout the entire electoral system. Correspondingly, they should be corrected everywhere. Although the problem of presidential campaign financing is perhaps most visible, reform is also needed with regard to congressional campaigns. The Hart[153] and Mondale-Schweiker[154] bills cover only congressional or presidential campaigns respectively and thus leave the completion of the reform process until a later date. Nevertheless, it seems necessary to cover all levels of the federal election process simultaneously. If, for example, large sums of private money were precluded only from presidential campaigns, they might have moved to congressional campaigns. Reforms of presidential campaign financing at the expense of creating more severe problems for congressional campaigns is no reform at all.

The above problem also arises in connection with any attempt to provide public financing for general election campaigns, while leaving primaries and primary runoffs unregulated. It has been suggested that any public financing system which attempts to include primaries within its coverage has a minimal chance of enactment.[155] If the Congress is serious about reform of the political process, however, primaries should not be ignored. Private money statutorily excluded from the general election may be used to influence the primaries and the evil of its presence at that level of an election is no less real than in the general election itself. In fact, in certain circumstances large contributions may be more influential in the primary than in the general election.[156] Thus, any system of campaign financing which would be both workable and fair would necessarily have to cover primary and general elections for all federal elections.

ARE SUBSIDIES NECESSARY?

Some have commented that the Federal Election Campaign Act of 1971 [157] should be given an opportunity to demonstrate its effectiveness before further reform is attempted,[158] or that appropriate limitations on contributions and expenditures should be adequate to cure the current evils.[159] It would seem clear, however, that neither of these two partial reforms is sufficient to correct the widespread shortcomings of current campaign practices.

The disclosure requirements of the 1971 Act, it is argued, were not given a chance to prove themselves in the 1972 elections because of the April 7 loophole.[160] If operative for the entire campaign process, the argument continues, the requirements would be effective and render subsidies unnecessary, because large private contributions cannot stand "the light of day." The public reaction to a candidate receiving special interest contributions and to interest groups making large contributions will be so adverse that both parties will stop the practice. Both fact and logic, however, would seem to demonstrate the remoteness of that possibility. First, although substantial 1972 contributions were made before April 7 to avoid the reporting requirement, most candidates, especially those for Congress, appeared to obey both the spirit and the letter of the law and reported large amounts of interest group contributions.[161] Nevertheless, no large scale public reaction to these contributions occurred. There has, of course, been a great public reaction since the 1972 election to allegations of misconduct involving large presidential campaign contributions. The aim of campaign finance reform, however, is to prevent not just the undue influence of a $400,000 presidential contribution but also of a $5,000 congressional contribution.

The problem of insufficient campaign funds is also the drawback of a statutory system dependent solely on limitations on contributions and spending. If contributions by interest groups were sharply limited, many candidates, especially those challenging incumbents, might suffer from a serious lack of funds. Such a system without the addition of public funding would be likely to "lock-in" incumbents to a greater extent than they are at present. Challengers, especially those without access to wealthy individuals as a source of funds, would be likely to have greater difficulty than incumbents in raising adequate small contributions to compensate for the loss of large contributions. This result would be intensified if low limitations on overall spending were enacted. Incumbents already can secure reelection with little effort; we hardly need to make it easier for them. Thus, the need for public subsidies is demonstrated.

A MIXED PUBLIC AND PRIVATE SYSTEM

The answer to the problem of creating a campaign finance system which diminishes the influence of interest groups without "locking-in" incumbents would seem to be a scheme of public subsidies supplemented, for constitutional reasons,[162] by small private contributions. The full subsidy should be sufficient to allow a candidate to run a reasonable race, but additional provisions should be made, particularly in the primaries, for partial funding, at least until a candidate is able to take his campaign to the public and thereby obtain sufficient support to qualify for the full amount of public funds.

My proposal would not be based on matching grants for a number of reasons. Matching grant proposals provide money for those who already have sufficient financing under the present system, but makes it difficult for precisely those candidates whom the system should be designed to help—the non-wealthy individual. Incumbents, for example, would not find it difficult to raise the funds necessary to receive similar sums from the treasury. A matching grant of $50 as provided for in the Anderson-Udall Bill [163] or $100 as provided for in the Cranston Bill [164] may not sound like a very large amount to raise when compared with some of the huge contributions publicized recently,[165] but it is clearly beyond the capacities of most Americans. If candidates were permitted to use public money only after they had demonstrated strength by raising private money, the well-to-do would maintain their present stranglehold on the supply of public offices.[166] Furthermore, by magnifying the difference in private money raised by the candidates, matching grants place the non-wealthy individual at a "self-perpetuating disadvantage." [167] Every extra dollar raised by an incumbent or a wealthy candidate over his opponent actually becomes two dollars to use to influence the electorate and to raise more money. The less affluent candidate would thus find it increasingly difficult to catch up. A system of matching grants combined with small private contributions would, in short, satisfy one of the three goals of campaign reform—that of curtailing the influence of special interest money—but not the other two. Non-wealthy individuals with no access to the wealthy would still be shut off from running for public office and incumbents would still retain a tremendous advantage over challengers.[168]

The system which I would prefer to see enacted would allow less wealthy individuals greater financial access to the political arena. The full-funding amount would be, for the Senate and the Presidency, ten cents per voting age person in the district in the primary—including the entire pre-nomination period in the case of the Presidency—and fifteen cents per voting age person in the general election. The minimum subsidy would be $100,000 and $150,000 in Senate primary and general elections. Candidates for the House of Representatives would be eligible to receive a full-funding amount of twenty cents per voting age person in the primary and twenty-five cents in the general election, with a minimum full subsidy of $40,000 and $50,000 respectively. A House candidate from a one-district state would, however, receive the subsidy which a Senate candidate from that state would receive because the constituencies and thus the needs of the candidates are the same. Candidates in primary run-off elections would be given half the total subsidy which they had received in the primary.

The amounts would be sufficient to enable a candidate to take his case before the voters. A candidate for the presidential nomination could receive up to $14,000,000 and could spend that amount in any way which he chose to win the nomination; he would not be restricted to spending his subsidy in primaries, but could use it in state or local conventions or at the national convention. A presidential nominee who qualified for the full-funding amount would receive about $21,000,000.[169] The full-funding amount for a candidate for the Senate from, for example, Minnesota would be about $250,000 in the primary and $375,000 in the general election.[170] The amounts for a Senate candidate from Ohio would be $720,000 and $1,080,000 and for New York $1,280,000 and $1,900,000.[171] A congressional candidate from a typical district with 300,000 residents of voting age would receive up to the full subsidy of $60,000 in the primary and $75,000 in the general election.

In primary elections, funding would be qualified in two ways. The first would be a variation of the Hart Bill's security deposit.[172] As in the Hart Bill, a candidate for the House or Senate would have to raise twenty percent of the full amount of the primary subsidy in contributions of $250 or less.[173] He would then qualify to receive the full subsidy. Also, as in the Hart Bill, if the candidate received ten percent of the vote or more, the security deposit would be refunded to his contributors; otherwise, unless he withdrew from the primary more than one month before the election, it would be forfeited. Unlike the Hart Bill, under my proposal a candidate would not be forced to repay the amount of his subsidy if he received few votes in the election. It hardly seems to be good policy to permit a candidate to risk placing himself in debt for years because he might lose the election. One of the goals of campaign reform is to induce more people to enter the political process. To frighten people away because of a large penalty for failure is inconsistent with that goal.

The security deposit method of qualification would also be available for candidates for the presidential nomination. Because of the great amount of money involved, however, the security deposit would be five percent of the full subsidy, or, for the current population, $700,000 in contributions of $500 or less. The amount would be refunded to the contributors if the candidate attained a minimal level of success, in particular if he received the nomination or if he was one of the top three finishers, in total votes, on the first ballot at his party's convention.

One drawback to the security deposit system is that it would tend to give public money to those already capable of raising a substantial amount of private funds. Nevertheless, the reason for requiring candidates to qualify for public subsidies is to prevent frivolous candidates with no hope of victory from receiving money. It certainly cannot be said that a candidate for the Presidency who is able to raise $700,000 from contributions of $500 or less is a frivolous one. Similarly, an individual able to raise $9,000 from contributions of $250 or less is likely to run a competitive race for the House of Representatives.

Nevertheless, candidates should not be limited to the security deposit method of qualifying for public funds. First, the security deposit would, in practice, be limited to those who have access to substantial amounts of private money. Qualified potential officeholders are not found solely among the rich, but the security deposit system would tend to attract candidates from this group exclusively. Second, since the security deposit is an "all or nothing" device, with no provision for partial funding, it places a premium on immediate celebrity.

Therefore, there should be an alternative method of qualifying for federal funding, namely petition signatures. A candidate for any federal office should, if he submits signatures of ten percent of the registered voters in his potential constituency, receive the full subsidy.[174] Under this system, he would also qualify for partial funding. For each ten percent of the signatures required for full-funding which a candidate submits, he should receive ten percent of the full-

funding amount. In other words, if a candidate submitted signatures equaling one percent of the registered voters in his potential constituency, this would amount to ten percent of the amount required for full-funding and he would be entitled to receive ten percent of the full-funding amount. He could then begin his campaign and try to sell the public on his candidacy. If his candidacy "caught hold," he would be able to obtain more signatures and thus receive more money from the government. This method would be especially appealing to potential presidential candidates. An individual could submit the minimal amount of signatures and receive enough money to enter a few primaries. If he did well there, he should be able to obtain additional signatures, sufficient to take his candidacy to primaries in other states. This "snowball" effect might propel to victory a candidate who might otherwise not be able to enter the race at all. In this way candidates would be given the opportunity to prove themselves, and the public would receive the benefit of an influx of new and, in all likelihood, talented individuals into the political process.

In general elections, candidates of major parties—which would be defined, as in present law,[175] as those whose candidates received in the previous election twenty-five percent of the votes for that office— would receive the full subsidy without having to submit signatures or file a security deposit. The danger is present that this proposal would become an "immorality law" for the Democratic and Republican parties because their continual existence would be virtually assured by a guaranteed source of funds for their candidates. Nevertheless, it seems almost certain that their candidates would qualify for full-funding if required to do so. For them to obtain signatures or contributions for a security deposit would amount to mere busy-work.

Independent candidates and those of non-major parties, on the other hand, would be required, as in primary campaigns, either to file a security deposit or to submit signatures in order to qualify for public funding. The pending proposals base minor party qualification for funding either on performance in the previous election or, by means of retroactive funding, on the party's performance in the current election, whichever formula generates the greater subsidy. This method, however, has several drawbacks. To base funding on past performance [176] makes it difficult for a new party to become established. A party can rarely become successful without money, yet the parties are not eligible to receive money *unless* they have proven relatively successful in the past. The other proposals generally provide for retroactive funding *after* the election for parties which have done well without it. By its very nature, therefore, this subsidy comes after the money could be of any help to fledgling political parties. Retroactive funding is really a reward for past performance, whereas public funding should be a vehicle for achieving future success.

One objection concerning public financing of general election campaigns is that to finance the campaign of the opponent of an entrenched incumbent is a waste of the taxpayer's money.[177] The opponent has very little chance of winning anyway, the argument goes, so it serves no purpose to give him money. Furthermore, according to this reasoning, it is wasteful to give money to the incumbent since he can obtain private financing so easily. It seems to me, however, that our electoral system could be improved only by promoting vigorous contests between incumbents and challengers. Perhaps incumbents would still win the vast majority of their elections; nevertheless, with an adequately financed opponent they would not be as assured of victory as they are under the present system of financing campaigns.[178] This increased competition would force incumbents to be more responsive to the interests of their constituents, for they would be truly accountable to the electorate at the next election. As one political scientist has observed.[179]

"Elections have become the first and most important article in our unwritten constitutional arrangements. They give people a direct check upon officials. But elections—like the separation of powers—depend entirely upon the counterposing of ambitions of men. Here candidates provide the necessary competition.

"Their campaigns alert the people to the on-coming election; advance their personal qualifications and program [sic]; and supply a searching scrutiny of the opposition record. Only with this kind of vigorous competition are elections meaningful. Without it, they present the people no real choices and are as irrelevant to self-government as the staged elections in authoritarian countries."

The argument that incumbents should not receive money from the government because they are able to raise sufficient private funds overlooks one of the major goals which campaign financing reform is designed to achieve. The object of the proposal is not simply to enable poor people or non-incumbents to run for office, but also to diminish the domination of politics by special interests. To achieve that goal, the reliance of incumbents on large private contributions must be ended.

PAYMENTS IN KIND

In addition to subsidy payments, the government could provide candidates with services, namely reduced postage rates and free broadcasting time. If these proposals are adopted, campaign expenses would decrease and the amount of the cash subsidy could be decreased accordingly. Although I have serious doubts, on a constitutional level, concerning the proposal, the idea of giving candidates free access to the broadcast media has received great attention and has been endorsed by a number of organizations.[180] Television and radio are perhaps the most effective as well as possibly the most expensive means which a candidate has available for reaching the voters. Campaign advertising through these media have been the subject of increasing criticism because of the "slick" techniques used.[181] In fact, most of the criticism directed against the "Madison Avenue" approach to campaigning has been a result of the use of television, particularly "spot advertising" of a minute or less. A proposal such as the Anderson-Udall Bill's "Voter's Time,"[182] which provides for free television use in large blocks of time, would go far toward mitigating these problems. By making free time available to all candidates [183] the use by well-financed campaigns of what has become known as a "media blitz" would be eliminated. At the same time, because the Anderson-Udall Bill provides for campaign broadcasts to be aired over all stations simultaneously, it removes a traditional drawback of long political programs—the tendency of viewers to watch competing entertainment programs instead.[184]

Candidates could also be provided gratuitous services with respect to their use of the mails. Rather than prohibit the use of the "frank" for mass mailing of newsletters during campaigns, as one bill provides,[185] Congress should extend the "frank" to all candidates for federal office for perhaps two free mailings of campaign materials.[186] Without the full use of the "frank" during campaign periods, incumbents are still able before the campaign period to use the "frank" at least indirectly for re-election purposes by means of both mass mailings and personal letters. Fairness therefore dictates that challengers be allowed to use the "frank" as well. Such a measure would also help decrease campaign costs.

Because of the tendency by voters to ignore campaign mailings as "junk-mail," a sounder proposal would be to issue a "Voter's Pamphlet," as is already done by the states of Washington[187] and Oregon.[188] This pamphlet would be published by the government and mailed to all registered voters. Space would be made available to each candidate for a picture and a statement setting forth his personal background and program. The pamphlet would be less expensive than individual mailings, and because it contains information about all candidates, less likely to be discarded without reading. The pamphlet would probably be the best means available to provide voters with information about the various issues and to make intelligent decisions about the candidates. A "Voter's Pamphlet" proposal was made on the floor of the Senate in 1973 in the form of an amendment to a bill. Regrettably the amendment was withdrawn because it had not been studied in committee.[189] It is hoped, however, that such a proposal will be adopted in the future.[190]

LIMITATIONS ON CONTRIBUTIONS

The most direct method of curtailing the influence of large contributions on the political process is simply to limit them outright. Because of constitutional considerations,[191] it seems unlikely that contributions can be prohibited entirely. Nevertheless, a reasonable limitation could satisfy the constitutional considerations,[191] it seems unlikely that contributions can be prohibited entirely. Nevertheless, a reasonable limitation could satisfy the constitutional standard by maintaining an outlet for citizen expression of candidate preference. The $3,000 limitation adopted in the Cannon Bill,[192] however, seems too high to achieve the desired purpose. Many contributions made by special interest groups presently are not above $3,000.[193] An incumbent's campaign for the House of Representatives might cost $75,000, and in such a campaign $3,000 is a significant figure. A limitation of $500 on contributions by individuals or political committees to any campaign or political committee with an overall limitation of $2,500 on all such contributions in a calendar year, would appear more likely to eliminate the undue influence of special interests in the electoral process. Such a limitation would also be large enough to satisfy constitutional requirements.[194] The limitation on contributions by a candidate or his family to his own campaign, however, should not be quite so small. There are certain "start-up" expenditures involved in any campaign, particularly to qualify for public funding. A limitation of $3,000 from personal and family funds would seem to be sufficiently high for a candidate to begin his campaign and sufficiently low to prevent wealthy candidates from buying their way into office.

LIMITATION ON EXPENDITURES

Although the increasing cost of campaigning has been cause for public concern, the beneficiary of a low limitation on total campaign spending will not be the public, but rather incumbents, who do not need to spend as much money on the campaigns as do their challengers.[195] The Senate-passed Cannon Bill in particular works to the advantage of incumbents,[196] with its $90,000 limitation for House campaigns.[197] The average expenses of all challengers who defeated an incumbent Representative in 1972 exceed that figure by $35,000.[198] Chances are that, had the $90,000 limitation been in effect in 1972, those defeated incumbents would still be serving in the Congress.

Three possible reasons can be advanced for enacting some limitation on overall expenditures. First, it would prevent an affluent candidate from being able to finance a lavish campaign. Second, it would prevent wealthy contributors from doing the same on behalf of favored candidates. And third, it would prevent the use of sophisticated and expensive advertising techniques which sell candidates to the public as if they were laundry detergents. The first two of these goals, however, are achieved more directly by limitations on contributions. Furthermore, although the present use of certain advertising techniques is disturbing, as well as debasing, it is not nearly as disturbing as the prospect of providing life terms for incumbent office holders which might occur if a fairly low overall expenditure limitation was enacted into law. Moreover, limitations on contributions would provide a rough check on spending. Limited to $500 per contributor, candidates would not easily procure the funds to allow excessive spending.

Nevertheless, campaign expenditures should be limited, at least to some degree, for two reasons. It would assure that expenditures do not get completely out of hand and it would prevent candidates with access to the wealthy from amassing a large number of $500 contributions. For these purposes an appropriate limitation would be $200,000 each for primary and general election campaigns for the House of Representatives and twenty cents and twenty-five cents per voting age person in pre-nomination and general election campaigns respectively for both the Senate and the Presidency.

The best way to enforce these limitations would be to require each campaign to designate one central "check point" through which all receipts and expenditures would be channeled. Similarly, each campaign would be required to maintain one designated bank account, which would be the sole repository of campaign funds, After the campaign—and, perhaps, at periodic intervals during the campaign—a candidate would be required to make public this account together with all its deposits and withdrawals. Since all campaign expenditures could be withdrawn from this account, the amount of withdrawals could not exceed the limitation on spending. To prevent candidates from evading this requirement there would have to be a prohibition on all large cash transactions—for example, above $50.

SUPERVISION

The 1971 Campaign Act provides for a tripartite system of supervision, with disclosure reports required to be made to three enforcing congressional officers, the Secretary of the Senate, the Clerk of the House of Representatives, and the Comptroller General.[199] In addition, reports must be made to the Secretary of State of the state in which the campaign is being conducted.[200] This system was generally effective in the last national elections,[201] nevertheless, the full-time and vigorous enforcement necessary to carry out campaign reform requires an independent supervisory commission.

In reforming the electoral process one of the major goals is restoring public confidence in the political system. Thus, any enactment must have the appearance of genuine reform. The major drawback of the present enforcement system is that supervision by employees of those who are to be supervised, no matter how effective it may in fact be, gives the appearance of only a half-hearted effort at reform. Not only is there an inherent conflict of interest between the supervisory duties of those to whom reports are presently to be made and their position as employees of party leaders and candidates in their own right, but also it is doubtful that they have the staffs or resources necessary to enforce a public financing system.[202]

The system proposed by the Campaign Amendments Bill[203] is an improvement on the present system. It provides for a bipartisan commission composed of members appointed by a process in which the President, congressional leaders of both parties, and Congress itself participate. This commission would have complete enforcement powers including that of initiating criminal proceedings. It has the advantage of being dominated neither by one branch of government, nor by one political party.

An intriguing suggestion has been made by an academician to draw the members of the commission from the ranks of retired judges.[204] The proposal has the advantage of assuring the public that the commission members would be independent. It could be combined with an attractive proposal made by the Director of the Office of Federal Elections of the General Accounting Office that the commission members serve part-time and be supported by a large professional staff and a "strong executive director."[205] Talented individuals might be more attracted to serve in a part-time position rather than in a full-time capacity.[206] In addition, the commission should be given, along with its powers to initiate criminal proceedings, the power to initiate civil proceedings and the power to exact civil penalties.[207]

A provision for a commission was originally part of the 1971 Campaign Act, but was removed because of opposition by the House of Representatives.[208] The same fate should not await any bill enacted in the future. Unless Congress wishes to give the impression that it is converting the present statutory campaign finance system, which is "more loophole than law,"[209] into one in which violations are difficult to enforce, a strong, independent campaign commission must be created.

SUMMARY

In a fashion similar to the Cannon Bill, recently passed by the Senate, the system which I have outlined here would go a long way towards eradicating the major evils inherent in the current method of financing campaigns. By limiting contributions and by limiting spending, a curb would be imposed on the power of special-interest groups. The public subsidy would enable more people from diverse economic backgrounds to run for office and would help challengers to run more vigorous campaigns against incumbents. The fulfillment of these last two goals would be served in particular under my proposal by the provisions authorizing an alternative method of qualifying for funding simply by presenting petition signatures, since it would enable individuals without significant access to wealth to run for office and would allow them to receive increasing amounts of partial funding as the campaign progressed.

A CONSTITUTIONAL DEFENSE

Federal regulation of campaign financing poses several potential problems from a constitutional standpoint. Specifically, two general issues are raised by the legislation recommended both by this article and by the other proposals already introduced into the Congress. The first is whether Congress has the constitutional authority to enact such legislation, and the second is whether this type of legislation violates constitutional rights of a candidate or members of the electorate.[210]

CONSTITUTIONAL AUTHORITY FOR REGULATION OF ELECTIONS

With respect to the regulation of congressional elections, the authority of Congress is derived from article I, section 4 of the Constitution, which states: "The times, places and manner of holding elections for Senators and Representatives, shall be prescribed in each state by the Legislature thereof; but the Congress may at any time by law make or alter such regulations. . . ."[211] A program which combines federal subsidies with limitations on contributions and expenditures would appear to deal with the "manner" of holding elections and, therefore, to be a proper exercise of congressional authority. This view is supported by a broad interpretation given the phrase "times, places and manner" by the Supreme Court in *Smiley v. Holm*,[212] in which it stated:[213]

"[T]hese comprehensive words embrace authority to provide a complete code for congressional elections, not only as to times and places, but in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practices, counting of votes, duties of inspectors and canvassers, and making and publication of election returns; in short, to enact the numerous requirements as to procedure and safeguards which experience shows are necessary in order to enforce the fundamental right involved."

The *Smiley* Court further ruled that article I, section 4 gave the Congress "a general supervisory power over the whole subject"[214] of congressional elections. It seems apparent, therefore, that, at least with respect to congressional elections, Congress has the authority to regulate federal campaign spending.[215]

The congressional power to impose similar legislation on a presidential campaign presents a more difficult question. The Constitution provides that it is the state which "shall appoint, in such manner as the legislature thereof may direct," its presidential electors.[216] Indeed Congress' express authority extends only to "the time of choosing the Electors, and the day on which they shall give their votes."[217] The propositions, however, that the states possessed exclusive authority over the "manner" of presidential elections was put to rest in *Burroughs and Cannon v. United States*.[218] That case involved a constitutional challenge to a section of the Corrupt Practices Act of 1925,[219] which required that any political committee accepting contributions or making expenditures for the purpose of influencing the election of presidential electors file state-

ments containing the name and address of each contributor. In sustaining the constitutional validity of the statute, the Court expressly rejected the argument that congressional authority in this area was limited merely to setting the date for selection of electors and the date on which those electors were to cast their votes.[220] The Court added that Congress has the power on policy grounds to enact substantive legislation affecting the conduct of elections.[221]

"The importance of [a presidential] election and the vital character of its relationship to and effect upon the welfare and safety of the whole people cannot be too strongly stated. To say that Congress is without power to pass appropriate legislation to safeguard such an election from improper use of money to influence the result is to deny to the nation in a vital particular the power of self-protection. Congress, undoubtedly, possesses that power, as it possesses every other power essential to preserve the departments and institutions of the general government from impairment or destruction, whether threatened by force or by corruption."

Admittedly, *Burroughs* might be limited on its facts to controversies concerning disclosure laws. In that cae, however, the petitioner's constitutional objection was that the statute allowed Congress to invade an area under the exclusive authority of the states. Since the Court overruled this objection with respect to a filing requirement, it seems reasonable that an objection to Congress' power to enact a program of federally subsidized elections would similarly be overruled. This conclusion is supported by the broad language employed by the Court in the *Burroughs* opinion. In holding that Congress possessed the power "to pass appropriate legislation to safeguard [a presidential election] from the improper use of money to influence the result,"[222] the Court apparently left room for legislation combining government subsidies with limitations on contributions and campaign spending.[223]

A final question with regard to congressional authority to enact one of the proposed reform bills is whether Congress has the power to regulate campaign primaries. Although the Court had discussed the question previously,[224] the first decision on the issue of whether the constitutional grant of power to regulate "the manner of holding elections" [225] extended to primary elections was rendered in *United States v. Classic.*[226] An eight-man majority in that case held.[227]

"[T]he authority of Congress, given by § 4, includes the authority to regulate primaries when, as in this case, they are a step in the exercise by the people of their choice of representatives in Congress."

Although victory in the primary in that jurisdiction was tantamount to victory in the general election, that fact was not crucial to the decision of the Court. Moreover, in subsequent cases, the primary has been held to be a part of the general election process without the presence of any such special circumstances.[228]

The constitutional provisions dealing with the regulation of elections have, as these cases demonstrate, been broadly construed. As a result, Congress possesses far-reaching authority to enact measures necessary to protect the integrity of the electoral process. The scope of the authority extends beyond the comparatively explicit constitutional delegation with respect to congressional elections and includes presidential and primary elections. Given the policy motivation for enactment, passage of the proposed program of federal subsidies combined with contributions and spending limits is clearly within the constitutional authority of the Congress.

LIMITATION ON CONTRIBUTIONS

A number of commentators have expressed doubt concerning the constitutionality of limitations on the size of campaign contributions.[229] Indeed, supporters of public financing themselves have expressed concern in this area. These doubts are based on the belief that a contribution to a political campaign is a means of political expression, and since free political expression is protected by the first amendment,[230] political expression in the form of a campaign contribution is similarly protected. Under this view, the act of contributing is characterized as symbolic speech.

As a threshold consideration, two factors must be taken into account here. First, it is not at all clear that the act of making unlimited contributions to a political campaign is protected as "speech" under the first amendment. Second, assuming that the act is so protected, the state interest in preserving the integrity of the electoral and governmental processes from the corruptive influence of large contributors might be found to be sufficiently compelling to justify an incidental infringement on first amendments rights.

The first amendment clearly protects more than purely verbal communications.[231] It may well be, however, that courts will not regard a campaign contribution as protected symbolic speech. When pure speech is joined with verbal acts which are not necessary to the communication, the state may regulate that mode of expression.[232] Certainly, a limitation on contributions does not abridge free speech on its face because "there is nothing necessarily expressive about" contributing to a political campaign.[233] Nevertheless, the argument could be made that in particular cases campaign contributions were expressive. The judiciary may, however, hold that the physical act of delivering unlimited amounts of money or property to a candidate is not essential to political expression and that a campaign donation is thus not protected symbolic speech.

To the extent that the right to make unlimited contributions is protected by the first amendment, it is my belief that some limitation on contributions would be constitutionally valid because of the compelling state interest in protecting the electoral and governmental process from the undue influence of excessively large contributions.[234] This view was taken by Mr. Justice Douglas, dissenting in *United States v. United Auto Workers,*[235] a case in which the majority specifically declined to address itself to the question of whether a prohibition on labor union campaign contributions.[236] was constitutionally valid. Justice Douglas, joined in his dissent by Mr. Chief Justice Warren and Mr. Justice Black, emphatically stated that the absolute prohibition on campaign contributions constituted "a broadside assault on the freedom of political expression guaranteed by the First Amendment." [237] He was careful to note, however, that: [238]

"[I]f Congress is of the opinion that *large* contributions by labor unions to candidates for office and to political parties have had an undue influence upon the conduct of elections, it can prohibit such contributions."

Thus Mr. Justice Douglas, the jealous protector of first amendment freedoms, adopted the position that large political contributions are not protected under the Constitution to the extent that they exert an undue influence upon the election process.

Justice Douglas' remarks suggest that the constitutionality of limitations on campaign contributions depends upon the particular level of limitation imposed. While Justice Douglas deemed invalid an absolute prohibition on contributions, he recognized that at some point the size of contributions can be restricted because of the very real likelihood of undue influence on the political process. In light of the presumption of constitutionality afforded a congressional act, it would appear, therefore, that a limit on contributions would be held unconstitutional only if it were shown that the limitation, was manifestly below the level at which there could be a reasonable fear of improper influence on the recipient candidate.[239]

The level at which restrictions are imposed is a matter largely overlooked by those who would argue that limits on political contributions are unconstitutional. These critics treat a limitation in amount as if it were an absolute prohibition on contributions. The error in so doing is illustrated by *Kovacs v. Cooper,*[240] a case which is relevant if a campaign contribution is viewed as symbolic speech. In *Kovacs* the Court [241] upheld against a first amendment challenge an ordinance which forbade the use on public streets of a sound truck emitting "loud and raucous noises." It was noted that an "absolute prohibition within municipal limits of all sound amplification, even though reasonably regulated in place, time and volume, is . . . probably unconstitutional . . . . " [242] The ordinance, however, was upheld because its prohibition applied only to "loud and raucous" noises. Thus, while the absolute prohibition would be unconstitutional, a limitation on the permissible physical volume of the regulated communicative conduct was held valid. In applying this rationale to the issue of campaign contributions, Professor Freund has stated.[243]

"We are dealing here not so much with the right of personal expression or even association, but with dollars and decibels. And just as the volume of sound may be limited by law, so the volume of dollars may be limited without violating the First Amendment."

It might be argued that an overall limit on contributions would be an absolute prohibition on contributions as to those who seek to contribute after the ceiling has been reached. If this situation were to pose a serious obstacle to the passage of the proposed limitations, Congress could enact a program of pro-rata contribution refunds. Under such a program all who so desired could contribute up to the limit imposed on the individual contribution. If the sum of these contributions exceeded the overall limit on contributions received, the excess could be refunded to all contributors on a pro-rata basis of the size of their original contributions. For example, if total contributions exceeded the overall limit by twenty-five percent, someone who had contributed $80 would receive a refund of twenty-five percent of his contribution, *i.e.,* $20. To avoid the administrative burden of mailing refund checks to each contributor, the amount to be refunded would be turned over to the Internal Revenue Service and would be credited against the contributor's income tax in the following year.

The Supreme Court has held that: [244]

"When 'speech' and 'non-speech' elements are combined in the same course of conduct, a sufficiently important governmental inter-

est in regulating the non-speech element can justify incidental limitations on First Amendment freedoms."

In attempting to define the elements of this "sufficiently important governmental interest," the Court in *United States v. O'Brien* stated: [245]

"[W]e think it clear that a government regulation is sufficiently justified if it is within the constitutional power of the Government; if it furthers an important or substantial governmental interest; if the governmental interest is unrelated to the suppression of free expression; and if the incidental restriction on alleged First Amendment freedoms is no greater than is essential to the furtherance of that interest."

In view of this standard the proposed limitations on campaign contributions are constitutionally valid. With regard to the first element of the test, it has been previously shown that Congress has power under the Constitution to regulate congressional and presidential elections both at the primary and at the general election levels.[246] The second element is also satisfied since the limitation on contributions is designed to advance substantial governmental interest: the independence of elected officials from large contributors and the prevention of fraud and corruption in the electoral process. These interests are sufficiently important to satisfy the *O'Brien* test. In *Ex parte Yarbrough* [247] the Court stated: [248]

If the government is anything more than a mere aggregation of delegated agents of other States and governments, each of which is superior to the general government, it must have the power to protect the elections on which its existence depends from violence and corruption.

"If it has not this power it is left helpless before the two great natural and historical enemies of all republics, open violence and *insidious corruption.*"

And in another case the Court said: [249]

"To say that Congress is without power to pass appropriate legislation to safeguard [a presidential and vice-presidential] election from the improper use of money to influence the result is to deny to the nation in a vital particular the power of self protection."

The third element of this test is that "the governmental interest is unrelated to the suppression of free expression." [250] Since the governmental interest in regulating campaign contributions is to preserve the integrity of the election process and the independence of elected officials, this condition would clearly appear to be satisfied, especially in view of the rationale of the *O'Brien* decision. In that case the defendant contended that a statute which prohibited the knowing destruction of a draft card was unconstitutional as to him because the act of burning his draft card was "symbolic speech" protected under the first amendment. The Court upheld the statute and thereby acknowledged that the governmental interest involved was "unrelated to the suppression of free expression." Such a conclusion was justified since the statute did not seek to prohibit communication of the defendant's antiwar beliefs but only to assure the effective operation of the Selective Service by prohibiting the act of draft card burning.

In much the same way the proposed limitations on campaign contributions seek not to prohibit communication of political beliefs, but only to assure the effective operation of the electoral process and to prevent corruption on the part of elected officials. Furthermore, the Court in *O'Brien* attempted to clarify this third element by citing *Stromberg v. California.*[251] In *Stromberg* the Supreme Court struck down a statute which punished those who expressed their "opposition to organized government" by displaying "any flag, badge, banner or device." Under this statute, therefore, a banner or badge could have been prohibited based solely on the written contents contained thereon. The statute did not seek to prohibit the act of displaying a banner nor the act of displaying a banner for the purpose of expressing any abstract idea; it sought to prohibit the expression of a particular idea or belief. Put another way, the conduct was lawful but for the particular idea it sought to express. The majority in *O'Brien* indicated that a *Stromberg*-type statute could not be sustained because it "was aimed at suppressing communication" and, therefore, violative of the third element of the *O'Brien* balancing test.

The case of limitation on contributions is clearly distinguishable from *Stromberg.* An excessive contribution is unlawful under my proposal regardless of the particular political idea or belief which the contributor seeks to express by his act of contributing money. In *Stromberg* the act was illegal only if it were performed for the purpose of expressing an opposition to government. This type of prohibition clearly suppresses expression and is distinguishable from a ceiling on political contributions where only the act of excessive contributions is suppressed without regard to the idea sought to be expressed by that act. It appears, therefore, that the proposed limitation on contributions satisfies the third element of the *O'Brien* test.

Finally, it must be shown that the alleged incidental infringement on first amendment rights is no greater than is necessary to achieve the governmental interest. Critics of limitations have suggested that alternative remedies could insulate the electoral process from undue influence of unlimited contributions without the arguable infringement on free expression. Suggested alternatives include free broadcast time or franking privilege and tax incentives for contributions. While such measures might solve some of the problems of the current system, none would work to improve all problems as would public financing coupled with limitations on contributions. As long as there are limitations neither on expenditures nor on contributions, a candidate can be expected to spend up to and beyond the limits of the funds which he is able to raise. As a result, any right to mail campaign circulars for free or to receive free radio and television time will not reduce the pressure on the candidate, once elected, to repay in one form or another "debts" owed to major campaign contributors. Clearly, the limitation on contributions is essential to the elimination of this potential for undue influence. Furthermore, this final element of the *O'Brien* test is perhaps not quite as rigorous as are the other elements. Elsewhere, the Supreme Court has stated: [252]

"The power of Congress to protect the election of President and Vice President from corruption being clear, the choice of means to that end presents a question primarily addressed to the judgment of Congress. If it can be seen that the means adopted are really calculated to attain the end, the degree of their necessity, the extent to which they conduce to the end, the closeness of the relationship between the means adopted and the end to be attained, are matters for congressional determination alone."

A judgment by Congreses, therefore, that limitation on contributions constitutes the only effective remedy is likely to be given great deference by the Court.

Another line of precedent lends support to the conclusion that the right to contribute to a campaign may be outweighed by the strong policy considerations inherent in any congressional act designed to limit the right to contribute. These cases deal with the Hatch Act's [253] prohibition of political activity by public employees. In *United Public Workers v. Mitchell* [254] the Supreme Court sustained the validity of a provision of the Act which prevented employees of the executive branch from taking an "active part in political campaigns." [255] The Court justified this total prohibition of political activity by balancing it against the determination by Congress of the "material threat to the democratic system" [256] posed by partisan activity on the part of government employees. *Oklahoma v. Civil Service Commission,*[257] a case decided the same day, upheld a similar ban imposed on state officials whose work was financed in part by a federal agency.[258]

Mitchell was recently reaffirmed by the Court in *United States Civil Service Commission* v. *National Association of Letter Carriers.*[259] The Court balanced against the infringement of first amendment rights a number of factors which also apply to limitations on contributions: effective and fair operation of the government, protection of the role of elections in representative government, and—a factor not mentioned in the cases discussed thus far—maintenance of public confidence in the government by avoiding the appearance of corruption.[260]

Significantly, these cases upheld a complete ban on all political activity, except the right to vote, on the part of government employees. Such a prohibition was held justified to prevent undue influence on government workers. The proposal made by this article for campaign financing reform would constitute only a partial prohibition on a specific type of political activity—contributions of money. It is designed to prevent undue influences, not on government employees working in a non-political part of the government,[261] but on elected officials. Since the Hatch Act has withstood the constitutional challenge, it seems only reasonable to conclude that limitations on campaign contributions will do so as well.[262]

LIMITATION ON EXPENDITURES

Legislation restricting the amount of a particular campaign contribution may be accompanied by limitation on campaign expenditures. Without the restrictions on expenditures candidates with access to large numbers of wealthy individuals might, despite the limitations on contributions, be able to amass a large campaign treasury from many individual $1,000 contributions. Thus, non-wealthy candidates, without significant contacts among the wealthy, would still be essentially shut off in many instances from effectively seeking elective office. Political offices would remain within the reach of the affluent or those associated with them.[263] To avoid such a result it seems necessary to implement the proposed limitations on campaign expenditures.[264]

Limits on expenditures, however, have encountered many of the same constitutional questions raised by limits on contributions.[265] Since campaign expenditures are viewed as indispensible to mass communication of political ideas, it has been suggested

that such expenditures constitute speech plus conduct and are protected under the first amendment.[266] The validity of this suggestion hinges on many of the same factors discussed in relation to whether limitations on contributions would be constitutionally permissible.[267] Accordingly, the first issue is whether the act of making unlimited campaign expenditures is protected under the Constitution. Unquestionably, campaign expenditures are indispensable to effective political speech, probably more so than contributions. If contributions are limited, the candidates can nevertheless effectively communicate his political message to the voters through expenditures of his own personal resources. Once a limit on expenditures is enacted, however, and that limit is reached by a candidate, the prohibition on effective political speech by that candidate is absolute. As a result, one could likely make a stronger argument for a constitutional right to unlimited campaign expenditures than could be made for unlimited campaign contributions. This fact alone, however, does not guarantee the right to make unlimited campaign expenditures. Again the sound truck cases are applicable. In *Saia* v. *New York*[268] the Supreme Court concluded that amplified speech was deserving of first amendment protection since "loud-speakers are today indispensible instruments of effective public speech."[269] Less than a year later, however, the Court allowed a local government to accommodate the public interest in privacy by upholding a reasonable limitation on amplified speech.[270] The rule to be taken from these cases is that where a sufficiently important governmental interest exists as a justification, a reasonable limitation on the use of an instrumentality indispensible to effective public speech may be enacted.

Application of this rule to limits on campaign expenditures again necessitates the balancing test analysis of *O'Brien*.[271] The constitutional authority of the Congress to regulate campaign expenditures is derived from the same source as is the authority to regulate contributions.[272] The countervailing governmental interest present in this instance is that both the wealthy and the not-so-wealthy, or those without access to the wealthy, share an equal opportunity to participate in the electoral process. The importance of this objective was emphasized in *Kramer v. Union School District*,[273] in which the Court declared that "unjustified discrimination in determining who may participate in political affairs . . . undermines the legitimacy of representative government."[274] Elsewhere, the Court has stated, "wealth, like race, creed, or color, is not germane to one's ability to participate intelligently in the electoral process."[275] It seems clear, therefor, that the governmental interest of fostering equal political opportunity for both those with vast as well as those with meager resources is "important or substantial." With regard to the third requirement of the *O'Brien* test, the governmental interest in equal political opportunity is "unrelated to the suppression of free expression."[276] Any doubt on this point is resolved in favor of limitation on expenditures by the sound truck cases. Finally, without limits on expenditures the candidate who has access to vast financial resources can overwhelm his poorer opponent. Although a ceiling on contributions would prevent an elected official from being unduly influenced by a single large contributor, without a limit on total spending a number of individuals with similar interests could together contribute a large sum of money to a candidate; the same evil of undue influence on elected officials would then be present. Moreover, because of the natural tendency of candidates to spend all available funds, this problem would persist even where a program of federal subsidies would assure a certain level of funds to all qualified candidates. It is apparent, therefore, that a persuasive argument can be made for expenditure limits on the basis of a balancing test analysis.

A second constitutional criticism of campaign spending limits focuses on undue interference with the right of the voter to receive information relevant to his electoral decisions. It is well established that freedom of speech and press necessarily protects an individual's right to receive information and ideas.[277] Two cases dealing with this right have been cited in support of the position that spending limits are constitutionally invalid.[278] In *Red Lion Broadcasting Co. v. FCC*,[279] the petitioner challenged the Federal Communication Commission's "fairness doctrine"[280] on the ground that it denied the petitioner its right to free speech by dictating in certain cases which material would be broadcast. The essence of the petitioner's argument was that the broadcaster enjoyed the same constitutional right of free speech as the individual. In upholding the "fairness doctrine" the Court emphasized that the public's right to receive diverse social and political ideas overrode the broadcaster's right to free speech by radio.[281]In *Mills* v. *Alabama*[282] the Court found invalid a statute prohibiting solicitation of votes on election day. The Alabama Supreme Court had sustained the statute on the ground that it protected the public from the confusion of unverified, last-minute political charges. In striking down this statute, the Court in *Mills* has been heralded as sustaining the public's right to receive political information in situations in which that information might be unverifiable. It should be noted, however, that the reasoning of the Court in *Mills* was based on the right of a newspaper to publish an editorial, not on the right of public to read it.

On the basis of this precedent it has been argued that limits on campaign spending abridge the individual's constitutional right to receive political information. Under this view the ceiling on spending is regarded as a restriction upon the ability of the candidate to convey information to the public and is, therefore, unconstitutional.[283] In my opinion the effect of the proposed spending limits will be precisely the opposite. Instead of reducing the flow of political information to the voting public, these ceilings will help assure a balanced flow of diverse viewpoints. Without spending limits those candidates having unlimited financial resources are able to dominate the flow of political information to the public. They do this by monopolizing the most effective channels of communication. For example, there is only a limited supply of prime time television advertising slots. If these are all taken by a wealthy candidate who can in essence outbid all other candidates, those political viewpoints that are less than extravagantly financed will be denied this highly effective means of presenting their case to the electorate.[284] Limiting expenditures, however, helps to promote "free trade in ideas"[285] and "provides hopes for access to the political process by the weaker minority interests. . . ."[286] The proposed federal campaign subsidies would make this hope a reality. Thus, the ceilings would protect the flow of political information to the public by preventing the well-financed candidates from overwhelming by sheer volume of spending the communications of other candidates. In this manner the public would be exposed to a greater diversity of viewpoints. Such a result seems highly consistent with the constitutional right of the public to receive information and ideas.[287]

Admittedly, the validity of any limitation might hinge upon the level of restriction. A limit could be set so low as to deny all candidates the chance to present their cases effectively to the electorate. Such legislation would be difficult to justify. Thus, the limitations should be set at a relatively high level, but low enough to prevent the heavily financed candidate from "so overloading the channels of communication as to render his opponent's right to speak virtually worthless."[288] The limitations contained in my proposal set forth in this article would seem to meet that test.[289] Once Congress has set such limits, its judgment in setting the level of limitation so as to maximize the flow of political information should be given great deference by the Court.[290]

A final challenge to the constitutionality of spending limits is the contention that such limits favor the incumbent because of the public familiarity which he has acquired prior to the campaign. The argument here is that the only way in which the relatively unknown challenger can overcome the "recognition gap" between himself and the well known incumbent is by outspending the incumbent on media campaigning. Under this rationale a limit on spending is thought to preclude the challenger from any chance to close this "recognition gap."[291]

Proponents of this view cite *Williams* v. *Rhodes*[292] as authority for their position. In that case the American Independent Party and the Socialist Labor Party challenged the constitutionality of an Ohio law which required a new political party to obtain petitions signed by qualified electors totaling fifteen percent of the number of the votes in the last gubernatorial election to be placed on the presidential ballot. On the other hand, the Democratic and Republican parties retained their positions on the ballot merely by polling ten percent of the votes in the last gubernatorial election, and were not required to obtain signature petitions.[293] The State of Ohio sought to justify the restriction on the ground that it promoted political stability, and that by minimizing the number of new parties placed on the ballot, it would protect voters from "a choice so confusing that the popular will could be frustrated."[294] The Court, however, found that the effect of this election law was to "make it virtually impossible for any party to qualify on the ballot except the Republican and Democratic Parties."[295] Having concluded that the State had failed to demonstrate any "compelling interest" to justify these restrictions, the Court held them to be a violation of both first amendment and equal protection rights.[296]

Williams calls into question the constitutionality of any election law which tends to lock in the Democrat-Republican, two-party system. Some have argued that limits on expenditures prevent smaller parties from closing the "recognition gap" by effectively denying them the opportunity to outspend the two major parties. On this basis it is urged that the spending limits fall within the prohibition of *Williams*.[297]

The restrictions overturned in *Williams*, however, are clearly distinguishable from the spending limitations contained in my

proposal. In fhe first place, the burden of the spending limits will fall equally on all parties and on all candidates. The unequal burden of the regulation in *Williams* was obvious. This distinction, however, is unlikely to settle the issue since critics of campaign spending limits view the equal burden of the limits as the factor which will most tend to solidify the presently dominant position of the two major parties.[298] A stronger distinction lies in the existence of a more compelling state interest in the case of campaign spending limits. The state interest articulated in *Williams*, namely to protect the electorate from undue confusion, sounds suspiciously like the state interest rejected in *Mills*.[299] On the other hand, the limits on campaign spending are imposed to further a state interest which has on many occasions been upheld: an equal opportunity to participate in the electoral process regardless of ability to pay.

The principle announced in the *Williams* case does not prohibit every measure which restricts the right of a new party to appear on the ballot, but merely holds that in that particular case the regulation was unreasonably restrictive. Restrictions deemed reasonable by the Court have been upheld subsequently. In *Jenness v. Fortson*[300] a Georgia law was challenged which provided that a candidate for elective public office who did not win a political party's primary election could have his name printed on the ballot at the general election only by filing a nominating petition signed by at least five percent of the number of registered voters who voted at the last general election for that particular office. The Court unanimously upheld the Georgia statute and distinguished it from *Williams v. Rhodes* primarily on the ground that "Georgia's election laws, unlike Ohio's do not operate to freeze the political status quo."[301] The proposed campaign spending limits would likewise not freeze the existing political status quo, which can be characterized as the domination of politics by those with access to vast financial resources. Furthermore, by providing qualified minor party candidates with funds, the program of subsidies would serve to encourage them actively to challenge the dominance of the major parties and might enable them to become more competitive. Such an effect seems entirely consistent with *Williams* and *Jenness*.

As with limitations on contributions, the conclusion here is that reasonable limitations on campaign spending are constitutionally valid. Because campaign expenditures are essential to effective political speech, it appears that such expenditures are protected under the first amendment. The protection of these expenditures does not, however, guarantee to the candidate the right to make unlimited expenditures when a compelling state interest requires limitation. Equal political opportunity for wealthy classes and prevention of undue influence on elected officials are, as demonstrated, sufficiently compelling interests to justify spending limits. Furthermore, instead of infringing on the voting public's right to receive information, the limits can be set so as to enhance that right by assuring that political information flows to the public from viewpoints which might otherwise be drowned out by the more heavily endowed interests. Finally, rather than "freezing the status quo," the limitation on expenditures when combined with the proposed subsidy will enable minor party candidates to challenge the major party candidates with unprecedented vigor. On this basis it seems clear that the spending limits are constitutionally valid.[302]

CONTRIBUTION DISCLOSURE REQUIREMENTS[303]

To enforce the limitation on campaign contributions it will remain necessary, as the law now provides,[304] for a candidate to disclose the amount and donor of all political contributions received. While this disclosure requirement raises several constitutional questions, it seems clear upon analysis that such a requirement is constitutionally permissible.

The first question relates to what might be called the first amendment right to anonymity.[305] The rationale supporting this "right" is that, where, because of fear of embarrassment or reprisal a disclosure requirement stifles an individual's freedom of association or speech, the requirement is constitutionally invalid. This doctrine was developed in a series of cases which overturned statutes requiring disclosure of NAACP membership lists.[306] These cases originated in southern communities at a time of violent hostility to civil rights groups. Under these circumstances the fear of reprisals was sufficiently acute that disclosure of membership lists would have serverly threatened rights of association. The right of anonymity was also upheld in *Talley v. California*,[307] in which the Court invalidated an ordinance prohibiting the distribution of a handbill which did not have printed on its face the name and address of the person responsible for its printing and distribution. The Court concluded that the ordinance would discourage the expression of unpopular ideas and thereby restrict the freedom of speech. On the other hand, where the government interest was deemed to be sufficiently compelling, disclosure of membership lists has been upheld in spite of the infringement on the right of association.[308]

On the basis of the *Talley* precedent it has been contended that campaign disclousre laws might impose an unconstitutional burden on the freedom of political expression. For example, a resident in a predominantly Republican neighborhood might be discouraged from contributing to a Democratic candidate for fear that disclosure would subject him to social ridicule. The constitutionality of disclosure requirements, however, seems to be established in *Burroughs and Common v. United States*.[309] In that case the Court upheld the constitutionality of the Federal Corrupt Practices Act of 1925 on the ground that disclosure requirements "would tend to prevent the corrupt use of money to affect elections."[310] It should be noted, however, that the first amendment arguments dealing with the right to anonymity were not raised in *Burroughs*.[311]

Any lingering doubt as to the first amendment constitutionality of campaign disclosure requirements was erased by *United States v. Harriss*.[312] In *Harriss* the Court employed the rationale of *Burroughs* in upholding the constitutionality of a statute which required a lobbyist to disclose the source and amount of any contributions made to him. The majority in *Harriss* declared.[313]

> Congress has . . . merely provided for a modicum of information from those who for hire attempt to influence legislation. . . . It wants only to know who is being hired, who is putting up the money, and how much. It acted in the same spirit and for a similar purpose in passing the Federal Corrupt Practices Act—to maintain the integrity of a basic governmental process.

The first amendment arguments were offered and specifically rejected in *Harriss*.[314] On the basis of *Burroughs* and *Harriss*, therefore, it seems clear that campaign disclosure requirements do not offend the first amendment.

The second constitutional question raised by the proposed disclosure requirements involves the privilege against self-incrimination. Given that the contributor must report his contribution and that he can be held criminally liable for making a contribution which exceeds the limitation, it would appear that he is compelled to incriminate himself by compliance with the disclosure requirement.[315] This view seems to be supported in *Marchetti* v. *United States*[316] *and Grosso* v. *United States*.[317] In each of these cases a statute requiring anyone engaged in specified gambling practices to register and to pay a special tax on gambling activities was held invalid on the ground that compliance would have the unmistakable result of incriminating the registrant.

It is significant to our inquiry that the majority in *Marchetti* made a special point to distinguish and reaffirm *United States* v. *Sullivan*.[318] In *Sullivan* the taxpayer, a bootlegger, was convicted for failing to file an income tax return despite his claim that filing a return would have necessitated his admission of violations of the National Prohibition Act. The Court in *Sullivan* concluded that the taxpayer could have answered most of the questions on the return without making incriminating disclosures and indicated that he could lawfully withhold answers only with respect to those questions which elicited incriminating answers. *Marchetti* distinguished *Sullivan* on the ground that "every portion of these [gambling] requirements had the direct and unmistakable consequence of incriminating the petitioner,"[319] thereby rendering inapplicable the solution of partial compliance suggested in *Sullivan*. The basis for this distinction is that in the case of the income tax return the questions "were neutral on their face and directed at the public at large,"[320] while the gambling disclosure requirements were directed at a "highly selective group inherently suspect of criminal activities."[321] In the latter case the disclosure requirement violates the privilege against self-incrimination while in the former it does not.

In applying this test to the campaign contribution disclosure requirement, it seems clear that there is no violation of the privilege. The requirement is neutral on its face and is directed not at some suspect group but at the general public. Furthermore, anyone who makes an illegal contribution can still be required to report all legal contributions he makes. Since the non-incriminating data is severable from the incriminating, the contribution disclosure requirement is analogous to the *Sullivan* case and distinguished from *Marchetti* where selective compliance was impossible without violation of the privilege. On the basis of this distinction the contribution disclosure requirement would not violate the fifth amendment privilege against self-incrimination.

CONCLUSION

Public financing proposals have provoked strong remonstrances from critics, one of the most effective of whom is Representative Bill Frenzel. Mr. Frenzel has charged, among other things, that public financing will have a number of drastic effects on our political system.[322] He believes that, by placing an over-all spending limit on cam-

paigns while inadequately funding them through public subsidies, the re-election of incumbents will be made easier, the influence of political parties will be diminished by direct subsidies for individual candidates and abuse through discriminatory application of the law may result from increased bureaucratic control over our electoral process. Furthermore, taxpayers, in Frenzel's view, will object to government funds provided to candidates whom they oppose. Election for local offices will also be affected by public financing of federal campaigns, Frenzel contends, with one of two consequences: either private money, unable to find an outlet in congressional and presidential campaigns, will flood state and local campaigns; or the entire source of private money will dry up, leaving local candidates unable to fund their own campaigns. Moreover, special interest groups will concentrate on the non-electoral sources of their power to maintain their control over governmental decision-making, such as increased lobbying efforts. Finally, in Frenzel's view, private financing is not a bad system. Private money, he contends, is not necessarily tainted, and controlled by appropriate limitations it provides an effective "market test" for candidates.

Many of these are valid criticisms. Some of them, such as the possibility of advantage for incumbents, are met through my proposal. Others, such as the possibility of abuse of bureaucratic control, can be prevented by appropriate statutory standards for administration of the system. On balance, however, the advantages of public financing seem to outweigh the potential drawbacks. Although some taxpayers may object to the funding of candidates whom they oppose, it seems better that the public subsidize them rather than allowing special interests to do so. Furthermore, the loss of the "market test" provided by private contributions will be more than offset by its replacement with a system in which the true market test, one in which all citizens participate equally, is that of the election itself.

It is important to recognize that public financing is not a cure-all for all the ills besetting our present political system. In particular we cannot expect to see the influence of special interest groups vanish with the enactment of a system of public campaign subsidies. Nevertheless, by eliminating an important source of special interest power, an adequate campaign finance law will go a long way toward reducing the disproportionate political strength of these groups. Similarly, public financing by itself may not provide equal access to elected public office for all those capable and desirous of serving; nor is it alone likely to place incumbents and their challengers on an equal footing. Public financing of elections will, however, constitute a sizeable step in those directions, and that prospect alone should be sufficient reason for its enactment.

[2] Emergency Loan Guarantee Act, 15 U.S.C. §§ 1841-52 (1971).

[3] Senator Walter F. Mondale has said, "I think any candid study of American politics shows that that temptation [to receive contributions from the special interests] is almost irresistible." *Hearings on S. 1103, S. 1954 and S. 2417 Before the Subcomm. on Privileges and Elections of the Senate Comm. on Rules and Administration.* 93d Cong., 1st Sess. 29 (1973) [hereinafter cited as *Hearings on S. 1103*]. The pressure, of course, is not always inflicted by the contributor on the candidate. Sometimes the candidate, using the fear of future recriminations as a weapon, pressures the contributor. *See, e.g, id.* at 30 (press release from American Airlines).

[4] It is perhaps presumptuous to speak of "proposing" an idea which, if it were a person, would be of retirement age. Public financing of presidential campaigns was proposed by President Theodore Roosevelt in his State of the Union Message in 1907. 42 CONG. REC. 78 (1907). President Roosevelt conceded that he was "well aware that it will take some time for people so to familiarize themselves with such a proposal as to be willing to consider its adoption." *Id.*

[5] *Cf.* the observations of Alexis de Tocqueville in 1835 that wealthy men were ill-disposed to seek public office and that the public was less-inclined to elect them. A. DE TOCQUEVILL, DEMOCRACY IN AMERICA 182-84, 188-89 (1966 ed.)

[6] A third reason commonly heard for reform is the high cost of the campaigns themselves. Nevertheless, as will be shown, a severe limit on campaign spending would seriously tend to hamper efforts of challengers to unseat incumbents. *See* notes 195-98 and accompanying text *infa.*

[7] An election in which the winning candidate received less than 55% of the vote.

[8] *Hearings on S. 1103, supra* note 3. at 96 (Common Cause study). The exact figure was $107,378. These figures from the Common Cause study represent the first comprehensive spending figures on congressional races ever made public.

[9] *Id.* The Republican candidates averaged $88,375 while the Democratic candidates averaged $89,430.

[10] *Id.* at 97. The Republican candidates averaged $465,264 while the Democratic candidates averaged $496,297.

[11] *Id.* at 96-97.

[12] *Id.* at 102, 105. Moreover, Senate elections were held in neither of the two most populous states, California and New York, where campaigns would tend to be the most expensive.

[13] *Id.* at 105. This trend was not apparent in campaigns for election to the Senate. Two of the five candidates who defeated incumbents spent less than their opponents. *Id.* at 110-11. This difference has been attributed to the greater amount of media attention a Senate race receives as compared to a House race. Thus the need for a Senate challenger to spend money to create name identification is lessened. *Id.* at 142. (remarks of Rep. Bill Frenzel).

[14] 2 U.S.C. § 431 (note) (Supp. II, 1972) [hereinafter cited as Campaign Act of 1971]. The Act did not go into effect until April 7, 1972; thus, many of the expenditures in the presidential campaign went unreported.

[15] *Hearings on S. 23, S. 343, S. 372, S. 1098, S. 1189, S. 1303, S. 1355, & S.J. Res. 110 Before Senate Subcomm. on Privileges and Elections and Senate Comm. on Rules and Administration,* 93d Cong., 1st Sess. 268 (1973) (remarks of Fred Wertheimer, Director, Legislative Activities, Common Cause) [hereinafter cited as *Hearings on S. 372*]. Estimates of the size of President Nixon's campaign fund have ranged as high as $60 million. Reichley. *Let's Reform Campaign Financing—But Let's Do It Right,* FORTUNE, December, 1973, at 95,97.

[16] For example the campaigns of victorious Senate candidates in 1972 cost an average of over $500,000. *Hearings on S. 1103, supra* note 3, at 108. The corresponding figure ten years before was perhaps $200,000. CONGRESSIONAL QUARTERLY SERVICE, GUIDE TO THE CONGRESS OF THE UNITED STATES, 471-72 (1971).

[17] *Cf.* notes 29-34 and accompanying text *infra.*

[18] *See* D. DUNN, FINANCING POLITICAL CAMPAIGNS 17 (1972) thereinafter cited as DUNN]. For example, a common reason for the giving of a campaign contribution appears to be "social." A contributor may desire nothing more than to be able to "show off" a United States Senator as a guest at one of his parties.

[19] *See id.*

[20] *Hearings on S. 1103, supra* note 3. at 32.3 (remarks of Rep. John Anderson).

[21] DUNN, *supra* note 18, at 17.

[22] Instances of vote-buying through the device of campaign contributions are necessarily hard to document. Nevertheless, in the words of one veteran officeholder, "whether we want to admit it or not, some contributors have at least felt they 'owned' us on certain occasions." *Hearings on S. 1103, supra* note 3, at 86 (remarks of Sen. Frank E. Moss).

[23] In 1972, 18 individuals contributed almost $7.5 million to the Committee to Re-elect the President. This was more than the entire amount spent by President Lyndon B. Johnson in his campaign eight years earlier. *Id.* at 66 (remarks of Sen. Adlai E. Stevenson III). One individual alone donated $2 million, almost all of it before the Campaign Act's reporting requirements went into effect. 33 CONG. Q. WKLY REP'T 2382 (Sept. 1, 1973).

[24] This impression is strengthened by the character of many of the contributors. Large contributions have been given by interest groups—organizations of individuals having in common a specialized occupational interest in one aspect of government, for example, businessmen all dealing in the same industry. For a list of 1972 contributions to congressional and presidential candidates of selected interest groups, see 31 CONG. Q. WKLY REP'T 571-88 (March 17, 1973).

[25] *Hearings on S. 1103, supra* note 3, at 34 (remarks of Sen. Hugh Scott).

[26] *Id.* Senator Scott also quoted an expression of former New York Mayor Fiorello LaGuardia: "The most important quality an office-holder can have is monumental ingratitude." *Id.*

[27] *See Hearings on S. 372, supra* note 17, at 207 (remarks of Sen. James Abourezk concerning controversial amendments to a recent farm bill and the donations he received from dairy farmers).

[28] One exception is Common Cause.

[29] In recent years there have been a few notable examples of wealthy candidates, previously politically unknown, gaining electoral victories because of extraordinarily well-financed campaigns. *See* CONGRESSIONAL QUARTERLY SERVICE, GUIDE TO THE CONGRESS OF THE UNITED STATES 475-76 (1971). There is no reason for a publicly unknown individual not to be encouraged to seek public service, and an expensive campaign may be a necessity for such a person to carry his message to the public. Unfortunately, however, if one is neither well-known nor wealthy, his candidacy is often doomed from the start.

[30] Including the author. *See also Hearings on S. 1103, supra* note 3, at 176 (statement of losing candidates for the House of Representatives).

[31] Senator Floyd Haskell recounted his experience in running for the Senate in 1972: "In my case in Colorado, the primary was September 12. That gave me less than 60 days to raise money for the general election. It was necessary to make a commitment the day after the primary for TV productions. If I had not had some money in the bank, I could not have done that and I would not be here today." *Hearings on S. 1103, supra* note 3, at 69.

[32] 27 CONG. Q. WKLY REP'T 2434 (December 5, 1969).

[33] *Hearings on S. 1103, supra* note 3, at 254 (remarks of Rep. Barbara Jordan).

[34] *Id,* at 159-61 (remarks of Frances Tarlton Farenthold, chairwoman of the National Women's Political Caucus).

Handloff, unsuccessful candidate for the House of Representatives from Delaware: "By election day my husband and I had acquired debts that we shall spend the rest of our lives paying off. . . . To those [who talk to me about running 'next time'] I have only one possible answer: What kind of a nut do you think I am?" *Id.* at 178.

[43] Id, at 97.

[44] 119 CONG. REC. 14985 (daily ed. July 28, 1973).

[45] For example: is disclosure of contributions and spending enough? How much should contributions be limited, if at all? Should contributions by com-

mittees and organizations be limited? Should overall campaign spending be limited? How could these limits be enforced? Should presidential and congressional campaigns be financed by the public? If so, to what extent? Should contributions be limited to money or should they also include services? How should third party and independent candidates qualify for funding? Should primary candidates be financed? If so, how can this policy be carried out without opening the floodgates to frivolous candidates? Should the government finance candidates in "one-party districts" to the same extent candidates are funded in more competitive districts? Finally, would any such system be constitutional?

[48] Clean Elections Act of 1973, H.R. 7612, 93d Cong., 1st Sess. (1973) [hereinafter cited as Anderson-Udall Bill].

[49] 199 CONG. REC. 3211 (daily ed. March 8, 1974) (message from the President).

[50] INT. REV. CODE OF 1954 §§ 6096(a), 9001-13, 9021 (1972).

[51] 2 U.S.C. §§ 431-42, 451-54; 18 U.S.C. §§ 591, 600, 608, 610-11; 47 U.S.C. §§ 312, 315, 801-05 (Supp. II, 1972). This legislation repeated the earlier largely ineffective limitations on campaign spending and contributions of the Hatch Political Activity Act. 18 U.S.C. §§ 608, 609 (1970). The Act prohibited campaign contributions exceeding $5,000 per year, 18 U.S.C. § 608 (1970); and the receipt and expenditure by any national political committee of more than three million dollars per year, *id.* § 609; and contributions by national banks, corporations and labor unions to federal election campaigns, *id.* § 610. These limitations were to be enforced by disclosure provisions of the Federal Corrupt Practices Act which directed every campaign committee to account for all its receipts and expenditures, 2 U.S.C. § 242 (1970); and to report such data to a clerk of one of the houses of Congress within thirty days after the election, *id.* § 248.

Enforcement of these early limitations on spending and contributions, however, was quite ineffective. The three million dollar limit on receipts and expenditures by any national political committee was avoided by the formation of numerous independent committees that did not conform to the strict definition of "political committee" found at 18 U.S.C. § 591 (1970). The enforcement problems were compounded by the fact that the expenditure ceilings did not apply to primaries, that contributions received by political committees without the candidate's knowledge were exempt from reporting requirements, that there was no required form for a candidate's financial statements and that complete discretion was given congressional clerks in reporting spending violations. 2 U.S.C. §§ 244-46 (1970).

[52] Campaign Act of 1971 § 104(a)(1), 47 U.S.C. § 803(a)(1) (Supp. II, 1972). The statute does not cover primary or run-off elections. The amount is to be increased as the cost of living increases. Campaign Act of 1971 § 104(a)(4), 47 U.S.C. § 803(a)(4) (Supp. II, 1972).

In order to enforce these limitations regulations have been passed pursuant to the Act that require the media before accepting advertisements in support of a candidate to obtain certification from that candidate that the payment of the charge for such advertisement will not violate the applicable expenditure limitation. 11 C.F.R. § 4.4(a) (1973).

[53] Campaign Act of 1971 § 104(a)(1)(B), 47 U.S.C. § 803(a)(1)(B) (Supp. II, 1972).

[57] Immediate family was defined as "a candidate's spouse, and any child, parent, grandparent, brother, or sister of the candidate, and the spouses of such persons." Campaign Act of 1971 § 203, 18 U.S.C. § 608(a)(2) (Supp. II, 1972).

[58] Campaign Act of 1971 § 203, 18 U.S.C. § 608(a)(1) (Supp. II, 1972).

[59] The reports must be filed on March 1, June 1 and September 1 during the election year, and also five and 15 days before the election and January 31 after the election. Any contribution of $5,000 received after the last reporting date before the election must be reported within 48 hours of its receipt. Campaign Act of 1971 § 304(a), 2 U.S.C. § 434(a) (Supp. II, 1972).

[60] Campaign Act of 1971 § 304(b), 2 U.S.C. § 434(b) (Supp. II, 1972).

[61] Campaign Act of 1971 § 301(d), 2 U.S.C. § 431(d) (Supp. II, 1972).

[62] Campaign Act of 1971 § 304(a), 2 U.S.C. § 434(a) (Supp. II, 1972).

[63] Campaign Act of 1971 § 301(g), 2 U.S.C. § 431(g) (Supp. II, 1972), 304(a), 2 U.S.C. § 434(a) (Supp. II, 1972).

[64] Campaign Act of 1971 § 309, 2 U.S.C. § 439 (Sup. II, 1972).

[65] *See* notes 7-15 and accompanying text *supra*. The act did not go into effect until April 7, 1972; thus all contributions and expenditures made before that date were exempt from its requirements, Campaign Act of 1971 § 406, 2 U.S.C. § 431 (note) (Supp. II, 1972).

[66] INT. REV. CODE OF 1954, § 6096.

[67] *Id.*, § 9002(6).

[68] *Id.* § 9004(a)(1).

[69] *Id.* § 9003(b). It should be noted if the amount available to the candidate from the fund is less than the amount he is entitled to, he may make up the difference in private contributions.

[70] *Id.* § 9003(a).

[71] *Id.* § 9002(7).

[72] *Id.* § 9004(a)(2)(A). In other words, if party A received forty-five percent of the vote, party B thirty-five percent and party C twenty percent, parties A and B would be major parties and party C a minor party. If parties A and B decided to accept federal funding in the next presidential election they would receive the full subsidy of fifteen cents for every voting age citizen in the United States. Since in our example we have assumed that the average vote received by A and B was forty percent, or twice party C's vote of twenty percent, party C would be eligible to receive half the full subsidy.

[73] *Id.* § 9003(c)(2).

[74] *Id.* § 9002(8).

[75] *Id.* § 9004(a)(3).

[79] Id.

[80] Internal Revenue Service Form 1040, 1040A (1974). In March, the three member Delaware delegation (Senator Roth, Representative duPont and I) at my instigation wrote more than 1600 employers in the state and all local union heads urging them to publicize the check-off provision among their employees.

[81] S. 3044, 93d Cong., 2d Sess. (1974) (introduced by Senator Cannon), passed, 120 CONG. REC. 5853 (daily ed. April 11, 1974).

[82] This is the second bill passed by the Senate in less than a year that imposes such limitations on campaign spending and contributions. In July 1973, the Senate passed and sent to the House of Representatives the Federal Election Campaign Act Amendments of 1973. S. 372, 93d Cong., 1st Sess. (1973). Since that time the bill has remained in committee in the House.

With regard to spending limitations, the 1973 Campaign Amendments Bill requires that spending by Senate and House candidates in states where there is only one congressional district be limited in primary elections to either ten cents for every individual of voting age in the state or $125,000 whichever is greater. House candidates in other states would be limited to ten cents per voting age individual in the respective congressional district or $90,000, whichever is greater. For general elections, the limit would be fifteen cents per person of voting age of $175,000 for candidates for the Senate or House of Representatives in a state with one congressional district, and $90,000 for other congressional candidate, whichever is greater. S. 372, 93d Cong., 1st Sess § 20(a) (1971) (to create 18 U.S.C. § 614). Candidates running in a primary for the presidential nomination and candidates for the Presidency itself are allowed to spend in each state the amount which a candidate for Senate might spend for the nomination or in the general election respectively. In addition, expenditures for a vice-presidential candidate count toward the totals of his presidential running mate.

The 1973 Campaign Amendments Bill also imposes limits on contributions. *Id.* § 20(a) (to create 18 U.S.C. § 615). Individuals and independent political committees are restricted to total contributions not exceeding $3,000 for any presidential candidate or for any congressional primary or general election. In addition, an individual is prohibited from making total contributions to all candidates and political committees of more than $25,000 per year. The bill would also increase the limitations on the amount which a candidate could spend out of personal or family funds to finance his campaign to $100,000 for a candidate for President or Vice President, $70,000 for candidate for the Senate, and $50,000 for candidate for the House of Representatives. *Id.* § 18(a)(1).

Every candidate would be required to have one central campaign committee through which all donations and contributions must be channeled. A presidential candidate would be allowed one central committee in each state, as well as one overall national committee. Each candidate would also have to designate one bank as a campaign depository to receive all deposits and to make all payments. *Id.* § 9(a) (to amend the Campaign act of 1971, compiled at 86 Stat. 3 (1972). to create §§ 310.311). To supervise the law, the bill sets up a Federal Election Commission, similar to that in the Cannon Bill.

In addition, this bill would repeal the "equal time" requirement of the Communication Act of 1934, 47 U.S.C. § 315(a) (1970), prohibit the use of the "frank" for mass mailings of congressional newsletters within two months of an election, S. 372, 93d Cong., 1st Sess. § 11 (1973), limit the amounts which citizens could contribute to campaigns and which candidates could spend, and require campaigns to fellow certain procedures. For example, a candidate must designate one committee as his central campaign committee through which all financial reports must be channelled. *Id.* § 9(a) (to amend Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 310). A candidate must also designate one checking account to receive all contributions and from which all expenditures must be made. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 311).

[83] S 3044, 93d Cong., 2d Sess. § 101 (1974) (to create § 503(a) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)). In order to avoid the funding of frivolous candidacies candidates would be required to raise a "trigger fund" before qualifying for the subsidy. The "trigger fund" would amount to: $10,000 for house candidates; twenty per cent of the maximum spending allowance on $125,000, whichever is lesser, for senatorial candidates, and $250,00 with not less than $5,000 being received from residents of at least twenty states, for Presidential candidates. *Id.* § 101 (to create § 502(c) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[84] *Id.* § 101 (to create § 504(a) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)). Candidates who elect not to accept public funding are subject to the same limitations. *Id.* § 304(a) (to create 18 U.S.C. § 614(a)(1)).

[85] *Id.* § 101 (to create § 504(a)(2)(A) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)). These limits would be increased in line with the cost of living. *Id.* § 101 (to create § 504(f) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[86] Defined as a party whose candidate in the previous election for that office received at least 25 percent or more or finished in second place while receiving at least 15 percent of the vote. *Id.* § 101 (to create § 501(g) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[87] *Id.* § 101 (to create § 504(b)(1) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[88] *Id.* § 101 (to create § 503(b) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[89] A minority party candidate is one whose candidate received between five and twenty-five percent of the vote in the previous election for that office. *Id.* § 101 (to create § 501(a) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[90] A minor party candidate would be allowed the amount which beats the same ratio to the major

party amount as the candidate's vote (or the vote of the candidate for that party) in the last election bears to the average major party vote. In addition, a candidate who ran for party A in the previous election and received between five and 25 percent of the vote is eligible to receive funding according to this formula even if he switches from party A to party B in the next election. If this candidate does switch to party B, party A nevertheless remains eligible for funding on the basis of his performance as a party A candidate in the previous election. *Id.* § 101 (to create § 503(b)(2) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)). If, after the election, the above formula as applied to the curent election would yield a greater amount, the candidate is entitled to retroactive funding in the amount of the difference. *Id.* § 101 (to create § 503(b)(4) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[91] A candidate of a party which is neither "major" nor "minor" who receives five percent of the vote is funded in the amount which bears the same ratio to the major party amount as his vote bears to the average major party vote. *Id.* § 101 (to create § 503(b)(4) of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[92] *Id.* § 207(a) (to create §§ 310, 311 of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)).

[93] *Id.* § 207(a) (to create § 308 of the Campaign Act of 1971, compiled at 86 Stat. 3 (1972)). The Commission is to consist of the Comptroller General and a bipartisan group of seven other members appointed by the President with the advice and consent of the Senate for staggered seven-year terms. Two of the members are to be appointed from different parties from a list of individuals recommended by the President pro tempore of the Senate with the consultation of the Senate majority and minority leaders. Two of the members are to be members of different parties appointed from a group recommended by the Speaker of the House of Representatives with the consultation of the majority and minority leaders of the House. Of the remaining three members no more than two are to be members of the same parties. *Id.*

The Commission is to be given a wide range of powers, including the power to compel testimony and production of documentary evidence, to initiate civil and criminal proceedings, and to assess civil penalties of up to $10,000. In enforcing these sections the Commission is to take precedence over the Justice Department.

[94] *Id.* § 304 (to create 18 U.S.C. § 615(a)(1), (a)(2) and (d)(1). In addition, contributions by foreigners are prohibited. *Id.* § 304 (to create 18 U.S.C. § 615(a)(2)(A)(i)). Candidates may not receive from personal or family funds in excess of $50,000 in the case of presidential or vice-presidential candidates, $35,000 in the case of candidates for Senator and $25,000 in the case of candidates for Representative. *Id.* § 302(a)(1).

[95] 47 U.S.C. § 315(a) (1970). The "equal time" requirement compels broadcasting stations which provide air time to a candidate to afford equal broadcast opportunities to his opponents. The effect of this provision of the present law is to prevent stations, particularly in those elections where a great number of minor party candidates are running, from providing free air time to major party candidates. It would be amended to require licensees to provide opponents, in federal elections other than for President or Vice President, five minutes. *Id.* § 201.

[96] *Id.* § 401.

[97] The first Wednesday after the first Monday in November of all even numbered years would become a national holiday, federal Election Day. *Id.* § 502. All polls in the country in federal elections would close simultaneously at 11 p.m. Eastern Standard Time. *Id.* § 501.

[98] 119 CONG. REC. 3211 (daily ed. March 8, 1974) (message from the President). The proposal has not been introduced in the form of a bill at this writing.

Other portions of this same presidential message deal with campaign practices, campaign duration, and encouragement of candidate participation. The President proposes that there be enacted federal criminal statutes regulating deceptive campaign practices, such as issuing fraudulent public opinion poll results, placing misleading advertisements in the media, or misrepresenting a Congressman's voting record. In addition, activities involving the use of organized demonstrators to impede entry at a political rally, and practices such as stuffing ballot boxes and rigging voting machines, would become federal offenses. Mr. Nixon recommends that presidential campaigns be shortened by having the primaries and state conventions held no earlier than May of the election year, and urging that the national nominating conventions be delayed until the month of September. The President also urged the Congress to consider possible action to limit the benefits of incumbency such as the "frank" and large staffs which enhance re-election efforts, and the repeal of the "equal time" provision of the Communications Act of 1934, 47 U.S.C. § 315(a) (1970). Finally the President called for legislation making a libel remedy for public figures more readily available. *Id.* at 3213–14.

[99] *Id.* at 3212.

[100] *Id.* Every donation to the candidate's central committee would have to be tied directly to the original individual donor, except donations by a national political party organization. The exception, of course, is designed to allow individuals to make general donations to a political party without specifying a candidate. *Id.*

[101] Individual contributions to House or Senate campaigns in primary or general elections would be limited to $3,000, and contributions to pre-nomination or general election campaigns for the presidency would be limited to $15,000. Non-monetary campaign contributions such as the use of a private airplane or paid campaign workers are prohibited when donated by any organization other than a major political party. If these "in-kind" contributions are given by an individual, they are to be covered by the same ceiling applicable to cash contributions. In addition, all loans to political committees are to be prohibited, as are contributions from foreign citizens. The program is to be supervised by a bipartisan Federal Elections Commission. *Id.* at 3212–13.

[102] *Id.* at 3212–13. Mr. Nixon feels as I do, *see* notes 195–98 and accompanying text *infra*, that low spending limitations may unduly hamper the efforts of candidates challenging incumbents.

The major reason for the President's opposition to campaign subsidies seems to be the idea that taxpayers should not be forced to support candidates they oppose. In addition, he makes the point that public financing will not increase but diminish the ability of prospective candidates to enter the political arena: "[I]f we outlaw private contributions, we will close the only avenue to active participation in politics for many citizens who may be unable to participate in any other way. Such legislation would diminish, not increase, citizen participation and would sap the vitality of both national parties by placing them on the federal dole." *Id.* at 3213. Many public financing proposals, however, including the one suggested by this article, *see* notes 191–94 and accompanying text *infra*, do not prohibit private contributions.

[103] S. 1103, 93d Cong., 1st Sess. (1973). The program is to be carried out by the Congressional Election Finance Board. *Id.* §§ 5, 6.

[104] *Id.* § 2(1).

[105] A major party is defined as one whose candidate received at least twenty-five percent of the vote for that office in the preceding election. *Id.* § 3(9)(A). In addition, an independent candidate who received twenty-five percent of the vote in the previous election qualifies as a "major party." *Id.* § 3(9)(B).

[106] *Id.* § 7(a)(2).

[107] The contributions may not exceed $250. *Id.* § 12(a)(1).

[108] The percentage is ten percent. Otherwise, the security deposit is forfeited. *Id.* § 7(a)(1)(B).

[109] The percentage is five percent. *Id.* § 7(a)(1)(C).

[110] A candidate of a major party is eligible to receive the greater of ten cents for every voting age person in the state or $75,000 in Senate primary elections and fifteen cents or $150,000 for the general election. *Id.* § 10(a). Major party candidates for Representative may receive fourteen cents for each voting age resident of the district for a primary election and twenty cents for a general election. *Id.* § 10(b)(1). A candidate for Representative in a district representing an entire state, however, is eligible to receive the same amount as the candidate for Senator from that state. *Id.* § 10(b)(2). It should be noted that unless a candidate elects to receive public funding for a primary election (or unless he does not participate in a primary) he is ineligible to receive funding in a general election. *Id.* § 7(c). If a candidate runs unopposed in the primary, he receives one-third the full subsidy. *Id.* § 8(d).

[111] A minor party is defined as one whose candidate received between ten and twenty-five percent of the vote for the previous election. *Id.* § 3(10)(A). An independent candidate who received between five and twenty-five percent of the vote in the previous election also qualifies as a "minor party." *Id.* § 3(10)(B). A minor party candidate may, if he so elects, receive the greater of one-fifth the major party subsidy or the amount which bears the same ratio to the major party subsidy as his vote total in the previous election bears to the vote received by the major party candidate who received the fewest votes. *Id.* § 10(c)(1). A minor party candidate must, of course, post a security deposity of twenty percent of the subsidy. In no event, however, is the security deposit to be less than $3,000. *Id.* § 7(a)(2). Any other candidate may receive the greater of one-tenth the major party subsidy or an amount calculated by the same formula used to calculate the alternative subsidy for minor party candidates. *Id.* § 10(c)(2). Non-major party candidates can make up in private contributions the difference between their subsidies and the total spending allowance of major party candidates who elect to receive public financing. *Id.* § 11(d). If they receive twenty-five percent of the votes in the current election they are to have their expenses reimbursed to the limit of the major party subsidy. *Id.* § 10(d). In addition, a candidate who is neither from a major or a minor party who receives ten percent of the vote may have his expenses reimbursed to the limit of the minor party subsidy. *Id.* § 10(d)(7).

[112] In senatorial primary campaigns, the limit for private funding is the greater of two cents per voting age resident or whatever sum is needed to reach $100,000 for total campaign funds; in general election campaigns, the limit is five cents or whatever is needed to reach $200,000. *Id.* § 11(b). In elections for the House of Representatives the limit is three cents per voting age person in the primary and five cents in the general election. *Id.* § 11(c). No private contribution may exceed $250. *Id.* § 12(a).

[113] *Id.*

[114] S. 2297, 93d Cong., 1st Sess. (1973).

[115] *See* 31 CONG. Q. WKLY REP'T. 3177 (Dec. 3, 1973).

[116] *See* notes 66–80 and accompaning text, *supra*.

[117] S. 2297, 93d Cong., 1st Sess. § 2(a) (1973). The program is to be supervised by the Comptroller General.

[118] *Id.* (to amend INT. REV. CODE OF 1954, § 9012(b)). In addition, individuals not authorized by a candidate may not spend more than $1,000 on behalf of a candidate eligible for public funds. *Id.* (to amend INT. REV. CODE OF 1954, § 9012(f)).

[119] *Id.* (to amend INT. REV. CODE OF 1954, § 9004(a)(1)). The bill follows the same basic formula as the Check Off Act in allocating funds between major and minor parties. *See* text accompanying notes 67–76 *supra*. As is provided for in presidential campaigns, major party senatorial candidates are to receive fifteen cents per voting age person, with a $175,000 minimum. *Id.* In elections for the House of Representatives, a major party candidate is to receive the greater of $90,000 or the average major party expenditure in that district for the past two elections. *Id.* Congress is to appropriate funds to make up any deficits after the operation of the check off. *Id.* (to amend INT. REV. CODE OF 1954, § 9006(a)).

[120] S. 1954, 93d Cong., 1st Sess. (1973).

[121] *Id.* § 1(c) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 308(a), present § 101 to be renumbered as § 311).

[122] *See* note 82 supra. For presidential candidates there is a limit of fifteen cents per each person of voting age within a state first for the primaries and if the candidate receives the nomination then for the general election. In no event, however, shall a candidate be required to spend less than $175,000 per state in presidential primaries. S. 1954. 93d Cong., 1st Sess. § (c) (1973) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 308(a), (b), present § 308 to renumbered at § 316). For senatorial primaries and elections the limit is the greater of twenty cents per voting age person or $175,000 and for the House twenty-five cents or $90,000, except for House candidates running in states with one district where the limit is twenty-five cents or $175,000. Id. (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 308(d), (e) present § 308 to be renumbered as § 316).

[123] *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 309, present § 309 to be renumbered as § 317). *See* note 82 *supra*. Individual and committee contributions to a single candidate are limited to $3,000 per campaign in the aggregate for both the primary and general elec-

tion. No limit is made on total donations to all candidates by a contributor. Id.

[124] Major party candidates would receive one-third the maximum spending allowance from the public treasury. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 304(a), present § 304 to be renumbered as § 312). The minor party subsidy is calculated by the same formula as in the Hart Bill, *see* note 111 *supra*, except that the *average* major party vote in the previous election is used in place of the *lowest* major party vote. In addition, if a non-major party candidate performs like a major party candidate in the election, he is to be reimbursed his expenses to the limit of the major party candidate's subsidy. A similar reimbursement is provided for in the case of a candidate who before the election qualifies as coming from neither a major nor minor party, but in the particular election performs well enough to meet the requirements of a minor party candidate. Otherwise, such a candidate receives no subsidy funds. S. 1954, 93d Cong., 1st Sess. § 1(c) (1973) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 304, present § 304 to be renumbered as § 312).

[125] The two methods of qualification are implicit in the definitions of major and minor parties. A major party is one whose candidate received twenty-five percent of the vote in the previous election for that office or, in the case of Senate and House candidates, if a party's candidate did not attain the requisite twenty-five percent figure, the party will still be considered a major one if it received twenty-five percent of the vote in that state's previous gubernatorial election. In addition, if a candidate presents to the supervisory commission petitions containing signatures of eight percent of the voting age population of the district, or, in the case of a presidential election, eight percent of the voting age population of half the states, such a candidate would be treated as a major party candidate. A minor party is one which received ten percent of the vote in the previous election or presents signatures of four percent of the voting age population. A presidential candidate would have to present signatures of five percent of the voting population from half the states, ten percent from one-third of the states, or fifteen percent from one-fourth of the states, to qualify as a minor-party candidate. Id. § 1(b)(6). In addition, to be eligible for funding a candidate must furnish a security deposit of one-fifth the amount which he is entitled to receive, but in no event less than $3,000, *Id.* § 1(c) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 305(a)(2), present § 305 to be renumbered as § 312). Each candidate must also designate one central campaign committee to make all required reports and receive all subsidies. *Id.* § 1(d).

[126] S. 2238, 93d Cong., 1st Sess. § 4 (1973).

[127] *See* notes 66.80 and accompanying text *supra*. S. 2238, 93d Cong., 1st Sess. § 4 (1973). The bill attempts to remedy the situation which occurred in 1973, when many people were unaware of the check-off provision, by directing the Secretary of the Treasury to publicize it though the use of poster, media publicity, and the like. *Id.*

[128] *Id.*

[129] *Id.* § 7 (to amend INT. CODE OF 1954, § 9012(b)).

[130] The first $100 of every private contribution is to be matched by the government, so long as total payments do not exceed five cents for every voting age person in the United States. *Id.* § 8 (to create INT. REV. CODE OF 1954, §§ 9034(a), 9035(a)(2)). To be eligible for payments a candidate must raise $100,000 in contributions of $100 or less during the fourteen months preceeding his party's convention. As soon as he does so, this money is matched *Id.* (to create INT. REV. CODE OF 1954, § 9035(b)).

[131] Candidates may not spend more than $30,000,000 in the general election campaign, *Id.* § 6, nor more than $15,000,000 in the pre-nomination campaign. *Id.* § 8 (to create INT. REV. CODE OF 1954, § 9037(a)). Contributions to presidential candidates are limited to $3,000 per candidate per year by an individual and $25,000 by a registered political committee. *Id.* § 10. The bill also limits cash transactions to $100, *id.* § 9 (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 310, present § 310 to be renumbered as § 313), and repeals the "equal time" requirement for presidential and vice-presidential candidates. *Id.* § 11.

[132] S. 2417, 93d Cong., 1st Sess. (1973). The program is to be supervised by a bipartisan commission. *Id.* § 2 (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 502).

[133] *See* notes 66–80 and accompanying text *supra*. Under this bill the amount of the check-off is to be increased from one dollar to two dollars and four dollars for a joint return. In addition, instead of indicating that he wishes to participate, as the program works now, the taxpayer is to "check-off" if he desires not to participate. S. 2417, 93d Cong., 1st Sess. § 4 (1973).

[134] No private contributions may exceed $250. *Id.* § 2 (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972) to create § 507(a)). No matching payment at all is awarded for any aggregate contribution of over $100 from one contributor. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 505(b)(2)). In primary elections, candidates may not receive from all sources total contributions which do no qualify for matching funds in excess of $100,000 for President, $10,000 for Senator and $5,000 for Representative. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), (to create § 507(b)(2)). A candidate is also limited to $250 from personal funds. Family funds are not included in this limitation. *Id.* § 3.

[135] Primary candidates are limited to the following total expenditures; for Senator or President the greater of fifteen cents for every voting age person in the State or $250,000, for Representative, $150,000, or $200,000 if the candidate's state has only one congressional district. *Id.* § 2 (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 506(b)). The spending limits for general elections are, for Senator or President, the greater of $250,000 or twenty cents for each voting age person in the state, and, for Representative, $150,000. The limit for candidates for the House of Representatives in states with one Congressional district is, however, $200,000. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 506(a)).

[136] The trigger fund is $2,500 for candidates for the House of Representatives, $5,000 for the Senate and $50,000 for the Presidency. A candidate for the Presidency must raise $50,000 no matter how many primaries he enters. A candidate for the Senate from a state with only one congressional district need only raise $2,500. *Id.* (to amend the Campaign Act of 1971), compiled at 86 Stat. 3 (1972), to create § 504(c)).

[137] *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat 3, 1972), to create § 505(b)(1)).

[138] *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat 3, 1972), to create § 505(b)(1)). The definitions of major, minor and new parties are the same as those in the Campaign Act of 1971. INT. REV. CODE OF 1954, §§ 9002(6), (7), & (8).

[139] Minor and new party candidates are awarded twenty-five percent of the maximum expenditure, with provision for retroactive major party payments if they receive at least twenty-five percent of the vote. In the latter case, they must return all private contributions which exceed twenty percent of the maximum expenditure. *Id.* (to create § 505(a)(2) of the Campaign Act of 1971).

[140] S. 2943, 93d Cong., 2d Sess. (1974).

[141] *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 504(d)). A candidate for Representative must file petitions 210 days before the primary election with the supervisory commission containing signatures of more than two percent of the voting age population of the district. Candidates for President, Vice-President, Senator, or Representative in a state which is entitled to only one representative must file petitions containing signatures of more than one percent of the voting age population of the state in which the primary election is being conducted.

Primary candidates are to receive an amount equal to the entire spending limit. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 505(a)). The spending limit for candidates for representative is twenty-five cents for each voting age person. For President, Senator, or Representative in a state with only one congressional district the limit is fifteen cents for each voting age person or $175,000, whichever is greater. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 506(a)(1) and (b)(1)). Where a convention or caucus is held in place of a primary, candidates are limited to ten percent of the amount to which they would otherwise be entitled. *Id.* § 3(a) (to amend the Campaign Act of 1971, to create § 505(c)(3)). All expenditures incurred by any candidate or political party are to be paid by the supervisory commission directly to the person contracting with the candidate or party. *Id.* § 3(a) (to amend the Campaign Act of 1971, to create § 509(d)(1)).

[142] A candidate in the general election for Representative may receive thirty cents for every voting age person in the district. A candidate for Senator or Representative in a state with one congressional district is to be subsidized twenty cents for each voting age person in the United States or $250,000, which ever is greater. Presidential candidates are to be allotted twenty cents for each voting age person in the country. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 506(a)(2) and (b)(2)). Minor party and independent candidates are to be funded according to whichever of two formulae yields the greater amount. Under the first formula, such a candidate is to receive the amount which bears the same ratio to the major party amount as the vote received by the minor party candidate in the previous election bears to the average major party vote. Under the second formula the current election is used in place of the previous election. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 505(b)(1)(B) and (b)(2)(B)).

A major party is defined as one whose candidate in the previous election for that office received at least twenty-five percent of the vote or finished first or second. A minor party is any other party. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 501(7) and (8)). A minor party or independent candidate is treated as a major party candidate if he was the candidate of a major party in the previous election for that office, finished first or second in total votes in the previous election, or received more than twenty-five percent of the vote in the previous election, *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 505(c)).

Political parties are entitled to payment for expenditures incurred in voter registration efforts, get-out-the-vote drives and nominating conventions. These expenditures are limited during a presidential election year to twenty percent of the amount to which the party's presidential candidate is entitled and during any other year to fifteen percent of the presidential allotment. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 505(d)).

[143] *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 507(a)). Minor parties and minor party candidates may accept contributions of $100 or less until the major party entitlement is reached. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 505(b), (c), (d), and (e)). Candidates are allowed to use private contributions in connection with primary election petition drives. In such efforts, a candidate for Representative may spend two cents for each voting age person in the district. Candidates for President, Senator, or Representative in a one-district state may spend one cent for each voting age person or $7,500, whichever is greater. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 508(a)). Each contributor is limited to overall contributions of $1,000 a year, with contributions to be made directly to the commission. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 507(g) and (h)). Candidates themselves are limited to $1,000 out of personal or family funds. *Id.* § 5. The public subsidies are to be financed out the Dollar Check-Off Act, *see* notes 66–80 *supra*, with the amount paid to the campaign fund to be increased to two dollars or four dollars for a joint return. The taxpayer is to "check-off" if he wishes not to participate. *Id.* § 8(a) (to amend INT. REV. CODE OF 1954, § 6096(a)).

[144] A major candidate must repay the subsidy if he fails to receive fifteen percent of the votes in the primary or of the delegate votes in the nominating convention or if he fails to receive twenty-five percent of the vote in the general election. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 510(a)(3)). In addition, a candidate who withdraws more than forty-five days before the primary or thirty days before the general election and before receiving twenty-five percent of the subsidy must repay half the amount received. *Id.* § 3(a) (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 510(d)).

Other provisions of the Clark Bill would repeal for federal elections the equal time requirement of the Communications Act of 1934, 47 U.S.C. § 315(a) (1970), *Id.* § 6(a), and would eliminate the franking privilege. The frank would not be allowed within

ninety days of a federal election. In its place, all federal candidates would be allowed to mail campaign material at a reduced rate. *Id.* § 4.

[145] H.R. 7612, 93d Cong., 1st Sess. (1973).

[146] *Id.* § 201 (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 402(a), present § 402(a) to be renumbered as § 502).

[147] *Id.* Party congressional campaign committees, as well as congressional nominees themselves are also eligible to receive funding.

[148] The fund must come from contributions of $50 or less. A candidate for the House of Representatives must raise $1,000 and a candidate for the Senate $5,000. Both national party committees and candidates for presidential or vice-presidential nominations must raise a fund of $15,000. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 403, present § 403 to be renumbered as § 503).

[149] Individual contributions are limited to $2,500 for a presidential campaign and $1,000 for a congressional one. Contributions to or by political committees are limited to $2,500. *Id.* § 301 (to create 18 U.S.C. § 608(c), (d), present subsection (c) to be redesignated as (f)).

[150] Total payments from the government fund are limited to ten cents per eligible voter for congressional candidates and candidates for presidential or vice-presidential nomination, and to $15,000,000 for a national party committee and its affiliated congressional campaign committees. *Id.* § 201 (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 403(a)(2), present § 403 to be renumbered as § 503).

[151] *Id.* § 501 (amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 603(c), (d)(1), and (f)(1)). Eligibility for "Voter's Time" depends on the status of a candidate's party. Any party whose candidate finished first or second in either of the last two elections for that office is a "major party." A "third party" is one whose candidate received fifteen percent of the vote in the previous election for that office. A "minor party" for the purposes of presidential elections is one whose candidate appears on the ballot in more than thirty states or, in the case of Senate but not House elections, received over five percent of the vote in the previous election for that office or presents petitions containing signatures of registered voters equal to five percent of the total vote for Senator in the previous election, including signatures from each congressional district in the state equal to at least two percent of the vote in that district. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 602). Under the proposal, presidential candidates of major parties would receive five half-hour blocks of air time with each block to be broadcast simultaneously over all stations and networks in the country. Each third party candidate for President would receive two such half-hour blocks, and each minor party candidate one such block. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 603(a)(1)).

In Senate elections, each candidate would receive three half-hour blocks of time, each block of time to be broadcast simultaneously by every station in the state and, where part of the state is served only by out-of-state stations, by those stations. Each third party Senate candidate is to receive one half-hour block, and each minor party candidate one fifteen-minute block. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 603 (a)(2) and (d)(2)).

Major party candidates for the House of Representatives are to receive two half-hour blocks and minor party candidates one fifteen-minute block. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3 (1972), to create § 603(a)(3)). These broadcasts are to be aired over one station, if that station is the only one which substantially serves the district. If more than one station substantially serves the district they are to broadcast the "Voter's Time" simultaneously unless any of them substantially serves a part or whole of an adjoining district and substantially served by another station. In districts where no station is located, the broadcasts are to be carried on a nearby station. In large metropolitan areas where two or more stations serve a number of districts, the Federal Communications System is to allocate broadcasts over the stations, with all broadcasts to be aired simultaneously, provided no broadcasts of competing candidates are aired at the same time. *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3(1972), to create § 603(f)).

[152] *Id.* (to amend the Campaign Act of 1971, compiled at 86 Stat. 3(1972), to create § 603(h)).

[155] *Hearings on S. 1103, supra* note 3, at 39 (remarks of Sen. Hugh Scott).

[156] In order to see how effective large private primary contributions could be, you need only ask any successful politician what particular financial help he valued above any he has received in his career. Almost always the answer will come back that the money that helped him most was the early primary contribution in his very first race. The refrain is certainly familiar to all of us here. 'So and so has become one of my closest friends. He helped me back when I really needed it. In those days nobody had ever heard of me and I couldn't raise a dime,' is the way most candidates would put it. *Id.* at 71 (remarks of Sen. James Abourezk).

[157] 86 Stat. 3 (1972).

[158] *See Hearings on S. 372, supra* note 15, at 81, 93–94 (remarks of Sen. Claiborne Pell).

[220] 290 U.S. at 544.

[221] *Id.* at 545.

[222] *Id.*

[223] The view that Congress has broad authority to regulate presidential elections is supported by Mr. Justice Black in Oregon v. Mitchell, 400 U.S. 112 (1970). In an opinion announcing the judgment of the Court and expressing his own view of the cases, Justice Black stated: "I would hold, as have a long line of decisions in this Court, that Congress has ultimate supervisory power over congressional elections. Similarly, it is the prerogative of Congress to oversee the conduct of presidential and vice-presidential elections and to set the qualifications for voters for electors for those offices. It cannot be seriously contended that Congress has less power over the conduct of presidential elections than it has over congressional elections." *Id.* at 124 [footnotes omitted].

[224] In Newberry v. United States 256 U.S. 232 (1921), the Court split four to four on the issue of whether Congress had the constitutional power to regulate primaries, with the ninth Justice reserving the question and holding that, since the statute involved was enacted prior to the adoption of the seventeenth amendment, it did not cover senatorial primaries. His reasoning was apparently that before the passage of the seventeenth amendment senatorial primaries were merely advisory and not binding on the state legislatures, and thus they were not elections within the meaning of article I, § 4. *See* United States v. Classic, 313 U.S. 299, 317 (1941). In addition, United States v. Gradwell, 243 U.S. 476, 489 (1917), discussed but reserved the question of Congress' constitutional power to regulate primaries.

[233] United States v. O'Brien, 391 U.S. 367, 375 (1968).

[234] An argument advanced by Common Cause on behalf of limitations on contributions has been that they effectuate the constitutional policy of "one person, one vote." Gray V. Sanders, 372 U.S. 368, 381 (1963). *See Hearings on S. 372, supra* note 15, at 364 (Memorandum from Common Cause on the Constitutionality of Contribution and Expenditure Limitations). This argument is not that limitations on contributions are constitutionality mandated, for presumably the element of state action is absent; rather, the argument seems to be that the limitations help assure equality of voting power and that this policy goal outweighs the incidental infringement on first amendment rights. The policy basis of the argument seems to be supported to some extent by language in Columbia Broadcasting Sys. v. Democratic Nat'l Comm., 412 U.S. 94 (1973), a case holding that broadcasting stations were not required by the first amendment—assuming governmental action—to accept editorial advertisements. The Court stated: "[T]he public interest is providing access to the marketplace of 'ideas and experiences' would scarcely be served by a system so heavily weighted in favor of the financially affluent, or those with access to wealth. . . . Even under a first-come first-served system . . . the views of the affluent could well prevail over those of others, since they would have it within their power to purchase time more frequently. Moreover, there is the substantial danger . . . that the time allotted for editorial advertising could be monopolized by those of one political persuasion." *Id.* at 123. Nevertheless, as a policy justification for incidental infringement of first amendment rights, effectuation of the principle of one perrson, one vote seems questionable. No matter how much money is spent in a political campaign, each votes retains his equal voice at the ballot box. Thus, the case involving limitations on contributions is not similar in all respects to cases involving malapportioned legislative districts. Reynolds v. Sims, 377 U.S. 533 (1964), or unit voting districts, Gray v. Sanders, 372 U.S. 368 (1963), nor is it like the imposition of financial burdens on the right to vote. Harper v. Virginia Bd. of Elections, 383 U.S. 663 (1966). In fact, this policy basis seems valid only if it is assumed that the principle of one person, one vote is a reflection of a larger constitutional policy of equal political input or "one person, one unit of political power"—an assumption that is dubious at best. For example, aside from financial considerations, some individuals have greater influence over the outcome of elections than others by virtue of their positions as publishers of newspapers, or as leaders of organizations, or even by virtue of their ability as speechwriters or orators. Still, the power of certain people to influence the votes of others most certainly does not violate the policy of one person, one vote.

Fleishman, in his article *Public Financing of Election Campaigns: Constitutional Constraints on Steps Toward Equality of Political Influence of Citizens, supra* note 210, makes the further argument that the current system of private financing of elections is a violation of the federal equal protection requirement incorporated into the due process clause of the fifth amendment, and thus that the courts have an affirmative obligation to require public financing of elections. *Id.* at 352-68. Mr. Fleishman appears to reason that private financing discriminates against the non-wealthy in three ways: first, as Common Cause also argues, it violates the principles of one person, one vote; second, it deprives potential candidates of the right to compete equally for elective office; and third, it denies citizens of the opportunity to vote for non-wealthy candidates. Fleishman translates this discrimination into a denial of equal protection of the laws by asserting, without support of case citation, that there is no "state action" requirement contained in the equal protection guaranty. He adds that, even if the fifth amendment is deemed to require some sort of governmental participation before a finding of unconstitutionality may be made, the requirement is met for two reasons: first, state action is present because of government regulation of campaign financing; and second, Congress by permitting private contributions participates in the present discriminatory system of financing.

There are several problems with Fleishman's analysis. It is highly doubtful that the court would either make the novel ruling that state action is not required for purposes of equal protection or find that it is present in private financing of elections. Although government compulsion of private discrimination constitutes a violation of equal protection, Adickes v. S.H. Kress and Co., 398 U.S. 144, 170 (1970), the element of state action is absent when the government, as it does in campaign financing, merely regulates private conduct. Moose Lodge No. 107 v. Irvis, 407 U.S. 163 (1972). In that case, for example, the granting by the state of a liquor license to a private club even when combined with a number of regulations such as the keeping of financial records did not constitute state action. Fleishman's argument that discriminatory campaign financing is an act of the state because of state permission to finance campaigns would seem to mandate a finding of state action in any case where the government is able to but does not prohibit private action; this argument is dubious at best. *See* Lucas v. Wisconsin Elec. Power Co., 466 F.2d 638 (7th Cir. 1972), *cert. denied*, 409 U.S. 1114 (1973). Moreover, it is questionable whether private financing, even were state action present, would constitute an unconstitutionally discriminatory practice. Of Fleishman's three reasons supporting such a finding of unconstitutionality, the one based on the principle of one man, one vote has been discussed *supra*. The argument that private financing prevents citizens from voting for non-wealthy candidates is founded on the assumption that non-wealthy individuals are prevented from running for office because of private financing. In truth, they are merely prevented from waging effective campaigns. Private financing does not prevent individuals from voting for non-wealthy candidates, but merely from voting for viable non-wealthy candidates, and it is highly questionable whether there is a constitutionally protected right to vote for a winning candidate. On the other hand the argument that private financing discriminates between candidates on the basis of wealth may have some validity, but only if it be assumed that the right to run a viable campaign is a constitutionally protected right. Thus far the Court has not held that the right to wage a serious campaign—as opposed to the right to a place on the ballot—is a fundamental interest. *See* Bullock v. Carter, 405 U.S. 134, 142-44 (1972). Finally, there is the problem of what kind of relief the Court could fashion to remedy the discriminatory system of private financing—a problem which Fleishman, to be sure, acknowledges.

[257] 330 U.S. 127 (1947).

[258] Two previous Supreme Court cases dealt with similar issues. In *Ex parte* Curtis. 106 U.S. 371 (1882), the defendant was convicted of violating the predecessor of the Hatch Act which prevented subordinate government employees from receiving money from other government employees. The Court upheld this statute on the ground that the need to "promote efficienty and integity in the discharge of official duties," justified the prohibition on policial contributions. *Id.* at 373. The Court held that the statute was within the legislative power of Congress and that it did not restrict any political privileges of government employees. It "simply for[bade] their receiving [money] from or giving [money] to each other." *Id.* at 372. It should be noted that even Justice Bradley, who dissented on the grounds that the statute was an infringement of government employees' freedom of speech and assembly, observed, "The legislature may make laws ever so stringent to prevent the corrupt use of money in an election, or in political matters generally . . . ." *Id.* at 378. In United States v. Wurzbach, 280 U.S. 396 (1930), the respondent was indicted on charges of having violated an act under which members of Congress were prohibited from receiving contributions for "any political purpose whatever" from any federal employee. The respondent, a member of the House of Representatives, was alleged to have received contributions from United States employees to promote his nomination in a party primary. The Court, per Justice

Holmes, dismissed in one sentence the respondent's argument that the act was unconstitutional because of its interference with the rights of a citizen to make a political contribution. *Id* at 399.

[259] 413 U.S. 548 (1973). A few courts has taken exception to the validity of *Mitchell. See* Hobbs v. Thompson, 448 F.2d 456, 472 (5th Cir. 1971); Mancuso v. Taft. 341 F. Supp. 574, 581 (D.R.I. 1972).

[260] 413 U.S. at 564–65.

[261] The employee in *Mitchell* was a roller in the government mint, with no contact with the public.

[262] It sould be noted here that the Supreme Court on three occasions has dealt with the absolute prohibition on labor union contributions to federal political campaigns under 18 U.S.C. § 610 (1970). Pipefitter's Local 562 v. United States, 407 U.S. 385 (1972); United States v. UAW, 352 U.S. 567 (1957); *cf,* United States v. CIO, 335 U.S. 106 (1948). Each time, however, the Court failed to address itself specifically to the issue of whether such a prohibition was constitutionally valid.

There is also a ban on corporate contributions which is contained in the same section of the United States Code, 18 U.S.C. § 610 (1970), as the restriction on labor union contributions, but it has never been construed in a Supreme Court case. As a result of the Campaign Act of 1971, the Court may never reach this issue because the Act makes legal accumulation of "voluntary" labor union and corporate funds for the purpose of political contributions. 18 U.S.C. § 610 (Supp. II, 1972).

[263] Some would say that politics has already become a plaything of the wealthy. See F. Lundberg, The Rich and the Super-Rich 584–678 (Bantam ed. 1968).

[264] For a discussion of similar issues see Ferman, supra note 210, at 24.

[265] Since the existing campaign spending limits have been largely unenforced, there is very little case law dealing with the constitutionality of such regulations. Indeed, State v. Kohler, 200 Wis. 518, 288 N.W. 895 (1930) is the only case reported which addresses itself to this question. The Wisconsin Supreme Court upheld the validity of such ceilings in that case. The court declared: "It is a matter of common knowledge that men of limited financial resources aspire to public office. It is equally well known that successful candidacy often requires them to put themselves under obligation to those who contribute financial support. If such a candidate is successful, these obligations may be carried over so that they color and sometimes control official action. The evident purpose of the act is to free the candidates from the temptation to accept support on such terms and to place candidates during this period upon a basis of equality so far as their personal ambitions are concerned, permitting them, however, to make an appeal on behalf of the principles for which they stand, so that such support as may voluntarily be tendered to the candidacy of a person will be a support of principles rather than a personal claim upon the candidate's consideration should he be elected. . . . It may be replied that the act seeks to throw democracy back upon itself, and so induce spontaneous political action in place of that which is produced by powerful political and group organizations." *Id.* at 565–66, 228 N.W., at 912.

[280] The "fairness doctrine" is the term used to describe the requirement imposed by the Federal Communications Commission on radio and television broadcasters that discussion of public issues be broadcast and that each side of those issues be given fair coverage. The "fairness doctrine" is separate from the statutory provision § 315(a) of the Communications Act of 1934, as amended, 47 U.S.C. § 315(a) (1970), which requires that equal time be allotted all qualified candidates for public office.

[281] 395 U.S. at 390.

[283] See Redish, *supra* note 210, at 910–11.

[284] At first glance, limitations on spending may seem to be no different for purposes of the right to receive information from the law struck down in *Mills.* Even assuming that the Court in *Mills* was concerned with the right to receive information, see text accompanying note 282 *supra,* there are several distinguishing factors. In *Mills* the prohibition was absolute; in order to protect the public from some potentially false and unrebuttable charges, all election day editorials were banned. Limitations on spending, on the other hand, prohibit individuals from spending money on a campaign only after a certain point—indeed, under the system recommended by this article, after a point which is more than adequate to run an effective campaign. *See* text accompanying notes 195–98 *supra.* The limitations are designed not to protect the public from the evils of potentially false, unrebuttable speech, but from the corruptive influence which it is felt is present in all excessively financed campaigns. Furthermore, the limitations are designed not to stifle speech, but rather to perfect the right to receive campaign information from all sides—to assure that the few hours a member of the public has to devote to politics are not dominated by the din emanating from one or two campaigns. This idea of perfecting competition in the "marketplace of 'ideas and experiences'" received the approval of the Supreme Court in a somewhat different context in *Columbia Broadcasting Sys. v. Democratic Nat'l Comm.,* 412 U.S. 94, 123 (1973), a case holding that the first amendment did not require broadcasters to sell air time for editorial advertisements in part because of the public interest in receiving a balanced viewpoint on public issues. *See* note 234 *supra; cf.* Justice Stewart's concurring opinion, 412 U.S. at 133.

[285] Abrams v. United States, 250 U.S. 616, 630 (1919) (Holmes, J., dissenting).

[286] Ferman, *supra* note 210, at 24.

[287] It is interesting to note here that the governmental interest in limiting expenditures (i.e., to open the channels of political process and expression to the weaker minority viewpoints is derived from the same constitutional source as the first amendment rights which have been viewed as the countervailing interest in this balancing test. In the more typical case the constitutional interest is balanced against an interest which derives from the police or health and safety powers of the state, examples being the interest in keeping sidewalks open for pedestrians or in maintaining the efficiency of the Selective Service System. When both interests are constitutionally derived the balancing test will merely weigh the extent to which the regulation serves each first amendment interest. *See* Ferman, *supra* note 210, at 25; Redish, *supra* note 210, at 907.

[301] *Id.* at 438.

[302] In order to enforce these spending limitations the proposals generally provide that a candidate must certify that a given expenditure will not violate the applicable limitation on spending. Before accepting any campaign expenditure, therefore, a newspaper or radio station must obtain such certification from the candidate's central campaign finance committee. In this manner, however, the candidate is given the veto power over campaign expenditures an independent party might want to make in his behalf. Recently a federal district court held this type of requirement to be an unconstitutional prior restraint of free speech. *ACLU* v. *Jennings.* 662 F Supp. 1041 (D.D.C 1973). If this holding is ultimately sustained, it will require implementing an alternative method for enforcement of spending limitations. In that case one possible solution would be to require affidavits of all those makeing expenditures on behalf of a candidate stating that they are making such expenditures independently of the candidate and not through his central finance committee. In this manner the level of expenditures attributable to the candidate himself could be monitored without the prior restraint of free speech.

[306] Louisiana *ex rel.* Gremillion v. NAACP, 366 U.S. 293 (1961); Shelton v. Tucker, 364 U.S. 479 (1960); Bates v. City of Little Rock, 361 U.S. 516 (1960); NAACP v. Alabama *ex rel.* Patterson, 357 U.S. 449 (1958).

[307] 362 U.S. 60 (1960).

[308] See, e.g., Rabinowitz v. Kennedy, 376 U.S. 605 (1964) (registration of foreign agents): Communist Party of the United States v. Subversive Activities Control Bd., 367 U.S. 1 (1961) (registration of Communist Party members and officials). See also Pilcher v. Jennings, 347 F. Supp. 1061 (S.D.N.Y. 1972) where the court dismissed a constitutional challenge to the financial disclosure provisions of the Campaign Act of 1971, 2 U.S.C. §§ 431–41 (Supp. II, 1972). See notes 59–65 and accompanying text supra. The complaint was dismissed for failure to allege any specific deprivations of first amendment rights.

[309] 290 U.S. 534 (1934).

[310] Id. at 548.

[311] The narrow constitutional holding of Burroughs was that Congress had authority under the Constitution to regulate presidential and vice-presidential elections. The regulation which was the subject of the constitutional challenge to the power of Congress to regulate presidential elections was a disclosure requirement.

[312] 347 U.S. 612 (1954).

[313] Id. at 625 (citations omitted).

[314] Id. at 625–26.

[315] The Supreme Court has stated that: "By its very nature, the privilege [against compulsory self-incrimination] is an intimate and personal one. . . . The Constitution explicitly prohibits compelling an accused to bear witness "against himself": it necessarily does not proscribe incriminating statements elicited from another." Couch v. United States, 409 U.S. 322, 327, 328 (1973).

Since enforcement authorities would acquire knowledge of an illegally large contribution only through the candidate's campaign finance reports, there may well be no self-incrimination questions here because of the personal nature of the privilege. The following textual discussion, however, takes the position that there is a self-incrimination question and demonstrates that even if there is, the disclosure requirements here do not violate the privilege.

[322] Hearings on S. 1103, supra note 3, at 141–58.

By Mr. LEAHY (for himself, Mr. LUGAR, Mr. MITCHELL, Mr. DOLE, Mr. EVANS, Mr. BRADLEY, Mr. GRAMM, Mr. WIRTH, Mr. DURENBERGER, Mr. PRYOR, Mr. BOSCHWITZ, Mr. SANFORD, Mr. JEFFORDS, Mr. MCCAIN, Mr. WARNER, Mr. D'AMATO, Mr. MURKOWSKI, Mr. GARN, Mr. HATCH, Mr. STEVENS, Mr. GORTON, Mr. BOND, Mr. COATS,

Mr. WILSON, Mr. KASTEN, Mr. SIMON, and Mr. ADAMS):

S. 2426. A bill to authorize the President to designate a private nonprofit foundation as eligible to receive funds for the purpose of promoting community tree planting and cultivation projects, to authorize the Secretary of Agriculture to establish a rural tree planting program and a community tree planting program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. LEAHY (for himself, Mr. LUGAR, Mr. BAUCUS, and Mr. CONRAD):

S. 2427. A bill to provide for the establishment of a coordinated and cooperative Federal, State, and local forest program for the management and enhancement of forest lands, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FORESTRY LEGISLATION

Mr. LEAHY. Mr. President, with my colleague, Senator LUGAR, I am introducing two major forestry bills today.

The first bill challenges every American to pick up a shovel and plant a tree.

The second bill challenges the 8 million owners of private forest lands to develop a stewardship strategy that sustains and preserves their forests for future generations.

The first bill that I am introducing, the National Tree Trust Act, provides a statutory authorization for the President's proposal to plant a billion trees each year for the next 10 years. I am gratified that the President recognized that the Senate's passage of a major tree planting initiative last year signalled that the leadership of the Senate Agriculture Committee was ready to work with the President on this issue.

Under the initiative, which calls for planting 1 billion trees a year for 10 years, we would be planting enough trees to fill an area the size of Connecticut, Massachusetts, Vermont, and New Hampshire combined.

Mr. President, global warming is one of the most serious environmental threats facing us today.

Even the dry statistics are ominous. A mere 4 degree rise in average temperature could cause a dramatic 50 percent reduction in rice production—the staff of life for 70 percent of the world's population.

There are some who argue that this tree planting effort is an inadequate response to a threat of such magnitude.

I believe that the threat of global warming is so large that I will support any step—small or large—that moves us down the long road to solving this problem. As long as President Bush is ready to take a step in the right direction, I will move with him.

The second bill that we are introducing today is just as immediate—and in the long run may be much more significant. The Forest Stewardship Act challenges the 8 million private forest owners—who manage 482 million acres of forest covered by an estimated 200 billion trees—to sustain and protect those forest for the future.

Our Nation's forests are far more than our national forests. Almost three quarters of our forests are privately owned.

There was a time when managing our private forests was limited to controlling pests and putting out fires.

Today new, and more severe hazards—such as development and acid rain—threaten our forests.

For example:

In Maine, 23,000 acres of forests were subdivided between 1985 and 1988.

Air pollution threatens to reduce growth and increase dieback in most Eastern States.

And in the face of threats of pollution, development, and over harvesting, Forest Service assistance to private forest owners was cut by 44 percent between 1979 and 1989.

Our private forests are important to every American, not just their landowners. Americans want more forest products, more recreational opportunities, and more fish and wildlife habitat.

As a private forest landowner—managing land the Leahy family has held for many years—I know that forest stewardship makes both economic and environmental sense.

We need a forest stewardship program as big and imaginative as the threats facing our forests.

This stewardship program we are introducing today expands existing mandates so that it is clear that the responsibilities of the Forest Service and the Department of Agriculture do not end at boundaries of each National Forest.

Key elements of this stewardship program, which will be the heart of the forestry title of the farm bill, include:

Protection of forestland through conservation easements;

Expansion of technical and financial assistance beyond tree planting, fire control and pest management;

State coordination of national and local forestry programs to better manage our Nation's forests;

Expansion of disease-prevention programs to include combating manmade threats to forests, such as acid rain.

Mr. President, the legislation we are introducing today provides a framework for forestry title of the 1990 farm bill—a framework that will sustain and preserve our Nation's forests.

The Forest Stewardship Act has support from such groups as the National Association of State Foresters, Wilderness Society, National Wildlife Federation, National Woodland Owners Association, and International Association of Fish and Wildlife Agencies.

Let us join together to plant a billion trees as a down payment on our Nation's and the Earth's future. Let us join together to sustain and preserve the 25 million acres of forest lands—and the 10 billion trees they sustain—as an investment in our Nation's future.

Mr. LUGAR. Mr. President, it is an honor to introduce the National Tree Trust Foundation Act with my distinguished chairman, Senator LEAHY, to implement President Bush's tree planting initiative. It was my privilege to be with the President in Indiana on Tuesday. He planted a tree at the city-county building and certainly gave a very eloquent statement about his own personal interest in forestry and specifically the ways in which a billion new trees in our country will do wonders for the environment. It is an equal privilege to be associated with Chairman LEAHY in introducing the Forest Stewardship Act of 1990. It incorporates so many aspects that are important in providing good lands on private property, on farms, and small wood lots all over America. It has been my privilege to plant eight acres of hardwoods, walnuts and oaks, on my own farm, to see the forestry talents that are available in the State of Indiana and which I know are abundant throughout our country.

It is the hope of Senator LEAHY and myself and others on the committee that there will be strong support for this initiative, indeed strong support all over the Nation, particularly with the rural phases of this bill and the ways in which we help people utilize private plots.

As submitted by the administration, the National Tree Trust Foundation Act will provide the legislative authority needed to implement the President's National Tree Planting and Forest Improvement Program as contained in his fiscal year 1991 budget proposal. Specifically, the administration's bill authorizes the Secretary of Agriculture to use existing authority to establish a rural tree planting and forest improvement program and a community tree planting and improvement program. The bill authorizes a fiscal year 1991 appropriation of $175 million, including a one-time startup grant of $35 million to the National Tree Trust Foundation, a private nonprivate foundation which the President is authorized to designate and which will solicit private contributions, accept and administer gifts and make grants to encourage local participation in the planting and cultivation of trees.

In the administration's fiscal year 1991 budget proposal, the President's

Tree Planting and Forest Improvement Program has three elements:

First, rural assistance: The President's tree planting and forest improvement initiative includes $110 million for cost sharing and technical assistance with private landowners to plant, maintain, and improve trees on suitable lands. This program will be implemented through existing delivery mechanisms and through State forestry agencies.

Second, National Tree Trust Foundation: The bill designates the National Tree Trust Foundation and authorizes a one-time grant of up to $35 million to it. The National Tree Trust Foundation will be a private, nonprofit foundation which will accept donations and make matching grants for community tree planting programs.

Third, community trees: $30 million to help plant an average of 30 million trees annually in the 40,000 cities, towns, and communities of our Nation. The intent of the Community Tree Program is to reverse the current rate of urban deforestation whereby only one tree is planted for every four that dies or is removed.

Specifically, the Leahy-Lugar forestry title would include—

First, a newly authorized Forest Stewardship Management Program to provide for cost-sharing of up to 75 pecent with private forestland owners for enhanced timber management, wildlife habitat improvements, agroforestry, forest wetlands, trails, and other purposes.

Second, establishment of broadly representative statewide forest stewardship advisory committees.

Third, an expansion of existing educational and technical assistance programs for forestry.

Fourth, a pilot forest reserve program by which the Forest Service could acquire lands or easements on lands to protect environmentally sensitive forest land from conversion to nonforest uses.

I look foward to speedy passage of the President's bill. I welcome Senator LEAHY's strong interest in the State and private forestry program and look forward to working with him and other Senators in drafting the forestry title of the 1990 farm bill.

By Mr. GRAMM (for himself and Mr. DOMENICI):

S. 2428. A bill to authorize negotiation of a Mexico-United States free-trade agreement, and for other purposes; to the Committee on Finance.

MEXICO-UNITED STATES TRADE ACT

Mr. GRAMM. Mr. President, Senator DOMENICI and I today are introducing the Mexico-United States Trade Act.

This bill sets into place a mechanism to initiate negotiations with Mexico with a goal of, on a reciprocal basis, reducing trade barriers so that goods and services can flow across our joint borders, so that we can create more jobs, more growth, more opportunity on both sides of the border.

Mr. President, this bill simply establishes the mechanism whereby President Bush would enter into negotiations with President Salinas to hammer out a trade agreement as we did with Canada. At the same time the bill would guarantee expedited consideration by the Senate of that agreement.

Mr. President, I know there are many who say the obstacles to a free-trade agreement with Mexico are insurmountable.

Twenty years ago, the same people were saying that the obstacles to a free-trade agreement with Canada were insurmountable. Today, that free-trade agreement is in effect, and every day more trade occurs between the United States and Canada, and every day people on both sides of the border benefit.

Mr. President, I know there are thousands of voices in this country and in Mexico that will say that we cannot deal with the 1,001 practical problems that stand in our way in opening up trade with Mexico and ultimately achieving a free-trade agreement.

But I think the time has now come to act boldly. This is not a proposal for those who have faint hearts and small dreams. This is a proposal for those who believe that while we are talking about free enterprise, rebuilding Eastern Europe, that we ought to be working to use the same system to create jobs, growth, and opportunity not just here in the United States, but in Mexico as well.

Mr. President, I know there will be some who say that my State will be a big beneficiary of this bill. It is true. My State is now second only to California in total exports, and greater than California in exports per capita. Our growth in the last 3 years has been due almost entirely to the growth of exports. And there is no doubt about the fact that a free-trade agreement with Mexico will make Laredo a world trade center, will expand the capacity of Corpus Christi and San Antonio to become hubs for trade between the United States and Mexico, will benefit communities from El Paso to the Valley in terms of expanded commerce and job creation.

Mr. President, there is hardly a State further from Canada than my State. I strongly supported the Canada-United States free trade agreement because it was good for the United States of America, and it was good for all free people all over the world.

So I think this is an important piece of legislation. We are encouraged by the fact that President Salinas in the last few weeks has come out and said that perhaps we can now begin to talk in earnest about a free trade agreement.

The substance of this bill was offered as an amendment to the 1988 trade bill. That amendment was adopted in the Senate. It died in conference. There is support in his body for a free trade agreement with Mexico.

Our objective today is not to try to preempt the President or the President of Mexico. Our objective is to set out a procedure and to show support in the U.S. Senate for getting on with the job of trading with a country that has almost 100 million people living right next door to us.

As President Salinas said last week, they can export goods or they can export their own workers. They would rather export goods. This bill will create jobs, growth, and opportunity on both sides of the border.

I am happy to yield to my colleague from New Mexico.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. How much time remains?

The PRESIDING OFFICER. Six minutes.

Mr. DOMENICI. I thank my good friend from Texas for yielding.

Mr. President, the euphoria with which the America people and many Senators of the United States here on the floor have accepted the changes moving toward freedom in Eastern Europe is amazing. It was almost an atmosphere of exhilaration as we watched the Berlin Wall fall, and Poland proceed to adopt freedom and shake off the shackles of communism and Marxism.

Beyond East central Europe there is a silent economic revolution occurring in this hemisphere, thanks to one person, the current President of the Republic of Mexico.

No one should doubt that it is more in the long-term interests of the United States to look south to Mexico, Central America, and South America than ever before in our history.

President Salinas has said Mexico must change or Mexico will go backward. What he has done in the past 18 months as a leader of those people called Mexicans in the Republic of Mexico is absolutely amazing.

As a matter of fact, right now if I had to pick an outstanding leader in the world, I would look for one in charge of a country that needs to develop, that has human population and resources galore. I would look for a leader who inherited an economy that is absolutely in the doldrums. Who would that leader be that is most apt to succeed in setting the best example?

Mr. President, unequivocally, I would pick the President of Mexico.

He understands. He knows. He is a brilliant economist, moving them toward a decentralized economy, getting rid of central bureaucracy, moving toward privatization, inviting back Mexican capital, and inviting foreign investment.

Guess what is happening? Productivity is up, growth is up, and there is exhilaration among those who have watched Mexico. That quite revolution is why I am here on the floor.

It seems to me the time is right to send a signal that we want to develop this hemisphere, this hemisphere made up of millions of Hispanic-cultured people who Naturally relate to us here in North America.

For that reason, I do not think we ought to look exclusively across the oceans when on our back door is the potential for economic prosperity and trade for this hemisphere and for all of our people.

The Ambassador of Mexico, talking with me and to people in New Mexico today, said that he believes the trade with the United States, which is $55 billion, could double in the foreseeable future—double. That means we must trade with them, and they will trade with us.

To do that, we have to get rid of barriers. We have to have some confidence in people and marketplaces. That is why I am cosponsoring this bill. It is not to preempt either our President or the President of the Republic of Mexico; not at all.

As a matter of fact, I hope it is not taken as any indication that we want to move faster than the President of Mexico or that we want to move faster than our President as of today. Rather, we encourage the broadest negotiations between Mexicans and Americans toward the end that we begin to develop our hemisphere free of trade barriers. We should strive to develop our own continental North American Market by, let's say, 1994.

While we worry so much about Europe 1992, in our own neighborhood is the potential for economic growth, prosperity, and trade with our friends.

We ought not to continue to second-guess Mexico. Every time we talk about Mexico, somebody talks about the way it used to be. Well, the way it used to be would not have led to positive change there or anywhere else in the world.

Mexico seems to be ready to enter this new millennium as coequals with us in developing their resources and their people. They are committed to increasing productivity, GNP growth, which means jobs and the benefits that we have grown accustomed to also being made available to millions of Mexican people across the border. Mutual benefits multiply naturally if we do it right, and if we support our friends and neighbors as coequals.

That is why I support this proposal—to send a message to negotiate, to get on with getting rid of barriers—so we can count on trade that benefits both Nations.

Incidentally, for those who do not focus on Mexico, but so much on Europe, Mexico is not asking for any aid, to my knowledge. They are asking for trade. Frankly, when you have that situation, you ought to encourage it. It is too rare.

The President of Mexico could even help us work toward Central American development. He relates to their leaders. They are already beginning to look to him for his tremendous capability in the field of economics and his astuteness in politics.

I submit that the United States ought to recognize that role of President Salinas. He ought to be our partner, or at least in a leadership role, as we try to help Panama, Nicaragua, and those other countries that so desperately need economic development of the type he is trying to bring to the United States of Mexico.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2428

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Mexico-United States Trade Act".

SEC. 2. FINDINGS.

The Congress makes the following findings:

(1) The income and prosperity of the citizens of the United States and Mexico are increased by the mutual reduction of trade barriers.

(2) The free trade agreements into which the United States has entered with Israel and Canada symbolize the path of prosperity for the United States in its trade relations into the next century.

(3) The establishment of a Mexico-United States Free Trade Area will promote the mutual reduction of trade barriers with other countries as well, initiating a series of trade barrier reductions, instead of the dismal succession of trade barrier increases likely to result from a resort to protectionism and trade retaliation.

(4) Trade protectionism endangers economic prosperity in the United States, Mexico, and globally, and undermines civil liberty and constitutionally limited government.

SEC. 3. MEXICO-UNITED STATES FREE TRADE AGREEMENT.

(a) IN GENERAL.—The President shall take action to initiate negotiations to obtain a trade agreement with Mexico, the terms of which provide for the reduction and ultimate elimination of tariffs and nontariff barriers to trade, and is authorized to enter into a trade agreement with Mexico that provides for the elimination or reduction of any duty imposed by the United States and for the establishment of a free trade area between Mexico and the United States.

(b) RECIPROCAL BASIS.—An agreement entered into under subsection (a) shall be reciprocal and provide mutual reductions in trade barriers to promote trade, economic growth, and employment.

(c) PHASED REDUCTION OF BARRIERS.—Any agreement entered into under subsection (a) may provide for a reduction or elimination of tariff and nontariff barriers to trade that may be gradually reduced or eliminated over a period that does not exceed 10 years.

SEC. 4. EXPEDITED CONSIDERATION OF FREE TRADE AGREEMENT.

(a) CONSULTATION WITH CONGRESS.—(1) Before the President enters into any trade agreement under section 3 of this Act, the President shall consult with—

(A) the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate; and

(B) each other committee of the House and the Senate, and each joint committee of the Congress, which has jurisdiction over legislation involving subject matters which would be affected by the trade agreement.

(2) The consultation under paragraph (1) shall include—

(A) the nature of the agreement;

(B) how and to what extent the agreement will achieve the applicable purposes, policies, and objectives of section 1101 of the Omnibus Trade and Competitiveness Act of 1988; and

(C) all matters relating to the implementation of the agreement under subsection (b) of this section.

(b) IMPLEMENTATION.—(1) Any agreement entered into under section 3 of this Act shall enter into force with respect to the United States if (and only if)—

(A) the President, at least 90 calendar days before the day on which he enters into the trade agreement, notifies the House of Representatives and the Senate of his intention to enter into the agreement, and promptly thereafter publishes notice of such intention in the Federal Register;

(B) after entering into the agreement, the President submits a document to the House of Representatives and to the Senate containing a copy of the final legal text of the agreement, together with—

(i) a draft of the implementing bill,

(ii) a statement of any administrative action proposed to implement the trade agreement, and

(iii) the supporting information described in paragraph (2); and

(C) the implementing bill is enacted into law.

(2) The supporting information required under paragraph (1)(B)(iii) consists of—

(A) an explanation as to how the implementing bill and proposed administrative action will change or affect existing law; and

(B) a statement—

(i) asserting that the agreement makes progress in achieving the applicable purposes, policies, and objectives of section 1101 of the Omnibus Trade and Competitiveness Act of 1988,

(ii) setting forth the reasons of the President regarding—

(I) how and to what extent the agreement makes progress in achieving the applicable purposes, policies, and objectives referred to in clause (i), and why and to what extent the agreement does not achieve other applicable purposes, policies, and objectives,

(II) how the agreement serves the interest of United States commerce, and

(III) why the implementing bill and proposed administrative action is required or appropriate to carry out the agreement;

(iii) describing the efforts made by the President to obtain international exchange rate equilibrium and any effect the agreement may have regarding increased international monetary stability; and

(iv) describing the extent, if any, to which—

(I) each foreign country that is a party to the agreement maintains non-commercial state trading enterprises that may adversely affect, nullify, or impair the benefits to the United States under the agreement, and

(II) the agreement applies to or affects purchases and sales by such enterprises.

(3) To ensure that the foreign country which receives benefits under a trade agreement enter into under section 3 of this Act is subject to the obligations imposed by such agreement, the President shall recommend to Congress in the implementing bill and statement of administrative action submitted with respect to such agreement that the benefits and obligations of such agreement apply solely to the parties to such agreement, if such application is consistent with the terms of such agreement. The President may also recommend with respect to any such agreement that the benefits and obligations of such agreement not apply uniformly to all parties to such agreement, if such application is consistent with the terms of such agreement.

(c) QUALIFYING FOR EXPEDITED CONSIDERATION.—Any draft of a bill implementing a trade agreement entered into under section 3 of this Act, that is submitted to the Congress by the President shall be considered to be an implementing bill for purposes of section 151 of the Trade Act of 1974 (19 U.S.C. 2191).

SEC. 5. EFFECT OF COUNTRIES NOT PARTY TO AN AGREEMENT.

Notwithstanding any other provision of law, no trade benefit shall be extended to any country by reason of the extension of any trade benefit to another country under a trade agreement entered into under section 3 of this Act with such other country.

Mr. DOMENICI. Mr. President, I am pleased to join the Senator from Texas [Mr. GRAMM] in introducing the Mexico-United States Trade Act. This bill instructs the President of the United States to initiate negotiations to obtain a free-trade agreement with Mexico. It provides for consultation with the Congress and provides for fast track consideration by the Congress of the agreement once the negotiations and consultations are concluded.

Mexico and the United States entered into a "Framework of Principles and Procedures for Consultations Regarding Trade and Investment Relations" in 1987. Authorizing negotiations for a free trade agreement is the logical next step. The section 332 ITC investigation on the economic impact and potential for such an agreement will be published later this month, April 18.

I regard this legislation as an expression of support for an enhanced long term trade and investment relationship with Mexico. I am fully aware that the potential for Mexico-United States trade is tremendous. I am also aware that thus far that potential has barely been tapped.

Mexico is a grand country of 80 million people. It is the 10th biggest global economy and the cultural leader of the 260 million Spanish speaking Latin-Americans.

We have an interest in Mexico's success. We are more than neighbors. We have common ancestors. Mexico's society penetrates the United States more deeply than any other country.

A third of the continental United States was Mexican territory until just 145 years ago. There are 17 million Americans of Hispanic descent—and more than 10 million of them are Mexican in origin.

A robust Mexican economy could be a larger export market for the United States.

A robust Mexico could assume a leadership role in our hemisphere—that of economic example as well as cultural leaders for Central America.

In his tenure as President of Mexico, Salinas has taken some dramatic actions to tame inflation, to stop inefficient subsidization, and to privatize the economy.

In effect, Salinas has been turning back the clock on economic policies that have cost his country precious time and prosperity. He is rewinding the clock with the hope of bringing Mexico's economy back.

Between 1940 and 1970, the economists called it the Mexican miracle. The Mexican economy grew at an average annual rate of 6 percent, a pace rivaling that of the world's economic dynamos—Japan, South Korea, and West Germany. Annual inflation over those three decades averaged less than 5 percent and all major indicators pointed to sustained economic growth and development. Then the Government changed and Mexico's economic picture changed for the worse.

Mexican President Carlos Salinas de Gortari has chosen to reverse this and lead his country back to the future.

President Salinas hopes to create the Mexican economic miracle by implementing his national development plan and meeting its goals by 1994. If a leader can be only as great as the problems he must overcome, Salinas could go down as one of the great leaders of the 20th century.

To get Mexico back on the prosperity track he has to overcome triple-digit inflation, centralized planning, state ownership of many industries, inefficient subsidies, capital flight, and a crippling foreign debt.

During his tenure as President, Salinas has unleashed a series of changes that make many of the reforms underway in Eastern Europe look modest. In both places, leaders are walking a tightrope with inadequate safety nets.

He is moving as fast as the political system permits and is pursuing a program of economic reform based on what he calls the "disincorporation of parastatal entities." This is privatization of Mexico's huge state-owned economic sector.

In the 1970's Mexico had 1,155 state-owned enterprises. This year the number of state-owned enterprises had declined to 400.

He is treating the foreign investment phobia and Yanqui phobia by liberalizing foreign investment regulations and relaxing the 49-51 percent rules that made majority foreign ownership impossible. While the $24 billion that Americans have invested in Mexico represents only a little over 2 percent of total United States investment, it accounts for 62 percent of all foreign investment in Mexico. Salinas is showing his people that foreign investment can mean jobs and a better standard of living.

He is committed to revitalizing the Mexican economy so that it can produce more goods and services. He is trying to broaden the country's economic base and modernize its plants and equipment. He is working for continued social stability; he is making permanent structural changes.

The bill Senator GRAMM and I are introducing today is a vote of confidence that the Mexican economy can be successful.

President Salinas is taking on entrenched myths and trying to show his people the benefits of free trade. Some Mexican nationals fear opening up their market to the American colossus whose $5 trillion gross national product dwarfs Mexico's $150 billion.

Most Mexicans still assume that they cannot compete with rich and technologically sophisticated American enterprises. This is ironic, for so many Americans complain that it is impossible for American enterprises to compete with the low wages available to Mexican businesses. Both sets of critics are mistaken, as the maquiladora program has proved. But the myths are deeply entrenched.

The maquiladora program, on balance, has been a tremendous success. The reason is the program makes good use of comparative advantage and geography. The United States and Mexico share a 2,000-mile border much of which has been and can continue to be developed with more maquiladoras.

Maquiladora roughly translates to "hands on." Mexican workers get hands-on experience assembling components manufactured in the United States.

Launched in 1965, this officially entitled "Border Industrial Program" has created 350,000 Mexican jobs assembling components and about as many American jobs supplying these plants.

The maquila industry has become one of the most important sectors of the Mexican economy, second only to exports of petroleum as a foreign exchange earner.

We should take every opportunity to build this industry. New Mexico needs additional ports at Santa Teresa and Anapra. We should assign additional Customs agents at the border to facilitate the efficient movement of goods through the border.

Continuing with the bold reforms put in place by President Salinas, building upon the maquiladora program, while working toward a free trade agreement could bring Mexico back to the economic prosperity it enjoyed during the 1940 and 1970 period. The United States and Mexico together could bring the two countries back to a future of economic prosperity, and into the future of greater cooperation within this hemisphere.

By Mr. BINGAMAN:

S. 2429. A bill to establish the Mimbres Culture National Monument and to establish an archeological protection system for Mimbres sites in the State of New Mexico; to the Committee on Energy and Natural Resources.

MIMBRES CULTURE NATIONAL MONUMENT ESTABLISHMENT ACT

● Mr. BINGAMAN. Mr. President, I rise today to introduce legislation to establish the Mimbres Culture National Monument and to create a protection system for Mimbres sites in southwestern New Mexico.

This measure is the logical sequence to my National Mimbres Culture Study Act of 1988. The act directed the Secretary of the Interior to analyze the significance of the Mimbres culture, to identify sites appropriate for interpreting the culture, to recommend measures for preserving known Mimbres resources located in and around Silver City, NM, and to outline development that would facilitate public use and enjoyment.

The National Park Service has not released the results of their study; however, I have had an opportunity to discuss the draft information with them and I believe that it is an appropriate time to introduce legislation to create a national monument. This national monument would recognize the national significance of the cultural resource properties associated with the Mimbres culture, and would protect and interpret these resources for the benefit and enjoyment of present and future generations.

My home State of New Mexico is rich in cultural resources. People have lived there for at least 11,000 years. Three great civilizations, including the Anasazi, Hohokam, and Mogollon, flourished in the region. Each of these cultures expressed distinctive lifestyles, based in large part on their adaptations to specific geographic locations.

The most significant expression of the Mogollon culture has been left by a group of people who are known today as the Mimbres. They lived between A.D. 200 and 1150, although the origins of the Mimbres culture and the reasons for its demise are not fully understood.

The region occupied by the Mimbres people extended from southwestern New Mexico into southeastern Arizona and the northern Chihuahua State of Mexico. Today many of the Mimbres sites are in the river valleys of Mimbres, Gila, and San Francisco that surround present day Silver City, NM.

Originally, the Mimbres people lived as nomadic hunters and gatherers. After A.D. 200 they began to build agricultural villages consisting of a few hundred people and supplemented farming with hunting and foraging. They excelled in agricultural development including the creation of sophisticated stream diversion and canal irrigation systems.

The Mimbres first lived in semisubterranean pithouses, but around A.D. 1000 they began to build masonry villages, achieving levels of population density unknown by other contemporary southwestern societies. Some of the pueblos built during the later Mimbres period are among the largest in the Southwest. The significance of the large pueblos and extensive irrigation systems of the Mimbres culture has been underestimated in the prehistory of the Southwest.

Even though the Mimbres architectural remains are highly significant, these people are best known for a major cultural achievement. That is the development of an extraordinary decorated pottery that is characterized by striking black-on-white paintings. Mimbres pottery went through a series of well-defined changes from early to late periods but it is the later black-on-white pottery that distinguishes Mimbres ceramic art.

Some of these black-on-white pots are painted with highly complex geometric designs, but the most intriguing works are beautifully executed representational designs, including paintings of plants and animals, as well as humans and mythological beings. The mythical beings painted on Mimbres pottery sometimes are the combination of features of real animals and are often shown interacting with humans or animals. Scenes of pottery making, food gathering, hunting, planting, childbirth, story telling, swimming, gambling, and many other activities are depicted on Mimbres pottery. Mimbres art is a unique visual resource that documents the natural and cultural world of the Mimbres as well as their intellectual life. It is the pictorial content of Mimbres ceramic art that captivates us and provides an important source of information.

Mimbres pottery now enjoys an international reputation, and about 7,000 pieces are displayed in museums around the world. Much scholarly and popular literature has been devoted to the beauty and craftsmanship of the work. Mimbres pottery is perhaps the single most famous prehistoric American Indian art style.

It was during the 1870's and 1880's that accounts of ruins in the Southwest began to receive widespread attention in the East. These accounts focused on the cliff dwellings of Mesa Verde and the ruins of Chaco Canyon, but the ruins of the Mimbres area were also known to early archeologists.

It was not until the second decade of the 20th century that J. Walter Fewkes of the Smithsonian Institution made a reconnaissance of the Mimbres area and brought back the first collections of Mimbres pottery to the Smithsonian and the Museum of the American Indian in New York. His discovery led to a wave of scientific excavations in the 1920's and early 1930's. These excavations produced the first good evidence of the full range of Mimbres material culture. Several hundred rooms were excavated and over 2,500 painted bowls were recovered.

As a result of the 1988 National Mimbres Culture Study Act, the National Park Service has evaluated 22 of the largest, most well-known, and nationally significant sites in the Silver City area. These sites span a period of about 1,700 years and include numerous pithouses, roomblocks, rock art, and ceramic and lithic materials, as well as agricultural irrigation systems. Some Mimbres sites have been vandalized and destroyed, but outstanding Mimbres sites, that have a high degree of integrity, still exist in the Silver City area.

While interest in Mimbres culture and artifacts is international in scope. No unit of the National Park System or of any other agency is dedicated to the preservation and interpretation of the Mimbres culture. My bill is intended to protect Mimbres sites and to provide for interpretation, recreational use, and scientific study.

The legislation I am introducing today would create a new unit of the National Park System dedicated to the Mimbres culture. Four of the sites, the Cameron Creek, Maddock, TJ Ruin and Woodrow Units, evaluated in the National Park Service study will comprise the new national monument. In addition, a Mimbres Archeological Site Protection System would be established to coordinate the protection of other Mimbres cultural sites and materials and would involve a variety of public and private parties.

A visitor center for the interpretation of Mimbres culture, the exhibition of Mimbres artifacts, and the orientation of visitors will be developed in Silver City as a part of the national monument. The subdued Mimbres ruins may require onsite interpretation to facilitate public understanding and enjoyment. Through interpretation and education, visitors can better comprehend the architectural, artistic, social and economic aspects of Mimbres culture, the relationship of the Mimbres to the Mogollon, Salado, and Casa Grandes cultures, and the tie between the Mimbres people and the land.

The National Park Service will coordinate with public and private entities in establishing, planning, and managing the Mimbres Culture National Monument and the Mimbres Archeological Site Protection System. For example, Western New Mexico University and the National Park Service will work cooperatively to provide curatorial services for Mimbres cultural materials. The National Park Service will provide leadership in coordinating the efforts of the various landowners, such as Federal, State, and local agencies, foundations, private individuals, and others, involved in the Mimbres Archeological Site Protection System. An advisory committee representing these parties will work with the National Park Service to promote the protection of Mimbres cultural resources and to provide for interpretation and research.

My goal is to foster public understanding of this Nation's rich heritage and afford additional protection for Mimbres cultural resources. I urge my colleagues to join me in supporting this legislation to protect and preserve this important part of our past for the benefit of present and future generations.

Mr. President, I ask unanimous consent that the text of the bill be placed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2429

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Mimbres Culture National Monument Establishment Act of 1990".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) the Mimbres people were the most significant expression of the Mogollon culture, 1 of the 3 great prehistoric civilizations of the American Southwest;

(2) the Silver City, New Mexico area, including the Mimbres and Gila River valleys, contains numerous Mimbres sites;

(3) some of the Mimbres pueblos built during the classic phase of that culture in the 11th century are among the largest in the Southwestern United States;

(4) the Mimbres people developed sophisticated canal irrigation technology prior to the Anasazi culture;

(5) the Mimbres culture is epitomized by distinctive and strikingly painted black-on-white pottery that is recognized as the consummation of several formal, pictorial, and iconographic prehistoric traditions in the American Southwest;

(6) Mimbres pottery is internationally known and is probably the single most famous prehistoric American art style;

(7) many Mimbres sites have been vandalized or destroyed, and remaining sites are threatened by further vandalism and illegal pot-hunting;

(8) development of interpretive and visitor education programs will help protect Mimbres sites and enhance public understanding and appreciation of our Nation's cultural heritage;

(9) the National Park System has no unit established for the specific purpose of protecting, preserving, and interpreting the Mimbres culture; and

(10) in light of the national significance of the Mimbres sites and the urgent need to protect the valuable Mimbres cultural resource properties from vandalism and destruction, it is appropriate that a national monument be established in New Mexico.

(b) PURPOSE.—The purposes of this Act are—

(1) to recognize the nationally significant cultural resource properties associated with the prehistoric Mimbres culture in southwestern New Mexico;

(2) to provide for the protection and interpretation of Mimbres resources for the benefit and enjoyment of present and future generations;

(3) to facilitate research activities associated with Mimbres resources; and

(4) to encourage governmental and private sector protection actions.

SEC. 3. ESTABLISHMENT OF THE MIMBRES CULTURE NATIONAL MONUMENT.

(a) ESTABLISHED.—There is established in the State of New Mexico the Mimbres Culture National Monument (referred to as the "monument") as a unit of the National Park System, consisting of approximately _____ acres, including the Cameron Creek, Maddock, TJ Ruin, and Woodrow Units, as generally depicted on the map entitled "Mimbres Culture National Monument", numbered _____ and dated _____ 1990, which shall be on file and available for public inspection in the office of the Director of the National Park Service, Department of the Interior, and in appropriate offices of the National Park Service in the State of New Mexico.

(b) ACQUISITION OF LANDS.—Within the boundaries of the monument, the Secretary of the Interior (referred to as the "Secretary") may acquire lands and interests in lands by donation, purchase with donated or appropriated funds, or exchange.

(c) VISITOR CENTER.—The Secretary shall establish a visitor center and administrative headquarters for the monument in Silver City, New Mexico, and may acquire, through donation, purchase with donated or appropriated funds, or exchange, up to 10 acres of land in Silver City for that purpose.

(d) BOUNDARY ADJUSTMENTS.—The Secretary may from time to time make minor adjustments to the boundary by publication of a revised map or other boundary description in the Federal Register.

SEC. 4. ADMINISTRATION OF THE MONUMENT.

(a) IN GENERAL.—The Secretary shall administer, manage, and protect the monument in accordance with this Act and the law generally applicable to the administration of units of the National Park System, including the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1, 2-4), and the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461-7) and in such manner as to preserve, for the benefit and enjoyment of present and future generations, its cultural and natural resources, and to provide for interpretation of and research on those resources.

(b) COOPERATIVE AGREEMENT.—The Secretary may enter into a cooperative agreement with Western New Mexico University for the purposes of establishing a curatorial operation for the care and maintenance of Mimbres cultural materials. The curation operation shall be the responsibility of Western New Mexico University, with funding assistance from the Secretary under the cooperative agreement.

SEC. 5. GENERAL MANAGEMENT PLAN.

Not later than 3 years after the date funding is made available for the purposes of preparing a general management plan, the Secretary shall develop and transmit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives a general management plan for the monument consistent with the purposes of this Act, including—

(1) a statement of the number of visitors and types of public use within the monument that can be reasonably accommodated consistently with the protection of its resources;

(2) a general development plan for the monument and a description of facilities needed to accommodate public use, including estimates of cost thereof;

(3) an interpretive program for units of the monument and the Silver City visitor center, including a means of dissemination of information on the Masau Trail;

(4) a long-range strategy for completion of needed research, inventory, evaluation, nomination, and protection of cultural resource properties of the monument; and

(5) an outline of the coordination with Federal and State agencies and other entities and proposed cooperative agreements that will be undertaken to ensure that proper actions will be taken to accomplish the purposes of the monument, including the specific arrangements and cost thereof to be included in a cooperative agreement for curation with Western New Mexico University.

SEC. 6. MIMBRES CULTURE ARCHEOLOGICAL SITE PROTECTION SYSTEM.

(a) ESTABLISHMENT.—(1) To foster the protection, interpretation, research, and integration of information about the Mimbres Culture, there is established the Mimbres Archeological Site Protection System (referred to as the "system"), as generally depicted on a map numbered _____ and dated _____ 1990.

(2) The 18 archeological sites included in the system are—

(A) In the Mimbres Valley the following:

(i) Black Mountain.

(ii) Cottonwood.

(iii) Faywood.

(iv) Gatton Park.

(v) Janss.

(vi) Lake Roberts.

(vii) NAN Ranch.

(viii) Old Town.

(ix) Pony Hills.

(B) In the Silver City Area the following:

(i) Pine Flat.

(ii) Treasure Hill.
(C) In the Gila Valley the following:
(i) Fort West/Lee Village.
(ii) Kwilleylekia.
(iii) Red Rock Cemetery.
(iv) Red Rock Pithouse.
(v) Winn Canyon.
(vi) WS Ranch.
(D) In the Rio Grande Valley, the Rio Vista.

(b) DIRECTOR.—The Mimbres Archeological Site Protection System shall be under the general direction of the Secretary, acting through the Director of the National Park Service. The Secretary, along with other entities, shall administer the system in a manner that will protect and preserve the cultural resources and provide for interpretation and research.

(c) PLAN.—Not later than 3 years after the date funding is made available, the Secretary shall transmit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives a comprehensive plan for the management, protection, research, and interpretation of the system. The plan shall include detailed maps of each site and shall indicate the acreage to be protected.

(d) ADVISOR COMMITTEE.—The Secretary shall form an advisory committee, composed of Federal and State government agency representatives, and other interested parties to provide guidance in the preparation of the comprehensive plan and its implementation.

(e) COOPERATIVE AGREEMENTS.—(1) The Secretary of the Interior and the Secretary of Agriculture may enter into cooperative agreements with other Federal, State, and local agencies, foundations, private landowners, and others for the purposes of system management, protection, research, and interpretation.

(2) Federal funds may be expended on non-Federal sites through cooperative agreements described in program (1) for the purposes of the section.

(f) RESERVE.—The Secretary shall undertake research to locate additional Mimbres sites on Federal lands in New Mexico and submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representative, not later than 3 years after the date funding is made available for the purposes of this subsection, a report that provides recommendations for additions to or deletions from the list of archeological protection sites in subsection (a)(2).

SEC. 7. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as are necessary to carry out this Act.●

By Mr. BINGAMAN:

S. 2430. A bill to amend the Zuni-Cibola National Historical Park Establishment Act of 1988 to enlarge the time in which the Secretary of the Interior may accept a leasehold interest for inclusion in the park; to the Committee on Energy and Natural Resources.

EXTENSION OF TIME FOR ENLARGEMENT OF ZUNI-CIBOLA NATIONAL PARK

● Mr. BINGAMAN. Mr. President, I rise today to introduce legislation to amend the Zuni-Cibola National Historical Park Establishment Act of 1988. This amendment simply enlarges the time in which the Secretary of the Interior may accept a leasehold interest for inclusion in the park.

The act allows for certain portions of the Zuni reservation to be designated as the Zuni-Cibola National Historical Park. Establishment of the park is dependent on members of the Zuni Tribe offering, and the Secretary of the Interior accepting, a leasehold interest in the land. The act terminates if the Secretary does not accept a leasehold within 2 years of the establishment of the act. Unfortunately the time limitations for the tribe and the Secretary are quickly approaching with little hope of establishing the park.

Members of the Zuni Tribe have approached me and asked that I offer an amendment to extend the time limitations for both the tribe and the Secretary. They believe, just as I do, that the Zuni-Cibola National Historical Park has merit and that members of the Zuni Tribe should be allowed adequate time to consider all of the issues.

The national significance of the Zuni culture is well documented. In many studies conducted by the National Park Service, Zuni has been identified as a major focal point of the Anasazi culture, as crossroads of Southwestern events since 1539, and as one of the most important centers of ethnological studies in the United States.

Mr. President, the Zuni-Cibola National Historical Park is worthy of designation and could serve as a model for future designations on trust lands. However, this is a new idea and requires careful review by all involved. I believe that the time requirements were too restrictive in the act when you take into consideration all of the factors which the Zuni Tribe and Secretary must consider.

In order to allow the members of the Zuni Tribe adequate time to review and consider the establishment of Zuni-Cibola National Park, I urge my colleagues to support this legislation.

Mr. President, I ask unanimous consent that the text of this bill be placed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2430

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ENLARGEMENT OF TIME.

The Zuni-Cibola National Historical Park Establishment Act of 1988 (16 U.S.C. 410pp et seq.) is amended—

(1) in section 2(c)—

(A) by striking "24 months" and inserting "6 years"; and

(B) by striking "24-month" and inserting "6-year"; and

(2) in section 3(a) by striking "18 months" and inserting "5½ years".●

By Mr. LEAHY:

S. 2431. A bill to provide for the establishment of a Farmland Resource Conservation Program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FARMS FOR THE FUTURE ACT OF 1990

Mr. LEAHY. Mr. President, I am introducing a bill today that will address a growing problem in my State of Vermont and many other States concerned about the rapid loss of valuable farmland to development.

Many Vermont farmers cannot pass their farms on to their sons or daughters because they need to sell the farm for retirement income.

The children cannot afford to pay the development price for the farm because farming will not support the high mortgages needed to pay for expensive land.

Vermont now has an excellent program which provides the retiring farmer the income he needs, while providing the young beginning farmer the opportunity to begin without going deep into debt—if he guarantees that land will remain in farming.

I have developed legislation which will make available to States like Vermont $50 million in loan guarantees combined with an interest rate reduction for the repayment of these loans over 10 years so that they can establish permanent farm preservation revolving funds.

This legislation will preserve Vermont's rural future, and make possible a future in farming for young Vermonters and young people throughout the Nation. That is why I have named this act the Farms for the Future Act.

Mr. President, attached is a brief summary of how the program will work. I ask unanimous consent that it be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FARMS FOR THE FUTURE PROGRAM: HOW IT WORKS

Loan guarantees will be made through the Farmer's Home Administration.

These guarantees would help states because they would make it much easier to develop capital and build a self sustaining fund.

The interest will be paid for the first 5 years of the 10 year loans by FmHA.

For the second five years, the Secretary will pay the difference between the current limited resources rate used by Farmer's Home Administration (FmHA) and the interest charged by the lending institution.

Because the loans will be below the market rate, and there will be no interest for 5 years, states will be able to reinvest the funds and use the gain on the reinvested funds to create a self sustaining fund.

The Federal government would loan $2 for every one dollar available on the local level. The non-federal match could be state, local, or private funds, thereby providing a strong incentive for local support of programs.

Vermont is now spending about $2.5 million a year for farmland preservation.

Example: If Vermont invests $5 million/year the fund will yield, after 10 years, approximately $13.4 million/year, after 15 years when all bills are paid, it will yield $9.67 million.

Participation in the program by farmers will be entirely voluntary.

When the program is fully developed it will offer many options. It will permit beginning farmers to buy farmland by making land available at prices which can be supported by farm income. It will give middle aged farmers the opportunity to keep their land in farming, but plan for their retirement through annuities. It will permit retiring farmers to pass their land on to their children who wish to farm, and still provide the retirement income they need.

By Mr. BINGAMAN:

S. 2432. A bill to provide for payments in lieu of taxes to be made with respect to certain lands comanaged by the Bureau of Land Management and the Secretary of the Army; to the Committee on Energy and Natural Resources.

PAYMENTS IN LIEU OF TAXES FOR PUBLIC LANDS

● Mr. BINGAMAN. Mr. President, I rise today to introduce legislation to allow payments in lieu of taxes for public lands which are within the McGregor Range.

The McGregor Range, totaling 608,394 acres, was originally withdrawn for military purposes in 1957. Since this time, the Department of Army has agreed that 271,000 acres could be a co-use area for livestock grazing under the management of the Bureau of Land Management. As a result, the Bureau of Land Management has managed 14 grazing units and offers them for public grazing yearly under an oral bidding system.

The Military Land Withdrawal Act of 1986 continued the withdrawal of McGregor Range for military purposes for 15 years, until 2001. As part of the withdrawal, the Secretary of the Interior was given 3 years to develop a multiple-use management plan for the area. I am pleased to report that the plan, known as the White Sands resource management plan amendment for McGregor Range, has been completed. It represents one of the first multiple-use plans in the Nation to meet Army and Bureau of Land Management management needs. I congratulate both the Bureau of Land Management and the Army for their diligence, especially for completion of the effort in such a timely fashion.

Due to the multiple-use status of the McGregor Range and the management role of the Bureau of Land Management, it is appropriate to make the lands eligible for payments in lieu of taxes to local governments. Similar payments are authorized for other lands owned by the United States including lands administered by the Secretary of the Interior through the Bureau of Land Management. This legislation would allow the Secretary of the Interior to make payments for the public lands encompassed within the McGregor Range.

Although this bill will allow the Secretary to make payments in lieu of taxes for lands within the McGregor Range, there will be no immediate benefit to Otero County which currently receives the maximum allowable payments. However, it is important to recognize the unique cooperative management of the area and provide the potential for the lands to receive payments in lieu of taxes.

I urge my colleagues to support this legislation.

Mr. President, I ask unanimous consent that the text of this bill be placed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2432

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PAYMENTS IN LIEU OF TAXES WITH RESPECT TO THE McGREGOR RANGE.

The McGregor Range, described in section 1(d)(2) of the Military Lands Withdrawal Act of 1986 (100 Stat. 3458), which is comanaged by the Secretary of the Interior through the Bureau of Land Management under an agreement with the Secretary of the Army, shall be deemed to be land that the Secretary of the Interior administers through the Bureau of Land Management for the purposes of section 6901(1)(B) of title 31, United States Code.●

By Mr. WIRTH (for himself and Mr. GRAHAM):

S. 2433. A bill to establish a Financial Services Commission, and for others purposes; to the Committee on Banking, Housing, and Urban Affairs.

FINANCIAL SERVICES COMMISSION ACT

Mr. WIRTH. Mr. President, today, along with my good friend and colleague Senator GRAHAM, I am introducing the Financial Services Act of 1990. This legislation is similar to a proposal we introduced last Congress and seeks to implement a financial restructuring plan proposed by Mr. E. Gerald Corrigan, the president of the New York Federal Reserve Bank.

The 1980's were a time of rapid and significant change in the financial services industry. The development of new and innovative financial products and services, widespread use of new telecommunications and computer technologies, increasing internationalization of markets, and the blurring of distinctions between various sectors of the industry were all important features of the decade. The variety, volume, and speed of financial transactions have all increased dramatically in recent years.

We have also seen significant changes in the competitive position of the financial services industry, both at home and abroad. The rapid growth of foreign financial companies presents formidable challenges for U.S. corporations. For example, from 1981 to 1987, the number of foreign banking offices in the United States increased by 57 percent and foreign banks' share of U.S. banking assets moved up from 15 to 21 percent. We have witnessed similar trends in the securities industry and in overseas markets. Regulatory changes underway in Europe and Japan may soon provide further impetus to these developments.

Unfortunately, our financial regulatory structure has not kept pace with these changes. I am concerned that an outmoded regulatory framework may limit our ability to prevent, or adequately respond to, crises within the industry and has undermined the competitive position of our financial institutions. Mr. President, we need to modernize our financial laws to reflect the changes of recent years and to provide the flexibility to adapt to continued change in the future.

There are a number of issues that must be examined when we consider financial modernization legislation. Among the most important are:

The safety and soundness of our financial system, which is vital to assure public confidence and protect small investors;

Maintaining and enhancing our competitive position in both domestic and international markets;

Ensuring that our financial markets continue to be an efficient source of the capital that our businesses need to fuel long-term economic growth; and

Upgrading both the physical machinery and the human expertise necessary to help our markets effeciently move capital and information.

In recent years, Congress has considered but not passed financial restructuring legislation. Last Congress, for example, the Senate passed the Proxmire Financial Modernization Act during the 100th Congress. Unfortunately, the House of Representatives was unable to pass similar legislation. This stalemate was typical of the fate of attempts to enact comprehensive legislation in this area.

This inaction has led to piecemeal changes as regulators and the courts have stepped in to fill the void, in some cases making decisions of a nature that in the past had been left to Congress. For example, the Federal Reserve Board has permitted some banks to underwrite corporate debt and engage in insurance activities, and the Fed may soon permit some banks to underwrite equities.

We cannot afford to continue muddling through with piecemeal regulatory changes that struggle just to keep up with innovations in financial markets. The S&L crisis offers a vivid example of the potential costs. Although no specific cause can be cited for the

S&L crisis and a number of factors contributed to the industry's problems, the regulatory structure certainly didn't help. We all hope the S&L crisis will be an isolated event but I am concerned that a failure to take a comprehensive approach to financial modernization may eventually lead to problems in other sectors of the financial services industry.

In the past, much of the legislation we have considered has focused exclusively on expanding the powers and activities of financial institutions. But I believe determining which institutions can engage in which types of activities is only part of the equation. Other issues, such as the regulatory structure and deposit insurance reform, must also be considered in this debate. Focusing only on powers will keep regulators struggling to keep pace with events. What we need to do is adopt a structure to oversee our financial markets that can adapt to the markets as they evolve and change, and helps our financial system to create the capital needed for economic growth.

To address this concern, Senator GRAHAM and I are reintroducing the Financial Services Act because we believe the Corrigan plan offers such a structure. The legislation would establish a 15-member Financial Services Commission with nine voting members and 6 advisory members. The chairs of the national regulatory agencies, along with a chairman and vice chairman appointed by the President, would by voting members while the six advisory members would represent State regulators. The Commission would provide an umbrella supervisory structure over the financial industry. The Commission would determine the permissible activities, capital standards, and other regulatory requirements and safeguards for various types of financial institutions.

The Corrigan plan provides a framework for regulating banking and financial firms that engage in a variety of activities by providing for three types of diversified financial institutions. Such firms would, depending on their activities, be regulated as bank or thrift holding companies, financial holding companies, or commercial holding companies. Importantly, this approach would preserve the separation of banking and commerce. In addition, independent banks, thrifts, and other financial firms could continue to exist outside of this framework and engage in the activities permitted for similar institutions that are part of a holding company.

Bank or thrift holding companies could own and control banks or thrifts and engage in a broad range of financial services. Deposits in checking and savings accounts would be eligible for Federal deposit insurance. These holding companies, however, could not be controlled by a nonfinancial commercial concern. Nor could they engage in commercial activities.

Financial holding companies could not be owned by commercial firms. They could offer transaction accounts that are not eligible for Federal deposit insurance. These companies could become bank holding companies by acquiring a bank.

Commercial holding companies could engage in nonbank financial activities, along with commercial enterprises, but could not own or control a bank or thrift. They could, in some circumstances, offer certain types of uninsured transaction accounts through a financial affiliate. If a subsidiary or affiliate wished to offer an insured transaction account or engage in other banking activities they would have to sever ties with any commercial enterprise.

This approach would provide firms with the flexibility to choose their own place on the financial landscape and allow them to engage in a range of financial activities. In addition, by providing coordination between regulators, the Financial Services Commission could help resolve differences and disputes within the industry. For example, through the Commission, the SEC could have input input the regulatory treatment of securities issues or investments by banks. In this way, the Corrigan proposal would help regulators coordinate their policies in areas that cross traditional regulatory boundaries. In the future, we may need this flexibility as the market continues to create new products that further blur the distinctions between sectors of the financial services industry.

The ability of the Commission to apply consistent, equitable standards to different types of institutions that are involved in similar activities would help overcome an impediment that has often prevented the creation of a level playing field between competing sectors of the financial services industry. The increased flexibility of the framework would promote the international competitiveness of our financial firms and help both businesses and regulators to more quickly adjust to changes in the marketplace.

An important element of financial modernization is improving our electronic payments system. The increasing interdependencies between institutions and transactions, along with the provisional nature of many payments, makes financial institutions vulnerable to disruptions in the payment system. Like our regulatory structure, the present payments system has developed in an ad hoc manner. The system is made up of a variety of componenets that were not originally designed to work with each other and many of its key parts do not provide adequate reliability and backup capabilities.

To address these and other problems, the legislation would establish a National Electronic Payments Corporation to upgrade the payments system and facilitate large dollar financial transactions. This step would improve liquidity and confidence in the system. Access to the system would carry with it some degree of consolidated oversight as well as a requirement to maintain liquidity deposits. The Corporation would determine which entities would have access to the system. Again, improvements in the payments system will also help promote our international competitiveness in financial services.

Mr. President, the Senate Banking Committee will soon embark on a series of financial restructuring hearings. Senator GRAHAM and I are introducing the Financial Services Act because we believe the Corrigan proposal warrants careful attention and consideration as part of this debate. There are, however, several specific issues that the proposal does not address and we do not intend for this proposal to be our final word on this topic.

For example, the proposal does not discuss Federal deposit insurance reform, a question I believe must be a part of any comprehensive legislation. We may also wish to provide some mechanism to give Congress more input into the Financial Services Commission's determination of what activities will be permitted for various types of financial firms or holding companies, perhaps by requiring Congress to approve the Commission's initial recommendations before they can take effect. Of course, Congress, in any case, will retain ultimate authority in this area.

Mr. President, we do need comprehensive legislation to improve the efficiency and competitiveness of our financial markets, the safety and soundness of the financial system, and the flow of capital within the economy. I believe the Corrigan plan makes a significant contribution to discussion of these issues. I look forward to working with the chairman of the Banking Committee, Senator RIEGLE, the ranking member, Senator GARN, as well as my other colleagues on the committee and in the Senate as we again turn our attention to the important issues of modernizing our financial system.

Mr. GRAHAM. Mr. President, Senator WIRTH and I are re-introducing the Financial Service Commission Act which is almost identical to a bill we introduced November 20, 1987—S. 1891, the Financial Services Oversight Act.

We are re-introducing this legislation based upon many of the ideas set out in New York Federal Reserve Bank president, E. Gerald Corrigan's report entitled "Financial Market Structure: A Longer View."

This legislation looks at the entire edifice of banking and commercial money operations and provides a new framework for soundness and intelligent expansion.

This legislation designs a user friendly banking industry for the 21st century, the users of financial services all benefit from the increased competitiveness and security and availability of those services. The small depositor gets greater security. The government users—municipal bond financing for public projects—get a more competitive market. The corporate community can more readily access U.S. banks for its needs because those banks can be more active in the existing global financial market.

At present the traditional narrow lines of banking and commerce are blurring as the industry responds to change. Loopholes and court challenges and the variable nature of international and domestic economies have altered the landscape. While Congress has been involved in other issues, the world has not waited.

The past patchwork approach to change has not suited the competitive environment. Patches in a climate as volatile as the global financial markets are too risky. If we are to allow the industry to develop naturally without sacrificing security—then we must allow for more choices and we must provide for accountable regulation. The Congress must reassert its traditional primary role in establishing the structure of America's financial systems.

The Financial Services Commission Act will create a 15-member Financial Services Commission made up of both private and public sector. The commission will be made up of nine voting members from the national financial regulatory agencies and six advisory members representative of State regulators. The commission will act as an umbrella supervisory structure.

Among other things—under that structure banking and commerce would be kept separate but financial institutions could engage in a broader range of financial services. Commercial holding companies could not own or control a bank but they could engage in all nonbank activities. Financial holding companies could not be owned by a commercial firm. They could offer transaction accounts but would not be eligible for Federal insurance. However, if they chose to own and control an insured bank or thrift, they could shift their status to that of a bank holding company. The act would terminate the grandfather status of nonbank banks and amend sections 20 and 32 of the Glass-Steagall Act.

It would also set up a National Electronic Payments Corporation to coordinate and speed up existing technologies to facilitate large dollar transactions and to increase liquidity and safety in electronic payments.

We are confident the bill will encourage the kind of probing and exhaustive consideration of the future of our financial industries which an architectural approach demands.

Whether or not it survives as a piece of legislation the Financial Services Commission Act will start the discussion and debate and for the American consumer and the financial industry the debate should conclude with a realistic and contemporary, secure and prudently regulated system to provide America's financial services—now and well into the 21st century.

Mr. President, I ask unanimous consent that a summary of the bill be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE FINANCIAL SERVICES COMMISSION ACT

(Based upon "Financial Market Structure: A Longer View" by E. Gerald Corrigan, President, Federal Reserve Bank of New York)

A. PURPOSE OF THIS ACT

The purpose of this Act is to preserve and strengthen the regulatory and supervisory frameworks and the public safety net surrounding banking and finance;

To respond to functional—rather than institutional distinctions—by ensuring an appropriate degree of consolidated supervision of diversified financial services;

To protect depositors, policy holders and investors by ensuring the integrity of institutions and markets, by providing safeguards from excessive risk, and by ensuring the banking and financial system exercises its fiduciary responsibility with respect to maintaining the value of financial investments;

To assure fairness in accessiblity of capital and credit, ensure impartial credit decisions, promote balanced distributions of credit in the marketplace, preserve competitive equity and market efficiency,

And prevent conflicts of interest, concentration of financial resources and unfair competitive practices.

B. TITLE I—CREATION OF THE FINANCIAL SERVICES COMMISSION

Membership: The Commission shall be made up of 9 voting members who will appoint an advisory council made up of at least 6 advisory members. The nine voting members are made up of the national financial regulatory agencies. The advisory members represent the state regulators who will participate fully in all discussions of the Commission. No rule will take effect until the advisory members have had time to comment.

Duties: The duties of the Commission will be to promulgate regulations defining the types of activities in which bank holding companies, financial holding companies, and commercial holding companies may engage and to assure that transactions between financial services subsidiaries of all holding companies are conducted in an appropriate manner to reflect the purposes of this Act; to take appropriate action to enforce compliance with such regulations either directly or through referrals to primary regulatory agencies; to establish minimum standards of capital adequacy for financial holding companies and their affiliates; to coordinate its activities with the rulemaking and enforcement activities of other Federal and State agencies; and to consult with the advisory members.

Permissible Activities: Describes the powers of bank holding companies, financial holding companies and commercial holding companies and preserves the separation of banking from commerce.

Bank holding companies could own and control one or more banks or thrifts and could engage in a broad range of financial services but could not be owned or controlled by a nonfinancial-commercial concern nor be engaged in "nonfinancial" activities.

Financial holding companies could not be owned by a commercial firm; they could offer noninsured transaction accounts; at their option, they could obtain access to the payments system and in that process gain limited access to the discount window; and in such circumstances, be subject to interest earning liquidity reserves. A financial holding company could also choose, at its option, to own and control insured banks and thrifts thereby voluntarily shifting its status to a bank or thrift holding company.

Commercial holding companies may engage in any commercial enterprise they choose and may also engage in nonbank financial activities. Commercial holding companies may not own or control a bank or thrift, and are barred from any direct access to the payments system and may not receive liquidity assistance from the central bank.

Enforcement and Regulatory Jurisdiction: Pending or actual violations will be referred to the current primary regulator in most cases. The Commission would coordinate the regulation of the Financial and Commercial Holding Companies. If violations are found by the primary regulatory, he can require divestiture with respect to the conduct of any activity which violates the Commission's rules or regulations, impose additional capital requirements, or issue an order to cease and desist.

Powers of the Commission: Enables the Commission to do what is necessary and commensurate to carry out the powers of this Act.

C. TITLE II AMENDMENTS TO BANKING AND SECURITIES LAWS

Amends the bank holding company act and the securities laws to effect the purposes of this Act by:

Terminates the grandfather status of nonbank banks;

Amends the Bank Holding Company Act to allow banks to engage in regulations allowed by the Commission;

Amends the National Housing Act to eliminate the unitary thrift holding company status;

Amends the Federal Reserve Act to permit the expansion of the imposition of reserves on transaction accounts, provides for the maintenance of liquidity reserve balance for shareholders in the National Electronic Payments Corp. on which the Fed will pay interest and repeals the payment of interest on demand deposits;

Amends the International Banking Act to say that foreign banks who are major users of the National Electronic Payments Corp. may be required to set up subsidiaries after a hearing by the Corporation; and

Amends Sections 20 and 32 of the Glass-Steagall Act.

D. TITLE III—NATIONAL ELECTRONIC PAYMENTS CORPORATION

Purpose: The purpose of this title is to provide capital needed to modernize the large dollar electronic payments system; to speed its operation; to increase liquidity associated with its operation; to provide a vehicle through which public and private institutions can work together in securing a safer and more efficient payments mechanism; and to establish a vehicle which can materially reduce the susceptibility of the payments system to shocks whether they are operational, liquidity, or credit in nature.

Duties: The National Electronic Payments Corporation shall consist of 7 members, 4 members selected by the Board of Directors of the Corporation and 3 members selected by the private shareholders of the Corporation.

The Corporation shall establish, operate, and maintain a national electronic payments system to facilitate large dollar transactions, funds transfers, and transfers of book entry U.S. Government securities, drawn on accounts at Federal Reserve banks;

Promulgate and enforce policies governing standards for utilization of the national electronic payments system including requirements for the maintenance of liquidity balances in Federal Reserve banks, including a stock subscription requirement;

Provide for the improvement to telecommunications facilities including backup and bypass facilities;

Prescribe procedures relating to the operation of the system, including those that deal with intraday overdrafts.

Establish mechanisms to monitor and control the financial and operational security of the payments system.

Access to the System: The Corporation will invite participation of those organizations which deal in large volumes of funds and government securities. The Corporation may limit access to the payment system to only those organizations which are shareholders and which have established adequate reserve balances in Federal Reserve banks.

Reports to Congress: The Corporation shall send an annual report to Congress on its activities during the preceding fiscal year.

By Mr. DOLE (for Mr. D'AMATO) (for himself, Mr. DECONCINI, Mr. WILSON, Mr. MCCONNELL, and Mr. COATS).

S. 2434. A bill to permit the implementation of the Department of Transportation antidrug program rule for recipients of Federal mass transit assistance; to the Committee on Commerce, Science, and Transportation.

PERMITTING DRUG TESTING FOR TRANSIT WORKERS

Mr. D'AMATO. Mr. President, I rise today, along with my distinguished colleagues Senators DECONCINI, WILSON, and MCCONNELL, to introduce a bill to permit the U.S. Urban Mass Transportation Administration [UMTA] to reissue its drug testing rule for transit workers in safety sensitive positions. I believe that such testing is necessary to ensure the safety of transit riders and workers.

UMTA had issued a drug testing rule on December 21, 1989, but it was struck down by the U.S. Court of Appeals for the District of Columbia on January 19, 1990. The court held that UMTA lacked the statutory authority to issue this rule. It said that UMTA's enabling statute did not give it the legal authority to issue "uniform national criteria" to be imposed on local transit authorities.

UMTA needs the power to reissue this important rule. Working with Secretary Skinner, I have drafted a bill to accomplish that goal. Without changing the UMTA statute, which I intend to propose amending during the UMTA program's reauthorizaton next year in the Senate Banking Committee, my bill simply gives UMTA the power to reissue its rule despite the problem with its statute. It is vital that UMTA have this authority. during just the brief month that UMTA's rule was in effect, 3 to 5 percent of the drug tests taken were positive—and these were mainly preemployment, not random tests.

This rule would cover about 195,000 transit workers in safety sensitive jobs and their firstline supervisors. The rule includes five kinds of tests: preemployment, reasonable cause, postaccident, return-to-work, and random. It would test for five drugs: PCP, marijuana, opiates, cocaine, and amphetamine.

Transit authorities would be required to implement programs to meet four requirements:

First, a policy statement on drug use in the workplace;

Second, employee/supervisor education and training program;

Third, Drug Testing Program for employees and applicants in safety sensitive positions and

Fourth, administrative duties such as, recordkeeping, reporting, confidentiality, and certification of compliance.

I believe that the rule safeguards employees' rights. Transit grantees would be required to use U.S. Department of Health and Human Services certified labs. Employees would be permitted to submit blind samples to assure accuracy, and qualified medical officers would review test results. Positive results would be retested using different techniques. Employees would be notified first of positive results and then given the opportunity to explain them. Persons testing positive would not automatically be fired, but would be removed from saftey sensitive jobs until they no longer tested positive. Rehabilitation is not required by the rule, but can be included in grantees' programs under local labor-management agreements.

At this time, the UMTA rule does not cover testing for alcohol use. However, it does not preclude grantees from enacting alcohol testing rules on their own. DOT has issued an advance notice of proposed rulemaking on alcohol testing, and is awaiting public comments.

Accurate figures are not available on how many mass transportation accidents may have been caused by persons who use illegal drugs. However, we can look at a few recent examples:

First, in Philadelphia, transit operators tested positive for drug or alcohol use in six major accidents in 1986–90 involving at least 183 injuries and 3 deaths. The most recent accident occurred on March 7;

Second, in Cleveland on January 17, a supervisor and a driver/trainee smashed a transit vehicle into construction equipment—they tested positive for illegal drug use;

Third, in 1985, two Miami transit trains collided injuring 16 people and causing $1.6 million in property damage—one operator tested positive for marijuana, cocaine, and valium;

Fourth, a 1988, a Metro-North commuter train, crashed into a stationary train in the Bronx killing the engineer and injuring two workers—the engineer, who was killed, tested positive for marijuana use and four other employees involved in the accident tested positive for morphine, marijuana, and butalbital; and

Fifth, on February 17, 1987, an empty Metro-North train crashed into a crowded train injuring 30 people—the engineer tested positive for marijuana.

The Federal Railroad Administration has its own drug testing rules. In 1988, after the January 1987 Amtrak-Conrail crash killed 16 people, it found that train accidents involving drug/alcohol use had been occurring at the rate of 1 every 10 days. Over a 16-month period from 1987 to May 1988, those accidents resulted in 30 deaths and 335 injuries. It is possible that the drug problem in mass transit bears some relationship with the problem experienced by the railroad industry.

Mr. President, the Federal Government has drug testing rules in final stages for aviation, highways, maritime, railroads, Coast Guard and pipeline workers. UMTA's rule is the only one struck down by the courts. Although some local transit authorities have issued their own drug testing rules—such as the MTA and SEPTA in Philadelphia—not all have, and this legislation is needed to protect public safety.

Mr. President, I urge my colleagues to suppport this bill and to press for its early passage.

Thank you, Mr. President.

By Mr. GRAHAM:

S. 2435. A bill to establish within the U.S. Information Agency the Andrei Sakharov Educational Exchange Program; to the Committee on Foreign Relations.

ANDREI SAKHAROV EDUCATIONAL EXCHANGE ACT

Mr. GRAHAM. Mr. President, I am introducing legislation today that would establish a graduate education exchange program with the Soviet Union in the areas of environment and health sciences.

I am proposing to name this program in honor of Dr. Andrei Sakharov, that great humanitarian who passed away last year.

Sakharov knew that both countries face serious environment and health problems. He also knew that scientific cooperation rather than competition was the surest route to finding solutions to these problems.

Under this program, cooperation would come in the form of a student exchange on the graduate level. As part of this effort, we intend to establish linkages between universities in both countries. We will work to identify study priorities and target efforts to take advantage of the research strengths of each country.

The program would fall under the supervision of the Bureau of Educational and Cultural Affairs at the U.S. Information Agency.

Both the Soviet Union and the United States have much to learn and much to offer each other in environment and health studies. The Soviets, for example, are particularly strong in several key health areas.

They have made impressive strides in the areas of orthopedics, cancer research, ophthalmology, laser surgery, and other surgical methods.

They also are conducting cutting-edge research in the areas of hypotherapy, biofeedback, artificial organs, and the retardation of bone decalcification.

We in turn can offer the Soviets high-quality graduate work in virtually all areas of health and environmental studies.

In fact, we have a long history of scientific cooperation with the Soviet Union. Former Member of Congress James Symington has written that our scientific dialog with Russia preceded not only our diplomatic dialog, but our nationhood.

It began in the 1760's, when Benjamin Franklin joined his friend Ezra Stiles in corresponding with members of the St. Petersburg Academy of Sciences about their works on magnetism, electricity, and freezing of mercury.

It continued when Robert Fulton helped the Russians design and construct the first Russian steamboat and continued more recently in the past decade when American and Soviet medical scientists jointly studied rheumatoid arthritis in children.

This is the kind of cooperation Sakharov envisioned building on. Despite all the sorrow and upheaval he saw during his long life, Andrei Sakharov possessed an optimism that comes with wisdom—wisdom gained through a life of generosity, sensitivity, learning, and activism.

He was convinced that despite man's many weaknesses man could rise above them and by so doing improve himself and the world in which he lives.

That is the kind of optimism and vision that moves people. I know because it certainly inspired me when I met Dr. Sakharov during a visit to the Soviet Union in 1988.

Indeed, this exchange program is really his idea. After having visited, with other Members of the Senate, a Soviet research academy, at that evening's dinner held at the Ambassador's residence in Moscow, I asked Dr. Sakharov what he felt would be appropriate areas in which the United States and the Soviet Union could cooperate for our mutual benefit.

Dr. Sakharov was convinced that the human condition can be—and should be—enhanced through cooperation and learning.

It is upon this vision that I hope we can build a program that will lighten the burden for both countries.

I ask unanimous consent to print the bill in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2435

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Andrei Sakharov Educational Exchange Act of 1990".

SEC. 2. AMENDMENT OF THE MUTUAL EDUCATIONAL AND CULTURAL EXCHANGE ACT OF 1961.

Section 112(a) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2460(a)) is amended so that a section (10) is added to section 112(a), which will read as follows:

§ 2460. Bureau of Educational and Cultural Affairs

(a) ESTABLISHMENT; RESPONSIBILITIES.—In order to carry out the purposes of this chapter, there is established in the United States Information Agency, or in such appropriate agency of the United States as the President shall determine, a Bureau of Educational and Cultural Affairs (hereinafter in this section referred to as the "Bureau"). The Bureau shall be responsible for managing, coordinating, and overseeing programs, established pursuant to this chapter, including but not limited to—

(1) the J. William Fulbright Educational Exchange Program which, by promoting the exchange of scholars, researchers, students, trainees, teachers, instructors, and professors, between the United States and foreign countries, accomplishes the purposes of section 2452(a)(1) of this title;

(2) the Hubert H. Humphrey Fellowship Program which finances (A) study at American universities and institutions of higher learning, including study in degree granting programs, and (B) participation in fellowships, internships, or other programs in American governmental and nongovernmental institutions for public managers and other individuals from developing countries;

(3) the International Visitors Program which provides grants for short-term visits to the United States for foreign nationals who are, or have the potential to be, leaders in their respective fields in their own countries;

(4) the American Cultural Centers and Libraries which make available at selected foreign locations, books, films, sound recordings, and other materials about the United States, its people and culture, and about other topics;

(5) the American Overseas Schools Program which provides financial assistance to the operations of American-sponsored schools overseas;

(6) the American Studies Program which fosters and supports the study of the United States, and its people and culture, in foreign countries;

(7) a program of working with private, not-for-profit groups through contracts, grants, or cooperative agreements, as authorized by section 2452 of this title, so as to provide financial assistance to nongovernmental organizations engaged in implementing and enhancing exchange-of-persons programs;

(8) the Samantha Smith Memorial Exchange Program which advances understanding between the United States and the Soviet Union and between the United States and Eastern European countries through the exchange of persons under the age of 21 years and of students at an institution of higher education (as defined in section 1201(a) of the Higher Education Act of 1965 (20 U.S.C. 1141(a) [section 1141(a) of Title 20, Education])) who have not received their initial baccalaureate degree;

(9) the Arts America program which promotes a greater appreciation and understanding of American art abroad by supporting exhibitions and tours by American artists, in other countries; and

"(10) the Andrei Sakharov Educational Exchange Program to further cooperation between the United States and the Soviet Union in the fields of environmental protection and the health sciences through the exchange of graduate students.".

By Mr. CRANSTON (for himself, Mr. PELL, Mr. BOREN, Mr. DECONCINI, and Mr. ROCKEFELLER):

S. 2436. A bill to amend the Peace Corps Act to extend the authorizations of appropriations for the Peace Corps through fiscal year 1992, to provide for limited exceptions to the limitation on reemployment by the Peace Corps, and to establish a Peace Corps foreign exchange fluctuations account, and for other purposes; to the Committee on Foreign Relations.

PEACE CORPS ACT AMENDMENTS OF 1990

Mr. CRANSTON. Mr. President, today I am introducing S. 2436, legislation to extend the authorization of appropriations for the Peace Corps through fiscal years 1991 and 1992—at levels that would enable the Peace Corps to continue making progress toward achieving the congressionally established goal of a Peace Corps volunteer strength of 10,000, as enacted in section 1102 of the International Security and Development Cooperation Act of 1985, Public Law 99-83.

The bill would also provide for a limited number of exemptions from current restrictions on reemployment of Peace Corps employees and establish a foreign currency fluctuations account from which the Peace Corps could draw when the costs of its operations increase as a result of a decline in the value of the U.S. dollar.

Joining me in introducing this measure are the chairman of the Foreign Relations Committee, Senator PELL, and Senators BOREN, ROCKEFELLER, and DECONCINI, all strong Peace Corps supporters.

For more than 28 years, Peace Corps volunteers have promoted international peace and friendship by helping persons in many nations overcome the often harsh circumstances of their lives. Since the Peace Corps' establishment in 1961, over 130,000 American men and women have served as volunteers in 100 nations around the world. Of this total, I am terribly proud that 17,191 enthusiastic and dedicated individuals have volunteered from California.

The unique work of Peace Corps volunteers has been in demand more than ever this year due to recent events in Eastern Europe—an area of the world to which the Peace Corps has not previously been invited. Following the dramatic changes in Hungary, Poland, Czechoslovakia, Romania, and East Germany, the Peace Corps has received requests for volunteers from these countries. These assignments would highlight the special value of Peace Corps volunteers as not only teachers but as cultural and personal links between very different worlds. Their upcoming entry into Eastern Europe is amost exciting development.

AUTHORIZATION OF APPROPRIATIONS

Mr. President, section 2 of our bill would amend section 3 of the Peace Corps Act to authorize Peace Corps appropriations of $197,800,000 for fiscal year 1991 and $210,900,000 for fiscal year 1992. As I mentioned earlier, these funding levels are essential if the Peace Corps is to continue progress toward achieving the congressionally established goal of a 10,000-volunteer strength. As the Senate author of this goal, I believe very strongly that Congress should provide the funding necessary to enable the Peace Corps to make steady progress toward realizing this goal.

Following the establishment of the 10,000-volunteer goal, I and the leadership and several members of the Senate Foreign Relations Committee and of the House Foreign Affairs Committee, requested that Loret Ruppe, then-Director of the Peace Corps, develop a phased, realistic, and programmatically appropriate plan to meet that goal. Director Ruppe's original plan, submitted to Congress on March 5, 1986, provided a blueprint for moderate Peace Corps growth through the end of this decade and into the beginning of the 1990's. Since then, I and my colleagues on the Senate Foreign Relations and Appropriations Committees—as well as the full Senate—have generally followed the funding levels called for in that plan in legislation authorizing and providing Peace Corps appropriations.

However, Mr. President, in fiscal years 1989 and 1990, the amounts contained in the final Peace Corps appropriations have, when combined with the effects of sequestration, made the actual funding available for the Peace Corps $3.5 million and $7.2 million, respectively, short of the funding called for in the Director's original 10,000-volunteer plan. In addition, the effects of inflation in the United States and deflation of the dollar in foreign markets is an additional cause of a shortfall in funding for the Peace Corps from the target program levels set. Thus, the actual funding has not sustained a rate of growth that the authors of the congressionally mandated goal had hoped for.

For this reason, we have adopted in this year's legislation the funding levels contained in a revised plan which we requested and which Director Ruppe submitted on April 17, 1987. This revised plan, which I mentioned last year when introducing similar legislation, presents a more accurate estimate of the appropriations Peace Corps truly needs in view of experience under levels in the original plan. The shortfalls I have outlined make it necessary to switch over to the levels contained in the revised plan in order to make meaningful progress and to avoid turning away enthusiastic volunteers and deserving host countries.

Mr. President, I ask unanimous consent that the April 17, 1987, letter from Director Ruppe setting forth the revised plan and our letter of March 11, 1987, requesting the revision be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PEACE CORPS,
Washington, DC, April 17, 1987.

Hon. ALAN CRANSTON,
Chairman, Subcommittee on East Asian and Pacific Affairs, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I am writing in response to your earlier letter requesting an update to the plan submitted last year for attaining a volunteer strength of 10,000. We continue to feel very strongly that such an increase would be very much in the best interests of overall U.S. Foreign policy. We also recognize, of course, that any such plan must conform to national economic planning objectives.

As you know, the original plan reflected assumptions about funding levels for FY 1987 which did not occur. The impact of lower funding levels this year would normally be seen in lower volunteer levels in FY 1988 and FY 1989. We feel that these reductions can be minimized by a more rapid increase in our trainee levels in these two years, but some impact on total volunteer levels will be inevitable.

We estimate that the annualized impact of the Federal Employees' Retirement System (FERS) and the 1987 and 1988 pay raises to be between $2.5 million and $3.4 million. We estimate that FAAS costs will rise by between $.3 million and $2.3 million between now and 1992, while FECA costs will rise by between $1 million and $3 million. Other uncontrollables (rents, mail, severance pay, and communications) are projected to increase by between $1 million and $4 million. Estimates of the impact of currency revaluations and in-country inflation are, as you know, dependent on both the international trade situation and the economic situation in each country in which we serve, and are therefore very difficult to predict. If we assume roughly the status quo, we would project a need for roughly $2 million each year to preclude a reduction in real dollars available for our programs.

The net effect of these projections, partially offset in FY 1987 and FY 1988 by lower volunteer levels, would be to revise the budget requirements identified in our original plan, as follows:

[In millions of dollars]

	Original plan	Revision
Fiscal year:		
1988	146.2	149.4
1989	157.0	164.7
1990	172.8	182.4
1991	185.3	197.8
1992	196.2	210.9

We are continually seeking ways to reduce our operating costs, so some reductions to these estimates may be possible. As with any projections so far into the future, our revised plan reflects our best estimates of future costs, assuming that authorizations and appropriations will occur in a timely enough fashion to permit effective planning for orderly growth.

We would be happy to answer any questions you may have about these revisions. We greatly appreciate your continued interest in Peace Corps' programs. We completely agree that the long range value to the United States of our continued people-to-people support to the developing world can not be overestimated.

Sincerely,

LORET MILLER RUPPE,
Director

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, DC, March 11, 1987.

Hon. LORET MILLER RUPPE,
Director, Peace Corps, 806 Connecticut Avenue NW., Washington, DC.

DEAR LORET: We are writing in connection with the plan you developed last year to achieve the Congressionally-mandated goal of a Peace Corps volunteer strength of 10,000 individuals.

As you are well aware, following enactment of legislation contained in section 1102 of Public Law 99-83, establishing the 10,000 volunteer strength goal, we, along with a number of members of the authorizing and appropriating committees of both the House and Senate, requested that you prepare a detailed plan on how to achieve that growth in a phased and orderly manner within present stringent budgetary limitations. Your plan, submitted on March 5,

1986, was extraordinarily helpful in providing guidance to our efforts in the 99th Congress to secure the legislative changes to start on the path toward achieving this growth in volunteer strength.

As we renew those efforts in the new Congress, we would appreciate your providing us with an update of the plan, taking into account FY 1987 staff salary increases, those estimated for FY 1988, increase in Peace Corps' fixed costs, FERS costs, and fluctuations in international currency exchange rates.

We look forward to working with you on this and other matters aimed at strengthening and improving the Peace Corps.

With every good wish.

Ever sincerely,

CHRISTOPHER J. DODD,
Chairman, Subcommittee on Western Hemisphere Affairs.
CLAIBORNE PELL,
Chairman.
ALAN CRANSTON,
Chairman, Subcommittee on East Asian and Pacific Affairs.

Mr. CRANSTON. Mr. President, one final note on the authorization levels in this legislation. Each year my colleagues and I have introduced legislation to provide authorizations for the coming 2 fiscal years. I believe the time has come to change from annual appropriations and to provide Peace Corps appropriations on the basis of a 2-year cycle. The annual struggle for funding for the 1 upcoming fiscal year substantially impedes Peace Corps operations and planning. When the Peace Corps makes plans to enter a new country or accept a new group of volunteers, the agency is making a commitment of at least 2 years to both the country and the volunteers. Requiring a wait-and-see approach to funding each year causes underutilization of resources and a failure to achieve steady and well-planned growth. In order to avoid these problems, I urge my colleagues on the Appropriations Committees as well as the President to provide at least a 2-year appropriation cycle for the Peace Corps; by providing for a 2-year appropriation this year, a cycle could be established whereby the Peace Corps would be forward funded hereafter.

I believe that the Peace Corps has just as vital a mission today as it did in 1961. We must continue to give our support to the Peace Corps' mission and volunteers who embody the highest ideals and spirit of our country in promoting world peace and understanding.

FOREIGN CURRENCY FLUCTUATIONS ACCOUNT

Mr. President, as I mentioned earlier in my statement, one significant factor in the slowed growth toward the 10,000 volunteer goal has been the decreased value of Peace Corps funding due to foreign currency fluctuations.

In a February 27, 1989, letter to me, then-Peace Corps Director Ruppe stated that, due to the falling dollar, $1.8 million was lost in fiscal year 1988. The Peace Corps has recently advised that, in 1989, $1.5 million was lost to foreign currency fluctuations and an estimated $2 million will be lost in fiscal year 1990. In order to avoid such losses in the future, section 4 of our bill would establish a foreign currency fluctuations account for the Peace Corps—patterned after similar accounts established for the Departments of Defense and State in 10 U.S.C. 2779 and 22 U.S.C. 2696, respectively, and for the American Battle Monuments Commission in 36 U.S.C. 138c—and would authorize appropriations of amounts sufficient to maintain a balance of $5 million in the account. Such a foreign currency fluctuations account would help to ensure that, by stabilizing Peace Corps fiscal support, the congressionally intended levels of program operations are achieved. The account would provide a mechanism for redistributing savings realized in certain years when the value of the dollar has risen to offset losses in other years in which the dollar has dropped.

This provision is identical to section 1103 of S. 1347 as reported by the Foreign Relations Committee on July 18, 1989 (S. Rept. 101-80).

Mr. President, I ask unanimous consent that a copy of Director Ruppe's February 27, 1989 letter, which expresses support for this approach, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

PEACE CORPS,
OFFICE OF THE DIRECTOR,
Washington, DC, February 27, 1989.

Hon. ALAN CRANSTON,
U.S. Senate, Washington, DC.

DEAR SENATOR CRANSTON: As you requested, enclosed is information relative to the establishment of a currency fluctuation account for the Peace Corps. Should such an account be established, Peace Corps would benefit in three ways:

It will help alleviate program erosion. Currently, funds that could be used for program growth are reduced because we must pay exchange rate losses out of our annual appropriation. For example, in FY'87 we estimated a loss of $3.2 million, FY'88 $1.8 million, FY'89 $3.0 million, and in FY'90 $3.4 million. The most vulnerable are our West African countries whose economies are based on the Franc. In the first quarter of FY'87, the dollar's devaluation in West Africa caused an $800,000 shortfall.

A fluctuation account will provide an efficient mechanism to centrally redistribute funds as needed. Should the legislation require that the fund be replenished, savings in Peace Corps countries where the dollar is strong could be used to offset losses in countries where the dollar is weak.

By having a multi-year account, the Peace Corps could potentially stabilize fluctuation by being able to plan and budget across fiscal years. If for example, exchanges are favorable in FY'89, the Peace Corps could use these savings in FY'90.

Attached is a summary data sheet for the Philippines which illustrates which expenses are most vulnerable to foreign currency fluctuation. Also attached is a report on uncontrollable expenses for FY'89 and FY'90.

In reference to your inquiry regarding the in-and-out rule, the major justification for its adjustment to a maximum of 2½ years out before rehire, is that it would afford more excellent employees the opportunity to return to the agency with expanded knowledge and skills. As it currently stands, American Peace Corps employees above the GS 8 grade level, must leave the agency for as long as they were employees, thus making it almost impossible for some of our brightest and best to return.

Please let me know if you need more detailed information on the impact of currency fluctuations on our budget or further details relative to a shortened in-and-out rule.

With best wishes,

Sincerely,

LORET MILLER RUPPE,
Director.

Enclosures.

[From the Peace Corps, Nov. 2, 1988]

SUMMARY DATA SHEET

Additional detail on inflation and exchange rate projections.

The overseas inflation and exchange rate calculation is based upon: individual country budget submissions, and forecasts issued by the Department of State. The individual country budget submissions identify the portions of the budget which are subject to local currency fluctuations and inflation.

The estimate included in Peace Corps current services budget submission reflects a worldwide average of 6.7 percent of affected program dollars, such as, FN salaries and benefits, rents, communications and utilities, volunteer support costs and all other items procured on the local market. The exposure rates vary slightly from post to post depending on the local availability of goods and services. A sample country budget request is attached.

PEACE CORPS EMPLOYEES

Mr. CRANSTON. Mr. President, under legislation enacted in 1965—in section 7(a) of the Peace Corps Act, 22 U.S.C. 2506(a)—Peace Corps employees are generally precluded from serving for more than a period of 5 consecutive years, normally consisting of two consecutive, 30-month appointments, with the exception that the Director of the Peace Corps may personally grant 1-year extensions in individual cases where the Director finds that special circumstances warrant the extension.

Additionally, under 1985 amendments to section 7(a) which I authored, service for a third 30-month tour is currently authorized for exceptional employees—not to exceed 15 percent of the Peace Corps' U.S. citizen employees—in certain specified circumstances in which the individual's extended service would be particularly valuable to the Peace Corps. Such appointments were given to 11, 28, 24, and 12 employees in fiscal years 1986, 1987, 1988, and 1989, respectively—far short of the 15-percent ceiling.

An essential corollary to these limits is a rule—known as the in-out rule—which prescribes how long an employee must remain outside Peace Corps employment before being reemployed. Under current law, the rule is that the former employee is ineligible for reemployment for a period of time equal to the length of his or her previous period of employment.

These limits on length of employment and in-out rule are intended to prevent Peace Corps employment from becoming a career unto itself and to ensure that turnover in employment provides a substantial number of openings for former volunteers to return to Peace Corps employment with new ideas and field experience. However, for those employees who have served for long periods—which now may extend to 6 years, 7½ years, and even 8½ years—the in-out rule can be unduly restrictive. From discussions with Peace Corps officials and others, I believe that a modification of this rule would be beneficial in affording a limited number of highly effective former employees whom the agency would like to rehire the opportunity to return to the Peace Corps while still maintaining the essential purpose and principal of the "in-out" rule.

Thus, section 3 of the bill would modify the rule to allow the Director of the Peace Corps to rehire a limited number of employees—no more than 5 percent of Peace Corps' U.S. employees—after a minimum of 30 consecutive months away from Peace Corps employment. The 5-percent limitation on this authority was requested by current Peace Corps Corps Director Paul Coverdell, who was confirmed last year, after a similar provision with no limitation was introduced in S. 487 and incorporated into S. 1347 as reported by the Foreign Relations Committee. I was willing to add this limitation in exchange for the Director's agreement to the basic intent of the provision to allow qualified individuals to return to Peace Corps employment more easily while preserving at the same time the spirit of the 5-year rule.

PEACE CORPS NAME

One final feature of the bill designed to ensure that the special value and magic symbolism of the name "Peace Corps" is maintained. Section 2 of the bill prohibits the use of any funds authorized by this legislation to be used to refer within the United States to the Peace Corps by any name other than "the Peace Corps." I know of no more generally positive set of words in our lexicon than "the Peace Corps." At home and abroad, these words generally stand for person-to-person communication, assistance, and understanding. They need no embellishment, clarification, or modification. Recent efforts to associate the program and its mission more closely with the U.S. Government or U.S. foreign policy or just the United States are not only superfluous but counter to the best interests of the program and its historic traditions.

CONCLUSION

Mr. President, of all the international efforts we can make to achieve world peace and understanding, there is no greater contribution than that which the American people make through the Peace Corps. Our investment in the Peace Corps is small compared to the benefits here at home as well as abroad. We must ensure that the Peace Corps stays on the path we have forged thus far toward the 10,000-volunteer goal while we continue to search out ways to improve Peace Corps operations and administration.

I urge my colleagues to support this measure.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection the bill was ordered to be printed in the RECORD, as follows:

S. 2436

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Peace Corps Act Amendments of 1990".

SEC. 2. APPROPRIATONS FOR THE PEACE CORPS.

Section 3(b) of the Peace Corps Act (22 U.S.C. 2502(b)) is amended by striking out the first sentence and inserting in lieu thereof the following: "There are authorized to be appointed to carry out the purposes of this Act $197,800,000 for fiscal year 1991 and $210,900,000 for fiscal year 1992. No funds appropriated to carry out such purposes may be used to refer within the United States to the Peace Corps by a name other then the official name of the agency provided by this Act.".

SEC. 3. PERIOD OF INELIGIBILITY FOR PEACE CORPS REEMPLOYMENT.

(a) AUTHORITY FOR EXCEPTION.—Section 7(a) of the Peace Corps Act (22 U.S.C. 2506(a)) is amended—

(1) by inserting before the period at the end ", except as provided in paragraph (7)"; and

(2) by inserting after paragraph (6) the following new paragraph:

"(7) Notwithstanding the limitation set forth in paragraph (2)(B) on the reappointment or reassignment of former employees, the Director of the Peace Corps may appoint or assign an individual under para-

graph (2) before the expiration of a period of time equal to the preceding tour of duty of that individual if that individual's most recent appointment or assignment terminated more than 30 months earlier and the Director finds the individual to be of exceptional value to the Peace Corps. At no time may the number of appointments or assignments in effect under this paragraph exceed five percent of the total of all appointments and assignments of United States citizens then in effect under paragraph (2).".

(b) REPORTS.—Not later than January 1, 1991, the Director of the Peace Corps shall submit to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives a report describing the criteria to be applied by the Director in exercising the authority provided by the amendment made by subsection (a). Not later than each January 1 thereafter, the Director shall submit to such Committees, as part of the annual report required by section 1103(b) of Public Law 99-83, a report on the exercise of such authority during the preceding fiscal year.

SEC. 4. PEACE CORPS FOREIGN CURRENCY FLUCTUATIONS.

(a) ESTABLISHMENT OF FOREIGN CURRENCY FLUCTUATIONS ACCOUNT.—The Peace Corps Act (22 U.S.C. 2501 et seq.) is amended by inserting after section 15 the following new section:

"FOREIGN CURRENCY FLUCTUATION ACCOUNT

"SEC. 16. (a) There is established in the Treasury of the United States an account to be known as the 'Foreign Currency Fluctuations, Peace Corps, Account'. The account shall be used for the purpose of providing funds to pay expenses for operations of the Peace Corps outside the United States which, as a result of fluctuations in currency exchange rates, exceed the amount appropriated for such expenses.

"(2) Funds in the account may be transferred, upon the certification of the Director of the Peace Corps (or the Director's designee) that the transfer is necessary for the purpose specified in paragraph (1), to the account containing funds appropriated for the expenses of the Peace Corps.

"(b) Funds transferred under subsection (a) shall be merged with and be available for the same time period as the appropriation to which they are applied. Notwithstanding any provision of law limiting the amount of funds the Peace Corps may obligate in any fiscal year, such amount shall be increased to the extent necessary to reflect fluctuations in exchange rates from those used in preparing the budget submission.

"(c) An obligation of the Peace Corps payable in the currency of a foreign country may be recorded as an obligation based upon exchange rates used in preparing a budget submission. A change reflecting fluctuations in exchange rates may be recorded as a disbursement is made.

"(d) Funds transferred from the Foreign Currency Fluctuations, Peace Corps, Account may be transferred back to that account—

"(1) if the funds are not needed to pay obligations incurred because of fluctuations in currency exchange rates of foreign countries in the appropriation to which the funds were originally transferred; or

"(2) because of subsequent favorable fluctuations in the rates or because other funds are, or become, available to pay such obligations.

"(e) A transfer back to the account under subsection (d) may not be made after the end of the 2-fiscal-year period immediately succeeding the fiscal year in which the appropriation to which the funds were originally transferred is available for obligation.

"(f) Not later than the end of the 2-fiscal-year period immediately succeeding the fiscal year for which appropriations for the expenses of the Peace Corps have been made available to the Peace Corps, unobligated balances of such appropriation provided for a fiscal year may be transferred into the Foreign Currency Fluctuations, Peace Corps, Account, to be merged with and available for the same period and purposes as that account.

"(g) There are authorized to be appropriated to the Foreign Currency Fluctuations, Peace Corps, Account for a fiscal year such sums as are sufficient to maintain a balance of $5,000,000 in such account at the beginning of such fiscal year.

"(h) The Director of the Peace Corps shall submit to the appropriate committees of the Congress each year a report on funds transferred under this section.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) applies with respect to each fiscal year after fiscal year 1990.

By Mr. JOHNSTON:

S. 2437. A bill to authorize the acquisition of certain lands in the State of Louisiana for inclusion in the Vicksburg National Military Park; to the Committee on Energy and Natural Resources.

RELATING TO THE VICKSBURG NATIONAL MILITARY PARK

● Mr. JOHNSTON. Mr. President, I am pleased today to introduce legislation to authorize the Secretary of the Interior to acquire a 2.5-acre parcel of land in Madison Parish, LA, for inclusion in the Vicksburg National Military Park.

This tract of land, known as the Grant's Canal property, contains the only remaining portion of the Grant's Canal dug by the Union Army in 1863 in an effort to change the course of the Mississippi River to bypass the confederate batteries at Vicksburg. In recognition of its historic significance, the National Park Service has identified this property for possible acquisition in the land protection plan for the Vicksburg National Park.

Now, because of the outstanding work of the conservation fund, a nonprofit conservation organization located in Arlington, VA, the inclusion of this property in the park boundary can now become a reality. Recently the conservation fund acquired this significant property by donation and, in turn, is prepared to donate this property to the Park Service upon the passage of the necessary authorizing legislation. The bill I am introducing today will allow this donation to the Park Service to take place.

Mr. President, I have received numerous letters from citizens of Louisiana expressing their desire to have this historically significant property protected. I am hopeful that we can enact this legislation expeditiously so that this important piece of Civil War history will be preserved for future generations to enjoy and appreciate.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2437

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That—

(a) The Secretary of the Interior is authorized to acquire, by donation, exchange, or purchase with donated or appropriated funds, approximately 2.5 acres of land in Madison Parish, Louisiana, known generally as the Grant's Canal property.

(b) Upon acquisition of the property referred to in subsection (a), the Secretary shall, after the publication of notice in the Federal Register, revise the boundary of the Vicksburg National Military Park to reflect the inclusion of these additional lands.

(c) The lands acquired pursuant to this Act shall be administered as a part of the Vicksburg National Military Park in accordance with all applicable laws and regulations.●

By Mr. BAUCUS:

S. 2438. A bill to amend title XVIII of the Social Security Act to make certain modifications in the Medicare Program with respect to payments made under such program to hospitals located in rural areas with 50 beds or fewer, to improve the delivery of health services to individuals residing in rural areas, and for other purposes; to the Committee on Finance.

FAIRNESS IN RURAL HEALTH CARE ACT OF 1990

● Mr. BAUCUS. Mr. President, I rise today to introduce the Fairness in Rural Health Care Act.

There is a popular assumption that rural health care is the same as urban health care, only smaller.

That assumption could not be further from the truth. Rural health care is in a very frail and perilous condition. Small rural hospitals, in particular, are struggling against staggering obstacles. One of those obstacles is Medicare's prospective payment system [PPS].

The Prospective Payment Assessment Commission [ProPAC] reported in testimony to the Finance Committee on March 22 that in 1988 rural hospitals with fewer than 50 beds, on average, had negative PPS operating margins of nearly 6 percent. By contrast, urban hospitals with more than 400 beds had positive operating margins of 6 percent. Since PPS began, over 300 small community hospitals across the country have been forced to close.

Mr. President, that's not fair. PPS clearly does not work for small rural hospitals. It is not that we have not tried to make PPS work for them. Every year we have made payment adjustments, increased the inflation update, and exempted some small

rural hospitals from cuts. In spite of all those efforts, rural hospitals are still losing—and those with fewer than 50 beds are losing the most, and the most consistently.

In my own State, we have about four hospitals for every 10,000 square miles. That's about one-fourth the national average. And every one of those hospitals is fighting for survival. Of Montana's 39 rural hospitals, only 6 broke even or made a profit last year. The other 33 operated in the red.

In Montana and other rural States, a sparse population spread out over a large area makes it a challenge to provide high quality, modern health care—and not go broke doing it. For small rural hospitals, Medicare payments are often the largest single source of funds. Therefore, how and how much Medicare pays for medical care is extremely important to maintaining the financial solvency of these hospitals. And their financial solvency is extremely important to their communities.

Mr. President, I've heard some people say "there are too many small, rural hospitals." They say rural hospitals are too small to be efficient; they duplicate services; and people don't want to go to them anyway.

Well, they're wrong.

Sweet Grass Community Hospital in Big Timber, MT, is a case in point. The hospital has only 15 beds and it has been losing money for a long time. But the people of Big Timber decided to take the bull by the horns and do something about it. They got together and figured out a way to keep their hospital open. They had a local fund drive and raised half a million dollars. All from the town of Big Timber, a community of about 2,000 people. They care enough about their hospital to keep it open themselves. With their own money. In spite of Medicare. In spite of the experts who say small, rural hospitals are obsolete.

I've heard of other examples like Big Timber, where people in a community open their wallets to keep their hospital alive. That says a lot about how much people value their local hospitals. There is a lot of change afoot in rural health care delivery, to be sure. But there is still not a good, viable alternative to the hospital model that people trust.

The idea behind PPS was to reduce health care costs by forcing hospitals to be more competitive, more efficient. That makes sense for big-city hospitals. But it doesn't work when there is no competition. For rural hospitals, the prospective payment system is the problem. It needs to be fixed.

Mr. President, my bill will give rural hospitals fewer than 50 beds the choice of opting out of PPS. Those who opt out will be reimbursed by Medicare according to their reasonable costs; that is, their payments will be subject to the lesser of cost or charges provisions in the statute now. Their choice will be binding for 3 years. Those hospitals which choose the non-PPS payment will also be exempt from capital payment reductions which most PPS hospitals undergo.

Very simply, this bill changes Medicare so that it pays small rural hospitals what it costs them to treat their Medicare patients. The American Hospital Association has endorsed this concept. The National Rural Health Association, in recent testimony before the Finance Committee, urged Congress to consider this approach.

The cost of this greatly needed change in Medicare is small, considering it will affect about 1,200 hospitals nationwide. A rough estimate would put the cost at about $150 million next year. That is about one-fourth of 1 percent of the total Medicare budget for hospital payments in fiscal year 1991. And for those communities whose hospitals are on the brink of financial insolvency, it will make a world of difference.

I urge my colleagues to take a careful look at this legislation. I hope that many Senators will join me in this important effort to make Medicare fairer for rural hospitals.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2438

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fairness in Rural Health Care Act of 1990."

SEC. 2. OPTION FOR SMALL, RURAL HOSPITALS TO RECEIVE PAYMENT FOR INPATIENT SERVICES BASED ON REASONABLE COSTS.

(a) IN GENERAL.—Section 1886(d) of the Social Security Act (42 U.S.C. 1395ww(d)) is amended by adding at the end the following new paragraph:

"(10)(A) For cost reporting periods beginning on or after October 1, 1990, a subsection (d) hospital (as defined in subsection (d)(1)(B) located in a rural area (as defined in subsection (d)(2)(D)) with 50 beds or fewer may elect to be paid with respect to operating costs of inpatient hospital services on the basis of its reasonable costs.

"(B) In the case of a hospital that elects to be treated as specified in subparagraph (A), payment shall be—

"(i) based upon reasonable costs as defined in section 1861(v) (but not subject to limits which may be established by the Secretary under that section);

"(ii) subject to the lesser of cost or charges provisions referenced in section 1814(b)(1); and

"(iii) determined without regard to the limits imposed by the provisions of subsection (b).

"(C) A hospital electing to be treated according to subparagraph (A) shall notify its fiscal intermediary of the election no later than 60 days prior to the first day of the cost reporting period for which the election is made. Election of treatment according to subparagraph (A) shall be effective for three (3) consecutive cost reporting periods. The Secretary shall establish procedures for renewal of the election."

(b) REGULATIONS.—The Secretary shall promulgate regulations implementing section 1886(d)(10)(C) of the Social Security Act (as added by subsection (a)) within 180 days of enactment.

SEC. 3. EXEMPTION FROM REDUCTION IN PAYMENT FOR CAPITAL-RELATED COSTS FOR INPATIENT HOSPITAL SERVICES.

Section 1886(g)(3) of Social Security Act (42 U.S.C. 1395ww(g)(3)) is amended by striking subparagraph (B) and inserting the following—

"(B) Subparagraph (A) shall not apply to payments with respect to the capital-related costs of any hospital that—

"(i) is a sole community hospital (as defined in subsection (d)(5)(C)(ii); or

"(ii) is a hospital for which an election under subsection (d)(10) is in effect."

SEC. 4. APPLICATION OF PERIODIC INTERIM PAYMENT PROVISIONS.

Section 1815(d) of the Social Security Act (42 U.S.C. 1395g(e)) is amended by:

(1) striking "and" from subparagraph (2)(D);

(2) inserting "and" after "hospice care;" in subparagraph (2)(E); and

(3) inserting the following after subparagraph (2)(E)—

"(F) inpatient hospital services of a hospital for which an election under section 1886(d)(10) is in effect;".●

By Mr. GORE (for himself and Mr. GLENN):

S. 2439. A bill relating to the advertising of certain alcoholic beverages, and for other purposes; to the Committee on Commerce, Science, and Transportation.

SENSIBLE ADVERTISING AND FAMILY EDUCATION ACT OF 1990

● Mr. GORE. Mr. President, I rise today on behalf of myself and my colleague, Senator GLENN, to introduce the Sensible Advertising and Family Education Act of 1990, which requires that health and safety messages be included on all broadcast and print advertisements and promotional displays in stores for beer, wine, and other alcoholic beverages.

The purpose of this bill is to inform the public about the potential hazards of drinking alcohol; to balance the one-sided promotions by the alcohol industry in all media; and, to give additional information and resources about alcohol use to individuals and their families by establishing a Federal 1-800 number. Five different warnings would be rotated for both broadcast and print advertising. The print and broadcast warnings would be slightly different but dealing with the same subjects. The toll free number, required in all print advertisements and promotional displays, will be established and maintained by the Federal Trade Commission in consultation with the Department of Health and Human Resources. Both sets of warn-

ings would be required 1 year after passage.

Mr. President, last year we passed a law requiring labels on bottles and cans of alcoholic beverages. In a short period of time, their existence has generated a tremendous amount of public discussion and awareness, both about the labels and their content. I am confident that they will be helpful to educate consumers. But, we must do more. We must make the same effort to inform the public about the serious negative consequences of drinking as the alcohol industry's advertising campaigns promote the social acceptability of alcohol consumption.

To illustrate, the alcohol beverage industry spends approximately $2 billion each year on advertisements and promotions in the United States. This has had a strong impact on each and every one of us. In fact, the Surgeon General's advertising panel at his December 1988 Workshop on Drunk Driving recommended "a goal of equivalent exposure with the level of alcohol advertising for effective prohealth and safety messages to provide more complex and accurate information."

The intention of the Sensible Advertising and Family Education Act [SAFE] is to do just that—heighten the public awareness of the adverse health consequences of using alcohol.

Consequences which include, but are not limited to, fetal alcohol syndrome [FAS], a combination of serious physical, mental, and behavioral problems directly caused by alcohol consumption during pregnancy. Once you see a child affected with FAS, his or her distorted facial features will never leave you. You realize you have seen far too many of these children.

Each year more than 5,000 infants are born suffering from fetal alcohol syndrome and another 50,000 babies experience milder but still serious birth defects known as fetal alcohol effects. These birth defects include slow growth before and after birth, abnormal physical development such as small heads, facial deformities, heart defects, and abnormal limbs. Alcohol goes directly into the baby's bloodstream. Due to its small and undeveloped system, the baby can't get rid of the alcohol as fast as the mother can. The baby uses its energy to get rid of the alcohol instead of using it to grow new cells and tissue.

Mr. President, maternal alcohol abuse is the leading preventable cause of mental retardation in children. Yet, in a 1985 survey of persons under the age of 45 conducted by the National Center for Health Statistics, almost half had never even heard of fetal alcohol syndrome.

With the enactment of SAFE, we can communicate to the public what doctors and other experts already know—there is no safe level of alcohol consumption during pregnancy. Should not we as public policymakers, take the lead to ensure that pregnant women know the health risks involved when drinking? To date, no major manufacturer of alcoholic beverages urges women to abstain from alcohol consumption during pregnancy.

Not only should expectant mothers be made aware of the health effects due to alcohol consumption, but millions of other consumers deserve to be warned of the potential dangers associated with alcohol use and misuse. The public's attention will not only be drawn to the glamorous use of alcohol, but also to the possible real consequences of its use—addiction, physical and mental impairment, and death.

Another audience which requires particular attention are teenagers and young adults under the age of 21. They are a prime target for the liquor industry's promotional campaigns. A major study found that a relationship exists between youth exposure to liquor ads and drinking behaviors and attitudes. Statistics show that an estimated 4.5 million young people are dependent on alcohol, or are problem drinkers. The messages set forth in the advertisements will not only inform the public of the health and safety risks, but also remind the public that persons under the age of 21 are, in fact, prohibited by law from purchasing alcohol.

Of course, this bill is not the solution to alcohol-related problems. But, it is an important stride forward for public health education. It will reinforce information that is already available to the public but not always sought, or received by the public.

Mr. President, alcohol advertising represents the single greatest source of alcohol education for Americans. Thus, it seems only logical that we use this vehicle to be effective in educating the public on the health and safety risks involved in the consumption of alcohol. I hope that my colleagues will agree that the passage of the Sensible Advertising Family Education Act of 1990 is in the public's best interest and is a positive measure toward preventing alcohol-related disease, injuries and death in the United States.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2439

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Sensible Advertising and Family Education Act".

SEC. 2. FINDINGS.

The Congress makes the following findings:

(1) Alcohol is by far the most used and abused drug among young people in the United States today. Its purchase by those under the age of 21 is illegal in all 50 of the United States and the District of Columbia.

(2) By the time they reach senior year, 90 percent of high school students report using alcohol at least once in the preceding year. The 1989 National Institute on Drug Abuse/University of Michigan survey of high school seniors found that 33 percent of those surveyed reported that they had consumed five or more drinks at one time in the two weeks preceding the survey.

(3) Alcohol use during pregnancy is the number one preventable cause of birth defects and mental retardation.

(4) The average age at which young people begin drinking is 12. By the age of 13, approximately 30 percent of boys and 22 percent of girls classify themselves as "drinkers". Studies demonstrate that the use of alcohol before the age of 15 appears to be one of the predictors of later heavy alcohol and other drug use.

(5) Young people are not well informed about the hazards of alcohol use. Only 43 percent of high school seniors believe there is a great risk of harm from risky drinking activities such as binge drinking once or twice each weekend.

(6) According to the National Institute on Alcohol Abuse and Alcoholism, an estimated 18,000,000 Americans 18 years and older currently experience problems as a result of alcohol use. It is estimated that 4,500,000 young people are dependent on alcohol or are problem drinkers.

(7) Nearly one half of all deaths from motor vehicle crashes are alcohol related.

(8) It is estimated that 25 percent of all hospitalized persons have alcohol-related problems.

(9) Alcohol advertising, especially in the broadcast media, represents the single greatest source of alcohol education for Americans. Children see as many as 100,000 television commercials for beer alone before they are old enough to buy alcoholic beverages.

(10) A major 1981 federally funded study found a significant relationship between youth exposure to alcoholic beverage advertising and drinking behaviors and attitudes which can lead to certain forms of problem drinking. Over 80 percent of 2,000 adults surveyed in 1988 for the Bureau of Alcohol, Tobacco, and Firearms by the Opinion Research Corporation believe that alcohol advertising influences underage youth to drink alcoholic beverages. The survey also found that the general public feels that the Nation's young people constitute the group that is most at risk from drinking alcoholic beverages.

(11) The alcoholic beverage industry spends approximately $2,000,000,000 each year on advertising and promotions in the United States.

(12) The 1988 Surgeon General's Workshop on Drunk Driving has recommended that the level of alcoholic beverage advertising be matched with an equal number of pro-health and pro-safety messages and also recommended the inclusion of health warning messages in all alcohol advertising.

(13) Two-thirds of those surveyed in a 1989 Wall Street Journal poll favor requiring warnings about the dangers of drinking on both alcoholic beverage containers and in alcohol advertisements.

SEC. 3. HEALTH WARNINGS.

(a) IN GENERAL.—On and after the expiration of the 6-month period following the date of enactment of this Act, it shall be an unfair or deceptive act or practice under section 5 of the Federal Trade Commission Act for any person to—

(1) advertise or cause to be advertised through magazines, newspapers, brochures, and promotional displays, within the United States any alcoholic beverage unless the advertising bears, in accordance with requirements of section 4(a), one of the following health warnings:

SURGEON GENERAL'S WARNING: Drinking during pregnancy may cause mental retardation and other birth defects. Avoid alcohol during pregancy. If you are pregnant and can't stop drinking, call [insert appropriate toll free number].

WARNING: Alcohol impairs your ability to drive a car or operate machinery. If you or people you love drink and drive, call [insert appropriate toll free number].

WARNING: Alcohol may be hazardous if you are using any other drugs such as over-the-counter, prescription, or illicit drugs. To find out what happens when you drink while using other drugs, call [insert appropriate toll free number].

WARNING: Drinking alcohol may become addictive. If you know someone who has an alcohol or other drug problem or has trouble controlling their drinking, call [insert appropriate toll free number].

WARNING: It's against the law to purchase alcohol for persons under age 21. For more information about the risks associated with alcohol use among teenagers and young adults, call [insert appropriate toll free number], or

(2) advertise or cause to be advertised through radio or television broadcasting (including cable broadcasting) any alcoholic beverage unless the advertising includes, in accordance with requirements of section 4(b), one of the following health warnings:

SURGEON GENERAL'S WARNING: Drinking during pregnancy may cause mental retardation and other birth defects. Avoid alcohol during pregnancy.

WARNING: Alcohol impairs your ability to drive a car or operate machinery.

WARNING: Alcohol may be hazardous if you are using any other drugs such as over-the-counter, prescription, or illicit drugs.

WARNING: Drinking alcohol may become addictive. If you know someone who has an alcohol or other drug problem or has trouble controlling their drinking, call [insert appropriate toll free number].

WARNING: It's against the law to purchase alcohol for persons under age 21.,

(b) TOLL FREE NUMBERS.— The Federal Trade Commission, in consultation with the Secretary of Health and Human Services, shall be responsible for establishing and maintaining the toll free numbers referred to in the health warnings required by subsection (a)(1). The Federal Trade Commission shall report to Congress annually on the number of calls received using those numbers and the types of referrals made.

SEC. 4. REQUIREMENTS.

(a) IN GENERAL.—The health warnings required for alcoholic beverage advertisements by section 3(a) shall—

(1) be located in a conspicuous and prominent place on each such advertisement, as determined by the Federal Trade Commission in regulations to take effect no later than 6 months after the date of the enactment of this Act, except that such regulations shall require that all letters in such health warnings appear in conspicuous and legible type that is not script or italic and that such health warnings be in contrast by typography, layout, and color with all other printed material in the advertisement, be surrounded by typographic lines that form a box, and, on an appropriate visual medium, appear on the front of an advertisement as indicated by labeling of the manufacturing or importer, and

(2) be rotated in an alternating sequence on each advertisement of a brand style in accordance with a plan submitted by such manufacturer or importer to the Federal Trade Commission.

The Federal Trade Commission shall approve a plan submitted under paragraph (2) by a manufacturer or importer that assures that each sequence of the same or substantially similar advertisement for a brand style has displayed upon it an equal distribution of each health warning at the same time. If an application is approved by the Federal Trade Commission, the rotation shall apply with respect to the applicant during the one-year period beginning on the date of the application approval.

(b) RADIO AND TELEVISION.—The health warnings required for alcoholic beverage advertisements placed on radio or television broadcasting by section 3(a) shall—

(1) be included in a conspicuous and prominent manner in such advertisement, as determined by the Federal Trade Commission in regulations to take effect not later than 6 months after the date of the enactment of this Act, except that such regulations shall require—

(A) that such health warnings be read as part of an alcoholic beverage advertisement in an audible and deliberate manner and in a length of time that allows for a clear understanding of the health warning message by the intended audience, and

(B) that for television a graphic representation of such health warning required by section 3 be included after each advertisement, that all letters in such health warning appear in conspicuous and legible type that is not script or italic, that such health warning be surrounded by typographic lines that form a box, and that such health warning appear in the same length of time as is required for the reading of the message required by subparagraph (A), and

(2) rotated in an alternating sequence on each such advertisement of a brand style in accordance with a plan submitted by such manufacturer or importer to the Federal Trade Commission.

The Federal Trade Commission shall approve a plan submitted under paragraph (2) by a manufacturer or importer that assures that an equal distribution of each of the health warnings is displayed on each sequence of the same or substantially similar advertisement for a brand style at the same time. If an application is approved by the Federal Trade Commission, the rotation shall apply with respect to the applicant during the one-year period beginning on the date of the application approval.

By Mr. NUNN (for himself and Mr. WARNER) (by request):

S. 2440. A bill to amend various provisions of law that affect the operations and management of the Department of Defense particularly in the areas of military personnel, acquisition reform, civilian personnel management, and for real property; to the Committee on Armed Services.

DEFENSE MANAGEMENT IMPROVEMENT ACT

● Mr. NUNN. Mr. President, the Department of Defense has transmitted to the Senate today a legislative proposal, entitled the "Defense Management Improvement Act." This proposal is the product of the legislative task force established by Secretary Cheney in conjunction with the Defense management report.

As is the custom on our committee when we receive a major legislative proposal from the Department of Defense, we are introducing this proposal by request. The Armed Services Committee has not had the opportunity to study the substance of this proposal, but we shall ensure that it receives a thorough and fair review.

Our committee's consideration of this proposal will begin with a hearing before the Subcommittee on Defense Industry and Technology on Tuesday, April 24. This subcommittee, under the leadership of Chairman JEFF BINGAMAN and ranking minority member MALCOLM WALLOP, will receive testimony at that time from the Department of Defense. The Defense Industry and Technology Subcommittee will conduct a further hearing on May 14. Members of the public interested in testifying or submitting testimony for the record at the May 14 hearing should contact the Armed Services Committee.

In addition to the hearings before the Subcommittee on Defense Industry and Technology, it is likely that further hearings will be held by other subcommittees of the Armed Services Committee with respect to aspects of the legislative proposal that fall within their jurisdiction.

I ask unanimous consent that the text of the bill, the Department's legislative proposal, along with the transmittal letter and the Department's sectional analysis, be printed in the RECORD immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2440

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Defense Management Improvement Act".

SEC. 2. TABLE OF CONTENTS.

TITLE I—MILITARY PERSONNEL

Sec. 101. Authority to terminate selective reenlistment bonus.
Sec. 102. Permanent authority to pay selective reenlistment bonus.
Sec. 103. Variance in officer strength authorizations.
Sec. 104. Annual manpower end strengths; redistribution of manpower authorizations; appropriations transfers.
Sec. 105. Involuntary release of regular officers from active duty.

Sec. 107. Navy limited duty officers; involuntary retirement of captains and commanders.
Sec. 108. Selection and promotion of officers in the grade of first lieutenant or lieutenant (junior grade)
Sec. 109. Authorize travel and transportation allowances.
Sec. 110. Removal of fixed limits on senior enlisted grade strength.
Sec. 201. Multiyear contracting enhancement.
Sec. 202. Commercial style acquisition practices.
Sec. 203. Recission of commercial pricing certification requirement.
Sec. 204. Awards without discussions.
Sec. 205. Procurement simplification—uniform threshold for various socio-economic requirements.
Sec. 206. Federal acquisition regulatory council membership.
Sec. 207. Competitive alternative source requirement.
Sec. 208. Certified cost or pricing data threshold.
Sec. 209. Solicitation area policy for west coast naval reserve force ships.
Sec. 210. Authority to award contracts when competition exists between public and private shipyards.
Sec. 211. Authority for Navy to consider costs for work outside homeport when evaluating bids.
Sec. 212. Removal of restriction on contracting out core logistics.
Sec. 213. Elimination of prohibitions on certain activities.
Sec. 214. Exception to cost prohibition for certain oversea severance pay.
Sec. 215. Authority governing operation of working capital funded activities.
Sec. 216. Authorization of printing for technical data.
Sec. 217. Pilot program for major defense acquisition programs.
Sec. 218. Davis Bacon reform.

TITLE III—CIVILIAN PERSONNEL

Sec. 301. Repeal of the 180-day limitation period for the hire of retired military members.
Sec. 302. Optional exclusion of performance ratings for certain temporary employees serving less than one year.
Sec. 303. Reimbursement for house hunting trips to Alaska and Hawaii.
Sec. 304. Transportation for employees who die while assigned to Alaska or Hawaii or who have executed mandatory mobility agreements.
Sec. 305. Separate maintenance allowance for employees in Panama.
Sec. 306. Exception to $10 limit on remote worksite allowance.
Sec. 307. Repeal of requirement for authorization of civilian personnel by end strength.
Sec. 308. Revision to prohibitions on certain personnel management constraints.
Sec. 309. Repeal of ceiling on employees in headquarters and non-management headquarters and support activities.
Sec. 310. Homeowners assistance to certain employees overseas.

TITLE IV—REAL PROPERTY

Sec. 401. Revenue from sale of excess department of defense land.
Sec. 402. Revenue from outleasing of department of defense assets.

TITLE I—MILITARY PERSONNEL

SEC. 101. AUTHORITY TO TERMINATE SELECTIVE REENLISTMENT BONUS.

(a) Subsection (b) of section 308 of title 37, United States Code, is amended by adding at the end of the following new paragraph (3):

"(3) Whenever refund is not required under subsection (d), the Secretary of Defense may provide that bonus installments due to a member who does not complete the term of enlistment for which a bonus was paid under this section or who ceases to perform in the specialty for which a bonus was paid under this section will not be paid. In exercising this authority, the Secretary is authorized to prescribe the circumstances under which bonus installments terminate."

(b) This amendment shall apply to bonuses paid on or after the effective date of this Act.

SEC. 102. PERMANENT AUTHORITY TO PAY SELECTIVE REENLISTMENT BONUSES.

Sections 308(g) of title 37, United States Code, are hereby repealed.

SEC. 103. VARIANCE IN OFFICER STRENGTH AUTHORIZATIONS.

Subsection (a) of section 521 of title 10, United States Code, is amended by adding at the end "The Secretary of Defense may apply to 0.5 percent increase in end strength authorized pursuant to section 115(b)(1)(A) of this title in prescribing the total number of officers authorized to serve on active duty, provided that the resulting number of officers authorized to be on active duty at the end of the fiscal year in an armed force is not greater than 100.5 percent of the total number of officers otherwise authorized by the Congress for that armed force for that fiscal year.".

SEC. 104. ANNUAL MANPOWER END STRENGTHS: REDISTRIBUTION OF MANPOWER AUTHORIZATIONS: APPROPRIATION TRANSFERS.

(a) Subparagraph (b) of section 115 of title 10, United States Code, is amended in paragraph (1) by—

(1) deleting the second sentence of subparagraph (D) as (F); and

(3) inserting after subparagraph (C) the following new subparagraphs (D) and (E):

"(D) Upon determination by the Secretary of Defense that such action is in the national interest, end strengths authorized for a component of the armed forces pursuant to paragraph (a)(1) and clauses (b)(1)(A)(i) and (ii) may be distributed among the (i) Selected Reserve (as defined in section 368(b) of this title), (ii) active-duty personnel who are to be paid from funds appropriated for active-duty personnel and (iii) active-duty personnel and full time National Guard duty personnel who are paid by funds appropriated for reserve component personnel.

Upon the exercise of the foregoing authority, in addition to any other transfer authority available to the Department of Defense, appropriations available to the Department of Defense for the pay of such personnel may be transferred in such sums as may be necessary to reflect the distributions made pursuant to the foregoing authority.

The total end strength shall not exceed the sum of the end strengths authorized pursuant to clauses (i), (ii), and (iii) in the preceding sentence including any increase in end strength made pursuant to subparagraph (E) of this paragraph.

"(E) The end strength authorized pursuant to clause (ii) of subparagraph (D) for a fiscal year may be increased by a numbber equal to not more than 0.5 percent of the end strength authorized for such component for that fiscal year, and the end strength authorized pursuant to clause (iii) of subparagraph (D) for a fiscal year may be increased by a number equal to not more than 2 percent of the end strength authorized for such component for that fiscal year. Increases may be made under this subparagraph to officer end strength, enlisted end strength, or any combination of officer and enlisted end strength as long as the increases do not exceed the limits established by this clause.".

SEC. 105. INVOLUNTARY RELEASE OF REGULAR OFFICERS FROM ACTIVE DUTY.

Subchapter III of chapter 36, title 10, United States Code, is amended as follows:

(a) By amending section 630, to include its catchline, to read as follows:

"§ 630. Discharge or involuntary transfer to reserve component of regular commissioned officers with less than eight years of active comissioned service

"(a) Upon a determination by the Secretary concerned that such action is necessary to meet the needs of the military department concerned, a regular officer on the active duty list with less than eight years of active commissioned service, but who has remaining obligated service pursuant to section 651 of this title or under regulations prescribed by the Secretary of the military department concerned, may be involuntarily released from active duty and transferred to the Ready Reserve for the remainder of that officer's period of obligated service.

(1) The officer, if otherwise qualified, shall be tendered an appointment as prescribed in section 595 of this title. Provided that the officer is transferred to the reserve component in the same grade held in the regular component, subscription to a separate oath of office pursuant to section 591 of this title is not required.

(2) An officer who declines the tender of a reserve appointment under the circumstances described in this section shall be transferred to the reserve component in an enlisted status pursuant to sections 510(a) and 651(b) of this title, in a grade to be determined by the Secretary of the military department concerned.

"(b) The Secretary of the military department concerned may discharge any regular officer on the active duty list who—

(1) has less than five years of active commissioned service; or

(2) is serving in the grade of second lieutenant or ensign and has been found not qualified for promotion to the regular grade of first lieutenant or lieutenant (junior grade).

"(c) The Secretary of the military department concerned shall establish the discharge date for any officer separated pursuant to this authority. For an officer described in paragraph (b)(2), unless the officer has been promoted, this date shall be not later than the 18-month period beginning on the date on which the officer is first found not qualified for promotion.

"(d) The provisions of this section do not apply to an officer separated pursuant to chapter 60 or section 632 of this title.

"(e) The Secretary of Defense shall prescribe regulations for the administration of this section."; and

(b) The table of sections at the beginning of subchapter III is amended by amending the item relating to section 630 to read as follows:

"630. Discharge or involuntary transfer to reserve component of regular commissioned officers with less than eight years of active commissioned service.".

SEC. 106. RANK UPON RETIREMENT.

(1) Chapter 345 of title 10, United States Code, is amended (a) by adding at the end the following new section 3583:

§ 3583 Rank: retired commissioned officers

"An officer who is retired in a grade below the highest grade held while on active duty, pursuant to section 1370(a)(2) of this title, may, upon approval of the Secretary of the Army, retain the rank and insignia of grade for the highest grade in which he served on active duty satisfactorily for a period of 18 months and, for all purposes of law other than computation of retired pay, be considered to have retired in the higher grade."; and

(b) By amending the table of sections at the beginning of such chapter by adding at the end the following:

"3583. Rank: retired commissioned officers.".

(2) Chapter 535 of title 10, United States Code, is amended (a) by adding at the end the following new section 5509:

"§ 5509. Rank: retired commissioned officers

"An officer who is retired in a grade below the highest grade held while on active duty, pursuant to section 1370(a)(2) of this title, may, upon approval of the Secretary of the Navy, retain the rank and insignia of grade for the highest grade in which he served on active duty satisfactorily for a period of 18 months and, for all purposes of law other than computation of retired pay, be considered to have retired in the higher grade."; and

(b) by amending the table of sections at the beginning of such chapter by adding at the end the following:

"5509. Rank: retired commissioned officers.".

(3) Chapter 845 of title 10, United States Code is amended (a) by inserting at the end the following new section 8583:

"§ 8583. Rank: retired commissioned officers

"An officer who is retired in a grade below the highest grade held while on active duty, pursuant to section 1370 of this title, may, upon approval of the Secretary of the Air Force, retain the rank and insignia of grade for the highest grade in which he served on active duty satisfactorily for a period of 18 months and, for all purposes of law other than computation of retired pay, be considered to have retired in the higher grade."; and

(b) By amending the table of chapters at the beginning of such chapter by adding at the end:

"8583. Rank: retired commissioned officers.".

SEC. 107. NAVY LIMITED DUTY OFFICERS; INVOLUNTARY RETIREMENT OF CAPTAINS AND COMMANDERS.

(a)(1) Section 633 of title 10, United States Code, is amended by inserting "or section 6383" after "section 5596(e)," the first time it appears in that section.

(2) Section 634 of title 10, United States Code, is amended by inserting after "each officer of the Regular Navy" "except an officer designated for limited duty to whom section 6383(a)(3) of this title applies".

(b) Section 6383 of title 10, United States Code, is amended—

(1) by redesignating subsection (a) as paragraph (a)(1);

(2) by adding the following new paragraphs:

"(2) Each regular officer of the Navy who is an officer designated for limited duty and who is serving in the grade of commander, who has failed of selection for promotion to the grade of captain for the second time and whose name is not on a list of officers recommended for promotion to the grade of captain shall—

"(A) if he is eligible for retirement as a commissioned officer under any provision of law, be retired under that law on the date requested by him and approved by the Secretary of the Navy, which date shall be not later than the first day of the seventh calendar month beginning after the month in which the President approves the report of the board which considered him for the second time; or

"(B) if he is not eligible for retirement as a commissioned officer, be retired on the date requested by him and approved by the Secretary of the Navy after becoming eligible for retirement as a commissioned officer which date shall be not later than the first day of the seventh calendar month beginning after the month in which he becomes eligible for retirement as a commissioned officer. If not retired earlier, a regular officer of the Navy designated for limited duty who is serving in the grade of commander, and whose name is not on a list of officers recommended for promotion to the grade of captain shall be retired on the last day of the month following the month in which he completes 35 years of active naval service, exclusive of active duty for training in a reserve component.

"(3) Each regular officer of the Navy who is an officer designated for limited duty and who is serving in the grade of captain shall, if not retired sooner, be retired on the last day of the month following the month in which he completes 38 years of active naval service, exclusive of active duty for training in a reserve component."; and

(3) By inserting in the last sentence of subsection (i) after "lieutenant colonel" "or commander, or 30 years active commissioned service for an officer of the Navy if in the grade of captain,".

SEC. 108. SELECTION AND PROMOTION OF OFFICERS IN THE GRADE OF FIRST LIEUTENANT OR LEIUTENANT (JUNIOR GRADE).

(a) Section 611 of title 10, United States Code, is amended by redesignating subsection (a) as (a)(1) and by adding at the end the following new paragraph (2):

"(2) Whenever the needs of the service require the number of officers to be recommended for promotion to the grade of captain in the Army, Air Force, or Marine Corps, or lieutenant in the Navy, as determined pursuant to section 622 of this chapter, to be equal to, or greater than the number of officers eligible to be considered for promotion by a selection board convened under this section, the Secretary of Defense may waive the requirement to convene a selection board and allow those officers who would otherwise be considered by the selection board to be considered under regulations prescribed by the Secretary of the military department concerned.".

(b) Paragraph (a)(1) of section 624 of title 10, United States Code, is amended to read as follows:

"(1) When the report of a selection board convened under section 611(a)(1) of this title is approved by the President, or when a list of officers is approved for promotion pursuant to the waiver authority of the Secretary of Defense, as prescribed in section 611(a)(2) of this title, the Secretary of the military department concerned shall place the names of all officers approved for promotion within a competitive category on a single list for that competitive category, to be known as a promotion list, in the order of the seniority of such officers on the active duty list.".

(c) Section 631 of title 10, United States Code, is amended by adding at the end the following new subsection (c):

"(c) An officer whose name is not placed on a list of officers to be promoted to the grade of captain in the Army, Air Force, or Marine Corps, or lieutenant in the Navy, in accordance with the waiver authority of the Secretary of Defense, as prescribed in section 611(a)(2) of this title, shall be considered to have failed of selection for promotion.".

SEC. 109. AUTHORIZE TRAVEL AND TRANSPORTATION ALLOWANCES.

Section 408 of title 37, United States Code, relating to travel and transportation allowances for travel within the limits of the duty station, is amended:

(1) by inserting "(a)" before "A member of a uniformed service"; and

(2) by adding at the end the following new subsection (b):

"(b) Under regulations prescribed by the Secretaries concerned, a member of a uniformed service, directed by competent authority to perform duty at a location within the limits of his duty station, other than his residence or normal duty location, for a period of time that requires the member to utilize overnight accommodations, is entitled to the travel and transportation allowances authorized by section 404 of this title.".

SEC. 110. REMOVAL OF FIXED LIMITS ON SENIOR ENLISTED GRADE STRENGTH.

Section 517 of title 10, United States Code, is repealed, and the corresponding item in the table of sections at the beginning of chapter 31 is deleted.

TITLE II—ACQUISITION

SEC. 201. MULTIYEAR CONTRACTING ENHANCEMENT.

(a) AUTHORITY FOR USE OF MULTIYEAR CONTRACTS.—Subsection (h) of section 2306 of title 10, United States Code, is amended—

(1) by striking out "To" in paragraph (1) and inserting in lieu thereof "Subject to paragraph (6) and to";

(2) by striking out in paragraph (1) "(other than contracts described in paragraph (6))";

(3) by striking out in subparagraph (1)(A) "reduced total costs under the contract" and inserting in lieu thereof "substantial savings of the total anticipated costs of carrying out the program through annual contracts";

(4) by inserting before the period in paragraph (6) ", unless the Secretary of Defense finds with respect to such a contract that application of this subsection is in the national interest"; and

(5) by striking out paragraphs (9) and (11) and by redesignating paragraph (10) as paragraph (9).

(b) LIMITATIONS ON MULTIYEAR CONTRACTING.—Section 9021 of the Department of Defense Appropriations Act for Fiscal Year 1990 (Public Law 101-165; 103 Stat. 1133) is repealed except for the last sentence authorizing the acquisition of certain programs on a multiyear basis.

SEC. 202. COMMERCIAL STYLE ACQUISITION PRACTICES.

(a) This section may be cited as the "Commercial Products Acquisition Act of 1990."

(b) The Congress finds that the economy, efficiency, and effectiveness of product acquisition by the executive agencies would be improved if they purchased off-the-shelf products available in the commercial market whenever such products will satisfy agency requirements. Many of the specifications and other requirements in Government solicitations and contracts are unique and serve no commercial purpose. These specifications and requirements result in additional costs to the seller of the products as well as the agency buying them. As a result, many sellers of commercial products do not compete for Government contracts, and the Government is unable to take advantage of the vigorous competition, large economies of scale, short delivery times, market-driven efficiency and innovation, and high value products that are available in the commercial market.

(c) The purpose of this provision of the Defense Management Improvement Act is to require the development of commercial-style purchasing procedures to be used by executive agencies to better utilize market research, avoid over-specification and otherwise facilitate the acquisition of commercial products.

(d)(1) The Administrator of the Office of Federal Procurement Policy, jointly with the Administrator of the General Services Administration, the Secretary of Defense, and the Administrator of the National Aeronautics and Space Administration, shall develop regulations that set forth commercial-style procedures for the acquisition of commercial products. These regulations shall be incorporated into the Federal Acquisition Regulation. Consistent with the authority of the Administrator of General Services under section 111 of the Federal Property and Administrative Procedures Act of 1949, the Administrator shall prescribe such additional regulations as may be necessary to implement this section as it relates to automated data processing equipment. To ensure consistency with the objectives of this section, any unreconciled implementation issues may be referred to the Office of Management and Budget for resolution pursuant to section 111 of the Federal Property and Administrative Procedures Act of 1949. For the purpose of this section, commercial products are products that are:

(A) competitively available and sold in significant quantities in the commercial market; and

(B) required in the same form as they are available in the commercial market or with only minor modification that does not alter their essential performance or functional characteristics. Contracts for commercial products may include those incidental services that are normally provided with sales of such products in the commercial market.

(2) The regulations issued under subsection (d)(1) shall—

(A) require procedures conducted under this section to be advertised by a public notice in the Commerce Business Daily. The notice shall include—

(i) a product description;

(ii) in a case where the agency expects to issue a series of solicitations under one notice, the time period during which solicitations are expected to be issued;

(iii) at the discretion of the contracting officer, a brief summary of the performance or functional requirements, tests, essential physical characteristics, or other requirements that will be used to ensure that offered products are suitable for the agency's use or any other criteria which the contracting officer determines are appropriate;

(iv) a reference to Federal Information Processing Standards required for agency use under section 111(d) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 759(d)), so as to ensure interoperability or compatibility; and

(v) the name, business address, and telephone number of the official to whom any submissions required by the notice are to be made and from whom solictations issued under the notice may be obtained,

(B) authorize the contracting officer to require offerors to demonstrate, in accordance with criteria prescribed by the contracting officer, that products being offered have achieved a level of market acceptance necessary to indicate that the products are suitable for the agency's use or that the processes used to manufacture the products meet established commercial or other specified standards; and when such criteria are specified, prohibit the award of a contract to any offeror who has not made the required demonstration to the satisfaction of the contracting officer; and

(C) authorize the contracting officer to include in the public notice a provision that waives the requirement that a product be sold in significant quantities in the commercial market in order to qualify as a commercial product, provided that the product—

(i) has been satisfactorily supplied under current or recent contracts for the same requirements;

(ii) otherwise meets the product description; specifications, and other criteria prescribed by the public notice and solicitation; and

(iii) is evaluated on an equal basis with the commercial products offered.

(D) authorize the contracting officer, after publication of the public notice, to take one or a combination of the following actions—

(i) issue solicitations;

(ii) review the responses to the notice and then—

(I) issue solicitations;

(II) adopt additional specifications or other criteria and issue solicitations prescribing those specifications or other criteria; or

(III) establish a list of sources that will be issued a series of solictations during the period of time specified by the notice; or

(iii) determine that suitable commercial products are not available and cancel the notice.

(E) except as provided for in subparagraph (F), require solicitations that are issued under subparagraph (D)(ii) or synopses of such solicitations to be issued to all sources that (i) make the submission required by the public notice either within the time period specified by the notice; or sufficiently in advance of the issuance of a solicitation, as specified in the notice, to ensure the submission can be adequately evaluated before a solicitation is issued; and

(ii) are not notified that their submission is not responsive to the notice or that they are not responsible sources.

(F) authorize the contracting officer, in issuing solicitations to sources on a list established under clause (D)(ii)(III), to rotate among such sources whenever the number qualifying for inclusion on the list is extensive.

(G) require the contracting officer to reject an offer that—

(i) is submitted in response to a solicitation issued under subparagraph (D)(ii) by a source that is not required to be issued a solicitation under paragraph (E);

(ii) is not submitted within the time period specified in the solicitation for the submission of offers;

(iii) is not responsive to the solicitation; or

(iv) is submitted by a source that is determined not to be a responsible source.

(H) require the contracting officer, in establishing deadlines for submissions required by the public notice and for offers, to ensure that interested sources have a reasonable opportunity, consistent with the needs of the agency, to participate in the competition;

(I) require the evaluation of offers and selection for contract award to be based solely on the factors specified in the solicitation. Such factors shall include price and any other factors which the contracting officer determines are necessary to identify the offer that provides the greatest benefit to the agency. The past performance of products and sources may be among those factors;

(J) authorize the award of a contract without discussions or a request for best and final offers;

(K) require prompt publication in the Commerce Business Daily of a notice announcing the award of a contract to a source on a list established under subparagraph (D)(ii)(III); and

(L) require the use of commercial-style contract terms and conditions to the maximum extent consistent with the interests of the Government.

(3) The provisions in this subsection governing the publication of public notices announcing procurements, the issuance of solicitations, the time periods for submitting offers, or otherwise the procedures for conducting procurements shall apply to procurements conducted under this subsection in lieu of such requirements in other provisions of law; and to the extent any other provisions in this subsection are inconsistent with any other provision of law, the provisions in this section shall govern the conduct of procurements under this section. However, this section shall not be implemented in a manner that would violate any United States obligation under the Agreement on Government Procurement negotiated pursuant the General Agreement on Tariffs and Trade.

(e)(1) Title III of the Federal Property and Administrative Services Act of 1949 is amended by adding at the end thereof the following:

"SEC. 311. ACQUISITION OF COMMERCIAL PRODUCTS.

"(a) The contracting officer shall use commercial-style procedures to procure commercial products unless the contracting officer purchases them under simplified small purchase or multiple award schedule procedures or determines and documents that another authorized method of acquisition is more appropriate.

"(b) For the purposes of this section—

"(1) 'Commercial products' are products that are—

"(A) competitively available and sold in significant quantities in the commercial market; and

"(B) required in the same form as they are available in the commercial market or with only minor modification that does not alter their essential performance or functional characteristics. Contracts for commercial

products may include those incidental services that are normally provided with sales of such products in the commercial market,

"(2) 'Commercial-style procedures' are those prescribed in the regulations issued pursuant to subsection (d) of the Commercial Products Acquisition Act of 1990.

"(c) Purchases of commercial products made pursuant to the commercial-style procedures required by this section or simplified small purchase or multiple award schedule procedures shall be exempt, except as provided in subsection (e), from any other requirement of law that—

"(1) prescribes terms and conditions to be included in contracts,

"(2) prescribes preferences to be given to any source or class of sources or mandates a particular source or class of sources, or

"(3) prescribes requirements to be imposed on the contractor that relate to the contractor's performance of the contract,

and which requirements of law are not equally applicable to contracts to which the United States Government is not a party.

"(d) This section shall apply to the acquisition of automatic data processing equipment. However, nothing in this section is intended to impair the authority of the Administrator of General Services as conferred by section 111 of the Federal Property and Administrative Services Act of 1949.

"(e) This section does not authorize—

(1) any exemption from the provisions of law requiring Federal agencies to purchase certain listed products from—

(A) qualified workshops for the blind and other severely handicapped in accordance with the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c); or

(B) prison industries in accordance with sections 4121 through 4129 of title 10, United States Code.

(2) Any exemption from the following provisions of law related to the employment of labor to manufacture products for delivery under government contracts—

(A) the non-discrimination and affirmative action requirements of the program for the employment of qualified handicapped persons under section 503 of the Rehabilitation Act of 1973 (29 U.S.C. 793);

(B) the nondiscrimination and affirmative action requirements of the program for qualified disabled veterans under section 503(a) of the Vietnam Era Veterans' Readjustment Assistance Act of 1974 (38 U.S.C. 2012);

(C) the non-discrimination and affirmative action requirements of the program to implement Executive Order 11246; or

(D) the labor standards applicable under the Walsh-Healey Act (41 U.S.C. 35–45).

(3) Any exemption from the requirements of section 304(d) of this title or any policies or procedures established by the Administrator with respect to the negotiation and award of Multiple Award Schedule Contracts.".

(2) The table of contents of such Act is amended by adding at the end of Title III the following new section:

"Sec. 311. Acquisition of Commercial Products.".

(f)(1) Chapter 137 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 2331. Acquisition of commercial products

"(a) The contracting officer shall use commercial-style procedures to procure commercial products unless the contracting officer purchases them under simplified small purchase or multiple award schedule procedures or determines and documents that another authorized method of acquisition is more appropriate.

"(b) For the purposes of this section—

"(1) 'Commercial products' are products that are—

"(A) competitively available and sold in significant quantities in the commercial market; and

"(B) required in the same form as they are available in the commercial market or with only minor modification that does not alter their essential performance or functional characteristics. Contracts for commercial products may include those incidental services that are normally provided with sales of such products in the commercial market.

"(2) 'Commercial-style procedures' are those prescribed in the regulations issued pursuant to subsection (d) of the Commercial Products Acquisition Act of 1990.

"(c) Purchases of commercial products made pursuant to the commercial-style procedures required by this section or simplified small purchase or multiple award schedule procedures shall be exempt, except as provided in subsection (e), from any other requirement of law that—

"(1) prescribes terms and conditions to be included in contracts,

"(2) prescribes preferences to be given to any source of class of sources or mandates a particular source or class of sources, or

"(3) prescribes requirements to be imposed on the contractor that relate to the contractor's performance of the contract,

and which requirements of law are not equally applicable to contracts to which the United States Government is not a party.

"(d) This section shall apply to the acquisition of automatic data processing equipment. However, nothing in this section is intended to impair the authority of the Administrator of General Services as conferred by section 111 of the Federal Property and Administrative Services Act of 1949.

"(e) This section does not authorize—

"(1) any exemption from the provisions of law requiring Federal agencies to purchase certain listed products from—

"(A) qualified workshops for the blind and other severely handicapped in accordance with the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c); or

"(B) prison industries in accordance with sections 4121 through 4129 of this title; or

"(2) any exemption from the following provisions of law related to the employment of labor to manufacture products for delivery under government contracts—

"(A) the non-discrimination and affirmative action requirements of the program for the employment of qualified handicapped persons under section 503(a) of the Rehabilitation act of 1973 (29 U.S.C. 793(a));

"(B) the nondiscrimination and affirmative action requirements of the program for qualified disabled veterans under section 503(a) of the Vietnam Era Veterans' Readjustment Assistance Act of 1974 (38 U.S.C. 2012(a));

"(C) the non-discrimination and affirmative action requirements of the program to implement Executive Order 11246; or

"(D) the labor standards applicable under the Walsh-Healey Act (41 U.S.C. 35–45).".

(2) The table of contents at the beginning of such chapter is amended by inserting at the end the following new item:

"2331. Acquisition of commercial products.".

(g) INTRA-AGENCY PROTEST PROCESS.—The Secretary of Defense may authorize selected components of the Department of Defense, for a period of three years beginning 90 days after the regulations required by subsection (d) are incorporated into the Federal Acquisition Regulation, to conduct a pilot program to test the following procedures for resolving protests of actions taken in conducting procurements pursuant to such regulations—

(1) An interested party may file with the head of an agency a written protest concerning an alleged violation of a statute or regulation relating to the award or proposed award of a contract made pursuant to this section in accordance with procedures promulgated by the Secretary of Defense. Such protest shall be the sole administrative remedy available to an interested party. The procedures authorized by this subsection shall, at a minimum, provide for:

(A) an impartial review by an official designated by the head of the agency of all protests that are filed by an interested party within 10 working days of the date on which the basis of the protest was known or should have been known;

(B) the stay of the award of the contract pending resolution of the protest, unless the head of the agency determines in writing that the equipment or supplies to be contracted for are urgently required and delivery or performance will be unduly delayed by failure to promptly make award or that other compelling considerations make necessary the prompt award of the contract;

(C) a written decision within 30 working days of the filing of the protest, unless the official designated for deciding protests determines and states in writing the reasons that the specific circumstances require a longer period for resolution of the protest and award of the contract has been stayed; and

(D) designation of the official to decide protests at a level not lower than a general or flag officer if a member of the armed forces or if a civilian is serving in position with a grade under the General Schedule (or any other schedule for civilian officers or employees) that is comparable to the grade of brigadier general or rear admiral (lower half).

(2) For purposes of subsection (f), purchases of commercial products under this Act shall be exempt from any Federal statute conferring jurisdiction on any governmental entity, other than United States federal courts, for the resolution of protests that is inconsistent with this subsection, including sections 3551 through 3556 of title 31 and section 111(h) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 759(h)).

(3) For purposes of this subsection:

(A) "Protest" means a written objection by an interested party to the prequalification of commercial products, or to a solicitation for bids or proposal for a proposed contract for the procurement of commercial products or a written objection by an interested party to a proposed award or to the award of such a contract.

(B) "Interested party" means an actual or prospective bidder or offeror whose direct economic interest would be affected by the award of the contract or by failure to award the contract for commercial products procured under the authority of this section.

(h) EFFECTIVE DATES.—The regulations required by subsection (d) shall be issued 270 days after the date of enactment of this Act. Subsections (e), (f), and (g) shall become effective 90 days after the regulations required by subsection (d) are incorporated into the Federal Acquisition Regulation.

SEC. 203. RECISION OF COMMERCIAL PRICING CERTIFICATION REQUIREMENT.

Section 2323 of title 10, United States Code, is hereby repealed.

SEC. 204. AWARDS WITHOUT DISCUSSIONS.

Section 2305(b)(4)(A)(ii) of title 10, United States Code, is amended adding at the end ", or the greatest benefit to the United States considering factors such as price, quantity, design, performance, management capability, technical capability, delivery, or risk as stated in the solicitation in accordance with paragraphs (a) (2) and (3),".

SEC. 205. PROCUREMENT SIMPLIFICATION—UNIFORM-THRESHOLD FOR VARIOUS SOCIO-ECONOMIC REQUIREMENTS.

(a) Section 2304 of title 10, United States Code, is amended by adding at the end of subsection (g) the following new subparagraph (5):

"(5) The following provisions of the Small Business Act (15 U.S.C. 631-650) shall not apply to a small purchase as defined in section 2304(g)(2) of this title:

"(A) The last sentence of section 8(b)(7)(A) (15 U.S.C. 637(b)(7)(A)); and

"(B) Section 8(b)(7)(C) (15 U.S.C. 637(b)(7)(C)).".

(b) Section 303 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253) is amended by adding at the end of subsection (g) the following new paragraph (5):

"(5) The following provisions of the Small Business Act (15 U.S.C. 631-650) shall not apply to a small purchase as defined in section 303(g)(2) of this act:

"(A) The last sentence of section 8(b)(7)(A) (15 U.S.C. 637(b)(7)(A)) and

"(B) Section 8(b)(7)(C) (15 U.S.C. 637(b)(7)(C)).".

(c) Sections 8 and 15 of the Small Business Act (15 U.S.C. 637 and 644) are amended as follows:

(1) In section 8(d)(2)(A) (15 U.S.C. 637(d)(2)(A)) and sections 8(e)(1)(A) (i) and (ii) (15 U.S.C. 637(e)(1)(A) (i) and (ii)) by striking out "$10,000", "$25,000", and "$25,000)), respectively, and inserting in lieu thereof in each instance "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an executive agency other than those listed in section 2303 of title 10, United States Code".

(2) By striking out section 8(e)(1)(A)(iii).

(3) In sections 8(e)(1)(B) (i) and (ii) (15 U.S.C. 637(e)(1)(B) (i) and (ii), by striking out "$25,000;" and inserting in lieu thereof "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10 United States Code" in lieu thereof.

(4) In section 8(e)(1)(C) (15 U.S.C. 637(e)(1)(C)), (A) by striking out "$25,000," each place it appears and inserting in lieu thereof "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case an agency other than those listed in section 2303 of title 10, United States Code".

(5) In section 15(j) (15 U.S.C. 644(j)), by striking out "$25,000" and inserting in lieu thereof "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

(d) Section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. 16) is amended as follows:

(1) In sections 18(a)(1)(A)(i) and 18(a)(1)(A)(ii), by deleting "$25,000" and inserting in lieu thereof "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

(2) By deleting section 18(a)(1)(A)(iii) in its entirety.

(3) In sections 18(a)(1)(B)(i), and 18(a)(1)(B)(ii), and 18(a)(1)(C) by deleting "$25,000" and inserting in lieu thereof "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

(e) Section 503(a) of the Rehabilitation Act of 1973 (29 U.S.C. 793(a)) is amended by striking out "$2,500" each place it appears and inserting in lieu thereof "the small purchase threshold as established in section 2304(g)(2), of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

(f) Section 503(a) of the Vietnam Veteran's Readjustment Assistance Act of 1972 (38 U.S.C. 2012(a)) is amended by striking out "the amount of $10,000 or more" and inserting in lieu thereof "excess of the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Service Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

(g) Section 1 of the Act approved June 30, 1936 (commonly referred to as the "Walsh-Healey Act") (41 U.S.C. 35) is amended by striking out "$10,000," in the first sentence and insering in lieu thereof "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

(h) Section 2 of the Service Contract Act of 1965 (41 U.S.C. 351(a)) is amended by striking out "$2,500" and inserting in lieu thereof "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

(i) Section 6002(a) of the Solid Waste Disposal Act of 1976 (42 U.S.C. 6962(a)) is amended by striking out "$10,000" the first time it appears and "$10,000 or more" and inserting in lieu thereof in each instance "the small purchase threshold as established in section 2304(g)(2) of title 10, United States Code, in the case of agencies listed in section 2303 of title 10, United States Code, or the small purchase threshold as established in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(g)(2)) in the case of an agency other than those listed in section 2303 of title 10, United States Code,".

SEC. 206. FEDERAL ACQUISITION REGULATORY COUNCIL MEMBERSHIP.

Section 25 of the Office of Federal Procurement Policy Act (41 U.S.C. 421) as amended by P.L. 100-679 is further amended by striking out subparagraph (b)(2) and inserting in lieu thereof the following new subparagraph (b)(2):

"(b)(2) Notwithstanding section 205(d) of the Federal Property and Administrative Services Act of 1949, the officials specified in subparagraphs (A), (B), and (C) of paragraph (1) may designate to serve on and attend meetings of the Council in place of that official—

"(A) the official assigned by statute with the responsibility for acquisition policy in each of their respective agencies with authority in the case of the Department of Defense to further redesignate an official at an organizational level not lower than an Assistant Secretary of Defense within the Office of the Under Secretary of Defense for Acquisition; or

"(B) if no official of such agency is assigned by statute with the responsibility for acquisition policy for that agency, the official designated pursuant to section 16(3) of this Act. Further redesignation may not be made.".

SEC. 207. COMPETITIVE ALTERNATIVE SOURCE REQUIREMENT.

Section 2438 of title 10, United States Code, is amended to read as follows:

"(a)(1) Prior to the completion of full-scale development under a major program the Secretary of Defense shall prepare an acquisition strategy for the program.

"(2) The Secretary shall ensure that contracts for each major program are awarded in accordance with the acquisition strategy for such program.

"(b)(1) The acquisition strategy prepared under subsection (a)(1) shall provide that there will be competitive alternative produc-

tion sources available for major programs and for major subsystems under the major program when the establishment and maintenance of two or more production sources—

"(A) would likely result in reduced costs for such program;

"(B) would not result in unacceptable delays in fulfilling the needs of the Department of Defense; and

"(C) is otherwise in the national security interests of the United States.

"(2) In carrying out this subsection, the Secretary may provide that the requirement for competitive alternative production sources of a major program or subsystem is satisfied even though the sources for that major program or subsystem do not develp or produce identical systems if the systems developed serve similar functions and compete effectively with each other.

"(c) In this section:

"(1) 'Major program', means a major defense acquisition program, as such term is defined in section 2430 of this title.

"(2) 'Major subsystem', with respect to a major program, means a subsystem of the system developed under the program, that is purchased directly by the United States and for which—

"(A) the amount for research, development, test and evaluation is 10 percent or more of the amount specified in section 2430(2) of this title as the research; development, test and evaluation funding criterion for identification of a major defense acquisition program; or

"(B) the amount for production is 10 percent or more of the amount specified in section 2430(2) of this title as the production funding criterion for identification of a major defense acquisition program.".

SEC. 208. CERTIFIED COST OR PRICING DATA THRESHOLD.

Subsection (a) of section 2306 of title 10, United States Code, is amended by striking out "$100,000" each place it appears and by inserting in lieu thereof "$500,000".

SEC. 209. SOLICITATION AREA POLICY FOR WEST COAST NAVAL RESERVE FORCE SHIPS.

Subsection (d) of section 7299a of title 10, United States Code, is amended in paragraph (3) by striking out "apply-(A) in the case of voyage repairs; or (B) in the case of a vessel that is assigned to the Naval Reserve Force and homeported on the West Coast of the United States" and inserting in lieu thereof "apply in the case of voyage repairs".

SEC. 210. AUTHORITY TO AWARD CONTRACTS WHEN COMPETITION EXISTS BETWEEN PUBLIC AND PRIVATE SHIPYARDS.

Section 7313 of title 10, United States Code, (Overhaul of naval vessels.: competition between public and private shipyards) is hereby repealed and the corresponding item in the chapter analysis for chapter 633 is hereby deleted.

SEC. 211. AUTHORITY FOR NAVY TO CONSIDER COSTS FOR WORK OUTSIDE HOMEPORT WHEN EVALUATING BIDS.

Section 9053 of the Department of Defense Appropriations Act, 1990 (Public Law 101-165; 103 Stat. 1140) is hereby repealed.

SEC. 212. REMOVAL OF RESTRICTION ON CONTRACTING OUR CORE LOGISTICS.

Section 2464 of title 10, United States Code, is hereby repealed and the corresponding item in the chapter analysis for chapter 146 is hereby deleted.

SEC. 213. ELIMINATION OF PROHIBITIONS ON CERTAIN ACTIVITIES.

Sections 2465 and 2466 of title 10, United States Code, are hereby repealed and the corresponding items in the chapter analysis for chapter 146 are hereby deleted.

SEC. 214. EXCEPTION TO COST PROHIBITION FOR CERTAIN OVERSEA SEVERANCE PAY.

(a) Subparagraph 2324(e)(1)(M) of title 10, United States Code, is amended by adding the following proviso at the end: "; *provided*, however, that, under such regulations as are prescribed by the Secretary of Defense, any severance pay paid to foreign nationals in order to comply with the laws of the local host nation may be allowable".

(b) The foregoing proviso to subparagraph 2324(e)(1)(M) shall apply with respect to all costs incurred by contractors after the date of enactment of this Act under covered contracts.

SEC. 215. AUTHORITY GOVERNING OPERATION OF WORKING-CAPITAL FUNDED ACTIVITIES.

Paragraphs (1) and (2) of section 2208(i) of title 10, United States Code, are amended to read as follows:

"(i)(1) Regulations under subsection (h) may authorize an article manufactured by a working-capital funded Department of the Army arsenal (or other Army industrial facility) that manufacturers large caliber cannons, gun mounts, recoil mechanisms, ammunition, munitions, or components thereof to be sold to a person outside the Department of Defense if—

"(A) the article is sold to a United States manufacturer, assembler, developer, or other concern (i) for use in developing new products; (ii) for incorporation into items to be sold to, or to be used in a contract with, an agency of the United States; (iii) for incorporation into items to be sold to, or to be used in a contract with, or for purposes of soliciting a contract with a friendly foreign government; or (iv) for use in commercial expendable launch vehicles;

"(B) the purchaser is determined by the Department of Defense to be qualified to carry out the proposed work involving the article to be purchased;

"(C) the article is not readily available from a commercial source in the United States; and

"(D) the sale is to be made on a basis that does not interfere with performance of work by the arsenal for the Department of Defense or for a contractor of the Department of Defense.

"(2) Services related to an article sold, or authorized to be sold, under this subsection (i), may also be sold to the purchaser if the services are to be performed in the United States for the purchaser.".

SEC. 216. AUTHORIZATION OF PRINTING FOR TECHNICAL DATA.

Technical data to be delivered under Department of Defense contracts shall not be subject to any law that imposes restrictions on the procurement from commercial sources of any printing, binding, or blankbook work.

SEC. 217. PILOT PROGRAM FOR MAJOR DEFENSE ACQUISITION PROGRAMS.

(a) Chapter 137 of title 10, United States Code, is amended by adding at the end the following new section 2332 (after section 2331 added by section 302 of this Act):

§ 2332. Pilot program for major defense acquisition programs

"(a) IN GENERAL.—The Secretary of Defense is authorized, subject to subparagraph (d), to conduct a pilot program in accordance with standard commercial, industrial practices with the objective of identifying the potential for increasing the efficiency and effectiveness of the acquisition process. The Secretary may waive for purposes of such pilot program any provision of law or regulation that the Secretary is not otherwise authorized to waive that:

"(1) prescribes procedures for the procurement of supplies or services;

"(2) prescribes preferences to be given to any source or class of sources or mandates a particular source or class of sources;

"(3) prescribes requirements to be imposed on the contractor that relate to the contractor's performance of the contract;

"(4) prescribes requirements governing cost allowability, cost accounting, or auditing, except a provision intended to assure financial integrity for the conduct of government programs and except a provision relating to the authority of the Inspector General of the Department of Defense;

and which law is not equally applicable to contracts to which the United States Government is not a party; or

"(5) prescribes requirements for the management, testing, evaluation of, or reporting on, a program.

"(b) DESIGNATION PARTICIPATING PROGRAMS.—The Secretary of Defense may designate no more than six major defense acquisition programs, as defined in section 2430 of title 10, United States Code, to participate in the pilot program.

"(c) REGULATIONS.—The Secretary of Defense shall promulgate regulations to implement the pilot program within 270 days after the date of enactment of this section.

"(d) NOTIFICATION.—Whenever the Secretary of Defense determines that a major defense acquisition program should be designated as part of the pilot program under this provision, the Secretary shall notify the Congress of his intention to designate such program for inclusion in the pilot program."; and

(b) the table of sections for such chapter 137 is amended by adding after the item relating to section 2331 (as added by section 202 of this Act) the following:

"2332. Pilot program for major defense acquisition programs.".

SEC. 218. DAVIS-BACON REFORM.

(a) REFERENCE.—Whenever in this section (other than in section 10) an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Act of March 3, 1931 (commonly referred to as the "Davis-Bacon Act").

(b) INCREASE IN THRESHOLD AMOUNT.—Subsection (a) of the first section (40 U.S.C. 276a) is amended by striking out "$2,000" and inserting in lieu thereof "$250,000".

(c) APPROPRIATE CIVIL SUBDIVISION FOR COMPUTATION OF PREVAILING WAGE.—Subsection (a) of the first section is further amended by striking out "the city, town, village, or other civil subdivision of the State, in which the work is to be performed," and inserting in lieu thereof "the particular urban or rural subdivision (of the State) in which the work is to be performed,".

(d) DETERMINATION OF PREVAILING WAGE.—Subsection (a) of the first section is further amended by adding at the end thereof the following: "In determining the prevailing wage for a class of laborers, mechanics, or helpers where more than a single wage is being paid to the corresponding class of laborers, mechanics, or helpers, the Secretary shall establish as the prevailing wage—

"(1) the wage paid to 50 percent or more of the corresponding class of laborers, mechanics, or helpers employed on private industry projects of a character similar to the

contract work in the urban or rural subdivision of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there, or

"(2) if the same wage is not paid to 50 percent or more of the laborers, mechanics, or helpers in the corresponding class, the weighted average of the wages paid to the corresponding class of laborers, mechanics, or helpers employed on private industry projects of a character similar to the contract work in the urban or rural subdivision of the State in which the work is to be performed, or in the District of Columbia, if the work is to be performed there.".

(e) EXCLUSION OF FEDERAL PROJECTS FROM PREVAILING WAGE COMPUTATION.—Subsection (b)(1) of the first section is amended by inserting before the semicolon the following: ", excluding the basic hourly rates of pay of individuals whose wages are established pursuant to the requirements of this Act, unless it is determined that there is insufficient wage data to determine the prevailing wages in the absence of data from Federal or federally assisted projects; data from Federal or federally assisted projects may be used in compiling wage rate data for heavy and highway wage determinations".

(f) CLASSIFICATION OF HELPERS.—The first section is further amended by adding at the end thereof the following new subsection:

"(c)(1) For the purposes of this Act, helpers of a class of laborers or mechanics shall be considered as a separate class and prevailing wages for such helpers shall be determined on the basis of the corresponding class of helpers.

"(2) For the purposes of this section, the term 'helper' means a semi-skilled worker (rather than a skilled journeyman mechanic) who—

"(A) works under the direction of and assists a journeyman,

"(B) under the direction and supervision of the journeyman, performs a variety of duties to assist the journeyman, such as—

"(i) preparing, carrying, and furnishing materials, tools, equipment, and supplies and maintaining them in order,

"(ii) cleaning and preparing work areas,

"(iii) lifting, positioning, and holding materials or tools, and

"(iv) other related semi-skilled tasks as directed by the journeyman, and

"(C) may use tools of the trade which are under the direction and supervision of the journeyman.".

(g) PROHIBITION ON CONTRACT-SPLITTING.—The first section of the Davis-Bacon Act (as amended by subsection (f) of this section) is further amended by adding at the end thereof the following new subsections:

"(d) any person entering into a contract under which wages are to be determined in accordance with this Act shall not divide any project into contracts of $250,000 or less if the project would not have been so divided but for the purpose of avoiding application of this Act.

"(e) Whenever the Secretary of Labor determines that a division for such a purpose has occurred, the Secretary may (1) require that the contracts, grants, or other instruments providing Federal financing or assistance be amended so as to incorporate retroactively all the provisions which would have been required under this Act or other applicable prevailing wage statute, and (2) require the contracting or assisting agency, the recipient of Federal financing or assistance, or any other entity which awarded the contract or instrument providing Federal financing or assistance in violation of this section, to compensate the contractor, the grantee, or other recipient of Federal assistance, as appropriate, for payment to each affected laborer and mechanic, of an amount equal to the difference between the rate received and the applicable prevailing wage rate, with interest on wages due at the rate specified in section 6621(c) of title 26, United States Code, from the date the work was performed by such laborers and mechanics. The Secretary shall make such a determination only where the Secretary has notified the agency or entity in question no later than 180 days after completion of construction on the project that an investigation will be conducted concerning an alleged violation of this subsection.".

(h) TECHNICAL AMENDMENT APPLYING REFORM TO RELATED ACTS.—The Davis-Bacon Act is further amended by adding at the end the following:

"SEC. 8. No provision of any law requiring the payment of prevailing wage rates as determined by the Secretary in accordance with this Act shall apply to contracts for construction, alteration, or repair valued at $250,000 or less, or in the case of rent supplement assistance or other assistance for which the instrument of Federal financing or assistance does not have an aggregate dollar amount, where the assisted project is in the amount of $250,000 or less.".

(i) TECHNICAL AMENDMENTS.—(1) The following is inserted before the first section: "Section 1. This Act may be cited as the 'Davis-Bacon Act'.".

(2) The first section is amended by striking out "(a) That the" and inserting in lieu thereof "Sec.2. (a) The".

(3) Sections 2 through 8 are redesignated as sections 3 through 9, respectively.

(4) Subsection (a) of section 3 (40 U.S.C. 276a-2) is amended by striking the first sentence and inserting in lieu thereof the following: "In accordance with regulations issued by the Secretary pursuant to Reorganization Plan Numbered 14 of 1950 (64 Stat. 1267), any wages found to be due to laborers and mechanics pursuant to this Act shall be paid directly to such laborers and mechanics from any accrued payments withheld under the terms of the contract. Any sums due laborers or mechanics under section 1, not paid because of inability to do so within 3 years, shall revert to or be deposited into the Treasury of the United States. The Administrator of General Services shall distribute a list of all departments of the Government giving the names of persons or firms that the Secretary has found to have disregarded their obligations to employees and subcontractors.".

(j) COPELAND ACT PAPERWORK REDUCTION AMENDMENT.—Section 2 of the Act of June 13, 1934, entitled "An Act to effectuate the purpose of certain statutes concerning rates of pay for labor, by making it unlawful to prevent anyone from receiving the compensation contracted for thereunder, and for other purposes" (40 U.S.C. 276c) (commonly referred to as the "Copeland Act") is amended by striking out "shall furnish weekly a statement with respect to the wages paid each employee during the preceding week" and inserting in lieu thereof "shall furnish weekly a statement with respect to the wages paid each employee during the preceeding week" and inserting in lieu thereof "shall furnish, at the beginning, midpoint, and conclusion of the period covered by the contract, a statement with respect to the weekly wages paid each employee during such period, except that such statement shall be furnished no less often than every 3 months.".

(k) REPORTS REQUIRED.—Beginning 1 year after the effective date of the amendments made by this Act, and at intervals of 1 year thereafter, the Secretary of Labor and the Comptroller General of the United States shall each prepare and transmit to the Congress a report describing the results of a review of the implementation, enforcement, administration, impact on local wages, and impact on local and national economies of the Act of March 3, 1931 (the Davis-Bacon Act), the Act of June 13, 1934 (the Copeland Act), and the amendments made by this Act during the preceding 12-month period, including recommendations for such further legislation as may be appropriate.

(l) EFFECTIVE DATE.—The amendments made by section 218 shall take effect 60 days after the date of enactment of this Act but shall not affect any contract in existence on that date or made pursuant to invitations for bids outstanding on that date.

TITLE III—CIVILIAN PERSONNEL

SEC. 301. REPEAL OF THE 180 DAY LIMITATION PERIOD FOR THE HIRE OF RETIRED MILITARY MEMBERS.

Section 3326 of title 5, United States Code, is repealed.

SEC. 302. OPTIONAL EXCLUSION OF PERFORMANCE RATINGS FOR CERTAIN TEMPORARY EMPLOYEES SERVING LESS THAN ONE YEAR.

Section 4301 of title 5, United States Code, is amended—

(1) by deleting "or" at the end of subparagraph (2)(F) and "and" at the end of subparagraph (2)(G);

(2) by inserting "or" at the end of subparagraph (2)(G); and

(3) by adding the following new subparagraph at the end of paragraph (2):

"(2)(H) an individual who is serving under temporary appointment for less than one year within the Department of Defense who agrees to serve without a performance rating unless such individual is being considered for (i) an increase in pay that is dependent on performance or (ii) a reappointment; and".

SEC. 303. REIMBURSEMENT FOR HOUSE HUNTING TRIPS TO ALASKA AND HAWAII.

Section (a) of section 5724a of title 5, United States Code, is amended by striking out in paragraph (2) "continental".

SEC. 304. TRANSPORTATION FOR EMPLOYEES WHO DIE WHILE ASSIGNED TO ALASKA OR HAWAII OR WHO HAVE EXECUTED MANDATORY MOBILITY AGREEMENTS.

Section 5742 of title 5, United States Code, is amended—

(1) in paragraphs (1) and (2) of subsection (b) by inserting "continental" after "outside the" in each instance, and

(2) by adding at the end the following new subsection (e):

"(e) The benefits under this section shall apply to an employee who has relocated pursuant to a mandatory mobility agreement executed as a condition of employment.".

SEC. 305. SEPARATE MAINTENANCE ALLOWANCE FOR EMPLOYEES IN PANAMA.

Section 5924 of title 5, United States Code, is amended in paragraph (3) by inserting after "in a foreign area" "or in the Republic of Panama".

SEC. 306. EXCEPTION TO $10 LIMIT ON REMOTE WORKSITE ALLOWANCE.

Section 5942 of title 5, United States Code, is amended—

(1) by inserting "(a)" before "Notwithstanding", and

(2) by adding at the end the following new subsection (b):

"(b) The maximum allowance described in subsection (a) may be adjusted from time to time under regulations of the President, when necessary to alleviate deterrents to hiring and retaining employees at remote work sites.".

SEC. 307. REPEAL OF REQUIREMENT FOR AUTHORIZATION OF CIVILIAN PERSONNEL BY END STRENGTH.

Section 115(b)(2) of title 10, United States Code, is repealed and paragraphs (3), (4), and (5) of section 115(b) are designated as paragraphs (2), (3), and (4), respectively.

SEC. 308. REVISION TO PROHIBITIONS ON CERTAIN PERSONNEL MANAGEMENT CONSTRAINTS.

Section 129, title 10, United States Code, is amended to read as follows:

"(a) The civilian personnel of the Department of Defense shall be managed each fiscal year solely on the basis of and consistent with the work load required to carry out the functions and activities of the department and the appropriations and funds available to the department for such fiscal year. The management of such personnel in any fiscal year shall not be subject to any statutory end strength or work year constraint or limitation, and the management of such personnel in any fiscal year shall not be subject to any statutory end strength or work year floor or minimum staffing level.

"(b) The number of, and the amount of funds available to be paid to indirectly funded Government employees of the Department of Defense may not be—

"(1) subject to any statutory constraint or limitation on the number of such personnel who may be employed on the last day of a fiscal year; or

"(2) managed on the basis of any statutory end-strength or work year.

"(c) In this section, the term "indirectly funded Government employees" means civilian employees of the Department of Defense who are employed by industrial-type activities or commercial-type activities described in section 2208 of this title.".

SEC. 309. REPEAL OF CEILING ON EMPLOYEES IN HEADQUARTERS AND NON-MANAGEMENT HEADQUARTERS AND SUPPORT ACTIVITIES.

(a) Sections 194, 3014(f)(1), 5014(f)(1), and 8014(f)(1) of title 10, United States Code, are hereby repealed.

(b) The table of sections for subchapter I of chapter 8, United States Code, is amended by striking out the last line (relating to section 194).

SEC. 310. HOMEOWNERS ASSISTANCE TO CERTAIN EMPLOYEES OVERSEAS.

Section 3374 of the Demonstration Cities Metropolitan Development Act of 1966, as amended, (42 U.S.C. 3374) is amended by adding at the end the following new subsection (o):

"(o) Notwithstanding the provisions of subsections (b) and (c), Federal employees and nonappropriated fund personnel serving overseas with reemployment rights to an organization undergoing a base closure, wholly or in part, or a reduction in scope of operations, shall be entitled to the benefits of this section to the same extent that they would be had they remained with the organization.".

TITLE IV—REAL PROPERTY

SEC. 401. REVENUE FROM SALE OF EXCESS DEPARTMENT OF DEFENSE LAND.

Section 204 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 485) is amended—

(1) in subsection (a) by striking "subsections (b), (c), (d), and (e) of this section" and inserting in lieu thereof "subsections (b), (c), (d), (e), and (h) of this section";

(2) in subsection (b) by striking "All the proceeds" in the first sentence and inserting in lieu thereof "Except as provided in subsection (h), all the proceeds"; and

(3) by adding at the end the following new subsection (h):

"(h) Whenever the Secretary of Defense determines that land under the control of the Department is excess property, as defined by section 3 of this Act, the Secretary will request the Administrator of General Services to dispose of that property in accordance with this Act. If, as a result of this process, the land is sold and revenues are realized, the Administrator will, in the manner and to the extent provided in an appropriation act, deposit half of the net proceeds from the sale of the excess land to a special account of the Department of Defense to be used to meet the Department's mission essential requirements that are in the best interests of national defense.".

SEC. 402. REVENUE FROM OUT LEASING OF DEPARTMENT OF DEFENSE ASSETS.

Subsection (d) of section 2667 of title 10, United States Code, is amended to read as follows:

"(d) Payments for utilities or services furnished to a lessee under a lease authorized by this section shall be covered into the Treasury to the credit of the appropriation from which the cost of furnishing them was paid. Half of the money rentals received under this section, in excess of payments for utilities or services furnished to the lessee, may be retained and expended by the Secretary concerned, in the manner and to the extent provided in an appropriation act, to meet mission essential requirements. The remainder of money shall be covered into the Treasury as miscellaneous receipts.".

THE SECRETARY OF DEFENSE,
Washington, DC, April 5, 1990.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: I have the honor to transmit for the consideration of the Congress the Administration's proposed "Defense Management Improvement Act." This legislation further implements the recommendations of the Packard Commission and my July 1989 Report to the President on Defense Management. The legislation is an important element of the President's Program and will substantially strengthen the Department's ability to use available resources effectively.

Shortly after his inauguration, the President announced his intention to implement the Packard Commission recommendations. When he asked me to become Secretary of Defense, he made it clear that the effort to strengthen and streamline the management of the Department of Defense was one of our top priorities. This legislative initiative is a significant step forward in reaching this goal.

The "Defense Management Improvement Act" provides a statutory foundation for improvements in defense acquisition, military and civilian personnel management, and the management of real property. Enactment of this legislation will increase efficiency and effectiveness of our activities and reduce the size and cost of our defense structure. It will remove many legal road blocks that currently inhibit sound management of the Department. Enactment of the legislation will help the Department perform its crucial national security mission and over time realize substantial savings for America's taxpayers.

I urge prompt enactment of this legislation in this session of Congress.

Sincerely,

DICK CHENEY.

SECTION-BY-SECTION ANALYSIS

TITLE I—MILITARY PERSONNEL

Section 101

Amends 37 U.S.C. § 308 to allow the Secretary of Defense to terminate Selective Reenlistment Bonus (SRB) payments in cases where a member who is receiving such payments does not complete the term of enlistment or ceases to perform in the military specialty for which the bonus was paid.

Under current regulations, an SRB recipient who separates under hardship or dependency reasons receives the SRB balance upon separation regardless of time served in the SRB skill. Additionally, persons who are reclassified or reassigned out of the SRB skill for reasons beyond their control either separate and receive the SRB balance or retrain and continue receiving SRB anniversary payments.

This section would prevent SRB recipients who separate under hardship/dependency from receiving the unearned portions of their reenlistment bonus upon separation. It would also include other not-for-cause reclassification such as humanitarian reassignment to other duties, loss of security clearance through no fault of the member, injury, illness or impairment not the result of the member's misconduct, pregnancy and failure to attain a higher standard of technical qualification required for effective performance in the military specialty after payment of the bonus. This provision would not suspend any SRB payments from members reclassified as a result of service-directed employment in another specialty to meet Continental United States (CONUS) and overseas rotation, sea and shore rotation, or other mission essential requirements, since these actions are used exclusively to meet the needs of the military service and suspending the full SRB contract would unfairly penalize service members and diminish the integrity of the SRB program.

Section 102

Repeals 37 U.S.C. § 308(g) and 308(a)(c) thereby providing the Department of Defense with permanent authority to pay bonuses under the Enlistment Bonus (EB) and Selective Reenlistment Bonus (SRB) programs.

Under the present statutes, authority to pay EB and SRB expires on September 30, 1992. This date coincides with the end of fiscal year 1992. Therefore, Congress must provide for continued authority in the fiscal year 1993 Defense Authorization Act. If an Authorization Act is not passed by Congress and signed by the President prior to the beginning of fiscal year 1992, the services will be unable to approve new contracts for enlistment or reenlistment into critical skills until such time as the new Authorization is enacted.

Section 103

Amends 10 U.S.C. § 521 by adding a new sentence at the end of subsection (a). The amendment clarifies the authority of the

Secretary of Defense to use the increase in officer strength authorized under 10 U.S.C. § 115(b)(1)(E) (as amended by section 204 of the bill) when determining the total number of officers authorized to be on active duty in an armed force at the end of a fiscal year, provided that the resulting number in an armed force does not exceed the number otherwise directed by Congress for that armed force, by more than one-half of one percent.

Section 104

Amends 10 U.S.C. § 115b to allow the Secretary of Defense to shift authorized end strength and reprogram funds between active and reserve components of each of the Armed Forces so that the Secretary of Defense has full use of authorized end strength and corresponding funds for all components of the Armed Forces when responding to contingency operations or force restructure. It would allow smooth transfer of units from active to reserve components as part of force restructure and provide the ability to work within congressionally authorized total force fiscal year end strength limits to conduct contingency operations directed by the President.

Section 105

Substitutes a new 10 U.S.C. § 630 that would retain existing provisions of section 630 that allow for discharge of regular officers with less than five years active commissioned service, but adds a new provision, that would permit the Secretary of the military department concerned to involuntarily release from active duty and transfer to the Ready Reserve any regular officer with less than eight years of active commissioned service, who has remaining obligated service, whether that obligation is pursuant to law (10 U.S.C. § 651) or service regulations. Assuming the officer is otherwise qualified, he or she shall be tendered a reserve appointment. Any officer who declines the tenured reserve appointment will be transferred to the reserve component in an enlisted status under existing provisions of law.

Existing statute provides no option, short of discharge, for the Secretary concerned to direct the release of a regular officer from active duty and to then utilize the officer in the reserve component for any remaining service obligation. The Secretary must *discharge* a regular officer or retain the officer on active duty, even though the officer's skills may be "excess" to active duty requirements and in short supply in the reserve component.

Subsection (d) of the revised section 630 specifies that this section does not apply to officers separated "for cause" pursuant to Chapter 60, nor to officers in the grade of captain, or lieutenant (senior grade) in the Navy, who are discharged for failure of promotion under section 632 of title 10.

Section 106

Adds 10 U.S.C. § 3583, 5509 and 8583 so as to permit the Secretary of the military department concerned to authorize an officer retired in a grade below the highest grade held on active duty, pursuant to 10 U.S.C. § 1370(a)(2), to retain the rank and insignia of grade of the highest grade in which the officer served on active duty satisfactorily for a period of at least 18 months. An officer who is allowed to retain the rank and insignia of the higher grade pursuant to the authority of this section shall, for all purposes of law other than computation of retired pay, be considered to have retired in the higher grade.

Current law requires that officers selected for promotion to the grade of lieutenant colonel or commander and above, serve a full three years in grade before being allowed to retire in that pay grade. Officers who voluntarily retire prior to completion of the required time-in-grade must retire in the next lower grade. Allowing an officer to retire voluntarily at the pay scale applicable to the lower grade, but to retain the insignia of the higher grade and the nonfinancial deference accorded the higher grade in professional associations, would serve to eliminate any stigma, and encourage additional retirements without increasing retirement costs.

Section 107

Authorizes involuntary retirements of regular Navy officers designated for limited duty (LDOs) who are serving in the grades of commander and captain. Under this section, a commander not on a promotion list for captain, would be required to retire upon completion of 35 years of active naval service or the second failure of selection for promotion to the grade of captain, whichever occurred first. A captain would be required to retire upon completion of 38 years of active naval service.

Mandatory retirement of LDO commanders and captains are now governed by the same provisions that apply to non-LDO's in the same grade, 10 U.S.C. § 633 and 634. Those provisions require the retirement of a commander who is not on a promotion list when the officer completes 28 years of active commissioned service and of a captain on completion of 30 years of active commissioned service. In the case of the LDO community, retaining officers until those service points significantly restricts promotion flow points for more junior officers compared to flow points under a system that required separation following the second failure of selection for captain or a shorter term of service.

Section 108

Amends 10 U.S.C. § 611(a) to allow the Secretary of Defense to waive the requirement in existing law to convene a selection board to recommend officers for promotion to captain or lieutenant (senior grade), whenever the determination required by 10 U.S.C. § 622 reveals that the number of officers which should be recommended to meet projected vacancies in the grade and competitive category, is greater than or equal to, the number of officers eligible to be considered by the prospective selection board. Officers in the prospective zone of consideration would be considered for promotion under service regulations.

Also amends 10 U.S.C. § 624(a) to require that the names of officers approved for promotion under the waiver authority of the Secretary of Defense (as described above) be placed on a promotion list for the competitive category in order of seniority consistently with the existing statutory requirement for officers recommended for promotion by a selection board convened in accordance with 10 U.S.C. § 611(a).

Also amends 10 U.S.C. § 631 to add the provision that an officer who is considered for promotion under the waiver authority specified in subsection 213(a) of the bill, but whose name is not placed on the promotion list as required by subsection 213(b) of the bill, shall be considered to have failed of selection for promotion.

A board to select officers for promotion from lieutenant (lieutenant (junior grade) in the Navy) to captain (lieutenant (senior grade) in the Navy) is not appropriate in those competitive categories where constructive service credit is awarded and the promotion process is "fully qualified." Consideration for promotion to this junior grade in some categories (e.g., Chaplains) is essentially noncompetitive (i.e., "fully qualified") and occurs normally within three to six months of entry on active duty. Allowing the Secretary of Defense the option to utilize a board to select officers for promotion to captain (lieutenant (senior grade) in the Navy) would improve the effectiveness and efficiency of force management for professional branch officers.

Section 109

Authorizes the expenditure of appropriated funds to pay the meal and lodging expenses of members who are directed to reside at a location other than their normal duty location, but within the limits of the duty station. Such duty, performed within the limits of the duty station, does not fall within the provisions of 37 U.S.C. § 404 Code, as the members are not considered away from the permanent duty station. Therefore, the expenses associated with such duty are not reimbursable.

The proposal would amend 37 U.S.C. § 408 by adding a new subsection (b) that would authorize joint travel regulations to permit an entitlement to travel and transportation allowances under 37 U.S.C. § 404 when ordered to perform duty at a location within the normal limits of the duty station but at a location where the member would be away from his or her residence or duty location for a period of time that would require overnight accommodations.

Section 110

Replaces the fixed numerical limits on the number of personnel in pay grades E-8 through E-9 who may be on active duty as of the end of any fiscal year by substituting force structure requirements as adjusted within funding availability in the defense appropriation act or continuing resolution for that fiscal year. Also repeals 10 U.S.C. § 517, which provides the fixed numerical limits.

TITLE II—ACQUISITION

Section 201

Amends 10 U.S.C. 2306(h) and repeals section 9021 of P.L. 101-165, to eliminate certain requirements that must be met before entering into a multiyear contract. Current law requires that multiyear candidates meet certain criteria prior to forwarding them to Congress for approval. Among these criteria is a requirement that the multiyear achieve a 10 percent savings over current negotiated contracts or over annual contracts. This requirement could result in the Department of Defense missing opportunities to realize significant savings simply because the arbitrary percentage threshold is not met. Section 201 will enable the Department to take greater advantage of potential savings and thereby promote greater program stability.

Section 202

Furthers the recommendations of the Defense Management Review that the Department of Defense place greater reliance on commercial products and commercial-style procurement practices. This section authorizes the head of an agency to use simplified commercial-style procurement procedures for the acquisition of commercial products. These procedures will place greater emphasis on the use of product descriptions rather than detailed specifications. Procurements

using these procedures will be further streamlined by requiring that a product have achieved commercial acceptance in order to compete as a commercial product. However, products that have been supplied under recent or current contracts for the same agency requirements may also be considered if such products otherwise meet the criteria that commercial products must meet and are evaluated on an equal basis with the commercial products. These procedures will enable contracting officers to avoid using detailed specifications and having to conduct extensive source reviews and product tests and evaluations. This section also will permit selecting products on the basis of the greatest benefit to the agency. This section would make inapplicable to the purchase of commercial products provisions of law that relate generally to source preferences and unique contract requirements if they are not equally applicable to contracts to which the United States Government is not a party. It is not the intent of this section to affect or impair existing authorties with respect to the required use of GSA as a source of supply. These are provisions that frequently prohibit or discourage many sellers of commercial products from competing for Government contracts. Finally, this section would establish in the Department of Defense a three year pilot program at components designated by the Secretary of Defense for the filing of protests by interested parties in connection with the acquisition of commercial products with an official designated to hear protests. During the period of the pilot program, this procedure shall be the sole administrative remedy available to interested parties.

Section 203

Repeals the commercial pricing certification requirement imposed by 10 U.S.C. 2323 (Public Law 98-525) as amended by section 926 of the Defense Acquisition Improvement Act (Public Law 99-500). Section 2323 requires the Department of Defense to obtain a certification from contractors that the Government is receiving the lowest commercial price for spare and repair parts procured using other than competitive procedures. The commercial pricing certification requirement is not cost-effective and its continued use imposes a burden on the procurement process without a beneficial return.

Section 204

Amends 10 U.S.C. 2305 (b)(4) to authorize the Department of Defense to evaluate competitive proposals and award a contract without discussions to the offeror whose proposal represents the greatest benefit to the Government based upon the evaluation factors set out in the solicitation.

The Competition in Contracting Act permits award of a contract without discussions only if, among other requirements, it is demonstrated that award of an initial proposal would result in the lowest overall cost to the Government. Recent GAO cases have interpreted this to mean that award can be made without discussions only to the lowest priced acceptable offeror.

In solicitations where an offeror other than the low offeror clearly provides the best technical proposal at a reasonable price, it is in the Government's best interest to award to that offeror. A round of discussions will not significantly improve the superior proposal, but will only result in unnecessary and potentially multiple requests for best and final offers and additional costs to the offerors and to the Government.

Section 205

Amends title 10, United States Code, and the Federal Property and Administrative Services Act to exempt small purchases from certain socio-economic provisions, and amends various socio-economic statutes to remove specific dollar thresholds in favor of language establishing a uniform threshold for their application at the small purchase threshold in section 2303 of title 10, United States Code or in section 303(g)(2) of the Federal Property and Administrative Services Act of 1949 for agencies other than those subject to title 10. The Armed Services Procurement Act of 1947 and the Federal Property and Administration Services Act of 1949 initially authorized small purchase procedures for procurements up to $1,000. Over the years, these Acts were amended to raise the small purchase threshold to $2,500, $10,000, and subsequently $25,000. Threshold adjustments reflected Congress' recognition of the impact of inflation on low dollar value purchases. Also over the years, Congress enacted legislation, generally outside of the major procurement statutes, which nonetheless imposed significant requirements on government acquisition. These statutes were frequently drafted so as to have little or no application to small purchases setting a "floor" in terms of contract dollar value at the existing statutory "ceiling" for small purchases. Although the "ceiling" for small purchases was regularly adjusted to account for the declining purchasing power of the dolar, the "floors" for applying other statutory requirements did not keep pace. Procedures originally intended to expedite the economic acquisition of low dollar value items and services are now subject to a wide array of relatively complex and costly administrative steps, solicitation provisions, and contract clauses.

Section 206

Amends section 25 of the Office of Federal Procurement Policy Act, as amended by P.L. 100-679 (41 U.S.C. 421), to permit designation in the Department of Defense of an official at an organizational level not lower than an Assistant Secretary of Defense within the Office of the Under Secretary of Defense for Acquisition to serve on and attend meetings of the Federal Acquisition Regulatory Council. By law, only the USD(A) may be designated by the Secretary of Defense to serve on the FAR Council. This places the USD(A) in the unworkable position of having to attend all sessions of the Federal Acquisition Regulatory Council. With the other extensive responsibilities of the USD(A), this may result in DoD not being represented at a large number of Council meetings and could serve to unreasonably delay the issuance of needed policies and procedures. The other agency members of the FAR Council are not faced with a similar problem since those agencies were authorized to designate their Procurement Executives or serve on the Council.

Section 207

Amends 10 U.S.C. 2438 to require a cost benefit analysis before undertaking dual sourcing for major programs and subsystems. Currently, section 2438 assumes that dual sourcing is appropriate for most major systems and subsystems and requires detailed justification when dual sourcing is not considered appropriate. Dual sourcing decisions should be made on a case-by-case basis, with detailed consideration of cost and other factors. Any unit cost savings times the number of units to be procured competitively should be sufficient to amortize the costs associated with dual sourcing. These costs include facility costs, shorter production runs, lower production rates, duplicative qualification costs, "educational buys," and the costs associated with technology transfer. This amendment recognizes the fact that the dual sourcing decision is a complex one and that dual sourcing is not suited to every major program. The change retains a preference for dual sourcing, but allows the Secretary of Defense more flexibility in reaching a decision on this issue.

Section 208

Revises the threshold for the mandatory submission of certified cost or pricing data, established under the Truth in Negotiations Act, from $100,000 to $500,000 (10 U.S.C. 2306a). Submission of certified cost and pricing data is required for contracts, modifications, and subcontracts, over the stated threshold, except when the price agreed upon is based on: adequate price competition; established catalog or market prices of commercial items, or, law or regulation. The current threshold should be escalated to reflect inflation. In addition, raising the threshold will significantly reduce the paperwork burden on the government and on contractors, and will be consistent with the threshold for Cost Accounting Standards, that was raised to $500,000 in 1988.

Section 209

Repeals the exception to 10 U.S.C. 7299a(d) that requires that short-term repair work (6 months or less) on ships assigned to the Naval Reserve Force that are homeported on the West Coast be competed without regard to area. This is an exception to the general provisions of section 7299a(d) that permit limited area for competition if adequate competition is available in that area. The proposal would repeal the exception to the general provision thereby affording the Secretary of the Navy the authority to permit short-term repairs to be solicited only in the homeport area unless inadequate competition exists, in which case the solicitation would be expanded to include the next adjacent homeport area.

Section 210

Repeals 10 U.S.C. 7313 that requires that the Secretary of the Navy ensure, prior to award of a project for repair, alteration, overhaul, or conversion of a naval vessel following competition between public and private shipyards, that the certain criteria must be met. The bid of the public shipyard must include (a) the full cost to the United States associated with future retirement benefits of civilian employees of that shipyard consistent with computation methodology established by the Office of Management and Budget Circular A-76 and (b) in a case in which equal access to the Navy supply system is not allowed to public and private shipyards, a pro rata share of the costs to the Navy supply system. Costs applicable to oversight of the contract by the appropriate Navy Supervisor of Shipbuilding, Conversion and Repair must be added to the bid of any private shipyard for the purpose of comparability analysis. The award is required to be made using the results of the comparability analysis. Repeal of the provision would allow the Navy to follow the intricate methodology worked out with Congress since the inception of the public/private competition program.

Section 211

Repeals a provision of the Department of Defense Appropriations Act, 1990 which provides that the Department of the Navy

may use no funds in the fiscal year 1990 Appropriations Act to enter into contracts for the overhaul, repair or maintenance of any naval vessel homeported on the West Coast of the United States which includes charges for "interport differential" as an evaluation factor for award. Repeal of the provision would make 10 U.S.C. 7299a(c) the controlling provision. This section requires the Secretary of the Navy, in determining the cost or price of work to be performed in an area outside the homeport of the vessel, to consider foreseeable costs of moving the vessel and its crew from the homeport to the outside and from the outside area back to the homeport of the vessel after completion of the contract.

Section 212

Repeals 10 U.S.C. 2464 which restricts the acquisition of "core logistics functions" by commercial contracts. This provision of law is no longer necessary as adequate procedures have been developed by the military services and are in place to determine the applicability of performing depot maintenance functions organically or by contract.

Section 213

Repeals 10 U.S.C. 2465 and 10 U.S.C. 2466, pertaining to the performance by contractors of so-called "commercial activities" for the Government. Section 2465 bars the use of appropriated funds to acquire fire fighting and security guard services for military installation. Section 2466, as recently by section 313 of the 1990 National Defense Authorization Act, bars the Army and Air Force from competing depot maintenance tasks among Government activities and private contractors.

Section 214

Creates an exception to the prohibition in 1 U.S.C. 2324(e)(1)(M) regarding payment of the costs of severance pay paid to foreign nationals employed by Government service contractors outside the United States. Currently such costs are unallowable to the extent that they "exceed the amount in the industry involved under the customary or prevailing practice for firms in that industry performing similar services in the United States . . ."

The proposed exception in the nature of a proviso at the end of the subparagraph would make severance pay paid in orders to comply with local host nation laws governing such payments allowable notwithstanding that such payments ae out of line with the compensation practice of comparable United States firms.

Subsection (b) of section 214 would make clear that the proviso added by this amendment applies not only to contracts entered into after the date of the legislation's enactment, but also to contracts entered into prior to the date of enactment, provided in all events that the costs were incurred by the contractor after the date of enactment.

Section 215

Amends 10 U.S.C. 2208(h) to authorize arsenals and other Army industrial activities to sell supplies, services, or work outside the Department of Defense if the articles to be sold may be incorporated into items to be sold or used in a contract with, or for the purposes of soliciting a contract with a friendly foreign government, or will be used in commercial expendable launch vehicles.

Section 216

Authorizes the military departments and the defense agencies to require contractors to print technical data rather than requiring them to deliver the data as directed by the Government Printing Office for printing. This will reduce the cost of defense procurement of technical data, improve defense data management procedures, and remove one barrier to the use of commercial products by the Department of Defense.

Section 217

Adds a new section 2332 to title 1, United States Code. Subsection (a) would authorize the Secretary of Defense to conduct a pilot program for up to six major defense programs in order to test methods to increase the effectiveness and efficiency of the acquisition process. This section would also permit the Secretary to waive for purposes of the pilot program any provision of law or regulations that he is not otherwise entitled to waive, that is not equally applicable to contracts to which the United States government is not a party and that:

(1) prescribes procedures for the procurement of supplies or services;

(2) prescribes preferences to be given to sources or mandates particular sources;

(3) prescribes requirements to be imposed on contractors that relate to the contractor's performance of the contract, or that

(4) prescribe requirements governing cost allowability, cost accounting, or auditing, except for provisions intended to assure financial integrity for the conduct of government programs. "Assuring financial integrity" involves the determination that the government use of funds is accurately identified and reported.

Subsection (a) also would permit the Secretary to waive any provision of law or regulation that he is not otherwise authorized to waive that prescribes requirements for the management, testing, evaluation of, or reporting on, a program.

Subsection (b) would permit the Secretary to designate up to six major defense acquisition programs, as defined in 10 U.S.C. 2430, for participation in the pilot program.

Subsection (c) would require the Secretary to promulgate regulations to implement the pilot program within 270 days after the date of enactment of this law.

Subsection (d) would require the Secretary of Defense to provide the Congress notice of his intention to designate a major defense acquisition program for inclusion in the pilot program.

Section 218

Amends the Act of March 3, 1931 (the Davis Bacon Act) to raise the threshold for application of the statute to contracts in an amount of $250,000. This will encourage greater participation by small and minority businesses and will reduce the administrative burden on agencies. This section would also permit greater use of entry- and training-level "helpers" by recognizing a semi-skilled helper classification; require separate wage surveys to be conducted for rural and urban areas; prohibit splitting up large contracts to avoid the threshold; move responsibility for debarment of firms or persons violating Davis Bacon from the Comptroller General to the Department of Labor. Finally, this section would significantly reduce the paperwork burden by reducing from weekly to quarterly the required submission of detailed payroll records to the government—at a minimum, three submissions would be required, at the beginning, midpoint, and conclusion of the contract period.

TITLE III—CIVILIAN PERSONNEL

Section 301

Repeals 5 U.S.C. 3326 which generally prevented employment of retired military members within 180 days of their retirement. The 180 day waiting period for retired military members often discourages well qualified and highly trained candidates from competing for civilian positions in the Department of Defense. Elimination of the waiting period will enable DoD to better compete with the private sector for applicants with critical skills.

Section 302

Amends 5 U.S.C. 4301(2) to exclude from system coverage temporaries serving on less than 1 year appointments within the Department of Defense except upon pay change or reemployment. Temporary appointments do not warrant the expenditure of time and resources required by the performance appraisal process. Such coverage overloads administrative systems, drains manpower and increases paperwork.

Section 303

Amends 5 U.S.C. 5724a to provide house-hunting trips to Hawaii and Alaska. This will facilitate recruitment by providing the same relocation benefits to employees transferring to Alaska and Hawaii as to other states.

Section 304

Amends 5 U.S.C. 5742 to include employees or family members assigned in Alaska or Hawaii and employees who have signed mandatory mobility agreements as a condition of employment among those for whom transportation of remains, dependents and effects are authorized. Enactment on this change will remove a deterrent to recruitment for positions in Alaska, Hawaii or under mandatory mobility agreements.

Section 305

Amends 5 U.S.C. 5924 to include the Republic of Panama as a post of assignment for which separate maintenance allowance may be authorized. This will help avoid imposition of unacceptable economic burdens on current and future employees who would otherwise be required to establish and/or maintain a second residence at their own expense where family members may not accompany the employee to Panama or must be evacuated at the direction of the Government.

Section 306

Amends 5 U.S.C. 5942 by providing that the $10 maximum allowance will not apply within DoD and by authorizing the Secretary of Defense to adjust the remote worksite allowance to alleviate deterrents to hiring and retaining employees. This will facilitate hiring and retaining employees and will increase an allowance set almost 20 years ago. The current rate is inadequate to cover the expenses, hardships, and inconveniences associated with assignments on isolated islands or sites in deserts or other areas remote from civilization.

Section 307

Repeals 10 U.S.C. 115(b)(2) which provides that Congress shall authorize civilian personnel end strength for each component of the Department of Defense. These work force floors and ceilings restrict the authority of the Secretary of Defense and the Service Secretaries, and their ability to effectively manage the Department's resources consistent with changing missions and overall personnel requirements.

Section 308

Amends 10 U.S.C. 129. These work force floors and ceilings restrict the authority of the Secretary of Defense and the Service

Secretaries, and their ability to effectively manage the Department's resources consistent with changing missions and overall personnel requirements.

Subsection (a) of amended section 129 deletes the requirement to manage the civilian personnel of the Department of Defense on the basis of authorized end strength and provides that the management of such personnel shall not be subject to any statutory end strength, work year floor or minimum staffing level.

Subsection (b) of amended section 129 deletes the prohibition against military secretary control of the number of or funds available for indirectly funded employees of the Department of Defense.

Subsection (c) of amended section 129 reenacts existing subsection (c)(1). As amended, subsection (c) no longer includes in the definition of "indirectly funded" employees those "whose salary and benefits are funded from sources other than appropriated funds."

Section 309

Repeals 10 U.S.C. 194, 3014(f)(1), 50149(f)(1) and 8014(f)(1) which enacted numerical limits on the numbers of personnel assigned or detailed to management headquarters activities, management headquarters support activities or to Department headquarters staff. These work force floors and ceilings restrict the authority of the Secretary of Defense and the Service Secretaries, and their ability to effectively manage the Department's resources consistent with changing missions and overall personnel requirements.

Section 310

Amends the Demonstration Cities Metropolitan Development Act of 1966, as amended, 42 U.S.C. 3374, to apply to nonappropriated fund employees and to provide employees serving overseas with reemployment rights the same homeowner's assistance benefits that they would have received had they remained with the CONUS-based organization undergoing closure or reduction. Currently, employees serving on overseas tours, accompanied by their dependents, and employees serving overseas 15 months or more after announcement of the closure or reduction in their CONUS organization, are not covered by the homeowners assistance program. This is extremely disruptive to individuals overseas and might deter homeowners from accepting overseas assignments if there is the potential that their CONUS organization might undergo closure or reduction while they are overseas.

TITLE IV—REAL PROPERTY

Section 401

Amends sections 204 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 485) to permit the Department of Defense to receive half of the revenues generated by the sale of excess real property under the control of the Department. Under the proposal, the Administrator would deposit half of the net proceeds into a special account of the Department of Defense in the manner and to the extent provided in an appropriation act. Currently, section 204 requires that these revenues be deposited into the Treasury as miscellaneous receipts. Section 204, as amended, would provide a strong incentive for managers of real property under the control of the Department of Defense to examine the long-term requirements for land and determine if certain parcels are necessary for the nation's military strategy or could be declared excess for sale.

Section 402

Amends 10 U.S.C. 2667 to permit the Secretary of a military department to retain half of the net proceeds received as rent for leases of property under the control of the Department. Under the proposal, the authority of the Secretary concerned to retain or to expend such proceeds would be exercised in the manner and to the extent provided in an appropriation act. Currently, section 2667 requires that his money be deposited into the Treasury as miscellaneous receipts, except for rent received under a lease for agricultural or grazing purposes. Section 2667, as amended, would encourage installation commanders and other real property managers within a military department to examine their immediate land use requirements with a view to increasing the use of leases where deemed appropriate.●

By Mr. SIMON (for himself, Mr. METZENBAUM, and Mr. KENNEDY):

S. 2442. A bill to amend the Occupational Safety and Health Act of 1970 to expand the rights to victims of occupational safety and health hazards, and for other purposes; to the Committee on Labor and Human Resources.

OCCUPATIONAL SAFETY AND HEALTH HAZARDS VICTIMS RIGHTS ACT

● Mr. SIMON. Mr. President, a year ago I was in Chicago to meet several people who in recent years had family members killed in job-related accidents. The meeting was coordinated by the National Safe Workplace Institute, a Chicago not-for-profit research and education organization. What I experienced during the course of that meeting will stay with me for the rest of my life.

At the meeting, my constituents revealed a breakdown in the basic process of Government. I learned that the Occupational Safety and Health Administration's [OSHA] procedures had evolved to a point where victims and family members of workers who died or were injured in workplace accidents are left in the dark. They have no rights to information or to participate in the Government decisionmaking process associated with the enforcement or correction of job safety and health violations, even when those violations have led to death or serious injury.

Today, I am proud to be joined by Senator METZENBAUM and Senator KENNEDY in introducing legislation designed to provide victims and their families with the right to participate in the process and to have access to information regarding the OSHA investigations. Under current OSHA procedures, the family members of injured or killed workers are considered disinterested outsiders with no rights or privileges with regard to the procedures of our Government. We must change this unfairness.

Under the status quo, the Government enforcement agency, OSHA, meets with employers charged with potentially serious violations and negotiates remedies. These negotiations almost invariably do not include the participation of the injured workers or their families. Victims feel locked out of the process, and the penalties meted out often amount to a mere slap on the wrist. At the very least we owe victims and their families a right to tell their side of the story. My bill will provide that right.

Victims of workplace accidents and their families suffer enough from the accident itself. They should not be victimized and traumatized again by the agency of Government investigating the accident.

Examples of this unfairness come from all over the country:

Lee and Mary Doyle of Bloomington, IL. The Doyles lost their only son Tim, when he was electrocuted in a workplace accident. Lee Doyle phoned the OSHA area office in Peoria after Tim's death asking for a copy of the citation. Lee Doyle was told that such information "was none of his business." Last year the National Safe Workplace Institute drafted a Freedom of Information Act request for Mr. and Mrs. Doyle to help them get a copy of the citation. OSHA then wrote the Doyles and told them that they could have a copy of the citation—but there was a catch. The Doyles were told that they would have to first agree to pay search and copy fees that could amount to $50 before OSHA would give them the documents.

The "Bastian Plating" families, Auburn, IN. In 1988, the worst factory accident in the history of OSHA felled five young men, aged 19 to 29, at Bastian Plating in Auburn, IN. The tragic accident shocked Auburn, the people of Indiana and those who believed that American workplaces were safe. This horrible tragedy demonstrated that work in the United States can still be far too dangerous. The families filed a petition for a party status with Indiana OSHA. The outrageous nature of this tragedy demanded special compassion for the families. The request, however, was dismissed in a single sentence: "After checking the act very carefully it is apparent that we cannot grant this special request for party status."

Heidi Yantes of Mantua, UT. Heidi Yantes' husband Bryan was killed in 1988 in an accident at a steel processing facility in Brigham City. Her husband was tragically crushed to death. Bryan Yantes, 27, was killed in an accident similar to one that killed Jan Gray, 25, just 6 months before at the same facility. Utah OSHA did not cite the employer in Jan Gray's death, even though some independent accounts indicated clear safety violations. This time, Utah OSHA issued a citation involving serious violations, but imposed a paltry $560 fine. The

story did not end there. Just a few months ago, Heidi insisted upon seeing a copy of the citation. After initial reluctance, the Utah OSHA official gave her the document. Much to her dismay, Heidi read that the citation had been deleted following a meeting between Utah OSHA and the employer's attorney. In Heidi Yantes' view, a very modest Government enforcement action stemming from a tragedy had been transformed into a nonevent, without even an opportunity for her family's point of view to be represented.

In all three cases, serious violations of the Occupational Safety and Health Act had been alleged against an employer. In all three cases, one or more workers had died. Yet, our Government chose to disregard the most fundamental right to information for aggrieved family members, treating them as if they were disinterested bystanders. Mr. President, that is unacceptable.

Last year, the National Safe Workplace Institute undertook a survey of 208 families in all 50 States who had lost a family member to a workplace accident in recent years. The Institute wanted to learn about two issues. First, the Institute wanted to know what surviving families thought of OSHA and, second, if such families would exercise rights to participate if granted the opportunity.

The findings with respect to OSHA were: 93 percent of the surviving families said that they believed that OSHA should explain its procedures; 86 percent said that they should have the right to meet with OSHA before the investigation files are closed; 70 percent said that they had no idea what OSHA was doing in their case; and 49 percent said that they had not seen the citation or investigative report—37 percent said that they did not know they could have access to this information and 20 percent who had the report, had to pay to receive it.

The findings with respect to their rights were: 98 percent said that they should know when and if OSHA was meeting with employers; 86 percent said that they should have a right to meet with OSHA before the investigative file was closed; and only 2 percent said they would not attend such meetings if they had the right.

The Institute also made an appraisal of how much time it took for OSHA to provide a copy of the citation, when this information was requested. The average time that it took to receive the information was in excess of 8 months following the accident. This is for a Government document that is typically mailed to an employer within 10 days of such an investigation.

In reading the comments on the survey forms, it becomes clear that governmental disregard for the rights of victims has caused a great deal of disenchantment. Many victims of workplace accidents are angry and bitter toward our Government. When one multiplies these sentiments by the number of workers killed or seriously injured in recent years, it is easy to come to the conclusion that such decisions only weaken the respect and expectations that citizens have for government.

The legislation that I am introducing is not being offered as a criticism of the current administration. Indeed, Secretary of Labor Elizabeth Dole and Assistant Secretary for Occupational Safety and Health Gerald Scannell are sympathetic to injured workers and their family members. Secretary Dole and Mr. Scannell have provided leadership that has boosted the moral of OSHA employees after years of neglect. Mr. Scannell recently demonstrated his commitment to workplace safety, when upon hearing of the Phillips Petroleum explosion and fire, he left for Houston to supervise the inspection and to meet with family members of dead, injured, and missing workers. His actions were commendable.

Much to their credit, Secretary Dole and Mr. Scannell have indicated to me that they will use their administrative authority to implement many of the rights that this bill would enact into law. I commend them for this wise, humane, and just decision. We must also recognize, however, that unless the law itself is amended, OSHA policy changes made today may be changed again tomorrow. Similarly, nothing done by Secretary Dole or Mr. Scannell will have any bearing on decisions made by State governments in States that have the regulatory authority for occupational safety and health. It is clear that the most meaningful, comprehensive, and just remedy is Federal legislation.

Mr. President, the legislation that I propose today is simple. It would grant surviving family members and injured workers with a right to a precitation briefing by OSHA, a right to participate as parties in hearings conducted pursuant to the Occupational Safety and Health Act, a right to participate as part of a settlement agreement, and the right to copies of the citation and investigative report free of charge. I am hopeful that the Department of Labor will fully embrace this legislation and support its enactment into law. To continue to deprive aggrieved families of basic rights is both intolerable and unjust, and I trust that this body will move to remedy this defect in our law.

Mr. President, I ask unanimous consent that the text of the bill be included in the RECORD at the conclusion of this statement.

There bring no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2442

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Occupational Safety and Health Hazards Victims' Rights Act".

SEC. 2. PURPOSES.

It is the purpose of this Act—

(1) to ensure that victims of workplace accidents and conditions are informed about inspections and investigations relating to the circumstances of their accidents or exposure to chemicals or products that led to disease;

(2) to provide victims of workplace accidents and disease an opportunity to participate in proceedings relating to the circumstances of their accidents and disease; and

(3) to ensure that injured and diseased employees and their family members are accorded the consideration and respect due to them.

SEC. 3. OCCUPATIONAL SAFETY AND HEALTH HAZARDS VICTIMS' RIGHTS.

The Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) is amended—

(1) by redesignating sections 28 through 33 as sections 29 through 34, respectively; and

(2) by inserting after section 27 the following new section:

"SEC. 28. OCCUPATIONAL SAFETY AND HEALTH HAZARDS VICTIMS' RIGHTS.

"(a) DEFINITIONS.—As used in this section:

"(1) ACCIDENT.—The term 'accident' means the circumstances relating to the death, injury, or illness of an employee.

"(2) FAMILY MEMBER.—

"(A) IN GENERAL.—The term 'family member' may include a parent, legal guardian, spouse, brother, sister, or child of an employee.

"(B) NO FAMILY MEMBER.—In a case in which a family member cannot be identified and a deceased employee has no legal representative, the Secretary may grant 'family member' status to any interested coemployee or acquaintance of the deceased employee.

"(3) VICTIM.—The term 'victim' means—

"(A) an employee who has sustained an injury or suffered an illness as a result of an accident or condition that results in an inspection or investigation conducted under section 8; or

"(B) a family member of an employee, if—

"(i) the employee is killed as a result of an accident or condition that results in an inspection or investigation conducted under section 8; or

"(ii) the employee sustains an injury as a result of an accident or condition that results in an inspection or investigation conducted under section 8, and the employee cannot reasonably exercise the rights of the employee under this section.

"(b) VICTIMS' RIGHTS.—Notwithstanding any other provision of law, on request, a victim shall be afforded the right (with respect to an injury, illness, or death involving the victim) to—

"(1) meet with the Secretary relating to the death, injury, or illness of an employee prior to the issuance of a citation, or report of an action, as the result of an inspection or investigation conducted under section 8;

"(2) receive, at no cost, a copy of the citation or report at the time of issuance;

"(3) appear, participate in, and make a statement as part of any settlement discus-

sions between the Secretary and the employer; and

"(4) appear and participate as a party at all proceedings conducted under section 10.

"(c) VICTIMS' ACCESS TO INFORMATION AND DOCUMENTS.—

"(1) IN GENERAL.—A victim shall have the right to obtain, at no cost and within a reasonable period of time, all public documents relating to an inspection or investigation by the Secretary into an accident resulting in the death, injury, or illness of an employee.

"(2) WAIVER OF WITNESS CONFIDENTIALITY.—If a witness is interviewed as part of an inspection or investigation conducted under this Act, the Secretary shall provide the witness with a form on which the witness shall indicate—

"(A) the willingness of the witness to waive confidentiality to victims; or

"(B) the unwillingness of the witness to waive confidentiality to victims.

"(d) REMEDIES.—On a violation of this section, in addition to any other remedies that might be available to a victim under Federal or State law, a victim shall be entitled to—

"(1) declaratory relief;

"(2) injunctive relief;

"(3) any costs incurred by the victim in securing the documents referred to in subsections (b)(2) and (c); and

"(4) reasonable attorney fees and costs.

"(e) NOTIFICATION.—The Secretary shall take reasonable actions to inform victims of their rights under this section.".

SEC. 4. CONFORMING AMENDMENT.

Section 10(c) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 659(c)) is amended by adding at the end the following new sentence: "A victim shall have the opportunity to participate in a proceeding conducted under this section in accordance with section 28.".

SEC. 5. EFFECTIVE DATE.

This Act and the amendments made by this Act shall—

(1) become effective on the date of enactment of this Act; and

(2) apply to all investigations and proceedings pending or conducted on or after such date.●

By Mr. ARMSTRONG (for himself and Mr. BURNS):

S. 2443. A bill to amend the Internal Revenue Code of 1986 to provide that the rate of interest on overpayments and underpayments of tax be the same; to the Committee on Finance.

RELATING TO INTEREST RATES TAXES

● Mr. ARMSTRONG. Mr. President, imagine you are walking down the steps of the Tax Court, finally victorious after a 4-year running battle with the Internal Revenue Service over a $10,000 claim against you for additional taxes owed. The judge in the case ruled in your favor, the IRS was wrong all along.

As you reach the bottom of the steps, you shake hands with your lawyer and he hands you his final bill for $8,000. Out of no fault of your own as the court has decided, the Federal Government through its agent, the IRS, has caused you to lose $8,000, not to mention months and years of worry.

Under current law, you may recover reasonable litigation and administration costs, such as professional fees, court costs, et cetera, incurred in defending yourself but only if you prevail in the case and if you can prove the IRS "was not substantially justified" in pressing its case. Not only is the burden of proof on you as the taxpayer, but you have a very murky standard to meet in order to recover your costs.

The facts are, the IRS claimed you owed additional tax, the Tax Court ruled in your favor, and you're out $8,000. Whether the IRS thought it had a good case or not is completely irrelevant. You have suffered a financial loss at the hands of the Government and you should be entitled to recover the full $8,000.

The Senate recognized the inequity in this situation when it shifted the burden of proof to the IRS as part of the Technical and Miscellaneous Revenue Act of 1988. Under the Senate's provision, the IRS was required to prove its position was substantially justified. This provision in the Senate's bill was dropped in conference.

I believe it only fair for a taxpayer to be compensated to the extent he incurs costs in successfully defending himself against claims of the IRS. While the Senate's position in 1988 was an improvement over current law, I believe it missed a basic principle. Whether the IRS was substantially justified and whoever is tasked with proving justification is irrelevent to the fact the taxpayer has suffered a financial loss at the hands of the Government through no fault of his or her own.

This situation is unfair and unacceptable. Therefore, I am introducing legislation with a single purpose: to remove the standard of "substantially justified" and replace it with the simple rule that if the taxpayer prevails in a tax dispute with the IRS, then the taxpayer may recover the costs of defending himself.●

By Mr. MACK (for himself, Mr. GRAHAM, Mr. GRAMM, Mr. LIEBERMAN, Mr. KASTEN, Mr. DECONCINI, Mr. MCCAIN, Mr. PRESSLER, Mr. HUMPHREY, Mr. GORTON):

S. 2444. A bill to require limitations and restrictions concerning trade and other transactions with Cuba; to the Committee on Foreign Relations.

FREEDOM AND DEMOCRACY IN CUBA ACT

● Mr. MACK. Mr. President, I am proud to introduce, on behalf of myself and the other cochairmen of the Senate Cuba Freedom Caucus, Senators GRAHAM, GRAMM, and LIEBERMAN, the Freedom and Democracy in Cuba Act of 1990. I am pleased to add Senators KASTEN, DECONCINI, MCCAIN, PRESSLER, HUMPHREY, and GORTON as original cosponsors of the bill.

Armando Valladeres, author of "Against All Hope," survivor of Castro's prisons, and now U.S. Ambassador to the United Nations Human Rights Commission in Geneva called Fidel Castro the "Ceaucescu of the Caribbean." Tragically, I believe the label is appropriate.

We do not know how or when the end of Fidel Castro's 31 years of dictatorship will come. What we do know is that we in the free world have the responsibility to do what we can for those who still live under tyranny. In his stirring speech to a joint session of Congress this year, President Vaclav Havel of Czechoslovakia quoted our President Lincoln's reference to the "family of man".

With the collapse of communism throughout the world proceeding at a breathtaking pace, we should have every hope that the free world will have the opportunity to create a true "family of man". Fidel Castro's Cuba is now the one glaring exception in our hemisphere to this hopeful wave of freedom.

The purpose of the Freedom and Democracy in Cuba Act of 1990 is to turn up the economic pressure on Fidel Castro to allow the people of Cuba to speak their will in free elections. We have few illusions that Castro will willingly take this course. But we know the Communist tyrannies have not fallen because their leaders have suddenly had a change of heart, but because the system has effectively collapsed from underneath them.

The bill, combined with the images of freedom broadcast into Cuba by TV Marti, will have a material effect on Fidel Castro's ability to maintain his regime. I would like to commend President Bush for his excellent speech to the National Association of Broadcasters in which he eloquently articulated the responsibility of the United States to convey the message of freedom to Cuba through TV Marti.

Mr. President, I ask unanimous consent that the Freedom and Democracy in Cuba Act of 1990 be printed in the RECORD at this point, along with a section-by-section analysis of the bill, and excerpts from President Bush's remarks on TV Marti.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2444

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PROHIBITION ON CERTAIN TRANSACTIONS BETWEEN CERTAIN UNITED STATES FIRMS AND CUBA.

Notwithstanding any other provision of law, no license may be issued for any transaction described in section 515.559 of title 31, Code of Federal Regulations, as in effect on July 1, 1989.

SEC. 2. FORFEITURE OF VESSELS WHICH ENTER CUBAN PORTS TO ENGAGE IN TRADE AND SUBSEQUENTLY ENTER UNITED STATES PORTS.

(a) IN GENERAL.—

(1) A vessel under paragraph (2) shall be subject to seizure, forfeiture, and sale by the United States.

(2) A vessel which enters a port or place in Cuba to engage in trade more than 60 days after the date of enactment of this Act and within 180 days of departure from such port or place in Cuba enters a port or place in the United States to engage in trade shall be subject to the provisions of paragraph (1).

(b) DEFINITIONS.—For purposes of this section—

(1) the term "vessel"—

(A) does not include vessels not documented under the laws of the United States; and

(B) includes every description of water craft or other contrivance used, or capable of being used, as a means of transportation, in water, but does not include aircraft; and

(2) the term "United States" includes all territories and possessions of the United States.

SEC. 3. REDUCTION OF ASSISTANCE TO COUNTRIES WHICH IMPORT SUGAR FROM CUBA.

(a) REDUCTION OF ASSISTANCE BY VALUE OF SUGAR IMPORTS FROM CUBA.—Beginning October 1, 1991, the President shall have the authority to withhold from the amount of assistance under chapter 4 of part II of the Foreign Assistance Act of 1961 (relating to the economic support fund) which is allocated to a country for a fiscal year the amount equal to the value of confirmed sales of sugar which is the product of Cuba and which is imported by that country in the preceding fiscal year.

(b) REDUCTIONS TO BE MADE NOTWITHSTANDING EARMARKINGS.—The withholding of amounts under subsection (a) may be made notwithstanding any provision of law specifying the amount of assistance to be provided to a particular country.

(c) SENSE OF CONGRESS WITH RESPECT TO OTHER COUNTRIES.—It is the sense of the Congress that the President should urge countries that import sugar which is the product of Cuba and do not receive economic support fund assistance or other forms of foreign assistance from the United States to import sugar from other Central American or Caribbean countries with democratically elected governments.

SEC. 4. PENALTIES UNDER THE TRADING WITH THE ENEMY ACT.

Section 15 of the Trading With the Enemy Act (50 U.S.C. App. 15) is amended by adding at the end thereof the following: "The Secretary of the Treasury may impose a civil penalty of not more than $50,000 on any person who violates any license, order, rule, or regulation issued in compliance with the provisions of this Act.".

SECTION-BY-SECTION ANALYSIS OF THE FREEDOM AND DEMOCRACY IN CUBA ACT OF 1990

SECTION 1: RESTORING CUBAN EMBARGO

This language passed in the Senate 82 to 13 on July 20, 1989. It would apply the U.S. embargo on Cuba to "American owned or controlled" subsidiaries in foreign countries. From 1963 to 1975, the embargo did apply to U.S. subsidiaries. U.S. embargoes on North Korea, Vietnam, and Cambodia currently apply to subsidiaries.

U.S. foreign subsidiaries now to about $300 million/year in trade with Cuba.

Total value of licensed imports and exports

1982	253,000,000
1983	142,000,000
1984	275,000,000
1985	288,000,000
1986	354,000,000
1987	243,000,000
Total 1982 to 1987	1,555,000,000

Source: Office of Foreign Assets Control—Treasury Department.

TOP TRADERS WITH CUBA UNDER THE SUBSIDIARIES EXCEPTION

[In millions of dollars]

	5-year total	Fiscal year 1987
United Kingdom	480	109
Switzerland	239	57
Canada	211	26
Argentina	103	75

Under this exception to the embargo the U.S. has received 1,279 license requests (1982-87), of which 1,242 were approved.

SECTION 2: SHIPPING PROVISION

This provision prohibits any non-U.S. flag vessel that lands in Cuba for the purposes of trade from entering a U.S. port for 6 months. This section, like section 1, restores a part of the Cuban embargo which was lifted in 1975.

Cuba's foreign trade represents about 50% of its GDP. If ships landing in Cuba could not carry U.S. goods on return trips, Cuba's shipping costs could more than double.

SECTION 3: CUBAN SUGAR

This provision passed the House Foreign Affairs Committee in similar form in 1987. It grants authority to the President to withhold economic support funds to any country that buys Cuban sugar, up to the value of such purchases in the preceding fiscal year. Assistance may be withheld notwithstanding earmarks.

The assistance would not be reduced but withheld, pending an agreement with that nation not to buy Cuban sugar. This is similar to provisions the Congress has enacted regarding South African goods.

The provision also includes Sense of Congress language encouraging the President to urge nations that do not receive U.S. economic support funds to "import sugar from other Central American or Carribean countries with democratically-elected governments."

In addition to curbing an important source of income to the Castro government, the provision would help Latin democracies who are seeking to increase their sugar exports.

Countries that purchased Cuban sugar in 1989 and receive U.S. foreign aid include Egypt, Colombia, Peru, and Tunisia.

SECTION 4: CIVIL PENALTIES

This provision fulfills a Treasury Department request to have authority to impose up to $50,000 in civil penalties for violations of the embargo. The Treasury Department also wanted to increase existing criminal penalties, but this language was not included.

EXCERPT OF REMARKS BY THE PRESIDENT TO THE NATIONAL ASSOCIATION OF BROADCASTERS

Last May, I discussed the future of Europe with the citizens of Mainz, a German city nestled in the green hills along the Rhine River. And it was while I was there that I appreciated anew the Biblical expression, "In the beginning was the word." For it was in that German town that the inventor of the printing press, Johann Gutenberg, first put the scholarship of the ages into the hands of millions of knowledge-hungry readers.

His one invention made possible all the pamphlets and journals of the Enlightenment and of the American Revolution. From the call to arms of Thomas Paine to the cool logic of the Federalist Papers. You might argue that out of that one invention sprang the very idea called America.

Today, along with the word, we have the image—images projected on cooler television and evoked by the sounds of radio. But while Western democracy broadened, as our knowledge broadened, the circle of democracy and knowledge narrowed under communist regimes that took power on many continents.

For these nations, truth was something to be twisted and stretched by the brutal hands of authority, manipulated beyond recognition. The Czech author, Kundera, calls this time the "kingdom of forgetting." When whole nations almost forgot their heroic histories and finest traditions. From Havana to Prague to Phnom Penh, the peoples of these lands never fully gave into the amnesia because even in the worst hours of repression, they could always count on a friendly voice to remind them of the truth: Radio Marti, Radio Liberty, Radio Free Europe—and, God bless it, the Voice of America.

To fully appreciate what these broadcasts mean, you need only ask someone who listened to them. Sichan Siv, a young man now works on our White House staff, he's a Cambodian. An American who lived through the horrors of the killing fields. And he's told me that when the Khmer Rouge took control of village, the very first items they confiscated were the radios; for if they respected and feared anything, it was the power of free information. But even under the threat of death, men and women like Sichan Siv were so hungry for news from the outside world that they would turn on a hidden transistor radio at the lowest possible volume and then put it up flush to one ear. We take free news broadcasters for granted in America. But some people risked death to hear the truth. And some people still do. And we're not going to let them down.

In the realm of ideas and ideals, there are no borders. No government should fear free speech, whether it's from entertainment programs or accurate, unbiased news about world events. And that is why Congress strongly supported TV Marti and why I strongly support TV Marti. We will scrupulously adhere to the letter of the law; but let me say again, the voice of freedom will not be stilled as long as there is an America to tell the truth. (Applause.)

And, look, I do understand the practical concerns that some of you have about this. But I also understand that you represent the very principle TV Marti exists to serve—that free flow of ideas. Before we are businessmen and women—before we are doctors, lawyers or mechanics—we are Americans. Americans have always stood for free speech, and we always will.

So I have come here to ask something of you. I ask you to stand by your traditions—the best traditions of America. I ask you, once again, to stand for TV Marti and to stand for freedom.

If we broadcast freedom, our message will be heard. After the bloodshed at Tiananmen Square—and the expulsion of the VOA from China—I was heartened to see that Beijing relented a little bit and permitted a VOA correspondent to return. In the Soviet Union, publications that once vilified the Voice of America now praise it. Warm words

of support even come from Izvestia. A commentator in Moscow News thanks VOA and says that it uses—and here is the quote—"our own broadening sources of information better than we do and without delay return to us what they have gathered."

And now Radio Free Europe has bureaus in Warsaw, in Budapest, and VOA even has one in Moscow—an unthinkable development just a few years ago. The very fact that it is no longer considered remarkable for USIA's Worldnet to link live programs from Washington to Kiev, or from Chicago and New York to Gdansk and Warsaw is, in itself, remarkable.

How did this happen? It happened in part because of the power of truth. Czechoslovakia's playwright, President Vaclav Havel, paid a very personal tribute to this power in his recent visit to Washington. First he came to the White House and told me personally what this broadcasting of the truth had meant to those who were fighting for freedom. And then he visited the Voice of America and not the employees of its Czech division. It was a very poignant encounter—for though Havel didn't recognize any of them by face—he knew them all by name the instant he heard them speak.

And it's moments like that that convince me of one sure thing: I am determined that America will continue to bear witness to the truth. America must never lose its voice. (Applause.) Just as President Havel and others who were once under communist domination have thanked us, I am convinced that the people of Cuba will thank us when they, too, win the liberty they yearn for.●

By Mr. BOSCHWITZ (for himself, Mr. DOLE, Mr. LUGAR, Mr. MCCONNELL, Mr. LEAHY, and Mr. HARKIN):

S. 2445. A bill to amend the Food Stamp Act of 1977 to require participating retail food stores and wholesale food concerns to provide their taxpayer identifying numbers to the Secretary; to establish criminal penalties applicable to laundering funds obtained from trafficking in coupons; and for other purposes: to the Committee on the Judiciary.

FOOD STAMP TRAFFICKING PREVENTION AND PENALTY ACT OF 1990

● Mr. BOSCHWITZ. Mr. President, today I am introducing legislation to curb the disturbing problem of food stamp trafficking. I am pleased that Senators DOLE, LUGAR, MCCONNELL, LEAHY, and HARKIN have joined me as cosponsors.

As the senior Republican on the Senate Nutrition Subcommittee, I have been a strong supporter of the Food Stamp Program. After working hard to ensure that food stamp benefits are available to those who need them, I find reports of food stamp trafficking activities quite disturbing.

The Food Stamp Program has lost millions of dollars because food stamps have been illegally traded for drugs, guns, and stolen property. These illegal activities cheat those in need, who the Food Stamp Program was designed to help.

In an effort to help stop this illegal activity, my bill increases the penalty for food stamp traffickers. The maximum penalty would be the same as that for money launderers, a maximum of a $500,000 fine and a 20-year prison sentence. The current maximums are a $10,000 fine and a 5-year prison sentence.

My bill also increases efforts to monitor food stamp traffickers. Approved retailers would be required to report their employer identification number to USDA, and individuals convicted of food stamp trafficking would be subjected to Federal asset seizure and forfeiture.

I urge my colleagues to join me in cosponsoring this important bill.●

By Mr. SIMPSON:

S. 2446. A bill to take measures to improve the employment verification system under the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

EMPLOYER SANCTIONS IMPROVEMENTS AMENDMENTS

Mr. SIMPSON. Mr. President, I rise today to introduce legislation to make the corrections to employer sanctions that the General Accounting Office recently recommended.

On March 29, 1990, GAO determined that a widespread pattern of discrimination has arisen based "substantially" on the enactment and implementation of employer sanctions. I believe that GAO's measure of the discrimination is inaccurate, and that they did not tie what discrimination they did find to the implementation of employer sanctions. Nevertheless, their findings trigger certain expedited procedures in the House and Senate which could lead to a vote, shortly, on whether to retain or repeal employer sanctions.

In hearings before the Senate Subcommittee on Immigration and Refugee Affairs on March 30, 1990, GAO testified that employer sanctions should not be repealed. Instead, GAO believed that increased education of employers, and an improvement in our present worker verification system, would likely alleviate the discrimination that might have arisen because of employer sanctions.

The legislation I am introducing today does exactly what GAO recommends: First, it creates an Employer Education Program that will specifically focus on the relationship between employer sanctions and our Nation's antidiscrimination rules; and second, it improves our present system of worker verification.

This second issue is one that gives some pause for concern. Indeed, some antisanctions zealots, like the editorial board of the Wall Street Journal, insist on calling any proposal in this area a "National ID Card." Well, let me level with you straight out: Those are gross distortions, and completely inaccurate. No one is proposing a national ID card.

My bill considers two possible methods for improving our worker verification system. First, it requires the Social Security Administration to make such improvements in the Social Security card as are necessary to ensure that: First, the card is resistant to tampering and counterfeiting, and second, the card may not be used by someone who is falsely claiming the identity of the true owner of the card.

Second, the bill requires the Attorney General and the Secretary of Health and Human Services to conduct demonstration projects to determine whether a computerized call-in worker verification system would be the most effective means of determining whether someone is authorized to be employed in the United States. These projects will help Congress and the executive branch determine whether a call-in system, improved documents, or a combination of the two would be the best method to improve and simplify our worker verification system.

Let me emphasize that this legislation is not written in stone. I fully intend to discuss my proposal with the administration, with GAO, and with other Members of Congress who are interested in this issue. I expect to work closely with Members of the House Immigration Subcommittee who participated in the debate on the Immigration Reform and Control Act of 1986. I also intend to seek the counsel of my fine friend Senator PAT MOYNIHAN, who has a very good proposal to improve the Social Security card, which is reflected in his bill, S. 214.

I am introducing legislation today to let everyone know that I am serious about making the changes necessary to improve employer sanctions. I look forward to working with my colleagues to enact this important legislation in the near future.

By Mr. JOHNSTON:

S. 2447. A bill to establish the Bayou Cocodrie National Wildlife Refuge; to the Committee on Environment and Public Works.

BAYOU COCODRIE NATIONAL WILDLIFE REFUGE

Mr. JOHNSTON. Mr. President, today I am introducing legislation to create the Bayou Cocodrie National Wildlife Refuge in Concordia Parish, LA. Upon enactment of this bill, this refuge will become the fifth refuge in Louisiana that I have created by legislation in the last decade and the ninth refuge in Louisiana to be created since I came to the Senate.

The Bayou Cocodrie refuge will consist of 11,300 acres of valuable mature bottomland hardwoods and minimal agricultural lands, giving the refuge a diverse and complex habitat. The tract represents one of the last large tracts

of bottomland hardwoods still in private ownership in the Mississippi Delta of Louisiana. This area has already been identified in the lower Mississippi River Delta section of the North American waterfowl management plan [NAWMP] as high quality waterfowl habitat. It is also part of the three rivers waterfowl habitat conservation plan, a project initiative of the lower Mississippi River Delta joint venture of the NAWMP.

The vicinity of the proposed refuge provides wintering habitat for mallards and woodducks and is in close proximity to the Catahoula Lake, one of the most important wintering areas in the Mississippi flyway with peak populations in 1988 of up to 400,000 birds. As a resting migratory resource, over 1.5 million waterfowl are estimated to use the lake annually. For the past 3 years, Catahoula Lake has provided wintering habitat for up to 80,000 canvasback ducks, a concentration which comprises more than one-third of the total North American population. Unfortunately, Catahoula Lake has a serious lead shot poisoning problem. Establishment of this new refuge will increase the size of the wildlife habitat corridor and could thus dissipate the concentration of waterfowl that are currently exposed to lead shot poisoning at the lake.

In addition, the refuge will provide excellent habitat for resident game species such as deer, turkey, and squirrels. It is also feasible that the area will be attractive to endangered and threatened species such as the wintering bald eagles, peregrine falcons and the Louisiana black bear.

Mr. President, I am very excited about this project because it demonstrates what can be accomplished when Federal and private interests work together to preserve our Nation's vanishing inland wetlands. The property that will comprise the Bayou Cocodrie NWR was part of a larger 57,000-acre tract that had been owned by the Fisher Lumber Co. division of General Motors since the 1920's. General Motors used the Bayou Cocodrie hardwoods to produce the various wood products that went into manufacturing their automobiles. Inasmuch as wood is no longer used in automobiles, General Motors recently announced its intent to sell the entire 57,000 acres for conservation purposes. Two conservation groups, the Nature Conservancy and the Delta Environmental Land Trust Association [DELTA] are buying the property and/or placing conservation easements on it so that the property could be preserved for future generations.

Upon learning of this proposed transaction, the U.S. Fish and Wildlife Service expressed an interest in eventually acquiring the Bayou Cocodrie area; however, the Service had neither the authorization nor appropriations to do so at that time. Therefore, the Nature Conservancy offered to act as their intermediary by purchasing and managing the land until such time as the Service was able to acquire it.

The balance of the General Motors property, 45,700 acres, will be disposed of in an environmentally sound manner. With respect to the woodlands on the Fisher tract, the Delta Foundation intends to place conservation easements on this property prior to resale so it will be managed in a conservation-oriented manner. Any tracks that are not sold will be managed in a like fashion by the Delta Foundation. Finally, the agricultural land not included within the refuge will be resold, with current tenants being given the right of first refusal.

Mr. President, given the broad base of support for this project by the State of Louisiana, local officials, the U.S. Fish and Wildlife Service, and conservationists, I hope the Congress will act expeditiously in approving this legislation to create the Bayou Cocodrie National Wildlife Refuge.

I ask unanimous consent that the text of the bill be printed immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2447

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS

SECTION 1. The Congress finds that—

(1) thousands of acres of bottomland hardwoods are being cleared each year in the Mississippi River Delta;

(2) these forested wetlands represent one of the most valuable and productive wildlife habitat types in the United States, and have extremely high recreational value for hunters, fishermen, birdwatchers, nature photographers and others;

(3) the Bayou Cocodrie area is a bottomland hardwood swamp which harbors over one hundred fifty species of birds and many other types of wildlife, including several species threatened with extinction, such as the Louisiana population of black bears;

(4) The Bayou Cocodrie area includes some of the least disturbed bottomland hardwood forest in the Southeast and significantly contributes to the biodiversity in the region;

(5) similar habitat located elsewhere is threatened by disruptive practices and/or conversion to other uses; and

(6) this area is deserving of inclusion in the National Wildlife Refuge System.

DEFINITIONS

SEC. 2. For the purposes of this Act—

(1) the term "refuge" means the Bayou Cocodrie National Wildlife Refuge; and

(2) the term "Secretary" means the Secretary of the Interior, acting through the United States Fish and Wildlife Service.

ESTABLISHMENT OF THE REFUGE

SEC. 3. (a) The Secretary is authorized and directed to acquire approximately 18,000 acres of lands and waters, as depicted upon a map entitled "Bayou Cocodrie National Wildlife Refuge", dated February 1990 and available for inspection in appropriate offices of the United States Fish and Wildlife Service.

(b) The Secretary may make such minor adjustments in the boundaries designated under subsection (a) as may be appropriate to facilitate acquisition of property within the refuge or to otherwise carry out the purposes of this Act.

(c) When sufficient property within the boundaries has been acquired to constitute an area that can be effectively managed as a refuge, the Secretary shall establish the refuge by publishing a notice to that effect in the Federal Register.

REFUGE PURPOSE

SEC. 4. The Bayou Cocodrie National Wildlife Refuge is established and shall be managed for the purposes of—

(1) conservation and enhancement of wetlands;

(2) general wildlife management as a unit of the National Wildlife Refuge System, including management for migratory birds; and

(3) fish and wildlife-oriented recreational activities.

ADMINISTRATION

SEC. 5. (a) The Secretary shall administer all lands, waters and interests therein acquired under this Act in accordance with the provisions of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee).

(b) The Secretary may utilize such additional statutory authority as may be available to him for conservation and development of wildlife and natural resources, water supplies and water control structures, outdoor recreational activities, including hunting and fishing, and interpretive education as he deems appropriate to carry out this Act.

(c) There shall be no commercial harvest of timber within the refuge; nor shall there be cutting of timber other than to provide or improve public access, or for the prevention or control of insect infestation and disease.

AUTHORIZATION OF APPROPRIATIONS

SEC. 6. There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

By Mr. KERRY (for himself and Mr. KENNEDY):

S. 2448. A bill modification of employment to tax treatment of certain crewmembers on fishing vessels; to the Committee on Finance.

TAX TREATMENT OF FISHING VESSEL CREWMEMBERS

● Mr. KERRY. Mr. President, a recent interpretation of the Internal Revenue Code by the Internal Revenue Service threatens to drive some small fishing boat owners into bankruptcy. Although the interpretation arose in an audit of New Bedford fishermen, the outcome will affect the fishing industry nationwide. The IRS position contradicts the intent of Congress and a clarification by Congress is needed to alleviate the problem. No substantive changes in the law are required.

The need for action is urgent. IRS has sent out second and third notices of intent to levy. After the fourth notice, they will send out collectors to

knock on doors and then to seize property. IRS is reluctant to cease collection because Congress has not taken action. That is why it is imperative that we introduce this bill at this time.

Ambiguities in the current law, section 3121(b)(20) of the Internal Revenue Code, led IRS to recently conclude that some "self-employed" crewmembers were really employees that should have been subject to withholding taxes. The IRS is assessing boat owners $10 million in taxes for 1985, 1986, and 1987 even though crewmembers have already paid these taxes individually for these years. This assessment is unfair and, if collected, will cause severe economic hardship in the New Bedford fishing community.

The Tax Code stipulates that fishermen may be considered self-employed if: First, the boat "normally" carries less than 10 crewmembers; and second, the amount of compensation to an individual depends solely on the amount of the boat's catch.

IRS interpreted "normally" to mean "more often than not" and to determine this on a quarterly basis, which is not indicated either in the statute or in its legislative history. The basis of the IRS definition of normally is General Counsel Memorandum 39184, a document that was never published in the Federal Register and which clearly states that it is "not to be relied upon or otherwise cited as a precedent by taxpayers." The fishing industry interpreted normally to reflect its most common usage: "on the average over the taxpayers year."

The second problem relates to a small compensation paid to the cook, mate, and engineer in recognition of services performed in addition to fishing. These token payments, called "pers" in Massachusetts, are customary in the industry nationwide. In the cases currently under audit in New Bedford, this additional compensation accounts for only 4 percent of the total compensation. Nevertheless, the IRS has taken the position that crewmembers receiving this compensation are considered employees whose full income is subject to withholding taxes.

The current position of the IRS is unequitable and is not what Congress intended when it stipulated these rules for the fishing industry. A simply clarification of these rules by Congress, applied retroactively to tax year 1985, is needed to remedy this situation.

I ask unanimous consent that the bill be printed in its entirety at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2448

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MODIFICATION OF EMPLOYMENT TAX TREATMENT OF CERTAIN CREWMEMBERS ON FISHING VESSELS.

(a) 10-MEMBER CREWS PERMITTED.—

(1) AMENDMENT OF 1986 CODE.—Paragraph (20) of section 312(b) of the Internal Revenue Code of 1986 (defining employment) is amended by striking "fewer than 10" and inserting "10 or fewer".

(2) AMENDMENT OF SOCIAL SECURITY ACT.—Paragraph (20) of section 210(a) of the Social Security Act is amended by striking "fewer than 10" and inserting "10 or fewer".

(b) CERTAIN CASH REMUNERATION PERMITTED.—

(1) AMENDMENT OF 1986 CODE.—Subparagraph (A) of section 3121(b)(20) of such Code is amended to read as follows:

"(A) such individual does not receive any cash remuneration other than as provided in subparagraph (B) and other than cash remuneration—

"(i) which does not exceed $100 per trip,

"(ii) which is contingent on a minimum catch, and

"(iii) which is paid solely for additional duties (such as mate, engineer, or cook) for which additional cash remuneration is traditional in the industry,".

(2) AMENDMENT OF SOCIAL SECURITY ACT.—Subparagraph (A) of section 210(a)(20) of the Social Security Act is amended to read as follows:

"(A) such individual does not receive any cash remuneration other than as provided in subparagraph (B) and other than cash remuneration—

"(i) which does not exceed $100 per trip,

"(ii) which is contingent on a minimum catch, and

"(iii) which is paid solely for additional duties (such as mate, engineer, or cook) for which additional cash remuneration is traditional in the industry,".

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to remuneration paid after December 31, 1990.

(2) SUBSECTION (b).—The amendments made by subsection (b) shall also apply to remuneration paid after December 31, 1984, and before January 1, 1990, unless the payor treated such remuneration (when paid) as being subject to tax under chapter 21 of the Internal Revenue Code of 1986.●

By Mr. RUDMAN (for himself and Mr. HUMPHREY):

S. 2449. A bill to authorize the Secretary of the Air Force to purchase the mobile homes of certain members of the Air Force stationed at Pease Air Force Base, New Hampshire; to the Committee on Armed Services.

PURCHASE OF MOBILE HOMES AT PEASE AIR FORCE BASE

● Mr. RUDMAN. Mr. President, along with my colleague from New Hampshire, Senator HUMPHREY, I am introducing a bill to authorize the Secretary of the Air Force to purchase the mobile homes on Pease Air Force Base from the Air Force personnel who own them. The bill would require the Secretary to pay an amount equal to the greater of the fair market value of the home or the total financial investment the owner has in it.

This legislation is necessary to correct a severe inequity afflicting the 50 mobile homeowners at Pease Air Force Base. Pursuant to section 3374 of title 42, the Secretary of Defense may purchase the homes of military or civilian Federal employees adversely impacted by a base closure or major realignment. This is known as the Homeowners Assistance Program, or HAP. Unfortunately, the HAP only covers fixed structures, and thus does not apply to mobile homes.

Pease Air Force Base contains a mobile home park which has 50 developed lots. In 1985, the Air Force waived the normal "first come, first served" method of assigning lots and permitted the development of, in effect, an active real estate market in mobile homes among departing and incoming military personnel. As a result, the value of the homes shot up. The current residents have a substantial investment in their homes, which they purchased with the expectation they would enjoy the same benefits as mobile homeowners among the general public. I suspect that the Air Force now regrets that decision, but that is beside the point.

These mobile homeowners have been placed in an untenable position with the upcoming closure of Pease Air Force Base. They must sell their homes because they are going to be reassigned, but there are no new military personnel—the only eligible buyers—arriving at Pease to sell to. As a result, they cannot sell their homes.

These servicemen are facing a substantial financial loss due to the combination of the Air Force's 1985 decision and the closing of Pease. These losses are the result of Government action, the Government they have volunteered to serve has an obligation to make them whole.

My colleagues from New Hampshire and I have been working with the Air Force to remedy this problem, and it is clear that legislative action is necessary. I should note that the Air Force recognizes the problem, and acknowledges that equity demands assistance for the mobile homeowners, although I cannot say they have endorsed this particular solution.

Mr. President, Pease Air Force Base is scheduled to be closed in just a few months. The need for this bill is compelling and time is of the essence. I urge the Senate Armed Services Committee to give this bill speedy consideration and hope to see the Senate pass it in the near future.●

By Mr. SYMMS (for himself, Mr. HATCH, and Mr. GARN):

S. 2450. A bill to amend the Internal Revenue Code of 1986 to clarify that qualified contributions to a missionary of a church are treated as contributions to the church; to the Committee on Finance.

CHARITABLE CONTRIBUTIONS TO MISSIONARIES

● Mr. SYMMS. Mr. President, it has recently come to my attention that a great injustice is being done to church missionaries. The Internal Revenue Service has refused to allow a tax deduction on contributions to the expenses of missionaries.

Today I am introducing a bill to correct this injustice.

Contributions made to missionaries of a church have always been deductible from the income tax. The Internal Revenue Service, however, has recently refused to allow the deduction on the grounds that charitable contributions should not be made directly to nor be earmarked for individuals. Mr. President, this new view by the IRS is contrary to years of established practice.

Many times churches prefer that money be given directly to its missionaries because it simplifies the administrative burden of supporting missionaries. It has been a historical practice for centuries that missionaries generally must become selfsupporting or at least must do whatever they can to contribute to their own support. They have always been considered as authorized agents who can accept donations for their support, and any unused moneys actually belong to the church.

The Internal Revenue Code allows for deductions for donations made to or for the use of a church. Mr. President, missionaries are part of a church's missionary program—indeed, these programs are inseparable from the people who carry them out. They spend hours teaching and studying on the church's behalf. Money donated to the missionary fund is always used for missionary use.

This issue is presently before the Supreme Court of the United States. Before the Supreme Court makes its ruling, I feel that it would be useful if we, the Members of Congress, clarify what the meaning of a church deduction is.

Many churches use missionaries as an extension of the church and these missionaries work toward the benefit of the church. To penalize them is to penalize the church itself by making it more difficult for members to make contributions.

Mr. President, contributions made to a church should be deductible if made for church use. If the Internal Revenue Service takes away this deduction, the Federal Government will be committing just one more antireligious bad deed in the mistaken misunderstanding of separation of church and state.

The Internal Revenue Service has argued to the Supreme Court that the Tax Code requires certain strict, new rulings. It is our power, Mr. President, as writers of the Income Tax Code to make clear what all of us have understood the law to permit since the very beginning of history.

I ask unanimous consent for the text of my bill to be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2450

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CHARITABLE CONTRIBUTIONS TO CHURCH MISSIONARIES.

(a) IN GENERAL.—Section 170(f) of the Internal Revenue Code of 1986 (relating to disallowance of deductions in certain cases and special rules) is amended by adding at the end the following new paragraph:

"(8) QUALIFIED CONTRIBUTIONS TO CHURCH MISSIONARIES.—

"(A) GENERAL RULE.—Any qualified contribution to a missonary of a church shall be treated as a charitable contribution to the church.

"(B) QUALIFIED CONTRIBUTION.—For purposes of this paragraph, the term 'qualified contribution' means a contribution to a missionary of a church if—

"(i) such missionary is performing missionary services required by the church,

"(ii) such contribution is only for reasonable and necessary living expenses while performing such missionary services, and

"(iii) such missionary is not claimed by the taxpayer as a dependent (as defined in section 152)."

(b) EFFECTIVE DATE.—The amendment made by this Act shall apply to contributions made before, on, or after the date of the enactment of this Act.●

By Mr. INOUYE (for himself, Mr. MCCAIN, Mr. BAUCUS, Mr. REID, Mr. BURDICK, Mr. DASCHLE, Mr. DECONCINI, Mr. WIRTH, Mr. CONRAD, and Mr. NICKLES):

S. 2451. A bill to establish in the Department of the Interior a Trust Counsel for Indian Assets; to the Committee on Indian Affairs.

ESTABLISHING A TRUST COUNSEL FOR INDIAN ASSETS

● Mr. INOUYE. Mr. President, today I am introducing legislation to establish in the Department of the Interior a Trust Counsel for Indian Assets.

This new Trust Counsel will be empowered to provide independent administrative review of the actions of the Federal Government to ensure compliance with the trust responsibility of the United States in the management of Indian trust assets. In order to accomplish this mission, this legal officer will be charged with two primary functions: developing standards of performance to guide each Federal agency which has significant responsibilities in the management of Indian trust assets and investigating allegations that a Federal agency has violated or plans to conduct an activity that would violate the trust responsibility of the United States to protect and maintain Indian trust assets.

In the long history of this country's relations with Indian people, there is no issue which has been more troubling to the legal conscience of public officials than the absence of a meaningful remedy when the Government is faced with a conflict between its fiduciary responsibility to the Indians and directly competing governmental interests. As trustee, the United States holds legal title to significant Indian assets—over 50 million acres of land, associated natural resources, and more than a billion dollars in funds derived from these assets as well as from the settlement of legal claims. Often the same Government agencies that control and manage these assets are also charged with the responsibility to manage public lands and resources in ways which conflict with their duties as trustee for the Indian assets. On many occasions other public agencies which have no responsibility for the management of Indian assets undertake programs such as flood control dams or mineral leases that conflict with Indian trust interests or inflict physical damage to Indian trust assets. Yet, there is no established procedure or administrative process within the entire Federal Government to resolve such conflicts or develop an accommodation of competing interests consistent with our fiduciary duties to tribal governments.

Two years ago, the Senate established a Special Committee on Investigations as a subcommittee of the Select Committee on Indian Affairs in response to charges of fraud, abuse and mismanagement of Indian resources. Many abuses were corrected as a direct result of the committee's investigations and extensive, far reaching recommendations have been submitted to the select committee where they are being given the most serious consideration. Regarding the record of the Federal Government's stewardship of Indian trust assets, compelling and persuasive testimony was presented to the special committee by many former and current Federal officials. Of particular interest was a statement submitted by former President Richard M. Nixon who recalled his own recommendations to the Congress in 1970 that an Indian Trust Counsel Authority be established. We believe his analysis that "no self-respecting attorney should ever attempt to serve clients with conflicting interests" is as valid now as it was 20 years ago. Other witnesses before the special committee hearings, such as former Presidential Counselor Leonard Garment, specifically described efforts made over the years to resolve the serious legal and ethical problems confronting public officials in attempting to meet their responsibilities as trustee of Indian resources in the face of competing or conflicting

demands. The testimony of witnesses documenting many recent and ongoing examples in which Indian trust interests continue to be compromised, confirmed to the committee that a solution must be found.

I believe that this legislation to establish an Indian Trust Counsel in the Department of the Interior is a workable solution that is much needed and long overdue. The trust counsel legislation proposes a reasonable means to address the Federal Government's conflict of interest problems with an effective and administratively feasible mechanism and I hope that the Senate will act expeditiously on this important bill. I am pleased to note that the vice chairman of the Select Committee on Indian Affairs, my good friend Senator JOHN MCCAIN, joins me as an original cosponsor of this legislation as well as the chairman of the Special Committee on Investigations, Senator DENNIS DECONCINI.●

By Mr. ARMSTRONG:

S. 2452. A bill to amend the Federal Rules of Evidence to establish a tax preparer's privilege; to the Committee on Judiciary.

ESTABLISHING A TAX PREPARER'S PRIVILEGE

● Mr. ARMSTRONG. Mr. President, you probably thought, as I did, that a client's communications with his tax-preparer, tax lawyer or accountant, are confidential and protected. Well, they aren't. The Internal Revenue Service can obtain all of an accountant's or lawyer's notes and client communications relating to the preparation of a tax filing. It seems to me that this gives the Service an unfair advantage in tax disputes. I am introducing a bill to put taxpayers on a more equal footing with the IRS by providing for a "privilege" for lawyers and accountants doing tax work.

Like the lawyer-client privilege in current law, an accountant-client privilege means an accountant could not generally be forced to reveal to the IRS or to a court communications with his client relating to the filing of tax returns. Confidentiality would not apply to accounting matters unrelated to tax preparation nor to communications in anticipation of criminal activity or fraud.

Establishing a privilege would not protect factual information needed to calculate tax liability. As a general rule, information in the possession of a client cannot be shielded simply by communicating the information to an accountant.

Some might argue that the innocent need no protection from the IRS. I doubt anyone would apply this same standard to civil and criminal cases because, in these cases just as in many tax disputes, the issues are not black and white but are a matter of interpretation.

The assurance of confidentiality which follows from establishing a privilege for tax preparers would actually improve the operation of our tax system. As every practicing attorney can attest, in telling his story a client will sometimes be reluctant to convey certain information. This is especially true if the client believes the information may be made public. Tax preparers can do their jobs properly only if they have all the necessary information. If a client withholds information because he's concerned it will be made public if it is disclosed, the tax filings may be inaccurate.

Similar to the need for confidentiality to assure full and free disclosure by the client to his accountant is the need for accountants to be able to keep their own thoughts and conclusions private. Clearly, the ability of the IRS freely to examine all of the correspondence, memoranda, notes, etc., produced by an accountant which constitute the client's file sorely hinders his freedom to study the data and record his opinions and tentative conclusions if he believes these could be used against his client. Establishing a privilege for tax prepayers would protect these private notes under a doctrine similar to the "work-product" doctrine used to maintain the privacy of a lawyer's work.●

By Mr. MOYNIHAN (for himself, Mr. RIEGLE, and Mr. PRYOR):

S. 2453. A bill to establish the Social Security Administration as an independent agency, and for other purposes; to the Committee on Finance.

SOCIAL SECURITY RESTORATION ACT

● Mr. MOYNIHAN. Mr. President, I rise today to introduce the Social Security Restoration Act of 1990, legislation to restore vitality and fairness to the administration of the Nation's most important domestic program. I am joined by my distinguished colleagues, Senators RIEGLE and PRYOR.

By now, I believe, the problems at the Social Security Administration are well known and documented. Staff has been cut by 17,000 workers over a 5-year period, a 21-percent reduction. The supposed rationale was that computer modernization would allow the agency to do the same job with fewer workers. But as we have seen many times in recent years, the agency's quality of service to the public has declined markedly.

Last year, for example, an internal SSA study revealed that 54 percent of those who had their supplemental security income benefits suspended over a 2-month study period should not have had their benefits temporarily discontinued. We are talking here of the country's most vulnerable citizens—the needy, aged, blind, and disabled—who needlessly lost their benefits because of these staff cuts.

But the staff reductions are only a part of a bigger problem that has taken root at the Social Security Administration in recent years, a problem of ideological and budget-driven policymaking and administration. It began in the early 1980's when hundreds of thousands of disability beneficiaries were wrongfully thrown off the rolls. The tragedy and hardship to these disabled workers was then compounded as they were forced to deal with a cumbersome, backlogged, and nightmarish administrative appeals process.

There is also a problem of instability of leadership at this important agency. This is my 14th year on the Finance Committee, and in that time there have been nine administrators at the Social Security Administration. Naturally each has wanted to reorganize the agency before he or she moved on. This pattern of instability has disrupted effective management and policy development.

These factors have contributed to a still bigger problem of a lack of public confidence in our Social Security program. Polls consistently show that only about half of nonretired adults are confident that Social Security will be there for them when they need it.

So I propose measures today to restore the Social Security Administration's reputation for fairness and efficiency, to restore due process to the agency's administrative appeals system, and, most important, to restore public confidence in the Social Security program.

First, the bill would remove SSA from the Department of Health and Human Services and restore it to its original status an an independent executive branch agency headed by a three-member bipartisan board. Board members would be appointed by the President and confirmed by the Senate and serve staggered 6-year terms. A board-appointed Executive Director would oversee day-to-day administrative operations.

Next, the bill provides for the development of a permanent, durable, counterfeit-resistant Social Security card that could also be used by employers to verify a job applicant's eligibility for employment under the Immigration Reform and Control Act of 1986.

Third, the bill would require that Social Security account statements be sent to all workers on annual basis, telling them what they have paid into Social Security and what they could expect to get back in the way of benefits.

Fourth, the legislation streamlines the present Social Security administrative appeals process. It takes almost 2 years for the average claimant to get through the current process. The bill would eliminate two stages in the process and establish time limits

within which the agency would have to provide hearings.

Fifth, the bill would establish a floor staff level for SSA of 70,000 full-time workers. In the past 5 years, staff levels have been reduced from about 80,000 workers to the present 63,000. The bill would give them enough workers to do the job and to provide the service that our aged and disabled citizens expect and deserve.

Finally, the bill would provide for the restoration of telephone access to local SSA offices and around the country.

Mr. President, it is past time to take action on these important matters. The administration of our most important domestic program is faltering. I urge the favorable consideration of my colleagues, and I ask unanimous consent that the bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2453

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Social Security Restoration Act of 1990".

SEC. 2. AMENDMENT OF THE SOCIAL SECURITY ACT.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Social Security Act.

TITLE I—SOCIAL SECURITY ADMINISTRATION

Subtitle A—Establishment

SEC. 101. ESTABLISHMENT OF SOCIAL SECURITY ADMINISTRATION AS A SEPARATE, INDEPENDENT AGENCY.

Section 701 is amended to read as follows:

"SOCIAL SECURITY ADMINISTRATION

"SEC. 701. There is hereby established, as an independent agency in the executive branch of the Government a Social Security Administration (hereafter in this title referred to as the 'Administration'). It shall be the duty of the Administration to administer the old-age, survivors, and disability insurance program under title II and the supplemental security income program under title XVI.".

SEC. 102. SOCIAL SECURITY BOARD; EXECUTIVE DIRECTOR; DEPUTY DIRECTOR; BENEFICIARY OMBUDSMAN; OTHER OFFICERS.

(a) IN GENERAL.—Section 702 is amended to read as follows:

"SOCIAL SECURITY BOARD; EXECUTIVE DIRECTOR; OTHER OFFICERS; OFFICE OF RESEARCH AND STATISTICS

"Social Security Board

"SEC. 702. (a)(1)(A) The Administration shall be governed by a Social Security Board (hereafter in this title referred to as the 'Board'. The Board shall be composed of 3 members appointed by the President, by and with the advice and consent of the Senate. The members shall be chosen, on the basis of integrity, impartiality, and good judgment, from among individuals who, by reason of education, experience, and attainments, are exceptionally qualified to perform the duties of members of the Board.

"(B)(i) Except as provided in clauses (ii) and (iii), members of the Board shall be appointed to serve for a term of 6 years. A member of the Board may be removed only pursuant to a finding by the President of neglect of duty or malfeasance in office. The President shall transmit any such finding to the Speaker of the House of Representatives and the Majority Leader of the Senate not later than 5 days after the date on which such finding is made.

"(ii) Of the members initially appointed under this paragraph—

"(I) 1 member shall be appointed for a term ending January 31, 1993,

"(II) 1 member shall be appointed for a term ending January 31, 1995; and

"(III) 1 member shall be appointed for a term ending January 31, 1997,

as designated by the President at the time of appointment. Such members shall be appointed after active consideration of recommendations made by the chairman of the Committee on Ways and Means of the House of Representatives and of recommendations made by the chairman of the Committee on Finance of the Senate.

"(iii) The President may not nominate an individual for appointment to a term of office as member of the Board before the commencement of the term of office of such President during which the term of office of such member commences. Except as provided in clause (iv), a member appointed to a term of office after the commencement of such term may serve under such appointment only for the remainder of such term.

"(iv) A member may, at the request of the President, serve for not more than 1 year after the expiration of his or her term until his or her successor has taken office. A member of the Board may be appointed for subsequent terms after the expiration of a term.

"(C) Not more than 2 members of the Board shall be of the same political party.

"(D) A member of the Board may not, during his or her term as member, engage in any other business, vocation, profession, or employment. A member of the Board may continue as a member of the Board for not longer than the 30-day period beginning on the date such member initially fails to meet the requirements of the preceding sentence.

"(E) 2 members of the Board shall constitute a quorum, except that 1 member may hold hearings.

"(F) A member of the Board shall be designated by the President to serve as Chairperson of the Board for a term of 4 years.

"(G) The Board shall meet at the call of the Chairperson or 2 members of the Board.

"(2) Each member of the Board shall be compensated at the rate provided for level II of the Executive Schedule.

"(3) The Board shall—

"(A) govern by regulation the old-age, survivors, and disability insurance program under title II and the supplemental security income program under title XVI,

"(B) establish and oversee efficient and effective operations in the Administration,

"(C) devise long-term plans to promote and maintain the effective implementation of programs referred to in subparagraph (A),

"(D) appoint an Executive Director of the Administration, as described in subsection (b), to act as the chief operating officer of the Administration responsible for administering the programs referred to in subparagraph (A),

"(E) constitute 3 of the members the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, with the Chairperson of the Social Security Board serving as Chairperson of such Board of Trustees,

"(F) make annual budgetary recommendations relating to the Administration, including program costs of the supplemental security income program under title XVI, and defend such recommendations before the appropriate committees of each House of the Congress,

"(G) study and make recommendations to the Congress and the President as to the most effective methods of providing economic security through social insurance and supplemental security income and as to legislation and matters of administrative policy concerning the programs referred to in subparagraph (A),

"(H) provide the Congress and the President with the ongoing actuarial and other analysis undertaken by the Administration with respect to the programs referred to in subparagraph (A) and any other information relating to such programs; and

"(I) conduct policy analysis and research relating to the programs referred to in subparagraph (A).

"(4)(A) The Board may prescribe such rules and regulations as the Board determines necessary or appropriate to carry out the functions of the Administration. The regulations prescribed by the Board shall be subject to the rulemaking procedures established under section 553 of title 5, United States Code.

"(B) The Board may establish, alter, consolidate, or discontinue such organizational units or components within the Administration as the Board considers necessary or appropriate to carry out the functions of the Board, except that this subparagraph shall not apply with respect to any unit, component, or position provided for by this Act.

"(C) The Board may, with respect to the administration of the old-age, survivors, and disability insurance program under title II and the supplemental security income program under title XVI, assign duties, and delegate, or authorize successive redelegations of, authority to act and to render decisions, to such officers and employees as the Board may find necessary. Within the limitations of such delegations, redelegations, or assignments, all official acts and decisions of such officers and employees shall have the same force and effect as though performed or rendered by the Board.

"Executive Director

"(b)(1) There shall be in the Administration an Executive Director who shall be appointed by the Board.

"(2) The Executive Director shall be appointed for a term of 4 years coincident with the term of the Commissioner, or until the appointment of a qualified successor, except that the individual initially appointed to the office of Executive Director shall be appointed for a term ending September 30, 1996.

"(3) An individual appointed to a term of office as Executive Director after the commencement of such term may serve under such appointment only for the remainder of such term.

"(4) At the request of the Chairperson of the Board, an individual may serve as Exec-

utive Director after the expiration of his or her term, until his or her successor has taken office, for not more than 1 year.

"(5) An individual may be removed from the office of Executive Director before completion of his or her term only for cause found by the Board.

"(6) The Executive Director shall be compensated at the rate provided for level III of the Executive Schedule.

"(7) The Executive Director shall—

"(A) constitute the chief operating officer of the Administration, responsible for administering, in accordance with applicable laws (including regulations) the old-age, survivors, and disability insurance program under title II and the supplemental security income program under title XVI,

"(B) maintain an efficient and effective operational structure for the Administration,

"(C) implement the long-term plans of the Board to promote and maintain the effective implementation of such programs,

"(D) make annual budgetary recommendations of the Administration for the ongoing administrative costs of the Administration and the program costs of the supplemental security income program under title XVI and defend such recommendations before the Board.

"(E) advise the Board and the Congress on the effect on the administration of such programs of proposed legislative changes in such programs,

"(F) serve as Secretary of the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund,

"(G) in December of each calendar year, report to the Board for transmittal to the Congress the administrative activities and accomplishments of the Administration; and

"(H) carry out such additional duties as are assigned by the Board .

"(8) Any reference to the Board in this Act or any other provision of law in connection with the exercise of a function of the Board which is delegated to the Executive Director pursuant to this section shall be considered a reference to the Executive Director.

"Deputy Director of Social Security

"(c)(1) There shall be in the Office of the Executive Director a Deputy Director, who shall be appointed by the Board. The Deputy Director shall be appointed for a term coextensive with the term of the Executive Director.

"(2) An individual may be removed from the office of Deputy Director before completion of his or her term only for cause found by the Board.

"(3) The Deputy Director shall be compensated at the rate provided for level III of the Executive Schedule.

"(4) The Deputy Director shall perform such duties and exercise such powers as the Executive Director shall assign or delegate.

"(5) The Deputy Director shall be Acting Executive Director of the Administration during the absence or disability of the Executive Director and, unless the Board designates another officer of the Government as Acting Executive Director, in the event of a vacancy in the office of the Executive Director.

"General Counsel

"(d)(1) There shall be in the Administration a General Counsel, who shall be appointed by and serve at the pleasure of the Board. The General Counsel shall be the principal legal officer in the Administration.

"(2) The General Counsel shall be compensated at the rate provided for level IV of the Executive Schedule.

"Inspector General

"(e)(1) There shall be in the Administration an Office of the Inspector General. Such Office shall be headed by an Inspector General appointed in accordance with the Inspector General Act of 1978.

"(2) The Inspector General shall be compensated at the rate provided for level IV of the Executive Schedule.

"Beneficiary Ombudsman

"(e)(1) There shall be in the Administration an Office of the Beneficiary Ombudsman, to be headed by a Beneficiary Ombudsman appointed by the Board.

"(2)(A) The Beneficiary Ombudsman shall be appointed for a term of 5 years, except that the individual initially appointed to the office of Beneficiary Ombudsman shall be appointed for a term ending September 30, 1996.

"(B) An individual appointed to a term of office as Beneficiary Ombudsman after the commencement of such term may serve under such appointment only for the remainder of such term.

"(C) At the request of the Chairperson of the Board, an individual may serve as Beneficiary Ombudsman after the expiration of his or her term, until his or her successor has taken office, for not more than 1 year.

"(D) An individual appointed to a term of office as Beneficiary Ombudsman after the commencement of such term may serve under such appointment only for the remainder of such term.

"(E) An individual may be removed from the office of Beneficiary Ombudsman before completion of his or her term only for cause found by the Board.

"(3) The duties of the Beneficiary Ombudsman are—

"(A) to represent within the decisionmaking process of the Administration the interests and concerns of beneficiaries (and potential beneficiaries) under the old-age, survivors, and disability insurance program under title II and the supplemental security income program under title XVI,

"(B) to review the policies and procedures of the Administration for possible adverse effects on such beneficiaries and potential beneficiaries;

"(C) to recommend within the decisionmaking process of the Administration changes in policies which have caused problems for such beneficiaries and potential beneficiaries;

"(D) to help resolve the problems under such programs of individual beneficiaries and potential beneficiaries in unusual or difficult circumstances as determined by the Board; and

"(E) to represent within the decisionmaking process of the Administration the views of beneficiaries in the design of forms and the issuance of instructions.

"(4) The Board shall ensure that the Office of the Beneficiary Ombudsman has staff sufficient to enable the Beneficiary Ombudsman to efficiently carry out the duties of the Office.

"(5) The annual report of the Board under section 704 shall include a description of the activities of the Beneficiary Ombudsman.

"Chief Administrative Law Judge

"(f)(1) There shall be in the Administration an Office of the Chief Administrative Law Judge. The Office shall be headed by a Chief Administrative Law Judge. All functions in the Administration relating to hearings before an administrative law judge conducted in the Administration shall be under the operational control of the Chief Administrative Law Judge.

"(2) The Chief Administrative Law Judge described in paragraph (1) shall be appointed by the Board.

"(3) The Chief Administrative Law Judge shall be compensated at the rate provided for level V of the Executive Schedule.

"Chief Actuary

"(g)(1) There shall be in the Administration a Chief Actuary.

"(2) The position of Chief Actuary shall be a Senior Executive Service Position under the provisions of subchapter 2 of chapter 31 of title V, United States Code.

"(3) The Chief Actuary shall direct, on an ongoing basis, analyses of the actuarial status of the the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund.

"(4) The Chief Actuary shall consult, on an ongoing basis, with—

"(A) the Board,

"(B) the Chairman of the Committee on Finance in the Senate; and

"(C) the Chairman of the Committee on Ways and Means in the House of Representatives,

concerning the financial status of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund.

"Chief Economist

"(h)(1) There shall be in the Administration an Office of the Chief Economist. The Office shall be headed by a Chief Economist.

"(2) The Chief Economist shall direct the research activities of the Administration.

"(3) The position of Chief Economist shall be a Senior Executive Service Position under the provisions of subchapter 2 of chapter 31 of title V, United States Code.".

(b) INTERIM AUTHORITY OF THE COMMISSIONER.—The President shall nominate for appointment the initial members of the Social Security Board not later than April 1, 1991. In the event that, as of July 1, 1991, all members of the Social Security Board have not been appointed, the officer serving on July 1, 1991, as Commissioner of Social Security in the Department of Health and Human Services (or Acting Commissioner, if applicable), or the successor of such officer, shall, while continuing to serve as Commissioner of Social Security (or Acting Commissioner) in such Department, serve as head of the Social Security Administration established under section 701 of the Social Security Act and shall assume the powers and duties of such Board and of the Executive Director under such Act.

SEC. 103. PERSONNEL; BUDGETARY MATTERS; FACILITIES AND PROCUREMENT; SEAL OF OFFICE.

(a) IN GENERAL.—Section 703 is amended to read as follows:

"ADMINISTRATIVE DUTIES OF THE COMMISSIONER

"Personnel

"SEC. 703. (a)(1) The Board shall appoint such additional officers and employees as the Board considers necessary to carry out the functions of the Administration under this Act. Except as otherwise provided in any other provision of law, such officers and employees shall be appointed, and their compensation shall be fixed, in accordance with title 5, United States Code.

"(2) The Board may procure the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code.

"(3) Notwithstanding any requirements of section 3133 of title 5, United States Code, the Director of the Office of Personnel Management shall authorize for the Administration a total number of Senior Executive Service positions which is substantially greater than the number of such positions authorized in the Social Security Administration in the Department of Health and Human Services as of immediately before the date of the enactment of the Social Security Restoration Act of 1990, to the extent that the greater number of such authorized positions is specified in the comprehensive work force plan as established and revised by the Board under subsection (b)(1). The total number of such positions authorized for the Administration shall not at any time be less than the number of such authorized positions as of immediately before such date.

"(4) In addition to the positions of the Administration in the Executive Schedule specified in section 702, the Administration is authorized 6 additional positions at level IV of the Executive Schedule and 6 additional positions at level V of the Executive Schedules.

"(5) All authority and functions of the Office of Personnel Management under section 4703 of title 5, United States Code (relating to demonstration projects), to the extent such section relates to personnel or positions in the Administration, shall be exercised exclusively by the Board. The Board shall report annually to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate on the demonstration projects undertaken by the Board pursuant to this paragraph.

"Budgetary Matters

"(b)(1) Appropriations requests for staffing and personnel of the Administration shall be based upon a comprehensive work force plan, which shall be established and revised from time to time by the Board. The entire amount of appropriations provided for the administrative costs of the Administration shall be apportioned in the time period provided in title 31, United States Code, for apportionment and shall be apportioned for the entire period of availability without restriction or deduction by the apportioning officer or employee of the Office of Management and Budget or any other entity within the executive branch of the Federal Government, except as otherwise provided in this subsection.

"(2) The report submitted pursuant to section 704 shall include a section reflecting the use of budget authority provided to the Administration by quarters.

"(3)(A) Authority of the Administration for automated data processing procurement and facilities construction shall be provided in the form of contract authority covering the total costs of such acquisitions, to be available until expended.

"(B) Amounts necessary for the liquidation of contract authority provided pursuant to this paragraph are hereby made available from the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund to the extent that the Board, with the concurrence of the Secretary of the Treasury, determines that such amounts are not necessary to meet the current obligations for benefit payments from the Trust Funds.

"(C) Funds appropriated for the Administration to be available on a contingency basis shall be apportioned only upon the occurrence of the stipulated contingency, as determined by the Board and reported to each House of the Congress.

"Seal of Office

"(d) The Board shall cause a seal of office to be made for the Administration of such design as the Board shall approve. Judicial notice shall be taken of such seal.".

(b) DEMONSTRATION PROJECTS RELATING TO PERSONNEL MATTERS.—(1) As soon as practicable after June 30, 1991, the Social Security Board (hereafter in this subsection referred to as the 'Board') and the Director of the Office of Personnel Management (hereafter in this subsection referred to as the 'Director') shall, in consultation with the Comptroller General, jointly implement one or more demonstration projects under this subsection. Under each such project, for the period of its duration—

(A) the Board may appoint, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, such technical and professional employees as the Board considers appropriate whose compensation may be fixed by the Board without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that such employees may not be paid at a rate in excess of the rate payable for level IV of the Executive Schedule; and

(B) the Director shall delegate to the Board (pursuant to section 1104 of title 5, United States Code, and subject to applicable limitations under such title relating to delegations under such section) functions relating to—

(i) recruitment and examination programs for entry level employees, and

(ii) classification and standards development systems and pay ranges for those job categories identified by the Board in assuming such delegation.

(2) The Comptroller General of the United States, the Director, and the Board shall each issue a report to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate concerning the demonstration projects described in paragraph (1), together with any recommendations, not later than December 31, 1992. Such reports shall include an evaluation of the readiness of the Social Security Board to assume permanent and full authority over the functions described in subparagraphs (A) and (B) of paragraph (1).

(c) DEMONSTRATION PROJECTS RELATING TO DELEGATIONS FROM ADMINISTRATOR OF GENERAL SERVICES.—(1) As soon as practicable after June 30, 1991, the Social Security Board (hereafter in this subsection referred to as the 'Board') and the Administrator of General Services shall jointly implement one or more demonstration projects under this subsection. Under each such project, for the period of its duration the Board shall have—

(A) all authorities permitted to be delegated under the provisions of Federal law codified under title 40 of the United States Code, relating to the acquisition, operation, and maintenance of the facilities needed for the administration of programs for which the Board is given responsibility under the Social Security Act,

(B) all authorities permitted to be delegated under section 111 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 759), relating to the lease, purchase, or maintenance of automated data processing equipment; and

(C) the authority to contract for any automated data processing equipment or services which the Board considers necessary for the efficient and effective operation of such programs.

(2) The Comptroller General of the United States, the Administrator of General Services, and the Commissioner of Social Security shall each issue a report to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate concerning the demonstration projects described in paragraph (1), together with any recommendations, not later than December 31, 1992. Such reports shall include an evaluation of the readiness of the Board to assume permanent and full authority over the functions described in subparagraphs (A), (B), and (C) of paragraph (1).

SEC. 104. TRANSFERS TO THE NEW SOCIAL SECURITY ADMINISTRATION.

(a) FUNCTIONS.—There are transferred to the Social Security Administration all functions carried out by the Secretary of Health and Human Services with respect to the programs and activities the administration of which is vested in the Social Security Administration by reason of this Act and the amendments made thereby. The Social Security Board shall allocate such functions in accordance with sections 701, 702, and 703 of the Social Security Act.

(b) PERSONNEL, ASSETS, ETC.—(1) There are transferred from the Department of Health and Human Services to the Social Security Administration, for appropriate allocation by the Social Security Board in the Social Security Administration—

(A) the personnel employed in connection with the functions transferred by this Act and the amendments made thereby; and

(B) the assets, liabilities, contracts, property, records, and unexpended balance of appropriations, authorizations, allocations, and other funds employed, held, or used in connection with such functions, arising from such functions, or available, or to be made available, in connection with such functions.

(2) Unexpended funds transferred pursuant to this subsection shall be used only for the purposes for which the funds were originally authorized and appropriated.

(3) The Secretary of Health and Human Services shall terminate—

(A) six positions in the Department of Health and Human Services placed in level IV of the Executive Schedule (or equivalent positions) other than positions specifically required under section 5315 of title 5, United States Code, or any other provision of law; and

(B) six positions in such Department placed in level V of the Executive Schedule (or equivalent positions) other than positions specifically required under section 5316 of such title or any other provision of law.

(c) ABOLISHMENT OF OFFICE OF COMMISSIONER IN THE DEPARTMENT OF HEALTH AND HUMAN SERVICES.—Effective upon the appointment of a Social Security Board pursuant to section 702 of the Social Security Act—

(1) the position of Commissioner of Social Security in the Department of Health and Human Services is abolished; and

(2) section 5315 of title 5, United States Code, is amended by striking the following:

"Commissioner of Social Security, Department of Health and Human Services.".

SEC. 105. TRANSITIONAL RULES.

(a) INTERIM AUTHORITY FOR APPOINTMENT AND COMPENSATION.—(1) At any time on or after the date of enactment of this Act—

(A) any of the officers provided for in section 702 of the Social Security Act may be nominated and appointed, as provided in such section; and

(B) the Social Security Board, upon the nomination and appointment of all of the members of such Board, may prescribe regulations providing for the orderly transfer of proceedings before the Secretary of Health and Human Services to the Social Security Board.

(2) Funds available to any official or component of the Department of Health and Human Services, functions of which are transferred to the Social Security Board or the Social Security Administration by this Act, may with the approval of the Director of the Office of Management and Budget, be used to pay the compensation and expenses of any officer appointed pursuant to this section until such time as funds for that purpose are otherwise available.

(b) CONTINUATION OF ORDERS, DETERMINATIONS, RULES, REGULATIONS, ETC.—All orders, determinations, rules, regulations, permits, contracts, collective bargaining agreements (and ongoing negotiations relating to such collective bargaining agreements), recognitions of labor organizations, certificates, licenses, and privileges—

(1) which have been issued, made, promulgated, granted, or allowed to become effective, in the exercise of functions (A) which were exercised by the Secretary of Health and Human Services (or the Secretary's delegate), and (B) which relate to functions which, by reason of this Act, the amendments made thereby, and regulations prescribed thereunder, are vested in the Social Security Board; and

(2) which are in effect immediately before July 1, 1991,

shall (to the extent that they relate to functions described in paragraph (1)(B)) continue in effect according to their terms until modified, terminated, suspended, set aside, or repealed by such Board.

(c) CONTINUATION OF PROCEEDINGS.—The provisions of this Act (including the amendments made thereby) shall not affect any proceeding pending before the Secretary of Health and Human Services immediately before July 1, 1991, with respect to functions vested (by reason of this Act, the amendments made thereby, and regulations prescribed thereunder) in the Social Security Board, except that such proceedings, to the extent that such proceedings relate to such functions, shall continue before such Board. Orders shall be issued under any such proceeding, appeals taken therefrom, and payments shall be made pursuant to such orders, in like manner as if this Act had not been enacted, and orders issued in any such proceeding shall continue in effect until modified, terminated, superseded, or repealed by such Board, by a court of competent jurisdiction, or by operation of law.

(d) CONTINUATION OF SUITS.—(1) Except as provided in this subsection—

(A) the provisions of this Act shall not affect suits commenced prior to July 1, 1991; and

(B) in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this Act had not been enacted.

(2) No cause of action, and no suit, action, or other proceeding commenced by or against any officer in the official capacity of such officer as an officer of the Department of Health and Human Services, shall abate by reason of the enactment of this Act. Causes of action, suits, actions, or other proceedings may be asserted by or against the United States and the Social Security Administration, or such official of such Administration as may be appropriate, and, in any litigation pending immediately before July 1, 1991, the court may at any time, on the motion of the court or on the motion of a party, enter an order which will give effect to the provisions of this subsection (including, where appropriate, an order for substitution of parties).

(e) CONTINUATION OF PENALTIES.—This Act shall not have the effect of releasing or extinguishing any criminal prosecution, penalty, forfeiture, or liability incurred as a result of any function which (by reason of this Act, the amendments made thereby, and regulations prescribed thereunder) is vested in the Social Security Board.

(f) JUDICIAL REVIEW.—Orders and actions of the Social Security Board in the exercise of functions vested in such Board under this Act (and the amendments made thereby) shall be subject to judicial review to the same extent and in the same manner as if such orders had been made and such actions had been taken by the Secretary of Health and Human Services in the exercise of such functions immediately before July 1, 1991. Any statutory requirements relating to notice, hearings, action upon the record, or administrative review that apply to any function so vested in such Board shall continue to apply to the exercise of such function by such Board.

(g) EXERCISE OF FUNCTIONS.—In the exercise of the functions vested in the Social Security Board under this Act, the amendments made thereby, and regulations prescribed thereunder, such Board shall have the same authority as that vested in the Secretary of Health and Human Services with respect to the exercise of such functions immediately preceding the vesting of such functions in such Board, and actions of such Board shall have the same force and effect as when exercised by such Secretary.

(h) OPERATION OF TRANSITIONAL RULES IN THE EVENT OF INTERIM AUTHORITY IN THE COMMISSIONER.—For purposes of this section, in any case in which the powers and duties to be transferred to the Social Security Board are transferred to the Commissioner of Social Security (or acting Commissioner) in the Department of Health and Human Services for an interim period pursuant to section 102(b), the preceding provisions of this section shall apply with respect to the transfer of such powers and duties to and from such Commissioner (or acting Commissioner) pursuant to such section in the same manner and to the same extent as they would have applied to a direct transfer from the Secretary of Health and Human Services to the Social Security Board if all initial appointments to such Board had been made.

SEC. 106. EFFECTIVE DATES; SPECIAL RULES.

(a) IN GENERAL.—Except as provided in subsection (b), this subtitle, and the amendments made by such subtitle shall take effect July 1, 1991.

(b) TRANSITIONAL RULES.—Sections 102(b) and 105 shall take effect on the date of the enactment of this Act.

(c) NEW SPENDING AUTHORITY.—Any new spending authority provided by this subtitle shall be effective for any fiscal year only to such extent or in such amounts as are provided in advance in appropriation Acts.

Subtitle B—Conforming Amendments

SEC. 111. AMENDMENTS TO TITLES II AND XVI OF THE SOCIAL SECURITY ACT.

(a) IN GENERAL.—Title II (other than section 201, section 218(d), section 231(c), section 226, and section 226A) and title XVI are each amended—

(1) by striking, wherever it appears therein, "Secretary of Health and Human Services" and inserting "Social Security Board",

(2) by striking, wherever it appears therein, "Department of Health and Human Services" and inserting "Social Security Administration",

(3) by striking, wherever it appears therein, "Department" (but only if it is not immediately succeeded by the words "of Health and Human Services", and only if it is used in reference to the Department of Health and Human Services) and inserting "Administration",

(4) by striking, wherever it appears therein, each of the following words (but, in the case of any such word only if such word refers to the Secretary of Health and Human Services): "Secretary", "Secretary's", "his", "him", "he","her", and "she", and inserting (in the case of the word "Secretary") "the Social Security Board", (in the case of the word "Secretary's") "the Social Security Board's", (in the case of the word "his") "the Board's", (in the case of the word "him") "the Board", and (in the case of the words "she" or "he") "the Board"; (in the case of the word "her") "the Board" or "the Board's", as may be appropriate; and (in the case of the words "she" or "he") "the Board"; and

(5) by striking, wherever it appears therein, "Internal Revenue Code of 1954" and inserting "Internal Revenue Code of 1986".

(b) AMENDMENTS TO SECTION 201.—(1)(A) Sections 201(a)(3), 201(a)(4), 201(b)(1), and 201(b)(2) are each amended by striking "Secretary of Health and Human Services" and "Secretary" each place it appears and inserting "Social Security Board"; and

(B) Sections 201(a)(3) and 201(b)(1) are each amended by striking "such Secretary" and inserting "such Board".

(2) Section 201(c) is amended—

(A) in the first sentence, by striking "shall be composed of" and all that follows down through "ex officio" and inserting the following: "shall be composed of the members of the Social Security Board, the Secretary of the Treasury, and the Secretary of Health and Human Services, all ex officio",

(B) by inserting after the first sentence the following new sentence: "The Chairperson of the Social Security Board shall be the Chairperson of the Board of Trustees."; and

(C) by striking "The Commissioner of Social Security" and inserting "The Executive Director of the Social Security Administration".

(3) Section 201(g)(1)(A) is amended—

(A) in clause (i), by striking "by him and the Secretary of Health and Human Services" and inserting "by him, the Social Security Board, and the Secretary of Health and Human Services", and by striking "by the Department of Health and Human Services and the Treasury Department" and inserting "by the Social Security Administration, the Department of Health and Human Services, and the Department of the Treasury",

(B) in clause (ii), by striking "method prescribed by the Board of Trustees under

paragraph (4)" and inserting "applicable method prescribed under paragraph (4)", by striking "the Secretary of Health and Human Services" and inserting "the Social Security Board and the Secretary of Health and Human Services", and by striking "the Department of Health and Human Services" and inserting "the Social Security Administration and the Department of Health and Human Services"; and

(C) by striking the last sentence and inserting the following: "There are hereby authorized to be made available for expenditure, out of any or all of the Trust Funds, such amounts as the Congress may deem appropriate to pay the costs of the part of the administration of this title and title XVI for which the Social Security Board is responsible, the costs of title XVIII for which the Secretary of Health and Human Services is responsible, and the costs of carrying out the functions of the Social Security Administration, specified in section 232, which relate to the administration of provisions of the Internal Revenue Code of 1986 other than those referred to in clause (i) of the first sentence of this subparagraph.".

(4) Section 201(g)(1) is further amended by striking subparagraph (B) and inserting the following new subparagraphs:

"(B) After the close of each fiscal year—

"(i) the Social Security Board shall determine (I) the portion of the costs, incurred during such fiscal year, of administration of this title and title XVI and of carrying out the functions of the Social Security Administration, specified in section 232, which relate to the administration of provisions of the Internal Revenue Code of 1986 (other than those referred to in clause (i) of the first sentence of subparagraph (A)), which should have been borne by the General Fund in the Treasury, (II) the portion of such costs which should have been borne by the Federal Old-Age and Survivors Insurance Trust Fund, and (III) the portion of such costs which should have been borne by the Federal Disability Insurance Trust Fund; and

"(ii) the Secretary of Health and Human Services shall determine (I) the portion of the costs, incurred during such fiscal year, of administration of title XVIII which should have been borne by the General Fund in the Treasury, (II) the portion of such costs which should have been borne by the Federal Hospital Insurance Trust Fund, and (III) the portion of such costs which should have been borne by the Federal Supplementary Medical Insurance Trust Fund,

except that the determination of the amounts to be borne by the General Fund in the Treasury with respect to expenditures incurred in carrying out such functions specified in section 232 shall be made pursuant to the applicable method prescribed under paragraph (4) of this subsection.

"(C) After the determinations under subparagraph (B) have been made for any fiscal year, the Social Security Board and the Secretary of Health and Human Services shall each certify to the Managing Trustee the amounts which should be transferred from each of the Trust Funds to the General Fund in the Treasury and from the general fund in the Treasury to each of the Trust Funds, in order to ensure that each of the Trust Funds and the General Fund in the Treasury have borne their proper share of the costs, incurred during such fiscal year, for (i) the part of the administration of this title and title XVI for which the Social Security Board is responsible, (ii) the part of the administration of this title and title XVIII for which the Secretary of Health and Human Services is responsible, and (iii) carrying out the functions of the Social Security Administration, specified in section 232, which relate to the administration of provisions of the Internal Revenue Code of 1986 (other than those referred to in clause (i) of the first sentence of subparagraph (A)). The Managing Trustee shall transfer any such amounts in accordance with any certification so made.".

(5) Section 201(g)(2) is amended, in the second sentence, by striking "established and maintained by the Secretary of Health and Human Services" and inserting "maintained by the Social Security Board", and by striking "Secretary shall furnish" and inserting "Social Security Board shall furnish".

(6) Section 201(g)(4) is amended to read as follows:

"(4) The Social Security Board shall utilize the method prescribed pursuant to this paragraph, as of immediately before the date of the enactment of the Social Security Investment Reform Act of 1987, for determining the costs which should be borne by the General Fund in the Treasury of carrying out the functions of the Board, specified in section 232, which relate to the administration of provisions of the Internal Revenue Code of 1986 (other than those referred to in clause (i) of the first sentence of paragraph (1)(A)). If at any time or times thereafter the Board considers such action advisable, the Board may modify the method of determining such costs.".

(7) Section 201(i)(1) is amended to read as follows:

"(i)(1) The Managing Trustee may accept on behalf of the United States money gifts and bequests made unconditionally to the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, or the Federal Supplementary Medical Insurance Trust Fund or to the Social Security Administration, the Department of Health and Human Services, or any part or officer thereof, for the benefit of any of such Funds or any activity financed through such Funds.".

(8) Subsections (j) and (k) of section 201 are each amended by striking "Secretary" each place it appears and inserting "Social Security Board".

(9) Section 201(l)(3)(B)(iii)(II) is amended by striking "Secretary" and inserting "Social Security Board".

(10) Section 201(m)(3) is amended by striking "Secretary of Health and Human Services" and inserting "Social Security Board".

(11) Section 201 is amended by striking "Internal Revenue Code of 1954" each place it appears and inserting "Internal Revenue Code of 1986".

(c) AMENDMENTS TO SECTION 218.—Section 218(d) is amended by striking "Secretary" each place it appears in paragraphs (3) and (7) and inserting "Social Security Board".

(d) AMENDMENTS TO SECTION 222.—Section 222(d) is amended—

(1) in the last sentence of paragraph (1), by striking "Commissioner of Social Security" and inserting "Executive Director of the Social Security Administration"; and

(2) in the first sentence of paragraph (2), by striking "Commissioner of Social Security" and inserting "Executive Director of the Social Security Administration".

(e) AMENDMENTS TO SECTION 225.—Section 225(b)(2) is amended by striking "Commissioner of Social Security" and inserting "Executive Director of the Social Security Administration".

(f) AMENDMENT TO SECTION 231.—Section 231(c) is amended by striking "Secretary determines" and inserting "Social Security Board and the Secretary jointly determine".

(g) AMENDMENT TO SECTION 1615.—Section 1615(d) of such Act is amended by striking "Commissioner of Social Security" and inserting "Executive Director of the Social Security Administration".

SEC. 112. OTHER AMENDMENTS.

(a) AMENDMENTS TO TITLE VII.—(1) Section 704 is amended to read as follows:

"REPORTS

"SEC. 704. The Secretary and the Board shall make full reports to Congress, not less than 120 days after the beginning of each regular session, of the administration of the functions with which they are charged under this Act. In addition to the number of copies of such reports authorized by other law to be printed, there is hereby authorized to be printed not more than 5,000 copies of each such report for use by the Secretary and the Social Security Board for distribution to Members of Congress and to State and other public or private agencies or organizations participating in or concerned with the programs provided for in this Act.".

(2) Section 709(b)(2) is amended by striking "(as estimated by the Secretary)" and inserting ", as estimated by the Social Security Board or the Secretary (whichever administers the program involved),".

(3) Title VII is amended by adding at the end thereof the following new section:

"DUTIES AND AUTHORITY OF SECRETARY

"SEC. 712. (a)(1) The Secretary shall perform the duties imposed upon the Secretary by this Act.

"(2) The Secretary shall also have the duty of studying and making recommendations concerning—

"(A) the most effective methods of providing economic security concerning the programs administered by the Secretary under this Act,

"(B) legislation and administrative policy concerning the programs administered by the Secretary under this Act; and

"(C) other related subjects,

except that nothing in this section shall be construed so as to require the Secretary to make studies or recommendations with respect to programs administered by the Social Security Administration.

"(b) The Secretary is authorized to appoint and fix the compensation of such officers and employees, and to make such expenditures as may be necessary for carrying out the functions of the Secretary under this Act. Appointments of attorneys and experts may be made without regard to the civil service laws.

(4) Title VII is amended by adding at the end thereof the following new section:

"ADVISORY COUNCIL ON THE OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM

"SEC. 713. (a) During 1993 (but not before February 1, 1993) and every fourth year thereafter (but not before February 1 of such fourth year), the Commissioner shall appoint an Advisory Council on Social Security (hereafter in this section referred to as the 'Council') for the purposes of reviewing—

"(1) the status of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund in

relation to the long-term commitments of the old-age, survivors, and disability insurance program; and

"(2) such programs, including the scope of coverage and the adequacy of benefits under such programs, and the relationship of such programs to other programs providing income security, health benefits, and social services.

"(b) Each such Council shall consist of a Chairman and 12 other individuals, appointed by the Commissioner without regard to the provisions of title 5, United States Code, governing appointments in the competitive service.

"(c) Members appointed to each such Council under this section shall, to the extent possible, represent organizations of employers and employees in equal numbers, and represent self-employed persons and the public.

"(d)(1) The Council is authorized to engage such technical assistance, including actuarial services, as may be required to carry out the functions of the Council.

"(2) The Board shall make available to the Council such—

"(A) additional secretarial, clerical, assistance,

"(B) actuarial and other relevant data; and

"(C) other assistance that the Board determines to be appropriate,

as may be required by the Council to carry out the functions of the Council.

"(d)(1) Members of each such council who are not full-time Federal employees, while serving on business of the Council (including travel time), shall receive compensation at rates fixed by the Board, but not to exceed a daily rate of $100.

"(2) While serving on business of the Council away from their homes or regular places of business, such members may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government employed intermittently.

"(e) (1) The Council shall submit reports (including any interim reports such Council may have issued) of the findings and recommendations of such Council to the Board not later than January 1 of the second year after the year in which such Council is appointed. The Board shall thereupon transmit such reports and recommendations to the Congress and to the Board of Trustees of each of the Trust Funds described in subsection (a).

(2) The reports required under this section shall include reports concerning—

(A) the old-age, survivors, and disability insurance program under title II,

(B) the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1986; and

(C) the taxes imposed under section 86 of the Internal Revenue Code of 1986 on social security benefits (within the meaning of section 86(d)(1)(A) of such Code).

"(f) A Council appointed under this section shall cease to exist on the date immediately following the date prescribed for the transmittal to the Commissioner the reports described in subsection (e).".

(5) Section 706 is amended—

(i) by striking the heading and inserting "ADVISORY COUNCIL ON HOSPITAL AND SUPPLEMENTARY MEDICAL INSURANCE",

(ii) in subsection (a)—

(I) by striking "1969" each place it appears and inserting "1993",

(II) by striking "Social Security" and inserting "Hospital and Supplementary Medical Insurance",

(III) by striking "the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund,",

(IV) by striking "Fund, and" and inserting "Fund and"; and

(V) by striking "the old-age, survivors, and disability insurance program and"; and

(iii) in subsection (d)—

(I) by striking paragraph (1); and

(II) by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(5) Sections 706, 709, and 710 of such Act are amended by striking "Internal Revenue Code of 1954" each place it appears and inserting "Internal Revenue Code of 1986".

(6) Paragraph (2) of section 709(b) is amended by striking "(as estimated by the Secretary)" and inserting "(for amounts which will be paid from the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, as estimated by the Commissioner, and for amounts which will be paid from the Federal Hospital Insurance Trust and the Federal Supplementary Medical Insurance Trust Fund, as estimated by the Secretary)".

(7) Sections 719 and 710 are amended by striking "Internal Revenue Code of 1954" each place it appears and inserting "Internal Revenue Code of 1986".

(b) AMENDMENTS TO TITLE XI.—(1) Section 1101(a) is amended by adding at the end thereof the following new paragraph:

"(10) The term 'Administration' means the Social Security Administration, except where the context requires otherwise.".

(2) Section 1106(a) is amended—

(A) by inserting "(1)" after "(a)";

(B) by striking "Department of Health and Human Services" each place it appears and inserting "applicable agency";

(C) by striking "Secretary" each place it appears and inserting "head of the applicable agency"; and

(D) by adding at the end thereof the following new paragraph:

"(2) For purposes of this subsection and subsection (b), the term 'applicable agency' means—

"(A) the Social Security Administration, with respect to matter transmitted to or obtained by such Administration or matter disclosed by such Administration, or

"(B) the Department of Health and Human Services, with respect to matter transmitted to or obtained by such Department or matter disclosed by such Department.".

(3) Section 1106(b) is amended—

(A) by striking "Secretary" each place it appears and inserting "head of the applicable agency"; and

(B) by striking "Department of Health and Human Services" and inserting "applicable agency".

(4) Section 1106(c) is amended—

(A) by striking "the Secretary" the first place it appears and inserting "the Social Security Board or the Secretary"; and

(B) by striking "the Secretary" each subsequent place it appears and inserting "such Board or Secretary".

(5) Section 1107(b) is amended by striking "the Secretary of Health and Human Services" and inserting "the Social Security Board or the Secretary".

(6) Section 1110 is amended—

(A) in paragraphs (2) and (3) of subsection (a), by inserting "(or the Social Security Board with respect to any jointly financed cooperative agreement or grant concerning titles II or XVI)" after "Secretary";

(B) in subsection (b)—

(i) by striking "Secretary" each place it appears and inserting "the Board", and

(ii) by striking "the Secretary's" each place it appears and inserting "the Board's"; and

(C) by striking "he", "his", "him", and "himself" each place they appear (except in subsection (b)(2)(A)) and inserting "the Board", "the Board's", "the Board", and "itself", respectively.

(7) Subsections (b) and (c) of section 1127 are each amended by striking "Secretary" and inserting "Social Security Board".

(8) Section 1128(f) is amended by inserting after "section 205(g)" the following: ", except that, in so applying such sections and section 205(l), any reference therein to the Social Security Board or the Social Security Administration shall be considered a reference to the Secretary or the Department of Health and Human Services, respectively".

(9) Section 1131 is amended—

(A) by striking "Secretary" each place it appears and inserting "Social Security Board";

(B) in subsection (a)(1)(A), by adding "or" at the end thereof;

(C) in subsection (a)(1)(B), by striking "or" at the end thereof;

(D) by striking subsection (a)(1)(C);

(E) by redesignating subsection (a)(2) as subsection (a)(3);

(F) by inserting after subsection (a)(1) the following new paragraph:

"(2) the Secretary makes a finding of fact and a decision as to the entitlement under section 226 of any individual to hospital insurance benefits under part A of title XVIII, or"; and

(G) by striking "he" in the matter in subsection (a) following paragraph (3) (as so redesignated) and inserting "the Social Security Board".

(10) Section 1155 is amended by striking "(to the same extent as is provided in section 205(b))" and all that follows and inserting "(to the same extent as beneficiaries under title II are entitled to a hearing by the Social Security Board under section 205(b)). For purposes of the preceding sentence, subsection (l) of section 205 shall apply, except that any reference in such subsection to the Social Security Board or the Social Security Administration shall be deemed a reference to the Secretary or the Department of Health and Human Services, respectively. Where the amount in controversy is $2,000 or more, such beneficiary shall be entitled to judicial review of any final decision relating to a reconsideration described in this subsection.".

(11) Sections 1101, 1106, 1107, and 1137 are amended by striking "Internal Revenue Code of 1954" each place it appears and inserting "Internal Revenue Code of 1986".

(c) AMENDMENTS TO TITLE XVIII.—(1) Subsections (a) and (f) of section 1817 are amended by striking "Secretary of Health and Human Services" each place it appears and inserting "Social Security Board".

(2) Section 1840(a) is amended—

(A) in paragraph (1)—

(i) by striking "Secretary" and inserting "Social Security Board"; and

(ii) by adding at the end thereof the following new sentence: "Such regulations shall be prescribed after consultation with the Secretary."; and

(B) in paragraph (2) by striking "Secretary of Health and Human Services" and inserting "Social Security Board".

(3) Section 1872 is amended by inserting after "title II" the following: ", except that, in applying such provisions with respect to this title, any reference therein to the Social Security Board or the Social Security Administration shall be considered a reference to the Secretary or the Department of Health and Human Services, respectively".

(4) Section 1869(b)(1) and the last sentence of section 1876(c)(5)(B) are amended by inserting after "section 205(g)" the following: ", except that, in so applying such sections and section 205(l), any reference therein to the Social Security Board or the Social Security Administration shall be considered a reference to the Secretary or the Department of Health and Human Services, respectively".

(5) Sections 1817, 1862, and 1886 are amended by striking "Internal Revenue Code of 1954" each place it appears and inserting "Internal Revenue Code of 1986".

(d) AMENDMENT TO TITLE XIX.—Section 1910(b)(2) is amended, in the first sentence, by inserting after "section 205(g)" the following: ", except that, in so applying such sections and section 205(l), any reference therein to the Social Security Board or the Social Security Administration shall be considered a reference to the Secretary or the Department of Health and Human Services, respectively".

(e) AMENDMENT TO TITLE XX.—Section 2002(a)(2)(B) is amended by striking "Internal Revenue Code of 1954" and inserting "Internal Revenue Code of 1986".

(f) AMENDMENTS TO TITLE 5, UNITED STATES CODE.—Title 5, United States Code, is amended—

(1) by adding at the end of section 5313 the following new items:

"Members, Social Security Board (3).

"Executive Director, Social Security Administration;

(2) by adding at the end of section 5314 the following new items:

"Deputy Director, Social Security Administration.

(3) by adding at the end of section 5315 the following new items:

"General Counsel, Social Security Administration.

"Inspector General, Social Security Administration.

"Additional officers, Social Security Administration (6).";

(4) by adding at the end of section 5316 the following new items:

"Beneficiary Ombudsman, Social Security Administration.

"Chief Administrative Law Judge, Social Security Administration."; and

(5) by striking "Secretary of Health Education, and Welfare" each place it appears in section 8141 and inserting "Social Security Board".

(g) AMENDMENT TO FOOD STAMP ACT OF 1977.—Section 6(c)(3) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(3)) is amended by inserting "the Social Security Board and" before "the Secretary of Health and Human Services".

(h) AMENDMENT TO TITLE 14, UNITED STATES CODE.—Section 707 of title 14, United States Code, is amended by striking "Secretary of Health and Human Services" each place it appears and inserting "Social Security Board".

(i) AMENDMENTS TO INTERNAL REVENUE CODE OF 1986.—(1) Subsections (c)(1), (c)(2)(E), (g)(1), (g)(2)(A), and (g)(2)(B) of section 1402 of the Internal Revenue Code of 1986 are amended by striking "Secretary of Health and Human Services" each place it appears and inserting "Social Security Board".

(2) Section 3121(b)(10)(B) of such Code is amended by striking "Secretary of Health and Human Services" each place it appears and inserting "Social Security Board".

(3) Subsections (d) and (f) of section 6057 of such Code are amended by striking "Secretary of Health and Human Services" each place it appears and inserting "Social Security Board".

(4) Section 6103(l)(5) of such Code is amended—

(A) by striking "Department of Health and Human Services" and inserting "Social Security Administration"; and

(B) by striking "Secretary of Health and Human Services" and inserting "Social Security Board".

(5) Section 6511(d)(5) of such Code is amended by striking "Secretary of Health and Human Services" and inserting "Social Security Board".

(j) AMENDMENTS TO TITLE 38, UNITED STATES CODE.—Section 3005 of title 38, United States Code, is amended by striking "Secretary of Health and Human Services" and "Secretary" each place they appear and inserting "Social Security Board".

(k) AMENDMENTS TO INSPECTOR GENERAL ACT OF 1978.—The Inspector General Act of 1978 (5 U.S.C. App.) is amended—

(1) in section 9(a)(1)—

(A) by striking "and" at the end of subparagraph (U); and

(B) by adding at the end thereof the following new subparagraph:

"(V) of the Social Security Administration (to the extent provided in the Social Security Restoration Act of 1990), the functions of the Inspector General of the Department of Health and Human Services relating to the administration of the old-age, survivors, and disability insurance program under title II of the Social Security Act and of the supplemental security income program under title XVI of such Act; and";

(2) in section 11(1), by striking "or" after "Commission" and inserting a semicolon, and by inserting after "Board;" the following: "or the Social Security Board;"; and

(3) in section 11(2), by striking "or" after "Information Agency,", and by inserting after "Veterans' Administration" the following: ", or the Social Security Administration;".

SEC. 113. RULES OF CONSTRUCTION.

(a) REFERENCES TO THE DEPARTMENT OF HEALTH AND HUMAN SERVICES.—Whenever any reference is made in any provision of law (other than this part or part I or a provision of law amended by either such part), regulation, rule, record, or document to the Department of Health and Human Services with respect to such Department's functions under the old-age, survivors, and disability insurance program under title II of the Social Security Act or the supplemental security income program under title XVI of such Act, such reference shall be considered a reference to the Social Security Administration.

(b) REFERENCES TO THE SECRETARY OF HEALTH AND HUMAN SERVICES.—Whenever any reference is made in any provision of law (other than this part or part I or a provision of law amended by either such part), regulation, rule, record, or document to the Secretary of Health and Human Services with respect to such Secretary's functions under such programs, such reference shall be considered a reference to the Social Security Board.

(c) REFERENCES TO OTHER OFFICERS AND EMPLOYEES.—Whenever any reference is made in any provision of law (other than this part or part I or a provision of law amended by either such part), regulation, rule, record, or document to any other officer or employee of the Department of Health and Human Services with respect to such officer or employee's functions under such programs, such reference shall be considered a reference to the appropriate officer or employee of the Social Security Administration.

SEC. 114. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b), the provisions of this subtitle shall take effect July 1, 1991.

(b) EXCEPTIONS.—

(1) Subsection (a)(4) of section 112 shall take effect on January 1, 1993.

(2) Subsections (f)(1), (f)(2), (f)(3), and (k) of section 112 shall take effect October 1, 1990.

TITLE II—SOCIAL SECURITY CARDS

SEC. 201. SOCIAL SECURITY CARDS.

(a) IN GENERAL.—(1) The Secretary of Health and Human Services (hereinafter referred to as the "Secretary") shall, in accordance with the provisions of this section, develop a prototype counterfeit-resistant social security card. Such prototype shall—

(A) be made of a durable, tamper-resistant material such as plastic or polyester,

(B) employ technologies that provide security features, such as magnetic strips, holograms, and integrated circuits,

(C) be developed to provide a more reliable means of verifying eligibility for employment under the Immigration Reform and Control Act of 1986; and

(D) contain features allowing such card to be utilized as a voter registration card.

(2) The Attorney General of the United States shall provide such information and assistance as the Secretary determines to be necessary to achieve the purposes of this section.

(b) STUDY AND REPORT.—(1) The Secretary shall conduct a study and issue a report to the Congress that examines methods of reducing fraud in the application process for social security cards in effect on the date of the enactment of this Act.

(2) Not later than 1 year after the date of the enactment of this Act, the Secretary shall submit to the Committee on Ways and Means and the Committee on the Judiciary of the House of Representatives, and the Committee on Finance and the Committee on the Judiciary of the Senate—

(A) the report described in paragraph (1); and

(B) the prototype social security card described in subsection (a)(1).

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated from the Federal Old-Age and Survivors Insurance Trust Fund such sums as may be necessary to carry out the purposes of this section.

TITLE III—SOCIAL SECURITY ACCOUNT STATEMENTS

SEC. 301. MANDATORY PROVISION OF STATEMENTS.

Section 1142(c), as added by section 10308 of the Omnibus Budget Reconciliation Act of 1989, is amended—

(1) by striking "1995" each place it appears and inserting "1992",

(2) by striking "1994" and inserting "1991",

(3) by striking "1999" each place it appears and inserting "1994"; and

(4) in paragraph (2), by striking "a biennial" and inserting "an annual".

TITLE IV—HEARINGS; MISCELLANEOUS

SEC. 401. HEARINGS.

(a) AMENDMENTS TO TITLE II.—Section 205(b) is amended to read as follows:

"(b)(1) The Secretary is directed to make findings of fact, and decisions as to the rights of any individual applying for a payment under this title. Any such decision by the Secretary which involves a determination of disability and which is in whole or in part unfavorable to such individual shall contain a statement of the case, in understandable language, setting forth a discussion of the evidence, and stating the Secretary's determination and the reason or reasons upon which it is based.

"(2) Upon request by any individual described in paragraph (1), or upon request by a wife, divorced wife, widow, surviving divorced wife, divorced husband, widower, surviving divorced husband, child, or parent who makes a showing in writing that his or her rights may be prejudiced by any decision the Secretary has rendered, the Secretary shall give such individual described in paragraph (1) and such other individual reasonable notice and opportunity for a hearing with respect to such decision, and, if a hearing is held, shall, on the basis of evidence adduced at such hearing, affirm, modify, or reverse his or her findings of fact and such decision.

"(3) Except as otherwise provided in this section, the Secretary is authorized to hold such hearings and to conduct such investigations and other proceedings as he or she may determine to be necessary or proper for the administration of this title. In the course of any hearing, investigation, or other proceeding, the Secretary may administer oaths and affirmations, examine witnesses, and receive evidence. Evidence may be received at any hearing before the Secretary even though inadmissible under rules of evidence applicable to court procedure.

"(4)(A) In any case where the Secretary makes a determination concerning the entitlement of an individual to benefits under this title or provides notice of any administrative action the effect of which is to decrease the payments of benefits to such individual or affect the entitlement of such individual to benefits under this title, for which such individual has a right of appeal under this title, such individual shall have a right to request a hearing by an administrative law judge to review such determination or administrative action. Any request for such hearing shall be made not later than 60 days after receipt of notice of such initial determination or administrative action. Such hearing shall be held not later than 90 days after a request for a hearing under this subparagraph.

"(B) During the period of time between a request for a hearing and such hearing before an administrative law judge, the Secretary may reconsider such decision or administrative action and modify or reverse such decision or administrative action with respect to the individual who requested such hearing.

"(C) Not later than 30 days after the completion of the hearing before an administrative law judge under this paragraph, the administrative law judge shall render a decision, on the basis of evidence adduced at the hearing to affirm, modify or reverse the decision or administrative action of the Secretary.

"(D) Not later than 30 days after the administrative law judge renders a decision, the Secretary shall review such decision and approve or disapprove such decision. The Secretary's approval or disapproval shall be considered to be a final decision, and shall be appealable to a district court of the United States pursuant to subsection (g).".

(b) AMENDMENTS TO TITLE XVI.—Section 1631(c) is amended to read as follows:

"(c)(1)(A) The Secretary is directed to make findings of fact, and decisions as to the rights of any individual applying for payment under this title. Any such decision by the Secretary which involves a determination of disability and which is in whole or in part unfavorable to such individual shall contain a statement of the case, in understandable language, setting forth a discussion of the evidence, and stating the Secretary's determination and the reason or reasons upon which it is based.

"(2) Upon request by an individual described in paragraph (1) with respect to a determination described in paragraph (1), or any individual who is or claims to be an eligible individual or eligible spouse and is in disagreement with any determination under this title with respect to eligibility of such individual for benefits, or the amount of such individual's benefits, the Secretary shall provide reasonable notice and an opportunity for a hearing before an administrative law judge pursuant to the procedures described in section 205(b)(4).

"(3) Except as otherwise provided in this section, the Secretary is authorized to hold such hearings and conduct such investigations and proceedings as the Secretary may determine to be necessary and proper for the administration of this title. In the course of any hearing, investigation, or other proceeding, the Secretary may administer oaths and affirmations, examine witnesses, and receive evidence. Evidence may be received at any hearing before the Secretary even though inadmissible under the rules of evidence applicable to court procedure.

"(5) The Secretary shall review any decision made by an administrative law judge under paragraph (2) in accordance with the procedures under subparagraph (D) of section 205(b)(4). The Secretary's approval or disapproval shall be considered to be a final decision, and shall be appealable to a district court of the United States pursuant to subsection (g).".

(c) CONFORMING AMENDMENTS TO TITLE XI.—(1) Section 1128(f), as amended by section 112(b)(8) of this Act, is further amended by inserting ", as in effect immediately preceding the date of the enactment of the Social Security Restoration Act of 1990" after "as provided in section 205(b)".

(2) Section 1155, as amended by section 112(b)(10) of this Act, is further amended by inserting ", as in effect immediately preceding the date of the enactment of the Social Security Restoration Act of 1990" after "under section 205(b)".

(3) Section 1156(b) is amended—

(A) in paragraph (4), by inserting ", as in effect immediately preceding the date of the enactment of the Social Security Restoration Act of 1990" after "as is provided in section 205(b)"; and

(B) in paragraph (5), by striking "(described in section 205(b))" and inserting "(described in section 205(b), as in effect immediately preceding the date of the enactment of the Social Security Restoration Act of 1990)".

(d) CONFORMING AMENDMENTS TO TITLES XVIII AND XIX.—(1) Section 1869 (b)(1), as amended by section 112(c)(4) of this Act, is amended in the matter following subparagraph (D), by inserting ", as in effect immediately preceding the date of the enactment of the Social Security Restoration Act of 1990" after "section 205(b)".

(2) Subparagraph (B) of section 1876(c)(5) is amended by inserting ", as in effect immediately preceding the date of the enactment of the Social Security Restoration Act of 1990" after "section 205(b)".

(3) Section 1910(b)(2), as amended by section 112(d) of this Act, is amended by inserting ", as in effect immediately preceding the date of the enactment of the Social Security Restoration Act of 1990" after "section 205(b)".

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect with respect to requests for hearings made on or after the date that is 180 days after the date of the enactment of this section.

TITLE V—SOCIAL SECURITY ADMINISTRATION EMPLOYEES

SEC. 501. MINIMUM FULL-TIME EMPLOYEE LEVEL.

(a) IN GENERAL.—The number of Federal employees in full-time positions in the Social Security Administration shall be not less than 70,000.

(b) EFFECTIVE DATE.—This section shall take effect beginning on the first day of fiscal year 1991.

TITLE VI—TELEPHONE ACCESS

SEC. 601. TELEPHONE ACCESS TO FIELD OFFICES OF THE SOCIAL SECURITY ADMINISTRATION.

(a) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Health and Human Services (hereinafter referred to as the "Secretary"), in consultation with the Commissioner of the Social Security Administration (hereinafter referred to as the "Commissioner") shall require that—

(1) each field office of the Social Security Administration shall receive telephone calls from the general public in the geographic area in which the field office operates; or

(2) shall restore and maintain the level of regional telephone access by the general public to the level that was available on September 30, 1988.

(b) TOLL-FREE TELEPHONE SYSTEMS.—Not later than 180 days after the date of the enactment of this Act, the Secretary, in consultation with the Commissioner, shall require that when a caller from the general public makes a call through a toll-free telephone system provided by the Social Security Administration, such caller shall be informed that such caller has the option of contacting—

(A) the field office in the geographic area in which the caller resides (if any); or

(B) the regional teleservice center that is closest to such geographic area (if such regional teleservice center received local calls prior to October 1, 1988).

(2) Whether or not a caller requests an option described in subparagraph (A) or (B) of paragraph (1), the regulations promulgated under subsection (b) shall require that a caller be provided the telephone number of the local field office or regional teleservice center described in such paragraph upon the request of such caller.

(c) PUBLICATION OF TELEPHONE NUMBER AND ADDRESS.—Not later than 180 days after the date of the enactment of this Act, the Secretary, in consultation with the Commission-

er, shall require the publication for each local geographic area of—

(1) the telephone number and address of the field office described in subsection (a) serving such local geographic area; or

(2) the telephone number of the regional teleservice center in the geographic area that is closest to such geographic area.

TITLE VII—IMPROVEMENT OF W-2 FORMS

SEC. 701. IMPROVEMENT OF W-2 FORMS.

For taxable years beginning after December 31, 1991, the Secretary of the Treasury shall revise—

(1) W-2 forms; and

(2) any other Federal tax forms that the Secretary of the Treasury determines to be appropriate,

to change the designation for social security and medicare taxes from "FICA" to "SOC SEC" (for old-age, survivors, and disability insurance taxes), and "MEDICARE" (for hospital insurance taxes).●

By Mr. RIEGLE (for himself, Mr. LEVIN, Mr. D'AMATO, Mr. DOMENICI, and Mr. COATS):

S.J. Res. 286. Joint resolution to designate the week beginning May 6, 1990, as "National Correctional Officers Week"; to the Committee on the Judiciary.

NATIONAL CORRECTIONAL OFFICERS WEEK

● Mr. RIEGLE. Mr. President, today I am introducing legislation to designate the week beginning May 6, 1990, as "National Correctional Officers Week". I hope that this designation will provide much-deserved public recognition of the difficult and often dangerous work performed by our Nation's correctional officers.

Correctional officers work throughout our jail and prison systems and are currently responsible for the containment and control of over 600,000 prisoners. These officers must maintain order and protect inmates from violence while also encouraging them to develop skills and attitudes that can help them become productive members of society following their release.

These men and women are on the front lines in our criminal justice system. Since their work is out of the public's view, however, they remain unsung soldiers in the war against crime. I hope that this week of recognition will offer some form of public recognition and appreciation for a job well done.

The House and Senate passed this resolution in 1984, 1985, 1987, and 1989. As we enter the 1990's and step up our efforts in the war against crime and drugs, it is again appropriate to recognize the professionals who dedicate their lives and careers to law enforcement. I urge my colleagues to join me in cosponsoring this resolution.

Mr. President, I ask unanimous consent that the full text of the resolution be included in the RECORD at the conclusion of my remarks.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 286

Whereas American correctional officers who work in our jails and prisons are currently responsible for the containment and control of over 600,000 prisoners;

Whereas correctional officers must protect inmates from violence while encouraging them to develop skills and attitudes that can help them become productive members of society following their release;

Whereas the morale of correctional officers is affected by many factors, and the public perception of the role of correctional officers is more often based upon dramatization rather than factual review;

Whereas good job performance requires correctional officers to absorb the adverse attitudes present in confinement while maintaining themselves as professionals in order to have their actions appreciated and accepted by the public at large;

Whereas correctional officers had been similarly honored by many States and localities;

Whereas correctional officers had been similarly honored by a joint resolution in the Senate and House of Representatives of the United States in Congress assembled in 1984, 1985, 1987, and 1989; and

Whereas the attitude and morale of correctional officers is a matter worthy of serious congressional attention: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning May 6, 1990, is hereby designated "National Correctional Officers Week", and the President of the United States is authorized and requested to issue a proclamation calling on the people of the United States to observe such week with appropriate ceremonies and activities.●

By Mr. PELL (for himself, Mr. HATFIELD, Mr. MITCHELL, Mr. JEFFORDS, Mr. CRANSTON, Mr. HARKIN, Mr. KENNEDY, Mr. KERRY, Mr. MATSUNAGA, and Mr. SIMON):

S.J. Res. 287. Joint resolution requesting the President of the United States to negotiate agreements to achieve early prohibition of nuclear explosions; to the Committee on Foreign Relations.

NUCLEAR TESTING

● Mr. PELL. Mr. President, today the Senator from Oregon [Mr. HATFIELD] and I and eight other original cosponsors are introducing a joint resolution designed to put the Congress on record with regard to nuclear testing constraints and a complete ban on nuclear testing.

At present, the United States and the Soviet Union are completing negotiations on verification protocols for two nuclear testing treaties, the 1974 Threshold Test Ban Treaty and the 1976 Peaceful Nuclear Explosions Treaty. The two protocols are to be signed at the June summit and sent to the Senate for consideration together with the two treaties. The resolution endorses that plan by the leaders of the two sides.

The resolution also encourages a successful summit by urging that the President—

Convey to the Soviet Union the desire of the United States to continue the bilateral Nuclear Testing Talks to identify and agree upon a definite timetable for the early achievement of a verifiable comprehensive test ban.

There is no reason not to continue immediately with these talks. To do so would represent the fulfillment of a solemn and long-standing commitment. I am sure that our early experience under the TTBT and PNET with the provisions of the new in force protocols would help as we shape further agreements, although it would not be critical to that effort.

The resolution also encourages the President to express to those nations party to the Limited Test Ban Treaty of 1963 our willingness to "prepare for and pursue negotiations in good faith" at a Test Ban Treaty Conference that will be convened early next year to consider amending the Limited Test Ban Treaty. The LTBT banned all but underground nuclear explosions. The amendment would make the treaty comprehensive. Under the terms of the treaty, any amendment must be approved by a majority of the parties to the LTBT, as well as by all of the original parties—the United States, Great Britian, and the Soviet Union. Thus, the three original parties have veto rights.

I am sure that many would believe that a comprehensive test ban is not an immediate prospect, nor, even, an urgent goal. Moreover, some would argue a multilateral conference is not the way to achieve a total ban. I am convinced that the comprehensive test ban is a major and justifiable goal and that we should be serious in our dealings with other nations with regard to the Soviet Union and to a comprehensive ban. If we are serious about this, I am convinced that we can achieve an effectively verifiable comprehensive test ban which enhances our national security interests.

I hope that the administration will understand the vital importance of moving forcefully so that we can curb the development of new weapons, decrease our reliance upon nuclear weapons, and show other potential nuclear weapons states that we are serious about halting nuclear weapons tests.

Mr. President, we are now in the midst of the fifth decade since nuclear weapons were used in war against Hiroshima and Nagasaki. Most of the world's population was not yet born when that devastation occurred. And for those who were alive in 1945, the ruination brought on by these two bombs is now a remote memory.

Most of those who saw those early atomic tests, who felt that first flash and its heat upon their faces, have passed from the scene. And, as nuclear testing has gone underground, these weapons have, in a sense, become sanitized for many. They have lost their ability to awe and shock.

The Hiroshima and Nagasaki holocausts were brought on by two crude weapons, each with an explosive force of less than 20 kilotons. Today, the five known nuclear weapons states have deployed nuclear arsenals containing a total of more than 40,000 weapons. Most of those weapons are far larger than the two weapons that introduced the world to nuclear war. Moreover, more than five nations may have nuclear weapons, and others want them—including terrorists desperately seeking the ultimate terrorist threat.

The need to seek controls upon and the reduction of nuclear weapons will remain until nations no longer perceive themselves to be dependent on nuclear weapons, no longer see them as a means of war, and no longer wish to threaten others with annihilation.

We knew in 1963 that the Limited Test Ban Treaty represented a signal success for President Kennedy. He understood fully the importance of that treaty and put his personal effort into achieving agreement with the British and the Soviets. The treaty was negotiated in Moscow in only 10 days in a process that built upon the good aspects of the Soviets' initial position.

In the preamble to the treaty, the nations signing asserted that they were:

> Seeking to achieve the discontinuance of all test explosions of nuclear weapons for all time, determined to continue negotiations to this end, desiring to put an end to the contamination of man's environment by radioactive substance.

The flame of hope represented by that pledge has flickered, sputtered, and even seemed about to expire. That flame of hope has never died.

Speaking as one Senator, I believe it is appalling that we have made so little progress toward bringing nuclear testing to an end since President Kennedy's dramatic breakthrough in 1963. It is pathetic that we are still wrestling with the TTBT and PNET, 13 years after they were negotiated by Presidents Ford and Nixon. It is shameful that we have not resumed the negotiations during which so much progress was made by President Carter toward a comprehensive test ban. Sometimes we seem to have a striking and lamentable inability to recognize our true national interests and to pursue them.

Mr. President, I believe that our President will complete work on the verification protocols and submit them to the Senate within several months. I believe that the President and the Soviet leader should agree in June to deal with the comprehensive test ban issue forcefully and effectively. We have an opportunity to fulfill a pledge made 25 years ago. We must not falter now.

Mr. President, I hope very much that other Senators will join us in cosponsoring this legislation and that the Congress will approve the resolution—thus making a strong and clear statement in support of early progress toward a comprehensive test ban.●

● Mr. HATFIELD. Mr. President, as Senators who have long struggled for nuclear arms control, we are introducing this resolution as a symbol of congressional support for a Comprehensive Test Ban Treaty. Senator PELL and I have known times of real discouragement in our efforts to achieve lasting security through verifiable bans on nuclear testing. But I think he and many of our colleagues share the view that we now are faced with an incredible opportunity to achieve limitations on nuclear testing—and a better chance to end the existence of nuclear weapons.

This resolution is offered as an encouragement to President Bush as he prepares this summer's summit with President Gorbachev. The freeing of Eastern Europe and the warming of effects of glasnost and perestroika have changed our own security interests in both perception and reality. As our relationship with the Soviet Union moves from one of suspicion and confrontation to one of stability, mutual agreements on nuclear testing are vital. For until limitations on testing are in place our countries will continue to have an escalating arms race clouding our relationship.

As the calls for new national security policy are heeded by those responsible for conventional and nuclear disarmament, we cannot ignore the efforts of those parties to the Limited Test Ban Treaty who seek to broaden that agreement into a verifiable and broad-ranging ban on nuclear testing. Our resolution asks that the United States clearly communicate that we have a desire to pursue negotiations to their natural conclusion: a Comprehensive Test Ban Treaty.

Mr. President, we have moved forward in the arena of nuclear arms treaty agreements but we have not truly moved forward with nuclear arms control. Despite the INF Treaty and the likely START agreement, our arsenals are bulging with sophisticated, destabilizing weaponry. Only if we are able to develop a comprehensive and verifiable ban on the testing of these weapons will we come closer to guaranteeing that our world will never again suffer nuclear destruction.●

ADDITIONAL COSPONSORS

S. 273

At the request of Mr. HEINZ the name of the Senator from Indiana [Mr. COATS] was added as a cosponsor of S. 273, a bill to amend title 39 United States Code, to designate as nonmailable matter solicitations of donations which could reasonably be misconstrued as a bill, invoice, or statement of account due, solicitations for the purchase of products or services which are provided either free of charge or at a lower price by the Federal Government connection or endorsement, unless such matter contains an appropriate, conspicuous disclaimer, and for other purposes.

S. 341

At the request of Mr. HOLLINGS, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 341, a bill to amend the Federal Aviation Act of 1958 to prohibit discrimination against blind individuals in air travel.

S. 1109

At the request of Mrs. KASSEBAUM, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1109, a bill to amend the Carl D. Perkins Vocational Education Act to extend the authorities contained in such Act through the fiscal year 1995.

S. 1511

At the request of Mr. PRYOR, the names of the Senator from California [Mr. CRANSTON], and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of S. 1511, a bill to amend the Age Discrimination in Employment Act of 1967 to clarify the protections given to older individuals in regard to employee benefit plans, and for other purposes.

S. 1542

At the request of Mr. HATFIELD, the names of the Senator from Alaska [Mr. STEVENS], and the Senator from New Mexico [Mr. DOMENICI] were added as cosponsors of S. 1542, a bill to amend chapter 55 of title 5, United States Code, to include certain employees of the Department of Commerce as forest firefighters.

S. 1557

At the request of Mr. ROTH, the name of the Senator from Kentucky [Mr. MCCONNELL] was added as a cosponsor of S. 1557, a bill to amend title 17 United States Code to permit the unlicensed viewing of videos under certain conditions.

S. 1578

At the request of Mr. FOWLER, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 1578, a bill to provide for the creation of an independent Historic Preservation Agency and a National

Center for Preservation Technology, and for other purposes.

S. 1579

At the request of Mr. FOWLER, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 1579, a bill to amend the National Historic Preservation Act, the Historic Sites Act, the Archaeological Resoures Protection Act, and the Abandoned Shipwreck Act, and certain related Acts to strengthen the preservation of our historic heritage and resources and for other purposes.

S. 1890

At the request of Mr. THURMOND, the names of the Senator from New Mexico [Mr. BINGAMAN], the Senator from Oregon [Mr. HATFIELD], and the Senator from Georgia [Mr. FOWLER] were added as cosponsors of S. 1890, a bill to amend title 5, United States Code, to provide relief from certain inequities remaining in the crediting of National Guard technician service in connection with civil service retirement, and for other purposes.

S. 1933

At the request of Mr. HEINZ, the names of the Senator from New Mexico [Mr. DOMENICI], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Montana [Mr. BURNS], the Senator from Utah [Mr. HATCH], the Senator from Massachusetts [Mr. KERRY], the Senator from North Dakota [Mr. BURDICK], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Arizona [Mr. DECONCINI], the Senator from Virginia [Mr. ROBB], the Senator from Delaware [Mr. BIDEN], and the Senator from Iowa [Mr. HARKIN] were added as cosponsors of S. 1933, a bill to provide for the minting of coins in commemoration of the bicentennial of the death of Benjamin Franklin and to enact a fireservice bill of rights and programs to fulfill those rights.

S. 2005

At the request of Mr. GRAHAM, the names of the Senator from Arkansas [Mr. BUMPERS], and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of S. 2005, a bill to repeal the provision of law exempting intercity rail passenger service from certain waste disposal requirements.

S. 2046

At the request of Mr. BURDICK, the names of the Senator from North Carolina [Mr. SANFORD], and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of S. 2046, a bill to establish a National Infrastructure Council and for related purposes.

S. 2187

At the request of Mr. COCHRAN, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of S. 2187, a bill to amend the Public Health Service Act to make grants to encourage States to establish Offices of Rural Health to improve health care in rural areas.

S. 2222

At the request of Mr. BRADLEY, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2222, a bill to amend the Internal Revenue Code of 1986 with respect to the tax treatment of payments under life insurance contracts for terminally ill individuals.

S. 2227

At the request of Mr. LEVIN, his name was added as a cosponsor of S. 2227, a bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act to reform the provisions of such Act governing exported pesticides, and for other purposes.

S. 2229

At the request of Mr. DODD, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 2229, a bill to reauthorize the Head Start Act for fiscal years 1991 through 1994, and for other purposes.

S. 2252

At the request of Mr. SIMON, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 2252, a bill to encourage and facilitate entry into the teaching profession, and for other purposes.

S. 2256

At the request of Mr. HARKIN, the names of the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Washington [Mr. GORTON], the Senator from Mississippi [Mr. COCHRAN], the Senator from North Dakota [Mr. BURDICK], and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of S. 2256, a bill to amend title XIX of the Public Health Service Act to clarify the provisions of the allotment formula relating to urban and rural areas, and for other purposes.

S. 2286

At the request of Mr. HOLLINGS, the name of the Senator from Louisiana [Mr. BREAUX] was added as a cosponsor of S. 2286, a bill to require the Secretary of Transportation to lead and coordinate Federal efforts in the development of magnetic levitation transportation technology and foster implementation of a magnetic levitation transportation system.

S. 2384

At the request of Mr. BOREN, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 2384, a bill to amend the Internal Revenue Code of 1986 with respect to the treatment of certain real estate activities under the limitations on losses from passive activities.

S. 2400

At the request of Mr. ARMSTRONG, the name of the Senator from Montana [Mr. BURNS] was added as a cosponsor of S. 2400, a bill to amend section 7430 of the Internal Revenue Code of 1986 with respect to eligibility of taxpayers to receive attorney fees and other costs.

SENATE JOINT RESOLUTION 228

At the request of Mr. FORD, the names of the Senator from North Carolina [Mr. SANFORD], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 228, a joint resolution to designate May 1, 1990, through May 31, 1990, as "Worldwide Bluegrass Music Month."

SENATE JOINT RESOLUTION 275

At the request of Mr. PELL, the names of the Senator from Washington [Mr. ADAMS], the Senator from Colorado [Mr. ARMSTRONG], the Senator from Delaware [Mr. BIDEN], the Senator from Louisiana [Mr. BREAUX], the Senator from Nevada [Mr. BRYAN], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from Maine [Mr. COHEN], the Senator from California [Mr. CRANSTON], the Senator from Utah [Mr. GARN], the Senator from Utah [Mr. HATCH], the Senator from Alabama [Mr. HEFLIN], the Senator from Vermont [Mr. JEFFORDS], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Florida [Mr. MACK], the Senator from Kentucky [Mr. MCCONNELL], the Senator from Alaska [Mr. MURKOWSKI], the Senator from South Dakota [Mr. PRESSLER], the Senator from Arkansas [Mr. PRYOR], the Senator from Nevada [Mr. REID], the Senator from North Carolina [Mr. SANFORD], the Senator from Alabama [Mr. SHELBY], the Senator from Wyoming [Mr. SIMPSON], the Senator from Virginia [Mr. WARNER], and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of Senate Joint Resolution 275, a joint resolution designating May 13, 1990, as the "National Day in Support of Freedom and Human Rights in China and Tibet."

SENATE JOINT RESOLUTION 276

At the request of Mr. LIEBERMAN, the names of the Senator from California [Mr. WILSON], the Senator from Rhode Island [Mr. CHAFEE], and the Senator from Virginia [Mr. WARNER] were added as cosponsors of Senate Joint Resolution 276, a joint resolution designating the week beginning July 22, 1990, as "Lyme Disease Awareness Week."

SENATE JOINT RESOLUTION 282

At the request of Mr. WILSON, the names of the Senator from Kansas [Mr. DOLE], the Senator from Arizona [Mr. DECONCINI], the Senator from New York [Mr. D'AMATO], the Senator from Rhode Island [Mr. CHAFEE], the Senator from South Carolina [Mr. THURMOND], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Minnesota [Mr. DURENBERGER],

the Senator from Florida [Mr. MACK], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Connecticut [Mr. LIEBERMAN] were added as cosponsors of Senate Joint Resolution 282, a joint resolution to designate the decade beginning January 1, 1990, as the "Decade of the Child."

SENATE CONCURRENT RESOLUTION 91

At the request of Mr. HATFIELD, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of Senate Concurrent Resolution 91, a concurrent resolution expressing the sense of the Congress with respect to achieving common security in the world by reducing reliance on the military and redirecting resources toward overcoming hunger and poverty and meeting basic human needs.

SENATE CONCURRENT RESOLUTION 106

At the request of Mr. MOYNIHAN, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of Senate Concurrent Resolution 106, a concurrent resolution expressing the sense of the Congress concerning Jerusalem and the peace process.

SENATE CONCURRENT RESOLUTION 119—CONCURRENT RESOLUTION ON THE BUDGET

Mr. HOLLINGS submitted the following resolution; which was referred to the Committee on the Budget.

Subsequently,

The Committee on the Budget was discharged from the further consideration of the concurrent resolution; which was placed on the calendar:

S. CON. RES. 119

Resolved by the Senate (the House of Representatives concurring), That the Congress determines and declares that the concurrent resolution on the budget for fiscal year 1991 is established and the appropriate budgetary levels for fiscal years 1992 and 1993 are set forth.

MAXIMUM DEFICIT AMOUNTS

SEC. 2. The following levels and amounts in this section are set forth for purposes of determining, in accordance with section 301(i) of the Congressional Budget and Impoundment Control Act of 1974, as amended by the Balanced Budget and Emergency Deficit Control Act of 1985 and the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987, whether the maximum deficit amount for a fiscal year has been exceeded, and as set forth in this concurrent resolution, shall be considered to be mathematically consistent with the other amounts and levels set forth in this concurrent resolution:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1991: $1,182,000,000,000.
Fiscal year 1992: $1,321,500,000,000.
Fiscal year 1993: $1,439,300,000,000.

(2) The appropriate levels of total budget authority are as follows:

Fiscal year 1991: $1,438,500,000,000.
Fiscal year 1992: $1,478,000,000,000.
Fiscal year 1993: $1,564,900,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1991: $1,241,500,000,000.
Fiscal year 1992: $1,282,300,000,000.
Fiscal year 1993: $1,324,100,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1991: $59,500,000,000.
Fiscal year 1992: $39,200,000,000 (surplus).
Fiscal year 1993: $115,200,000,000 (surplus).

DEBT INCREASE AS ONE MEASURE OF DEFICIT

SEC. 3. The amounts of the increase in the public debt subject to limitation are as follows:

Fiscal year 1991: $186,400,000,000.
Fiscal year 1992: $103,700,000,000.
Fiscal year 1993: $41,600,000,000.

DEFICIT LEVELS EXCLUDING TRUST FUND SURPLUSES

SEC. 4. (a)(1) The amounts of the surpluses of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund are as follows:

Fiscal year 1991: $74,200,000,000.

Fiscal year 1993: $17,900,000,000 (surplus).

(b) The amounts of the deficit excluding the receipts and disbursements of all Federal trust funds are as follows:

Fiscal year 1991: $197,900,000,000.
Fiscal year 1992: $105,700,000,000.
Fiscal year 1993: $39,300,000,000.

RECOMMENDED LEVELS AND AMOUNTS

SEC. 5. (a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1990, October 1, 1991, and October 1, 1992:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1991: $873,100,000,000.
Fiscal year 1992: $991,800,000,000.
Fiscal year 1993: $1,087,100,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1991: $26,600,000,000.
Fiscal year 1992: $88,100,000,000.
Fiscal year 1993: $117,500,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1991: $74,600,000,000.
Fiscal year 1992: $79,600,000,000.
Fiscal year 1993: $85,100,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1991: $1,129,500,000,000.
Fiscal year 1992: $1,148,100,000,000.
Fiscal year 1993: $1,212,300,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1991: $1,006,800,000,000.
Fiscal year 1992: $1,037,700,000,000.
Fiscal year 1993: $1,069,200,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1991: $133,700,000,000.
Fiscal year 1992: $45,900,000,000.
Fiscal year 1993: $17,900,000,000 (surplus).

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1991: $3,312,100,000,000.
Fiscal year 1992: $3,417,300,000,000.
Fiscal year 1993: $3,520,300,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1990, October 1, 1991, and October 1, 1992, are as follows:

Fiscal year 1991:
(A) New direct loan obligations, $20,900,000,000.
(B) New primary loan guarantee commitments, $106,100,000,000.
(C) New secondary loan guarantee commitments, $85,400,000,000.

Fiscal year 1992:
(A) New direct loan obligations, $17,700,000,000.
(B) New primary loan guarantee commitments, $109,900,000,000.
(C) New secondary loan guarantee commitments, $88,800,000,000.

Fiscal year 1993:
(A) New direct loan obligations, $18,100,000,000.
(B) New primary loan guarantee commitments, $112,600,000,000.
(C) New secondary loan guarantee commitments, $92,300,000,000.

(b) The Congress hereby determines and declares that the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, new primary loan guarantee commitments, and new secondary loan guarantee commitments for fiscal years 1991 through 1993 for each major functional category are:

(1) National Defense (050):

Fiscal year 1991:
(A) New budget authority, $292,700,000,000.
(B) Outlays, $292,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

Fiscal year 1992:
(A) New budget authority, $304,400,000,000.
(B) Outlays, $298,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

Fiscal year 1993:
(A) New budget authority, $316,600,000,000.
(B) Outlays, $306,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

(2) International Affairs (150):

Fiscal year 1991:
(A) New budget authority, $19,000,000,000.
(B) Outlays, $16,900,000,000.
(C) New direct loan obligations, $1,800,000,000.
(D) New primary loan guarantee commitments, $6,700,000,000.
(E) New secondary loan guarantee commitments, $400,000,000.

Fiscal year 1992:
(A) New budget authority, $18,400,000,000.
(B) Outlays, $17,200,000,000.
(C) New direct loan obligations, $1,900,000,000.
(D) New primary loan guarantee commitments, $7,000,000,000.
(E) New secondary loan guarantee commitments, $400,000,000.

Fiscal year 1993:
(A) New budget authority, $18,500,000,000.
(B) Outlays, $18,422,200,000.

(C) New direct loan obligations, $2,000,000,000.
(D) New primary loan guarantee commitments, $7,300,000,000.
(E) New secondary loan guarantee commitments, $400,000,000.
(3) General Science, Space, and Technology (250):
Fiscal year 1991:
(A) New budget authority, $17,300,000,000.
(B) Outlays, $16,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $17,300,000,000.
(B) Outlays, $17,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $18,000,000,000.
(B) Outlays, $17,600,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(4) Energy (270):
Fiscal year 1991:
(A) New budget authority, $6,000,000,000.
(B) Outlays, $4,500,000,000.
(C) New direct loan obligations, $1,900,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $5,300,000,000.
(B) Outlays, $3,900,000,000.
(C) New direct loan obligations, $1,600,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $6,000,000,000.
(B) Outlays, $4,700,000,000.
(C) New direct loan obligations, $1,900,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(5) Natural Resources and Environment (300):
Fiscal year 1991:
(A) New budget authority, $18,000,000,000.
(B) Outlays, $18,700,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $18,800,000,000.
(B) Outlays, $18,900,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $18,400,000,000.
(B) Outlays, $18,400,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(6) Agriculture (350):
Fiscal year 1991:
(A) New budget authority, $18,900,000,000.
(B) Outlays, $15,100,000,000.
(C) New direct loan obligations, $9,100,000,000.
(D) New primary loan guarantee commitments, $7,000,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $21,500,000,000.
(B) Outlays, $16,100,000,000.
(C) New direct loan obligations, $8,900,000,000.
(D) New primary loan guarantee commitments, $7,300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $18,900,000,000.
(B) Outlays, $14,700,000,000.
(C) New direct loan obligations, $8,700,000,000
(D) New primary loan guarantee commitments, $6,700,000,000.
(E) New secondary loan guarantee commitments, $0.
(7) Commerce and Housing Credit (370):
Fiscal year 1991:
(A) New budget authority, $46,000,000,000.
(B) Outlays, $45,900,000,000.
(C) New direct loan obligations, $6,200,000,000.
(D) New primary loan guarantee commitments, $63,300,000,000.
(E) New secondary loan guarantee commitments, $85,000,000,000.
Fiscal year 1992:
(A) New budget authority, $14,900,000,000.
(B) Outlays, $4,500,000,000.
(C) New direct loan obligations, $3,500,000,000.
(D) New primary loan guarantee commitments, $65,500,000,000.
(E) New secondary loan guarantee commitments, $88,400,000,000.
Fiscal year 1993:
(A) New budget authority, $25,900,000,000.
(B) Outlays, $13,700,000,000.
(C) New direct loan obligations, $3,600,000,000.
(D) New primary loan guarantee commitments, $67,900,000,000.
(E) New secondary loan guarantee commitments, $91,900,000,000.
(8) Transportation (400):
Fiscal year 1991:
(A) New budget authority, $31,900,000,000.
(B) Outlays, $30,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $100,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $33,600,000,000.
(B) Outlays, $32,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $35,000,000,000.
(B) Outlays, $33,800,000,000.
(C) New direct loan obligations, $0.

(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $12,800,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $47,600,000,000.
(B) Outlays, $46,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $13,500,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $48,700,000,000.
(B) Outlays, $48,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $13,800,000,000.
(E) New secondary loan guarantee commitments, $0.
(11) Health (550):
Fiscal year 1991:
(A) New budget authority, $65,800,000,000.
(B) Outlays, $64,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $72,800,000,000.
(B) Outlays, $72,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $80,200,000,000.
(B) Outlays, $79,800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
(12) Medicare (570):
Fiscal year 1991:
(A) New budget authority, $123,400,000,000.

(B) Outlays, $102,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $134,200,000,000.
(B) Outlays, $115,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $147,000,000,000.
(B) Outlays, $128,600,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(13) Income Security (600):
Fiscal year 1991:
(A) New budget authority, $202,400,000,000.
(B) Outlays, $156,000,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $210,600,000,000.
(B) Outlays, $164,900,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $218,300,000,000.
(B) Outlays, $175,900,000,000.
(C) New direct loan obligations, $100,000,000.

(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, $214,400,000,000.
(B) Outlays, $214,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(19) The corresponding levels of gross interest on the public debt are as follows:
Fiscal year 1991: $270,900,000,000.
Fiscal year 1992: $227,400,000,000.
Fiscal year 1993: $214,900,000,000.
(20) Allowances (920):
Fiscal year 1991:
(A) New budget authority, −$3,400,000,000.
(B) Outlays, −$2,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, −$3,600,000,000.
(B) Outlays, −$3,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, −$3,800,000,000.
(B) Outlays, −$3,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(21) Undistributed Offsetting Receipts (950):
Fiscal year 1991:
(A) New budget authority, −$29,900,000,000.
(B) Outlays, −$70,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, −$29,000,000,000.
(B) Outlays, −$46,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1993:
(A) New budget authority, −$27,800,000,000.
(B) Outlays, −$70,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

RECONCILIATION

SEC. 6. (a) Not later than June 15, 1990, the committees named in subsections (b)

and (c) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(b)(1) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $1,179,000,000 in budget authority and $1,179,000,000 in outlays in fiscal year 1991; $1,282,000,000 in budget authority and $1,282,000,000 in outlays in fiscal year 1992; and $1,286,000,000 in budget authority and $1,286,000,000 in outlays in fiscal year 1993.

(2) The Senate Committee on Armed Services shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce outlays: $216,000,000 in fiscal year 1991; $301,000,000 in fiscal year 1992; and $320,000,000 in fiscal year 1993.

(3)(A) The Senate Committee on Banking, Housing, and Urban Affairs shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $56,000,000 in budget authority and $554,000,000 in outlays in fiscal year 1991; $127,000,000 in budget authority and $900,000,000 in outlays in fiscal year 1992; and $200,000,000 in budget authority and $772,000,000 in outlays in fiscal year 1993.

(B) The Senate Committee on Banking, Housing, and Urban Affairs shall report changes in laws within its jurisdiction sufficient to increase revenues: $90,000,000 in fiscal year 1991; $94,000,000 in fiscal year 1992; and $97,000,000 in fiscal year 1993.

(4) The Senate Committee on Commerce, Science, and Transportation shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $295,000,000 in budget authority and $295,000,000 in outlays in fiscal year 1991; $317,000,000 in budget authority and $317,000,000 in outlays in fiscal year 1992; and $327,000,000 in budget authority and $327,000,000 in outlays in fiscal year 1993.

(5) The Senate Committee on Energy and Natural Resources shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $204,000,000 in budget authority and $153,000,000 in outlays in fiscal year 1991; $214,000,000 in budget authority and $209,000,000 in outlays in fiscal year 1992; and $214,000,000 in budget authority and $214,000,000 in outlays in fiscal year 1993.

(6) The Senate Committee on Environment and Public Works shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $206,000,000 in budget authority and $206,000,000 in outlays in fiscal year 1991; $228,000,000 in budget authority and $228,000,000 in outlays in fiscal year 1992; and $236,000,000 in budget authority and $236,000,000 in outlays in fiscal year 1993.

(7)(A) The Senate Committee on Finance shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce outlays: $3,001,000,000 in fiscal year 1991; $4,898,000,000 in fiscal year 1992; and $6,588,000,000 in fiscal year 1993.

(B) The Senate Committee on Finance shall report changes in laws within its jurisdiction sufficient to increase revenues: $26,400,000,000 in fiscal year 1991; $79,800,000,000 in fiscal year 1992; and $117,100,000,000 in fiscal year 1993.

(8) The Senate Committee on Governmental Affairs shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce outlays: $1,703,000,000 in fiscal year 1991; $1,501,000,000 in fiscal year 1992; and $838,000,000 in fiscal year 1993.

(9)(A) The Senate Committee on Labor and Human Resources shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $0 in budget authority and $65,000,000 in outlays in fiscal year 1991; $0 in budget authority and $65,000,000 in outlays in fiscal year 1992; and $0 in budget authority and $67,000,000 in outlays in fiscal year 1993.

(B) The Senate Committee on Labor and Human Services shall report changes in laws within its jurisdiction sufficient to increase revenues: $108,000,000 in fiscal year 1991; $229,000,000 in fiscal year 1992; and $280,000,000 in fiscal year 1993.

(10) The Senate Committee on Small Business shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $50,000,000 in budget authority and $50,000,000 in outlays in fiscal year 1991; $52,000,000 in budget authority and $52,000,000 in outlays in fiscal year 1992; and $54,000,000 in budget authority and $54,000,000 in outlays in fiscal year 1993.

(11) The Senate Committee on Veterans' Affairs shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $386,000,000 in budget authority and $366,000,000 in outlays in fiscal year 1991; $425,000,000 in budget authority and $426,000,000 in outlays in fiscal year 1992; and $455,000,000 in budget authority and $464,000,000 in outlays in fiscal year 1993.

HOUSE COMMITTEES

(c)(1) The House Committee on Agriculture shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $1,179,000,000 in budget authority and $1,179,000,000 in outlays in fiscal year 1991; $1,282,000,000 in budget authority and $1,282,000,000 in outlays in fiscal year 1992; and $1,286,000,000 in budget authority and $1,286,000,000 in outlays in fiscal year 1993.

(2) The House Committee on Armed Services shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce outlays: $216,000,000 in fiscal year 1991; $301,000,000 in fiscal year 1992; and $320,000,000 in fiscal year 1993.

(3)(A) The House Committee on Banking, Finance and Urban Affairs shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $56,000,000 in budget authority and $554,000,000 in outlays in fiscal year 1991; $127,000,000 in budget authority and $900,000,000 in outlays in fiscal year 1992; and $200,000,000 in budget authority and $772,000,000 in outlays in fiscal year 1993.

(B) The House Committee on Banking, Finance and Urban Affairs shall report changes in laws within its jurisdiction sufficient to increase revenues: $90,000,000 in fiscal year 1991; $94,000,000 in fiscal year 1992; and $97,000,000 in fiscal year 1993.

(4)(A) The House Committee on Education and Labor shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $0 in budget authority and $65,000,000 in outlays in fiscal year 1991; $0 in budget authority and $65,000,000 in outlays in fiscal year 1992; and $0 in budget authority and $67,000,000 in outlays in fiscal year 1993.

(B) The House Committee on Education and Labor shall report changes in laws within its jurisdiction sufficient to increase revenues: $108,000,000 in fiscal year 1991; $229,000,000 in fiscal year 1992; and $280,000,000 in fiscal year 1993.

(5) The House Committee on Energy and Commerce shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $401,000,000 in budget authority and $401,000,000 in outlays in fiscal year 1991; $445,000,000 in budget authority and $445,000,000 in outlays in fiscal year 1992; and $463,000,000 in budget authority and $463,000,000 in outlays in fiscal year 1993.

(6) The House Committee on Interior and Insular Affairs shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $204,000,000 in budget authority and $153,000,000 in outlays in fiscal year 1991; $214,000,000 in budget authority and $209,000,000 in outlays in fiscal year 1992; and $214,000,000 in budget authority and $214,000,000 in outlays in fiscal year 1993.

(7) The House Committee on Merchant Marine and Fisheries shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $100,000,000 in budget authority and $100,000,000 in outlays in fiscal year 1991; $100,000,000 in budget authority and $100,000,000 in outlays in fiscal year 1992; and $100,000,000 in budget authority and $100,000,000 in outlays in fiscal year 1993.

(8) The House Committee on Post Office and Civil Service shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce outlays: $1,703,000,000 in fiscal year 1991; $1,501,000,000 in fiscal year 1992; and $838,000,000 in fiscal year 1993.

(9) The House Committee on Small Business shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $50,000,000 in budget authority and $50,000,000 in outlays in fiscal year 1991; $52,000,000 in budget authority and $52,000,000 in outlays in fiscal year 1992; and $54,000,000 in budget authority and $54,000,000 in outlays in fiscal year 1993.

(10) The House Committee on Veterans' Affairs shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce budget authority and outlays as follows: $386,000,000 in budget authority and $366,000,000 in outlays in fiscal year 1991; $425,000,000 in budget authority and $426,000,000 in outlays in fiscal year 1992; and $455,000,000 in budget authority and $464,000,000 in outlays in fiscal year 1993.

(11)(A) The House Committee on Ways and Means shall report changes in laws within its jurisdiction that provide spending authority (as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, other than as defined in section 401(c)(2)(C) of the Act, or any combination thereof) sufficient to reduce outlays: $3,001,000,000 in fiscal year 1991; $4,898,000,000 in fiscal year 1992; and $6,588,000,000 in fiscal year 1993.

(B) The House Committee on Ways and Means shall report changes in laws within its jurisdiction sufficient to increase revenues: $26,400,000,000 in fiscal year 1991; $79,800,000,000 in fiscal year 1992; and $117,100,000,000 in fiscal year 1993.

SALE OF GOVERNMENT ASSETS

SEC. 7. (a) It is the sense of the Congress that—

(1) from time to time the United States Government should sell assets to nongovernment buyers; and

(2) the amounts realized from such asset sales will not recur on an annual basis and do not reduce the demand for credit.

(b) For purposes of allocations and points of order under section 302 of the Congressional Budget and Impoundment Control Act of 1974, the amounts realized from asset sales or prepayments of loans shall not be allocated to a committee and shall not be scored with respect to the level of budget authority, outlays, or revenues under a committee's allocation under section 302 of that Act.

(c) For purposes of reconciliation under section 310 of the Congressional Budget and Impoundment Control Act of 1974, the amounts realized from asset sales or prepayments of loans shall not be scored with respect to the level of budget authority, outlays, or revenues reconciled under section 6 of this resolution.

(d) For purposes of this section—

(1) the terms "asset sale" and "prepayment of a loan" shall have the same meaning as under section 257(12) of the Balanced Budget and Emergency Deficit Control Act of 1985 (as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987); and

(2) the terms "asset sale" and "prepayment of a loan" do not include asset sales mandated by law before September 18, 1987, and routine, ongoing asset sales and loan prepayments at levels consistent with agency operations in fiscal year 1986.

RESERVE FUND FOR MEDICAID

SEC. 8. (a) It is assumed that, in the Senate, budget authority and outlays may be allocated to the Senate Committee on Finance for increased Medicaid funding if the Committee on Finance or the committee of conference reports Medicaid funding legislation that—

(1) will, if enacted, make funds available for that purpose; and

(2) to the extent that the costs of such legislation are not included in this resolution, will not increase the deficit in this resolution for fiscal year 1991, and will not increase the total deficit for the period of fiscal years 1991 through 1993.

(b) Upon the reporting of legislation pursuant to subsection (a), and again upon the submission of a conference report on such legislation (if such a conference report is submitted), the Chairman of the Committee on the Budget of the Senate may file with the Senate appropriately revised allocations under section 302(a) of the Congressional Budget Act of 1974 and revised functional levels and aggregates to carry out this section. Such revised allocations, functional levels, and aggregates shall be considered for the purposes of such Act as allocations, functional levels, and aggregates contained in this resolution. The Committee on Finance shall report revised allocations pursuant to section 302(b) of such Act for the appropriate fiscal year (or years) to carry out this section.

SENATE CONCURRENT RESOLUTION 120—COMMENDING THE NATIONAL MENTAL HEALTH LEADERSHIP FORUM AND THE NATIONAL ADVISORY MENTAL HEALTH COUNCIL

Mr. BOSCHWITZ (for himself and Mr. DURENBERGER) submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 120

Whereas one in five individuals will suffer from a mental illness at some time in their life, yet only one in five adults suffering from a mental illness receive care for their illness;

Whereas rates of teenage suicide are much higher in rural areas of the Nation than in urban areas;

Whereas one in five rural residents in the United States experience high levels of stress and depressive symptomatology;

Whereas mental illness among homeless individuals is a growing concern among mental health care providers;

Whereas mental health professionals have testified before the Congress regarding the alarming increase in the rate of mental disorders suffered by rural residents in the United States;

Whereas the Congress is concerned about the unmet mental health needs of older Americans and the necessity of increasing the knowledge of the causes, prevention, and treatment of childhood mental disorders; and

Whereas the National Mental Health Leadership Forum and the National Advisory Mental Health Council are cosponsoring a series of public hearings in 1990 addressing mental health topics of pressing concern in the United States: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress commends the National Mental Health Leadership Forum and the National Advisory Mental Health Council for cosponsoring a series of public hearings in 1990 addressing mental health issues important to the people of the United States, particularly the mental health of rural residents, child and adolescent mental disorders, and the mental health problems faced by homeless individuals.

● Mr. BOSCHWITZ. Mr. President, I rise today to submit a concurrent resolution on the importance of addressing mental health issues in this country. The resolution specifically commends

the National Mental Health Leadership Forum and the National Advisory Mental Health Council for cosponsoring a series of public hearings focusing on these issues. On April 12, a hearing on rural mental health will be held in Marshall, MN. I ask all of my colleagues to join Senator DURENBERGER and me in paying tribute to these organizations and their important work in the field of mental health.●

SENATE CONCURRENT RESOLUTION 121—RELATING TO AN INTERNATIONAL TREATY ON AGRICULTURAL CROPLAND CONSERVATION

Mr. PRESSLER submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 121

Whereas approximately one-fifth of the world's cropland is experiencing an intolerable rate of soil erosion;

Whereas the cost of farm program subsidies is at record levels in many nations;

Whereas the United States has taken the initiative of enrolling 31 million acres of agricultural land in a ten-year Conservation Reserve Program;

Whereas world food production historically has increased at an annual rate of 2.5 percent, but world food production during the 1980s has increased at an average rate of over 3 percent annually;

Whereas other grain surplus producing nations have expressed a need to limit agricultural production; and

Whereas all nations would benefit from the decreased agricultural subsidies and stabilized food production an international agricultural conservation reserve could provide: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That (a) it is the sense of the Congress that the President should initiate multilateral negotiations with all major agricultural commodity exporting nations to establish an international agricultural cropland conservation reserve to stabilize worldwide grain production and control soil erosion.

(b) Such an international agricultural cropland conservation reserve should include the following features:

(1) All signatory nations shall agree not to bring any virgin land into crop production, to return a certain percentage of cropland to its natural state, and to keep that land out of production for a minimum of ten years. The amount of land to be taken out of production shall be large enough to bring grain supplies in line with demand while still maintaining an adequate emergency food reserve.

(2) Cropland shall be taken out of production and sound conservation practices shall be implemented on that land to control soil erosion. Land taken out of production shall not be required to be classified as highly erodible.

(3) A portion of the land of all signatory nations may be returned to production if stocks fall below the level established for an emergency food reserve.

(4) A signatory nation may return a portion of its land to production if its production fails to meet domestic consumption demand.

Mr. PRESSLER. Mr. President, today I am introducing a resolution urging the administration to initiate multilateral negotiations with all major agricultural exporting nations to establish an international agricultural conservation reserve that would reduce soil erosion and equalize agricultural subsidy programs. The high cost of farm programs, export subsidies, and worldwide soil erosion problems provide a unique opportunity and need to reach such an agreement.

My resolution says that the administration should initiate multilateral negotiations on an international agricultural conservation reserve program. Such an agreement would require all grain exporting nations to agree not to bring any virgin land into production and to return an equal percentage of their cropland to grass or other natural cover. The land would have to be held out of production for a minimum of 10 years. Emergency provisions would be included to allow land to be brought back into production if a shortage of grain occurred or a nation's production fell below domestic consumption. Such an agreement would benefit all nations.

The United States has taken the initiative in idling more than 30 million acres through its Conservation Reserve Program [CRP]. In addition, more than 20 million more acres are idled because of U.S. farmers' cropland enrollment in other Federal farm programs. U.S. farmers must idle a percentage of their cropland in order to be eligible for crop subsidy payments. This has given an unfair advantage to foreign competitors who receive crop subsidies that do not hinge on the idling of cropland.

It is unfair for other countries to increase production when U.S. farmers idle millions of acres in an attempt to reduce surpluses and protect fragile lands. In 1983 the United States idled 83 million acres under the Payment-in-Kind [PIK] Program while other nations increased production. Total world production actually increased at that time. This illustrates not only the need for a global land diversion program, but also demonstrates that unnatural production controls would be unsuccessful in reducing world grain stocks.

Mr. President, as we work together in crafting the 1990 farm bill, we need to formulate a bill to keep our agricultural community prospering. However, one objective expressed to me by the farmers and ranchers I've visited with, and from whom I have received letters and phone calls, is fair treatment in the world trade arena. Our farmers and ranchers have proven that they are the most efficient and productive in the world. They desperately need to be able to compete fairly with other major agricultural exporting nations. At the appropriate time, I intend to offer my resolution as an amendment to the farm bill.

The 1990 farm bill will not eliminate set-aside programs. This is why we must look at an international land conservation program. It is vital not only for fair trade but also for the global protection of fragile lands.

I urge my colleagues to support this resolution, and welcome their suggestions for improving its provisions.

SENATE RESOLUTION 268—CONGRATULATING THE UNIVERSITY OF NEVADA AT LAS LEGAS FOR WINNING THE 1990 NCAA MEN'S BASKETBALL CHAMPIONSHIP

Mr. BRYAN (for himself and Mr. REID) submitted the following resolution; which was considered and agreed to:

S. RES. 268

Whereas the University of Nevada at Las Vegas has consistently produced one of the Nation's outstanding Division I men's basketball teams, the Runnin' Rebels;

Whereas the head coach and assistant coaches have led the Runnin' Rebels to the three final four appearances and one of the highest percentages of wins in National Collegiate Athletic Association men's basketball;

Whereas UNLV defeated Duke by the largest margin of victory in NCAA Men's Basketball Championship history (103-73) and is the only team to score over 100 points in a championship game;

Whereas three team members have been named to the All-Tournament Team, one member has been named as a first selection All-American, and one member represented his country in basketball during the 1988 Olympic Games; and

Whereas one team member epitomized the spirit and courage of the Runnin' Rebels by playing throughout the entire tournament with a broken jaw: Now, therefore, be it

Resolved, That the Senate commends the Runnin' Rebels of the University of Nevada at Las Vegas for winning the 1990 National Collegiate Athletic Association Men's Basketball Championship.

SENATE RESOLUTION 269—RELATIVE TO VACANCIES ON THE SOCIAL SECURITY BOARD OF TRUSTEES

Mr. MOYNIHAN (for himself, Mr. BENTSEN, Mr. BRADLEY, and Mr. HEINZ) submitted the following resolution; which was ordered to lie over under the rule:

S. RES. 269

SEC. 1. FINGINGS.—The Senate finds that—

(1) In the Social Security Amendments of 1983, Pub. L. 98-21, Congress made provision for two members of the public, one Democrat and one Republican, to serve on the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds for four-year terms; and

(2) In September 1984 President Reagan nominated the first public trustees, and these nominees were confirmed by the Senate the same month. The statutory

terms of the first public trustees expired in September 1988, and subsequent recess appointments by President Reagan of the same individuals to the same posts expired on November 22, 1989; and

(3) President Bush has not so far nominated any individuals to fill the posts of public trustees, and the posts remain vacant; and

(4) The Social Security Act requires the Social Security Board of Trustees to report to the Congress not later than the first day of April of each year on the operation and status of the Trust Funds; and

(5) April 1 has passed and the Board of Trustees has not submitted the required report on the status of the Trust Funds by the required due date.

SEC. 2. SENSE OF THE SENATE.—It is the sense of the Senate that the President should send to the Senate nominations for two public trustees to fill the current vacancies on the Social Security Board of Trustees, and upon confirmation such Trustees should be afforded full participation in the preparation of this year's Trustees Report.

SENATE RESOLUTION 270—RELATIVE TO THE FAMINE IN ETHIOPIA

Mr. SIMON (for himself, Mr. HUMPHREY, Mr. PELL, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. CRANSTON, Mr. HELMS, and Mr. MITCHELL) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 270

Whereas famine threatens the lives of some three million five hundred thousand to five million people in the northern Ethiopian provinces of Eritrea, Tigray, and Wello;

Whereas the major causeof the famine is ongoing civil war;

Whereas all parties to the conflict have deliberately put military objectives above the food needs of innocent civilians;

Whereas cross-border feeding operations are insufficient to meet the desperate needs;

Whereas the northen corridor through the Eritrean port of Massawa, currently held by the rebel Eritrean People's Liberation Front, is critical to relief efforts to feed some one million five hundred thousand people in need in rebel and government-held areas;

Whereas the Government of Ethiopia has has refused to accept the offer made by the Eritrean People's Liberation Front to allow international relief access through Massawa; and

Whereas the relief operation along the southern corridor through Wello Province must be expanded to reach the one million four hundred thousand people estimated to ba risk there: Now, therefore be it.

Resolved, That it is the sense of the Senate that—

(1) all parties to the conflict in Ethiopia must put humanitarian needs above military goals and adopt an immediate ceasefire;1

(2) cross-border feeding oprations shold be expanded to their fullest capacity;

(3) the Government of Ethiopia should permit the Port of Massawa to be opened immediately for the purposes of international relief operations;

(4) the President should encourage all parties to the conflict to adopt an immediate case-fire;

(5) the President should impress upon all nations supplying military assistance to the parties in the conflict the importance of their role in facilitating a cases-fire;

(6) the President should impress upon the Govrnment of Ethiopia the urgent need of allowing relief access through the Massawa Port and along the northern corridor;

(7) the President should encourage the United Nations to take a more prominent role in cordinating relief efforts in Ethiopia;

(8) the President should call on the Soviet Government to continue to respond to the war and famine in Ethiopia by exerting increased pressure on the Ethiopian regime to allow for the full utilization of all available relief corridors; and

(9) the President should encorage Euopean, African, and other leaders to help facilitate a ceasefire and emergency relief efforts.

● Mr. SIMON. Mr. President, there is a crisis in the Horn of Africa. War and drought once again threaten the lives of millions of people in Ethiopia and Sudan. Today, I am submitting a resolution, on the situation in Ethiopia, to highlight the urgency of finding every possible way to get food relief to people in great need. Senators HUMPHREY, PELL, KASSEBAUM, KENNEDY, CRANSTON, HELMS, and MITCHELL join me in this effort.

We want to impress upon the Ethiopian Government to permit the safe transport of food. We ask the same of the rebel movements. We encourage the United Nations and the international commnity to respond to this urgent crisis. And we will continue to work with our own administration.●

AMENDMENTS SUBMITTED

CARL D. PERKINS VOCATIONAL EDUCATION ACT AMENDMENTS

PELL (AND OTHERS) AMENDMENT NO. 1465

Mr. PELL (for himself, Mrs. KASSEBAUM, Mr. KENNEDY, and Mr. HATCH) proposed an amendment to the bill (S. 1109) to amend the Carl D. Perkins Vocational Education Act to extend the authorities contained in such act through the fiscal year 1995, as follows:

On page 3, beginning on line 1, strike all through page 110, line 4, and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Carl D. Perkins Vocational Education Act Amendments of 1989".

TITLE I—VOCATIONAL EDUCATION ASSISTANCE TO THE STATES

SEC. 101. ALLOTMENT.

(a) IN GENERAL.—Section 101(a)(1) of the Carl D. Perkins Vocational Education Act (hereinafter referred to as the "Act") is amended—

(1) in subparagraph (A) by—

(A) striking "2" and inserting "2.75"; and

(B) striking "part E" and inserting "part D"; and

(2) by striking subparagraph (B) and inserting the following new subparagraphs:

"(B) 2 percent for the purpose of carrying out section 103; and

"(C) .25 percent for the purpose of carrying out section 104.".

(b) TERRITORIES.—Section 101 of the Act is amended by inserting at the end thereof the following new subsection (d):

"(d) For the purpose of this section, the term 'State' means any one of the fifty States, the Commonwealth of Puerto Rico, the District of Columbia, and the Virgin Islands.".

(c) TECHNICAL AMENDMENT.—(1) Section 101(a)(3)(C) of the Act is amended by striking ", Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands,".

(2) Section 101(c)(1)(B) of the Act is amended by striking ", Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands" and inserting "and the Virgin Islands".

SEC. 102. WITHIN STATE RESERVATION.

Section 102 of the Act is amended to read as follows:

"SEC. 102. (a) Each State shall reserve from its allotment of funds appropriated under section 3(a) for each fiscal year an amount that does not exceed—

"(1) 20 percent for State programs and State administration of which—

"(A) 75 percent of such 20 percent shall be available for State programs and State leadership; and

"(B) the remainder of such 20 percent shall be available for State administration;

"(2) 5 percent for technical preparation education under part B of title II; and

"(3) 75 percent for basic programs under part C of title II of which—

"(A) 65 to 75 percent of such 75 percent shall be available for subpart 1 of part C of title II; and

"(B) the remainder of such 75 percent shall be available for subpart 2 of part C of title II.

"(b) SPECIAL RULES.—(1) From the amount reserved pursuant to subsections (a)(1)(A) and (a)(1)(B) each State shall reserve 20 percent for sex equity programs carried out in accordance with section 202.

"(2) From the amount reserved pursuant to subsection (a)(3)(B) each State shall reserve for single parents, displaced homemakers, and single pregnant women programs carried out in accordance with section 242 an amount which equals or exceeds 10.5 percent of the total amount reserved pursuant to subsection (a)(3) for subparts 1 and 2 of part C of title II.

"(c) MATCHING REQUIREMENT.—Each State receiving financial assistance under this Act shall match, on a dollar-for-dollar basis, the funds reserved pursuant to subsection (a)(1)(B) from non-Federal sources.

"(d) HOLD HARMLESS PROVISION.—The requirements of subparagraphs (A) and (B) of subsection (a)(3) shall only apply to—

"(1) 20 percent for fiscal year 1991,

"(2) 36 percent for fiscal year 1992, and

"(3) 51 percent for fiscal year 1993,

of the funds available under subsection (a)(3) to each State for basic programs under part C of title II.".

SEC. 103. INDIAN AND HAWAIIAN PROGRAMS.

Section 103 of the Act is amended to read as follows:

"INDIAN AND NATIVE HAWAIIAN PROGRAMS

"SEC. 103. (a)(1)(A) From 7/12 of the amount of funds reserved under section 101(a)(1)(B), the Secretary shall award grants to, or enter into contract with—

"(i) Indian tribes that are eligible to receive a grant from, or to enter into a contract with, the Secretary of the Interior under—

"(I) the Indian Self-Determination and Education Assistance Act, or

"(II) the Act of April 16, 1934 (48 Stat. 596, chapter 147; 25 U.S.C. 452, et seq.), and

"(ii) tribal organizations of such Indian tribes,

to plan, conduct, and administer programs, or portions of programs, that provide vocational-technical training and related activities.

"(B) Grants awarded, and contracts entered into, under subparagraph (A) shall—

"(i) be subject to the terms and conditions of section 102 of the Indian Self-Determination and Education Assistance Act, and

"(ii) be conducted in accordance with those provisions of sections 4, 5, and 6 of the Act of April 16, 1934 (48 Stat. 596, chapter 147; 25 U.S.C. 455, 456, 457) that are relevant to the programs for which the grant or contract is provided.

"(C) In awarding grants and entering into contracts under this section, the Secretary shall give special consideration to applications from tribally controlled community colleges which—

"(i) are accredited or candidates for accreditation by a nationally recognized accreditation organization as an institution of postsecondary vocational education; or

"(ii) operate vocational education programs that are accredited or candidates for accreditation by a nationally recognized accreditation organization; and

"(iii) issue certificates for completion of vocational education courses.

"(2)(A) From 1/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall provide a grant to each Bureau funded school that is a secondary school for the purpose of providing vocational education programs for secondary students attending the school.

"(B)(i) The amount of each grant provided under subparagraph (A) shall equal or exceed $35,000.

"(ii) If the amount of funds available for any fiscal year for grants under subparagraph (A) exceeds the amount necessary to provide each Bureau funded school a grant of $35,000 for the fiscal year, the excess shall be used to increase the amount of the grants a follows:

"(I) 80 percent of such excess funds shall be allocated among Bureau funded schools in accordance with the formula used to distribute funds under section 1128 of the Education Amendments of 1978 (25 U.S.C. 2008), and

"(II) 20 percent of such excess funds shall be allocated among Bureau funded schools in accordance with the formula used in allocating funds under section 611 of the Education of the Handicapped Act (20 U.S.C. 1411).

"(C) Where a grant provided under subparagraph (A) is awarded on behalf of a school operated directly by the Bureau of Indian Affairs, the Secretary of the Interior is authorized and directed to accept and use such grant for the purposes for which the grant is awarded.

"(D) For purposes of this paragraph, the term 'Bureau funded school' has the meaning given to such term under section 1139(3) of the Education Amendments of 1978 (25 U.S.C. 2019(3)).

"(3)(A) From 3/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall award grants for vocational-technical training, and related activities, to two or more schools of vocational-technical education, each of which—

"(i) is governed by a board of directors or trustees, a majority of whom are Indians,

"(ii) has been in operation for 5 or more years,

"(iii) enrolls the full-time equivalent of not less than 100 students, of whom a majority are Indians, and

"(iv) is accredited, or a candidate for accreditation for not less than five years, as a postsecondary vocational education institution by a nationally recognized accrediting agency for postsecondary vocational education institutions.

"(B) If any portion of the funds that are authorized to be used to provide grants under subparagraph (A) for any fiscal year remains after all schools eligible for the grant that submitted acceptable applications for the grant have been awarded a grant under subparagraph (A) for the fiscal year, the Secretary may use the remaining funds—

"(i) to award grants under subparagraph (A) to institutions of higher education that are eligible for assistance under the Tribally Controlled Community College Assistance Act of 1978, and

"(ii) if funds remain after all grants authorized under clause (i) have been awarded to eligible institutions that submitted acceptable applications for the grant, to fund grants and contracts provided under paragraph (1).

"(C) Each grant awarded under subparagraph (B)(i) shall equal or exceed $50,000.

"(D) The Secretary shall, subject to the availability of appropriations, provide for each program year to each school of vocational-technical education having an application approved by the Secretary under subparagraph (A), an amount necessary to pay expenses associated with—

"(i) the maintenance and operation of the program, including development costs, costs of basic and special instruction (including special programs for individuals with handicaps and academic instruction), materials, student costs, administrative expenses, boarding costs, transportation, student services, day care and family support programs for students and their families (including contribution to the costs of education for dependents);

"(ii) capital expenditures, including operations and maintenance and minor improvements and repair, physical plant maintenance costs; and

"(iii) costs associated with repair, upkeep, replacement, and upgrading of the instructional equipment.

"(4) For purposes of this Act, the Bureau of Indian Affairs of the Department of the Interior shall be considered to be a State board.

"(5) Programs funded under this subsection shall be in addition to such other programs, services, and activities as are made available to eligible Indians under other provisions of this Act.

"(b)(1) From 3/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall enter into contracts with organizations primarily serving and representing Native Hawaiians which are recognized by the Governor of the State of Hawaii to plan, conduct, and administer programs, or portions of programs, that provide vocational-technical training, and related activities, for the benefit of Native Hawaiians.

"(2) For purposes of this section, the term 'Native Hawaiian' means any individual who has any ancestors that were natives, prior to 1778, of the area which now constitutes the State of Hawaii.

"(c) Grants awarded, and contracts entered into, under this section shall be subject to such terms and conditions as the Secretary may prescribe relating to satisfactory performance of the grant or contract.

"(d) Nothing in this section shall be interpreted as affecting or limiting the ability, or eligibility, of any person or agency to which this section applies to apply for, or receive assistance from, any other source, including assistance provided by the Federal Government under any provision of law other than this title.".

SEC. 104. THE TERRITORIES.

Part B of title I of the Act is amended by inserting at the end thereof the following new section:

"THE TERRITORIES

"SEC. 104. (a) THE TERRITORIES.—From funds reserved pursuant to section 101(a)(1)(C), the Secretary shall make grants to—

"(1) both Guam and the Federated States of Micronesia in an amount which is the same as the amount provided to Guam in fiscal year 1990 for vocational education programs under this Act; and

"(2) each of American Samoa, Palau, the Marshall Islands and the Commonwealth of the Northern Mariana Islands in an amount which is the same as the amount provided to American Samoa in 1990 for vocational education programs under this Act.

"(b) REMAINDER.—Subject to the provisions of subsection (a), the Secretary shall make a grant of the remainder of funds reserved pursuant to section 101(a)(1)(C) to the Center for the Advancement of Pacific Education, Honolulu, Hawaii, or its successor entity or entities to make vocational education and training grants in Guam, American Samoa, Palau, the Commonwealth of the Northern Marianas, the Federated States of Micronesia, and the Republic of the Marshall Islands, or cooperative efforts involving two or more of these entities for the purpose of—

"(1) teacher and counselor training and retraining;

"(2) curriculum development; and

"(3) improving vocational education and training programs in secondary schools and institutions of higher education, or improving cooperative programs involving both secondary schools and institutions of higher education.

"(c) LIMITATION.—The Center for the Advancement of Pacific Education may use no more than 5 percent of the funds received pursuant to subsection (b) for administrative costs.".

SEC. 105. STATE ADMINISTRATION.

Section 111 of the Act is amended—

(1) in subsection (a)(1)(A) by striking "113(b)(9)" and inserting "113(b)(14), section 115 and section 232(b))";

(2) in subsection (a)(1)(C) by inserting ", including business and industry" before "involved";

(3) in subsection (b)(1) by—

(A) redesignating subparagraphs (C), (D), (E), (F), and (G), as subparagraphs (D), (E), (F), (G), and (H), respectively, and

(B) inserting the following new subparagraph (C) after subparagraph (B):

"(C) reviewing and commenting upon, and making recommendations concerning, the plans of local educational agencies to ensure that the needs of women and men for training in nontraditional jobs are met and recommending programs concerning equity, single parents, and displaced homemakers, for funding by the State board;";

(4) in subsection (b)(3) by inserting "from funds allocated under section 102(a)(1)(B)" before "expend";

(5) by redesignating subsections (c), (d), and (e) as subsections (f), (g), and (h), respectively; and

(6) by inserting the following new subsections after subsection (b):

"(c)(1) Any State desiring to participate in the programs authorized by this Act shall designate or assign the head of the State office responsible for administering part B of the Education of the Handicapped Act to—

"(A) review all plans of local eligible recipients to ensure that students with disabilities are receiving vocational educational services required by their individual educational program pursuant to Public Law 94-142;

"(B) ensure that the plans of the local educational agency, area vocational school, or intermediate educational agency provide assurances of compliance with the provisions of section 504 of the Vocational Rehabilitation Act of 1973 and the Education of Handicapped Act regarding equal access to programs;

"(C) review all plans of local eligible recipients to ensure that local educational agencies, area vocational schools or intermediate educational agencies have—

"(i) identified the number of students with disabilities enrolled in vocational programs operated by the local eligible recipient,

"(ii) assessed the vocational needs of the students identified pursuant to clause (i), and

"(iii) developed an adequate plan to provide supplementary services sufficient to meet the needs of such students; and

"(D) evaluate the plans of all local eligible recipients with respect to the appropriateness of the program and the quality of the program.

"(2) For purposes of this subsection and subsections (d) and (e), the term 'State' means any one of the 50 States and the District of Columbia.

"(d) Any State desiring to participate in the programs authorized by this Act shall assign the individual responsible for coordinating services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 to review the plans of the local eligible recipients to ensure that the number of economically disadvantaged students have been identified, and that the needs of such students are being met as outlined by such plans.

"(e) Any State desiring to participate in the programs authorized by this Act shall designate or assign the head of the State office responsible for administering programs for students with limited English proficiency to review the plans of the local educational agencies, area vocational schools, or intermediate educational agencies to ensure that the number of students with limited English proficiency have been identified and that the needs of such students for participation in vocational education programs are being met as outlined by such plans.

"(f) The State board shall consult with parents, students, and teachers in the planning of programs funded under this Act.".

SEC. 106. STATE COUNCIL ON VOCATIONAL EDUCATION.

Section 112 of the Act is amended—

(1) in subsection (a)(1)(A) by inserting "trade organizations," after "industry,";

(2) in subsection (a)(2) by striking the period at the end thereof and inserting in lieu thereof "and may include members of vocational student organizations and school board members.";

(3) in subsection (a) by inserting the following new sentence after the matter following paragraph (2): "No employee of the State board shall serve on the State council.";

(4) in subsection (d)(2) by—

(A) striking "advise" and inserting "make recommendations to";

(B) redesignating subparagraphs (A) and (B) as subparagraphs (B) and (C), respectively; and

(C) inserting the following new subparagraph (A) immediately preceding subparagraph (B) (as redesignated in subparagraph (B)):

"(A) the State plan;";

(6) in subsection (d)(8) by—

(A) striking "201(b)" and inserting "223"; and

(B) striking "and" at the end thereof;

(7) by striking subsection (d)(9) and inserting in lieu thereof the following new paragraph:

"(9) analyze and review corrections education programs; and

"(10)(A) evaluate at least once every 2 years—

"(i) the extent to which vocational education, employment and training programs in the State represent a consistent, integrated, and coordinated approach to meeting the economic needs of the State,

"(ii) the vocational educational program delivery system assisted under this Act, and under the Job Training Partnership Act, in terms of such delivery systems' adequacy and effectiveness in achieving the purposes of each of the two Acts, and

"(iii) make recommendations to the State board on the adequacy and effectiveness of the coordination that takes place between vocational education and the Job Training Partnership Act;

"(B) comment on the adequacy or inadequacy of State action as put into practice;

"(C) make recommendations to the State board on ways to create greater incentives for joint planning and collaboration between the vocational education system and the job training system at the State and local levels; and

"(D) advise the Governor, the State board, the State job training coordinating council, the Secretary, and the Secretary of Labor regarding such evaluation, findings, and recommendations.";

(8) in subsection (e) by inserting the following new sentences at the end thereof: "Each State Council may submit a statement to the Secretary reviewing and commenting upon the State plan. Such statement shall be sent to the Secretary with the State Plan.";

(9) by amending subsection (f)(1)(A) to read as follows:

"(f)(1)(A) Except as provided in subparagraph (B), from the sums appropriated pursuant to section 3(c) the Secretary shall first make grants of $150,000 to each State council. From the remainder of such sums the Secretary shall allot to each State council an amount in accordance with the method of allotment set forth section 101(a)(2) of this Act, provided that—

"(i) no State council shall receive more than $250,000 for each fiscal year; and

"(ii) no State council shall receive less than $150,000 for each fiscal year; and

"(iii) no State council shall receive less than such State council was allotted in fiscal year 1990;"; and

(10) in subsection (f) by amending paragraph (1)(B) to read as follows:

"(B) From the amounts appropriated pursuant to section 3(c), for each fiscal year, the Secretary shall make grants of—

"(i) $60,000 to each of the State councils of the Virgin Islands, Guam, and the Federated States of Micronesia; and

"(ii) $25,000 to each of the State councils of American Samoa, Palau, the Marshall Islands, and the Commonwealth of the Northern Mariana Islands.".

SEC. 107. STATE PLANS.

Section 113 of the Act is amended to read as follows:

"SEC. 113. (a)(1)(A) Any State desiring to receive funds from its allotment under this Act for any fiscal year shall submit to the Secretary a State plan for a 3-year period in the case of the initial plan, and a 2-year period thereafter, together with such annual revisions as the State board determines to be necessary.

"(B) The planning periods required by paragraph (1) of this subsection shall be coterminous with the planning program periods required under section 104(a) of the Job Training Partnership Act.

"(2)(A) In formulating the State plan (and amendments thereto) the State board shall meet with and utilize, before the development of such plan, the State Council, established pursuant to section 112 of this Act.

"(B) The State board shall conduct public hearings in the State, after appropriate and sufficient notice, for the purpose of affording all segments of the public and interested organizations and groups an opportunity to present their views and make recommendations regarding the State plan. A summary of such recommendations and the State board's response shall be included with the State plan.

"(3) In developing the State plan, the State shall conduct a State assessment according to section 115.

"(b) Each State plan shall—

"(1) describe the procedures and the results of each of the assessments required by paragraphs (A) through (F) of section 115(a)(1), including the needs identified by such assessments; and

"(2) describe how uses of funds reflect the needs described in paragraph (1);

"(3) provide assurances that, and where necessary a description of the manner in which eligible recipients will comply with the requirements of titles I, II, and III of this Act including—

"(A) a description of the manner in which the State will comply with the criteria required for programs for the special populations described in section 223;

"(B) assurances that the State board will develop measurable goals and accountability measures for meeting the needs of special populations;

"(C) an assurance that the State board will conduct adequate monitoring of programs in local educational agencies, area vocational schools, intermediate educational agencies, and other eligible recipients to ensure that programs within the State are meeting the goals described in subparagraph (B); and

"(D) assurances that, to the extent consistent with the number and location of individuals described in section 223, who are enrolled in private elementary and secondary schools, provision is made for the participation of such individuals in the vocational education program assisted under subpart 1 of part C of title II;

"(4) set forth the planned distribution to local educational agencies, area vocational schools, correctional institutions, or intermediate educational agencies as prescribed by section 221;

"(5) provide assurances that the State will comply with the provisions of section 102;

"(6) set forth the criteria the State board will use—

"(A) in approving applications of eligible recipients, and

"(B) for spending the 20 percent reserve for the State as authorized under section 102(a)(1);

"(7) provide assurances that if the State exercises the option to redistribute the 10 percent reserve described in section 222, the State will match the reserve as prescribed under section 101(c);

"(8) describe how funds expended for occupationally specific training will be used only for occupations in which job openings are projected or available;

"(9) provide assurances that the goal of each program shall be to give a student experience in, and understanding of, all aspects of the industry in which the student is preparing to enter;

"(10) describe in each State plan submitted after fiscal year 1991, the progress the State has made in achieving the goals set forth in previous State plans;

"(11) provide such methods of administration as are necessary for the proper and efficient administration of the Act;

"(12) provide assurances that, in the use of funds available for single parents, displaced homemakers, and single pregnant women under section 242, the State will emphasize assisting individuals with the greatest financial need, and that the State will give special consideration to displaced homemakers who because of divorce, separation, or the death or disability of a spouse must prepare for paid employment;

"(13) provide assurances that the State will furnish relevant training and vocational education activities to men and women who desire to enter occupations that are not traditionally associated with their sex;

"(14) describe how the State is implementing performance evaluations with eligible recipients as prescribed in section 231;

"(15) provide a description of how the State will—

"(A) develop measures of the effectiveness of programs assisted under this Act in meeting the needs described in paragraph (1), including evaluative measurements of factors such as—

"(i) the occupations to be trained for, which will reflect a realistic assessment of the labor market needs of the State;

"(ii) the levels of skills to be achieved in particular occupations, which will reflect the hiring needs of employers; and

"(iii) the basic employment competencies to be used in performance outcomes, which will reflect the hiring needs of employers;

"(B) as a component of the measures under subparagraph (A) of this paragraph, establish appropriate measures for evaluating the effectiveness of programs for the special populations described in section 223 assisted under this Act; and

"(C) evaluate the projects, services, and activities supported under this Act of not less than 20 percent of the participating eligible recipients within the State in each fiscal year;

"(16) describe the methods proposed for the joint planning and coordination of programs carried out under this Act with programs conducted under the Job Training Partnership Act, the Adult Education Act, chapter 1 of title I of the Elementary and Secondary Education Act of 1965, the Education of the Handicapped Act, and the Rehabilitation Act of 1973, and with apprenticeship programs;

"(17) provide assurances that programs of personnel development, and curriculum development shall be funded to further the goals identified in the State plan;

"(18) provide assurances that the vocational education needs of identifiable segments of the population in the State that have the highest rates of unemployment have been thoroughly assessed, and that such needs are reflected in and addressed by the State plan;

"(19) provide assurances that the State board will cooperate with the State council in carrying out its duties under this part;

"(20) provide assurance that none of the funds expended under this Act will be used to acquire equipment (including computer software) in any instance in which such acquisition results in a direct financial benefit to any organization representing the interests of the purchasing entity or its employees or any affiliate of such an organization;

"(21) provide assurances that Federal funds made available under this Act will be used so as to supplement, and to the extent practicable increase the amount of State and local funds that would in the absence of such Federal funds be made available for the uses specified in the State plan, and in no case supplant such State or local funds;

"(22)(A) provide assurances that the State will provide leadership, supervision, and resources for comprehensive career guidance, vocational counseling, and placement programs;

"(B) as a component of the assurances described in subparagraph (A), annually assess and report on the degree to which expenditures aggregated within the State for career guidance and vocational counseling from allotments under title II are not less than such expenditures for such guidance and counseling within the State in the fiscal year 1988;

"(23) provide assurances that the State will provide for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of, and accounting for, Federal funds paid to the State (including such funds paid by the State to eligible recipients under this Act); and

"(24) specify for each of the programs assisted under subpart 2 of title II—

"(A) the methods by which the special needs of the individuals described in section 223 shall be assessed and met; and

"(B) the number of individuals in each of the categories set forth in section 223 for each occupationally specific program.

"(c) When changes in program conditions, labor market conditions, funding, or other factors require substantial amendment to an approved State plan, the State board, in consultation with the State council, shall submit amendments to such State plan to the Secretary. Any such amendments shall be subject to review by the State job training coordinating council, and the State council.".

SEC. 108. APPROVAL.

Section 114 of the Act is amended—

(1) in subsection (a)(1) by inserting ", the chief executive officer of the State" after "legislature" each place such term appears; and

(2) redesignating subsection (c) as subsection (d); and

(3) inserting the following new subsection after subsection (b):

"(c)(1) The State board shall develop the portion of each State plan relating to the amount and uses of any funds proposed to be reserved for adult education, postsecondary education, technical preparation education and for secondary education after consultation with the State agency responsible for supervision of community colleges and the State agency responsible for secondary education, respectively. The State board shall, in developing such plan, take into consideration the relative training and retraining needs of secondary, adult and postsecondary students. If a State agency finds that a portion of the final State plan is objectionable, such agency shall file such objections with the State board. The State board shall respond to any objections of such agency in submitting such plan to the Secretary. The Secretary shall consider such comments in reviewing the State plan.

"(2) Each State plan shall be submitted to the Secretary by May 1 preceding the beginning of the first fiscal year for which such plan is to be in effect. The Secretary shall approve each plan before the expiration of the 60-day period beginning on the date the plan is submitted if the plan meets the requirements of section 113 and is of sufficient quality to meet the objectives of this Act (including the objective of developing and implementing performance evaluations and improvements), and shall subsequently take appropriate actions to monitor the State's compliance with the provisions of its plan and the requirements of this Act. The Secretary shall not finally disapprove a State plan except after giving reasonable notice and an opportunity for a hearing to the State board.".

SEC. 109. STATE ASSESSMENT.

Section 115 of the Act is amended to read as follows:

"STATE ASSESSMENT

"SEC. 115. (a)(1) Each State board receiving assistance under this Act shall develop measurable objective criteria by which to assess the quality of, and standards for, State and local programs. Such criteria shall be developed in consultation with local educational agencies, area vocational schools, intermediate educational agencies, correctional institutions, postsecondary institutions, business and industry, union and trade representatives, vocational educators, counselors, superintendents, community-based organizations, parents, representatives of special populations described in sections 223 and 242, the sex equity administrator, the head of the State correctional education agency, the head of the State office responsible for administering Part B of the Education of the Handicapped Act, the individual responsible for coordinating services under Chapter 1 of title I of the Elementary and Secondary Education Act of 1965, and the head of the State agency responsible for administering programs for students with limited English proficiency, guidance counselors and the State council. Each State board shall widely disseminate such criteria. State boards shall develop such criteria no later than the beginning of school year

1993, and shall use criteria to assess program quality. Assessment criteria shall include—

"(A) student improvement in basic skills;

"(B) gains in learning and educational outcomes;

"(C) competence in all aspects of the industry the students are preparing to enter;

"(D) student improvement in life skills, problem solving skills and career decision making;

"(E) the ability of local educational agencies, area vocational schools and intermediate educational agencies, postsecondary institutions and other local recipients under subpart 2 of part C of title II to meet the needs of special populations such as the economically disadvantaged, students with disabilities, students with limited English proficiency, and women and men in programs for training in nontraditional occupations, and criminal offenders in correctional institutions, for access to vocational education and vocational services in terms of labor market needs;

"(F) the quality of vocational education in terms of—

"(i) the pertinence of programs to the workplace and to new and emerging technologies;

"(ii) the technological and educational capacity of vocational curricula, equipment, and instructional materials to enable vocational students and instructors to meet the challenges of increased technological demands of the workplace;

"(iii) the capability of vocational education programs to meet the needs for general occupational skills and improvement of basic academic skills in order to address the changing content of jobs;

"(iv) the capability of vocational education programs to—

"(I) give students experience in, and understanding of, all aspects of the industry in which the student is preparing to enter; and

"(II) provide job placements; and

"(v) measuring the state-of-the-art quality of the vocational education provided; and

"(G) setting measurable goals to meet the needs of special populations.

"(2) In developing assessment criteria pursuant to the provisions of paragraph (1)(E), the head of the special education office, the sex equity administrator, the individual responsible for coordinating services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965, and the individual designated under section 111(e) to monitor programs for students with limited English proficiency shall each develop data collection procedures appropriate to the special populations being served. Data collected should include information about program services and outcomes, as well as which individuals are being served.

"(b) Each State board receiving assistance under this Act shall assess improvements needed in vocational education programs and may conduct such assessment through the use of Federal funds provided under this Act and State and local vocational education funds. Such assessment shall utilize the following factors:

"(1) integration of academic and vocational education;

"(2) instruction and experience in all aspects of the industry the students are preparing to enter;

"(3) sequential course of study;

"(4) increased student job placement;

"(5) increased linkages between secondary and postsecondary educational institutions;

"(6) ensuring that special populations obtain assistance necessary to enroll and succeed in upgraded programs; and

"(7) raising the quality of vocational education programs in schools with high concentrations of poor and low achieving students.

"(c) Each State board shall complete the assessment under this section pursuant to a timetable consistent with the State plan.".

TITLE II—BASIC STATE GRANTS

SEC. 201. BASIC STATE GRANTS.

Title II of the Act is amended to read as follows:

"TITLE II—BASIC STATE GRANTS FOR VOCATIONAL EDUCATION

"PART A—STATE PROGRAMS

"STATE PROGRAMS AND STATE LEADERSHIP

"SEC. 201. (a) From amounts reserved under section 102(a)(1)(A) each State shall conduct State programs and State leadership activities.

"(b)(1) State programs conducted pursuant to subsection (a) may include—

"(A) training and retraining programs for teachers, administrators and counselors, including corrections educators and counselors, and educators and counselors in community-based organizations, which may include—

"(i) training in the integration of academic and vocational studies and programs that give students experience in, and understanding of, all aspects of the industry the student is preparing to enter; and

"(ii) retraining of vocational teachers in modern instructional techniques and new technologies;

"(B) curriculum development, curriculum dissemination and field-testing of curriculum;

"(C) instructional programs in technology education, including curriculum development and teacher training; and

"(D) supporting vocational student organizations, with every effort made to increase minority participation in such clubs.

"(2) Training and retraining programs conducted pursuant to paragraph (1)(A) shall give particular emphasis to recruiting and training minority teachers and counselors and shall encourage the utilization of business and industry equipment and personnel.

"(3) In carrying out the provisions of paragraph (1)(B) the State—

"(A) shall give priority to curriculum which integrates academic and vocational studies;

"(B) shall provide special emphasis on curriculum which incorporates the needs of business, industry and labor in high skilled occupations;

"(C) may award contracts to the Corporation for Public Broadcasting; and

"(D) may provide grants for technical preparation education programs as described in part B of this title.

"(c)(1) Leadership activities conducted pursuant to subsection (a) may include—

"(A) monitoring and evaluation, including technical assistance to local recipients;

"(B) development and implementation of performance evaluations and improvement plans required under section 250, including technical assistance;

"(C) development and implementation of the State assessment required under section 115;

"(D) promoting business, industry, labor and interagency linkages;

"(E) promoting technology education courses and instruction particularly courses and instruction which integrate mathematics, science, and technology studies;

"(F) establishing guidelines for the development of local plans;

"(G) the creation and maintenance of a public awareness program;

"(H) developing linkages with community-based organizations; and

"(I) building collaboration and joint efforts among education, labor, job training, public assistance, and other State agencies to improve vocational education services to traditionally underserved populations.

"(2) Each State receiving financial assistance under this Act shall match, on a dollar for dollar basis and from non-Federal sources, the funds received pursuant to section 102(a)(1)(A) for leadership activities.

"SEX EQUITY PROGRAMS

"SEC. 202. (a) From amounts reserved under section 102(b)(1) the State shall, under the administration of the sex-equity administrator described in section 111(b)(1)—

"(1) support programs, services, comprehensive career guidance and counseling, and activities to eliminate sex bias and stereotyping in secondary and postsecondary vocational education;

"(2) support vocational and prevocational education programs, services, comprehensive career guidance counseling, and activities for girls and women, aged 14 through 25, designed to enable the participants to support themselves and their families; and

"(3) provide support services for individuals participating in vocational education programs, services, and activities described in paragraphs (1) and (2) including dependent-care services and transportation.

"(b) The requirement with respect to age limitations contained in subsection (a)(2) may be waived whenever the sex equity administrator determines that the waiver is essential to meet the objectives of this section.

"PART B—TECHNOLOGY PREPARATION

"PROGRAM AUTHORIZED

"SEC. 211. From amounts reserved under section 102(a)(2) the State board shall award competitive grants, or grants on the basis of a formula as determined by the State board, for activities carried out under this part to consortia of—

"(1) local educational agencies, intermediate educational agencies serving secondary school students, area vocational schools serving secondary school students, or secondary schools funded by the Bureau of Indian Affairs; and

"(2) community colleges (including postsecondary vocational technical schools), apprenticeship programs, or institutions of higher education offering—

"(A) a two-year degree,

"(B) an associate's degree, or

"(C) a two-year post-secondary certificate.

"TECHNICAL PREPARATION EDUCATION PROGRAMS

"SEC. 212. (a) Each consortium receiving a grant under this part shall use amounts paid under this part to develop and operate a 4-year technical preparation education program.

"(b) Each such program shall—

"(1) be carried out under an articulation agreement among the participants in the consortium;

"(2) consist of the 2 years of secondary school preceding graduation followed by 2 years of higher education, or a 2-year apprenticeship program, with a curriculum based on a common core of material intend-

ed to develop a student's proficiency in mathematics, science, communications and technologies designed to lead to an associate degree in a specific career field;

"(3) include the development of a technical preparation education program curriculum appropriate to the needs of the student's participating in the consortium; and

"(4) include in-service training for teachers and counselors that—

"(A) is designed to train teachers and counselors to implement effectively technical preparation education curriculum;

"(B) provides for joint training for teachers and counselors from all participants in the consortium; and

"(C) may provide such training in weekend, evening and summer sessions, institutes or workshops;

"(5) provide equal access to the full range of technical preparation programs to the individuals described in sections 223 and 242, including the development of technical preparation education program services appropriate to the need of participants described in sections 223 and 242; and

"(6) provide for prevocational programs which assist the participants described in sections 223 and 242.

"(c) Each such program may—

"(1) provide for training programs for counselors designed to enable counselors more effectively to recruit students for technical preparation education programs, and ensure their successful completion of such programs and their placement in appropriate employment;

"(2) provide for the acquisition of technical preparation education program equipment; and

"(3) as part of the program's planning activities, acquire technical assistance from State or local entities that have successfully designed, established and operated technical preparation education programs.

"APPLICATIONS

"SEC. 213. (a) Each consortium that desires to receive a grant under this part shall submit an application to the State board at such time and in such manner as the State board shall prescribe.

"(b) Each application submitted under this section shall contain a 3-year plan for the development and implementation of activities under this Act.

"(c) The State board shall approve applications based on their potential to create an effective technical preparation education program as described in section 212.

"(d) The State board shall give special consideration to applicants whose applications—

"(1) provide for effective employment placement activities or transfer of students to 4-year baccalaureate degree programs; and

"(2) are developed in consultation with business, industry, and labor unions.

"DEFINITIONS

"SEC. 214. For purposes of this part—

"(1) the term 'articulation agreement' means a commitment to a program designed to provide students with a nonduplicative sequence of progressive achievement leading to competencies in a technical preparation education program;

"(2) the term 'community college'—

"(A) has the meaning provided in section 1201(a) of the Higher Education Act of 1965 for an institution which provides not less than a 2-year program which is acceptable for full credit toward a bachelor's degree; and

"(B) includes tribally controlled community colleges (within the meaning of section 2(4) of the Tribally Controlled Community College Assistance Act of 1976 (25 U.S.C. 1801(4))); and

"(3) the term 'technical preparation education program' means a combined secondary and postsecondary education program which—

"(A) leads to an associate degree;

"(B) provides technical preparation in at least 1 field of engineering technology, applied science, or mechanical, industrial, or practical art or trade;

"(C) builds student competence in mathematics, science, and communications (including through applied academics) through a sequential course of study; and

"(D) leads to placement in employment.

"PART C—SECONDARY, POSTSECONDARY AND ADULT VOCATIONAL PROGRAMS

"Subpart 1—Secondary School Programs

"WITHIN STATE ALLOCATION

"SEC. 221. (a) From amounts reserved under section 102(a)(3)(A), the State board shall, subject to subsection (b), allocate to each local educational agency an amount that bears the same relationship to such funds as the amount such local educational agency was allocated under sections 1005 and 1006 of the Elementary and Secondary Education Act of 1965 in the preceding fiscal year bears to the total amount received under such section by local educational agencies in the State in such year.

"(b)(1)(A) In the case of criminal offenders who are in State correctional institutions the State board shall ratably reduce the percentages obtained under subsection (a) in order to make available to the State correctional education agency an amount which is substantially equivalent to the amount which such agency would have been eligible to receive under section 1005 of the Elementary and Secondary Education Act of 1965 for the previous fiscal year if the State correctional education agency were a local educational agency.

"(B) For the purpose of subparagraph (A) the age of individuals in correctional institutions to be counted shall be ages 9 through 35.

"(C) The amount determined pursuant to subparagraphs (A) and (B) shall not exceed 5 percent of the amount reserved under section 102(a)(3)(A), or shall not exceed the amount allocated for corrections education pursuant to this Act in the fiscal year 1990, whichever is greater.

"(2) In the case of an area vocational school the amounts calculated under subsection (a) that are available to local educational agencies served by that area vocational school shall be made available to that area vocational school.

"(3) In the case of an intermediate educational agency the amounts calculated under subsection (a) that are available to local educational agencies served by that intermediate educational agency shall be made available to that intermediate educational agency.

"(c)(1) No local educational agency, area vocational school or intermediate educational agency, shall be eligible for an allocation unless the amount calculated under subsection (a) equals or exceeds $25,000.

"(2) Local educational agencies, area vocational schools or intermediate educational agencies may form consortia and aggregate the amounts such agencies or schools would be eligible to receive under subsection (a) in order to comply with the provisions of paragraph (1).

"(3) The provisions of paragraph (1) shall not apply to State correctional agencies.

"(4) Any amounts which are not allocated by reason of paragraph (1) shall be redistributed to local educational agencies in accordance with the provisions of this section.

"(d) In the case that an area vocational school and a local educational agency served by such area vocational school offer comparable vocational education programs, the State agency may distribute funds to both an area vocational school and a local educational agency served by such area vocational school, provided the provisions of subsection (c)(1) are met for each area vocational school and the local educational agency.

"(e) In the case that an intermediate educational agency and a local educational agency served by such an intermediate educational agency offer comparable vocational education programs, the State agency may distribute funds to both an intermediate educational agency and a local educational agency served by such intermediate educational agency provided the provisions of subsection (c)(1) are met for both the intermediate educational agency and the local educational agency.

"(f) In applying the provisions of subsection (a), no State board receiving assistance under this Act shall allocate funds to a local educational agency that serves only elementary schools, but shall distribute such funds to the local or regional educational agency which provides secondary school services to secondary school students in the same attendance area.

"STATE RESERVE FOR AREAS WITH SEVERE PROBLEMS

"SEC. 222. (a)(1) Each State receiving financial assistance under this subpart may reserve not to exceed 10 percent of such amount for distribution to local educational agencies, area vocational schools, or intermediate educational agencies in areas experiencing particularly severe hardships such as severe unemployment, a severe poverty concentration, a high dropout rate, a high crime rate, a high incidence of drug abuse or a high concentration of limited English proficient students, all of which percentages or concentrations of which are above the statewide average.

"(2)(A) In addition to the distributions described in paragraph (1), a State may distribute funds reserved pursuant to paragraph (1) to community colleges to enable such community colleges to conduct programs which provide high school diplomas to individuals aged 16 through 18.

"(B) In the event a State distributes funds pursuant to the provisions of paragraph (1) to a community college pursuant to the provisions of subparagraph (A), such community college shall match such funds on a dollar for dollar basis.

"(b)(1) If a State elects to reserve funds pursuant to subsection (a) the State shall match, on a dollar-for-dollar basis, such funds provided to each local educational agency, area vocational school or intermediate educational agency from State sources or from private sources.

"(2) In no event shall a State reserving funds pursuant to subsection (a) use funds from local educational agencies, area vocational schools, or intermediate educational agencies to meet the requirements of paragraph (1).

"POPULATIONS TO BE SERVED

"SEC. 223. (a) Each local eligible recipient receiving funds under this subpart shall use such funds to provide vocational education

services and activities, including comprehensive career guidance and counseling, designed to meet the special needs of, and to enhance the participation of—

"(1) the economically disadvantaged;

"(2) individuals with disabilities;

"(3) individuals who participate in programs designed to eliminate sex bias and stereotyping in vocational education;

"(4) students with limited English proficiency;

"(5) economically disadvantaged adults; and

"(6) criminal offenders, both juvenile and adults, who are serving in a correctional institution.

"(b) Notwithstanding any other provision of this section, each local educational agency with a student enrollment exceeding 100,000 which served economically and educationally disadvantaged adults in fiscal year 1990 pursuant to the provisions of this section may continue to serve such adults in each fiscal year with funds available under this section in an amount which bears the same relationship to the total amount of funds available under this section in each fiscal year as the amount available to carry out such programs for such adults in fiscal year 1990 bears to the total amount available under this section in fiscal year 1990.

"PROGRAMS FOR ECONOMICALLY DISADVANTAGED STUDENTS

"SEC. 224. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to disadvantaged students—

"(1) equal access in recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs available to nondisadvantaged individuals, including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services; and

"(3) the supplementary services necessary to ensure full and equitable participation in vocational education programs.

"(b) For the purpose of this section the term 'disadvantaged student' means a student who is economically or educationally disadvantaged.

"PROGRAMS FOR STUDENTS WITH DISABILITIES

"SEC. 225. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to all students with disabilities within the jurisdiction of the recipient an equal opportunity for an appropriate vocational education. Such recipients shall provide to students with disabilities—

"(1) equal access to recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs available to nondisabled individuals, including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services;

"(3) vocational education programs and activities in the least restrictive environment in accordance with section 612(5)(B) of the Education of the Handicapped Act;

"(4) the vocational education component of the individualized education plan required under sections 612(4) and 614(a)(5) of the Education of the Handicapped Act;

"(5) supplementary services including curriculum modification, equipment modification, classroom modification, supportive personnel, and instructional aids and devices; and

"(6) vocational education planning for individuals with disabilities which shall be—

"(A) coordinated with appropriate representatives of vocational education and special education, and

"(B) reviewed by the head of the State office responsible for administering part B of the Education of the Handicapped Act.

"(b) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall comply with the provisions of section 504 of the Rehabilitation Act of 1973 and the Education of the Handicapped Act regarding equal access to programs.

"PROGRAMS FOR STUDENTS WITH LIMITED ENGLISH PROFICIENCY

"SEC. 226. Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to students with limited English proficiency—

"(1) equal access in recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services;

"(3) supplementary services to ensure full and equitable participation in programs, such as—

"(A) providing adapted vocational instruction simultaneously with English language instruction;

"(B) utilizing appropriate agencies and community-based organizations to communicate in, and to provide counseling in, the students' language; and

"(C) bilingual and cultural counseling; and

"(4) vocational education planning which shall be reviewed by the head of the State administrative office responsible for the education of students with limited English proficiency.

"PROGRAMS TO ELIMINATE SEX BIAS

"SEC. 227. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to women and men—

"(1) equal access in recruitment, enrollment, and placement activities in education and training programs in nontraditional occupations;

"(2) equal access to the full range of vocational programs including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services;

"(3) programs to overcome sex bias, stereotyping and other barriers which inhibit the participation of women and men;

"(4) programs to expand outreach and orientation to nontraditional occupations for women and men;

"(5) supplementary services including, but not limited to, curriculum modification, equipment modification, classroom modification, supportive personnel, instructional aids and devices, and subsidized employment opportunities; and

"(6) programs to increase and provide support services.

"(b) Programs and services provided pursuant to subsection (a) shall be reviewed by the sex-equity administrator consistent with the provisions of section 111(b)(1)(A).

"PROGRAMS FOR CRIMINAL OFFENDERS

"SEC. 228. Each State correctional education agency receiving financial assistance under this Act shall—

"(1) administer vocational education programs for criminal offenders, both juveniles and adults, in correctional institutions;

"(2) provide vocational education programs for women who are incarcerated;

"(3) use funds provided pursuant to the provisions of section 221(b)(1)(A) to update equipment; and

"(4) distribute funds for services to correctional institutions in proportion to the number of individuals served by each facility, giving special emphasis to ensure services for women who are incarcerated.

"USE OF FUNDS

"SEC. 229. (a)(1) Each local eligible recipient receiving financial assistance under this subpart shall use such funds to—

"(A) provide to the individuals described in sections 223 and 224 the supplementary services and prevocational programs necessary to ensure full and equitable participation in vocational education programs;

"(B) ensure that programs for the individuals described in section 223 are of the highest quality and are state-of-the-art; and

"(C) support supplemental or additional staff, equipment, materials, and services for the individuals described in section 223.

"(2) The necessary services described in paragraph (1)(A) shall be identified and designed through an assessment of the interests, abilities and needs of the students, and shall reflect the participation of the student and parent, and the guidance and counseling activities carried out under subsection (b)(1)(D).

"(3) Each local eligible recipient receiving funds under this section shall use no more than 5 percent of such funds for administrative costs.

"(4) Each local eligible recipient receiving funds under this section may use such funds to develop programs in consortia or in cooperation with community-based organizations.

"(b)(1) Each local eligible recipient receiving financial assistance under this subpart shall, to the extent practicable, use such funds for individuals described in section 223 to—

"(A) integrate academic and vocational training in a manner which—

"(i) provides a sequential course of study that—

"(I) uses an applied context based on both broad and specific job training;

"(II) reinforces and enhances academic skills;

"(III) motivates students to excel in both academic and vocational courses; and

"(iv) provides students with experience in, and understanding of, all aspects of the industry such students are preparing to enter; and

"(ii) encourages utilization of a business-industry model of applied learning techniques;

"(B) carry out program improvement activities, including instructional services, curriculum and materials development and state-of-the-art equipment and construction to upgrade instruction;

"(C) designate a special populations coordinator who shall be a qualified counselor or teacher to ensure that special populations described in section 223 are receiving adequate services and job skill training; and

"(D) provide comprehensive guidance and counseling to the individuals described in

section 223 who are participating in correctional education programs and who have not entered grade 9, and to the parents of such individuals, concerning—

"(i) the course of study in each vocational program offered;

"(ii) the occupational opportunities for employment after graduation, as well as summer and part-time employment during the school year;

"(iii) information about postsecondary education opportunities;

"(iv) information about apprenticeship program opportunities;

"(v) guidance and counseling at the prevocational level and during the vocational program;

"(vi) career guidance and counseling;

"(vii) assessment of interest, abilities, and special needs with respect to successful completion of the vocational education program;

"(viii) guidance, counseling, and career development activities conducted by professionally trained counselors who are associated with the provision of such services;

"(ix) counseling services designed to facilitate the transition from school to postschool employment and career opportunities; and

"(x) a career plan or career assessment for the student.

"(2) Each local eligible recipient receiving assistance under this subpart may use such funds for technical preparation education programs described in part B of this title for special populations described under section 223.

"(3) The individual described in paragraph (1)(C) shall be compensated in whole or in part through funds reserved pursuant to subsection (a)(2) for administrative costs.

"(4) Funds used to carry out the provisions of paragraphs (1)(A) and (1)(B) may be used to benefit other populations providing the needs of the individuals described in section 223 are being met.

"(5) Equipment purchases pursuant to paragraphs (1)(A) and (1)(B), when not being used to carry out the provisions of this Act, may be used for other instruction purposes if—

"(A) the acquisition of the equipment was reasonable and necessary for the purpose of conducting a properly designed project or activity under this title;

"(B) is used after regular school hours or on weekends; and

"(C) such other use is—

"(i) incidental to the use of that equipment under this title;

"(ii) does not interfere with the use of that equipment under this title; and

"(iii) does not add to the cost of using that equipment under this title.

"(6) Each local eligible recipient receiving funds under this subpart may only use such funds if such agency or school has provided for consultation with members of special populations, students, parents, teachers, workers and members of community-based organizations in the planning of the programs provided pursuant to this subpart, particularly with respect to the quality of the programs and supplementary services provided.

"LOCAL APPLICATION

"SEC. 230. (a) Any local eligible recipient desiring financial assistance under this subpart shall, according to requirements established by the State board, submit to the State board an application, covering the same period as the State plan, for the use of such assistance. The State board shall determine requirements for local applications, except that each such application shall—

"(1) contain a description of the vocational education programs to be funded;

"(2) contain a report on the number of individuals in each of the special populations categories contained in section 223;

"(3) contain a description of how the needs of the special populations will be assessed and a description of the planned use of funds to meet such needs;

"(4) identify the planned use of resources allocated to meet such needs;

"(5) ensure full and equitable participation in a vocational educational program of quality;

"(6) provide assurances that the programs funded under this subpart shall be carried out according to the criteria for programs for each special population described in section 223;

"(7) describe the performance evaluation standards the applicant will use to measure its progress;

"(8) demonstrate that in using funds in accordance with the provisions of sections 229 (b)(1)(A) and (b)(1)(B) the local eligible recipient has first met the needs of the individuals described in section 223 as required by section 229(b)(4);

"(9) describe methods to be used to coordinate vocational education services with relevant programs conducted under the Job Training Partnership Act, including cooperative arrangements established with private industry councils established under the Job Training Partnership Act, in order to avoid duplication and to expand the range of and accessibility to vocational education services;

"(10) describe methods used to develop vocational educational programs in consultation with parents and students of special populations described in section 223; and

"(11) provide a description of coordination with community-based organizations.

"(b) The individual described in section 229(b)(1)(C) shall review and comment on the application submitted pursuant to subsection (a) regarding the assurances contained in such application and the services to be provided to the special populations described in section 223.

"PERFORMANCE EVALUATION AND IMPROVEMENT

"SEC. 231. (a) Each local eligible recipient receiving financial assistance under this subpart shall develop goals for, and evaluate the effectiveness of, the program conducted pursuant to this subpart with respect to—

"(1) the progress of students in the achievement of basic academic skills;

"(2) the progress of students in achieving occupational skills necessary to obtain employment in the field for which the students have been prepared, including occupational skills in all aspects of the industry the students are preparing to enter;

"(3) the ability of the local eligible recipient to meet the needs of the special populations described in section 223; and

"(4) any other measures the local eligible recipient includes to reflect accurately the success of the program.

"(b) Each entity described in subsection (a) shall consult with the State board in determining measurement indicators pursuant to the criteria set forth in subsection (a).

"(c) Each local eligible recipient shall annually evaluate whether such entity is meeting the criteria developed under subsection (a). If any entity described in subsection (a) determines that such entity is not making substantial progress in meeting the criteria set forth in subsection (a), such entity shall develop a plan, in consultation with teachers, parents and students, for program improvement for the subsequent school year.

"(d) Each local eligible recipient shall regularly review programs, with the full and informed participation of representatives of the special populations described in section 223, to identify and to adopt measures to overcome any barriers which are resulting in lower rates of access or success for special populations.

"PROGRAM IMPROVEMENT PLAN

"SEC. 232. (a) The plan developed pursuant to section 231(c) shall describe how the local eligible recipient will identify and modify programs funded under this subpart including—

"(1) a description of vocational education and career development strategies designed to achieve the goals set forth in section 231(a); and

"(2) a description of measures designed to improve supplementary services provided to special populations described in section 223.

"(b) If after one year of implementation of the plan described in subsection (a), sufficient progress in meeting the criteria described in section 231 has not been made, the State shall work jointly with the local eligible recipient and teachers, parents and students to develop a plan for program improvement. Each such plan shall contain—

"(1) a description of the technical assistance and program activities the State will provide to enhance the performance of the local eligible recipient;

"(2) a reasonable timetable to improve the school performance under the plan;

"(3) a description of vocational education strategies designed to improve the performance of the program as measured by the evaluation; and

"(4) a description of measures designed to improve supplementary services provided to special populations described in section 223.

"Subpart 2—Postsecondary and Adult Programs

"POSTSECONDARY AND ADULT PROGRAMS

"SEC. 240. (a) From amounts reserved under section 102(a)(3)(B) the State board shall make grants, on a competitive basis, or on the basis of a formula as determined by the State board, to—

"(1) postsecondary educational institutions;

"(2) local educational agencies for programs for adults in secondary schools;

"(3) area vocational schools serving postsecondary students or adults;

"(4) community-based organizations providing vocational education to adults;

"(5) any of the entities set forth in paragraphs (1) through (3) in partnership with business, industry and labor; and

"(6) consortia of the entities described in paragraphs (1) through (5);

to improve vocational education programs, including comprehensive career guidance and counseling, for postsecondary students, adults, and single parents, displaced homemakers, and single pregnant women.

"(b) In awarding grants under this section the State board shall give priority to—

"(1) programs serving economically disadvantaged individuals, individuals with disabilities, individuals with limited English proficiency and traditionally underserved populations, including women and men in non-traditional programs;

"(2) apprenticeship programs, especially programs that serve the individuals described in paragraph (1);

"(3) programs that are strongly tied to economic development efforts within the State;

"(4) programs which—

"(A) train adults and students for all aspects of the occupations in which job openings are projected or currently available;

"(B) provide comprehensive career guidance and counseling for adults and students;

"(C) are developed in conjunction with business, industry, labor, the community, the State board, and other local eligible recipients; and

"(D) focus on the most salable, highest placement aspects of the industry; and

"(5) partnerships described in subsection (a)(5).

"(c) Grants awarded under this section shall be coordinated with programs and services provided through—

"(1) the Job Training Partnership Act,

"(2) the Adult Education Act, and

"(3) the Family Support Act of 1988,

to avoid duplication of effort and to ensure maximum effective utilization of funds under this subpart.

"POSTSECONDARY AND ADULT USE OF FUNDS

"SEC. 241. (a) Grants awarded under this subpart may be used for—

"(1) vocational programs for training or retraining adults or career counseling, including programs for older individuals;

"(2) the costs of serving adults in other vocational education programs, and paying the costs of instruction or the costs of keeping school facilities open longer;

"(3) education and training programs designed cooperatively with employers or labor, such as workplace literacy programs, worksite programs, and apprenticeship training programs (or combinations of such programs);

"(4) industry-education-labor partnership training programs in high-technology occupations (including programs providing related instruction to apprentices) and projects to train skilled workers needed to produce, install, operate, and maintain high-technology equipment, systems, and processes;

"(5) programs at postsecondary institutions to which provide high school diplomas to individuals aged 16 through 18; and

"(6) technical preparation education programs described in part B of title II.

"(b) The State shall use funds provided pursuant to this subpart for apprenticeship training programs especially tailored to—

"(1) the needs of an industry or groups of industries for skilled workers, technicians, or managers, or

"(2) enable the existing work force to adjust to changes in technology or work requirements.

"(c) Grants awarded under this subpart may be used to provide education and training through arrangements with private vocational training institutions, private postsecondary educational institutions, and employers whenever such institutions, employers or labor organizations can make a significant contribution to obtaining the objectives of the State plan and can provide substantially equivalent training at a lesser cost, or can provide equipment or services not available in public institutions.

"(d)(1) From funds available under this section, the State board may establish and support, through grants to institutions of higher education offering comprehensive programs in teacher or counselor preparation, statewide mentoring programs to—

"(A) fully use the skills and work experience of individuals employed or formerly employed in business and industry who become classroom instructors;

"(B) meet the needs of vocational educators who wish to upgrade their teaching competencies; and

"(C) meet the needs of counselors who wish to upgrade their counseling competencies.

"(2) Any mentoring program established under this program shall—

"(A) establish partnerships among State certification agencies, institutions of higher education offering comprehensive vocational education programs, and local educational agencies to deliver a professional development program aimed at preparing and meeting the continuing training needs of vocational educators and counselors;

"(B) provide competency-based vocational teacher education programs; and

"(C) provide assessment of professional education skills and develop a plan leading to probationary certification within 3 years;

"(D) employ as mentors highly qualified classroom educators who shall be selected by a process collaboratively developed by the institutions of higher education and local educational agencies within the State, and the State board, who shall assist in—

"(i) developing and demonstrating mentor competence in planning, teaching, evaluating, and managing classrooms, particularly for the special populations described in section 223;

"(ii) supervising vocational students' organizations;

"(iii) working with advisory committees;

"(iv) understanding cooperative vocational education programs;

"(v) understanding the foundations of vocational education; and

"(vi) identifying other sources of educational support and information to assist new vocational educators in becoming effective teachers.

"PROGRAMS FOR SINGLE PARENTS, DISPLACED HOMEMAKERS, AND SINGLE PREGNANT WOMEN

"SEC. 242. (a) From amounts reserved under section 102(b)(2) each State board shall provide vocational and prevocational educational programs, including comprehensive career guidance and counseling, and services for single parents, displaced homemakers, and single pregnant women.

"(b)(1) From amounts reserved under section 102(b)(2) each State board shall provide vocational and prevocational education programs and services in postsecondary or secondary school settings, including area vocational schools serving single parents, displaced homemakers and single pregnant women.

"(2) Programs and services provided pursuant to this subpart shall be administered by the sex equity administrator as described in section 111(b)(1)(A).

"(c) From amounts reserved under section 102(b)(2) each State may—

"(1) provide, subsidize, reimburse or pay for vocational and prevocational education and training activities, including basic academic skills, necessary educational materials, and career guidance and counselings that will furnish single parents, displaced homemakers, and single pregnant women with marketable skills;

"(2) make grants to local recipients for expanding vocational and prevocational education services when such expansion directly increases the capacity of local recipients for providing single parents, displaced homemakers, and single pregnant women with marketable skills;

"(3) make grants to community-based organizations for the provision of vocational and prevocational education services and career counseling to single parents, displaced homemakers, and single pregnant women, if the State determines that the community-based organization has demonstrated effectiveness in providing comparable or related services to single parents, displaced homemakers, and single pregnant women, taking into account the demonstrated performance of such an organization in terms of cost, the quality of training and the characteristics of the participants;

"(4) make vocational and prevocational education and training more accessible to single parents, displaced homemakers, and single pregnant women by providing support services including dependent care, transportation services, special services and supplies, books and materials, and by organizing and scheduling the programs so that such programs are more accessible; or

"(5) provide information to single parents, displaced homemakers, and single pregnant women to inform such individuals of vocational education programs and related support services and career counseling.

"SERVICES FOR MEMBERS OF SPECIAL POPULATIONS.

"SEC. 243. Each recipient of a grant under this subpart shall—

"(1) provide to individuals who are members of the populations described in section 223—

"(A) equal access in recruitment, enrollment, and placement activities, and to vocational programs available to other individuals, including occupationally specific courses of study, cooperative education programs, and apprenticeship programs;

"(B) the supplementary services needed by such students to successfully complete and master all aspects of the program in the most integrated setting possible; and

"(2) regularly review the programs assisted under this subpart, in consultation with members of the populations described in section 223, to identify any barriers which are resulting in lower rates of access or success for special populations and to adopt measures to overcome such barriers.

"Subpart 3—General Provisions

"STATE PERFORMANCE EVALUATION AND IMPROVEMENT

"SEC. 250. (a) Each State desiring financial assistance under this part shall develop criteria for, and evaluate the effectiveness of, programs under this part with respect to—

"(1) student progress in the achievement of basic academic skills;

"(2) student progress in achieving occupational skills necessary to obtain employment in the field for which the student has been prepared, including occupational skills in all aspects of the industry the student is preparing to enter;

"(3) the program's ability to meet the needs of special populations; and

"(4) any other measures the State shall deem necessary.

"(b) In developing the criteria required in subsection (a), the State board shall make every effort to develop criteria consistent with the standards and evaluations developed pursuant to section 231 by local eligible recipients of financial assistance under subpart 1. If after 2 years the State board determines that the local eligible recipient of financial assistance under subpart 1 is not making progress in meeting the goals set forth by such local eligible recipient, the

State shall work in conjunction with such local eligible recipient as prescribed in section 231 by providing program and technical assistance from funds provided under section 102.

"ADMINISTRATIVE PROVISIONS

"SEC. 251. (a)(1)(A) Funds made available under this part shall be used to supplement, and to the extent practicable increase the amount of State and local funds that would in the absence of such Federal funds be made available for the uses specified in the application, and in no case supplant such State or local funds.

"(B) Notwithstanding subparagraph (A), funds made available under this part may be used to pay for the costs of vocational education services required in an individualized education plan developed pursuant to sections 612(4) and 614(a)(5) of the Education of the Handicapped Act, in a manner consistent with section 614(a)(1) of such Act, and services necessary to meet the requirements of section 504 of the Rehabilitation Act of 1973 with respect to ensuring equal access to vocational education.

"(2) No State shall take into consideration payments under this Act in determining, for any educational agency or institution in that State, the eligibility for State aid, or the amount of State aid, with respect to public education within the State.

"(3) The Secretary may waive, as necessary, for each of the fiscal years 1991, 1992, and 1993 on an annual basis, the requirements of paragraphs (1) and (2) with respect to any State that expended for postsecondary education programs more than 70 percent of the funds available under this title in fiscal year 1989.

"(b) Any project assisted with funds made available under this part shall be of sufficient size, scope, and quality to give reasonable promise of meeting the vocational education needs of the students involved in the project.

"(c)(1) Vocational education services and activities authorized in this part may include work-site programs such as cooperative vocational education, programs with community-based organizations, work-study, and apprenticeship programs.

"(2) Vocational education services and activities described in this part may include placement services for students who have successfully completed vocational education programs.

"(3) Vocational education services and activities described in this part may include programs which involve students in addressing the needs of the community in the production of goods or services which contribute to the community's welfare or which involve the students with other community development planning, institutions, and enterprises.

"(d) Each State board receiving financial assistance under this part may consider granting academic credit for vocational education courses which integrate core academic competencies.

"(e)(1) In addition to the State plan, the State may submit a petition to waive the percentage requirements of section 102(a)(3). Such petition for a waiver shall be filed together with the State plan. The Secretary may approve the petition for a waiver only if the State adequately demonstrates that—

"(A) the waiver is necessary to serve more effectively the vocational education needs of economically disadvantaged families or individuals, minorities, individuals with limited English proficiency, or individuals with disabilities, if such individuals are—

"(i) students enrolled in secondary schools or area vocational schools;

"(ii) students who have dropped out of high school;

"(iii) adult individuals who have not earned high school diplomas; or

"(iv) adult individuals who are participating in programs assisted under the Job Training Partnership Act, the JOBS program under title II of the Family Support Act of 1988, the Adult Education Act, or adult literacy programs;

"(B) funds made available pursuant to a waiver under paragraph (1) shall be used—

"(i) to encourage and assist the individuals described in subparagraph (A) to prepare more effectively to enter or reenter the job market and compete for jobs in an increasingly technological workplace;

"(ii) to assist in the coordination of postsecondary vocational programs and secondary vocational programs serving the individuals described in subparagraph (A);

"(iii) to serve the individuals described in subparagraph (A) who seek to improve their employability through retraining programs which upgrade or update skills in accordance with changed work requirements, or through training for high-skilled occupations;

"(iv) to the extent practicable, by postsecondary schools and colleges to enable the students of such schools and colleges to earn high school diplomas or certificates of General Education Development; and

"(v) by postsecondary schools and colleges to serve the students of such schools and colleges through strengthened coordination among programs supported under this subsection and programs assisted under the Job Training Partnership Act, the JOBS program under title II of the Family Support Act of 1988, the Adult Education Act, or adult literacy programs.

"(2) Funds made available pursuant to a waiver under paragraph (1) shall only be used in postsecondary schools and colleges of the State serving high concentrations of economically disadvantaged families or individuals, minorities, individuals with limited English proficiency, or individuals with disabilities, if—

"(A) at least 30 percent of the population of the postsecondary school or college are economically disadvantaged individuals, minorities, individuals with limited English proficiency, or individuals with disabilities; or

"(B) the State provides assurances that it will rank-order postsecondary schools and colleges on the basis of need as determined by the number of Pell Grant recipients attending such schools and colleges, and shall limit assistance under this subsection to schools in the top 25 percent of such ranking.

"(3) In the case of a disagreement concerning an application for a waiver under this subsection pursuant to paragraph (4) between the State agency or department responsible for vocational education at the postsecondary level and the State agency designated as the sole State agency responsible for the administration or supervision of the State vocational education program under section 111 of this Act, the State agency or department responsible for vocational education at the secondary level shall file such objections with the State Board. The State Board shall respond to any objections of the such agency in submitting its State plan to the Secretary. The Secretary shall consider such comments in reviewing and approving the State plan and the provision for a waiver under this subparagraph.

"(4) Each State desiring a waiver under this subsection shall submit an application to the Secretary at such time, in such manner, and accompanied by such information as the Secretary may reasonably require.

"(f) Notwithstanding the provisions of section 102(a)(3), not more than 50 percent of funds available under such section shall be available to carry out the provisions of subpart 2 of part C of title II.

"(g)(1) The Secretary may waive the provisions of subsection (f) on a demonstration basis for not more than 5 States and make available not more than 65 percent of the funds available under section 102(a)(3), if the State demonstrates that the requirements of subsection (f) would adversely effect the vocational educational programs in the State based on the demand for postsecondary programs within the State as demonstrated by—

"(A) the State's average dropout rate, as reported by the State in accordance with the definition of a school dropout developed pursuant to section 6201(a) of the Elementary and Secondary Education Act of 1965;

"(B) the number of local educational agencies in the State which have dropout rates in excess of 10 percent;

"(C) the number of applications in the State for postsecondary vocational and technical programs as compared with the number of applications for vocational education programs in secondary schools or area vocational schools;

"(D) the unemployment rate of the State as compared with the average unemployment rate of all the States;

"(E) the demand for participation in the JOBS program under title II of the Family Support Act of 1988 or programs assisted under the Job Training Partnership Act; and

"(F) any other information the Secretary determines necessary for awarding such waiver.

"(2) Each State desiring a waiver under this subsection shall submit an application to the Secretary at such time, in such manner and accompanied by such information as the Secretary may reasonably require. Each such application shall—

"(A) include a description of the dropout rates in all local educational agencies in the State; and

"(B) contain such other information and assurances as the Secretary may reasonably require to ensure compliance with the provisions of this subsection.".

TITLE III—SPECIAL PROGRAMS

SEC. 301. SPECIAL PROGRAMS AMENDMENTS.

Title III of the Act is amended—

(1) in section 302(b) by—

(A) redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively; and

(B) inserting the following new paragraph (6) after paragraph (5):

"(6) model programs for school dropouts;";

(2) in section 311 by inserting "individual and family health," after "nutrition,";

(3) in section 312—

(A) in subsection (b)(1) by—

(i) striking "managing home and work responsibilities" and inserting "balancing work and family";

(ii) inserting "(including family violence and child abuse)" after "family crisis";

(iii) inserting "(especially among teenage parents), preventing teen pregnancy," after "parenting skills";

(iv) inserting "assisting at-risk populations (including the homeless)," after "handicapped individuals,"; and

(v) striking "improving nutrition" and inserting "improving individual child and family nutrition and wellness";

(4) in section 313 by—

(A) in subsection (a) by inserting "educational" after "experience and";

(B) redesignating subsection (b) as subsection (c); and

(C) inserting the following new subsection (b) after subsection (a):

"(b) Funds available under this part may be used to provide full-time State leadership and administrators with educational preparation in home economics education."; and

(5) by repealing parts C, D, and E.

SEC. 302. SUPPLEMENTARY GRANTS.

Title III of the Act is amended by inserting at the end thereof the following new part F:

"PART F—SUPPLEMENTARY GRANTS

"STATEMENT OF PURPOSE

"SEC. 351. It is the purpose of this part to provide additional resources to local educational agencies, area vocational schools, and intermediate educational agencies in economically depressed areas to improve the quality of their vocational education programs.

"ALLOTMENT TO STATES

"SEC. 352. (a) Except as provided in subsection (b), from amounts appropriated to carry out the provisions of this part, the Secretary shall allot to each State an amount which bears the same ratio to such amounts as the amount the State received in the previous fiscal year under section 1006 of the Elementary and Secondary Education Act of 1965 bears to the total amount received by all States under such section in such year.

"(b)(1) In any fiscal year in which the amount appropriated to carry out the provisions of this part does not equal or exceed $50,000,000, the Secretary shall, in accordance with the provisions of this part, make grants to States.

"(2) In awarding grants pursuant to this subsection the Secretary shall—

"(A) give priority to States which have—

"(1) high percentages of children eligible to be counted under section 1006 of the Elementary and Secondary Education Act of 1965,

"(2) high percentages of individuals living below the poverty level, and

"(3) high percentages of school dropouts;

"(B) take into consideration the State's commitment to education as demonstrated by the total elementary and secondary educational expenditures of the State divided by the total personal income of the State; and

"(C) ensure an equitable distribution of assistance among geographic regions of the country.

"ALLOCATION OF FUNDS TO ELIGIBLE RECIPIENTS

"SEC. 353. Each State receiving funds under this part shall use not less than 95 percent of such funds to award grants, on a competitive basis, to eligible recipients within the State to improve vocational education programs in the areas served by the eligible recipient.

"STATE APPLICATIONS

"SEC. 354. (a) Each State that desires to receive an allotment or a grant under this part shall submit an application to the Secretary at such time, and containing or accompanied by such information as the Secretary may reasonably require. Each such application shall—

"(1) designate the sole State agency described in section 111(a)(1) as the State agency responsible for the administration and supervision of activities carried out with assistance under this part;

"(2) provide for a process of consultation with the State Council on Vocational Education established under section 112;

"(3) describe how funds will be allocated in a manner consistent with section 323 that will serve eligible local educational agencies with the greatest need, especially—

"(A) eligible recipients in areas with the highest percentages of children eligible to be counted under section 1006 of the Elementary and Secondary Education Act of 1965; or

"(B) eligible recipients that have—

"(i) high percentages of individuals living below the poverty level,

"(ii) high percentages of school dropouts,

"(iii) high unemployment rates,

"(iv) high percentages of limited English speaking individuals,

"(v) a need to address community economic or employment issues; or

"(vi) a combination of conditions described in subparagraphs (A) through (E);

"(4) provide for an annual report of data concerning the use of funds and students served with assistance under this part;

"(5) provide that the State will keep such records and provide such information to the Secretary as may be required for purposes of financial audits and program evaluations; and

"(6) contain assurances that the State comply with the requirements of this part.

"(b) An application submitted by the State under subsection (a) shall be for a period of not more than 3 years.

"LOCAL APPLICATIONS AND LOCAL USE OF FUNDS.

"SEC. 355. (a) Each eligible recipient that desires to receive a grant under this part shall submit an application to the State at such time, and containing or accompanied by such information, as the State may reasonably require.

"(b) Each eligible recipient receiving funds under this part shall use such funds to meet the vocational education needs of economically disadvantaged students in a manner consistent with the goals and objectives of this Act.

"(c) Each eligible recipient receiving funds under this part shall use such funds to supplement and not supplant vocational education resources available in the area served by the eligible recipient.

"DEFINITIONS

"SEC. 356. For the purpose of this part—

"(1) the term 'eligible recipient' means a local educational agency, area vocational school or intermediate educational agency in an economically depressed area that is eligible to receive funds under section 221; and

"(2) the term 'State' includes each of the 50 States, the District of Columbia and the Commonwealth of Puerto Rico.".

TITLE IV—NATIONAL PROGRAMS

SEC. 401. RESEARCH ACTIVITIES.

Section 402 of the Act is amended—

(1) in subsection (a) by striking "National Institute of Education or any other division of the Department of Education which the Secretary determines to be appropriate" and inserting "Office of Educational Research and Improvement";

(2) in subsection (a)(1) by striking "individuals who are single parents or homemakers" and inserting "single parents, displaced homemakers, single pregnant women";

(3) by amending subsection (b) to read as follows:

"(b) In addition, the Secretary shall support meritorious, unsolicited research proposals from individual researchers, community colleges, State advisory councils, and State and local educators relating to the goals of this Act.";

(4) in paragraph (1) of subsection (d) by striking "(1)"; and

(5) by striking paragraph (2) of subsection (d).

SEC. 402. NATIONAL ASSESSMENT.

(a) AMENDMENT TO TITLE.—The heading to section 403 of the Act is amended by striking "PROGRAMS ASSISTED UNDER THIS ACT".

(b) AMENDMENT TO TEXT.—Section 403 of the Act is amended to read as follows:

"SEC. 403. (a)(1) The Secretary shall conduct a national assessment of vocational education programs assisted under this Act, through studies and analyses conducted independently through competitive awards.

"(2) The Secretary shall appoint an independent advisory panel, consisting of vocational education administrators, educators, researchers, representatives of business, industry, labor, and other relevant groups, to advise the Secretary on the implementation of such assessment, including the issues to be addressed, the methodology of the studies, and the findings and recommendations. The panel, at its discretion, may submit to the Congress an independent analysis of the findings and recommendations of the assessment. The application of the Federal Advisory Committee Act is waived for the provisions of this paragraph.

"(b) The assessment required under subsection (a) shall include descriptions and evaluations of—

"(1) the effect of this Act on State and Tribal administration of vocational education programs and on local vocational education practices, including the capacity of State, Tribal and local vocational education systems to address the priorities identified in this Act;

"(2) expenditures at the Federal, State, Tribal and local levels to address program improvement in vocational education, including the impact of Federal allocation requirements (such as within-State allocation formulas) on the delivery of services;

"(3) preparation and qualifications of teachers of vocational and academic curricula in vocational education programs, as well as shortages of these teachers;

"(4) participation in vocational education programs, including, in particular, access of special populations identified in this Act to high-quality vocational education programs and the impact, on the delivery of services to these populations, of Federal legislation giving States flexibility in allocating funds to serve these populations;

"(5) academic and employment outcomes of vocational education, including analyses of—

"(A) the impact of educational reform on vocational education;

"(B) the extent and success of integration of academic and vocational curricula;

"(C) the success of the school-to-work transition; and

"(D) the degree to which vocational training is relevant to subsequent employment;

"(6) employer involvement in, and satisfaction with, vocational education programs;

"(7) the impact of performance standards and other measures of accountability on the delivery of vocational education services;

"(8) the impact of Federal requirements regarding criteria for services to special populations identified in this Act, participatory planning in the States, and articulation between secondary and postsecondary programs; and

"(9) coordination of services under this Act, the Adult Education Act, the Family Support Act of 1988, the Job Training Partnership Act, the National Apprenticeship Act, the Rehabilitation Act of 1973, and the Wagner-Peyser Act.

"(c) The Secretary shall consult with the Committee on Labor and Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives in the design and implementation of the assessment required under subsection (a). The Secretary shall submit an interim report no later than January 1, 1994, to the Congress. The Secretary shall submit a final report, summarizing all studies and analyses completed after the assessment, to the Congress not later than July 1, 1994. Notwithstanding any other provision of law or regulation, such reports shall not be subject to any review outside of the Office of Educational Research and Improvement before their transmittal to the Congress, but the President, the Secretary, and the independent advisory council established under subsection (a)(2) may make such additional recommendations to the Congress with respect to the assessment as they deem appropriate.".

SEC. 403. OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT.

(a) AMENDMENT TO TITLE.—The heading to section 404 of the Act is amended by striking "CENTER" and inserting "CENTERS".

(b) AMENDMENT TO TEXT.—Section 404 of the Act is amended to read as follows:

"SEC. 404. (a)(1) The Office of Educational Research and Improvement shall conduct a competition for the establishment and operation of 3 or more vocational education research centers (hereinafter referred to as the 'National Centers') of which—

"(A) one National Center shall be a research center on Native American education;

"(B) one National Center shall be a research center which conducts applied research and provides technical assistance for vocational education and training programs serving youths and adults; and

"(C) one National Center shall have as its primary purpose conducting applied research and providing comprehensive direct technical assistance and outreach activities to enhance the ability of personnel in the fields of vocational education and training to deliver programs that meet the needs of learners and the workplace.

"(2) Each entity selected to establish and operate a National Center pursuant to paragraph (1) shall operate such National Center for a period of 5 years.

"(3) Beginning after December 31, 1992, the Office of Educational Research shall award an annual grant to each National Center selected pursuant to paragraph (1) for each of the five years such National Center is operated. After the third year in which a National Center receives a grant under this section the Secretary shall review the research priorities of such National Center.

"(4) Each National Center may reserve not more than 10 percent of the grant awarded in each fiscal year for the purposes of addressing field-initiated projects which had not been foreseen in submitting the annual budget described in subsection (c).

"(5) Each National Center shall appoint a Director for such National Center.

"(b) The Secretary shall continue to honor the provisions of the grant awarded to the National Center for Research in Vocational Education located in Berkeley, California, through December 31, 1992.

"(c) Each entity desiring to establish and operate a National Center shall submit an application for each fiscal year to the Office of Educational Research and Improvement at such time, in such manner, and accompanied by such information as the Office of Educational Research and Improvement may require. Each such application shall—

"(1) describe the activities and services for which assistance is sought;

"(2) contain an annual budget; and

"(3) contain such additional assurances as are necessary to ensure compliance with the provisions of this section.

"(d) The National Centers shall, directly or through contracts, conduct research and development projects and programs with other public agencies and public or private institutions of higher education. The National Centers shall disseminate information on the results of the research and development activities funded by the National Center as well as other available research. The National Centers shall conduct applied research and development on—

"(1) economic changes that affect the skills which employers seek and entrepreneurs need;

"(2) integration of academic and vocational education;

"(3) efficient and effective practices for addressing the needs of special populations described in section 223;

"(4) efficient and effective methods for delivering vocational education;

"(5) articulation of school and college instruction with high quality work experience;

"(6) recruitment, education, and enhancement of vocational teachers and other professionals in the field; and

"(7) such other topics as the Secretary may designate.

"(e) The National Center described in subsection (a)(1)(C) shall give priority to projects, programs, and activities which include—

"(1) teacher and administrator training and leadership development;

"(2) technical assistance to programs serving special populations described in section 223;

"(3) needs assessment, design, and implementation of new and revised programs, with related curriculum materials; and

"(4) evaluation and follow-through to maintain and extend quality programs.

"(f) The National Center described in subsection (a)(1)(A) shall conduct research on the educational participation, needs and performance of Native Americans. The Center shall consider teaching and learning for Native American students from childhood through adulthood. Specific priorities shall include, but not be limited to—

"(1) early childhood education;

"(2) home, family, and cultural influences on education;

"(3) vocational education and training, particularly services for special populations described in section 223; and

"(4) participation in postsecondary education, especially the factors that limit participation of Native Americans.

"(g) For the purposes of this section, the term 'Native American' includes American Indians, Native Alaskans, Native Hawaiians, and indigenous people of the Pacific Basin including American Samoans.".

(c) The amendment made by subsection (b) shall not affect contracts made by the National Center for Research in Vocational Education prior to the date of enactment of this Act.

SEC. 404. FORMULA STUDY.

Part A of title IV of the Act is amended by inserting at the end thereof the following new section:

"STUDY OF CARL D. PERKINS VOCATIONAL EDUCATION ACT FORMULA

"SEC. 405. (a) The Secretary shall, through grant or contract conduct a study of the distribution of Federal vocational education funds to the States. The study shall consider the distributional effects of the within State allocation formula set forth in section 102 including the age cohorts and the per capita income allotment ratios and shall also examine the impact that various other factors such as State tax capacity, tax effort, per capita income, poverty and educational achievement, could have in achieving the Federal goals and policy objectives of this Act. The study shall specifically address the appropriate distribution mechanism to serve the target populations of the Act.

"(b) The study shall explore the use of other possible methods of targeting funds to special populations of the Act, particularly the economically disadvantaged, including but not limited to the poverty rate of the school-aged population, the gross State product per school-aged child, relative tax capacity, and tax effort of the State, unemployment figures, and dropout rates.

"(c) The findings of the study shall be used to formulate recommendations on the most appropriate criteria and methods to direct Federal funds to the States and to achieve the Federal goals and policy objectives of this Act.

"(d) The study required under subsection (a) shall be completed by January 1, 1994.".

SEC. 405. DEMONSTRATION PROGRAMS.

Part B of title IV of the Act is amended to read as follows:

"PART B—DEMONSTRATION PROGRAMS

"PROGRAMS AUTHORIZED

"SEC. 411. (a) From amounts available for this part pursuant to section 101(a)(1)(A) in each fiscal year the Secretary shall reserve—

"(1) 5 percent for demonstration programs in accordance with the provisions of section 416; and

"(2) 20 percent for demonstration programs in accordance with the provisions of section 419.

"(b) From the remainder of funds available under section 101(a)(1)(A) for this part, the Secretary shall make demonstration grants in accordance with the provisions of this part.

"DEMONSTRATION PROJECTS FOR THE INTEGRATION OF VOCATIONAL AND ACADEMIC LEARNING

"SEC. 412. (a) The Secretary is authorized to make grants to institutions of higher education, area vocational schools, local educational agencies, secondary schools funded by the Bureau of Indian Affairs, State boards, public or private nonprofit organizations, or

any consortia thereof, to develop, implement and operate programs using different models of curricula which integrate vocational and academic learning by—

"(1) designing integrated curricula and courses;

"(2) providing inservice training for teachers and administrators in integrated curricula; and

"(3) disseminating information regarding effective integrative strategies to other school districts through the National Diffusion Network;

"(b) In awarding grants under this section, the Secretary shall ensure—

"(1) an equitable geographic distribution of funds awarded pursuant to this section;

"(2) that programs supported under this section offer significantly different approaches to integrating curricula;

"(3) that the programs supported under this section serve special populations;

"(4) that programs supported under this section serve—

"(A) vocational students in secondary schools and at postsecondary institutions;

"(B) individuals enrolled in adult programs; and

"(C) single parents, displaced homemakers, and single pregnant women; and

"(5) that adequate evaluation measures will be employed to measure the effectiveness of the curriculum approaches supported under this section.

"BUSINESS, INDUSTRY AND LABOR PARTNERSHIPS

"SEC. 413. (a) The Secretary is authorized to make grants to partnerships among—

"(1) an area vocational school, a State agency, a local educational agency, a secondary school funded by the Bureau of Indian Affairs, an institution of higher education, a State correctional education agency or an adult learning center; and

"(2) business, industry, labor, or apprenticeship programs.

"(b) Grants awarded under this section may be used to—

"(1) increase the access to, and quality of, programs for the special populations who are described in section 223;

"(2) strengthen coordination between vocational education programs, and the labor and skill needs of business and industry;

"(3) address the economic development needs of the area served by the partnership;

"(4) provide training and career counseling that will enable workers to retain their jobs;

"(5) provide training and career counseling that will enable workers to upgrade their jobs; and

"(6) address the needs of new and emerging industries, particularly those in high-technology fields.

"(c)(1) In awarding grants under this section, the Secretary shall give priority to partnerships whose programs provide job training in areas or skills where there are significant labor shortages.

"(2) In awarding grants under this section, the Secretary shall ensure an equitable geographic distribution of funds awarded pursuant to this section.

"MODEL PROGRAMS OF REGIONAL TRAINING FOR SKILLED TRADES

"SEC. 414. (a) The Secretary is authorized to make grants to regional model centers which provide—

"(1) training for skilled tradesmen within a region serving several States, and

"(2) technical assistance for programs which train such tradesmen within a region serving several States.

"(b) The regional model centers described in subsection (a) shall—

"(1) provide training and career counseling for skilled tradesmen in areas of skill shortages or projected skilled shortages;

"(2) provide prejob and apprenticeship training and career counseling in skilled trades;

"(3) upgrade specialized craft training; and

"(4) improve the access of women, minorities, economically disadvantaged individuals, individuals with disabilities and ex-criminal offenders to trade occupations and training.

"(c) In awarding grants under this section, and to the extent practicable, the Secretary shall ensure an equitable distribution of funds available under this section to the various skilled trades.

"BLUE RIBBON VOCATIONAL EDUCATION PROGRAMS

"SEC. 415. (a) The Secretary shall disseminate information and exemplary materials regarding effective vocational education.

"(b) The Secretary shall, in consultation with the National Centers for Research in Vocational Education (hereafter in this section referred to as the 'National Centers for Research'), the National Diffusion Network, and the Blue Ribbon Schools Program, carry out programs to recognize secondary and postsecondary schools or programs which have established standards of excellence in vocational education and which have demonstrated a high level of quality, to be known as 'Blue Ribbon Vocational Programs'. The Secretary shall competitively select schools and programs to be recognized from among public and private schools or programs within the States and schools funded by the Department of the Interior.

"(c)(1) The Secretary, in consultation with the National Centers for Research and the National Occupational Information Coordinating Committee (hereafter in this section referred to as the 'Committee'), shall designate each fiscal year a category or several categories of vocational education, which may include technology preparation education, in which Blue Ribbon Vocational Education Program awards will be named. Such categories shall emphasize the expansion or strengthening of the participation of special populations and may give special consideration to any of the following:

"(A) program improvement;

"(B) academic and occupational competencies; and

"(C) other categories determined by the Secretary in consultation with the National Centers for Research and the Committee.

"(2) Within each category, the Secretary shall determine the criteria and procedures for selection. Selection for such awards shall be based solely on merit. Schools or programs selected for awards under this section shall not be required to be representative of the States.

"(d)(1) The Secretary shall carry out the provisions of this section, including the establishment of the selection procedures, after consultation with appropriate outside parties.

"(2) No award may be made under this section unless the local educational agency, area vocational school, intermediate educational agency, Bureau of Indian Affairs, or appropriate State agency with jurisdiction over the school or program involved submits an application to the Secretary at such time, in such manner and containing such information as the Secretary may reasonably require.

"MATERIALS DEVELOPMENT IN TELECOMMUNICATIONS

"SEC. 416. (a) From amounts reserved under section 411(a)(1) the Secretary is authorized to make grants to nonprofit educational telecommunications entities to pay the Federal share of the costs of the development, production, and distribution of instructional telecommunications materials and services for use in local vocational and technical educational schools and colleges.

"(b)(1) The Federal share of the cost of each project assisted under this section shall be 50 percent.

"(2) The non-Federal share of the cost of each project assisted under this section shall be provided from non-Federal sources.

"(c) Grants awarded pursuant to this section may be used to provide—

"(1) a sequential course of study that includes either preproduced video courseware or direct interactive teaching delivered via satellite, accompanied by a variety of print and computer-based instructional materials;

"(2) the development of individual videocassettes or a series of videocassettes that supplement instruction, which shall be distributed both via broadcast and nonbroadcast means;

"(3) videodiscs that produce simulated hands-on training; and

"(4) teacher training programs for vocational educators and administrators and correctional educators.

"(d) In awarding grants under this section the Secretary shall give priority to programs or projects which serve—

"(1) students in area vocational and technical schools;

"(2) teachers, administrators, and counselors in need of training or retraining;

"(3) out of school adults in need of basic skills improvement or a high school equivalency diploma to improve such individual's employability;

"(4) college students, particularly those working toward a 2-year associate degree from a technical or community college;

"(5) workers in need of basic skills, vocational instruction, or career counseling to retain employment; and

"(6) workers who need to upgrade their skills to obtain jobs in high growth industries.

"PROFESSIONAL DEVELOPMENT

"SEC. 417. (a) The Secretary shall make grants to institutions of higher education, State educational agencies or State correctional education agency for teacher education, career counselor education, and professional development.

"(b) Grants awarded pursuant to this section shall be used for—

"(1) leadership development stipends for experienced vocational educators to participate in advanced study of vocational education;

"(2) teacher education fellowships for individuals who are—

"(A) currently employed in vocational education who need to update or maintain currency in their technological skills;

"(B) employed in agriculture, business, or industry who have skills and experiences in vocational fields for which there is a need for vocational educators; or

"(C) certified teachers with skills related to vocational fields who can be trained as vocational educators, especially minority instructors and those with experience in teaching the economically disadvantaged, individuals with disabilities, students with

limited English proficiency, and criminal and juvenile offenders; and

"(3) internships for gifted and talented vocational education students to intern in Federal and State agencies, vocational education research centers, or recognized vocational education associations.

"(c) In carrying out this section, the Secretary shall, based on information from the National Occupation Information Coordinating Committee and other appropriate sources, publish a listing of—

"(1) the areas of vocational education which are in need of additional personnel; and

"(2) the areas of teaching in which technological upgrading may be especially critical.

"EDUCATIONAL PROGRAMS FOR FEDERAL CORRECTIONAL INSTITUTIONS

"SEC. 418. (a) The Secretary is authorized to make grants to Federal correctional institutions in consortia with educational institutions, community-based organizations of demonstrated effectiveness, or the private sector, to provide education and training for criminal offenders in such institutions.

"(b) Grants awarded pursuant to this section may be used for—

"(1) basic education programs with an emphasis on literacy instruction;

"(2) vocational training programs;

"(3) guidance and counseling programs; and

"(4) supportive services for criminal offenders, with special emphasis on the coordination of educational services with agencies furnishing services to criminal offenders after such offenders are released from incarceration.

"VOCATIONAL EDUCATION LIGHTHOUSE SCHOOLS

"SEC. 419. (a) From amounts reserved under section 411(a)(2) the Secretary shall make grants to local schools to establish and operate vocational education lighthouse schools.

"(b) Grants awarded under this subsection shall be used to establish vocational education lighthouse schools which—

"(1) serve as a model vocational education program—

"(A) to provide each student with knowledge of, and experience in, all aspects of the industry or enterprise the student is preparing to enter;

"(B) to provide each student with basic and higher order skills and develop the student's problem solving abilities in a vocational setting;

"(C) to offer exceptionally high quality programs for disadvantaged and minority students;

"(D) to provide the special services and modifications necessary to help individual students successfully complete the program;

"(E) which is planned, developed and implemented with the participation of staff, local employers and local community; and

"(F) which offers a full range of programs, including comprehensive career guidance and counseling, for students who plan to seek employment upon graduation or who will enroll in a 2- or 4-year college;

"(2) provide information and assistance to other grant recipients, vocational programs, vocational education personnel, parents, students, other educators, community members and community organizations throughout the State regarding—

"(A) curriculum materials;

"(B) curriculum development, especially the integration of vocational and academic education;

"(C) inservice and preservice staff development, training and assistance, through off-site activities and through a range of short-term and long-term opportunities to participate in activities at the demonstration site;

"(D) opportunities to systematically observe the model program; and

"(E) technical assistance and staff development as appropriate.

"(3) use funds received under this section, together with funds from non-Federal sources, to develop and implement model programs containing the elements described in paragraph (1);

"(4) develop comprehensive linkages with other local schools, community colleges, 4-year colleges, private vocational schools, community-based organizations, labor unions, employers, and other business groups, as appropriate; and

"(5) develop and disseminate model approaches—

"(A) for meeting the education training needs and career counseling needs of minority, disadvantaged, disabled, and limited English-proficient students, and

"(B) to reduce and eliminate sex bias and stereotyping.

"CAREER AND GUIDANCE COUNSELING PROGRAMS

"SEC. 420. (a)(1) The Secretary is authorized to make grants to State boards for programs designed to improve, expand, and extend career guidance and counseling programs, to meet the career development, vocational education, and employment needs of vocational education students and potential vocational education students. Such program shall be designed to assist individuals to—

"(A) acquire self-assessment, career planning, career decisionmaking, and employability skills;

"(B) make the transition from education and training to work;

"(C) maintain marketability of current job skills in established occupations;

"(D) develop new skills to move away from declining occupational fields and enter new and emerging fields in high-technology areas and fields experiencing skill shortages;

"(E) develop midcareer job search skills and to clarify career goals; and

"(F) obtain and use information on financial assistance for postsecondary and vocational education and job training.

"(2) Programs assisted under paragraph (1) shall be organized and administered by certified counselors.

"(b) The programs authorized by this section shall include services and activities to ensure the quality and effectiveness of career guidance and counseling, including, but not limited to, career information delivery system development and implementation, and the establishment of student/client outcome standards against which the effectiveness of future career guidance and counseling programs can be measured.

"DROPOUT PREVENTION

"SEC. 420A. (a) The Secretary is authorized to make grants to partnerships between—

"(1) local educational agencies or area vocational schools; and

"(2) institutions of higher education and/or public or private nonprofit organizations which have an established record of vocational education strategies that prevent students from dropping out of school.

"(b) Grants awarded under this section shall be used to develop, implement, and operate vocational education programs designed to prevent students from dropping out of school. Such programs shall—

"(1) serve special populations, including significant numbers of economically disadvantaged dropout-prone youth;

"(2) provide inservice training for teachers and administrators in dropout prevention; and

"(3) disseminate information relating to successful dropout prevention strategies and programs through the National Dropout Prevention Network and the ERIC Center on Adult, Career and Vocational Education.

"(c) In awarding grants under this section, the Secretary shall give priority to partnerships which—

"(1) provide the special support services necessary to help individual students successfully complete the program such as mentoring, basic skills education, and services which address barriers to learning; and

"(2) utilize measures to integrate basic and academic skills instruction with work experience and vocational education.".

SEC. 407. DATA SYSTEMS AUTHORIZED.

Section 421 of the Act is amended to read as follows:

"SEC. 421. (a)(1) The Secretary shall, directly, or by grant, contract or cooperative agreement, implement and develop a vocational educational data system (hereafter in this section referred to as the 'system') using comparable information elements and uniform definitions, to the extent practicable.

"(2) The Secretary shall establish the system not later than 6 months after the enactment of this Act.

"(3) The National Center for Education Statistics (hereafter in this section referred to as the 'National Center') shall coordinate the development and implementation of the system.

"(b) Through the system, the Secretary shall collect and analyze data in order to provide—

"(1) the Congress with information relevant to policy making, and

"(2) Federal, State and local agencies and Tribal agencies with information relevant to program management, administration and effectiveness with respect to education and employment opportunities.

"(c)(1)(A) The system shall include information—

"(i) describing the major elements of the vocational education system on at least a national basis, including information with respect to teachers, administrators, students, programs, and to the extent practicable, facilities and equipment; and

"(ii) describing the condition of vocational education with respect to the elements described in clause (i).

"(B) The information described in subparagraph (A) shall be provided, to the extent practicable, in the context of other educational data relating to the condition of the overall education system.

"(C) The Secretary, in consultation with the Task Force described in subsection (g), the National Center, and the Office of Adult and Vocational Education (hereafter in this section referred to as the "Office"), shall modify existing general purpose and program data systems to ensure that an appropriate vocational education component is included in their design, implementation and reporting in order to fulfill the information requirements of this section.

"(2) The information system shall include data reflecting the extent of participation of the following populations:

"(A) economically disadvantaged students (including information on students in rural and urban areas);

"(B) individuals with disabilities;

"(C) individuals of limited English proficiency;

"(D) individuals who participate in programs designed to eliminate gender bias and sex stereotyping in vocational education;

"(E) adults who are in need of training and retraining;

"(F) youths incarcerated in juvenile detention or correctional facilities or criminal offenders who are serving time in correctional institutions;

"(G) single parents and displaced homemakers; and

"(H) minorities.

"(3) The Secretary, through the National Center and the Office, shall maintain and update the system at least every 3 years and ensure that the system provides the highest quality statistics and is adequate to meet the vocational education information needs of this Act. In carrying out the requirements of this paragraph, the Secretary shall ensure that appropriate methodologies are used in assessments of students of limited English proficiency and students with handicaps to ensure valid and reliable comparisons with the general student population and across program areas. With respect to standardized tests and assessments administered under this Act, test results shall be used as 1 of multiple independent indicators in assessment of performance and achievement.

"(d) The Center shall carry out an assessment of data availability and adequacy with respect to international competitiveness in vocational skills. To the extent practicable, the assessment shall include comparative policy-relevant data on vocational education in nations that are major trade partners of the United States. The assessment shall at a minimum identify available internationally comparative data on vocational education and options for obtaining and upgrading such data. The results of the assessment required by this paragraph shall be reported to the appropriate committees of the Congress not later than August 31, 1994.

"(e)(1) In establishing, maintaining, and updating the system, the Secretary shall—

"(A) use existing data collection systems operated by the Secretary and, to the extent appropriate, data collection systems operated by other Federal agencies;

"(B) conduct additional data collection efforts to augment the data collection systems described in subparagraph (A) by providing information necessary for policy analysis required by this section; and

"(C) use any independent data collection efforts that are complementary to the data collection efforts described in subparagraphs (A) and (B).

"(2) In carrying out the responsibilities imposed by this part, the Secretary shall cooperate with the Secretary of Commerce, the Secretary of Labor, and the National Occupational Information Coordinating Committee established under section 422 of this Act with respect to the development of an information system under section 463 of the Job Training Partnership Act to ensure that the information system operated under this section is compatible with and complementary to other occupational supply and demand information systems developed or maintained with Federal assistance. The Secretary shall also ensure that, to the extent feasible, the system allows international comparisons.

"(3) The Secretary shall ensure that the system, to the extent practicable, uses data definitions common to State plans, performance evaluations, and other evaluations required by this Act. The data in the system shall be available for use in preparing such plans, standards, applications, and evaluations.

"(f) The Secretary shall report to the Congress at least biennially with respect to—

"(1) the performance of the system established under subsection (a); and

"(2) strategies to improve the system and expand its implementation.

"(g)(1) The Secretary, in consultation with the National Center and the Office, shall convene a vocational education data task force (hereafter in this section referred to as the 'Task Force').

"(2) The Secretary shall establish the Task Force before the expiration of the 90-day period beginning on the date of the enactment of this Act, and shall terminate upon the expiration of the 2-year period beginning on such date.

"(3) The Task Force shall advise the Secretary on the development and implementation of an information reporting and accounting system responsive to the diverse programs supported by this Act.

"(4) The membership of the Task Force shall be representative of Federal, State, and local agencies and Tribal agencies affected by technological information, representatives of secondary and postsecondary vocational institutions, representatives of vocational education student organizations, representatives of special populations described in section 223, representatives of adult training programs funded under this Act, and representatives of apprenticeships, business, and industry.

"(5) The National Center shall provide the Task Force with staff for the purpose of carrying out its functions.

"(h) As a regular part of its assessments, the National Assessment of Educational Progress shall collect and report information for at least a nationally representative subsample of vocational education students, including students who are members of special populations, which shall allow for fair and accurate assessment and comparison of the educational achievement of vocational education students and other students in the areas assessed. Such assessment may include international comparisons.".

SEC. 408. NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE.

(a) AMENDMENT TO TITLE.—The heading for section 422 of the Act is amended to read as follows:

"NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE".

(b) AMENDMENT TO TEXT.—Section 422 of the Act is amended—

(1) in subsection (a)—

(A) by inserting after "Coordinating Committee" the following: "(hereafter in this section referred to as the 'Committee')";

(B) by inserting after "Office of Bilingual Education and Minority Language Affairs," the following: "the Assistant Secretary for Post Secondary Education,";

(C) by striking "(Manpower, Reserve Affairs, and Logistics)" and inserting "(Force Management and Personnel)";

(D) in paragraph (2), by inserting before the semicolon the following: "including regularly updated data on employment demand for agribusiness";

(E) in paragraph (3)—

(i) by striking "conduct studies on" and inserting the following: "conduct studies to improve the quality and delivery of occupational information systems to assist economic development activities, and examine"; and

(ii) by striking "and" at the end thereof;

(F) by redesignating paragraph (4) as paragraph (6); and

(G) by inserting after paragraph (3) the following new paragraphs:

"(4) continue training, technical assistance activities to support comprehensive career guidance, and vocational counseling programs designed to promote improved career decisionmaking by individuals (especially in areas of career information delivery and use);

"(5) coordinate the efforts of Federal, State, and local agencies and Tribal agencies with respect to such programs; and";

(2) by adding at the end thereof the following new subsections:

"(c)(1) The Committee, in consultation with the National Centers for Research in Vocational Education, appropriate Federal agencies, and the States, shall establish a demonstration program to monitor educational outcomes for vocational education using wage and other records. The Committee shall develop procedures for establishing and maintaining nationally accessible information on a sample of wage and earning records maintained by States on earnings, establishment and industry affiliation and geographical location, and on educational activities. This information shall be collected on at least an annual basis. The program shall ensure that a scientific sample of vocational education students and nonvocational education students, local educational agencies, and States participate in the program. The Committee shall maintain, analyze, and report data collected under the program and shall provide technical assistance to States, local educational agencies, and others that wish to participate in the study.

"(2) The program shall provide for an independent evaluation conducted by the Office of Technology Assessment of the Congress to assess the validity, fairness, accuracy, and utility of the data it produces. The report shall also describe the technical problems encountered and a description of what was learned about how to best implement and utilize data from the program.

"(3) The provision of wage and other records to the Committee by a State employment security agency shall be voluntary and pursuant to an agreement between the Committee and the agency. Such agreement shall take into consideration issues such as—

"(A) reimbursing the State employment security agency for the costs to the agency of providing the information; and

"(B) compliance with safeguards established by the State employment security agency and determined by the Secretary of Labor to be appropriate to insure that the information disclosed to the Committee is used only for the purposes of this subsection.

"(4) The Executive Director of the Committee, in consultation with the Secretary, shall ensure that all personally identifiable information about students, their educational performance and their families and information with respect to individual schools shall remain confidential in accordance with the provisions of section 552 of title 5, United States Code. The data gathered under this subsection shall not be used to rank, compare, or otherwise evaluate individual students or individual schools. No

individual may be included in the program without that individual's written consent. At least once every 3 years the Secretary shall remind participants in writing of their inclusion in the program.

"(d) Of the amounts available pursuant to section 3(e) for each fiscal year for this part, 22 percent shall be reserved to carry out the provisions of this section. Of such amounts, the Committee shall use—

"(1) to support State occupational information coordinating committees for the purpose of operating State occupational information systems and career information delivery systems, the greater of—

"(A) amounts appropriated or otherwise made available for that purpose for the fiscal year 1989; and

"(B) an amount equal to not less than 75 percent of the amounts available to carry out this section; and

"(2) for purposes of carrying out subsection (c)—

"(A) an amount equal to not less than 10 percent of the amounts available to carry out this section; or

"(B) if the amount remaining after carrying out paragraph (1) is insufficient to provide the amount described in subparagraph (A), such remaining amount.".

SEC. 409. NATIONAL NETWORK FOR CURRICULUM COORDINATION IN VOCATIONAL AND TECHNICAL EDUCATION.

Part C of title IV of the Act is amended by adding at the end thereof the following new section:

"NATIONAL NETWORK FOR CURRICULUM COORDINATION IN VOCATIONAL AND TECHNICAL EDUCATION

"SEC. 424. (a) From the sums allocated to carry out this section, the Secretary shall establish through grants or contracts a National Network for Curriculum Coordination in Vocational and Technical Education consisting of six regional curriculum coordination centers. The Network shall encourage the designation of a State liaison representative in each of the States, and where appropriate, a Tribal liaison. It shall be the purpose of the Network to—

"(1) provide leadership and technical assistance in vocational and technical education curriculum design, development, and dissemination;

"(2) coordinate vocational and technical education curriculum information sharing among all the States, tribes, and the territories;

"(3) reduce duplication of effort in vocational and technical education curriculum development activities among the States, Tribes, and territories; and

"(4) promote the use of vocational and technical education curriculum research findings.".

SEC. 410. NATIONAL COUNCIL.

(a) APPOINTMENTS AND VACANCIES.—The first sentence of section 431(a)(2) of the Act is amended to read as follows: "The members of the Council shall be appointed and serve for such terms as the Council shall prescribe. A vacancy in the Council shall be filled in such manner as the Council shall prescribe".

(b) REPEAL.—Part D of title IV of the Act is repealed.

(c) EFFECTIVE DATES.—(1) The amendment made by subsection (a) shall take effect on September 30, 1991.

(2) The amendment made by subsection (b) shall take effect on October 1, 1992.

SEC. 411. GENERAL PROVISIONS.

Section 451 of the Act is amended to read as follows:

"SEC. 451. (a) Subject to the provisions of subsection (b), of the amounts available pursuant to section 3(e) for any fiscal year for this title—

"(1) 35 percent shall be available for part A, relating to research;

"(2) 33.5 percent shall be available for part B, relating to demonstration projects; and

"(3) 31.5 percent shall be available for part C, relating to vocational education in occupational information data systems.

"(b) From amounts available pursuant to subsection (a)(3)—

"(1) at least 3.5 percent of the total amount appropriated pursuant to the authority of section 3(e) shall be available in each fiscal year to carry out section 421; and

"(2) at least 1.75 percent of the total amount appropriated pursuant to the authority of section 3(e) shall be available in fiscal year 1991 to carry out the provisions of section 405, relating to the study of the within State allocation formula set forth in section 102;

"(3) at least 3.5 percent of the total amount appropriated pursuant to the authority of section 3(e) shall be available in each fiscal year to carry out the provisions of section 424.".

TITLE V—GENERAL PROVISIONS

SEC. 501. CERTIFICATION REQUIREMENTS.

(a) AMENDMENT TO TITLE.—The heading to section 502 of the Act is amended to read as follows:

CERTIFICATION REQUIREMENTS

(b) AMENDMENT TO TEXT.—Section 502 of the Act is amended to read as follows:

"SEC. 502. (a) As part of the State plan required by section 113, each State board desiring to receive assistance under this Act shall—

"(1) provide assurances that the State board, or local educational agencies within the State, will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in the hiring, promotion, or assignment of employees of such State board, such local educational agencies or other personnel for whom such State board or such local educational agencies have any administrative responsibility;

"(2) provide assurances that the State board or the local educational agencies within the State will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in the enrollment of students in schools or in courses of instruction within schools of such State board or such local educational agencies except to carry out the approved plan; and

"(3) to provide assurances that the State board or local educational agencies within the State will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in designing or operating extracurricular activities for students.

"(b) No plan may be approved under section 113 unless the Secretary, through the Assistant Secretary of Education for Civil Rights, determines that the assurances described in paragraphs (1), (2), and (3) of subsection (a) will be met.".

SEC. 502. REGIONAL MEETINGS ON REGULATIONS.

Part A of title V of the Act is amended by inserting at the end thereof the following new sections:

"REGIONAL MEETINGS ON REGULATIONS

"SEC. 507. (a) The Secretary shall convene regional meetings to obtain public involvement in the development of proposed regulations under the Carl D. Perkins Vocational Education Act Amendments of 1989. Such meetings shall include individuals and groups involved in vocational education programs under this Act, such as Federal, State, Tribal and local administrators, parents, teachers, members of local boards of education and special populations described in section 223.

"(b) During each such meeting, the Secretary shall provide for a comprehensive discussion and exchange of information on at least 4 key issues, selected by the Secretary, concerning implementation of the Carl D. Perkins Vocational Education Act Amendments of 1989. The Secretary shall take into account information received at these meetings in the development of proposed regulations, and shall publish a summary of such information in the Federal Register together with such proposed regulations.

"(c) Once such regulations have been promulgated as final, the Secretary shall convene regional meetings to share information regarding implementation of the final regulations under the Carl D. Perkins Vocational Education Act Amendments of 1989. Such meetings shall include individuals and groups involved in vocational education under this Act, such as Federal, State, Tribal, and local administrators, parents, teachers, and members of local boards of education.

"FEDERAL MONITORING

"SEC. 508. The Secretary shall make every effort to provide adequate monitoring of compliance by recipients of assistance under this Act with the provisions of this Act. Such monitoring activities shall be developed by the Secretary in consultation with parents, students, and advocacy organizations, and shall—

"(1) consider items such as whether the provisions of the State plan are being fully implemented;

"(2) consider items such as whether the State board's monitoring of local recipients of assistance under this Act is adequate to assure full compliance with the provisions of this Act by such recipients;

"(3) consider items such as whether the State-level coordinators for each of the special populations described in section 223 are able to review the local plans for serving such special populations;

"(4) consider items such as whether the other State responsibilities under this Act are being implemented; and

"(5) provide for input from students, parents, teachers, and special populations in the States.".

SEC. 503. DEFINITIONS.

Section 521 of the Act is amended—

(1) in paragraph (2), by striking "program";

(2) by amending paragraph (3) to read as follows:

"(3) The term 'area vocational education school' means—

"(A) a specialized high school used exclusively or principally for the provision of vocational education to individuals who are available for study in preparation for entering the labor market; or

"(B) the department of a high school exclusively or principally used for providing vocational education in no less than 5 different occupational fields to individuals who are available for study in preparation for entering the labor market; or

"(C) a school that offers both secondary and postsecondary instruction, but where secondary instruction is provided in no less than 5 different occupational fields to indi-

viduals who are available for study in preparation for entering the labor market.";

(3) by striking paragraph (10) and redesignating paragraphs (8) and (9) as paragraphs (9) and (10), respectively;

(4) by inserting the following new paragraph (8) after paragraph (7);

"(8) the term 'State correctional education agency' means the State agency or agencies responsible for carrying out correctional education programs in the State;"

(5) by striking paragraphs (12), (13), and (14) and redesignating paragraphs (15), (16), and (17) as paragraphs (11), (12), and (13), respectively;

(6) in paragraph (12) (as redesignated in paragraph (4)) by striking the "term 'handicapped', when applied to individuals, means" and inserting "terms 'individual with a disability or individuals with disabilities' means";

(7) by inserting the following new paragraph (14) after paragraph (13) (as redesignated in paragraph (4)):

"(14) The term 'intermediate educational agency' means a combination of school districts or counties (as defined in section 1471(5) of the Elementary and Secondary Education Act of 1965) as are recognized in a State as an administrative agency for such State's vocational or technical education schools or for vocational programs within its public elementary or secondary schools. Such term includes any other public institution or agency having administrative control and direction over a public elementary or secondary school.";

(8) by redesignating paragraphs (18) through (32) as paragraphs (15) through (29), respectively; and

(9) by inserting the following new paragraphs at the end thereof:

"(30) the term 'all aspects of the industry' means strong experience in, and understanding of, all aspects of the industry the students are preparing to enter, including planning, management, finances, technical and production skills, underlying principles of technology, labor issues, and health and safety;

"(31) the term 'local eligible recipient' means a local educational agency, an area vocational school, an intermediate educational agency, or the State correctional education;

"(32) the term 'supplementary services' means curriculum modification, equipment modification, classroom modification, supportive personnel, and instructional aids and devices.

"(33) the term 'displaced homemaker' means an individual who—

"(A) is an adult; and

"(B)(i) has worked as an adult primarily without remuneration to care for the home and family, and for that reason has diminished marketable skills;

"(ii) has been dependent on public assistance or on the income of a relative but is no longer supported by that income; or

"(iii) is a parent whose youngest dependent child will become ineligible to receive assistance under part A of title IV of the Social Security Act Aid to Families With Dependent Children within 2 years of the parent's application for assistance under this Act; or

"(iv) is unemployed or underemployed and is experiencing difficulty in obtaining any employment or suitable employment, as appropriate.

"(C) is described in subparagraph (A) or (B) and is a criminal offender;

"(34) the term 'prevocation services' means services, programs, or activities designed to assist individuals who are not enrolled in vocational education programs in the selection of, or preparation for participation in, an appropriate vocational education program, such as—

"(A) services, programs, or activities related to outreach to or recruitment of potential vocational education students;

"(B) career counseling and personal counseling;

"(C) vocational assessment and testing; and

"(D) other appropriate services, programs, or activities;

"(35) the term 'sequential course of study' means an integrated series of courses which are directly related to the educational and occupational skills preparation of individuals for jobs, or preparation for postsecondary education;

"(36) the term 'technology education' means an applied discipline designed to promote technological literacy which provides knowledge and understanding of the impacts of technology including its organizations, techniques, tools and skills to solve practical problems and extend human capabilities in areas such as construction, manufacturing, communication, transportation, power and energy; and

"(37) the term 'specific job training' means training and education for skills required by the employer that provides the individual student with the ability to obtain employment and to adapt to the changing demands of the workplace.".

TITLE VI—CORRECTIONAL EDUCATION

SEC. 601. SHORT TITLE.

This title may be cited as the "Office of Correctional Education Act of 1989".

SEC. 602. CORRECTIONAL EDUCATION.

Title II of the Department of Education Organization Act is amended by—

(1) redesignating section 214 as section 215; and

(2) inserting the following new section 214 after section 212:

"OFFICE OF CORRECTIONAL EDUCATION

"SEC. 214. (a) FINDINGS.—The Congress finds and declares that—

"(1) education is important to, and makes a significant contribution to, the readjustment of incarcerated individuals to society; and

"(2) there is a growing need for immediate action by the Federal Government to assist State and local educational programs for criminal offenders in correctional institutions.

"(b) STATEMENT OF PURPOSE.—It is the purpose of this title to encourage and support educational programs for criminal offenders in correctional institutions.

"(c) ESTABLISHMENT OF OFFICE.—The Secretary of Education shall establish within the Department of Education an Office of Correctional Education.

"(d) FUNCTIONS OF OFFICE.—The Secretary, through the Office of Correctional Education established under subsection (a) of this section, shall—

"(1) coordinate all correctional education programs within the Department of Education;

"(2) provide technical support to State and local educational agencies and schools funded by the Bureau of Indian Affairs on correctional education programs and curricula;

"(3) provide an annual report to the Congress on the progress of the Office of Correctional Education and the status of correctional education in the United States;

"(4) cooperate with other Federal agencies carrying out correctional education programs to ensure coordination of such programs; and

"(5) consult with, and provide outreach to, State directors of correctional education and correctional educators.

"(e) DEFINITIONS.—As used in this section—

"(1) the term 'criminal offender' means any individual who is charged with or convicted of any criminal offense, including a youth offender or a juvenile offender;

"(2) the term 'correctional institution' means any—

"(A) prison,

"(B) jail,

"(C) reformatory,

"(D) work farm,

"(E) detention center, or

"(F) halfway house, community-based rehabilitation center, or any other similar institution designed for the confinement or rehabilitation of criminal offenders; and

"(3) the term 'State educational agency' means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.".

TITLE VII—AUTHORIZATION OF APPROPRIATIONS

SEC. 701. AUTHORIZATION OF APPROPRIATIONS.

Section 3 of the Act is amended to read as follows:

"SEC. 3. (a) There are authorized to be appropriated $1,500,000,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of titles I, II, III and IV of this Act.

"(b) There are authorized to be appropriated $10,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 for section 112 of title I, relating to State councils on vocational education.

"(c)(1) There are authorized to be appropriated $14,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out part A of title III, relating to State assistance for vocational education support programs by community-based organizations.

"(2) There are authorized to be appropriated $37,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out part B of title III, relating to consumer and homemaking education.

"(d) There are authorized to be appropriated $100,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of this part F of title III.

"(e) There are authorized to be appropriated $3,000,000 for each of fiscal years 1991 and 1992 to carry out the provisions of section 403. Such funds shall remain available until expended.

"(f)(1) There are authorized to be appropriated $350,000 for fiscal year 1991 to carry out part D of title IV relating to the National Council on Vocational Education.

"(2)(A) There are authorized to be appropriated $200,000 for fiscal year 1992 to carry out part D of title IV relating to the National Council on Vocational Education.

"(B) Amounts available from any amount appropriated pursuant to the authority of subparagraph (A) shall be limited to an amount equal to 200 percent of the services and funds received pursuant to section 431(c)(4) and 431(c)(5) during such fiscal year.

"(g) There are authorized to be appropriated $7,000,000 for the fiscal year 1991 and such sums as may be necessary for the fiscal years 1992, 1993, 1994, and 1995 to carry out part E of title IV, relating to bilingual vocational training programs.

"(h) From the funds appropriated pursuant to subsection (a) for each fiscal year, 2.75 percent shall be available to carry out the provisions of title IV (other than part E), relating to national programs.".

TITLE VIII—TECHNICAL AMENDMENTS

SEC. 801. AMENDMENTS TO THE TABLE OF CONTENTS.

The table of contents of the Act is amended by—

(1) striking the item relating to section 115 and inserting "State Assessment";

(2) striking out the items relating to title II and inserting the following:

"TITLE II—BASIC STATE GRANTS FOR VOCATIONAL EDUCATION

"PART A—STATE PROGRAMS

"Sec. 201. State programs and State leadership.
"Sec. 202. Sex equity programs.

"PART B—TECHNOLOGY PREPARATION

"Sec. 211. Program authorized.
"Sec. 212. Technical preparation education programs.
"Sec. 213. Applications.
"Sec. 214. Definitions.

"PART C—SECONDARY, POST-SECONDARY, AND ADULT VOCATIONAL PROGRAMS

"Subpart 1—Secondary School Programs

"Sec. 221. Within State allocation.
"Sec. 222. State reserve for areas with severe problems.
"Sec. 223. Populations to be served.
"Sec. 224. Programs for economically disadvantaged students.
"Sec. 225. Programs for students with disabilities.
"Sec. 226. Programs for students with limited English proficiency.
"Sec. 227. Programs to eliminate sex bias.
"Sec. 228. Programs for criminal offenders.
"Sec. 229. Use of funds.
"Sec. 230. Local applications.
"Sec. 231. Performance evaluation and improvement.
"Sec. 232. Program improvement plan.

"Subpart 2—Postsecondary and Adult Programs

"Sec. 240. Postsecondary and adult programs.
"Sec. 241. Postsecondary and adult use of funds.
"Sec. 242. Programs for single parents, displaced homemakers and single pregnant women.

"Subpart 3—General Provisions

"Sec. 250. State performance evaluation and improvement.
"Sec. 251. Administrative provisions.";

(3) inserting the following at the end of title III:

"PART F—SUPPLEMENTARY GRANTS

"Sec. 351. Supplementary grants.
"Sec. 352. Allotment to States.
"Sec. 353. Allocation of funds to eligible recipients.
"Sec. 354. State applications.
"Sec. 355. Local applications and local use of funds.
"Sec. 356. Definitions.";

(4) in the item relating to section 403 by striking "programs assisted under this Act";

(5) in the item relating to section 404 by striking "Center" and inserting "Centers";

(6) inserting the following at the end of part A of title IV:

"Sec. 405. Study of Carl D. Perkins Vocational Education Act Formula.";

(7) striking the items relating to part B of title IV and inserting the following:

"PART B—DEMONSTRATION PROGRAMS

"Sec. 411. Programs authorized.
"Sec. 412. Demonstration projects for the integration of vocational and academic learning.
"Sec. 413. Business and industry partnerships.
"Sec. 414. Model programs of regional training for skilled trades.
"Sec. 415. Blue ribbon vocational education programs.
"Sec. 416. Materials development in telecommunications.
"Sec. 417. Professional development.
"Sec. 418. Educational programs for Federal correctional institutions.
"Sec. 419. Vocational education lighthouse schools.
"Sec. 420. Career and guidance counseling programs.
"Sec. 420A. Dropout prevention.";

(8) striking the item relating to section 422 and inserting "National Occupational Information Coordinating Committee";

(9) inserting the following new item after the item relating to section 423:

"Sec. 424. National network for curriculum coordination in vocational and technical education.";

(10) striking the item relating to section 502 and inserting "Certification requirements"; and

(11) inserting after the item relating to section 506 the following:

"Sec. 507. Regional meetings on regulations.".

SEC. 802. THE DEPARTMENT OF EDUCATION ORGANIZATION ACT.

(a) TABLE OF CONTENTS.—Section 1 of the Department of Education Organization Act is amended by striking the items relating to section 213 and 214 and inserting the following:

"Sec. 214. Office of Correctional Education.
"Sec. 215. Federal Interagency Committee on Education.".

(b) REPEALER.—Section 213 of the Department of Education Organization Act is repealed.

SEC. 803. HIGHER EDUCATION ACT.

Section 621 of the Higher Education Act of 1965 is repealed.

TITLE IX—EFFECTIVE DATE

SEC. 901. EFFECTIVE DATE.

(a) IN GENERAL.—Except as otherwise provided, the amendments made by this Act shall take effect on July 1, 1991.

(b) INDIAN PROGRAMS.—(1) Except as provided in paragraph (2), the amendments made by sections 101(a)(2) and 103 of this Act shall take effect on October 1, 1990.

(2) The provisions of section 101(a)(1)(C) of the Carl D. Perkins Vocational Education Act, as added by this Act, shall not apply before July 1, 1991.

TITLE X

The General Accounting Office (GAO) shall conduct a thorough study of the Dual System of Vocational Education in the Federal Republic of Germany.

Furthermore, the GAO shall conduct a thorough study of the desirability, advantages, and disadvantages of establishing a nationwide job apprenticeship program in the United States similar to the Dual System of Vocational Education in the Federal Republic of Germany.

In studying the West German Dual System of Vocational Education, the GAO shall assess:

the ability of such a system to prepare workers for the technical workplace;

the level of academic skills an apprentice in the Dual System acquires;

the effectiveness of combining on-the-job training with classroom instruction;

the dropout rate of West German students;

the construction and oversight of skill certification tests;

the labor mobility of apprentices;

if such a system has helped West Germany maintain a competitive workforce and a competitive edge in the world economy;

the value and productivity of apprentices to business;

the direct and indirect costs/benefits to the country, industry, company and individual that result from the Dual System of Vocational Education.

In assessing the ability of a similar program to be replicated in the United States, the GAO shall evaluate such factors as:

existing job apprenticeship programs and their ability to prepare workers for the technical work place;

the future need for skilled workers and the extent to which job apprenticeship programs could meet these future workforce needs;

the appropriate age or grade level for students to enter job apprenticeship programs (i.e. secondary v. postsecondary students or both);

the potential for such programs to reduce the dropout rate, place more qualified workers in the work place, and increase the lifetime earnings of those who participate in such a job apprenticeship program;

the training wage appropriate for an apprentice;

the estimated value and productivity of apprentices to business;

the federal and state role in regulating and funding such programs;

the direct and indirect costs-benefits of such a program to the federal and state governments, industry, the company and the individual.

The study, together with comments and recommendations, shall be completed and presented to Congress no later than one year from the date of enactment of this Act.

LAUTENBERG (AND OTHERS) AMENDMENT NO. 1466

Mr. LAUTENBERG (for himself, Mr. BRADLEY, Mr. HEFLIN, Mr. KOHL, and Mr. MOYNIHAN) proposed an amendment to amendment No. 1465 proposed by Mr. PELL (and others) to the bill S. 1109, supra, as follows:

In the pending amendment at the end of title III:

On page 87, between lines 3 and 4, insert the following:

SEC. 303. COMMUNITY EDUCATION EMPLOYMENT CENTERS.

Title III of the Act (as amended by section 302) is further amended by inserting at the end thereof the following new part:

"PART G—COMMUNITY EDUCATION EMPLOYMENT CENTERS

"SEC. 361. SHORT TITLE.

"This part may be cited as the 'Community Education Employment Center Act of 1989'.

"SEC. 362. PURPOSE.

"It is the purpose of this part to establish and evaluate model high school community education employment centers to meet the education needs of low-income urban and rural youth by awarding grants to eligible recipients to establish community education employment centers to provide students with the education, skills, support services, and enrichment necessary to ensure—

"(1) graduation from secondary school;

"(2) successful transition from secondary schools to a broad range of postsecondary institutions: and

"(3) employment, including military service.

"SEC. 363. PROGRAM AUTHORIZED.

"(a) IN GENERAL.—The Secretary is authorized, in accordance with the provisions of this part, to make grants to eligible recipients having applications approved pursuant to section 10 to establish and operate not more than 10 community education employment centers nationwide.

"(b) GRANT PERIOD.—Grants awarded under this section may be for a period of 5 years.

"SEC. 364. PROGRAM REQUIREMENTS.

"Each eligible recipient receiving a grant under this part shall—

"(1) operate a community education employment center on an extended year and extended day basis;

"(2) establish a collegial working environment, with substantial opportunities for staff training and development and shared decisionmaking;

"(3) maintain small class sizes, and to the extend possible, maintain an average class size of 15 students or less;

"(4) have the option to organize community education and employment centers into one or more programs, specializing in different areas of study of particular interest and employment opportunities for the student population;

"(5) offer a broad array of secondary school coursework, including, to the extent possible—

"(A) English, mathematics, history, geography, biology, chemistry, physics, and computer science;

"(B) opportunities for student participation in a wide range of extracurricular activities, including community service and exploration, sports, fine and performing arts and tutorial study sessions;

"(C) a comprehensive vocational-technical education program developed through regular consultation with employer-labor panels, with knowledge of relevant industries, and which offers skills in planning, management, finances, technical and production skills, underlying principles of technology, labor and community issues, economic development and health, safety, and environment issues;

"(D) courses in health, nutrition, and parenting;

"(6) offer students on-site opportunities for assistance with career planning and decisionmaking, employability, entrepreneurial abilities, interpersonal communication skills, and remedial studies;

"(7) maintain an emphasis on the development of academic skills, regardless of student career objectives;

"(8) provide technical assistance and training to staff from other schools and local education agencies within the State who wish to replicate community education employment center capabilities; and

"(9) seek to utilize community organizations to provide support for educational activities and services to parents and students.

"SEC. 365. SUPPORT SERVICES REQUIREMENTS.

"Each eligible recipient receiving a grant under this part shall establish in each community education employment center a support system to coordinate services for students, including—

"(1) a comprehensive program of confidential guidance counseling, providing—

"(A) guidance for career and personal decisionmaking and postsecondary institution placement;

"(B) mentoring and referral to appropriate social services; and

"(C) an accessible counseling service to help parents to focus on the enhancement of student education;

"(2) an on-site job service office to offer students—

"(A) career guidance, development, and employment counseling, which provides information about a broad range of occupations and alternative career paths;

"(B) labor market information, job development, career testing, and occupational placement services for part-time and summer employment, internships, cooperative programs, and part-time and full-time employment opportunities upon graduation; and

"(C) assistance in arranging part-time employment, so long as such employment does not reduce academic performance;

"(3) assistance in arranging a summer program of work, education, or enrichment sessions;

"(4) to the extent possible, providing transportation to and from the community education employment center and part-time job sites; and

"(5) access to day care services for children of participating students.

"SEC. 366. PARENTAL AND COMMUNITY PARTICIPATION.

"(a) IN GENERAL.—Each eligible recipient receiving a grant under this part shall employ a parent/community coordinator to provide for the active and informed participation of parents and appropriate community representatives in each community education employment center by—

"(1) encouraging parents and students to make informed decisions in reviewing and selecting the choice of community education employment center programs for their children;

"(2) conducting regular parent seminars to—

"(A) inform parents about community education employment center operations;

"(B) obtain parent input; and

"(C) disseminate information on how parents can encourage student performance;

"(3) providing the parents of each student with a regular opportunity to meet with counselors, teachers, and the student to discuss student progress, plans, and needs;

"(4) providing a range of roles in which parents may work with students at home or as class assistants or volunteer coordinators;

"(5) establishing an advisory Council of Advisors (hereinafter referred to as the 'Council') consisting of one individual representing each of the following entities:

"(A) the local educational agency;

"(B) the State Council on vocational education; and for the State agency responsible for secondary vocational education;

"(C) the student body;

"(D) the local teacher organization;

"(E) guidance counselors;

"(F) community-based organizations; and

"(G) parents.

"(b) FUNCTIONS OF THE COUNCIL.—(1) Council shall provide recommendations to, and work with, eligible recipients to—

"(A) establish annual community education employment center priorities, programs, and procedures;

"(B) establish student selection criteria to ensure that all students in the school district have an equal opportunity to attend the community education employment center and that participants will be representative of the secondary school population in the school district;

"(C) promulgate a student code of conduct that shall be developed in consultation with the students and teachers;

"(D) assist in the selection of the community education employment center principal, administrators, department chairpersons, and teachers;

"(E) assist in the selection and application of assessment tools for continuous evaluation of student learning progress; and

"(F) make recommendations for the selection of curriculum textbooks, software, and other learning resources and equipment.

"SEC. 367. PROFESSIONAL STAFF.

"(a) IN GENERAL.—Each eligible recipient receiving a grant under this part shall only employ professional staff who demonstrate the highest of academic, teaching, guidance, or administrative standards.

"(b) TEACHERS.—(1) Each eligible recipient receiving a grant under this part shall ensure that community education employment center teachers receive inservice training at least annually in techniques, procedures and policies relevant to the community education employment center.

"(2) Each eligible recipient receiving a grant under this part shall employ a sufficient number of full-time certified or licensed guidance and career counselors to assist, enhance and monitor student progress.

"SEC. 368. ELIGIBILITY AND APPLICATIONS.

"(a) ELIGIBILITY.—An eligible recipient shall be eligible to receive a grant under this part if—

"(1) the eligible recipient is located in or serves one or more local educational agencies that are eligible for assistance under section 1006 of the Elementary and Secondary Education Act of 1965:

"(2) the eligible recipient demonstrates that it will serve a student population which is predominantly educationally and economically disadvantaged.

"SEC. 369. APPLICATION.

"(a) APPLICATION REQUIRED.—Each eligible recipient desiring to participate in the demonstration grant program authorized by this part, shall prepare and submit an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may require.

"(b) CONTENTS OF APPLICATION.—Each application submitted pursuant to subsection (a) shall—

"(1) demonstrate that the area where the center is to be located has a high concentra-

tion of children from low-income families, relative to the county and State as a whole:

"(2) describe the activities and services for which assistance is sought:

"(3) provide assurances that the eligible recipient will comply with the provisions of sections 364, 365, 366, 367, and 368:

"(4) contain assurances that the State and local educational agency will, in any fiscal year, at least supply the same fiscal effort per student with respect to the free provision of public education to community education employment center students as such local educational agency provides for students attending secondary school in such local educational agency;

"(5) utilize funding available from appropriate employment, training, and education programs in the State;

"(6) contain assurances that the community education employment center will coordinate the operations of such center to help meet local economic needs; and

"(7) provide such additional assurances as the Secretary may reasonably require.

"SEC. 370. EVALUATION AND REPORT.

"(a) LOCAL EVALUATION.—Each community education employment center shall submit annually to the Secretary a comprehensive and continuous evaluation of student learning progress, including—

"(1) academic and vocational competencies;

"(2) dropout rates;

"(3) information concerning employment and earnings while the students are attending a community education employment center and upon the graduation of such students from such center;

"(4) information concerning student attendance at postsecondary institutions or student enlistment into military service upon the graduation of such students from the community employment education center; and

"(5) parental, student and community participation in the activities of the community employment education center.

(b) REPORT.—The Secretary shall report to the Congress on the evaluations submitted pursuant to subsection (a) by October 1, 1995.

"SEC. 371. DEFINITIONS.

"As used in this part—

"(1) the term 'eligible recipient' means a secondary school or an area vocational school; and

"(2) the term 'parent' includes a legal guardian or other person standing in loco parentis.

"SEC. 372. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated $16,000,000 for fiscal year 1991 and each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of this part.".

EMERGENCY SUPPLEMENTAL ASSISTANCE FOR PANAMA, NICARAGUA, AND SUB-SAHARAN AFRICA ACT

PELL AMENDMENTS NOS. 1467 and 1468

Mr. PELL proposed two amendments to the bill (S. 2364) to authorize supplemental economic assistance to support democracy in Panama, Nicaragua, and sub-Saharan Africa, and for other purposes, as follows:

AMENDMENT No. 1467

At the end of section 8, add the following new subsection:

"(c) COMPLIANCE WITH THE BUDGET ACT.—New credit authority provided in this section is to be effective only to such extent or in such amounts as is provided in advance in appropriation Acts.".

AMENDMENT No. 1468

Beginning on page 20, with line 20 strike all through the "(2)" on line 3 of page 21.

GRAMM AMENDMENTS NOS. 1469 AND 1470

Mr. PELL (for Mr. GRAMM) proposed two amendments to the bill S. 2364, supra, as follows:

AMENDMENT No. 1469

Section 3 is amended by inserting immediately after subsection (a) the following subsection:

"( ) OBJECTIVES OF ASSISTANCE.—The assistance authorized by this section shall be used to encourage and assist the Government of Nicaragua in taking necessary steps to restructure government policy and administration in order to allow the proper functioning of a market economy and political democracy. Among these steps should be the formulation and execution of sound economic policies and improved public sector management, with special attention to such areas as fiscal policy, the financial sector, budget planning and implementation, privatization of public enterprise, trade policy, and regulatory policy.".

AMENDMENT No. 1470

Section 7(a) is amended by inserting immediately after paragraph (1) the following paragraph:

"( ) OBJECTIVES OF ASSISTANCE.—The assistance authorized by this subsection shall be used to encourage and assist the Government of Namibia in taking necessary steps to restructure government policy and administration in order to allow the proper functioning of a market economy and political democracy. Among these steps should be the formulation and execution of sound economic policies and improved public sector management, with special attention to such areas as fiscal policy, the financial sector, budget planning and implementation, privatization of public enterprise, trade policy, and regulatory policy.".

NOTICES OF HEARINGS

SUBCOMMITTEE ON MINERAL RESOURCES DEVELOPMENT AND PRODUCTION

Mr. BINGAMAN. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Mineral Resources Development and Production Subcommittee of the Committee on Energy and Natural Resouces.

The hearing will take place on Monday, April 19, 1990, at 2 p.m. in room 366 of the Dirksen Senate Office Building in Washington, DC.

The purpose of the hearing is to receive testimony concerning reclamation and bonding practices associated with hard rock mining on Federal and State lands.

Those wishing to submit written statements for the hearing record should deliver them to the Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, room 364, Washington, DC. 20510. For further information, please contact Lisa Vehmas of the subcommittee staff at (202) 224-7555.

SUBCOMMITTEE ON PUBLIC LANDS, NATIONAL PARKS AND FORESTS

Mr. BUMPERS. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources.

The hearing will be held on May 1, 1990, beginning at 2 p.m. The purpose of the hearing is to receive testimony on the following measures currently pending in the subcommittee. The measures are:

S. 1831, to direct the Secretary of Agriculture to convey certain lands to the town of Taos, NM;

S. 2014, to direct the Secretary of Agriculture and the Secretary of the Interior to provide interpretation and visitor education regarding the rich cultural heritage of the Chama River Gateway Region of northern New Mexico;

S. 2143, to establish the Organ Mountains National Conservation Area in the State of New Mexico and for other purposes;

S. 2165, to establish the Glorieta National Battlefield in the State of New Mexico;

S. 2254, to establish the Pecos National Historical Park in the State of New Mexico, and for other purposes;

S. 2420, to establish the Mimbres Cultural National Monument and to establish an archeological protection system for Mimbres sites in the State of New Mexico and for other purposes;

S. 2430, to amend the Zuni-Cibola National Historical Park Establishment Act of 1988 to enlarge the time in which the Secretary of the Interior may accept a leasehold interest for inclusion in the park; and

S. 2432, to provide for payments in lieu of taxes to be made with respect to certain lands co-managed by the Bureau of Land Management and the Secretary of the Army.

The hearing will be held in room SD-366 of the Senate Dirksen Office Building in Washington, DC. Because of the limited time available for the hearing, witnesses may testify by invitation only. However, anyone wishing to submit written testimony to be included in the hearing record is welcome to do so. Those wishing to submit written testimony should send two copies to the Subcommittee on Public Lands, National Parks and Forests, SD-364, Washington, DC 20510.

For further information regarding this hearing, please contact Beth Norcross of the subcommittee staff at (202) 224-7933.

COMMITTEE ON SMALL BUSINESS

Mr. BUMPERS. Mr. President, the Committee on Small Business has scheduled a hearing for Wednesday, April 18, 1990, to receive testimony on the Small Business Administration's Small Business Development Center Program. It is to be held in the committee's hearing room, SR-428A, commencing at 9 a.m. Senator NUNN will serve as acting chairman.

The Small Business Administration's Small Business Development [SBDC] Program provides a diverse array of business counseling, training, and other specialized assistance to many types of small business clients. The SBDC Program is conducted at the State and local level through a national network of centers, which are most commonly operated by college and universities. Currently, the program operates some 56 centers in 49 States, the District of Columbia, Puerto Rico, and the Virgin Islands. In addition, these centers provide services to their clients through over 600 subcenters.

Individual centers receive Federal funding through annual cooperative agreements awarded by the SBA. By statute, an SBDC's Federal funding must be matched by an equal amount of funding from non-Federal sources.

The SBDC Program was started by the SBA in 1977, on a pilot program basis. It was provided statutory authorization through Public Law 96-302, the Small Business Development Center Act of 1980 (15 U.S.C. 648).

Testimony will be requested from representatives of the General Accounting Office [GAO], the Association of Small Business Development Centers, and three participating SBDC's. At my request, the GAO conducted a review of the SBDC Program. On November 22, 1989, GAO submitted its report, "Small Business Development Centers Met Counseling Needs of Most Clients" (GAO/RCED-90-38BR). GAO's witness will present to the committee the findings of this report.

Further information concerning the committee's hearing on the Small Business Development Center Program may be obtained from the committee's procurement policy counsel, William B. Montalto; Bill may be reached at 224-5175.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON EDUCATION, ARTS AND HUMANITIES

Mr. MITCHELL. Mr. president, I ask unanimous consent that the Subcommittee on Education, Arts and Humanities of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Thursday, April 5 at 10 a.m. for a hearing on reauthorization of the National Endowment for the Humanities.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, April 5, at 2 p.m. to hold a hearing on the state of the world's children.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, April 5, 1990, at 2 p.m. to hold a hearing on the nomination of Lawrence M. McKenna, to be U.S. district judge for the Southern District of New York, James F. McClure, Jr., to be U.S. district judge for the Middle District of Pennsylvania, David H. Souter, to be U.S. circuit judge for the first circuit, and Samuel A. Alito, Jr., to be U.S. circuit judge for the third circuit.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Armed Services Committee be authorized to meet in closed session on Thursday, April 5, 1990, at 9 a.m. to discuss and act on the issue of unauthorized appropriations, issues relating to the fiscal year 1990 supplemental, and the military personnel reprogramming request.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC FORCES AND NUCLEAR DETERRENCE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Strategic Forces and Nuclear Deterrence of the Committee on Armed Services be authorized to meet in open session on Thursday, April 5, 1990, at 2 p.m. to receive testimony on chemical deterrent programs in review of S. 2171, the Department of Defense Authorization Act for fiscal year 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, April 5, 1990, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on April 5, 1990, at 10 a.m. to hold a hearing on Pension Benefit Guaranty Corporation insurance of retirement annuities provided by insurance companies.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the full committee of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate 9:30 a.m., April 5, 1990, for a hearing to receive testimony on S. 324, the National Energy Policy Act of 1990, a joint staff amendment in the nature of a substitute; and S. 2191, the Federal Energy Management Amendments of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS, NATIONAL PARKS AND FORESTS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 2 p.m., April 5, 1990, for a hearing to receive testimony on S. 2117 and H.R. 2570, to designate certain lands as wilderness in the State of Arizona.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING AND URBAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Thursday, April 5, 1990, at 10 a.m. to hold hearings on S. 2028, the Fair Trade in Financial Services Act of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, April 5, at 3 p.m. to hold a business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AVIATION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Aviation, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on April 5, 1990, at 2:30 p.m. on the Air-

line Competition Enhancement Act (S. 1741).

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CONSUMERS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Consumers, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on April 5, 1990, at 9:30 a.m. on the effect of product liability law on competitiveness and on insurance (S. 1400).

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Thursday, April 5, at 10:30 a.m., for a markup on: S. 1742, the Federal Information Resources Management Act, and nomination of Richard G. Austin, to be Administrator of General Services Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be allowed to meet during the session of the Senate on Thursday, April 5, 1990, at 8:30 a.m. to hold a hearing business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

RON ROHMER, WELI-AM'S "MORNING MAN"

● Mr. LIEBERMAN. Mr. President, today I rise to recognize the contributions of one of Connecticut's most familiar radio personalities, Ron Rohmer who recently celebrated his 30th anniversary with New Haven radio station WELI-AM. As WELI's "morning man" he has had the professional distinction of waking up Connecticut radio listeners including me with his quick wit, celebrated personality, important information, and good music.

Ron Rohmer immigrated to the United States in the 1950's from Canada. As a native of Winnipeg, Manitoba, Ron developed an early interest and talent in the sport of ice hockey. After playing professional hockey in Detroit and Cleveland, Ron moved to New England and began skating for the New Haven Blades, better know today as the New Haven Nighthawks.

Even after retirement from professional hockey, Ron continued a personal interest in the sport and become the first radio play-by-play announcer for the Nighthawks. He also achieved another first in his 1972 broadcast of the first American Hockey League game against a Soviet team.

It is with great pleasure that I take this moment to honor Ron Rohmer for the significant contributions he has made to Connecticut broadcasting over the past 30 years. It takes incredible determination to host a live radio show every weekday morning beginning before the sun rises. I can only imagine the sacrifices he has had to make to fulfill his responsibilities to our community. Even when it would have been more desirable to roll over, turn off the alarm, and miss his moring show, Ron never disappointed his listeners. Although the broadcast signal of WELI doesn't reach me here in the Nation's Capitol, I'm sure Ron started this day as he has for the past 30 years, with thousands of faithful listeners at WELI.

I congratulate Ron for the success of his show and the continued enjoyment he shares with each and every listener. Mr. President, radio listeners throughout Connecticut have relied on Ron Rohmer to let them ease into the day. His dedication to broadcasting and to his State is a inspiration. May he enjoy many more years of good health and happiness as the on-air morning man for WELI.●

BATES FABRICS AND THE GEORGE WASHINGTON QUILT

● Mr. COHEN. Mr. President, the saying that quality never goes out of style has particular relevance to a fabrics manufacturer in Lewiston, ME. In the time that more faddish products have come and gone, this company has continually produced one of its quality products.

I am referring to Bates Fabrics and its famous George Washington's choice bedspread, a familiar aid to many who weather Maine's frigid winters. This past President's Day, Bates celebrated the 50th year anniversary of this quilt.

Production of the George Washington quilt began less than auspiciously in 1940. It did not catch on with consumers. But following the addition of a double knit fringe and some other minor adjustments, sales took off. In its heyday, 200,000 quilts were purchased each year. Weavers worked 7 days a week making the quilt but could not keep up with demand.

Today Bates may be a victim of its own success. It sells only about 35,000 George Washington's choice quilts a year. The reason, says Fred Lebel, Bates' executive vice president, is that people who bought the quilts years and years ago still have them and don't need to buy new ones.

An article about this 140-year-old company and its famous quilt recently appeared in the Lewiston Sun Journal. I congratulate Bates Fabrics on its tradition of quality and ask that the article be placed in the RECORD.

The article follows:

[From the Lewiston (ME) Sun-Journal, Feb. 22, 1990]

FAMOUS SPREAD HITS 50

(By Martha C. Dumais)

LEWISTON.—They have names like George Washington, Abigail Adams and Queen Elizabeth, but they're not historical figures. They are, instead, bedspreads that have made history for Bates Fabrics.

Tonight, on the birthday of the first U.S. president, Bates, celebrates the 50th anniversary of its "George Washington's Choice" bedspread, the one that "probably made Bates," according to Fred Lebel, the company's executive vice president.

Bates has sold about 5,000,000 of the bedspreads since 1940, Lebel said. The item is available in white and antique white. The king-size version retails for approximately $200, Lebel said, and is available "at better retail stores around the country."

It was designed by George Mills and developed by Bates production men, Level said. "Fixers," now known as loom technicians, took Mills' idea and adapted it to "only 36 looms at first," Lebel said.

Eddie Langlois, one of the original weavers said the first George Washingtons had many problems. When production of the bedspread first started, Lebel said, "It was a dud. It didn't even have a fringe." A doubleknotted fringe was added and other adjustments were made, and "then it took off," Lebel said. The company sold 200,000 George Washingtons a year then, and about 35,000 a year now.

According to Langlois, weavers in the bedspread's heyday worked seven days a week around the clock, and production still couldn't keep up with sales.

"I wish this were the case today," Lebel said. "We've been knocked off by competitors," he said, many of whom copied the George Washington design. "But they could never copy our quality."

His claim was echoed by Don Taylor, plant manager, and Maurice Provencher, weaver room superintendent, who take pride in weave room equipment and products. A modern, 1983-vintage machine is "the cadillac of looms," Provencher said. But the real beauties are the 1940 machines, which today still produce George Washington after George Washington, using miles of 100 percent cotton thread and about 5,000 pattern cards.

In response to the success of the George Washington's Choice, which Taylor referred to as the "Style 2,000," Bates became interested in making the bedspread in king size. Loom manufacturers said a machine that size wasn't feasible, Lebel said. But the Bates employees "didn't accept that. They built the king-size loom."

The old looms that produce the George Washington shine with wood and make loud, clanking, noises as they weave the pattern, including a "pedigree" at one end of each bedspread that tells its size, style, year of production and loom number.

The bedspread comes off the loom "in the gray," or unfinished, and is then washed, fringed, inspected, bundled, packed and shipped, Taylor said.

To celebrate the George Washington, the 140-year-old firm will gather management and veteran employees at the Harvest House in Lisbon this evening. The event will

include a drawing for the George Washington' Choice Sweepstakes. Three bedspread owners will be shosen as winners of cash prizes totaling $10,000.

Whether sweepstakes winners or not, Lebel said, owners of the bedspread are happy with their purchases. One reason sales have declined, he said, is that "people who bought the bedspreads years and years ago still have them" and don't need new ones.●

UNIVERSITY OF WISCONSIN-MADISON NCAA HOCKEY CHAMPIONS

● Mr. KOHL. Mr. President, in Wisconsin, our State's tourism slogan is: "You're among friends." Lately, there's talk of changing that slogan to: "You're among friends and the 1990 NCAA Hockey Champions."

Last Sunday, the hockey team at the University of Wisconsin-Madison glided past Colgate to win the 1990 National Collegiate Athletic Association Hockey Championships. The score was 7 to 3.

I congratulate Coach Jeff Sauer and the entire Badger team on their impressive and well-deserved victory. I am proud of them; the entire State is proud of them, not only for their incredible athletic skills but also for their solid academic achievement.

Hockey is a long and proud tradition in Wisconsin, and this superb team has kept up that tradition in fine form by giving UW its fifth national title. Next year, we're going for No. 6. Go Badgers.●

LUCY POULIN AND HOME

● Mr. COHEN. Mr. President, we all know that the best things in life don't come from money but from the human heart. But few would guess just how much good can be created with a little money and a lot of heart unless they looked at Homemakers Organized for More Employment or HOME in Orland, ME.

HOME was created almost entirely without Federal funds, relying instead on donations, volunteer labor, and a ragpicker's philosophy of recycling discarded items to help the needy.

HOME is a community built and run by people who would usually be considered unemployable. Many are poor, largely untrained, and illiterate. But they have put their energies and determination together to create an extraordinary community.

With the perseverance and determination of its founder, Lucy Poulin, HOME has spread from an old farm bought to serve as a retail outlet for Maine craftsmen to include such services as a 2-year accredited college, four food banks, a free firewood project, four emergency shelters for the homeless and battered women, a day care center, a cobbler's shop, and a flea market selling clothes and shoes, and is currently working on a free medical clinic for the poor. Poulin estimates that over 30,000 low-income people have benefited from HOME's array of services.

I encourage all my colleagues to visit this wonderful triumph of the human heart and ask that an article that appeared in the Boston Globe describing HOME be placed in the RECORD.

The article follows:

IN MAINE, A H.O.M.E. WITH HEART

(By Judith Gaines)

ORLAND, MAINE.—As a driver nears the crest of a hill along Route 1 in Orland, on the tourist trail to booming Bar Harbor, a large board with handcut wooden letters announces the beginning of this story. "This is h.o.m.e.," the sign says.

Then it appears: an odd little village consisting of a few homes, a market stand, learning center, a big crafts store, cobbler's shop, weaving shop, stitchery, leather shop, flea market, woodworking shed, pottery shop, museum, church, woodlot, sawmill, shingles factory, garage and more—simple, rustic structures, all neatly labeled.

The more you know about H.O.M.E.—or Homemakers Organized for More Employment—the more unbelievable it seems:

It's a community built and run by poor, largely untrained and illiterate folks usually assumed to be unemployable, "society's discards" in the words of H.O.M.E.'s founder, Lucy Poulin, 49.

It has been created almost entirely without federal funds, relying instead on donations, volunteer labor and an ingenious "ragpicker's" philosophy: Consider the waste thrown away by the rich and recycle it, piecing together one scrap here, another there, to help the needy.

Many of its programs are highly unconventional. The learning center, for instance, includes an accredited two-year college offering an associate liberal arts degree to students who do not need a high school diploma to apply.

After a well-known management consultant visited H.O.M.E. about 15 years ago, he told community members that, considering their financial and organizational structure, they shouldn't exist and wouldn't last much longer without drastic changes.

But they kept plugging away in the same unconventional spirit, and this year H.O.M.E. is celebrating its 20th anniversary.

Poulin estimates that, to date, more than 30,000 low-income people have been served by H.O.M.E.'s wide array of programs and services.

There never was a plan behind it all, explained this intense and determined woman, sitting in her make-shift office wearing jeans, boots, a flannel shirt and, around her head, her trademark's bandana.

In 1970, Poulin was a Carmelite nun living in a hermitage nearby when a local quilter asked for help. Like many Maine craftspeople working in their homes at that time, the quilter needed a retail outlet.

So Poulin and a group of interested locals arranged to buy an old farm on 23 acres in Orland and began selling crafts there. The project was so successful that they soon outgrew the farmhouse and built a large store.

As the group began working to improve the quality of the crafts, they realized some people couldn't follow patterns because they couldn't read. So they started a school stressing basic adult literacy. And they built craft shops where people could come for more training. Some began living at the site.

As Poulin and others became more involved with the families they helped, they discovered more needs. Gradually H.O.M.E. expanded to include four food banks, a free firewood project, four emergency shelters for the homeless and for battered women and children, a day-care center, a cobblers' shop and a flea market selling clothes and shoes.

H.O.M.E. is located in Hancock County, where the booming tourist business and influx of affluent outsiders means many locals are being squeezed out of the housing market and off their land, Poulin said. So in 1978 she launched a low-cost homebuilding program on land trust property.

As Jack Hovey, 47, president of the Covenant Community Land Trust, explained, under this program, families can use the land and pass it along to their children; but they cannot sell it. They can sell their home, but only for the amount they invested in it.

"About 350 volunteers built my home and many of the other ones," said Hovey, who couldn't read or write when he came to H.O.M.E. 13 years ago. "We didn't think people should make interest off free labor, and we want those houses to stay in the low-income bracket forever."

Currently, the land trust consists of 660 acres with four rehabilitated houses and 13 new homes, including two unusual duplexes for single-parent families, "so they can share the shopping and parenting and such," Poulin said.

To make the idea work, H.O.M.E. begged and borrowed money to buy the land, cut the trees on it, milled them into timbers and shingles, gathered other materials wherever they could find them, and then got volunteers to help with plumbing, wiring and construction.

H.O.M.E.'s school expanded to include a two-year liberal arts college. Its shelters expanded to include an alternative prison program. And now Poulin is busy developing its latest service: a clinic providing free medical care for the poor.

Who's funding the clinic? she was asked.

"No one," she replied, explaining that some clinics have donated old examining tables, and doctors have agreed to volunteer some time, and maybe some hospitals "will clean out part of their basements," giving them old equipment and supplies. "We'll make it work," she said flatly.

Wandering around this unusual village, a visitor soon feels that H.O.M.E. is more than a ragtag collection of jerrybuilt homes and patchwork programs. It's a sales outlet for 350 craftspeople, school for 80 students, college for 12, day-care center for 15 children, outreach center for 300 families. It's literally home to hundreds of poor people, providing permanent housing for about 40 and temporary shelter for 525. And it's a minimum-wage employer for about 60 people whom, Poulin says, "most companies wouldn't hire."

But more than this, as Karen Gilman, 29, a single, unemployed parent living in one of the land trust homes, observed, "It's a bond, an ongoing bond." And as Marion Bridges, 75, a craftswoman suffering debilitating arthritis, commented, it's a community of "decent, caring people."

In interviews last week, many told moving stories about how H.O.M.E. has changed their lives.

"My parents had this habit of giving nicknames. Mine was Stupid." said Theresa Harriman, 41, now working in H.O.M.E.'s stitchery. "Until I went to school, I thought

that was my name because that's what they called me."

"The more I felt inadequate, the farther behind I got until they just passed me over because I was too far behind to catch up," she continued. "And I never opened my mouth, because I was afraid they'd find out I couldn't read or write."

After her husband left her and her mother and sister were killed in a car accident, "I thought I was headed for a nervous breakdown," Harriman said.

Befriended by a crafter at H.O.M.E., Harriman discovered she wasn't dumb, just dyslexic. She joined the literacy program, got her driver's license and learned how to make toys.

"Now I don't like anybody telling me I can't," she said.

Arlene Alden, 54, an epileptic from a family of 23, fell on a red hot stove at age 5, suffering third-degree burns. After that she spent seven years in and out of the hospital, "out of school more than I was in, always sick and upset," she said.

Afraid that people would make fun of her burns and her "spells," she spent her first 50 years unable to read even grocery labels or street signs. To find her way around, she said, she looked for clues. "If I saw a penny with its head up, I'd know that was the right way," she said.

Now she spends part of each workday helping out in the day-care center and the rest "visiting people in all the different places here, tellin' 'em how great they're doin'," she said.

"It feels like a whole new life to me."

As H.O.M.E. begins its 20th year, its financial situation is "desperate," Poulin said, and particularly so because Commercial Union Insurance of Massachusetts just canceled all H.O.M.E.'s insurance.

"But it's been very difficult for 20 years," Poulin said, and she isn't discouraged.

"Something clicks when you create an atmosphere where it's easy for people to do the right thing," she said.●

NATIONAL LABORATORY WEEK

● Mr. ADAMS. Mr. President, I rise today to recognize National Laboratory Week, April 8–14, 1990. Approximately 250,000 certified laboratory personnel in the United States including pathologists, medical technologists, medical laboratory scientists, specialists, technicians, and assistants in clinical laboratory science work in more than 12,000 medical laboratories in the United States. In light of reports citing serious and sometimes tragic problems regarding the accuracy of laboratory test results, it is even more important that we recognize those certified laboratory personnel who perform their jobs accurately and responsibly.

Medical technologists also provide their technical skills in research of new disease entities at universities and research centers such as the National Institutes of Health.

These dedicated health professionals make a substantial contribution to quality health care in this country. I am actively involved in efforts to help certified laboratory technologists produce dependable laboratory test results. The accurate work of these dedicated professionals is essential to the detection, diagnosis, treatment, and prevention of disease.●

RECOGNITION OF A SPEECH MADE BY RONALD LANGSTON FROM DES MOINES, IA

● Mr. GRASSLEY. Mr. President, at this time, I want to bring to the attention of my colleagues a prophetic speech made by Mr. Ronald Langston from Des Moines, IA, 5 years ago today regarding the ultimate reunification of Germany.

Mr. Langston, who currently serves as a national urban fellow, gave this speech to the Third Transatlantic Conference of the Atlantic Alliance which met in West Berlin on April 5, 1985. The topic of his address was "The New Grand Allliance—The Next Generation."

In his address, Mr. Langston boldly sounded a note of optimism regarding Germany's inevitable reunification. Unwilling to accept the status quo, he issued a challenge for action to reunite Germany and called for a free Europe.

Now, as we begin the 1990's, a long-divided Germany leaps toward reunification, and a dominated Eastern Europe moves toward freedom and democracy. We are all watching with exhilaration the series of unfolding events taking place around the world. Upheaval after upheaval has changed the face of rule and dominion. Few of us foresaw just how radically the political landscape of the world could be altered in the space of a few months.

Today, on the fifth anniversary of Ronald Langston's address, I commend him for his wisdom and vision.

Mr. President, I ask that Mr. Langston's speech be printed in the RECORD following my introductory remarks.

The speech follows:

THE NEW GRAND ALLIANCE—THE NEXT GENERATION

(By Ronald Nathaniel Langston)

"The dogmas of the quiet past are inadequate to the stormy present. The occasion is piled high with difficulty, and we must rise with the occasion. As our case is new so we must think anew. We must disenthrall ourselves."—Abraham Lincoln.

Forty years ago the Allied Big Three: Great Britain, The United States and the Soviet Union met at Yalta to settle the fate of post World War II Europe. In the balance lay the division of Europe into Eastern and Western spheres of power and the partitioning of Germany.

I can think of no other city than Berlin which represents the legacy of Yalta and the reality of the present state of East-West relations in the context of this Third Trans-Atlantic Conference.

The city of Berlin represents what is still terribly marred about the past history of our respective nations, . . . but it also symbolizes hope and optimism that the present peace and co-existence among the allies and the Soviet Union will someday lead to freedom through self-determination and unity for all of Europe.

The purpose of my remarks today is not to present a dissertation on the status of the Atlantic Alliance, but rather to reaffirm a commitment that the unity of the free world and all those who seek freedom through self-determination is still the goal of yet another generation of young Americans.

Furthermore, it is important for the Soviet Union (in particular) to realize that the next generation of young Americans will not view the Yalta Agreement as giving an absolute free-simple conveyance (i.e. a lifetime right of ownership) of Eastern Europe to the Soviet Union or her heirs.

The West and especially the new emerging leadership must commit itself to the development of a new unified Europe. They must disenthrall themselves from the dogmas of the past, learn from the present and confront the future anew with wisdom as well as optimism.

However, before we can forget the past, we must understand what happened. . . Why . . . and be cognizant that the past affects the future. The new emerging leadership in the West must learn Soviet history, for therein lies the key to predicting her behavior more so than her actions.

Imagine yourself as the Caspar Weinberger of the Soviet Union at the end of World War II. Your commander in chief is greatly concerned about the historic vulnerability of the Soviet border. You are asked to devise a strategy to protect the national interest and sovereign integrity of the Motherland. What would your response be? I suggest it would be the following:

Eliminate the historic "German Invasion route" through Poland, Estonia, Lativa and Lithuania by annexing those countries and bringing them under the direct control of the Soviet Union.

Prevent German allies such as Rumania and Bulgaria from threatening the security of Russia in the future.

Occupy and control the countries bordering the Soviet Union such as Czechoslovakia, Hungary and Finland.

Control access to Yugoslovia and Albania.

Pressure Austria, Greece and Finland to become neutral thereby curtailing occupation expenses but maintaining the threat of possible occupation; and

Internally disrupt Germany and divide it into small states.

A student of European history, particularly Russian history, will quickly recognize the above-stated goals as the traditional Czarist Vision of Russia prior to the turn of the century. It is no coincidence that Post World War II Europe, particularly after Yalta, matches the Czarists vision almost identically.

Here is the heart of the Soviet motive in Europe. It is an historic concern for defense against invasion which precedes World War I or II . . . with particular precaution against its perceived natural predator Germany.

Having examined and analyzed Soviet history, we must now observe the new leader in Moscow in order to determine his posture in the East-West dialgoue. He is younger, more vigorous, allegedly "Westernized" and I suspect more committed to the national survival and economic prosperity of Mother Russia than his predecessors. I make this claim based upon my belief that the issue of economic competition with the West, namely the United States, has become an economic liability potentially as destructive as the perceived military threat from the West.

Specifically, Eastern Europe is now looking for a better quality of life . . . and frankly the West offers a great deal in the way of goods and services through economic trade. Former President Nixon in his book *Real Peace*, states this point most eloquently;

"Our strategy for peaceful competition affects all of our global relationships. We must unify the economic power of the industrial democracies so that we can gain political concessions from the Eastern block in exchange for our economic cooperation, * * *

"Our most difficult problem in this competition is finding a way to go over, under and around the Iron Curtain to carry it on in Eastern Europe and the Soviet Union itself * * *

"We must not treat the countries of Eastern Europe as if they were part of a monolithic Soviet block * * *

"Increased trade and contacts can advance peaceful change within the Soviet bloc."

Understanding the awesome responsibility and burden of the new leadership in the Kremlin to promote domestic economic prosperity in the Eastern block and within Russia will greatly assist the next generation of leaders from the West in planning a strategy to compete peacefully but successfully with the Soviets. What we must *not* do is give simple slogans or hollywood characterizations to a clearly defined and carefully planned history of Soviet national interests and future ambitions.

Specifically, there are those in the government and in the private sector, who do not analyze or characterize the relationship between the West and the Soviet Union as a space odyssey featuring Darth Vader, Luke Skywalker and "The Force".

The evil Empire of which Mr. Reagan speaks is not per se evil as much as it is paranoid of conquest and skeptical of foreign intrustion, however friendly or benign. Based on several centuries of Russian history it should be of no surprise to anyone, least of all the West, why the Soviet Union is determined to maintain its influence over Eastern Europe and in particular the partition of Germany.

The Soviet Union *may* alter its present posture in Europe if, and only if, the above stated historic national concerns for defense and territorial expansionism have unequivocally become moot issues. There are many who believe that the Soviet Union will never change, will never relinquish control of Eastern Europe, and that the suggestion that the Soviet Union will have a change of heart or conscience regarding Germany, in particular, is ludicrous.

To this view the cold war warrior has many friends and frankly it is a perspective which has great reality and merit. Nevertheless, if we are to remain optimistic about the future and vigilant in our fight for freedom we cannot subscribe to the dogmas of the past.

As we look toward the future it is important that the next generation of Western leaders take note and observe carefully the present world leadership and the political dynamics of East-West confrontation. This is especially true of President Reagan and Premier Gorbachev.

If all goes according to plan, President Reagan and Premier Gorbachev will meet to discuss East-West relations. Presently the Americans and the Soviet Union are meeting in Geneva over Strategic Defense Systems and nuclear arms control. There is no question that the occasion is piled high with difficulty, and we must rise to the occasion. There is, I believe, reason to hope. However, there must be something for which to hope.

The President of the United States in his upcoming visit to Bonn, West Germany has an excellent opportunity to interject the questions of a free Europe through self-determination into the present dialogue of East-West relations and the arms race. The President can no longer speak with eloquence and grace about freedom for those behind an Iron Curtain and yet fail to bring their plight to the conference table with the Soviets.

If the Soviets truly seek legitimacy and respectability in the International arena among Western nations, it should yield to new discussions on the question of a reunited Europe and within that context a reunited Germany. I believe that through improved relations between East and West there can be a new traditional balance of power in Europe where peace, freedom and unity can flourish once again.

The next emerging generation of leadership from the West will have to face these issues if they are to remain the defenders of freedom.

For the new emerging young leadership of the West, particularly in America, "the dogmas of the quiet past are inadequate to the stormy present." The present requires us to confront the status quo in Europe especially the partitioning of Germany. It further calls upon us to listen to the voices of change, and to extend the policy of Ostpolitik to a broader policy of "Deutschlandpolitik". In a recent article for *Foreign Affairs*, Winter, 1984–85, Walter Leider Kiep, former member of the Presidium of the Christian Democratic Union and former member of the West German Bundestag makes the following note:

"Deutschlandpolitik is a reflection of changing West German attitudes. The quest for new ideas and opportunities for personal identification is leading Germans back to their own history and into public discussion of 'national awareness,' 'homeland', 'fatherland' and 'nation'."

Herr Kiep further adds that "the fact there is currently no recognizable political opportunity to restore German unity peacefuly and in freedom, must not keep us from seeing that this might well be feasible some day, and, indeed that a change in the curent state of affairs is a historical necessity".

The time has come for the issue of a free united Europe, which includes Eastern European bloc countries, be made part of the East-West dialogue for peace. It is no longer acceptable dogma on the part of the Soviet Union in an age of inter-continental weapons and mass conventional forces to claim national defense and protectionism from the West as a basis for control of Eastern bloc nations.

The Soviet Union, if it has faith in its system, should support a democratic process of self-determination for all of Europe. The issue of German unification should be the decision of the two Germanys, not the Soviet Union or the United States.

THE AMERICAN COMMITMENT

Nearly 25 years ago a youthful American President proclaimed "That a torch has been passed to a new generation of Americans born in this century, tempered by war, disciplined by a hard and bitter peace, proud of our ancient heritage . . . and unwilling to witness or permit the slow undoing of those human rights to which we are committed today and around the world."

This new emerging generation of which I speak are the children and grandchildren of those who fought to rid the world of Nazi tyranny and who today in their latter years still represent the beacon of light and best hope for freedom in the world. Their heirs, now adults, represent a "gigantic bulge of 56 million people from age 25–39 years old." According to Business Week of July 2, 1984. "There are now 55% more Americans aged 25–39 than 40–51." Furthermore, they represent 14.2% of the total U.S. population, 34.7% of the total U.S. labor force, and in the area of education they represent 13.9% of the general population.

To those in Europe and within the Eastern bloc, who believe that America's Baby Boomers, Yuppies and disenchanted youth are more concerned about obtaining material and financial wealth than the problems of the world. I suggest they look again.

In America there has always been a strong moral and social conscience to do what is right and to meet the challenges of change. This is most evident in the recent multi-million dollar success of the U.S.A. Africa recording of "We are the World". The words to that song represent the continued belief in the American Mission and the American dream of freedom, the pursuit of life, liberty and equality.

This new emerging generation in John Kennedy's words from "Strategy for Peace," "does not have to find new purposes. The American purposes are still wholly relevant. What this generation must do is to face its problems at home and abroad."

If there are any doubts among my colleagues from France, Great Britain or the Federal Republic of Germany as to the commitment of this emerging young America, fear not, " 'we will accept the risks and burdens to work for freedom . . . We will defend freedom.' "

"Peace in our time" must not be an empty promise . . . meaningless words on paper or the disdained symbolic security of an Iron Curtain. It must be a poignant reality measured in mutual appreciation and respect for the territorial integrity of sovereign nations' right to self-determination.

I can fully appreciate the sense of frustration and uncertainty resulting from American policy in Europe. The questions regarding the American Strategic Defense Initiatives and the role such initiative will play in determining a new European policy are critical elements to an already complicated scenario. However, do not confuse the rhetoric with the commitment. They are often not mutually inclusive. The commitment will endure as long as the beliefs upon which the commitment were founded remain a part of the United States Constitution, moral will, and the American sense of justice and equality.

Here in America you will find a young (Baby) Boomer generation who will conclude that our case is new, so we must think anew. They will not be the captives of the past dogmas nor the victims of fear and prejudice which marked the year immediately after World War II. I predict that this new emerging generation from America and the West will be practical in the application of justice, calm in their pursuit for equality and unafraid to see the world as it is and meet the challenges of change.

The issue is whether the Soviets will join in establishing a new Grand Alliance with the "Next Generation" of the West, or will the Soviets remain true to the dogmas of the past. The next generation of American

youth I predict shall disenthrall themselves from that past.

Ten years from today will be the 50th Anniversary of the Yalta Conference. It should be our pledge that by then the question of a divided Europe should be resolved. Equally important the question of a partitioned Germany should also be resolved effective the year 2000. "Deutschland 2000" should be based on the proposition that we should not enter the next century with a divided Germany or a divided Europe.

A new Grand Alliance and the emerging next generations can forge a new peace in which all of Europe can be free.

John R. Deane from his book "Strange Alliance," noted that "The Soviets and Americans collaborated to bring an end to tyranny and war in Europe. I ask that we collaborate once again and bring an end to division and fear in Europe".●

AN INVESTMENT PAYS OFF

● Mr. SIMON. Mr. President, on March 24, 1990, I had the pleasure of attending the address of Poland's Prime Minister Tadeusz Mazowiecki to the Polish-American community of Chicago. His speech, which I commend to my colleagues, justly praises the good work of Ed Moskal and the Polish American Congress in all their endeavors to help the people of Poland. I join with him in commending the consistently good work of the Polish American Congress, an organization with whom I have had the pleasure of working before, during and after drafting my legislation last year to assist the new Poland.

I first met Tadeusz Mazowiecki last August just days after he was sworn in as Poland's first non-Communist Prime Minister, and we have communicated several times since then. I have been impressed with his performance and his leadership. His visit to the United States was exciting and inspiring, and I think it's fair to say that the United States-Polish official relationship is becoming as warm as the people-to-people relations, which have always been warm.

Mr. President, I ask that Prime Minister Mazowiecki's address be printed in the RECORD in full.

The address follows:

ADDRESS OF POLISH PRIME MINISTER TADEUSZ MAZOWIECKI

Honored Governor, Honored Senator, Mr. President of the Polish American Congress, Ladies and Gentlemen—Dear Fellow Poles: I have come to Chicago, the capital of Polonia on the invitation of the Polish American Congress and through the personal efforts of President Edward J. Moskal. I am happy to be in this wonderful city which is the most populous center of the Polish diaspora, a city which has in the past and still continues to accept new visitors from Poland; a city which has become for these newcomers their second homeland.

I have come here with a special enthusiasm, because our journey here represents a return visit to the Polish American Congress, whose delegation was the first to travel to Poland after the establishment of our new government. Indeed, it was the Polish American Congress which provided the impetus for Polish organizations in the USSR, in France, and in the German Democratic Republic to begin to reestablish contacts with our land.

I would like to thank all of the Polish people as well as Americans of Polish descent and friends of our country for their long-term activism on behalf of Poland.

I sincerely thank you for your many charitable acts dating back to the 1940's and continuing to the present. Thank you for your support of Polish schools, of Polish publishers and publications, of Polish organizations, institutes and radio and television programs which serve to support our Polish heritage and your bonds with the land of your forebears.

I would now like to direct special words of gratitude to the leadership of the Polish American Congress for its efforts on behalf of and in defense of matters which are especially important to Poland. While never compromising your loyalty to America you have worked in the Polish national interests. The rebuilding of democracy in Poland is likewise due—to no small degree—to the achievements and efforts of the emigration.

I extend special thanks to you for your defense of our position on the issue of the inviolability of the Western border of Poland, and for your recent actions in the matter of the need for Polish participation at the conference over the reunification of Germany.

Poland owes a lot to its emigration, and we can hope to begin to pay off this debt by changing our politics in a fundamental way—under the watchful eye of all the Polish communities throughout the world.

Our doors are open to all generations of Polish Americans. We are presently tearing down all the barriers which had been constructed in the post-War period. Newly enacted laws and regulations involving the issuance of passports and the parameters of citizenship will make it possible for all generations to have a more productive climate in which to nurture their bonds with the Polish nation.

A new organization has been formed in Poland called the United Association of Poles and its chief goal is the full cooperation with all segments of the Polish communities throughout the world. We hope to work together with Polish parishes, with Polish American schools of language and culture and with other institutions throughout the emigration which wish to uphold the development of Polish culture.

We are also hopeful that through an understanding with the Free World Polonia Coordinating Council we can help structure a new organizational presence which will be fully adjusted to the new role of World Polonia. The democratic transformations which Poland has undergone have led to an increasingly more vibrant voice from the Polish sectors in the Soviet Union—the neglected and forgotten Polonia.

We hope to create in Poland conditions which are conducive for the investment of Polish American capital. Poland can be a good place for your investments. There are today many Polonian firms developing many phases of the Polish economy. Specifically, the development of agro-consumer, tourist and ecological initiatives eagerly await foreign investors.

Our politics toward Polonia rest on the proposition that Poland is the common home of the whole nation and people and so also of its people who live beyond her borders. Our political, domestic and economic reforms aim to lay the full groundwork for democracy. In the not-too-distance future, autonomous elections will be conducted in Poland and the schedule for fully free parliamentary elections will be accelerated. This future Parliament, with its adoption of a new Constitution for the nation will mold the Polish nation for the future.

We all hope that—perhaps as soon as the 200th anniversary of the May 3 Polish Constitution—a gathering of the Free World Polonia can be held in a fully democratic Polish republic.

Dear Compatriots!

Your assistance to the land of your forebears is a most valuable investment in the development of democracy and of the economy in Poland. Without the integration of our mutual efforts and without the united efforts of the entire Polish American community here in the United States it would indeed be difficult to achieve such lofty goals.

I encourage the creation of a powerful Polish lobby. Many initiatives in this realm are already being accomplished by the Polish American Congress. The Polish American community controls an enormous intellectual, organizational as well as economic potential. The release of our energies in these arenas can create a truly potent lobby, a lobby able to effectively influence American political and economic thought.

It is important also to take advantage of the great potential which is to be found in the Polish emigrants of the recent past. I realize that experiences and viewpoints may differ, but we must remember that you have common roots and a mutual goal.

Become powerful! I wish this with all my heart and with a deep conviction that this is possible. We do, after all, need each other. Poland needs a strong and organized Polonia and Polonia needs a strong and sovereign Poland. We have then—common needs, common aspirations and common goals.

I trust that—together—we will achieve success.●

CORRECTION OF RECORD ON FOREIGN LOBBYING REGISTRATION

● Mr. HEINZ. Mr. President, on Tuesday, March 17 I testified before the Foreign Relations Committee on my bill, S. 176, which would amend the Foreign Agents Registration Act to improve and broaden disclosure of foreign lobbying activities.

As part of my testimony, I submitted a list of U.S. parties representing Japanese clients for which they had apparently not registered under FARA. Subsequently, I discovered that list contained some inaccuracies, and I want to set the record straight by making a corrected list available. The committee's hearing record will also be corrected.

In correcting the list, the following U.S. parties have been deleted entirely from it: Heron, Burchette, Ruchert & Rothwell; Mudge, Rose, Guthrie, Alexander & Ferdon; Paul, Hastings, Janofsky & Walker; TKC International; Richard A. Frank; Milbank, Tweed, Hadley & McCloy; Robinson, Lake, Lerer & Montgomery; Civic Service, Inc.; and Sedam & Shearer. In addition, one or more Japanese firms were

removed from the listings of Tanaka, Ritger, & Middleton; Donald G. Lerch & Co., Inc.; Saunders & Co.; and Marks, Murase & White; and the body of my testimony has been corrected to make clear that Mudge, Rose does not represent the Japan Iron and Steel Exporters Association.

In printing this list, Mr. President, I want to repeat what I told the committee: appearance on it does not necessarily indicate a violation of FARA. In the most likely circumstance, the U.S. party simply has not engaged in any disclosable activities on behalf of that client. At the same time the length of the list points up the vagueness and uncertainty associated with the act and serves as additional evidence of the need to amend it.

Mr. President, I ask that the corrected version of my testimony and the two attachments be printed at this point in the RECORD.

The material follows:

STATEMENT BY SENATOR JOHN HEINZ

Mr. Chairman, thank you for the opportunity to testify on behalf of my bill, S. 176, which would amend the Foreign Agents Registration Act. This bill would increase disclosure of foreign lobbying and propaganda activity and would improve our ability to achieve that objective through better enforcement. In my testimony I want to provide some background on the Act, the reasons for this bill, and the changes it would make in current law.

As you know, the Foreign Agents Registration Act was originally enacted in 1938 to counteract the efforts of Hitler's Nazi propaganda agents by making public who was working for the Nazis and how much financial support they were receiving. The Act was not intended to suppress their freedom of speech or any other rights. It was intended as an information gathering and public disclosure device.

Fifty years later we live in a much different world. Nazi propaganda is no longer the threat it once was. Our main threats are economic rather than military, which has led to growing concern about the role foreign companies play in American political and economic life. Our open market and open investment policy, as well as our continuing trade deficit over $100 billion, have produced a giant increase in the foreign stake in our economy in the form of sales and profits dependent on imports into the U.S. and in the form of inward investment. The trade policy actions our government takes are of critical importance to foreign interests, and they maintain an active presence here to monitor and influence those actions.

Much foreign activity in this country is at worst benign and at best constructive. Some efforts, while arguably legal, do not necessarily lead to consequences that are in our interest.

One anecdote told by James Fallows in his article in Atlantic suggests the worst of this:

"The student was an American fluent in Japanese. He had spent the previous three years working at a Japanese-owned electronics plant in Japan. While he was there, the U.S. government accused the plant of dumping its chips, at prices below those permitted under the U.S. anti-dumping law. At that point the company hired two Americans who had just resigned from the Commerce Department. Weeks earlier they had helped draft the anti-dumping agreements that the company was now accused of violating.

"'I never felt so humiliated in all my life,' the student told my friend. 'These guys came in and showed the company how to conceal all the damaging information. They knew exactly how to do it, because they knew where the U.S. inspectors would look. I saw the United States get bamboozled by a Japanese company that was willing to pay a lot of money'—and by Americans willing to do the bamboozling."

That incident, of course, can be addressed by revolving door legislation, but it does make the point that what the federal government does has a big impact on foreign companies, and they are often happy to pay large sums of money precisely to avoid the consequences of our actions.

A noteworthy example relevant to this bill; indeed, one which aroused my interest in this subject, is Toshiba Corporation's effort to avoid sanctions in the wake of Toshiba Machine's sale to the Soviet Union of precision milling equipment used for the production of submarine propellers. This sale has had a serious adverse impact on the balance of naval power. Not only do the Soviets have the largest submarine force in the world, their ships will now become significantly quieter, and thus more difficult to detect. Estimates of the cost to the United States to compensate for the effects of this sale range from $8 billion to over $100 billion.

While the amount Toshiba spent on representation did not approach those sums, it was still substantial. For example, from 1987 through 1989, the law firm of Mudge, Rose, Guthrie, Alexander and Ferdon reported receiving nearly $11 million from Toshiba to act on its behalf, and they are just one of at least three law firms hired by Toshiba during 1987 for help on this issue.

What further clouds the issue is the fact that only the Toshiba Corporation itself is represented in these numbers. When Senator Garn and I initially proposed sanctions, it is fair to say we did not fully appreciate the diversity and complexity of Toshiba's corporate organization. The company possesses a vast number of holdings around the world, including over 600 subsidiaries and affiliates, a number of which also lobbied on behalf of their parent's interests. One subsidiary, Tokyo Electric Company, paid the Washington law firm of Kelley, Drye, and Warren over $213,000 from 1987 to 1989 to lobby on the Toshiba matter.

Kelley, Drye, and Warren was required to file because Tokyo Electric is clearly a foreign entity, although its subsidiary relationship to Toshiba is less well known to the American public, and it would not be immediately obvious that its efforts were on behalf of the same cause.

We have no idea how many other Toshiba subsidiaries have been actively lobbying for their parent's interest. Toshiba branches or subsidiaries located within the United States are not generally required to file under FARA. Thus we see only the tip of what may be a very large iceberg. One indication of the size of that iceberg is my calculation that from 1987 to 1989 the total spent by all registered agents for Japanese entities was over $120 million. Perhaps more significant is the fact that the reported amount has increased in each of those years—from $36 million in 1987 to $43 million in 1989. Also attached to my testimony is an illustrative list of registered agents for Japanese entities.

Another recent example is that of efforts made on behalf of a number of Brazilian and Japanese companies regarding the President's Steel VRA Program. The law firm of Wilkie, Farr, and Gallagher represents the Japan Iron and Steel Exporters Association, Japan Galvanized Iron Sheet Exporters Association, and Japan Wire Products Exporters Association as well as two major Brazilian steel companies. From 1987 to 1989, the firm reported receipts from these clients of more than $900,000, and it is not the only firm representing these clients. There are four additional parties working for the Japan Iron and Steel Exporters Association. Mudge, Rose also earned more than $275,000 working for the Korean Iron and Steel Association.

I am also submitting a list of American firms which have been identified as representing Japanese companies but which have not so filed under FARA. In doing so, let me say this list is compiled on the basis of best information available and should not be considered authoritative, particularly since client relationships change frequently. In addition, since registration is not presently required for most subsidiaries or for clients where the agent did not engage in any reportable activity, appearance on this list does not indicate any violation of FARA has occurred. It does suggest, however, how much we do not know about foreign lobbying activity in Washington and how big that iceberg might actually be.

Correcting this deficiency in filing is the cornerstone of my bill. Right now the Justice Department determines foreign control through an ad hoc approach that focuses on whether the U.S. subsidiary has an actual operational presence here or is just a "shell." That approach results in the conclusion that many U.S. companies are not foreign entities even if they are owned and controlled by a foreign party.

I want to broaden that approach through use of a "control" test. Entities that are more than 50% foreign owned are presumed under foreign control, and their agents would have to register. Between 20% and 50% foreign ownership would also be considered foreign "control", subject to presentation of rebuttal evidence. Foreign ownership of less than 20% would be presumptively not controlling. The effect of these provisions would be to require the disclosure of activities on behalf of many more U.S. subsidiaries of foreign entities.

The second proposal in the bill repeals the lawyers' exemption. Currently lawyers are exempt from registration and disclosure for activities they undertake in the context of administrative or judicial proceedings. While that may have made sense 50 years ago, these days practically all trade policy decisions take place in the context of administrative proceedings like antidumping or countervailing duty cases, or section 301 or section 201 petitions. Exempting otherwise disclosable activities on behalf of clients in these situations opens up an enormous loophole.

The bill's third proposal modifies the reporting time frame. Currently, agents register initially with the Justice Department containing the provisions of their contract when they begin their representation and then file updates every six months thereafter. Unfortunately, the inconsistent reporting dates lead to confusion. Justice is unable to effectively monitor incoming reports, or the lack thereof, nor can anyone conduct effective research. No matter when one reviews the files, there are always reports due

in the next few weeks. Unless the information desired is at least eight months old, it is difficult to track. As a result, S. 176 proposes maintaining the initial registration requirement as is, but modifies the procedure so that subsequent filings would be made on January 30 and June 30 of each year. This will insure greater uniformity of data, will help us track real trends, and will also help Justice to identify missing filings.

The last proposal concerns penalties and enforcement. While the Act contains criminal penalties for willful violations, they are rarely imposed because of the difficulty in proving intent and because of their severity. Adding a schedule of civil fines provides a more reasonable option that should encourage compliance. It would also help compliance to give the Justice Department authority to summon individuals to appear, testify, or produce records, common authority for agencies enforcing laws that have a public disclosure component. Both these changes were proposed in a 1980 GAO report, but no action was taken at that time.

I also want to mention some issues that are not addressed in S. 176. The first of these is what activities need to be reported. Generally speaking, an agent only reports contacts which attempt to influence opinions. This means that lobbyists who come to my office to speak with me or my staff to gather intelligence do not have to report either such activities or the considerable amount of money they receive to make such visits. This information, while not directly aimed at influencing lawmaker's views, is sent to an agent's clients, which in turn influences its actions and political stance. One recent case illustrates both this problem and the next one I want to mention.

NovAtel, a Canadian firm interested in selling cellular telephones in this country, hired the law firm of Heron, Burchette, Ruckert and Rothwell and over the course of 1988 paid them over $1.3 million to advise it on American rules, regulations, and legislation concerning cellular telephones.

In its two filings for 1988 Heron, Burchette did not report any activities aimed at influencing the government and subsequently decided to stop filing on the grounds that it was not taking any overt actions on NovAtel's behalf. In reading this, my first instinct was to question what the firm did for its $1.3 million. If it simply sent copies of rules and proposed legislation, I know people who will do it for half the price, or even a quarter. NovAtel has not ceased its relationship with Heron, Burchette; yet now its activities will not be reported.

This example also illustrates the wide disparity in reporting under current law. Some firms report activities in intricate detail, but in this case nothing was reported beyond receipt of funds. I suppose we should commend Heron, Burchette for even filing at all, because there is no one over at the Justice Department with the time or resources to track down every company that fails to file. And clearly, the firms rationale for not reporting is acceptable under current practice.

Mr. Chairman, the Foreign Agents Registration Act is a useful public policy tool. I believe it is in the national interest to maintain a public record of foreign efforts to influence government policy. We cannot simply assume that because a foreign company has a domestic presence it is automatically pursuing objectives consistent with national policy and national security. S. 176 is a useful tool for making the Act more effective. Both it and the original Act were not designed to punish individuals for their beliefs or representations. They are designed to keep lobbying activities in the proper perspective. Needless to say, I will be happy to work with the Committee to address any concerns you might have.

BUSINESS OPPORTUNITIES IN EASTERN EUROPE

● Mr. LIEBERMAN. Mr. President, on March 23, the Small Business Committee held a hearing on business opportunities for American firms in Eastern Europe. At the hearing, we heard testimony from representatives of the public and private sectors. All agreed that there are good opportunities for American firms in Eastern Europe, but that those opportunities cannot be fully realized unless business and government work together to develop them.

All of the testimony that we received was uniformly excellent. I am, however, taking the opportunity of inserting in the RECORD today the testimony of one particular witness, Frank Doyle, a senior vice president at General Electric.

I think that Frank made some important points that touch on not only our ability to do business in Eastern Europe but throughout the world. He emphasized the need for us to increase funding for the Export-Import Bank of the United States. American exporters are dependent on the Bank's support to get involved in Eastern Europe and in the Third World. The Bank's direct loan program for this past fiscal year was a little more than 10 percent of what it was a decade ago, yet our trade deficit remains out of control.

I ask my colleagues to take a moment and read Frank Doyle's testimony. His ideas are certainly worth considering.

The testimony follows:

TESTIMONY OF FRANK P. DOYLE, SENIOR VICE PRESIDENT, GENERAL ELECTRIC

Thank you for inviting me to testify this morning. It is not often that a GE executive is invited to testify before the Small Business Committee. So this is a novel experience for which I am grateful.

But there is an important connection between a large American company like GE and export opportunities for small businesses: GE is an export channel for hundreds of small companies who are subcontractors on major capital goods such as turbines and aircraft engines. This relationship is one to which I will return in a few minutes.

But first let me establish why GE has an interest in the newly liberalizing nations of Central and Eastern Europe. Our interest is two-fold, as an investor in—and as an exporter to—these economies.

Our investment in Tungsram of Hungary, announced the week after the Berlin Wall fell last November, is especially exciting for GE. We bought a 51% majority controlling interest in that long-established and highly-regarded lighting company. Through the management expertise we bring and the investments we plan to make in Tungsram's process and product technology, we expect to contribute significantly both to Hungary's economic development and to GE's overall competitive position in the global lighting market. To run the business, we appointed an American named George Varga. Varga is not only a seasoned GE executive, but a native Hungarian who escaped in 1956 while a high school student in Budapest.

In late January we also announced an agreement with a Czech aircraft engine firm (LET) to jointly produce up to $300M of turboprop engines for a Czech commuter aircraft being developed for world markets. We are continuing to assess going concerns in the region for similar investments or joint ventures in other product markets we serve.

We also hope to expand exports to Central and Eastern European nations. Our greatest success in the region to date has been with our Aircraft Engines business, which has already won orders with the national carriers of East Germany, Poland and Czechoslovakia and has others pending. Expected demand for infrastructure modernization also may provide export opportunities for other GE businesses, especially our Industrial and Power Systems group.

It is this second arena—the export opportunity arena both for large and smaller U.S. companies—that I want to make the focus of my testimony this morning. I am also submitting for the record a longer paper that addresses the export finance issue, along with proposals to encourage and ease U.S. direct investment in the region.

Of particular interest to small business, our paper recommends simplifying the OPIC insurance application process for smaller U.S. firms. Attaining OPIC insurance was essential to the GE/Tungsram deal. The further expansion of OPIC involvement in Eastern Europe—especially to the extent that it is made more accessible to smaller firms—will provide indispensable confidence for prospective U.S. investors.

The legislation just introduced by Senator Lieberman also contains several very constructive proposals for assisting U.S. small business in Central and Eastern Europe. The proposal to increase the number of commercial and economic officers in the region could help provide greater access for smaller companies. The Foundation envisioned in the bill could become a vital tool for small and mid-sized businesses and entrepreneurs as opportunities expand in these emerging markets.

The rebuilding of the economies of Central and Eastern Europe will be one of the great economic dramas of the late twentieth and early twenty-first centuries. Infrastructure is hardly the stuff of poetry, but the building of power plants and highways east of the Elbe in the Nineties may become the stuff of epic. More than orders and profits will be up for grabs; also at stake will be jobs, trade patterns and living standards, East and West.

These opportunities for American companies are potentially enormous, extending from the simplest consumer to the most complex capital goods. Economic liberalization was mostly responsible for the 13 percent increase in the East Bloc's import volume last year, almost entirely run up before the democratic upheavals of November and December. Although economists argue over how much and how quickly trade will expand this year and next, it seems certain that the process will continue to accelerate.

These liberalizing nations have a dire need, but also a tough problem: no hard currency. Without hard currency, they are dependent on credit. Until currency convertibility is achieved, financing packages for big ticket capital goods may prove unfortunately decisive in winning major orders.

These simple linkages are obvious to our competitors and their governments. That's why much of the new Japanese and Western European aid to Eastern Europe just announced over the past several months is in concessionary trade financing. Virtually all of Japan's half-billion commitment to Hungary will come in the form of guarantees and credits that could be tied to purchases from Japanese suppliers. More than two-thirds of the $1B European Investment Bank commitment to Poland and Hungary over the next three years will take a similar form.

Although Japanese trade with Eastern Europe has been relatively small to date, the new interest on the part of Japanese companies is being reinforced by pledges of substantial government assistance. Prime Minister Kaifu announced on his recent trip to Eastern Europe a combined credit and aid

package that includes: $500M of Export-Import Bank credits each for Poland and Hungary; $350M in trade insurance to cover Polish imports from Japan; $200M in new trade insurance for exports to Hungary; and $25M for technical cooperation with Poland and Hungary.

In the short term, this likely imbalance in trade finance assistance could mean fewer American export orders and greater initial Western European and Japanese penetration of developing Eastern European markets. In the long term, it may mean the setting of patterns of trade and investment for the next decade, perhaps even for the next half century.

I have no illusion that we won't win many orders without the best products at the best quality and the best price. But I also have no illusion that without competitive financing, we won't win any orders at all.

Now the Administration is proposing to cut Ex-Im FY'91 direct lending authority to $500M exactly at a time when U.S. export opportunities are increasing not only in Central and Eastern Europe, but in the Asian countries where Japanese competition is severe and in Latin America where economies are beginning to recover.

Ex-Im's direct lending authority of $612M last year pales into virtual unilateral disarmament when compared not only to these growing export opportunities, but to the aggressive concessionary trade finance war chests maintained by Japan and several of the European nations.

A substantial boost right now in Ex-Im funding amounts to a long term investment that the U.S. may not get another chance to make. A serious effort to match the challenge would require doubling the Administration's FY'91 Ex-Im direct loan proposal of $500M to $1B.

Such additional funding (above the Administration's request) should be authorized in a manner that Ex-Im would be strongly encouraged to expand lending programs for the Eastern European nations. Legislative language—along the lines of Senator Lieberman's bill—could make clear "the Sense of the Congress" that greater support should be dedicated to Eastern Europe. This approach has the advantage of allowing the Bank to meet increased demand on its direct loan program while retaining the flexibility that might be lost through specific earmarking.

On top of this additional direct loan authority for Ex-Im, a stand-by credit facility should be established to meet foreign mixed credit or tied aid offerings. At present such a war chest—funded at $300M—is in place for use around the world. An additional $200M should be authorized, with the informal understanding that it is being added to match the European and Japanese mixed credit packages for Eastern Europe. The facility could be terminated by the President on a determination that effective discipline has been achieved so that U.S. exporters are no longer competitively disadvantaged.

Adding to the war chest will help the U.S. government increase its leverage in the forthcoming OECD negotiations on tied aid in order to curtail these uneconomic, distorting subsidies. It will also help U.S. companies stay competitive in Eastern Europe. Unfortunately, this is an issue over which we probably must prepare to play poker in order to call off the game.

Even these proposals for beefing up both the war chest and Ex-Im direct loan authority would leave the Japanese and Europeans potentially offering concessional export assistance at levels far above the U.S. It is important to recall when considering raising direct loan authority to $1B that the program has suffered a catastrophic erosion in funding from its peak of $5.4B in FY'81.

It is at least as important to recall why those deep cuts were made and why they were politically acceptable to those who made them. The explanation involves much more than the fundamental budget pressures of the Eighties.

I will offer the unexpected view that there was some justification for cutting Ex-Im direct loan authority from its 1981 peak. The fact is that U.S. producers of capital were not at cost competitive as we should have been then or are now; to that extent, some Ex-Im loans probably in effect subsidized some inefficient producers.

But American industry regained its cost competitiveness through the wrenching, even agonizing restructuring process of the Eighties. We cut costs, re-focused our businesses, invested in plant and equipment and raised productivity. Productivity growth in U.S. manufacturing at the end of the Eighties is more than twice what it was at the beginning of the decade. At GE, annual productivity growth rose from the 1-2 percent range in the early Eighties to nearly the 6 percent level as we enter the Nineties.

Let me be blunt: U.S. industry is now doing its part on cost competitiveness. Now it's time for the U.S. government to do its part to help us compete on a level playing field with our Western European and Japanese competitors.

I think another set of facts should transform the way we view Ex-Im. We're all aware of the lingering perception that the Bank is a big company benefit. Of course large companies use Ex-Im facilities. But there also is a less well-known small business constituency at the heart of the Bank's mission that can be seen in two ways.

First, companies that meet the SBA's definition of "medium-to-small" account for fully 30 percent of Ex-Im's transactions to date in the current fiscal year. There is direct access to the Bank's facilities for small business, though that access should be further expanded and simplified.

Second, smaller companies participate in export markets—and indirectly in Ex-Im financing—through the large companies that have the resources and reach to sell big ticket capital goods overseas. They participate through us as sub-contractors, in many cases supplying a majority of the content of completed goods big companies sell and ship.

Two GE examples demonstrate our export relationship with small business:

Some 65 percent of the manufacturing content of a GE jet engine—parts worth 45 percent of its sales volume—is supplied by sub-contractors. Small businesses helped our Aircraft Engines business account for the largest part of GE's $4.8 billion positive contribution to the U.S. balance of trade in 1989.

The other GE example is from our Industrial and Power systems business. Some 83 percent of the average material cost of a typical MS9001 gas turbine is supplied by domestic sub-contractors to GE. For a typical large steam generator unit, 67 percent of the average material costs are sub-contracted. Both gas and steam turbine sales have received Ex-Im support. Allowing smaller companies to export through us.

The Ex-Import Bank now has the chance to be of even greater assistance to American businesses—small and large alike—If it receives the resources it needs to make a difference in the real competitive world.

The dramatic changes in Central and Eastern Europe will and should be of greatest benefit to those emerging democracies themselves. Trade and investment links to the West—not just back across the Elbe but across the Atlantic—should also be part of their reintegration in the free world. The Congress and the Administration have a rare chance in history right now to seize that opportunity for the benefit of us all.

SUPPLEMENTING U.S. AID TO CENTRAL AND EASTERN EUROPE: SUMMARY PROPOSALS

U.S. Economic policy toward the newly liberalizing nations of Central and Eastern Europe should advance two mutually-reinforcing goals. First, we should support movement toward free market economies to complement the creation of free democratic institutions. Second, U.S. investment should be promoted, with the cororally objectives of boosting U.S. exports and remaining competitive with government-supported Western European and Japanese companies in the region.

Summary recommendations for additonal U.S. assistance are:

Restore U.S. competitiveness in export finance at a time when export opportunities are expanding, more nations are gaining Ex-Im eligibility, and EC governments and Japan are targeting concessionary trade financing to Eastern Europe.

Double the Administration's proposed FY '91 Ex-Im direct loan authority request from $500M to $1B.

Add $200M to the $300M war chest in place to meet the challenge of foreign mixed credit or tied aid offerings, while negotiating to end such distorting subsidies.

Expand OPIC direct loan and investment guarantee programs in Central and Eastern Europe, and streamline the OPIC application process to benefit smaller firms.

Assure that the evolving economic relationships between the Central and Eastern European nations and established market economies are built on free trade and open investment by securing market access for a fair share of Central and Eastern European exports to the U.S., the EC and Japan. As economic reforms progresses, certain countries should be "graduated" from their status as state-trading (non-market) economies so as to eliminate or phase-out disavantages they suffer under GATT rules such as the anti-dumping code.

Work within Cocom to more quickly and comprehensively relax export control restrictions without jeopardizing security.

Expand management training and technical assistance by:

Funding American experts to advise on the writing of basic financial, banking and economic regulations, and retired executive volunteers to advise on managing business.

Further supplementing labor training by the Department of Labor and providing U.S. labor-management expertise on adjustment for displaced workers in a free labor market.

Playing a more active role in G-24 multilateral assistance in areas such as environmental protection.

Support the establishment and substantial capitalization of a European Bank for Reconstruction and Development, with an initial U.S. contribution of at least $250M.

Assist investors seeking to repatriate profits—and help Central and Eastern European nations expand trade beyond the Eastern bloc—by helping establish a multilateral re-

volving fund in the absence of convertible currencies.

PROPOSALS FOR SUPPLEMENTING U.S. AID TO CENTRAL AND EASTERN EUROPE

Following are recommendations for additional U.S. assistance beyond the SEED legislation enacted last November:

EXPORT FINANCE

The Administration is proposing to cut Ex-Im FY'91 direct lending authority to $500M exactly at a time when U.S. export opportunities are increasing not only in Central and Eastern Europe, but in the Asian countries where Japanese competition is severe and in Latin America where economies are beginning to recover.

Already the direct loan program is overcommitted with projects in the pipeline. Moreover, it is clear that there will be substantial new demand for Ex-Im support, with eligibility newly approved or likely to be negoitated by the end of this year for Panama, Yugoslavia, Hungary, Czechoslovakia, Poland, Bulgaria, Romania, China and the USSR (with the expected end of Jackson-Vanik restrictions.)

Ex-Im's direct lending authority of $612M last year pales into virtual unilateral disarmament when compared not only to these growing export opportunities, but to the aggressive concessionary trade finance war chests maintained by Japan and several of the Western European nations.

Moreover, much of the new Japanese and Western European aid to Central and Eastern Europe just announced over the past several months is in concessionary trade financing. Virtually all of Japan's half-billion commitment to Hungary will come in the form of guarantees and credits and could be tied to purchases from Japanese suppliers. More than two-thirds of the $1B European Investment Bank commitment to Poland and Hungary over the next three years will take a similar form.

Although Japanese trade with Central and Eastern Europe has been relatively small and doubts persist about investment prospects, there is new interest on the part of Japanese companies (as demonstrated by the proposed Suzuki investment in Hungary) that is being reinforced by pledges of substantial government assistance. Prime Minister Kaifu announced on his recent trip to Eastern Europe a combined credit and aid package including: $500M of Export-Import Bank credits each for Poland and Hungary; $350M in trade insurance to cover Polish imports from Japan; $200M in new trade insurance for exports to Hungary; and $25M for technical cooperation with Poland and Hungary.

In the short term, this likely imbalance in trade finance assistance could mean fewer American export orders and greater initial Western European and Japanese penetration of developing Central and Eastern European markets. In the long term, it may mean the setting of patterns of trade and investment for the next decade, perhaps even for the next half century.

A substantial boost right now in Ex-Im funding amounts to a long term investment that the U.S. may not get another chance to make. A serious effort to match the challenge would require doubling the Administration's FY'91 Ex-Im direct loan proposal of $500M to $1B.

An alternative means of achieving the $1B would be to increase the the Administration's $500M request by 50% to $750M, and then applying an operational IEP (Interest Equalization Program) appropriation of $25M. This alternative, as currently proposed by the business-labor Coalition for Employment Through Exports, Inc. (CEE), rests on the assumption that a $25M interest subsidy has a 10:1 leveraging factor, therefore amounting to $250M. (IEP effectively compensates the commercial bank for the difference between the commercial rate and the OECD rate.)

Such additional funding (above the Administration's request) should be authorized in a manner that Ex-Im would be strongly encouraged to expand lending programs for the Central and Eastern European nations. Committee language could make clear the sense of the Congress that greater support should be dedicated to Central and Eastern Europe. This approach has the advantage of allowing the Bank to meet increased demand on its direct loan program while retaining the flexibility that might be lost through specific earmarking.

Even this proposal would leave the Japanese and Western Europeans potentially offering concessional export assistance at levels far above the U.S. It is important to recall when considering raising direct loan authority to $1B that the program has suffered a catastrophic erosion in funding from its peak of $5.4B in FY'81.

On top of this additional direct loan authority for Ex-Im, a stand-by credit facility should be established to meet foreign-mixed credit or tied aid offerings. At present, such a war chest—funded at $300M—is in place for use around the world. An additional $200M should be authorized, with the informal understanding that it is being added to match the European and Japanese mixed credit packages for Central and Eastern Europe. The facility could be terminated by the President on a determination that effective discipline has been achieved so that U.S. exporters are no longer competitively disadvantaged. Creating an effective mixed credit program would require allocating substantial additional resources to AID and changes in AID's current thrust toward more support for capital projects.

But adding to the war chest will help the U.S. government increase its leverage in the forthcoming OECD negotiations on tied aid in order to curtail these uneconomic, distorting subsidies. It will also help U.S. companies stay competitive in emerging markets. Unfortunately, this is an issue over which we probably must prepare to play poker in order to call off the game.

Ex-Im also needs modest additional funds to hire additional trained project experts (with engineering degrees or MBAs) to evaluate project risks, as well as to relax current stiff restrictions on staff travel. At present, Ex-Im loan officers are evaluating commercial risks based almost entirely on written applications. Additional funds for these twin purposes—probably in the $5M range—could help Ex-Im more effectively target its loans and guarantees.

Finally, we should continue the process of broadening Ex-Im eligibility. Building on Secretary Baker's constructive recent announcement of Czech eligibility for Ex-Im lending, eligibility should also be reinstated for Romania and extended to East Germany and Bulgaria. But, once again, Ex-Im will need greater resources to meet these greater demands.

OPIC

In addition to expanding Ex-Im's resources, we should utilize other tools available to enhance U.S. competitiveness in Eastern Europe. Beyond Secretary Baker's February 6th pledge in Prague for Czech eligibility for OPIC programs, OPIC's authority should be expanded to cover other countries, particularly Czechoslovakia, Romania, East Germany and Bulgaria, and its resources should be augmented accordingly. Demand for OPIC's direct loan and investment guarantee programs in Central and Eastern Europe is already exceeding current funding levels and will likely grow substantially through 1990 as U.S. investments increase.

OPIC's pilot equity program, section 234(g)(2) of the Foreign Assistance Act of 1961, currently limited to Subsaharan Africa and the Caribbean, should be fully funded and expanded to cover Eastern Europe, and its flexible "special projects" authority—22 U.S.C. S2194(e)—should be funded and directed toward Central and Eastern European projects. Such funds can be used to assist U.S. companies competing for projects in Eastern Europe against subsidized financing packages available from other countries. Giving OPIC a significant role in the mixed credit process could also help energize AID to become more aggressive in utilizing its resources in cooperation with OPIC and Ex-Im.

OPIC seems to have a problem with visibility and access, especially with smaller firms. OPIC itself recognizes this problem, and has recently upgraded its communication and outreach efforts in the small business community. Still, the perception lingers that insurance applications are lengthy and complex, and therefore are bureaucratically beyond the means of small firms that must make and execute investment decisions quickly. OPIC should receive modest further budget allocations for improving outreach and streamlining application processes.

Attaining OPIC insurance was essential to the GE/Tungsram deal. The expansion of OPIC involvement in Central and Eastern Europe—especially to the extent that it is made more accessible to smaller firms—will provide indispensable confidence for prospective U.S. investors.

MARKET ACCESS FOR EASTERN EUROPEAN NATIONS

It is critical that U.S.-Eastern European trade and investment move both ways. Not only are hard currency-earning exports crucial to economic development, but real (or perceived) trade barriers to Central and Eastern European goods raise the risk of political backlash against Western investment. Although there are few quality goods currently attractive and available to U.S. buyers, that should change quickly as Western investment aid, management assistance and technical training make some initial progress.

As economic reform progress within Poland, Hungary, Romania, Czechoslovakia, these countries should be "graduated" from their status as "state-trading" (non-market) economies. This will reward their efforts by eliminating or phasing out the disadvantages they suffer under such GATT rules as the anti-dumping codes.

As Central and Eastern Europeans make difficult strides towards multi-party democracy and the open global economy, we should be quick to encourage exports form—as well as to—those nations. The U.S. should accept its fair share of imports, and work just as quickly to assure the same on the part of the EC and Japan.

EXPORT CONTROLS

The Bush Administration's recent decision to relax certain export controls (on preci-

sion machine tools, 32K microprocessors and some telecommunications equipment) is a step in the right direction. So too was U.S. participation in the February 14-15 Cocom comprehensive review of current restrictions. But the U.S. runs the risk of being left behind as other Cocom nations press for further loosening of restrictions on industrial products such as higher-speed computers and more sophisticated telecommunications equipment. If these nations are truly expected to enter the global trading system and become competitive, they must be able to buy the building blocks of modern industrial infrastructures. The legislative proposals that are being introduced (including "SEED II") may be useful vehicles for encouraging the Administration to consider areas of further relaxation without jeopardizing national security.

MANAGEMENT TRAINING AND TECHNICAL ASSISTANCE

If wisely targeted and efficiently administered, such assistance could be as helpful to the success of U.S. investment in Central and Eastern European countries as any other form of aid. Investor confidence will sag after the initial euphoria when the depressing reality sets in that these are economies without financial markets, rational accounting systems, realistic pricing or other fundamentals of market economies. Here U.S. expertise can make a difference.

With few additional resources, the U.S. could set up a special endowment to fund American experts—working with European experts and officials in the newly liberalizing countries—to advise on the writing of basic financial, banking and other economic regulations. The sooner that specific, dependable legal frameworks are in place, the sooner that rational markets and serious investment will follow.

A constructive element of the Pell/Biden proposed "SEED II" legislation is increased funding (at $5M) for the International Executive Service Corps for retired executive volunteers to advise on enterprise management. Also constructive are provisions for expanded labor training ($5M) by the Department of Labor and an additional $10M in AID technical training.

Building on the programs about to be launched in Poland and Hungary under the auspices of the SEED legislation, the U.S. government could also provide modest additional resources to coordinate pooled training—both management and technical—that could be conducted together by several or more American firms in various capitols or in other areas where a critical mass of investors takes shape. That way the U.S. private and public sectors could together make substantive contributions to local management and labor market skills, while at the same time investing in the success of their own ventures.

Another area to apply U.S. expertise is in the functioning of a free labor market. Given the painful restructuring that these nations are beginning—especially as privatizations, price and currency reforms are set in motion—unemployment and social pressure will certainly rise. Lessons from the U.S. experience with plant closings, retraining and reemployment of displaced workers can be helpful, especially to the extent that those lessons are suggested in a balanced, non-ideological way that embraces some of the substantive areas of consensus reached by U.S. companies and unions in the Eighties.

The U.S. should also play an activist role in the G-24 multilateral assistance arena (chaired by the European Commission), which currently includes programs ranging from vocational training to environmental protection standards and technologies. In this context, the Pell/Biden "SEED II" legislation helpfully provides for an increase in the EPA environmental assistance program for Central and Eastern Europe from $40M to $60M. That is an especially crucial priority as EC and other multilateral pollution control standards are stiffened and the Eastern European nations continue to slip back.

EUROPEAN BANK FOR RECONSTRUCTION AND DEVELOPMENT

This proposed bank would provide multilateral support for private sector initiatives in Central and Eastern Europe, although state-owned entities would not be entirely excluded. The French government has taken the lead in creating this institution, with a running argument on capitalization between the French proposal on the high end at $12B and the British on the low end at $6B. The capitalization issue will be likely settled, and the bank formally launched, next month in Paris.

The U.S. should take a leadership role—not a follow-on or sideline role—in the creation of the bank. We should push for a high level of capitalization, and immediately embrace the 8.5% share in the bank porposed for the U.S. (equivalent to the commitments expected of the Soviet Union, Japan, Britain, France, West Germany and Italy). The U.S. should make an initial contribution of at least $250M (the amount proposed on January 30 under the auspices of the Senate "SEED II" legislation), with the contribution contingent on a fair sharing of burdens and responsibilities among donors.

The bank's establishment would lead to multilateral support and funding for major infrastructure development projects, potentially benefitting a wide range of U.S. companies. It is not unreasonable to conclude that these potential benefits for U.S. companies will depend in part on strong U.S. support and substantial funding for the bank.

REVOLVING FUND

Right now only Poland has currency convertibility, and that is only partial. Therefore it is difficult for investors in Central and Eastern European nations to repatriate profits unless they produce goods for export. The lack of convertibility is a critical barrier to smaller prospective investors with fewer resources and necessarily shorter investment horizons than a GE or GM.

A revolving fund, as proposed by Bob Hormats of Goldman Sachs in a recent New York Times op-ed, would assist in the transition to convertible currencies by providing a supply of dollars, marks and other hard currencies on which the countries could draw to settle accounts. As proposed by Hormats, "they would draw down their accounts when they are running deficits and pay the fund back when they have surpluses." A similar "convertibility fund" was proposed earlier this month by the Kiel Economic Research Institute in West Germany.

Such a transition mechanism on the way to convertibility would allow Central and Eastern European nations to expand trade beyond the Eastern bloc, a critical objective if they are to spur growth and raise living standards.

CONDITIONING AID ON CONTINUING REFORM

Finally, there should be some conditions attached to the assistance we give to Central and Eastern Europe. The process of political and economic reform seems irreversible in East Germany, Poland, Hungary and Czechoslovakia. But the fact is that reform is only now really beginning in these nations, and it is not clear whether or when in the near future a reform course will advance in Yugoslavia, Bulgaria and Romania. The important point is that all economic progress in the region— whether it's creating market economies, privatizing state enterprises, attracting foreign investment or raising living standards—depends on continued success by political reformers.

Although the U.S. government has little leverage on political developments in these nations, there is a helpful stance we can take. We can indicate that we are watching the progress of reform, and that we will step up our assistance as we are assured that political and economic progress is continuing. Secretary Baker essentially made this point on his early February trip to the region, and it was a constructive signal. Conditioning U.S. aid on political and economic reform is good foreign policy and good business policy. We should also be prepared to signal that our assistance is contingent on market access for U.S. as well as EC and other foreign companies.

SHORT-TERM ECONOMIC GOALS

But as critical as foreign aid and investments are, Eastern European governments must take even more fundamental steps themselves in order to sustain their economies in the global marketplace. Such short-term goals include:

Achieve realistic cost and exchange rates allowing them to export in world markets.

Diminish inflationary pressure (down from some prevailing rates nearing 50%) by pursuing conservative fiscal policies and wage restraint until their industries gain productivity and more secure export positions in the West.

Restrict the incurrence of new foreign debt to a level that limits their debt service to a reasonable relationship to export earnings.

Develop a climate that would encourage the inflow of western capital and direct investment.

These goals are reasonable and attainable. They are consistent with the conditions that international lending agencies set for extending assistance to LDCs and consistent, for example, with the World Bank conditions agreed to by Poland. Steps toward meeting these goals are bound to accelerate the successful integration of these countries into the nexus of free market economies.●

S. 2341: A BILL TO REAUTHORIZE THE TEA PROGRAM

● Mr. COHEN. Mr. President, I am pleased to join my distinguished colleague from California, Senator WILSON, and others in introducing legislation to reauthorize the Targeted Export Assistance [TEA] Program. The TEA Program was authorized under the Food Security Act of 1985, to assist organizations and private firms to promote their products overseas. The TEA Program represents a positive solution to unfair trade practices by foreign competitors. It provides important promotional and technical assistance to U.S. producers enabling them to compete directly in foreign markets. The Federal Govern-

ment has a legitimate role to play in promoting U.S. exports into markets which have been unfairly closed to U.S. producers. U.S. products can compete in any market into which they are given access. The TEA Program is an important tool in opening up new foreign markets for U.S. producers.

Maine companies have been able to enter these markets with the help of the Eastern United States Agricultural Food and Export Council [EUSAFEC] which facilitates the TEA Program for companies in the Northeast. Through the hard work and experience of EUSAFEC, Maine businesses of all sizes have successfully marketed their products abroad. For example, the Maine Potato Board has successfully marketed seed potatoes in Venezuela. With the help of EUSAFEC and the TEA Program, DeCoster Egg Farms has been able to open up markets in Japan and the Middle East. Maine Coastal Brewing Co. has also been successful in selling its products in Japan.

The money invested in the TEA Program pays for itself many times over in terms of trade development. In 1988, with a $67,000 TEA grant last year, the 1,000 members of the Wild Blueberry Association of North America increased their exports by $3.8 million. Last year, with a $75,000 allocation, the members expanded their markets into Spain, Italy, and Austria and have targeted Israel, Korea, and Australia as potential future markets.

These companies are representative of the hundreds of similar success stories throughout the United States which, taken together, have enhanced the international competitiveness of the United States. These accomplishments would not have been possible without the resources of the TEA Program.

Our legislation will authorize the TEA Program at a rate of $325 million for each fiscal year from 1991 through 1995. The bill will also expand the Secretary of Agriculture's authority to monitor expenditures under the TEA Program to assure the best and highest use of these moneys.

I am pleased to join my colleagues in introducing this legislation and look forward to seeing it enacted into law.●

HERMAN MILLER, INC., OF ZEELAND, MI, DEMONSTRATES COMMITMENT TO GLOBAL ENVIRONMENT

● Mr. RIEGLE. Mr. President, I am proud today to congratulate Herman Miller, Inc., of Zeeland, MI, on their decision to purchase only those tropical woods harvested in an environmentally sound manner. Herman Miller, one of the country's leading office furniture manufacturers, made this commitment without a Government mandate and without public indignation or protest. They were sensitive to the tropical deforestation crisis, took the time to study the problems and identified what Herman Miller could do to help.

Their decision to scrutinize wood sources sends a strong message to those who would pillage the rain forests for fast financial gain. Herman Miller will now buy tropical wood only from those who harvest timber in a manner that maintains the value and ecological integrity of the rain forests. Timber companies now must certify they act responsibly if they wish to do business with Herman Miller. Business leadership like this is essential in our efforts to slow the destruction of what we now realize is a vital resource—our tropical forests.

As the Senate confronts the growing global environmental threat, we are often frustrated by our inability to affect resource management decisions in other countries. Unilateral Government policy has serious limitations when addressing problems like tropical deforestation and global warming. While Government action will be an important element in our fight against global degradation, an equally important source of international pressure must come from voluntary actions of businesses like Herman Miller. They are to be strongly commended for charting a course that may cost them in the short run, but will over time help protect the planet's important natural resources.●

SELF-DETERMINATION FOR PUERTO RICO

● Mr. SIMON. Mr. President, I rise for the purpose of sharing with my colleagues the recent statement of the Honorable Luis A. Ferre on the subject of Puerto Rico. Many of my colleagues know and respect Luis Ferre as the former Governor of Puerto Rico. He recently wrote in response to a newspaper columnist's inept comparison of Puerto Rico with Northern Island.

Governor Ferre makes clear to his fellow American citizens: Puerto Ricans are American citizens, too. They are willing to pay their fair share of the Nation's responsibilities and have contributed mightily to the Nation's defense for 80 years without ever once being able to cast a vote for the President or a Member of Congress who can vote on our Nation's defense or military policies.

Later this spring, the Energy and other relevant committees will bring to the floor S. 712, the Johnston-McClure Puerto Rico plebiscite bill that I was proud to cosponsor. In order that my colleagues can have the full breadth of information on Puerto Rico and Puerto Ricans, I ask that the statement previously referred to be printed in the RECORD immediately following my remarks.

The article follows:

[From the Washington Times, Mar. 16, 1990]

PUERTO RICO IS NOT NORTHERN IRELAND

Seldom has the image of the United States of America been soiled with greater injustice and prejudice than in the Feb. 26 column of Patrick Buchanan, "Puerto Rico as our 51st," which deals with Puerto Rico's rightful aspiration to become a state of the Union. His was a gratuitous attack on 6 million Americans, 3½ million of whom live in the Island of Puerto Rico. The other 2½ million have made their homes in the 50 states.

Mr. Buchanan seems to echo the economic interest of a number of investors who want to continue enjoying a tax exemption, which costs the U.S. Treasury, and hence the American taxpayer, about $3 billion yearly. These same interests remain content to deny the U.S. citizens of Puerto Rico the minimum social benefits that are enjoyed by all other American citizens on the mainland. We Puerto Ricans are willing to pay our share. We do not want handouts or welfare. We want to work and save, to prosper and to pay our federal income taxes.

It is ironic that Mr. Buchanan, who is known for his hatred of communism and its denial of freedom, refuses to support the right of self-determination for Puerto Ricans. He says statehood is a mistake, that it won't work, that our island will become another Northern Ireland. Rubbish!

Mr. Buchanan's illogic would be complete only if he denounced the sacrifices of Puerto Ricans in the defense of liberty. Does he not give any credit to the 200,000 veteran Puerto Ricans who have served in the U.S. military forces and to the thousands of dead and wounded who fought during all the wars our country has waged in this century?

He forgets such men as Fernando Ledesma, who won the Congressional Medal of Honor because he thrust himself upon a grenade to save the life of his companion in Korea. Or Air Force Maj. Fernando Ribas Dominici, who gave his life to serve his country and his president, Ronald Reagan, during the military mission againt Moammar Gadhafi's Libya.

Mr. Buchanan ignores Puerto Ricans in the armed services—Adm. Horacio Rivero, Vice Adm. Diego Hernandez and Gen. Pedro del Valle. He forgets professionals like Dr. Enrique Mendez, assistant secretary of health for the Defense Department, and Dr. Antonia Novello, who was just confirmed as U.S surgeon general. He forgets actors like Jose Ferrer and Raul Julia; opera singers Justino Diaz and Pablo Elviro, both of the Metropolitan Opera Co., and the brilliant pianist Jesus Sanroma of the Boston Symphony. And even the late Roberto Clemente.

Hundreds of thousands of Puerto Ricans work in U.S. factories, as university professors, teachers and businessmen, each, in his own way, contributes to the growth and prosperity of this country.

Against these positive contributions, Puerto Ricans are compared to a few self-appointed terrorists, whose actions were instantly condemned by public opinion in Puerto Rico, including a 1954 legislative resolution to that effect. Mr. Buchanan forgets that terrorism and insanity know no geographic boundaries, as witnessed by the attack on President Reagan and the assassinations of President Kennedy and the Rev. Dr. Martin Luther King Jr.

Puerto Rico is a community of loyal American citizens who have evolved within the American way of life and who seek to assume full responsibilities in the Union. We want to pay taxes, not to be an economic burden, as we are today under the system that Mr. Buchanan praises.

We were brought into the American family, without our request, by unilateral action of the United States, which understood that Puerto Rico's position in the Caribbean was essential to its defenses.

Certainly we welcomed the U.S. soldiers as deliverers. We took at face value the promises of Gen. Nelson Miles, who upon arrival in 1898 proclaimed, "We have come to bestow the immunities and blessings of our enlightenment and liberal institutions and government."

Except a handful, all Puerto Ricans living today were born under the American flag; most everyone speaks English. We pose no more of a threat to the use of English than do the other 15 million Hispanic Americans living in the United States. We feel we have the right now to achieve the goal that is due to every U.S. citizen—equality through statehood.

Finally, we have faith and confidence in the spirit of Thomas Jefferson and Abraham Lincoln that has inspired Presidents Reagan and Bush to spread the winds of freedom and self-determination throughout the world.

The time has come to practice these same principles at home, with Puerto Rico.

LUIS A. FERRE,
Former Governor of Puerto Rico.●

HISTORIC PRESERVATION LEGISLATION

● Mr. LEAHY. Mr. President, today I have signed on as cosponsor of S. 1578, the National Historic Preservation Act, and S. 1579, the National Historic Preservation Policy Act.

Taken together, these bills present a comprehensive, effective vision of our Nation's historic preservation policies. They are the product of several years' work by people involved in historic preservation nationwide.

There is a significant role for the Federal Government to play in preserving our past. We best understand the meaning of our times and the currents which guide our lives and our politics by assessing our past. And increasingly, the economic future of old American downtown districts are tied to how well we respect and restore the landmarks of the past. We must not only continue but expand our efforts to improve the social and economic vitality of our communities through thoughtful preservation work.

But our current Federal policies are falling short. Policy directives are not clear and articulate. Valuable preservation funds are lost in bureaucracy.

This legislation will do much to improve our historic preservation efforts. I thank Senator FOWLER for his hard work on these bills, and commend his commitment to preserving our Nation's historic resources through this legislation.●

HENRY M. MANN

● Mr. FORD. Mr. President, fortunate indeed is the community that has a citizen who devotes his life to the community. One such community is Lakeside Park in Kenton County, KY. Its citizen is Henry M. Mann.

Henry is at a point in time where he is easing down in his efforts. Mr. President, his community, his county and his State are all the better for what Henry Mann has put into them.

Henry Mann exemplifies what a citizen is in the Greek meaning of the term. I am honored to have known him.

Mr. President, I ask that a summary of Henry Mann's life work be printed in the RECORD at this point.

The summary follows:

HENRY M. MANN

EDUCATION

Glasgow High School—Glasgow, Kentucky.

B.S.—Western Kentucky University.

M.A.—University of Cincinnati.

WORK EXPERIENCE—PRESENT

Owner—Henry Mann Company, Builders and Developers, residential and light commercial building and development.

Chairman of Board—Citizens National Bank, Covington, Kentucky.

WORK EXPERIENCE—PAST

Executive Vice President, Nutone, Incorporated, Cincinnati, Ohio (1952-1971).

Vice President, Director and Consultant to—Ferguson-Randolph, Inc., Geneva, Illinois and Palm Beach, Florida (1981-1982).

Gibson Art Company—Cincinnati, Ohio (1947-1952).

Covington School System—1935-1942.

EXTRA/OUTSIDE ACTIVITIES—PRESENT

Mayor—Lakeside Park, Kentucky—1980 to Present.

City Councilman—1972-1980.

St. Elizabeth Medical Center Board of Trustees—1971 to Present (President of Board—1973-1976).

Northern Kentucky University Foundation Board of Trustees—1974 to 1988.

Prichard Committee for Academic Excellence—1981 to Present.

Northern Kentucky District Board of Health—1982-1984.

Hoxworth Blood Center Advisory Board—1980-1988.

Ohio-Kentucky-Indiana (OKI) Regional Council of Governments Board of Trustees—1983 to Present (President—1986-1989.)

Madison Avenue Christian Church Elder (Chairman of Board—1965-1966).

EXTRA/OUTSIDE ACTIVITIES—PAST

Northern Kentucky University Board of Regents—1974-1982.

CORVA (Health Planning Association of the Central Ohio River—HSA) Board of Trustees—1973-1981, Chairman—1976-1977.

Kentucky Council on Higher Education—1966-1968.

Hospital Council of Greater Cincinnati—1972-1977 (President—1976).

Kentucky Hospital Association Council of Trustees—1971-1975.

St. Francis Hospital Board of Trustees (Cincinnati)—1973.

Providence Hospital Board of Trustees (Cincinnati)—1973.

St. Marys Hospital Board of Trustees (Cincinnati)—1973.

Kenton County Democratic Executive Committee (Chairman—1984-1988).

Kentucky State Democratic Central Executive Committee—1984-1988.

Kentucky Bicentennial Commission—1986-1989.

Kenton County Transportation Task Force (Chairman 1985-Present).

Community Chest of Cincinnati Board of Trustees—1973-1977.

Northern Kentucky Health and Social Planning Council (President—1973-1974).

Chairman, Special Task Force to Study Management and Operations of Transportation Authority of Northern Kentucky (TANK)—1977.

Northern Kentucky Area Development District Board of Directors—1974-1976.

Greater Cincinnati Chamber of Commerce Board of Trustees—1963-1968.

Covington YMCA Board of Trustees—President 1964-1965.

Fort Mitchell Country Club Board of Directors—1958-1961 (President 1961).

Commanding Officer, U.S. Naval Reserve Training Center, Covington, Kentucky—1952-1954 (civilian reservist).

Kenton County Chairman/Martha Layne Collins for Governor—1982-1983.●

THE 200TH ANNIVERSARY OF THE PHILADELPHIA STOCK EXCHANGE

● Mr. HEINZ. Mr. President, I rise to pay tribute to the Philadelphia Stock Exchange, which today celebrates its 200th anniversary. Over the last 200 years, the exchange has played an integral role in the development of southeastern Pennsylvania's and the Nation's economy, because it has been a forerunner in the creation of new products and economic instruments that have provided the investment capital for businesses to grow and to create jobs.

The Philadelphia Stock Exchange was founded in 1790, by a small but inspired group of visionary men who transformed a popular Philadelphia coffee house into a place where American industry could gain the sustenance for growth and a vision to build further on the foundation of established achievements. At first, the exchange in Philadelphia traded primarily bank stocks and government bonds. But its members focused on the future, and they saw a rapidly developing country. Soon the exchange began to trade stock in America's fledgling industries, helping provide them with the capital they needed to establish themselves and grow.

The growing exchange communicated price information with its New York counterpart via a series of elevated stations across the New Jersey landscape. From these stations, signals were flashed by mirrors in the daytime and lanterns at night. Of course, a communications system that seemed sophisticated then appears primitive in our day and age when satellites transmit market information instantaneously to computer screens throughout the world.

For the next century, the Philadelphia Stock Exchange prospered as America prospered. Its stock trading helped provide the necessary capital to fuel the growth of such vital industries as railroads, coal mining, steel, insurance, and automobiles.

Then came the Great Depression and an accompanying slump in stock trading. When the slump lifted in the mid-1940's, the Philadelphia Stock Exchange was ready to introduce an innovation that revolutionized stock trading. Its newly invented clearing system guaranteed the integrity of all trades, making it unnecessary for market participants to assess the credit risk of each individual trader. This system is now used by every stock exchange in the world.

In the late 1940's, the exchange transformed itself into a major national force. A series of smaller regional exchanges, including the Baltimore and Washington Stock Exchanges, merged with the Philadelphia Stock Exchange, and the exchange entered into associate memberships with the Pittsburgh and Montreal Stock Exchanges.

The 1970's heralded another wave of innovation by the exchange. In 1975, the exchange dared to help pioneer an unproven idea for the trading and hedging of stocks—listed stock options. Not long after this, the Philadelphia Stock Exchange became the first stock exchange to trade the now-popular foreign currency options—introduced to help the international financial community respond to more volatile currency markets.

And today, the exchange is pioneering the use of state-of-the-art communications systems for executing and reporting trades and disseminating market information.

The Philadelphia Stock Exchange is now located in an ultramodern, eight-story building on Market Street in downtown Philadelphia. Here, specialists and brokers traded hundreds of millions of shares of stock each year. More than 1,800 individual companies are available for trading on the exchange.

The exchange also houses one of the world's most important marketplaces for listed stock options. It trades more than 140 stocks on major corporations. Listed stock options have made it safer and more profitable for institutions and individuals to invest in the future of companies. Companies, in turn, have benefited from a greater freedom to grow and innovate.

The Philadelphia Stock Exchange also has been instrumental in reshaping the foreign exchange markets. Today, the exchange ranks as one of the largest currency options markets in the world, trading options on eight currencies.

As the exchange helped lead the way toward globalizing the financial markets, it took steps necessary to become the first securities exchange to hold evening trading sessions for foreign currency options. These sessions offer the Pacific Basin countries access to a successful foreign currency options market here during their normal business hours.

The subsequent introduction of early morning hours added further opportunities for the European participants. With its extended trading hours and its international presence, the exchange can help businesses respond more quickly and efficiently to rapidly shifting international economic conditions.

As the world financial community becomes more sophisticated, complicated, and interrelated, the Philadelphia Stock Exchange is committed to anticipating the new challenges and responding to them with ingenuity and creativity.

The Philadelphia Stock Exchange takes pride in being recognized as one of the most innovative exchanges in the world—creating new products and new financial instruments that promise to change the way businesses do business now and for the next 200 years.●

JERUSALEM

● Mr. KERREY. Mr. President, I rise to state the obvious: that a unified Jerusalem properly ought to be recognized by this government as the rightful capital of the State of Israel.

Mr. President, there is almost something unseemly about American politicians such as ourselves moving to legitimize the status of Jerusalem, the sacred place invested with the deepest hopes and dreams of history. The recent hue and cry over President Bush's remarks has, as often happens, generated more heat than light. But one thing ought to be clear. Jerusalem is, and will be, the seat of Israel's Government and there is no good reason why we should not treat it as such.

The State of Israel is one of our most loyal and valuable allies. It makes little sense to me that we entrust Israel with our military hardware and our strategic cooperation, but quibble over where they choose to seat their capital and their government. This anomalous state of affairs results in repeated debates and resolutions over this one issue which in the end divert our attention from the real and immediate issues that most deeply implicate Israel's security.

Mr. President, the State of Israel's claim to Jerusalem has deep roots in history. For thousands of years Jews turned toward Jerusalem three times a day to pray for their return to that place, where, the Talmud says, the heavens kiss the earth. For nearly 200 years Jews have been renewing their residence in Jerusalem, brick by brick and life by life. For nearly two decades after winning their independence they were denied access to the city and the graves of their ancestors on the Mount of Olives were destroyed. In 1967, Israel was forced by the world's indifference to fight for its life and when the smoke cleared Jerusalem was in its hands.

Now, Mr. President, when the Middle East is wracked with strife and change, we ought not to waste our time and energy on an issue that should have been laid to rest a long time ago, nor should we let Jerusalem be used as a political football by this administration or any other.

Mr. President, Jerusalem is the capital of Israel because, having won it in a war of self-defense, the entire political spectrum of that country—left, right, and center—has declared it to be so. Let us now get on with the serious business of working with Israel, Egypt, and our other friends to bring a just and lasting peace to that war-torn land.●

COMMEMORATING THE CIVIL RIGHTS ACT OF 1968

● Mr. BOSCHWITZ. Mr. President, I rise today to commemorate the 22d anniversary of the Civil Rights Act of 1968.

Many of us remember April 4, 1968, as the day that a powerful voice for justice was silenced. For on this day, Dr. Martin Luther King, Jr. was assassinated. I must tell you that I, like many Americans, felt a great emptiness in my heart on that day; indeed, it was a terrible loss for this Nation and the civil rights movement that he had led.

On April 11, the day Dr. King was buried, President Lyndon Johnson signed into law the Civil Rights Act of 1968, a landmark piece of legislation that enacted the first open housing law of the 20th century. As President Johnson said, "With this bill, the voice of justice speaks again."

The Civil Rights Act of 1968 was truly a historic bill. The fair housing provision ensured that all Americans could buy or rent housing, regardless of race, color, religion, or national origin. In addition, the act provided protection for civil rights workers and all those seeking to exercise their right to vote, campaign for political office, serve on a jury, or attend a public school or college—rights that we now take for granted.

We, as a nation, have come a long way since the turbulent days of the late sixties. By creating fair housing laws and providing other civil rights protections, the Civil Rights Act of 1968 opened the door to many families that would have been left behind as our society moves into the next century.

But we cannot simply sit back on the achievements of the past. We must continue to provide the opportunity for every American to fulfill his or her God-given potential—to give people the chance to succeed or fail on the basis of their abilities, determination, and character.

Representative John Anderson, a Republican from Illinois, expressed the sentiment of both Houses best when he said, "I legislate today not out of fear but out of deep concern for the America I love." Let us also do our best in this Chamber for the America that we love.●

MIKE FORREST IS ON THE MARK ON ALCOHOL ABUSE

● Mr. HARKIN. Mr. President, I have long said that in our rush to tackle the drug problem, we have forgotten the biggest drug problem of them all—alcohol abuse.

Alcohol may not get its fair share of attention in our war on drugs. But alcohol is doing more than its fair share of infecting our youth and causing harm to our families and communities.

What is the most deadly drug of them all?

It is not marijuana. It is not crack. It is alcohol.

Alcohol is responsible for more deaths than all other drugs combined.

Alcohol is the No. 1 killer of young people.

Almost 10,000 young people are killed in alcohol-related car crashes every year.

Alcohol is a leading cause of other avoidable deaths—like drowning and suicides.

In Iowa, use by high school students of marijuana and other illegal drugs is on the decline; alcohol use is on the rise.

An estimated 15.1 million Americans suffer from alcoholism or alcohol dependence—more than five times the number of regular cocaine or crack users.

Two-thirds of those Americans seeking treatment for substance abuse list alcohol as their primary problem.

In Iowa, 80 percent of people seeking treatment were admitted for alcohol.

Nor can we forget that alcohol is the gateway drug—the legal drug that leads to illegal drugs such as marijuana, cocaine, crack, and heroin.

Yet, the alcohol problem receives little recognition from the leaders of the Federal Government's war on drugs. I was discouraged to discover that the President's two national drug control strategies, released in September 1989 and January of this year, fail even to acknowledge alcohol abuse.

One of the lone voices speaking about this blind side of our Nation's war on drugs is Iowa's drug czar Mike Forrest.

According to Mr. Forrest, whose official title is Drug Policy Coordinator for the Governor's Alliance on Substance Abuse: "The worst problem we face in Iowa, by far, is alcohol abuse." Yet, Forrest continues, "in the public mind, I'm not certain people see that * * *."

I share Mike's concerns as well as his frustration with the public's and the Federal drug agency's apparent disinterest in alcohol abuse. In 1986, during Senate debate on the Anti-Drug Act, I was one of the lone voices addressing the alcohol abuse problem, and cited the inconsistency of our fighting the drug epidemic while tolerating the media's glamorization of alcohol consumption.

For these reasons, I commend to my colleagues the following article from the April 2 Washington Post on Mike Forrest's efforts to expose the scope of the alcohol abuse problem in Iowa.

My message to Mike is "Good work and keep up the fight for a drug and alcohol abuse free Iowa."

I ask that the article be printed in the RECORD.

The article follows:

ALCOHOL: THE WORST DRUG PROBLEM: OFFICIALS IN MIDWEST FRUSTRATED BY GOVERNMENT PRIORITIES

(By Michael Isikoff)

DES MOINES.—Last summer, amid a barrage of news accounts about crack-dealing gangs spreading through Iowa, Gov. Terry E. Branstad (R) appointed F.H. Mike Forrest, a blunt-talking former Army Reserve officer and retired lawyer, as the state's first "drug czar."

But soon after taking office, Forrest said, he discovered that the state's most serious drug problem had nothing to do with crack. And what's more, neither the news media nor anybody else wanted to hear about it.

"The worst problem we face in Iowa, by far is alcohol abuse," said Forrest. "Yet in the public mind, I'm not certain people see that. . . . Every time I start talking about it, all the television people turn off those cameras. And all those good quotations I give them never get used."

Forrest is not alone in his frustration. While the Bush administration and state governments pour billions of new dollars into fighting illegal drugs, a growing number of public health officials fear that this effort has overshadowed the far more damaging and pervasive problems caused by alcohol abuse.

This is especially true in many midwestern and Rocky Mountain states where officials say the toll from alcohol—measured by highway fatalities, teenage drinking and thousands of babies with fetal alcohol syndrome—dwarfs the problems created by cocaine and other illegal drugs. And they charge the Bush administration with exacerbating the imbalance by omitting alcohol from its drug control strategy and directing that new treatment aid to the states be spent exclusively for illegal drug users rather than alcohol abusers.

"It doesn't make any sense," said Jan Smaby, Minnesota's new drug policy director. "Alcohol is the number one abused drug here by a landslide. . . . Particularly in a state like Minnesota, it's just ridiculous to say we're going to talk about illegal drugs—we're not going to talk about alcohol."

But the imbalance is not only on the federal level. For much of the past year, Iowa's news media and political leaders have been preoccupied with reports of crack cocaine and other illegal drugs sweeping the state. Police officials have reported crack seizures in remote rural communities, and in Des Moines, where drug arrests jumped 169 percent last year, police are worried about a potential outbreak of drive-by shootings and other violence among rival drug gangs this summer.

But at the same time, many officials say there is little hard evidence that cocaine has penetrated widely into the general population. Consistent with national trends, the last statewide survey of high school students here showed that weekly use of marijuana and other illegal drugs had dropped by more than half between 1978 and 1987, while regular alcohol use (also illegal for teenagers) was on the rise.

Meanwhile, Des Moines school officials say that while they see almost no signs of drug abuse in the public schools, they do see alarming increases in binge drinking, weekend beer parties and other alcohol-related problems.

"They are literally drinking until they fall down or throw up," said Barb Madden-Bittle, nurse at 1,400-student Roosevelt High School. "I see a real increase in alcohol—it's really worrisome. . . . But the kids are telling us that it's really okay because it's not marijuana or crack."

"The way people view this problem—it's distorted, it's warped," added Harold Hughes, a former Iowa governor and recovered alcoholic who now runs a private substance-abuse treatment clinic. "People panic when they hear about drugs. . . . But it's alcohol that is killing, maiming and crippling people and filling our jails. . . . It's doing 10 times more damage than all the illegal drugs put together."

Confronted with an increasing number of such complaints, national drug policy director William J. Bennett tells audiences that his mandate from Congress is to be "the drug czar, not the health czar."

At a recent meeting in Omaha, members of the National Commission on Drug Free Schools told Bennett they wanted to begin their upcoming report to President Bush with a powerful warning about the dangers of alcohol abuse among the nation's youth. But Bennett, the commission's co-chairman, warned panel members that they were forgetting their "homework assignment" and risked losing their credibility if they concentrated on alcohol.

"The point is, right now, the American people are eager to get this drug thing behind us," Bennett said in a recent interview. "There are opportunities to talk about alcohol. . . . Why are people changing the subject? . . . There are still some neighborhoods in parts of America where crack is tearing the hell out of places."

In other forums, Bennett has drawn a sharp distinction between alcohol and illegal drug use, which he says "degrades the human character."

"We regard drug use as morally wrong," Bennett said in a recent speech to the conservative-oriented Heritage Foundation. Unlike "90 percent" of alcohol consumption, he said, when illegal drugs are used, "the primary object is to zonk out."

But many public health officials contend that the distinction is not quite so clear-cut and may give rise to cynicism about the

anti-drug effort. The Department of Health and Human Services recently estimated that 15.1 million Americans are suffering from alcoholism or alcohol dependence—more than five times the government's estimated number of regular cocaine or crack users (about 3 million) and more than 30 times the estimated number of heroin addicts (500,000).

A study by the Centers for Disease Control released last month found that alcohol contributed to the deaths of 105,095 people in 1987, including 57,230 deaths from cirrhosis of the liver and other diseases, 20,282 highway fatalities and 8,552 suicides.

Perhaps more significant, given public concern about the links between crack and crime, the CDC study found that 9,107 of the nation's homicides in 1987 were alcohol-related, or about 46 percent of the total. In cities such as the District, police have estimated that as many as 60 percent of murders are "drug related," but say that most result from turf wars and other disputes related to distribution rather than crimes spurred by consumption.

These numbers are striking, some public health experts say, because of the dramatic shift in spending for substance abuse prompted by the federal government's drug war. Under the Bush administration's latest budget proposal, all of the proposed $100 million increase for block grant funding of state substance-abuse treatment programs must be spent exclusively for illegal drug users.

Yet two-thirds of the 1.7 million Americans seeking treatment from such programs last year reported alcohol as their primary problem, according to a recent national survey by the National Association of State Alcohol and Drug Abuse Directors. In Iowa, four of five people seeking treatment were admitted for alcohol, while in Nebraska and Colorado, nine of 10 treatment admissions were for alcohol.

Many state officials acknowledge that these figures may be misleading because alcoholics are more likely to openly admit their problems. But at the same time, they say, it is increasingly common to find treatment patients who are "polydrug abusers," addicted to both alcohol and illegal substances.

"The overwhelming majority of people are seeking treatment for alcohol or alcohol in combination with other drugs," said Diane Canova, director of public policy for the alcohol and drug abuse directors group. "For us, to have [an anti-drug] policy that excludes alcohol doesn't mirror reality."

Even the mounting national concern over crack-addicted babies may be out of proportion, some health officials say. In Iowa, local hospitals report that they continue to see far more babies suffering from fetal alcohol syndrome—a set of birth defects that can include low birth weight, a diminished cranium, distorted facial features and slow cognitive and muscle development.

Some doctors and researchers now believe that at least some of the adverse symptoms detected in "crack babies" may actually be the consequence of alcohol use by the mother. Rizwan Shah, who treats many inner-city patients here as medical director of the Family Ecology Center at Iowa Methodist Hospital, said, "For every one cocaine baby, I see five or six with fetal alcohol syndrome."

But sometimes, she said, it is difficult to tell what may have caused the low birth weight or slow motor coordination of a newborn infant. "I have yet to see a cocaine-using mother who had not also used alcohol," she said.

Forrest said that when he read in a recent medical newsletter about the link between fetal alcohol syndrome and mental retardation, it reinforced his determination to "raise consciousness" about the state's alcohol problem.

"That got my attention," Forrest said. "There are probably academicians who would say, 'We've known that for years.' But as one member of the general public, I didn't. And I have to assume a lot of other people didn't, either."

Nevertheless, Forrest acknowledges that his efforts have been largely ignored. Over the past 18 months, the threat of illegal drugs has rocketed into the forefront of public discussion here.

Private polls taken in this year's Senate race show that drugs are "one of the top two" issues on voters' minds, about even with the economy and ahead of abortion and the environment, according to Phil Roeder, spokesman for Sen. Tom Harkin (D), who is using the slogan "Drug Free by '93" as part of his reelection campaign.

Much of the reason, Roeder said, is that Iowans have watched national television news coverage of drug-related violence in cities such as the District and Los Angeles "and are saying, 'We're not going to let that happen here.' "

Not surprisingly, most of the concern over drugs is centered in Des Moines, the state's largest city with a population of 191,000. Last year the police department called crack a "growing epidemic" and the City Council passed a resolution declaring fighting drugs the city's top priority.

About the same time, the police began a policy of inviting local television news crews to accompany the narcotics squad as it made drug arrests. "It make dramatic film—people see officers running into a home with sledgehammers, guns drawn," said police spokesman Thomas Van Baale. "People see that and they get scared."

Police say there was legitimate reason to worry. In the city's largest public housing project, the Homes of Oakridge, drug dealers had moved into many apartments and were dealing crack. Many were being supplied by gangs from Los Angeles and Chicago.

WHAT IS ABUSED WHERE?

[Number of patients admitted for treatment in selected areas]

	Alcohol	Other drug
Alaska	8,650	1,528
California	108,000	64,408
Colorado	50,667	4,032
D.C.	5,696	5,173
Florida	60,551	18,142
Iowa	18,282	4,713
Kansas	10,476	3,289
Kentucky	14,284	4,730
Maine	16,395	2,760
Maryland	18,127	18,320
Minnesota	44,155	7,628
Montana	8,845	2,135
Nebraska	19,563	2,221
Nevada	9,320	1,613
New Hampshire	4,087	773
North Carolina	19,164	4,144
Oregon	32,578	6,594
Pennsylvania	35,203	32,571
Puerto Rico	3,341	14,766
South Carolina	27,512	6,361
Texas	10,650	12,290
Utah	11,450	2,240
Virginia	48,608	12,534
West Virginia	10,996	2,024
Wisconsin	72,335	12,501
Total United States	1,217,285	518,851

Note.—Figures are for fiscal 1988. Data for alcohol client admissions in California and Virginia are estimated. Figures for Colorado represent episodes, not admissions. Figures for D.C. are based on provisional year and expenditure reported. For Puerto Rico, alcohol figures include only state agency clientale and drug client admissions data are estimated.

Source: State Alcohol and Drug Abuse Profile, FY 1988. Data are included only for those programs that received funds administered by the state drug agency.

But police officials say that visible evidence of crack and other illegal drug use remains largely limited to a 20-block low-income neighborhood just north of the central business district. And while drug arrests more than doubled last year, at least in part because the city hired more narcotics officers, overall crime—including murders, robberies and burglaries—dropped by 10 percent.

"I don't think the drug problem has increased, but our awareness of what's going on has," said Pete Rounds, chief of the police department's narcotics division.

Mark Horstmeyer, public relations director for the Des Moines school system, said the system in recent years has beefed up its drug education programs, but quickly added: "We don't have a drug problem in the schools. . . . I sometimes think the TV is playing it up a little because they think it's exciting."

Indeed, some students said crack smokers they see on the streets—known here as "geekers"—are mostly in their 30s and are objects of ridicule. "We all make fun of geekers," said Azim Rashad, a 16-year-old junior at Roosevelt High. "The police are trying to say all of Des Moines is filled with dope. I think they're just trying to get some more money."●

THE 100TH ANNIVERSARY OF THE BIRTH OF FORMER U.S. SENATOR MILLARD EVELYN TYDINGS, MARYLAND

● Mr. SARBANES. Mr. President, tomorrow, April 6, marks the 100th anniversary of the birth of one of the most courageous and independent individuals to serve in the U.S. Senate.

Senator Millard Evelyn Tydings was born at Havre de Grace, MD, in 1890, and died there in 1961. During his lifetime, which covered some of the most eventful periods of American history, Millard Tydings served with distinction in the Army during the Mexican border campaign and World War I, as a member, then Speaker of the Maryland House of Delegates, member of the Maryland State Senate, U.S. House of Representatives and then four terms in this body. At the time of his defeat in 1950, following what was later described by a Senate committee which investigated the campaign as a back-street type campaign conducted by non-Maryland outsiders, Millard Tydings had served with honor and distinction in public life for 35 years.

Mr. President, much has been said and written over the years about Senator Tydings' independence. In 1937 he led the opposition in this body to President Roosevelt's plan to pack the Supreme Court. Thirteen years later, as chairman of a special Senate Foreign Relations subcommittee to investigate Senator Joseph McCarthy's charges of Communist influence in the State Department, Senator Tydings

told the Senate that "there was not an ounce of truth" in the McCarthy allegations, which he described as "false and contemptible."

During his four terms in the Senate, he became chairman of the Armed Services Committee as well as a member of the Foreign Relations Committee and Joint Committee on Atomic Energy, Senator Millard Tydings became the third most senior Member of this body in terms of continuous service. He will be remembered for his leadership on innumerable issues and development of important legislation; however, we are all in his debt, in the words of the Washington Post, for "the two momentous occasions when he stood courageously against tides that were running powerfully against the basic principles of democratic government."

Mr. President, I ask that an editorial from the Washington Post recalling Senator Millard Tydings contributions to our Naiton be reprinted in the RECORD at this point.

[From the Washington Post, Feb. 11, 1961]

MILLARD E. TYDINGS

The tall, lean, sandy-haired Marylander who represented his state in the United States Senate for 24 years ending in 1950 has quietly closed his career at his farm in Havre de Grace. In his day Millard Evelyn Tydings was perhaps the best known Marylander in the country. Always a colorful figure and a speaker of great power, he managed to occupy a prominent position in some of the most spectacular fights of his generation. Though it cannot be said that he was always right, he is entitled to an honored niche in history because of the campaigns he waged on basic questions of principle.

In some respects Mr. Tydings was an enigma. In attitude and affiliation, he seemed to be a strong party man. Yet his partisanship had in it a powerful strain of independence. He was one of that courageous band of Democrats in the Senate who in 1937 resisted President Roosevelt's attempt to pack the Supreme Court. Against what seemed to be overwhelming odds, they persisted in their campaign until public sentiment had rolled up an impassable barrier to the measure. When F.D.R. attempted to drive Mr. Tydings from the Senate because of this opposition to an Administration bill, the Senator again won a significant victory.

The same type of courage was again demonstrated when Senator McCarthy went on the rampage with his accusations that 205 or 80 or 57 card-carrying Communists were being harbored in the State Department. It was Senator Tydings who headed the Senate subcommittee that looked into the McCarthy charges and found them to be "a fraud, a hoax and a deceit." For this exposure of the McCarthy nightmare Senator Tydings was bitterly assailed. Charges of "whitewashing the State Department" were carried into the Tydings campaign for reelection in 1950 by Senator McCarthy and others. Indeed, the slander against the courageous Marylander culminated in the circulation of a faked picture of the Senator allegedly conversing with Earl Browder, one-time head of the Communist Party in this country.

This deplorable episode in our political history ended in the election of John Marshall Butler to the Senate. No doubt there were other accumulated grievances against Senator Tydings, but the nature of the campaign against him made the outcome a tragedy for Maryland and for the Senate. There were indications that Mr. Tydings might reverse the decision of 1950 when he became a candidate against Senator Butler in 1956, but an acute case of the shingles forced him to give up the fight before election day. He will be remembered chiefly for the two momentous occasions when he stood courageously against tides that were running powerfully against the basic principles of democratic government.●

CONTRIBUTIONS OF ACADEMIC PUBLIC HEALTH TO DISEASE PREVENTION

● Mr. DURENBERGER. Mr. President, I want to take this opportunity to give special mention to the 24 Schools of Public Health in our country which, over the past 50 years, have made some of the most important breakthroughs in science and medical technology the world has ever known.

This year marks the 50th anniversary of the annual meeting of the Deans of Public Health. To commemorate this important anniversary, the Senate Committee on Labor and Human Resources, on April 24, will hold a special hearing. I am privileged to serve as the honorary chair of this special hearing. And I want to invite all of my colleagues to attend this hearing which will document the impressive track record of these schools.

Mr. President, America's Schools of Public Health are one of our great national resources. The faculty and research staffs of these schools have made unparalleled contributions to improving the health of people throughout the world. I would like to just mention a few of their contributions: First, development of the iron lung, along with research that led to the eradication of polio; second, playing a critical role in the complete eradication—for the first time in history—of a worldwide public health scourge—smallpox; third, discovery of vitamin D; and fourth, development of strategies to eradicate hookworm and other infections, including sexually transmitted diseases. These schools have also provided important insights into the prevention of typhus, trachoma, malaria, and numerous other diseases. Today, many faculty members in these schools are working on AIDS prevention and control techniques, and on identifying and dealing with a host of newly recognized risks such as hazardous waste and indoor air pollution.

Mr. President, the witnesses who will testify at the April 24 hearing are nationally recognized Deans of the leading Schools of Public Health. The witnesses include: Dr. Robert Kane, the University of Minnesota; Dr. Palmer Beasley, the University of Texas; Dr. Jacob Brody, the University of Illinois at Chicago; Dr. Harvey Fine-berg, Harvard University; Dr. Jerrold Michael, the University of Hawaii; Dr. June Osborn, the University of Michigan; Dr. Winona Vernberg, the University of South Carolina; and Dr. Donald Henderson, the Johns Hopkins University. I want to thank the president of the Association of Deans of Public Health, Michael Gemmell, and his assistant, Joan Piculell for assisting congressional staff in arranging for these witnesses to participate in this hearing.

Mr. President, I invite my colleagues to join me in recognizing these accomplishments by attending the April 24 hearing on "Contributions of Academic Public Health to Disease Prevention and Health Promotion."●

TRIBUTE TO MAYER MITCHELL, FIRST ALABAMIAN ELECTED PRESIDENT OF AIPAC

● Mr. SHELBY. Mr. President, it is with a great deal of pride that I rise today to pay tribute to a man who has recently been elected to the prestigious position of national president of the American Israel Public Affairs Committee [AIPAC]—Mayer Mitchell. He is the first Alabamian in the organization's history to hold this post. Being elected to this new position is the most recent honor for this outstanding Alabamian whose life can be characterized by his commitment to his country, State, family, and faith.

From an early age, it was apparent that Mayer Mitchell would be an outstanding Alabamian as well as an outstanding American. After graduating from Wharton School of Finance at the University of Pennsylvania in 1953 with a bachelors of science degree in economics, Mayer joined the battle ranks in Korea and fought for democracy. A young and committed man, Mayer Mitchell served his country courageously as a first lieutenant with the Army and was decorated with distinction. He was honored with a commendation ribbon with medal pendant from the Department of the Army in 1955 for Meritorious Service in Korea. At the young age of 33, Mayer Mitchell was recognized for his unique contributions and awarded the Outstanding Young Men of America Award in 1966 by the U.S. Chamber of Commerce. And in 1970, Mayer was honored by the Jewish Welfare Fund and named Man of the Year.

Upon returning to civilian life, Mayer Mitchell established himself as a well-respected and successful member of the Mobile community. From 1955 to 1986, he served as chairman and chief executive officer of the Mitchell Co. He is one of the owners

of Mitchell Brothers, Inc., a private investment company.

Although business has been an important focus for Mayer, I know that it is not the central component which has shaped his life. Mayer is extremely involved in civic activities, especially with regard to the medical and educational facilities in his community. Mayer Mitchell is known to all as a compassionate and caring man, a good friend, and a concerned citizen who is generous to a fault.

In 1969, Mayer received the startling diagnosis that he suffered from Hodgkin's Disease and was given only a few months to live. The same determination that helped him to achieve success in other areas of his life was the factor that enabled him to beat the odds and survive this almost always fatal disease. As a survivor, he has been an inspiration to many individuals across the country. He has spread his unique "will to live" philosophy and in doing so has impacted many lives.

Not only has he been and inspirational figure to many individuals, he has been concretely involved in advancing cancer research. In honor of the many outstanding physicians who were responsible for his miraculous recovery, he has established several Chairs at medical institutions across the country to further cancer research efforts. These Chairs are located at the University of South Alabama School of Medicine, the University of Rochester School of Medicine, and Stanford University School of Medicine. In addition, he served in 1974 as the industry and commerce chairman for the South Alabama Campaign for the Leukemia Society of America fund drive. He was also elected as the first honorary member of the Mobile Kiwanis Club and presented with that organization's Distinguished Service Award for his generous contributions to the Mobile Kiwanis Children's Cancer Clinic in 1977.

Mr. President, Mayer Mitchell embodies the very characteristics that identify the American spirit—faith, courage, and determination. He is a great source of pride for the State of Alabama and has given Mobile the opportunity to add yet another outstanding citizen to that city's history. I know that I join Mayer's wife, Arlene, his four children and seven grandchildren in sharing their pride in Mayer's many accomplishments. I salute Mayer as a man of great personal character, and I am honored to serve as one of Mayer's Representatives in Washington and even prouder to call him my friend.●

LITHUANIA

● Mr. LEVIN. Mr. President, Lithuania was a free and independent nation for the two decades prior to the Second World War. In July 1922 the United States recognized the Government of Lithuania. During the period between the World Wars, Lithuania was free to exercise its sovereignty as an independent country, a member of the family of nations. This year, Lithuania has boldly and legitimately reclaimed its place among the nations of the world.

In 1939, Lithuania, Latvia, and Estonia were forcefully and illegally annexed by the Soviet Union as the result of the secret Molotov-Ribbentrop pact between Hitler and Stalin. The United States did not, and has never, recognized this illegal annexation, and every President and Congress from Franklin Roosevelt through George Bush have rightfully denounced it.

Last year, on the 50th anniversary of the Stalin-Hitler pact, a Soviet parliamentary commission officially acknowledged for the first time the existence of the pact, and its illegality. The commission found that the pact was contrary to international law because it violated the sovereignty of other states.

Just last week at the Soviet Embassy here in Washington, the deputy head of the Soviet delegation to the United States repeated the official Soviet position that Lithuania had the right to be an independent and sovereign nation if it so desired.

It has been the proper and appropriate position of the United States and the American people over the years that Lithuania is a sovereign nation under Soviet occupation. The United States never withdrew its recognition. In the hearts of Lithuanians and in the hearts of people everywhere who cherish freedom, Lithuania never lost its claim—never lost its right—to its freedom and independence.

On March 11, 1990, the freely elected representatives of the brave and proud people of Lithuania once again asserted their right to their proper and legitimate place as a free and independent nation.

Our administration should do all it can to urge the two nations involved—Lithuania and the Soviet Union—to meet and negotiate a peaceful and political resolution to their differences. A peaceful solution needs to be found.

All Americans condemn the current display of Soviet military might in Lithuania in an attempt to intimidate the Lithuanian people and their new government. Military threats and ominous displays of power will not extinguish the Lithuanians' just demand for freedom. It is a heavy-handed reaction fearing freedom, and Moscow needs to understand that it is unacceptable.

But we should do more than condemn Soviet displays of might. The United States should reiterate to the Soviet Union and the world that we never withdrew recognition of Lithuanian sovereignty. Simply stated, the United States should inform the Soviet Union that the sovereignty and legitimacy of the new, freely elected, Government of Lithuania is a given fact that cannot be denied, and cannot be negotiated.

The United States should inform the Soviet Union in clear, firm, and honest terms that it is important to the future of American-Soviet relations that representatives of the Soviet Union and Lithuania meet and negotiate. The Soviet Union has acknowledged the illegitimate nature of the Hitler-Stalin pact which led to the Soviet occupation of the Baltic nations. It is now a question of when and how the Soviet Union and Lithuania restructure their relationship. The United States should make it clear we support efforts to correct the historical crime of Stalin's illegal conquest and occupation of the sovereign nation of Lithuania. In this context, the administration should support the independence of Lithuania, and recognize the new government as the sole legitimate government of a free and independent Lithuania.

This is not an anti-Gorbachev suggestion, since the Soviet Union has repeatedly said its republics have the right to independence. This is a profreedom proposal. This is a proposal that reflects America's own ideals, and a proposal that reflects the historical fact that Lithuania was illegally occupied by Stalin in 1940 and remains illegally occupied to this date.

The desire for freedom never died in the hearts of the Lithuanian people. Lithuania is once again at a crossroads. But so is the world. The embers of freedom never died under the repressions of the 20th century, and the fires of freedom now burn strongly. The American people worked and died for that, and we must not waver now.●

THE CASE OF SOVIET REFUSENIK VLADIMIR TSIVKIN

● Mr. LEVIN. Mr. President, as part of the continuing Congressional Call to Conscience Vigil, I would like to present the case of Mr. Vladimir Tsivkin, a Soviet Jewish refusenik from Leningrad.

Vladimir Tsivkin has not worked in his classified position as an engineer/chemist since 1978. The family's first application for permission to emigrate was made in 1979, and refused on the grounds of "state secrecy." Applications in 1980 and 1981 were also denied.

The Tsivkins were again refused permission to leave in 1988. However, in March 1989, they applied for and received permission to emigrate. Vladimir and his wife Irina left their jobs, sold most of their belongings and

turned in their official documents. Eight days later, OVIR informed them that permission was given by mistake and was rescinded.

In July 1989, Vladimir Tsivkin was issued a visa to take part in a human rights conference in Paris. The family took this as a signal that, perhaps, they might finally be given permission to emigrate. Not only was permission denied again, but Mr. Tsivkin was told that the earlier permission to travel to Paris had also been a mistake.

Vladimir Tsivkin no longer has his military card, without which he cannot earn a living. Lack of this card also makes him liable for criminal prosecution. The Government has stated that the Tsivkins' request for emigration will be considered no earlier than 1995.

Because of the recent sharp rise in anti-Semitism which generated concern for their daughter's life, the Tsivkins have decided to emigrate separately. Irina and Susanna were recently granted a tourist visa, and decided to leave the Soviet Union permanently—they now live in Stamford, CT. Vladimir is still in the Soviet Union. His very survival now depends on being able to leave the Soviet Union, as he has adenoma of the thyroid, and appropriate treatment is not available to him there.

Mr. President, the urgency of this case is evident. I know our colleagues will join me in urging the Soviet Government to look upon Mr. Tsivkin's case favorably, and to do so as soon as possible.●

THE RETIREMENT OF ED KOLPACK, FARGO FORUM SPORTSWRITER

● Mr. CONRAD. Mr. President, I rise today to note that Ed Kolpack, a major voice in North Dakota sports reporting, is retiring from the Fargo Forum after 38 years.

At the outset, let me offer one perspective on Ed Kolpack's dedication to North Dakota sports and the Fargo Forum. I was 4 years old when Ed started covering sports and writing stories for the Forum.

In that time, Ed has covered a lot of big-time sports. He covered the Minnesota Vikings when they were known as the Purple People Eaters. He covered the Minnesota Twins when the lineup boasted the likes of Harmon Killebrew, Tony Oliva, and Rod Carew. Ed was at Yankee Stadium—the house that Ruth built—the day the team honored the man who broke Babe Ruth's well-known record of 60 home runs in a season, Fargo's own Roger Maris. Ed was there, and got a long and satisfying taste of what some sports people call The Show.

But interviewing some of the greatest names in sports and reporting their performances is only part of what makes up Ed's legacy in North Dakota. He said that he always preferred hometown sports and writing about athletes in his own backyard. He will be remembered for that, and for giving attention, resources, and space to young athletes born and bred in North Dakota.

Ed also will be remembered for his reporting, which I have admired both as a reader and member of a newspaper family. What's distinguished Ed's reporting is accuracy, attention to detail, and balance. As Ed told a Fargo Farm writer:

> As a reporter I am the eyes of some of the fans who could not attend a game. The next step, as a columnist, is to give my opinion on certain things. I have received my share of letters that were not very complimentary, but that goes with the territory. I just tried to be fair.

Perhaps another reason for Ed's achievements as a sports writer and editor has been his ability to listen to the hundreds of coaches and athletes he's watched through the years. It has been that talent, combined with his quite enviable ability to write, that has formed countless stories in the Fargo Forum.

Mr. President, as Ed Kolpack writes his last stories for the Fargo Forum this week, he leaves North Dakotans with thousands of memories and impressions. It is quite a legacy, between his reputation as a journalist and the thousands of stories and columns he has written. He left another legacy to North Dakotans, too, one that tells worlds about the kind of man Ed Kolpack is.

Two of Ed's sons have followed him into journalism and both are sports writers. His son Dave has literally followed his father's footsteps—right to the sports desk of the Fargo Forum. Another son, Jeff, is a sports writer for the Bismarck Tribune. Kolpack is a byline North Dakotans will be reading for years to come.

As Dave Kolpack said:

> The thing that impressed me most about him is his writing is so clean. He doesn't waste a word. I don't know of anyone who is so economical in his writing. Not everyone agrees with his style. But to me he's just the essence of a professional journalist.

Thank you, Mr. President. I yield the floor.●

HUNGARIAN DECISION TO CONTINUE FLIGHTS TO ISRAEL FOR SOVIET JEWS

● Mr. KOHL. Mr. President, the New York Times and the Washington Post reported this week that Malev, the Hungarian airline, has reversed its recent decision to suspend flights to Israel for Soviet Jews. I would like to congratulate the Hungarians for their courageous action in the face of terrorist threats.

Even as Jews are being permitted to leave the Soviet Union in unprecedented numbers, they face increasing obstacles to their efforts to actually leave the country. Moscow refused to follow through on the Aeroflot-El Al agreement to provide direct flights from the U.S.S.R. to Israel. Then, in response to threats from Arab terrorists, Hungary announced that it would no longer honor tickets from Jews emigrating through Budapest.

The Post stated that—

> Budapest became the largest single transit point early this year for the large and controversial wave of Soviet immigration to Israel . . . Israeli press reports have said about 65 percent of the immigrants from the Soviet Union were traveling to the country through Budapest.

Understandably, the loss of Budapest as a transit point caused alarm throughout the Jewish community. This additional hurdle came at a time when reports from the Soviet Union indicated widespread increases in anti-Semitic activity.

The reversal of the Hungarian decision this week is welcome news for all Jews trying to leave the Soviet Union. Like the Poles, who recently agreed to allow charter flights for Soviet Jews to Israel from their country, the Hungarians have bravely shown the world that they will not let terrorists dictate policy. Our governments need to work together to send this message to would-be terrorists across the globe, rather than acquiesce to their demands. Mr. President, I hope that all my colleagues will join me in commending the Hungarians for helping to ensure that glasnost exists not just in theory for Soviet Jews, but also in practice.●

GLOBAL WARMING: WHAT CAN THE WORLD'S LEGISLATORS DO ABOUT IT?

● Mr. BOSCHWITZ. Mr. President, this body last August authorized seven of its members, including myself, to host an international conference for parliamentarians on global warming and other related environmental issues. The formal name of this conclave is the Interparliamentary Conference on the Global Environment. The conference, with my friend AL GORE chairing the U.S. delegation, will take place in Washington at the end of this month, just a week after Earth Day 1990. We anticipate that upwards of 150 legislators from over 30 countries will be taking part—in addition to our Senate group and a delegation from the House.

Nowadays, global warming meetings seem to be a growth industry in Washington. Just what do we seven Senators representing the United States hope to accomplish? Well, first of all, we see a need for sharing information among a variety of men and women who are directly elected political leaders in their own countries—leaders in

touch with the pulsebeat of their citizens, leaders who can influence opinion and push for necessary political actions by their governments.

Our goal is not necessarily for legislators from the other nations to embrace 100 percent the "American" point of view. We want, however, to share with our foreign counterparts what we and the best U.S. scientists know and can conjecture upon—to initiate a continuing dialog on what is known about global climate modification and about the prospects for drastic changes in all our lives.

Current worldwide climate changes will most likely lead—if not in our lifetimes, then in those of our children—to warmer temperatures, less participation, lower soil moisture, and consequent declines in farm production—at least in our country—and large ecological tolls. Many islands and low-lying lands may be flooded. Agriculture, wildlife, river transport, and water and energy supplies are bound to be influenced, in many cases adversely.

Most of you have heard these horror stories before, as well as some skepticism implying maybe it is all a fabrication of some wild imaginations. The global warming theory is still just that—a theory, a hypothesis attempting to relate plausibly a set of causes and effects with consequences of utmost importance for the quality of life of our Earth's billions of people and for the children and grandchildren of today's billions. But considerable data indicate a definite relationship between so-called greenhouse gas emissions and recent upward movements in themometers around the world.

Reputable scientists still are not certain whether or not the few heatwaves of the last decade are definitely part of a long-term weather trend which will irrevocably change all of our and our children's patterns of farming and housing, and, for that matter, of the whole way we live and work together. So at the outset, we want to share what we know. We want to learn what others know. We want to share not only the facts, but also mutual concerns.

We obviously have to continue our research on global warming, and on just how serious its consequences might be for us. But one thing is sure. We cannot wait until we have complete scientific proof. If we wait until all the results are in, it could be too late for all of us. We have to take further decisive actions now and in the years ahead if we want to get ahead of the curve. That's why we have been working on the clean air bill. That is why we will probably amend the Montreal Protocol on eliminating CFC's. That is why we and other countries must take further steps very soon to reduce emissions and protect our precious heritage.

In my view, global climate change, and what this change means for all of us and our heirs, is potentially the single most important environmental problem we face today. If current predictions are right—or even come close—on upward temperature change and on related problems, such as air pollution, ozone depletion, and energy scarcity, the legislators of the world have quite a task in front of them.

What we legislators of the globe will have to grapple with later on this month in our conference here—is how to protect, on the one hand, our granaries from depletion and our coastal lands from flooding, and, on the other, to face up to the need, already underway, to restructure our industries, our transportation, our whole life and work styles.

We legislators will discuss the responsibilities and obligations of all our countries to solve these common problems. We will explore prospects for setting up ongoing professional networks of continuing education. Most importantly, we will have an opportunity to start developing a political consensus for a blueprint of corrective actions available, both globally and to individual countries, and to agree on potential next steps to protect the world's common environmental heritage.

I anticipate a very interesting and hopefully useful meeting. Tune in next month, and we will give you the initial results.●

GOOD DEEDS IN A CENTENNIAL YEAR

● Mr. WALLOP. Mr. President, several weeks ago, I joined with my colleague from Wyoming, Senator SIMPSON, in introducing a resolution regarding the Wyoming centennial. During 1990, the people of Wyoming will undertake a variety of projects to celebrate our 100 years as a State. There will be a wagon train from Fort Caspar to Cody. In my hometown of Sheridan, we will have a western film festival. Many great western films, such as "Shane," were filmed in Wyoming. And, in Cheyenne, the Frontier Days clebration will be bigger and bolder than ever.

Not all centennial events are devoted to fun and frolic. There is a more serious side to our celebration of statehood. During this special year, people throughout Wyoming will participate in voluntary projects to improve their communities and assist those less fortunate. One voluntary project was recently organized by the medical staff of DePaul Hospital in Cheyenne. Each physician's office has agreed to provide free medical care to the medically indigent in the community. The medical staff has set up a program to coordinate this service.

This effort by the DePaul medical staff demonstrates the two sides of the pioneer spirit which built Wyoming. The physicians have forged ahead on their own without any government mandates or support to undertake this project. And, they have responded to a serious problem in their community. Many pundits deride rugged individualism and community spirit. However, these are the characteristics that made my State. It is good to know that these values are still strong in Wyoming.●

COORDINATING SERVICES IN CREATIVE WAYS: DAMIANO CENTER HELPS PEOPLE HELP THEMSELVES

● Mr. BOSCHWITZ. Mr. President, I rise today to bring an article about the Damiano Center to the attention of my colleagues.

The article identifies the Damiano Center—located in Duluth, MN—as an example of a successful public-private partnership. The center operates a soup kitchen, a clothing exchange, a job program, and distributes food through the Federal Temporary Emergency Food Assistance Program. Last year they also operated a food stamp training program. About 10 percent of the Damiano Center's budget comes from Federal sources with the remainder coming from private sources.

The Damiano Center and four other nonprofit agencies form a network to address hunger problems in Duluth. This coalition works together to find ways for low-income families and individuals to help themselves.

I commend the Damiano Center for its efforts to assist those in need in their local area. As the senior Republican on the Senate Nutrition Subcommittee, I have long believed that private sector initiatives are vital in the fight against hunger in our country.

I ask that the article from the Food and Nutrition magazine be printed in the RECORD.

The article follows:

COORDINATING SERVICES IN CREATIVE WAYS—DAMIANO CENTER HELPS PEOPLE HELP THEMSELVES

(By Mary Jane Getlinger)

From the "Land of Sky Blue Waters"—Minnesota—comes a model of a successful public-private partnership working toward a common goal of food self-sufficiency. Damiano Center is located in Duluth, Minnesota, and forms a network with four nonprofit agencies which address the problems of hunger in Duluth.

Founded in 1982, Damiano Center is a private, not-for-profit corporation that provides networks with other private, nonprofit agencies to help poor people who need food, shelter, or clothing.

"Our goal is to create a coalition of agencies working to provide low-income people with ways to help themselves," says Jim Dwyer, program coordinator for Damiano Center.

Although non-denominational, Damiano Center is based on the ideals of the San Damiano monastery, where St. Francis of Assisi received his calling to go to work among the poor. The center is housed in an old Catholic grade school building owned by the Catholic Diocese of Duluth. The Diocese allows Damiano Center to use the building rent free.

Duluth (population 84,000) stretches 23 miles along a mountain bordering Lake Superior. The city's primary products relate to its resources and its position on Lake Superior.

Across the St. Louis River lies Duluth's sister city, Superior, Wisconsin (population 32,000). Much flatter than her sister, Superior has many of the railyards which serve the region, and is a trucking center for foodstuffs. Together the two cities are a major port where ores, grain, and other bulk cargoes are shipped throughout the world.

Years ago, the livelihood of the northland people was tied to the land's resources—mining, logging, and fishing. Although these industries still remain strong, the focus has shifted.

Today there are more than 18,000 low-income households—roughly 41,000 people—in St. Louis, Lake, Cook, Koochiching, Itasca, and Carlton counties in Minnesota who use the services offered by the center and its coalition agencies. An additional 3,200 low-income households, or about 8,000 people from Douglas, Ashland, Iron, Price, and Bayfield counties in Wisconsin, also take advantage of coalition services.

"Damiano Center is based on the belief that the best hope for eliminating hunger is in actively working with people, enabling them to provide food for themselves," says Jim Dwyer's brother, Paul, who coordinates food stamp outreach and the Temporary Food Assistance Program (TEFAP) at the center.

"Once their basic food needs are met, we try to create opportunities for low-income people to learn to be more self-reliant."

HELP WITH FOOD, CLOTHES, JOBS

Damiano Center's soup kitchen, clothing exchange, and Handy Hands jobs program provide immediate assistance. "If someone needs a meal or clothing, our volunteers will assist—immediately," says Jim Dwyer.

Soup Kitchen coordinator Jean Gornick says the kitchen has plenty of volunteers. Many churches in the area provide cooking staff—a head cook and 6 to 10 helpers 1 day each month. Grade schools, confirmation classes, Outward Bound groups and other service organizations also volunteer.

Last year the kitchen served nearly 53,000 meals on a budget of $77,000. The kitchen serves all-you-want-to-eat meals at 11:30 a.m., 5 days a week. Two paid workers manage the kitchen, set up the menus after surveying the foods available that day, and arrange for volunteers to do the cooking.

The Handy Hands jobs program offers the community a day labor service and gives people eager to work opportunities to make some money. The program offers jobs such as painting, unloading trucks, distributing and harvesting food, and cleaning.

"Handy Hands teaches the importance of showing up for work" says Jim Dwyer. "It gives people some pocket money for the bus fares or food on the days the kitchen does not operate. If workers prove to be reliable, Handy Hands will push for full-time employment and provide needed references."

The center also has donated clothing available for those who need it."We distributed 100,839 clothing items last year to 16,500 people," says part-time clothing exchange coordinator Clare Ritchie.

MONEY COMES FROM PUBLIC, PRIVATE SOURCES

Damiano Center's $225,000 budget is funded 40 percent from private donations, 30 percent from private foundations and 20 percent from other agency sources. The remaining 10 percent comes from federal sources, including the Federal Emergency Management Agency, Housing and Urban Development community block grants, and USDA's Food and Nutrition Service (FNS) food assistance programs.

"Although our center receives only 10 percent funding from governmental agencies," says Jim Dwyer, "Our interaction with government programs is even greater because we assist people using the center in applying for and receiving federal aid."

The Damiano Center has been responsible for distributing USDA-donated foods through TEFAP (the Temporary Emergency Food Assistance Program) in Duluth since 1983. Since that time Damiano has set up 83 distribution sites in Duluth to allow easy access at a minimal cost for the elderly.

"This was especially important in Duluth because of the steep hills," says Paul Dwyer. "It is next to impossible for an elderly individual to carry a 20-pound bag of food up or down one of these hills in the winter, so we set up a network of volunteers to take commodities to the highrises for distribution."

TRAINING PEOPLE TO HELP PEOPLE

"The most unique approach we use at Damiano is that we train our recipients to help other members of their family, friends, or neighbors to utilize programs they qualify for," says Jim Dwyer.

For example, last year Damiano Center worked closely with the Food and Nutrition Service field office staff in Superior, Wisconsin, to set up a food stamp training program in Duluth. The pilot project now has 144 trained volunteers, of whom 81 percent are food stamp recipients.

New volunteer training and refresher classes are held bi-weekly at the center on the correct use of food stamp forms. Volunteers are taught how and why to accurately fill out each question on the food stamp application, and how to secure necessary documentation.

The training helps caseworkers as well as applicants. "Any time a person comes into our office with an application which is completely and accurately filled out, it helps the caseworker," says Arlene Bjorkman, St. Louis County food stamp administrator. "We know the client has a better understanding of the questions. There will be fewer errors."

The Dwyers believe 520 households were helped by food stamp volunteers from September 1987 through April 1988.

"We also made a big push for the Minnesota state legislature to implement a plain language law that will require that all state application forms and notices be written for seventh grade reading comprehension level," says Paul Dwyer. "Keep it simple—people who understand do not make errors."

NETWORKING IS KEY TO SUCCESS

The Duluth Hunger Coalition links Damiano Center, the Food and Nutrition Council, the Community Garden Program, and the Central Hillside United Ministries.

"The decision to link the agencies into the coalition was formalized in 1984 to expand networking and to increase accessibility to outside resources," says Jim Dwyer. "The network helps move people from immediate need to longer term self-sufficiency."

A quick look at some of the other components of the coalition networks:

The Food and Nutrition Council provides nutrition education for low- and moderate-income families.

The council also has a resource center or pregnant teenagers, provides food consultants to teach nutrition and food preparation at the emergency food shelves, and operates a cannery program, providing equipment and hands-on instructions in safe food preservation techniques.

The Duluth Community Garden Program provides 3½ acres divided into 15 garden plots throughout the city and offers gardening instruction for low-income families. "The plots are fertilized, tilled and ready for planting," says Mary Beth Nevers, Community Garden executive director. "We also provide a tilling service to more than 250 elderly or low-income gardeners who have access to their own plots. About 135 households use the 15 community plots."

The garden program also purchases bulk seeds in the spring. Volunteers package the seeds and sell packets to gardeners for 10 cents each. The Agricultural Extension Service holds workshops on gardening techniques, and experienced gardeners are available to answer questions.

The Central Hillside United Ministries administers the Emergency Food Shelf, the First Street Drop-In Center, Fare Share Program, Men's and Women's Sleeping Shelters, and the Food Accessibility Program.

Each year the Emergency Food Shelf provides a 5-day food supply in crisis situations to some 8,000 individuals and families. People using this service generally live independently and are able to prepare food themselves.

The First Street Drop-In Center is an informal, supportive, chemical-free setting for street people and those with drug problems, perhaps the community's most vulnerable population. The Drop-In Center offers a safe haven, with coffee, bakery goods, and sandwiches for guests.

Fare Share is a self-help food distribution system where people work together to lessen their food shortage problems and to save money. There are no eligibility requirements or screening processes. Participants pay $12 (cash or food stamps) and do 2 hours of community volunteer work each month. In exchange they receive a food package valued at $25 to $40.

The main work of the Food Accessibility Project is to refer individuals to food assistance programs, help them through food program application processes, and counsel them about food buying and menu selections.

THE COALITION'S NETWORK IN ACTION

An example of coalition networking would be Damiano soup kitchen users enrolling in Food and Nutrition Council cooking classes to learn about low-cost nutritious foods and ways to expand the buying power of food stamps.

While taking cooking classes, clients receive information about the Community Garden Program. Some choose to apply for and use a community garden to growh fresh produce for themselves throughout the summer. The Food and Nutrition Council's cannery is available to help gardeners preserve produce for the winter.

"Workshops have been set up to help other northern Minnesota communities follow the Duluth Hunger Coalition networking pattern," explains Jim Dwyer.

"We teach these communities how to form a coalition similar to ours."

"The Damiano Center will stay in operation as long as there is a need for our services. When that need no longer exists, we will be satisfied that our job is done," say the Dwyers.

For more information about the Duluth Hunger Coalition and the Damiano Center contact: Jim Dwyer, Program Coordinator, Damiano Center, 206 West 4th Street, Duluth, Minnesota 55806.●

DESERET NEWS ENDORSES CONGRESSIONAL TERM LIMITATION

● Mr. HUMPHREY. Mr. President, many opponents of congressional term limitation like to point out that 56 percent of the current Congress has been elected since 1980. They would further add that in the last election, 38 new Members were elected. I would note, however, that of those 38 new Members, only 7 defeated incumbents. The rest won open seats. That is the rule of thumb nowadays: Never run unless the seat is open.

Mr. President, deaths, resignations, retirements, and races for other office account for the majority of the congressional turnover. Further, those who remain by choice, are those who have accumulated all of the power. The average tenure of a chairman of a House committee is 26 years, and of a Senate committee, 20 years. The Chairman of the House Appropriations Committee is in his 49th year, and the chairman of the Senate Appropriations Committee is in his 32d year. Yes, there may be a decent turnover, but there are many who wish to remain, and the system is rigged in their favor.

Mr. President, I ask that an outstanding editorial from the Deseret Mountain News of Salt Lake City, UT, be entered in the RECORD immediately following my remarks. I continue to urge my colleagues to join in this far-reaching, fundamental reform of Congress:

The editorial follows:

[From the Salt Lake City (UT) Dessert News, Feb. 21-22, 1990]

IS IT TIME TO IMPOSE A LIMIT ON TERMS IN CONGRESS?

A few years ago, the Utah Legislature went on record favoring a constitutional amendment that would let members of Congress serve no longer than 12 years.

The plan had plenty of grass-roots support, with Deseret News polls showing that 68 percent of the people in Utah favored limiting the length of time that U.S. senators and representatives may serve.

Though the plan went nowhere, it isn't dead yet.

A new nationwide Gallup poll shows that 70 percent of the American people would like to limit how long members of the U.S. House and Senate can serve.

Asked specifically about a 12-year limit—six terms for House members and two terms for senators—58 percent favored that.

The latest poll and the persistence of support for the proposed limit on its members' terms should send a strong message to Congress.

The message is one of deep, lasting dissatisfaction with Congress performance.

The idea behind the proposal is that with more turnover among its members, Congress would get fresher ideas, the power of special interests would be diminished.

Further, this nation's lawmakers would be more willing to make tough decisions based on what's best for the country rather than just what would get them re-elected.

What's more, since the adoption of the 22nd Amendment limiting presidents to two terms in the White House, it has become harder to object to some kind of limit on terms of service in the legislative branch of government, too.

The trouble with both such limits is that they artifically keep the voters from retaining exceptional public servants in office.

Moreover, it can be argued that as domestic government and international relations have become increasingly complex, it takes longer than it once did for public servants to become expert in various issues.

Despite such objections, the fact remains that the public is becoming increasingly soured on Washington, particularly Congress. Why?

Because of the repeated scandals involving members of Congress. Because of the lawmakers' continuing reluctance to make the government live within its means. Because the lawmakers had to bribe themselves with a pay raise just to get themselves to do the right thing by abandoning payments from special interests.

And because the advantages of incumbency are so strong that it's hard to pry a member out of Congress once he or she is in. The return rate for House members who seek re-election is more than 98 percent. In the Senate, the figure is somewhat lower but still daunting to potential challengers—75 percent.

Yes, plenty of lawmakers complain about the "financial hardships and sacrifices" of serving in Congress.

Some hardship. Some sacrifice. The lawmakers' income is higher than that of about 99 percent of their constituents. No wonder that the Capitol Hill newspaper Roll Call recently noted that at least 12 former members of Congress plan to try for a comeback this year.

Anyway, the meaning of the new poll and the others that preceded it should be clear: If Congress won't reform itself, the public could start imposing sharp limits to how long this nation's lawmakers can stay abroad the gravy train.●

HOME HEALTH CARE DEMONSTRATION PROJECTS

● Mr. D'AMATO. Mr. President, I rise today to join my distinguished colleague from Utah [Mr. HATCH] as a cosponsor of S. 2342, legislation authorizing additional grants under the Health Care Services in the Home Demonstration Program. I commend my colleague for his efforts to expand this worthwhile program.

Congress included this program in the Older Americans Act Amendments of 1987 in an effort to find new ways to provide home health care to low-income persons who might otherwise require lengthy hospital stays or institutionalization. To date, grants have been awarded in five States, allowing numerous chronically ill and disabled individuals to receive vitally needed services.

Among the beneficiaries of the program have been technology dependent children; migrant farm workers; people with AIDS, hypertension, or diabetes; and the frail elderly. The advantages of the case-managed approach embodied in the program are well stated by the director of one State project, who said, "patients and their families have liked this home health care option. They feel that they have more control over their lives and they feel better being at home. Often the family can feel overwhelmed having the ill family member in the home, but to have someone on the case to call and reassure them and offer support makes all the difference in the world."

I think the decision of Congress to establish this program was both farsighted and compassionate. Unfortunately, no more than five 3-year grants were authorized under the provisions of the 1978 Act. I believe it would be unwise to allow these grants to expire after only 1 year of development and 2 years of providing services. In fact, in light of the many questions that remain to be answered about how best to coordinate home care services among community health care providers, I think it is vital that we expand this program to all States.

Once again, I commend my colleague from Utah for his commitment to the concept of providing health care in the home, and I urge my colleagues to join me in supporting his worthwhile legislation.●

TRIBUTE TO JAMES HERMAN FAULKNER

● Mr. SHELBY. Mr. President, Mr. James Herman (Jimmy) Faulkner, vice chairman of the board of David Volkert & Associates, Engineers and Architects, is a gentleman, scholar, businessman, and patriot. I would ask that my colleagues join me in honoring this great and selfless Alabamian.

Montgomery, AL, has proclaimed April 20, 1990, a "Day of Tribute to Jimmy Faulkner," an honor he richly deserves.

James Herman (Jimmy) Faulkner has earned his reputation as a scholar and friend of education in Alabama and across the United States. After attending Freed-Hardeman College he earned his BJ degree from the University of Missouri in 1936. Because of his distinguished service as a journalist and supporter of higher education, he is also the recipient of doctor degrees from Freed-Hardeman College, Livingston University, AL, Christian College, Oklahoma Christian College, Jones

School of Law, and the University of North Alabama.

Mr. Faulkner has indeed been a lifelong friend of higher education. For many years he served on the board of directors for Alabama Christian College and Faulkner University. He has also served many years as chairman of James H. Faulkner State Junior College, as well as the Public Educational Building Commission of Bay Minnette, and the Alabama Commission on Higher Education. In 1982, he was given the Exemplary Dedication to Higher Education Award by the Alabama Association of Colleges & Universities.

Mr. Faulkner has served his State and Nation well. As mayor of Bay Minette from 1941 to 1943, he was, at the age of 25, the youngest mayor in America. A veteran, he served during World War II as a combat pilot in the Air Force. Returning from war, he continued to serve his fellow citizens as State senator from Baldwin, Escambia, and Monroe Counties from 1950 to 1954, being chosen as Most Outstanding Freshman Senator in 1953.

A lifelong Democrat, he has traditionally played a significant role in the party. A member of the Baldwin County Democratic Executive Committee from 1936 to 1978, and the State Democratic Executive Committee in 1948, he was finance chairman for the Alabama Democratic Campaign in 1976.

I am proud to be associated with James Herman (Jimmy) Faulkner. I am proud to be honored with his friendship. He represents much that we hold dear. I would ask my colleagues to join me in saluting this truly great American.

Jimmy Faulkner is not only a valued educator and public servant, he is also an important radio executive and former newspaper publisher. He has owned and published the Baldwin Times and copublished the Onlooker and the Fairhope Courier.

The youngest person ever elected director of the Alabama State Chamber of Commerce in 1945, Mr. Faulkner is the epitome of the American businessman. He earned positions as chairman of the Board of Alpine Laboratories in Bay Minette, president and founder of Loyal American Life Insurance Co. in Mobile, AL, president and director of the Gulf Area Insurance Agency, director of the Baldwin National Bank of Robertsdale, AL, and director of the First National Bank Fairhope, AL. Additionally, this amazing businessman was president of Faulkner Radio, Inc., from 1958–85.

Honors have rained on Jimmy Faulkner. He's listed in Who's Who not only in the South and Southwest, but also in America, as well as World Commerce. He's been chosen as one of 12 outstanding Young Men in America in 1942, received an outstanding citizen award from the Bay Minette Jaycees, and chosen as Weekly Newspaper Journalist of the Year by United States Steel in 1966. Sigma Delta Chi awarded him with a certificate of appreciation, and an appreciation award from North Baldwin Hospital Board for outstanding service as chairman of the North Baldwin Hospital Board from 1965–73.

Over 200 years ago, 40 of our forefathers signed the Constitution of the United States. Like James Herman (Jimmy) Faulkner, these men served their Nation well. Among them were men who would become judges, representatives, senators, cabinet ministers, and ambassadors. One would become our first President. All committed themselves to a lifetime of service to their fellow citizens. Such a man is James Herman (Jimmy) Faulkner.

Active with his church, as well as the Boy Scouts, Mr. Walker also has a beautiful family: his wife, Evelyn, his sons, James Herbert and Henry Wade, and a number of wonderful grandchildren. I share with them their pride in this great man.

I could go on and on listing the contributions this gentleman has made to Alabama and our Nation. There is so much I have not mentioned—his service with the Alabama Institute for the Deaf and Blind or his work with American Cancer Society, or with the Alabama Safety Council, Bay Minette Housing Authority, the Agriculture Hall of Fame, the Industrial Development Board for Bay Minette, and much, much more. Suffice it to say that I have tried to demonstrate to you, my dear colleagues, that Jimmy Faulkner has served his State and and his country well.

A fine American, a loving family man, a devout Christian, I am thankful Alabama can claim Jimmy Faulkner as a native son.●

H.R. 4404, SUPPLEMENTAL APPROPRIATIONS

● Mr. MURKOWSKI. Mr. President, earlier this week the House passed H.R. 4404, the fiscal year supplemental appropriations bill. This legislation contains funding for important veterans programs. I understand that the Senate will consider this bill after the Easter recess and I urge my colleagues to take up this bill in a prompt manner.

Of significance are the following supplemental increases:

Veterans Benefits Administration: Compensation and pension of $190 million; loan guaranty revolving fund of $150 million.

Veterans Health Service and Research Administration: Medical care of $50 million; medical administration of $1.3 million; and

General administration of $1 million.

The funds appropriated will most certainly have a salutary effect on the Department of Veterans Affairs. It will result in increased personnel to administer the various programs and activities of the Department so that VA may reduce the waiting period for the delivery of benefits and services.

In the medical care area, the funds will be used to support increased staff—which results in more medical care treatment for veterans. Many have argued that the proposed $50 million increase is not enough. They may be right. However, we live in a difficult fiscal climate and we may not always get all we want. Given that reality, I urge my colleagues to support H.R. 4404 when it is considered by the Senate.●

NO MORE SLIDE-BY BUDGETS; IT'S TIME FOR A BITE-THE-BULLET BUDGET

● Mr. HOLLINGS. Mr. President, I have examined the President's budget and the various proposals percolating to the surface here in the Senate. More than ever, I am frustrated that political Washington is frozen in fiscal gridlock.

Indeed, the whole country seems comfortably resigned to the budget box we are in. We accept that no one—Democrat or Republican—can show leadership on the critical issues of the day because the Government is broke. Alone, interest costs on the national debt are increasing by up to $30 billion each year, all of it down a rabbit hole. As Alice learned to her dismay: "It takes all the running you can do to keep in the same place. If you want to get somewhere else, you must run at least twice as fast as that."

To do that, Mr. President, to "run at least twice as fast," entails painful budget cuts and major tax increases. Only traumatic intervention can save the patient, and to that end I offer today my own budget plan for fiscal 1991.

But, Mr. President, before we jump to the treatment, let's be clear about the diagnosis.

First, Gramm-Rudman-Hollings is the cure not the cancer. Some say that Gramm-Rudman-Hollings is the problem because it has spawned a brood of budget tricks and dodges: assets sales, payday shifts, and so on. Their cry is, "Get rid of Gramm-Rudman-Hollings and we can get to truth in budgeting." Wrong. Gramm-Rudman-Hollings is truth in budgeting—that is why it is such a nuisance. Gramm-Rudman-Hollings is not the problem; the problem is our failure to bite the bullet on spending and taxes. The solution is simple: Just meet the Gramm-Rudman-Hollings targets and Gramm-Rudman-Hollings will disappear all by itself.

Second, Mr. President, let us be clear that the budget fraud is blissfully bipartisan. This year as in past years, the President and Congress are in unholy cahoots. The Congressional Budget Office gives an honest estimate of the 1991 deficit at $161 billion, requiring a reduction of $97 billion to meet the target, G-R-H target, of $64 billion. But the Office of Management and Budget concocts a dishonest deficit projection of $101 billion requiring only $37 billion in reductions.

With this fake starting line provided by OMB, the President's task is easy: cut $3 billion from defense, $12 billion from entitlements, and add $14 billion in revenues plus $8 billion in asset sales and user fees—voila. And now, the Democrats are about to join the fraud by embracing OMB's $101 billion deficit projection and proposing $15 billion in defense cuts, $15 billion in revenues and a mix of $7 billion in savings from Medicare, user fees, et cetera.

Same act, same players, same monkey business. Last year, we adjourned at Thanksgiving congratulating each other on passing a deficit of only $100 billion, but today the deficit has swelled to $159 billion. If this is budget chastity, I would hate to see budget promiscuity.

Third, Mr. President, the fact is that our colleague Senator MOYNIHAN laid bare the blarney on Social Security. He said let us stop stealing wholesale from the Social Security trust fund in order to mask the deficit, and let us put Social Security on a pay-as-you-go basis.

With the latest payroll tax increase on January 1, surplus Social Security revenues are now accumulating at a rate of $1 billion a week, rising to $2 billion a week in 1993, $3 billion a week in 1997, and $4 billion a week in 2000. At our current pace of stealing from the trust fund, we will have taken $500 billion from Social Security in 5 years' time—the grandest larceny in history.

However, by rolling back the payroll tax and drastically reducing the Social Security surpluses, we will add $74 billion to the deficit next year. Regrettably, on the question of how to pay for his daring proposal, Senator MOYNIHAN changes from salesman to sphinx.

Fourth, Mr. President, Representative ROSTENKOWKI's budget plan is all austerity and no vision. I join the chorus of praise for Chairman ROSTENKOWSKI. Too bad his freeze idea comes at a time of global political warming when the need is for mini-Marshall plans in Eastern Europe and Central America, and a maxi-Marshall plan here in the United States.

Moreover, his freeze perpetuates the ransacking of Social Security—spending $546 billion from the trust fund. Of course, by reducing the Federal deficit by $546 billion, we simply create a $546 billion deficit in the trust fund. Thus: no trust and no fund.

In short, ROSTY wants to leave in place the January 1 Social Security tax increase while freezing Social Security benefits and stripping naked the Social Security trust fund. If Representatives vote yes on this, we will have discovered an instant cure for the House's 98-percent reelection rate.

Mr. President, the point is that it is high time we put aside the budget gamesmanship. We need to sit down and decide where we want this country to be 5 years from now, 10 years from now—and how to get there.

President Bush and Congress both want to do more for education, child care, the environment, the war on drugs, you name it. Mega-bills for the S&L bailout, the HUD fraud, and nuclear-waste cleanup are all coming due. So even if you factor in selected budget cuts and the elusive peace dividend, the Federal budget is going nowhere but up.

With a 15-cent increase in the gas tax and a whole raft of excise taxes, you do not even keep up with last year's $27 billion increase in interest payments on the debt. And, yes, Senator MOYNIHAN is right: we need to raise $74 billion elsewhere so we can stop the Social Security thievery.

Mr. President, if we are going to match our foreign competition—if we are going to stop the borrowing binge, reduce the cost of capital, and retool America for the 21st century—then we must first match Japan's and Europe's discipline on taxes and spending.

That is why the centerpiece of my plan is a 5-percent value-added tax [VAT] exempting food, health care, and housing. European nations average a 17-percent VAT; in Korea the VAT is 25 percent. A VAT tax is equitable, self-enforcing, and can be rebated on exports to make them more competitive. Best of all, VAT generates real revenue, and lots if it. We need it all—every dime of it earmarked for deficit reduction.

My plan calls for $26.6 billion in new revenues in 1991, rising sharply to $88.1 billion in new revenues in 1992 as the VAT kicks in. Over the 5 years of the plan, some $497.5 billion in new revenues would be raised—all of it earmarked for deficit reduction.

In addition, Mr. President, my plan would cut defense $14 billion in 1991, with further cuts rising to $25.6 billion in 1995, for a 5-year defense reduction of $105.2 billion.

By reducing the deficits in accord with my plan over the next 5 years, we will save some $101.2 billion in interest payments on the national debt. A portion of that savings—some $38 billion over 5 years—would be used to fund urgent new domestic initiatives, beginning with $5 billion in new outlays in 1991 rising to $10 billion in new outlays in 1995.

Using the honest CBO baseline as the starting point, my plan will reduce the deficit to $118.4 billion in 1991, will surpass the Gramm-Rudman-Hollings target with a $7.8 billion deficit in 1992, and will generate surpluses of $27.5 billion in 1993, $63.2 billion in 1994, and $100 billion in 1995. Of course, this will give us the leeway we need to take Social Security off budget and stop the thievery from the Social Security trust fund once and for all.

Mr. President, my plan is doable. It is honest. It is based on real numbers, real savings, and real revenues. My druthers are for a VAT because of its advantages to our export industries and because it tackles the problem of excessive consumption. However, I am open to all serious suggestions on the revenue front.

This plan can and will break the deadlock and the gridlock in our Federal finances. We need to get the country moving again. And to that end, we first need to get the Government moving again—on education, on infrastructure, on the whole range of investments in our future.

The deficits have condemned America to a course of stagnation, do-nothingism, and slow decline. By restoring fiscal balance, we can bring down interest rates, reduced the cost of capital, set in motion a surge of investment and growth. But first we must all have the courage to bite the bullet on budget cuts and on taxes. The plan I propose today will get the job done.

Mr. President, I ask that a copy of my balanced budget plan be printed in the RECORD.

The plan follows:

HOLLINGS BALANCED BUDGET PLAN

[In billions of dollars]

	1991	1992	1993	1994	1995	5-yr total
CBO baseline deficit	161.5	124.4	132.1	121.4	110.3	
Deficit reduction:						
Defense	−14.0	−19.1	−22.3	−24.2	−25.6	−105.2
Nondefense	−6.0	−8.0	−10.0	−11.5	−13.5	−49.0
Revenues [1]	−26.6	−88.1	−117.5	−127.6	−137.7	−497.5
Debt service	−1.5	−7.5	−17.8	−30.3	−44.1	−101.2
Domestic initiatives	+5.0	+6.0	+8.0	+9.0	+10.0	+38.0
Total reduction [2]	−43.1	−116.6	−159.6	−184.6	−210.9	
New deficit	−118.4	−7.8	+27.5	+63.2	+100.6	

[1] Revenue increases are shown as minuses because they reduce deficits.
[2] Totals may not add due to rounding.●

BILL TO BE REFERRED—S. 1165

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate Governmental Affairs Committee reports S. 1165, the Fair Employment in Congress Act, that the bill then be automatically referred to the Committee on Rules for up to 90 calendar days; that if the bill is not reported by the Rules Committee within this period, that the bill then be auto-

matically discharged and placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

USE AND DISTRIBUTION OF SEMINOLE INDIAN AWARD—CONFERENCE REPORT

Mr. MITCHELL. Mr. President, I submit a report of the committee of conference on S. 1096 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1096) to provide for the use and distribution of funds awarded the Seminole Indian in dockets 73, 151, and 73-A of the Indian Claims Commission, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of March 29, 1990.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE RUNNIN' REBELS OF UNLV

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Senate Resolution 268, submitted earlier today by Senators BRYAN and REID, commending the Runnin' Rebels of UNLV as the 1990 National Collegiate Athletic Association men's basketball champions.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 268) commending the Runnin' Rebels of the University of Nevada at Las Vegas for winning the 1990 National Collegiate Athletic Men's Basketball Championship.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 268) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 268

Whereas the University of Nevada at Las Vegas has consistently produced one of the Nation's outstanding Division I men's basketball teams, the Runnin' Rebels:

Whereas the head coach and assistant coaches have led the Runnin' Rebels to three final four appearances and one of the highest percentages of wins in National Collegiate Athletic Association men's basketball;

Whereas UNLV defeated Duke by the largest margin of victory in NCAA Men's Basketball Championship history (103-73) and is the only team to score over 100 points in a championship game;

Whereas three team members have been named to the All-Tournament Team, one member has been named as a first selection All-American, and one member represented his country in basketball during the 1988 Olympic Games; and

Whereas one team member epitomized the spirit and courage of the Runnin' Rebels by playing throughout the entire tournament with a broken jaw: Now, therefore, be it

Resolved, That the Senate commends the Runnin' Rebels of the University of Nevada at Las Vegas for winning the 1990 National Collegiate Athletic Association Men's Basketball Championship.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. McCAIN. I move to lay that motion of the table.

The motion to lay on the table was agreed to.

COMMENDING THE BLUE DEVILS OF DUKE

Mr. MITCHELL. Mr. President, although there is no resolution to that effect, in view of the resolution just adopted and the Presiding Officer's former role as the president of Duke University, I think we ought to also take a moment to commend the Blue Devils of Duke for a great season and the valiant effort of getting to the final four, although they lost to the University of Nevada-Las Vegas. I know my distinguished colleague will join me in paying tribute to them.

The PRESIDING OFFICER. The Chair thanks you.

Mr. McCAIN. Mr. President, I think it is worthy of note that Duke University has achieved the lofty goal of the final four in 3 of the last 4 years, which is a record unequalled in college basketball in recent history.

HOMER THORNBERRY JUDICIAL BUILDING

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Government Affairs Committee be discharged from further consideration of H.R. 2334 designating the "Homer Thornberry Judical Building" and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2334) to redesignate the Post Office located at 300 East Ninth Street in Austin, TX, as the "Homer Thornberry Judicial Building."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 2334) was ordered to a third reading, was read the third time, and passed.

Mr. MITCHELL. I move to reconsider the vote by which the bill was passed.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL DAY IN SUPPORT OF FREEDOM AND HUMAN RIGHTS IN CHINA AND TIBET

Mr. MITCHELL. I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 275 designating "National Day in Support of Freedom and Human Rights in China and Tibet," and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 275) designating May 13, 1990, as the "National Day in Support of Freedom and Human Rights in China and Tibet."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 275) and its preamble are as follows:

S.J. RES. 275

Whereas the United States supports the legitimate and democratic aspirations for freedom of peoples throughout the world;

Whereas students and citizen groups throughout the world have taken great risks in pursuit of reform;

Whereas on May 13, 1989, Chinese students began a hunger strike in Tiananmen Square seeking nonviolent dialogue with the Chinese Government;

Whereas the Chinese Government responded to the Chinese students with violence, killing many;

Whereas the non-violent resistance of the people of Tibet to the Chinese Government has also been met with violence;

Whereas the Chinese students and the Tibetan people follow the tradition of the Dalai Lama's and Mahatma Gandhi's doctrine of non-violence, and have inspired the world;

Whereas student organizations throughout the United States and around the world have declared May 13, 1990, as an international day of fasting in support of democratic reforms in China and Tibet; and

Whereas this effort is being undertaken in the hope of bringing the current tragedies in China and Tibet to a peaceful end, and in the hope that productive dialogue will replace an atmosphere of suspicion and reprisal: Now, therefore, be it *Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President is authorized and requested to issue a proclamation designating May 13, 1990, as the "National Day in Support of Freedom and Human Rights in China and Tibet", and calling on the people of the United States to observe such a day with appropriate ceremonies and activities.

Mr. MITCHELL. I move to reconsider the vote by which the joint resolution was passed.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STAR PRINT OF S. 2403

Mr. MITCHELL. Mr. President, I ask unanimous consent that a star print be made of S. 2403, the Montana Interim Roadless Lands Release and Conservation Act of 1990 to reflect the changes I now send to the desk, along with a statement of explanation by Senator BAUCUS.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. BAUCUS. Mr. President, earlier this week, I introduced S. 2403, the Montana Roadless Lands Release and Conservation Act of 1990. This bill was subsequently referred to the Committee on Energy and Natural Resources.

However, through an oversight, this bill contained two drafting errors. I am asking unanimous consent for a star print making the following changes to clarify my intent:

1. On page 9, strike lines 7 through 12; and

2. On page 17, insert:

(c) SUFFICIENCY OF REVIEW.—The wilderness suitability review and evaluation of national forest system lands in the State of Montana completed as part of the Land and Resources Management Plans that were completed prior to the date of enactment of this Act satisfy the provisions of subsection (b)(2) as an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System, and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the plan, but shall review the wilderness option when the plans are revised, which revisions will ordinarily occur on a 10-year cycle, or at least every 15 years, unless, prior to that time the Secretary finds that Conditions in a unit have significantly changed.●

VETERANS READJUSTMENT APPOINTMENTS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 491, S. 2338, a bill dealing with veterans readjustment appointments.

Mr. McCAIN. Mr. President, reserving the right to object, and I will object, I have to object on behalf of another Member on this side of the aisle.

The PRESIDING OFFICER. Objection is heard.

AUTHORIZATION TO MAKE TECHNICAL CORRECTIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Secretary be authorized to make technical corrections in the star print of S. 2235.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate adjourns today, it stand in adjournment until 12 noon on Wednesday, April 18; that when the Senate reconvenes on Wednesday, April 18, the Journal of proceedings be deemed to have been approved to date; that the call of the calendar be waived, and no motions or resolutions come over under the rule; and that the morning hour be deemed to have expired. I further ask unanimous consent that following the time for the two leaders there be a period for morning business not to extend beyond 1 p.m. with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum. I withhold my request.

OUTSTANDING LEADERSHIP OF THE MAJORITY LEADER

Mr. McCAIN. Mr. President, we are completing business and adjourning for a brief break back in our respective States. I think it is well to point out the outstanding leadership which has been exerted by our distinguished majority leader, the Senator from Maine. I am particularly referring to the passage of the Clean Air Act.

Mr. President, I know that the distinguished majority leader has been involved in this issue for many, many years. He had several unfortunately failed attempts at achieving a compromise on perhaps one of the most complex and contentious issues that has ever come before not only this body but the Nation. He crafted a fragile compromise. He beat back the many efforts that would have severely impaired that compromise. I might confess that I was a party to one or two myself.

But the fact is that this legislation would not have been passed by this body if it had not been for the perserverance, the patience, the guidance, and the leadership of our distinguished majority leader. I know that I reflect the views of my 98 other colleagues when I commend him for doing something not only for America today, but for future generations of Americans who will be able to express their gratitude because they will live in an environment which is far cleaner, far healthier, and far better for all of our citizens.

Mr. MITCHELL. Mr. President, I thank my colleague. I am genuinely moved by his remarks. I appreciate them very, very much.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SOCIAL SECURITY BOARD OF TRUSTEES

Mr. MITCHELL. Mr. President, earlier today the distinguished Senator from New York [Mr. MOYNIHAN] offered a resolution to express the sense of the Senate that the President ought to promptly send to the Senate nominations for the vacancies on the Social Security Board of Trustees. Senator MOYNIHAN offered the resolution, and made what I believe to be a powerful and compelling argument in behalf of its adoption given the fact that these vacancies have existed for many, many months.

Objection was made on the Republican side to Senator MOYNIHAN's proceeding with this resolution. I am now advised that the objection is continuing. Therefore, the Senate will not be able to act on this resolution at this time. I regret that very much, as does Senator MOYNIHAN.

I hope that we will be able to get this cleared so that we can take it up promptly upon our return because this deals with a very important matter,

the vacancies on the Social Security Board of Trustees of persons who would if they were in office be charged with the responsibility of maintaining supervision over this important program and fund.

ADJOURNMENT UNTIL WEDNESDAY, APRIL 18, 1990

Mr. MITCHELL. Mr. President, if the distinguished acting Republican leader has no further business, and if no other Senator is seeking recognition, I now ask unanimous consent that the Senate stand in adjournment, under the provisions of House Concurrent Resolution 299, until 12 noon on Wednesday, April 18.

There being no objection, at 7:28 p.m. the Senate adjourned until Wednesday, April 18, 1990.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 5, 1990:

DEPARTMENT OF ENERGY

JOHN WESLEY BARTLETT, OF MASSACHUSETTS, TO BE DIRECTOR OF THE OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT.

Carl F. Bianchi, of Idaho.

The following-named person to be a Member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992:

James Duke Cameron, of Arizona.

The following-named person to be a Member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992:

Janice L. Gradwohl, of Nebraska.

The following-named person to be a Member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992:

Malcolm M. Lucas, of California.

DEPARTMENT OF VETERANS AFFAIRS

D'Wayne Gray, of Virginia, to be Chief Benefits Director, Department of Veterans Affairs, for a term of 4 years.

SENATE—*Wednesday, April 18, 1990*

The Senate met at 12 noon and was called to order by the Honorable HERBERT KOHL, a Senator from the State of Wisconsin.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Our Father, we thank Thee for the life and labors of a faithful public servant, SPARK MATSUNAGA. We are grateful for his friendship, for his gentleness and kindness; for his broad influence. We commend to Thee his family and pray that, in this time of great loss, they will be aware of Your Fatherliness, Your love, Your compassion, and the reality of eternity.

"O give thanks unto the Lord; for he is good: for his mercy endureth forever."—Psalm 136:1.

Gracious God, we do give thanks unto You with all our heart. We thank Thee for the glorious, eternal realities which the celebration of Passover and Easter represent. We thank Thee for life and breath, for family and friends, for freedom and responsibility, for work and play, for the beauties of nature and the promises of spring. We thank Thee for the opportunities recess brings: to meet with various groups, to spend time with constituents; time for reading, recreation, and rest. We thank Thee for traveling mercies and for a safe return. We thank Thee for the privilege of serving the people, the privilege and duties of leadership. We thank Thee for the lessons of the past and the challenge of the future.

In Jesus' name who is Life and Light. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, April 18, 1990.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable HERBERT KOHL, a Senator from the State of Wisconsin, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. KOHL thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the standing order, the acting majority leader is recognized.

RELATIVE TO THE DEATH OF SENATOR SPARK M. MATSUNAGA

Mr. CRANSTON. Mr. President, the Senate, all of us who are its Members, learned with profound sorrow of the death of our honored colleague, Senator SPARK MATSUNAGA, on Sunday, April 15. In his memory, the Senate will conduct no business and have no speeches during today's session. On behalf of Senators INOUYE, MITCHELL, DOLE, and all other Members of the Senate, I send a resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 271) relative to the death of the Honorable Spark M. Matsunaga, late a Senator from the State of Hawaii.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 271) was agreed to.

The resolution reads as follows:

S. RES. 271

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable Spark M. Matsunaga, late a Senator from the State of Hawaii.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased Senator.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MESSAGES FROM THE HOUSE RECEIVED DURING ADJOURNMENT

ENROLLED BILLS SIGNED

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on April 6, 1990, during the adjournment of the Senate, received the following message from the House of Representatives announcing that the Speaker has signed the following enrolled bills:

S. 1949. An act to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing;

H.R. 1048. An act to provide for the acquisition of data about crimes that manifest prejudice based upon certain group characteristics; and

H.R. 3968. An act to further delay the applicability of certain amendments to the Public Health Service Act that relate to organ procurement organizations.

Under the authority of the order of the Senate of January 3, 1989, the enrolled bills were signed on April 9, 1990, during the adjournment of the Senate, by the President pro tempore [Mr. BYRD].

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on April 9, 1990, he had presented to the President of the United States the following enrolled bills:

S. 1813. An act to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters; and

S. 1949. An act to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2752. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report on the FDA's progress in negotiations with foreign governments toward obtaining foreign pesticide usage information; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2753. A communication from the Secretary of Defense, transmitting, pursuant to law, notification that the Air Force intends to obligate $12 million for research and de-

velopment for the ALQ-161A "core" program; to the Committee on Appropriations.

EC-2754. A communication from the Assistant Secretary of the Army, Manpower and Reserve Affairs, Department of the Army, transmitting a draft of proposed legislation to increase the authority of the military departments to settle administrative tort claims under the Federal Tort Claims Act; to the Committee on Armed Services.

EC-2755. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to transfer jurisdiction, custody, and control of the Pentagon reservation from the General Services Administration to the Department of Defense; to the Committee on Armed Services.

EC-2756. A communication from the Director of Consumer Affairs, Office of Thrift Supervision, transmitting, pursuant to law, the annual report of the Office on efforts to prevent unfair and deceptive trade practices in the thrift industry; to the Committee on Banking, Housing, and Urban Affairs.

EC-2757. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to extend the Export Administration Act of 1979, as amended, and to authorize appropriations for fiscal year 1991; to the Committee on Banking, Housing, and Urban Affairs.

EC-2758. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report entitled "Department of Transportation-Adequacy of Current Federal and State Earthquake Design Standards"; to the Committee on Commerce, Science, and Transportation.

EC-2759. A communication from the Secretary of Transportation, transmitting, pursuant to law, the annual report of the Maritime Administration for fiscal year 1989; to the Committee on Commerce, Science, and Transportation.

EC-2760. A communication from the Acting Chairman of the Federal Maritime Commission, transmitting, pursuant to law, the twenty-eighth annual report of the activities of the Commission for fiscal year 1989; to the Committee on Commerce, Science, and Transportation.

EC-2761. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to make effective the Department of Transportation antidrug program rule for recipients of Federal mass transit assistance; to the Committee on Commerce, Science, and Transportation.

EC-2762. A communication from the Director of the Bureau of Land Management, Department of the Interior, transmitting, pursuant to law, the Department's final eligibility and suitability report for the Upper Klamath Wild and Scenic River Study; to the Committee on Energy and Natural Resources.

EC-2763. A communication from the Secretary of Energy, transmitting, pursuant to law, the Department's report on enforcement actions initiated during the fourth quarter of fiscal year 1989 with regard to State expenditures of petroleum violation escrow funds, a well as the status of actions begun earlier; to the Committee on Energy and Natural Resources.

EC-2764. A communication from the Acting Director, Office of Civilian Radioactive Waste Management, Department of Energy, transmitting, pursuant to law, the sixth annual report of the Department on the activities and expenditures of the Office of Civilian Radioactive Waste Management; jointly to the Committee on Energy and Natural Resources and the Committee on Environment and Public Works.

EC-2765. A communication from the Acting Administrator of the General Services Administration, transmitting an informational copy of a lease prospectus for the Department of Commerce, Patent and Trademark Office; to the Committee on Environment and Public Works.

EC-2766. A communication from the Associate Director, State and Local Programs Support, Federal Emergency Management Agency, transmitting, pursuant to law, proposals to improve the operational and fiscal relationships among Federal, State, and local disaster and emergency officials; to the Committee on Environment and Public Works.

EC-2767. A communication from the United States Trade Representative, transmitting, pursuant to law, a report on recent developments regarding implementation of the Trade Act of 1974; to the Committee on Finance.

EC-2768. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report on the administration, impact, and cost of the Utilization and Quality Control Peer Review Organization program during the preceding fiscal year; to the Committee on Finance.

EC-2769. A communication from the Acting Assistant Secretary, Indian Affairs, Department of the Interior, transmitting, pursuant to law, a proposed plan for the use of the Pueblo of Santa Clara judgment funds in Docket 356, before the United States Claims Court; to the Committee on Indian Affairs.

EC-2770. A communication from the Attorney General, transmitting, pursuant to law, a report on the coordination of overall policy and development of objectives and priorities for all Federal juvenile delinquency programs and activities; to the Committee on the Judiciary.

EC-2771. A communication from the Secretary of Health and Human Services, transmitting, a draft of proposed legislation to amend the Immigration and Nationality Act to authorize appropriations for the refugee assistance program for fiscal years 1991, 1992, and 1993; to the Committee on the Judiciary.

EC-2772. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation entitled the "Food, Drug, and Device Fee Amendments of 1990"; to the Committee on Labor and Human Resources.

EC-2773. A communication from the Secretary of Veterans Affairs, transmitting, pursuant to law, a report on the extent to which activities at VA health care facilities have been performed by contractors and the cost savings that resulted from these activities; to the Committee on Veterans' Affairs.

EC-2774. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to authorize the Secretary of Agriculture to recover the costs for all activities associated with the importation of animals and animal products, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2775. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Act of July 2, 1962, to give the Secretary of Agriculture additional intrastate authority to prevent the spread of any dangerous communicable disease of livestock or poultry during extraordinary emergencies; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2776. A communication from the Comptroller General of the United States, transmitting an informational report on issues covered in the 1990 farm bill; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2777. A communication from the Deputy Director, Office of Management and Budget, transmitting, pursuant to law, a report indicating the necessity for a supplemental estimate of appropriation for the Department of Veterans Affairs; to the Committee on Appropriations.

EC-2778. A communication from the Secretary of Defense, transmitting, pursuant to law, a copy of the White Paper on the Department of Defense and the Congress regarding the constitutional responsibility of providing for the common defense; to the Committee on Armed Services.

EC-2779. A communication from the Under Secretary of Defense, transmitting, pursuant to law, a report on funds obligated in the chemical warfare—chemical/biological defense programs during fiscal year 1989; to the Committee on Armed Services.

EC-2780. A communication from the Assistant Secretary of Defense, Production and Logistics, transmitting, pursuant to law, three reports on the effects of Navy shipbuilding and repair on U.S. public and private shipyards during peacetime and mobilization; to the Committee on Armed Services.

EC-2781. A communication from the Assistant Secretary of Defense, Force Management and Personnel, transmitting, pursuant to law, a report on the Montgomery GI Bill Education Benefits Program; to the Committee on Armed Services.

EC-2782. A communication from the Chief of Legislative Affairs, Department of the Navy, transmitting, pursuant to law, notification of the Navy intends to offer for lease a naval vessel to the Government of Venezuela; to the Committee on Armed Services.

EC-2783. A communication from the Assistant Secretary of Defense, Production and Logistics, transmitting, pursuant to law, a report on the Department's Metric Transition Program; to the Committee on Armed Services.

EC-2784. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report on the Supportive Housing Demonstration Program; to the Committee on Banking, Housing, and Urban Affairs.

EC-2785. A communication from the Chairman of the Federal Reserve System, transmitting, pursuant to law, a report on the implementation of the Expedited Funds Availability Act; to the Committee on Banking, Housing, and Urban Affairs.

EC-2786. A communication from the Chairman of the Board of the National Credit Union Administration, transmitting, pursuant to law, the 1990 annual report of the Administration; to the Committee on Banking, Housing, and Urban Affairs.

EC-2787. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, the 1990 annual report on the community development programs administered by the Department; to the Committee on Banking, Housing, and Urban Affairs.

EC-2788. A communication from the Director of the Office of Management and Budget, transmitting, pursuant to law, the cumulative report on rescissions and defer-

rals; pursuant to the order of January 30, 1975, referred jointly to the Committee on Budget and the Committee on Appropriations.

EC-2789. A communication from the Chairman of the Interstate Commerce Commission, transmitting, pursuant to law, notice of a delay in the preparation of the Commission's annual report; to the Committee on Commerce, Science, and Transportation.

EC-2790. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation entitled "The United States Travel and Tourism Administration Facilitation Act of 1990"; to the Committee on Commerce, Science, and Transportation.

EC-2791. A communication from the Secretary of Energy, transmitting, pursuant to law, the 1989 Annual Report on the Bonneville Power Administration; to the Committee on Energy and Natural Resources.

EC-2792. A communication from the Assistant Secretary, Policy, Management and Budget, Department of the Interior, transmitting, pursuant to law, reports on the implementation of section 318 of the 1990 Department of the Interior and Related Agencies Appropriations Act; to the Committee on Energy and Natural Resources.

EC-2793. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on operating, statistical, and financial information of the Government's helium program for fiscal year 1989; to the Committee on Energy and Natural Resources.

EC-2794. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-2795. A communication from the Secretary of the Interior, transmitting, pursuant to law, the Annual Report on the Youth Conservation Corps Program; to the Committee on Energy and Natural Resources.

EC-2796. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-2797. A communication from the Secretary of Energy, transmitting, pursuant to law, the 1990 annual report on nuclear waste management at the Western New York Nuclear Service Center; to the Committee on Energy and Natural Resources.

EC-2798. A communication from the Secretary of the Interior, transmitting, pursuant to law, the 1988 and 1989 Annual Report for the Interior Department's Office of Surface Mining Reclamation and Enforcement; to the Committee on Energy and Natural Resources.

EC-2799. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-2800. A communication from the Administrator of the United States Environmental Protection Agency, transmitting, pursuant to law, the Agency's second annual report on Superfund implementation entitled "Progress Toward Implementing Superfund: Fiscal Year 1988"; to the Committee on Environment and Public Works.

EC-2801. A communication from the Administrator of the Agency for International Development, transmitting, pursuant to law, the 1989 Annual Report on the International Fund for Ireland; to the Committee on Foreign Relations.

EC-2802. A communication from the Assistant Secretary for Legislative Affairs, U.S. Department of State, transmitting, pursuant to law, the 90-day report on the investigation into the death of Enrique Camarena; to the Committee on Foreign Relations.

EC-2803. A communication from the Assistant Secretary of Legislative Affairs, U.S. Department of State, transmitting, pursuant to law, the quarterly report of the Department concerning human rights activities in Ethiopia, covering the period October 15, 1989, through January 14, 1990; to the Committee on Foreign Relations.

EC-2804. A communication from the Chairman of the Council on Environmental Quality, transmitting, pursuant to law, the annual report of the Council under the Government in the Sunshine Act for the Calendar Year 1989; to the Committee on Governmental Affairs.

EC-2805. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-187 adopted by the Council on March 13, 1990; to the Committee on Governmental Affairs.

EC-2806. A communication from the Director of the Information Security Oversight Office, transmitting, pursuant to law, the annual report to the President for fiscal year 1989; to the Committee on Governmental Affairs.

EC-2807. A communication from the U.S. Commissioner of the Delaware River Basin Commission, transmitting, pursuant to law, the Commission's report under the Inspector General Act Amendments of 1988; to the Committee on Governmental Affairs.

EC-2808. A communication from the U.S. Commissioner of the Susquehanna River Basin Commission, transmitting, pursuant to law, the Commission's report under the Inspector General Act Amendments of 1988; to the Committee on Governmental Affairs.

EC-2809. A communication from the Director of Central Intelligence, Central Intelligence Agency, transmitting, pursuant to law, a draft of proposed legislation entitled "Intelligence Authorization Act for Fiscal Year 1991"; to the Select Committee on Intelligence.

EC-2810. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, the fourteenth annual report of the Department under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2811. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the Department's fiscal year 1988 annual report on the National Institute for Occupational Safety and Health; to the Committee on Labor and Human Resources.

EC-2812. A communication from the Secretary of Education, transmitting, pursuant to law, a copy of a document entitled "Final Regulations for the Pell Grant Program—Expected Family Contributions for Students with Special Conditions"; to the Committee on Labor and Human Resources.

EC-2813. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a special report on the use of consortia for research and development of vaccines and drugs for the prevention and treatment of acquired immune deficiency syndrome [AIDS]; to the Committee on Labor and Human Resources.

EC-2814. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report on the status of health personnel in the United States; to the Committee on Labor and Human Resources.

EC-2815. A communication from the Chairman of the Board of the U.S. Institute of Peace, transmitting, pursuant to law, the second biennial report on the Institute for fiscal years 1988 and 1989; to the Committee on Labor and Human Resources.

EC-2816. A communication from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to improve the pay system for registered nurses employed by the Veterans Health Services and Research Administration, and for other purposes; to the Committee on Veterans' Affairs.

EC-2817. A communication from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to extend expiring laws authorizing the Department of Veterans Affairs to contract for needed care, to revise VA authority to furnish outpatient dental care, and for other purposes; to the Committee on Veterans' Affairs.

EC-2818. A communication from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to provide for recovery by the United States of the cost of medical care and services furnished for a nonservice-connected disability, and for other purposes; to the Committee on Veterans' Affairs.

EC-2819. A communication from the Executive Director of the Navajo and Hopi Indian Relocation Commission, transmitting, pursuant to law, the Commission's report under the Inspector General Act Amendments of 1988; to the Committee on Indian Affairs.

EC-2820. A communication from the President of the United States, transmitting, pursuant to law, notification of the termination of the Panamanian emergency declared on April 8, 1988, while preserving enforcement and blocking authorities as authorized by law; to the Committee on Banking, Housing, and Urban Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-448. A resolution adopted by the Senate of the State of Michigan; to the Committee on Appropriations:

"SENATE RESOLUTION No. 294

"Whereas the Michigan Employment Security Commission (MESC) provides a wide range of important services to claimants and those employers in Michigan whose services provide a measure of stability in the labor market and Michigan's economy; and

"Whereas through this system, employers pay federal unemployment taxes pursuant to the Federal Unemployment Tax Act. One of the major taxes of the MESC is administering the unemployment insurance system throughout the state; and

"Whereas serious concerns have arisen over the ability of the MESC to continue to provide an appropriate level of services because of insufficient appropriations. The United States Department of Labor has not provided state employment security agencies, including Michigan's, with enough funds to properly administer their duties. Without appropriate action, Michigan's services are in great jeopardy, even at a time when there exists a positive balance of $1.08 billion in the Employment Security Administrative Account; now, therefore, be it

"Resolved by the Senate, That the members of this legislative body hereby memorialize the Congress of the United States and the Secretary of the United States Department of Labor to provide supplemental appropriations to the Michigan Employment Security Commission for administrative costs, with the funding coming from the positive balance currently in the Employment Security Administrative Account, and to implement changes in the financing mechanism; and be it further

"Resolved, That copies of this resolution be transmitted to the Secretary of the United States Department of Labor, the Speaker of the United States House of Representatives, the President of the United States Senate, and the members of the Michigan congressional delegation."

POM-449. A resolution adopted by the Council of the District of Columbia urging the Congress to accord self-determination to the District of Columbia with respect to the funding of abortions; to the Committee on Appropriations.

POM-450. A joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Armed Services.

"HOUSE JOINT RESOLUTION 90-1009

"Whereas women in both military and civilian service have made an outstanding contribution to our country since the founding of the Republic and the Revolutionary War, serving with commitment, dedication, and sacrifice; and

"Whereas women in civilian service have served as nurses, doctors, Red Cross and USO workers, interpreters, librarians, school teachers, and missionaries, and in the special services, providing direct support to the Armed Forces of our country; and

"Whereas women in military service have performed a wide range of military jobs, from stenographers and technicians to truck drivers and gunners' mates, from doctors and nurses to air traffic controllers and military police; and

"Whereas women in military and civilian service have increased dramatically during this century, with 35,000 women serving in World War I, and over 400,000 women serving in all branches of the Armed Forces and in all overseas theaters in World War II; and

"Whereas in 1948, the Women's Armed Services Integration Act gave women a permanent place in the Armed Forces, and hundreds of thousands of women have since served during the Korean and Vietnam conflicts, in other military actions, and in peacetime; and

"Whereas women veterans and women in civilian service have earned combat decorations, endured imprisonment in enemy camps, suffered lasting physical and mental disabilities, and sacrified their lives in service to their country; and

"Whereas over 20,000 women veterans and an unknown number of women from civilian service are citizens of Colorado; and

"Whereas women veterans constitute the fastest growing segment of the veteran population; and

"Whereas women veterans are entitled to full participation in veteran's benefits programs but, due to many factors, including lack of knowledge, failure to receive appropriate recognition for their service, and discrimination in the administration of some programs, have often not sought or received those benefits; and

"Whereas women veterans and women in civilian service have organized to reach, educate, and service their members: Now, therefore, be it

"Resolved by the House of Representatives of the Fifty-seventh General Assembly of the State of Colorado, the Senate concurring herein, That we, the General Assembly, recognize and appreciate the contributions of women who are serving and have served our country in the civilian and armed services and support the efforts of those women who are seeking to serve their members through education and outreach programs: Be it further

"Resolved, That copies of this Resolution be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each member of the Congressional delegation from Colorado."

POM-451. A joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Banking, Housing, and Urban Affairs:

"HOUSE JOINT RESOLUTION 90-1002

"Whereas there is a great and growing need for affordable housing in Colorado and throughout the United States; and

"Whereas it is vital that all government funds used to provide public housing be used as efficiently as possible; and

"Whereas under the Low Rent Public Housing Program, as it is currently administered by the federal Department of Housing and Urban Development, the total development cost of the units that a local housing authority may acquire is specified by the Department, and this often does not allow local housing authorities to purchase the greatest possible number of adequate housing units for a given level of funding; and

"Whereas if such restrictions on the use of federal funds by local housing authorities were removed, local housing authorities would be able to implement innovative housing programs which would provide a greater number of adequate housing units for the same level of funding: Be it

"Resolved by the House of Representatives of the Fifty-seventh General Assembly of the State of Colorado the Senate concurring therein, That the General Assembly urges the Congress of the United States to authorize and to direct the Department of Housing and Urban Development to alter its practices relating to its Low Rent Public Housing Program in order to allow local housing authorities to develop as many units of adequate housing as is possible within a given level of funding: Be it further

"Resolved, That copies of this resolution shall be transmitted to the Secretary of the United States Department of Housing and Urban Development, Mr. Jack Kemp, the President of the United States Senate, the Speaker of the United States House of Representatives, and members of the Colorado delegation to the Congress of the United States, in order that they may be apprised of the sense of the Colorado General Assembly."

POM-452. A joint resolution adopted by the Legislature of the State of Utah; to the Committee on Commerce, Science, and Transportation:

"HOUSE JOINT RESOLUTION NO. 40

"Whereas an earthquake measuring 7.1 on the Richter Scale caused 66 deaths and an estimated five billion dollars in direct economic damages to 11 northern California counties on October 17, 1989;

"Whereas the scientific community continues to warn that the United States is on the verge of a major earthquake within the next 20 to 30 years with anticipated overall property damage losses alone estimated at $70 billion;

"Whereas according to the United States Congress, all 50 states are vulnerable to the hazards of earthquake and at least 39 states are subject to major or moderate seismic risk;

"Whereas 70 million Americans are exposed to severe earthquake risk and an additional 120 million people are exposed to moderate earthquake risk;

"Whereas a catastrophic earthquake in a populated, developed area would inflict severe damage on the nation's economy;

"Whereas in Utah we have been recently reminded that fault lines have the potential of causing major damage to our state and its economy;

"Whereas insurance companies and government at all levels need to make advance preparations for a cooperative effort to respond to a major earthquake disaster;

"Whereas the Earthquake Project has developed a program for both a primary residential earthquake program and a federal reinsurance program to provide an economic safety net in the event of a major earthquake; and

"Whereas the Federal Earthquake Insurance and Reinsurance Corporation Act developed by the Earthquake Project would ensure that the public receives affordable, reliable, and adequate insurance against the risk of earthquake, protect people and businesses by providing for the prompt and efficient handling of claims, reduce the inevitable economic fallout from a devastating earthquake, and avoid large amounts of federal disaster relief by relying on a prefunding mechanism through the vehicle of insurance: Now, therefore, be it

"Resolved, That the Legislature of the state of Utah urge the President and Congress to carefully study and consider the Earthquake Project in order to determine whether such a similar program should be established in the United States to insure against a catastrophic earthquake: be it further

"Resolved, That copies of this resolution be sent to the President of the United States, United States congressional leadership, and Utah's congressional delegation."

POM-453. A joint resolution adopted by the Legislature of the State of Alaska; to the Committee on Commerce, Science, and Transportation:

"JOINT RESOLUTION

"Whereas a study undertaken by the United States Coast Guard after the wreck of the *Exxon Valdez* has found that the loss of oil from the *Exxon Valdez* would have been substantially less if the tanker had been of appropriate double-hulled design and construction; and

"Whereas an oil tanker built with double-hulled construction has cargo and bunker

tanks surrounded with a complete and protective second hull; and

"Whereas chemical tankers and gas carriers are already required to use double-hulled construction to provide maximum protection for the cargo tanks; and

"Whereas the Congressional Office of Technology Assessment and the United States Coast Guard have estimated that double hulls would have prevented spills from over 90 percent of the oil lost in groundings and from over 80 percent of the oil lost in collisions at sea; and

"Whereas double-hulled design and construction provides the highest probability of preventing the loss of oil either from groundings or collisions; and

"Whereas the tanker fleet of the United States is overage and will need to be replaced in the near future; and

"Whereas the additional cost of building a double-hulled vessel in a shipyard in the United States is estimated to add less than one-tenth of a cent per gallon to the cost of crude oil carried over the life of the tanker; and

"Whereas double-hulled design and construction can be achieved without a reduction in the cargo carrying capacity of the vessel: Be it

"Resolved, That the Alaska State Legislature urges the Congress to require all vessels designed to carry oil and constructed after June 1, 1990, to be double-hulled and to prohibit the carriage of oil in single-hulled tankers in United States waters after the year 1999.

"Copies of this resolution shall be sent to the Honorable George Bush, President of the United States; to the Honorable Dan Quayle, Vice-President of the United States and President of the U.S. Senate; the Honorable Thomas S. Foley, Speaker of the U.S. House of Representatives; to the Honorable George Mitchell, Majority Leader of the U.S. Senate; to the Honorable Robert Dole, Minority Leader of the U.S. Senate; to the Honorable Richard A. Gephardt, Majority Leader of the U.S. House of Representatives; to the Honorable Robert Michel, Minority Leader of the U.S. House of Representatives; to the Honorable Samuel K. Skinner, Secretary of Transportation; to Admiral Paul A. Yost, Commandant of the U.S. Coast Guard; to the governors of the following states: the Honorable Guy Hunt, Governor of Alabama; the Honorable George Deukmejian, Governor of California; the Honorable William O'Neill, Governor of Connecticut; the Honorable Michael Castle, Governor of Delaware; the Honorable Bob Martinez, Governor of Florida; the Honorable Joe Frank Harris, Governor of Georgia; the Honorable John D. Waihee III, Governor of Hawaii; the Honorable Charles E. Roemer III, Governor of Louisiana; the Honorable John R. McKarnan, Jr., Governor of Maine; the Honorable William Donald Schaefer, Governor of Maryland; the Honorable Michael Dukakis, Governor of Massachusetts; the Honorable Ray Mabus, Governor of Mississippi, the Honorable Judd Gregg, Governor of New Hampshire; the Honorable James Florio, Governor of New Jersey; the Honorable Mario Cuomo, Governor of New York; the Honorable James Martin, Governor of North Carolina; the Honorable L. Douglas Wilder, Governor of Virginia; the Honorable Edward DiPrete, Governor of Rhode Island; the Honorable Carroll A. Campbell, Jr., Governor of South Carolina; the Honorable William P. Clements, Governor of Texas; the Honorable Booth Gardner, Governor of Washington; the Honorable Neil Goldschmidt, Governor of Oregon; the Honorable Robert Casey, Governor of Pennsylvania; and to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress."

POM-454. A joint resolution adopted by the Legislature of the State of Idaho; to the Committee on Commerce, Science, and Transportation:

"HOUSE JOINT MEMORIAL NO. 15

"Whereas advances in technology have brought our society to the threshold of the information age; and

"Whereas the national welfare will be greatly enhanced by bringing about the universal availability of the information age to the American people through the development and deployment of innovative technologies; and

"Whereas the provision of information services, and the removal of judicially imposed restrictions on the development and availability of such services, will stimulate and encourage use of information age technology by the American people; and

"Whereas it is the responsibility of Congress, rather than the courts, to determine communications public policy including its effect on economic competitiveness, national security, and foreign trade which are essential elements of a sound national telecommunications policy; and

"Whereas the continued economic growth and international competitiveness of American industry are dependent upon permitting all American companies to provide information services, to conduct research and to design, develop, manufacture, and market software, firmware, telecommunications equipment and customer premises equipment for all American residential, business and governmental telecommunications users; and

"Whereas it is imperative that American industry provide new and innovative telecommunications services and an efficient, reliable, state-of-the-art, and internationally competitive public telecommunications network to serve the growing needs of the people of the United States; and

"Whereas existing new and innovative telecommunications technologies are less accessible and less affordable in rural and small communities than in larger, urban centers; and

"Whereas the Federal Communications Commission is the appropriate federal agency, in conjunction with appropriate state regulatory agencies, to ensure fair competition in the telecommunications industry, while protecting the interests of the basic local exchange customers; and

"Whereas the court order, referred to as the "Modification of Final Judgment" (MFJ) that broke up the former Bell System, prohibits the divested Bell operating companies from participating in certain telecommunications markets, namely, manufacturing and information services and long distance servies; and

"Whereas the MFJ has prevented some two-thirds of America's domestically-owned telecommunications industry from competing with foreign telecommunications firms in the United States; and

"Whereas, removal of MFJ restrictions on manufacturing of telecommunications equipment and customer premises equipment and on provision of information services would foster American competitiveness because:

"(a) Removal would facilitate competitiveness with foreign telecommunications companies who are free to compete in markets in the United States;

"(b) Removal would help bring needed telecommunications technologies that are already in existence, but which the Bell operating companies are prohibited from providing by the MFJ, to hearing impaired persons, rural schools and hospitals and others who might benefit from improved and affordable telecommunications;

"(c) Removal would help stimulate the invention of new and innovative telecommunications technologies and facilitate access of said innovations to rural America;

"(d) Removal would encourage investment in research, development, design and manufacture of telecommunications and customer premises equipment: Now, therefore, be it

"Resolved by the members of the Second Regular Session of the Centennial Idaho Legislature, the House of Representatives and the Senate concurring therein, That we urge the President of the United States, George Bush, and the Congress of the United States to remove restrictions that prohibit Bell operating companies from engaging in the manufacture of telecommunications equipment and customer premises equipment and the provision of information services, in the public interest of the citizens of the state of Idaho and the citizens of the United States of America, through the passage of appropriate legislation: Be it further

"Resolved, That the Chief Clerk of the House of Representatives be, and she is hereby authorized and directed to forward a copy of this Memorial to the President of the United States, George Bush, and to the President of the Senate and the Speaker of the House of Representatives of Congress, and to the congressional delegation representing the State of Idaho in the Congress of the United States."

POM-455. A concurrent resolution adopted by the Legislature of American Samoa; to the Committee on Commerce, Science, and Transportation:

"HOUSE CONCURRENT RESOLUTION NO. 87

"Whereas tuna canning is the only industry in American Samoa; and

"Whereas the Saiki Amendment is a threat to the economic survival of America's only tuna canning industries located in American Samoa and Puerto Rico; and

"Whereas with the eventual destruction of the tuna industry by the passage of the Saiki Amendment, American Samoa's economy will be devastated; and

"Whereas the tuna industry in American Samoa is the largest employer in the private sector; and

"Whereas no alternative industry can support the American Samoa economy; and

"Whereas maintaining the status quo of the tuna policy provisions of the Magnuson Act will not only save the tuna industry of America and the economy of American Samoa, but will continue to help them grow and develop to the benefit of our people: Now, therefore be it

"Resolved by the House of Representatives of the Territory of American Samoa, the Senate concurring, That the United States Senate is respectfully requested to reject the Saiki Amendment to the Magnuson Act for the sake of America's tuna industry and American Samoa's economy; and be it further

"*Resolved*, That the Chief Clerk of the House of Representatives is directed to transmit copies of this concurrent resolution to: the President of the Senate, Honorable Dan Quayle; U.S. Senator, Honorable Ernest F. Hollings, Chairman, Senate Committee on Commerce, Science and Transportation; Honorable Congressman Eni F. Hunkin; and to the Honorable Peter T. Coleman, Governor of American Samoa."

POM-456. A concurrent resolution adopted by the Legislature of the State of Iowa; to the Committee on Commerce, Science, and Transportation:

"SENATE CONCURRENT RESOLUTION No. 128

"Whereas the current status of the laws and regulations governing cable television do not provide protection from rate escalation of the type that could divide society into those who can and those who cannot afford to avail themselves of this educational and entertainment service; and

"Whereas this division is a result of the current status of cable television being that of an unregulated monopoly, resulting from a lack of competition and a preempted regulatory environment; and

"Whereas the lack of competition has arisen from the absence of alternative delivery methods of cable television; and

"Whereas a switched fiber optic network could provide competition for the cable television industry and also provide advanced services to consumers; and

"Whereas a statewide switched fiber optic network will serve as a vital component to Iowa's future public and continuing education structures; and

"Whereas a highly-featured switched fiber optic network would be an asset to the economic development within the state of Iowa and provide international competitiveness for the United States; and

"Whereas the current trends of horizonatal consolidation, the practice by which one cable company merges with others in the same delivery area, and vertical integration, the process by which cable companies purchase rights in programming, has further inhibited competition; Now therefore, be it

"*Resolved by the Senate, the House concurring*, That the General Assembly of the state of Iowa call upon the United States Congress and the executive branch administration, in order to guarantee the right of all citizens to the educational and entertainment opportunities and other necessities provided by cable television, to address this issue by enacting laws which encourage the introduction of competition into the cable market: Be it further

"*Resolved*, That until and unless such competition is achieved, Congress and the administration must again provide for regulation of rates and technical delivery. Specifically, the General Assembly of the state of Iowa calls upon the Congress and the administration to do all of the following:

"1. Regulate basic cable in the absence of a switched fiber optic network or a second multichannel alternative.

"2. Permit telephone companies to own and operate cable systems if all of the following conditions are met:

"a. The law does not relieve telephone companies, as common carriers, which provide video transmission facilities by use of an integrated switched network, of the obligation to comply with the order of the Federal Communications Commission entitled "Filing and Review of Open Network Architecture Plans," CC Docket 88-2, Phase I, released December 22, 1988, and any amendment or revision of the order.

"b. State and federal regulations are in place to prevent cross subsidization between a telephone company's cable programming operations and regulated telephone operations. State regulations of intrastate fiber optics shall not be preempted by the federal government.

"c. All other requirements of a local franchise agreement are enforceable at law against a telephone company operating as a video transmission facilities provider.

"d. Regulations are in place to ensure that fiberoptic cable deployed to homes is accorded the legal status of a common carrier.

"e. Regulations are in place to prohibit common carriers, which provide video transmission facilities by use of an integrated switched network, from providing, pursuant to customer desires, individual customer data accumulated by the carrier in the course of furnishing regulated common carrier services to the customer, to all enhanced service providers whether they are affiliated or unaffiliated with the involved common carrier. Penalties must be assessed of any carrier that violates these disclosure rules.

"3. Encourage telephone and cable companies to deploy fiber optic cable to homes, so the maximum number of Americans will benefit from the abundance of the information age services and programming that could be provided over a switched fiber network.

"4. Mandate that as a term and condition of availing a video transmission facilities provider of the compulsory license, that this provider or its affiliates make programming available at a reasonable profit to all other delivery providers."

POM-457. A resolution adopted by the Municipal Assembly of San Juan, Puerto Rico favoring legislation to allow the people of Puerto Rico to exercise political status self-determination in the year 1991; to the Committee on Energy and Natural Resources.

POM-458. A concurrent resolution adopted by the Legislature of the State of Indiana; to the Committee on Environment and Public Works.

"HOUSE CONCURRENT RESOLUTION No. 35

"Whereas the capacity of the solid waste landfills in Indiana will be reached within the next few years; and

"Whereas rates of solid waste disposal are increasing significantly as a result of both increased waste generation in Indiana and increased shipments of solid waste into Indiana for disposal; and

"Whereas recent shipments of garbage by rail into Indiana for handling and disposal without lawful permits for unloading have highlighted both the increased strain on Indiana's landfill capacity and the health hazards that such unlawful shipments may pose for the people of Indiana; and

"Whereas the practice of using the same vehicles to transport garbage into Indiana and Indiana farm products out of Indiana threatens the reputation and integrity of Indiana's farm products; and

"Whereas without its full consent, none of the fifty states should be used as a dumping ground for the garbage and other waste material from another state; and

"Whereas the health and safety of the people of every state is threatened when they are unwilling recipients of the garbage and other solid wastes of the people of another state: Therefore, be it

"*Resolved by the House of Representatives of the General Assembly of the State of Indiana, the Senate concurring:*

"Section 1. That the Congress of the United States is urged to enact a law giving each state the authority to enact laws that permit or deny out-of-state solid waste to be brought into their state for disposal.

"Section 2. That copies of this Resolution be sent to the presiding officers and to the majority and minority leaders of both Houses of Congress and to each member of the Indiana Congressional Delegation."

POM-459. A resolution adopted by the Jewish National Fund Leadership Conference relating to the status of Jerusalem; to the Committee on Foreign Relations.

POM-460. A resolution adopted by the Senate of the Commonwealth of Pennsylvania; to the Committee on Foreign Relations.

"S. RES. 150

"Whereas anti-Semitism is one of the most dangerous elements to emerge from the era of glasnost in the Soviet Union. From State-sponsored anti-Semitism of the earlier eras of Soviet history, in which Soviet Jews understood that there were limits to its reach and that in the final analysis the State would probably protect their physical security, we have now moved to a period of overt, public anti-Semitism fanned by nationalistic and chauvinistic groups and individuals; and

"Whereas the Soviet Jews now perceive a direct and real threat to their physical well-being and existence, and, in the present circumstances, are unsure about the willingness or ability of the State to protect them; and

"Whereas the rising sense of fear—even panic—widely shared among the Soviet Jewish population is fueled by the growing economic and political instability in the U.S.S.R., by the spread of ethnic tensions, by the deep concerns about the future of the country, and, finally, by the recent pogroms which took place against the Armenian majority residing in certain areas of Azerbaidzhan; and

"Whereas there have already been a number of physical attacks upon Jews reported in the West, including the brutal disruption and vandalism of a Writer's Union meeting by anti-Semitic thugs; and

"Whereas action is needed now to call to the attention of Soviet leadership the urgent need to undertake effective measures to combat this pernicious manifestation which is threatening the lives and security of the Jewish population. Our efforts can help to ease the fears of Soviet Jews and decrease the potential physical risks about which they are so concerned; therefore be it

"*Resolved*, That the Senate of the Commonwealth of Pennsylvania memorialize the President of the United States, the Secretary of State and the Congress of the United States to use every opportunity to sensitize the Soviet leadership to the dangers of their current inaction in combating anti-Semitism and to the need of making a strong statement on anti-Semitism, and to ensure that Soviet laws on ethnic incitement are fully enforced; and be it further

"*Resolved*, That copies of this resolution be transmitted to President George Bush, Secretary of State James Baker, to the presiding officers of each house of Congress, and to each member of Congress from Pennsylvania."

POM-461. A resolution adopted by the Senate of the State of Washington; to the Committee on Foreign Relations:

"SENATE RESOLUTION 1990-8755

"Whereas the recent elections in Nicaragua demonstrate that fair and open elections can promote democracy through nonviolent means; and

"Whereas fair and open elections offer the best hope for reducing political violence; and

"Whereas existing democracies, able to do so, should lend assistance and encouragement to people and organizations working for democracy and free elections by peaceful means throughout the world; and

"Whereas the United States of America is recognized by the people of the world as the leading example of democracy: Now, therefore, be it

"Resolved, That the Senate encourages the government of the United States to continue working with international bodies such as the Organization of American States, the United Nations, the Council of the Freely Elected Heads of States, Chaired by former President Jimmy Carter and assisted by former Senator Dan Evans, and the many nongovernmental organizations that participate as election observers in promoting fair and open elections throughout Central America, Lithuania, and the rest of the world, as a means of promoting viable democracies and reducing violence; and be it further

"Resolved, That copies of this resolution be immediately transmitted by the Secretary of the Senate to the Honorable George Bush, President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington."

POM-462. A resolution adopted by the Senate of the Commonwealth of Massachusetts; to the Committee on Foreign Relations:

"SENATE RESOLUTION

"Whereas Lithuania was illegally occupied and annexed by the Soviet Union in nineteen hundred and forty; and

"Whereas the Government of the United States has never recognized the incorporation of Lithuania into the Soviet Union; and

"Whereas on February twenty-fourth, nineteen hundred and ninety, the people of Lithuania held the first democratic multiparty elections in more than half a century in which the people elected candidates to the Supreme Council of Lithuania who support a free and independent Republic of Lithuania; and

"Whereas on March eleventh, nineteen hundred and ninety, the newly elected Lithuanian Parliament reaffirmed the independence of the Republic of Lithuania only to have the Union of Soviet Socialist Republic ignore this democractic action; and

"Whereas the Soviet Government has taken action, including staging military maneuvers, ordering Soviet military units to assert more active and visible control over Lithuanian installations, and the violent abduction of citizens of Lithuania, in an apparent attempt to intimidate the people and their representatives in the Lithuanian parliament; and

"Whereas the Lithuanian people should be commended for their courage and perseverance in reaffirming the independence of the Republic of Lithuania, and in asserting their right to self-determination peacefully and through the democratic process; and

"Whereas the people of the Commonwealth of Massachusetts strongly and unequivocably support the right of the people of Lithuania to independence and democracy and condemn the recent actions of the Soviet Union in its attempt at intimidation of the Lithuanian Parliament and its refusal to recognize the independent, Democratic Republic of Lithuania; now therefore be it

"Resolved, That the Massachusetts Senate hereby respectfully urges the Congress and the President of the United States to condemn the recent actions of the Soviet Union in using force to interfere with the Lithuanians' peaceful exercise of their democratic rights and to accord full diplomatic status to the government of the Republic of Lithuania; and be it further

"Resolved, That a copy of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, the Presiding Officer of each branch of Congress, to the members thereof from this Commonwealth."

POM-463. A resolution adopted by the Eighth District American Legion, Department of New York, favoring an amendment to the Constitution prohibiting the physical desecration of the flag of the United States; to the Committee on the Judiciary.

POM-464. A resolution adopted by the Legislature of the State of Iowa; to the Committee on the Judiciary.

"SENATE RESOLUTION NO. 108

"Whereas, it has been proposed that September 23 be designated American Coal Miners' Memorial Day; and

"Whereas, the purpose of the holiday would be to educate school children about the dangers of coal mining and the importance of the coal industry; and

"Whereas, this holiday will provide an opportunity to teach about the place of coal miners in America's industrial society, and it will provide an opportunity for people to learn more about the uses of coal in metallurgical, electrical, chemical, and transportation industries; and

"Whereas, in addition, the memorial recalls the sacrifices and hardships the coal miners suffered to make America a safer and better place to work and live; and

"Whereas, through organization and collective bargaining, miners helped win the five-day, forty-hour work week, helped establish a national minimum wage, and helped keep children from being exploited in factories and mines; Now therefore, be it

Resolved by the Senate, That the United States Congress is urged to designate September 23 as an official commemorative holiday in honor of America's coal miners: be it further

"Resolved, That copies of this Resolution be presented to the President of the United States Senate, the Speaker of the United States House of Representatives, and to each member of Iowa's congressional delegation."

POM-465. A joint resolution adopted by the Legislature of the State of Maine; to the Committee on the Judiciary:

"JOINT RESOLUTION

"Whereas Joseph Patrick Doherty, a citizen of the Republic of Ireland of the United Kingdom, was convicted in a special nonjury British Diplock court in 1981 of offenses related to an incident involving the death of a British Army soldier and was sentenced to life imprisonment; and

"Whereas Joseph Patrick Doherty escaped from prison and fled to the United States, where he was arrested on June 18, 1983, pursuant to a deportation warrant; and

"Whereas Joseph Patrick Doherty has been a prisoner in the federal prison system since June 18, 1983, solely because of extradition proceedings and charges of having illegally entered the United States; and

"Whereas on June 28, 1983, the United Kingdom, acting through the United States Department of Justice, requested the extradition of Joseph Patrick Doherty to the United Kingdom; and

"Whereas on December 12, 1984, the United States District Court of the Southern District of New York in the action entitled Matter of Doherty (599 F. Supp. 270 (1984)), denied the request for extradition on the ground that the acts for which the British Government sought Joseph Patrick Doherty were within the political offense exception of the then existing extradition treaty between the United States and the United Kingdom; and

"Whereas on November 14, 1988, the Board of Immigration Appeals ruled to allow Joseph Patrick Doherty to apply for political asylum in the United States, superseding an earlier order by the Attorney General of the United States ordering Joseph Patrick Doherty deported to the same country, the United Kingdom, to which his extradition had been previously denied; and

"Whereas in so ruling, the Board of Immigration Appeals expressly stated that Joseph Patrick Doherty had submitted sufficient evidence to establish a prima facie claim of a well-founded fear of persecution if returned to the United Kingdom; and

"Whereas on June 18, 1989, Joseph Patrick Doherty began his 7th year of federal confinement, despite the fact that he has never been convicted of, or even charged with, a criminal offense in the United States, circumstances which only serve to heighten legitimate concerns about the most fundamental violations of basic due process rights; now, therefore, be it

"Resolved, That We, your Memorialists, commend the decision of the Board of Immigration Appeals to allow Joseph Patrick Doherty to apply for political asylum in the United States, and express our concern at the decisions of Attorneys General Meese and Thornburgh, which, in ignoring successive decisions in favor of Joseph Patrick Doherty duly rendered by immigration judges and by the Board of Immigration Appeals, raise serious issues of denial of due process; and be it further

"Resolved, That the President and the Congress take all appropriate action to see that the Attorney General of the United States respect the decision of the Board of Immigration Appeals and permit Joseph Patrick Doherty the hearing ordered by the Board of Immigration Appeals on his claim for political asylum and that Joseph Patrick Doherty's request to be released on bond, pending the final outcome of the immigration proceedings be immediately addressed; and be it further

"Resolved, That suitable copies of this Memorial, duly authenticated by the Secretary of the State, be transmitted to the Honorable George H.W. Bush, President of the United States, to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, to each Member of the Maine Congressional Delegation, to Attorney General Richard Thornburgh and Joseph Patrick Doherty."

POM-466. A concurrent resolution adopted by the Legislature of the State of Indiana; to the Committee on Labor and Human Resources:

"HOUSE CONCURRENT RESOLUTION No. 73

"Whereas because the United States Department of Labor underestimated by $121,000,000 the unemployment insurance workload nationally, Indiana will receive $2,300,000 less than expected; and

"Whereas the $2,300,000 shorfall in funding for administration of the unemployment insurance program in Indiana during the Fiscal Year 1990 will force the state to discontinue unemployment insurance services at seventeen full time Workforce Indiana offices, to eliminate unemployment insurance services at forty-five part-time offices, and to lay off up to 100 part-time employees; and

"Whereas it is estimated that the United States Department of Labor has more than $3,000,000,000 in funds paid by employers to finance 100% of the costs of administering the unemployment insurance programs; and

"Whereas the severeity of the Department of Labor underfunding threatens the integrity of the unemployment insurance programs in Indiana: Therefore, be it,

"Resolved by the House of Representatives of the General Assembly of the State of Indiana, the Senate Concurring:

"Section 1. That the General Assembly of the State of Indiana urges the Congress of the United States to act quickly to restore the $121,000,000 cut from the budget for unemployment insurance staff and operations.

"Section 2. That copies of this Resolution be sent to the Presiding Officers and to the Majority and Minority Leaders of both houses of the Congress of the United States, and to the Indiana Congressional Delegation."

POM-467. A joint resolution adopted by the Legislature of the State of Wyoming; to the Committee on Labor and Human Resources:

"ENROLLED JOINT RESOLUTION No. 1

"Whereas the Alcohol, Drug Abuse and Mental Health Block Grant as established permitted states to determine service needs and treatment priorities within the areas of alcohol and drug abuse and mental health; and

"Whereas the prescriptive set asides and requirements are a significant change in the Block Grant and an encroachment by the federal government upon the state's discretion to determine service priorities; and

"Whereas it is vital to the management of the Block Grant under Wyoming's unique circumstances as a frontier state that state agencies and citizens determine the service priorities; and

"Whereas the designation of target groups is appropriate, but the prescriptive set asides and requirements are inappropriate and in fact impossible to manage in a frontier state; and

"Whereas Wyoming could attempt to manage the Block Grant to meet the technical requirements but in doing so would not adequately respond to the substance abuse, treatment and rehabilitation needs of Wyoming citizens; and

"Whereas Wyoming's treatment and rehabilitation programs must be responsive to a wide array of substance abuse and alcohol related problems; and

"Whereas additional prescriptive set asides and requirements would jeopardize the existence of Wyoming's treatment and rehabilitation programs: Now, therefore, be it

"Resolved by the Members of the Legislature of the State of Wyoming:

"Section 1. That the State of Wyoming opposes without equivocation the federal government's prescriptive set asides and requirements for the use of the Alcohol, Drug Abuse and Mental Health Block Grant.

"Section 2. That the State of Wyoming opposes the absence of waivers for these requirements when Wyoming cannot meet the prescriptive set asides and requirements. The continued imposition of inappropriate set asides and requirements creates the potential of the state of Wyoming returning the federal monies or using the monies in a manner that is not responsive to the substance abuse, treatment and rehabilitation needs of Wyoming citizens.

"Section 3. That the Secretary of State of Wyoming send copies of this resolution to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the United States Congress, each member of the Wyoming Congressional Delegation and the Secretary of the Department of Health and Human Services."

POM-468. A resolution adopted by the City Council of Duluth, Minnesota favoring the reauthorization of the Low-Income Home Energy Assistance Program and an increase in its appropriation for fiscal year 1991 and subsequent years; to the Committee on Labor and Human Resources.

POM-469. A resolution adopted by the California Republican Party expressing opposition to H.R. 2190 and S. 874, the National Voter Registration Acts; to the Committee on Rules and Administration.

POM-470. A resolution adopted by the Legislature of the State of South Carolina; to the Committee on Veterans' Affairs.

"CONCURRENT RESOLUTION

"Whereas the late Ralph H. Johnson was Private First Class, United States Marine Corps, Company A, 1st Reconnaissance Battalion, 1st Marine Division (Rein), FMF; and

"Whereas he was born on January 11, 1949, at Charleston, South Carolina; and

"Whereas he entered the military service of his country at Oakland, California, and he died near the Quan Duc Valley, Republic of Vietnam, on March 5, 1968; and

"Whereas he was cited for conspicuous gallantry and intrepidity at the risk of his life above and beyond the call of duty while serving as a reconnaissance scout with Company A in action against the North Vietnamese Army and Viet Cong forces; and

"Whereas his bravery and gallantry saved another life at the cost of his own and inspired valor and selfless devotion to duty among others in keeping with the highest traditions of the Marine Corps and the United States Naval Service; and

"Whereas for his heroism he was awarded the Congressionial Medal of Honor; and

"Whereas it would be fitting memorial indeed to this great South Carolinian and American, and it would honor the heroism of thousands of young Americans who served the cause of freedom in Vietnam, to name the Veterans Administration Hospital in Charleston for the late Ralph H. Johnson: Now, therefore, be it

"Resolved by the Senate, the House of Representatives concurring: That the General Assembly of the State of South Carolina, by this resolution, memorializes Congress to take whatever action may be necessary to name the Veterans Administration Hospital in Charleston, South Carolina in honor of the late Ralph H. Johnson of Charleston County, a great South Carolinian and American and recipient of the Congressional Medal of Honor who gave his life in the cause of freedom while in the service of his country in Vietnam: Be it further

"Resolved, That a copy of this resolution be forwarded to the President of the United States Senate, the Speaker of the United States House of Representatives, and all eight members of South Carolina's congressional delegation, all at Washington, D.C."

POM-471. A joint resolution adopted by the Legislature of the State of Idaho; to the Committee on Commerce, Science, and Transportation:

"HOUSE JOINT MEMORIAL No. 18

"Whereas an earthquake measuring 7.1 on the Richter Scale caused 66 deaths and an estimated $5,000,000,000 in direct economic damages to 11 northern California counties on October 17, 1989; and

"Whereas in 1983, Idaho suffered an earthquake measuring 7.2 on the Richter Scale in the Challis area which caused two deaths and occasioned substantial property damage throughout the southern portion of the state which was estimated to have exceeded $12,000,000 in damages; and

"Whereas during this century there have been more than ten Idaho earthquake recorded with a magnitude greater than 6.0 on the Richter Scale; and

"Whereas each year there are approximately three or four earthquake in Idaho measuring more than 4.0 on the Richter Scale; and

"Whereas Idaho is within the region of the United States which is classified as having moderate to major risk or earthquake damage and injury; and

"Whereas all five states of the Pacific Northwest are vulnerable to serious earthquakes, and major seismic damage anywhere in the region will adversely affect the highly interdependent economies of all five states; and

"Whereas the scientific community continues to warn that the United States is on the verge of a major earthquake within the next 20 to 30 years with anticipated overall property damage losses alone estimated at $70,000,000,000; and

"Whereas according to the Congress of the United States, all 50 states are vulnerable to the hazards of earthquake and at least 39 are subject to major or moderate seismic risk; and

"Whereas 70 million Americans are exposed to severe earthquake risk and an additional 120 million are exposed to moderate earthquake risk; and

"Whereas the Director of the National Center for Earthquake Engineering Research at the State University of New York at Buffalo, New York, states that "The probability of (an earthquake) occurring somewhere in the Eastern United States before the year 2000 can be considered better than 75 to 95 percent. Before the year 2010, nearly 100 percent"; and

"Whereas a catastrophic earthquake in a populated, developed area would inflict severe damage on the nation's economy; and

"Whereas the citizenry, insurance companies and the government at all levels need to make advance preparations for a cooperative effort to respond to a major earthquake disaster; and

"Whereas the Earthquake Project has developed a program for both a primary resi-

dential earthquake program and a federal reinsurance program to provide an economic safety net in the event of a major earthquake; and

"Whereas the Federal Earthquake Insurance and Reinsurance Corporation Act developed by the Earthquake Project would insure that the public receives affordable, reliable, and adequate insurance against the risk of earthquake; that people, businesses and all levels of government would be protected by providing for the prompt and efficient handling of claims, which will reduce the inevitable economic fallout from the devastating earthquake and avoid the necessity of large amounts of federal disaster relief by relying on a prefunding mechanism through the vehicle of insurance: Now, therefore, be it

Resolved by the members of the Second Regular Session of the Centennial Idaho Legislature, the House of Representatives and the Senate concurring therein, That we respectfully request the current administration, and the Congress of the United States, to study and consider carefully the Earthquake Project's program in order to determine whether such a program should be established in the United States to insure against a catastrophic earthquake: Be it further,

"Resolved, That the Chief Clerk of the House of Representatives be, and she is hereby authorized and directed to forward a copy of this Memorial to the President of the Senate and the Speaker of the House of Representatives of Congress, and the congressional delegation representing the State of Idaho in the Congress of the United States."

SENATE RESOLUTION 271—RELATIVE TO THE DEATH OF SPARK M. MATSUNAGA, A SENATOR FROM THE STATE OF HAWAII

Mr. CRANSTON (for Mr. INOUYE, for himself, Mr. MITCHELL, Mr. DOLE, Mr. ADAMS, Mr. ARMSTONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BINGAMAN, Mr. BOND, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BREAUX, Mr. BRYAN, Mr. BUMPERS, Mr. BURDICK, Mr. BURNS, Mr. BYRD, Mr. CHAFEE, Mr. COATS, Mr. COCHRAN, Mr. COHEN, Mr. CONRAD, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DASCHLE, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DOMENICI, Mr. DURENBERGER, Mr. EXON, Mr. FORD, Mr. FOWLER, Mr. GARN, Mr. GLENN, Mr. GORE, Mr. GORTON, Mr. GRAHAM, Mr. GRAMM, Mr. GRASSLEY, Mr. HARKIN, Mr. HATCH, Mr. HATFIELD, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. JEFFORDS, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. KERREY, Mr. KERRY, Mr. KOHL, Mr. LAUTENBERG, Mr. LEAHY, Mr. LEVIN, Mr. LIEBERMAN, Mr. LOTT, Mr. LUGAR, Mr. MACK, Mr. MCCAIN, Mr. MCCLURE, Mr. MCCONNELL, Mr. METZENBAUM, Ms. MIKULSKI, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. PACKWOOD, Mr. PELL, Mr. PRESSLER, Mr. PRYOR, Mr. REID, Mr. RIEGLE, Mr. ROBB, Mr. ROCKEFELLER, Mr. ROTH, Mr. RUDMAN, Mr. SANFORD, Mr. SARBANES, Mr. SASSER, Mr. SHELBY, Mr. SIMON, Mr. SIMPSON, Mr. SPECTER, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, Mr. WILSON, and Mr. WIRTH) submitted the following resolution; which was considered and agreed to:

S. RES. 271

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable Spark M. Matsunaga, late a Senator from the State of Hawaii.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased Senator.

CLEAN AIR ACT AMENDMENTS

The text of the bill S. 1630, as passed by the Senate on April 3, 1990; is as follows:

S. 1630

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

This Act may be cited as the "Clean Air Act Amendments of 1990".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
TITLE I—ATTAINMENT AND MAINTENANCE OF AMBIENT AIR QUALITY STANDARDS
Sec. 101. Designation of areas.
Sec. 102. Enhanced monitoring and inventories.
Sec. 103. Transportation guidance.
Sec. 104. General planning requirements.
Sec. 105. Federal facilities.
Sec. 106. General provisions for nonattainment areas.
Sec. 107. Additional requirements for ozone nonattainment areas.
Sec. 108. Additional requirements for carbon monoxide nonattainment areas.
Sec. 109. Additional requirements for PM-10 nonattainment areas.
Sec. 109A. Additional requirements for areas designated nonattainment for sulfur dioxide, nitrogen oxides, or lead.
Sec. 110. Interstate pollution.
Sec. 111. Visibility.
Sec. 112. Outer continental shelf activities.
Sec. 113. Indian tribes.
Sec. 114. Miscellaneous and conforming amendments.
Sec. 115. Role of secondary standards.
Sec. 116. International border areas.
Sec. 117. Environmental impact statement.
Sec. 118. Establishment of program to monitor and improve air quality in regions along the border between the United States and the United States of Mexico.
Sec. 119. States authority to regulate.
TITLE II—MOBILE SOURCES
Sec. 201. Emissions standards for certain motor vehicles.
Sec. 202. Carbon monoxide emissions at cold temperatures.
Sec. 203. Control of vehicle refueling emissions.
Sec. 204. Evaporative emissions.
Sec. 205. Onboard emission diagnostic systems.
Sec. 206. Clean alternative fuels program.
Sec. 207. Light duty vehicle useful life.
Sec. 208. Research on heavy-duty vehicles.
Sec. 209. Warranties.
Sec. 210. Non-road engines.
Sec. 211. Prohibition on production of engines requiring leaded gasoline.
Sec. 212. Motor vehicle testing and certification.
Sec. 213. In-use compliance—recall.
Sec. 214. Fuel volatility.
Sec. 215. Desulfurization.
Sec. 216. Lead phasedown.
Sec. 217. Fuel quality.
Sec. 218. Oxygenated fuels.
Sec. 219. Misfueling.
Sec. 220. Urban buses.
Sec. 221. Enforcement.
Sec. 222. Coordination of Federal transportation and environmental policies.
Sec. 223. Federal compliance.
Sec. 224. Ethanol substitute for diesel.
Sec. 225. Fuel and fuel additive importers.
Sec. 226. EPA study of magnetic levitation.
TITLE III—AIR TOXICS
Sec. 301. Hazardous air pollutants.
Sec. 302. Other provisions.
Sec. 303. Chemical process safety management.
Sec. 304. Accident prevention.
Sec. 305. Conforming amendments.
Sec. 306. Municipal waste combustion: Air emissions.
Sec. 307. Ash management and disposal.
Sec. 308. Consultation.
Sec. 309. Development of refuse derived fuel plant.
Sec. 310. Emissions study.
TITLE IV—ACID DEPOSITION CONTROL
Sec. 401. Acid deposition control.
Sec. 402. Fossil fuel use.
Sec. 403. Repeal of percent reduction.
Sec. 404. Acid deposition standards.
Sec. 405. National acid lakes registry.
Sec. 406. Industrial SO_2 emissions.
Sec. 407. Sense of the Congress on emission reductions costs.
Sec. 408. Continuation of the National Acid Precipitation Assessment Program.
Sec. 409. Monitor acid rain program in Canada.
Sec. 410. Report on clean coal technologies export programs.
Sec. 411. Acid deposition research by the United States Fish and Wildlife Service.
Sec. 412. Study of buffering and neutralizing agents.
TITLE V—PERMITS
Sec. 501. Permits.
Sec. 502. Definition of emission standard or limitation.
TITLE VI—ENFORCEMENT AND REAUTHORIZATION
Sec. 601. Section 113 enforcement.
Sec. 602. Compliance certification.
Sec. 603. Contractor inspections.
Sec. 604. Administrative enforcement subpoenas.
Sec. 605. Emergency orders.
Sec. 606. Contractor listings.
Sec. 607. Judicial review pending reconsideration of regulation.
Sec. 608. Citizen suits and petitions.
Sec. 609. Enhanced implementation and enforcement of new source review requirements.
Sec. 610. Moveable stationary sources.
Sec. 611. Economic impact analyses.
Sec. 612. Authorizations.
Sec. 613. Asbestos in schools.
Sec. 614. Savings provisions and effective dates.

TITLE VII—STRATOSPHERIC OZONE AND GLOBAL CLIMATE PROTECTION
Sec. 701. Subpart B repeal.
Sec. 702. Stratospheric ozone and global climate protection.
TITLE VIII—MISCELLANEOUS EXEMPTIONS
Sec. 801. Exemptions for stripper wells.
TITLE IX—ASBESTOS ABATEMENT
Sec. 901. Amendments to Toxic Substances Control Act.
Sec. 902. Effective date.
TITLE X—SOLAR AND RENEWABLE ENERGY
Sec. 1001. Incentives.
TITLE XI—MISCELLANEOUS PROVISIONS
Sec. 1101. Clean air study of southeastern New Mexico.
Sec. 1102. Impact on small communities.
Sec. 1103. Research, investigation, training, and other activities.
TITLE I—ATTAINMENT AND MAINTENANCE OF AMBIENT AIR QUALITY STANDARDS

DESIGNATION OF AREAS

SEC. 101. (a) DESIGNATIONS.—Section 107 of the Clean Air Act is amended by adding the following new subsection:

"(f)(1)(A) Upon promulgation of a new or revised national ambient air quality standard, the Governor of each State shall (and at any other time the Governor of a State deems appropriate the Governor may) submit to the Administrator a list of all areas (or portions thereof) in the State, designating as—

"(i) nonattainment, any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the national primary or secondary ambient air quality standard for the pollutant,

"(ii) attainment, any area (other than an area identified in clause (i)) that meets the national primary or secondary ambient air quality standard for the pollutant, or

"(iii) unclassifiable, any area that cannot be classified on the basis of available information as meeting or not meeting the national primary or secondary ambient air quality standard for the pollutant.

The Administrator may not require the Governor to submit the required list sooner than one hundred and twenty days, or later than three hundred and sixty-five days, after promulgating a new or revised national ambient air quality standard.

"(B)(i) Upon promulgation or revision of a national ambient air quality standard, the Administrator shall promulgate the designations of all areas (or portions thereof) submitted under subparagraph (A) as expeditiously as practicable, but in no case later than six months from the required date of submission of the State list required under subparagraph (A). Such period may be extended for specific areas for up to six additional months in the event the Administrator has insufficient information to promulgate the designations.

"(ii) In making the promulgations required under clause (i), the Administrator may make such modifications as the Administrator deems necessary to the designations of the areas (or portions thereof) submitted under subparagraph (A) (including to the boundaries of such areas or portions thereof). Whenever the Administrator intends to make a modification, the Administrator shall notify the State and provide such State with an opportunity to demonstrate why any proposed modification is inappropriate. The Administrator shall give such notification no later than one hundred and twenty days prior to the date the Administrator promulgates the designation, as may be modified. If the Governor fails to submit the list in whole or in part, as required under subparagraph (A), the Administrator shall promulgate the designation that the Administrator deems appropriate for any area (or portion thereof) not designated by the State.

"(iii) If the Governor of any State, on the Governor's own motion, under subparagraph (A), submits a list of areas (or portions thereof) in the State designated as nonattainment, attainment, or unclassifiable, the Administrator shall act on such designations in accordance with the relevant procedures under subsection (d)(5) (relating to redesignation).

"(2) A designation for an area (or portion thereof) made pursuant to this subsection shall remain in effect until the area (or portion) is redesignated pursuant to subsection (d)(5).

"(3)(A) Each area which, as of the last calendar year before the date of enactment of this subsection for which data are available, did not meet the national primary ambient air quality standard for ozone or such standard for carbon monoxide, as determined in accordance with the same methods as are used under regulations of the Administrator for determining attainment of the standard, is hereby designated by operation of law as nonattainment for the applicable pollutant.

"(B)(i) Within one hundred and twenty days of the date of enactment of the Clean Air Act Amendments of 1990, each Governor of each State shall submit to the Administrator a description of the boundaries, identified by the Governor, of the areas within such State that were designated nonattainment under subparagraph (A) of this paragraph or under paragraph (4).

"(ii) No later than one hundred and twenty days after the date the Governor is required to submit the description of boundaries required under clause (i), the Administrator shall promulgate such boundaries as supplements to the designations under subparagraph (A) of this paragraph and under paragraph (4), making such modifications to such boundaries as the Administrator may deem necessary, in the same manner, and under the same procedure, as is applicable under paragraph (1)(B)(ii), except that the phrase 'sixty days' shall be substituted for the phrase 'one hundred and twenty days' in the clause. If the Governor does not submit, in accordance with clause (i), the required identification of boundaries for an area (or portion thereof), the Administrator shall promulgate the boundaries that the Administrator deems appropriate for such area.

"(C) No nonattainment area may be redesignated as an attainment area under this paragraph.

"(D) No later than thirty days after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall issue guidance describing the criteria upon which the identification of boundaries required under subparagraph (A) shall be based.

"(4) Until redesignation by the Administrator, each area which—

"(A) is identified in 52 Federal Register 29383 (August 7, 1987) as a Group I area (except to the extent that such information was modified by the Administrator prior to the date of enactment of the Clean Air Act Amendments of 1990), or

"(B) contains a site for which air quality monitoring data shows a violation of the national ambient air quality standard for PM-10 before the date of enactment of this subsection (as determined under part 50, appendix K of title 40 of the Code of Federal Regulations), is hereby designated by operation of law nonattainment for PM-10. All other areas of the country not described in subparagraph (A) or (B) are designated unclassifiable for PM-10, until such time as the Administrator redesignates any such area. Any designation for particulate matter (measured in terms of total suspended particulates) which the Administrator promulgated pursuant to section 107(d), as in effect before the date of enactment of this subsection, shall remain in effect for purposes of implementing the maximum allowable increases in concentrations of particulate matter (measured in terms of total suspended particulates) pursuant to section 163(d), until the Administrator determines that such designation is no longer necessary for such purpose.

"(5) PROCEDURE.—(A) The Administrator shall publish a notice in the Federal Register promulgating any designation under paragraph (1) or (7) or announcing any designation under paragraph (3) or (4), or promulgating any redesignation under subsection (d)(5).

"(B) Promulgation or announcement of a designation or boundaries under paragraph (1), (3), (4) or (7) shall not be subject to the provisions of sections 553 through 557 of title 5 of the United States Code (relating to notice and comment), except nothing herein should be construed as precluding such public notice and comment whenever possible.

"(6)(A) Notwithstanding any other provision of this Act, any ozone nonattainment area that—

"(i) did not violate the national ambient air quality standards for ozone for the thirty-six month period commencing on January 1, 1987, and ending on December 31, 1989, and

"(ii) by the date of enactment of this paragraph, submitted to the Administrator all measures intended to satisfy the applicable requirement for reasonably available control measures, reasonably available control technology, and vehicle inspection and maintenance under section 172(b) (as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1990), as interpreted in guidance issued by the United States Environmental Protection Agency prior to the date of enactment of this paragraph,

shall, within thirty days of enactment of this paragraph, either be redesignated by the Administrator as an attainment area for ozone or be classified by the Administrator, in lieu of any classification that might otherwise apply under section 181, as a transitional ozone nonattainment area. For the period from the date of such classification as a transitional ozone nonattainment area until December 31, 1992, each such area shall not be subject to the requirements of the Clean Air Act Amendments of 1990 (other than the requirements of this paragraph), and shall be subject to the provisions of this Act (except the provisions requiring a demonstration of attainment of the national ambient air quality standards for ozone) which were in effect immediately prior to the date of enactment of such amendments.

"(B) Notwithstanding section 107(d)(5)(C), the Administrator may redesignate a transitional ozone nonattainment area to attainment if such area satisfies the requirements of section 107(d)(5) and part D as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1990 (except the requirements relating to attainment of the national ambient air quality standards for ozone, as such requirements were interpreted in guidance issued by the United States Environmental Protection Agency prior to the date of enactment of such amendments.

"(C) Whenever a location within a transitional ozone nonattainment area violates the national ambient air quality standards for ozone during a thirty-six month period that includes all or a part of the period commencing on January 1, 1990, and ending on December 31, 1992, such area shall promptly be classified by the Administrator pursuant to section 181 and be subject to the requirements applicable by virtue of such classification, except that any absolute, fixed date applicable in connection with any such requirement is extended for such area by operation of law by a period equal to the length of time between the date of enactment of this paragraph and the date the area is classified pursuant to section 181.

"(D) Any transitional ozone nonattainment area that, as of January 1, 1993, has not been either redesignated to attainment or classified under section 181 (pursuant to subparagraph (C) of this paragraph) shall on that date become subject to the requirements of the Clean Air Act Amendments of 1990 that would have applied to such area if this paragraph has not been enacted, except that any absolute, fixed date applicable in connection with any such requirement is extended for such area by operation of law by a period equal to the length of time between the date of enactment of such amendments and December 31, 1992.

"(7) The Administrator may, in the Administrator's discretion, at any time the Administrator deems appropriate, require a State to designate areas (or portions thereof) with respect to the national ambient air quality standard for lead in effect as of the date of enactment of this paragraph, in accordance with the procedures under paragraph (1).".

(b) REDESIGNATION.—Section 107(d)(5) of the Clean Air Act is amended to read as follows:

"(5)(A) Based on a request for area redesignation by the Governor of any State, or at any time on the Administrator's own motion, the Administrator may revise the designation of any area or portion of an area in accordance with this section. In the case of a complete request by the Governor of any State to revise the designation of any area or portion of an area from nonattainment to attainment, the Administrator shall approve or deny such request within eighteen months of the Administrator's receipt of the submittal.

"(B) Whenever the Administrator obtains evidence demonstrating that an area exceeds a national ambient air quality standard for any pollutant and is not designated as a nonattainment area for such pollutant pursuant to this section, the Administrator shall, within ninety days of receiving such evidence, propose, and within one hundred and eighty days promulgate by rule, a revised designation of such area as nonattainment for such pollutant, and where applicable, a classification of such area in accordance with part D.

"(C) Except as otherwise provided in subsection (f)(6), the Administrator may redesignate a nonattainment area to attainment only if—

"(i) the Administrator promulgates the redesignation by rule, after notice and opportunity for comment;

"(ii) the Administrator determines that the area has attained the national ambient air quality standard;

"(iii) the Administrator has fully approved the applicable implementation plan;

"(iv) the Administrator determines that the improvement in air quality is due to permanent reductions in emissions;

"(v) the Administrator has fully approved a maintenance plan for the area as meeting the applicable requirements of section 110 and part D; and

"(vi) the State containing such area has met all requirements applicable to the area under section 110 and part D.

"(D) The Administrator shall not redesignate any area from nonattainment to unclassifiable.".

(c) Section 103 of the Clean Air Act is amended by adding at the end thereof the following:

"(g) STUDIES.—(1) The Director of the National Institute of Environmental Health Sciences may conduct a program of basic research to identify, characterize, and quantify risks to human health from air pollutants. Such research shall be conducted primarily through a combination of university and medical school-based grants, as well as through intramural studies and contracts.

"(2) The Director of the National Institute of Environmental Health Sciences shall conduct a program for the education and training of physicians in environmental health.

"(3) The director shall assure that such programs shall not conflict with research undertaken by the Administrator.

"(4) There are authorized to be appropriated to the National Institute of Environmental Health Sciences such sums as may be necessary to carry out the purposes of this subsection.".

ENHANCED MONITORING AND INVENTORIES

SEC. 102. Section 108 of the Clean Air Act is amended by adding the following at the end thereof:

"(g) GUIDELINES FOR ENHANCED MONITORING AND INVENTORIES.—Not later than six months after enactment of this subsection, the Administrator shall publish the following:

"(1) guidelines for enhanced monitoring by the State or local air pollution control agencies of emissions of pollutants (or precursors thereof) for which there is a national ambient air quality standard established under section 109, including guidelines governing the frequency, location, and maintenance of monitors;

"(2) guidelines for improving the inventories of emissions from mobile and stationary sources (including, but not limited to, emissions factors for estimating emissions from stationary sources which emit less than twenty-five tons per year, procedures for estimating motor vehicle mile of travel, and emissions factors for other area sources) of pollutants (or precursors thereof) for which there is a national ambient air quality standard established under section 109; and

"(3) guidelines for emission reduction requirements of this Act (including, but not limited to, preparation of base inventories, accounting for stationary and mobile source growth, and calculating the emission reductions that are creditable toward specific reduction requirements).

Failure by the Administrator to publish guidelines required under paragraphs (1) and (2) shall not affect other applicable deadlines under this Act, including, but not limited to requirements under section 110 or part D.".

TRANSPORTATION GUIDANCE

SEC. 103. (a) TRANSPORTATION PLANNING GUIDANCE.—Section 108(e) of the Clean Air Act is amended by deleting the first sentence and inserting in lieu thereof the following: "The Administrator shall, after consultation with the Secretary of Transportation, and after providing public notice and opportunity for comment, and with State and local officials, within nine months after enactment of the Clean Air Act Amendments of 1989 and periodically thereafter as necessary to maintain a continuous transportation-air quality planning process, update the June 1978 Transportation-Air Quality Planning Guidelines and publish guidance on the development and implementation of transportation and other measures necessary to demonstrate and maintain attainment of national ambient air quality standards.".

(b) TRANSPORTATION CONTROL MEASURES.—Section 108(f)(1) of the Clean Air Act is amended by deleting all after "(f)" through the end of subparagraph (A) and inserting in lieu thereof the following:

"(1) The Administrator shall publish and make available to appropriate Federal, State, and local environmental and transportation agencies not later than one year after enactment of the Clean Air Act Amendments of 1990, and from time to time thereafter—

"(A) information prepared, as appropriate, in consultation with the Secretary of Transportation, regarding the formulation and emission reduction potential of transportation control measures related to carbon monoxide, ozone precursors, particulate matter, carbon dioxide, and toxic air pollutants, including, but not limited to—

"(i) programs for improved public transit;

"(ii) restriction of certain roads or lanes to, or construction of such roads or lanes for use by, passenger buses or high occupancy vehicles;

"(iii) employer-based transportation management plans;

"(iv) trip-reduction ordinances;

"(v) traffic flow improvement programs that achieve emission reductions;

"(vi) fringe and transportation corridor parking facilities serving multiple occupancy vehicle programs or transit service;

"(vii) programs to limit or restrict vehicle use in downtown areas or other areas of emission concentration particularly during periods of peak use, through road use charges, tolls, parking surcharges, or other pricing mechanisms, vehicle restricted zones or periods, or vehicle registration programs;

"(viii) programs for the provision of all forms of high-occupancy, shared-ride services;

"(ix) transportation management plans for shopping centers;

"(x) programs to limit portions of road surfaces or certain sections of the metropolitan area to the use of non-motorized vehicles or pedestrian use, both as to time and place;

"(xi) programs for secure bicycle storage facilities and other facilities, including bicycle lanes, for the convenience and protec-

tion of bicyclists, in both public and private areas;

"(xii) programs to control extended idling of vehicles;

"(xiii) programs for the conversion of fleet vehicles to cleaner engines or fuels, or to otherwise control fleet vehicle operations;

"(xiv) programs to reduce motor vehicle emissions which are caused by extreme cold start conditions;

"(xv) employer-sponsored programs to permit flexible work schedules;

"(xvi) programs and ordinances to facilitate non-automobile travel, provision and utilization of mass transit, and to generally reduce the need for single-occupant vehicle travel, as part of transportation planning and development efforts of a locality;

"(xvii) programs for new construction and major reconstructions of paths, tracks or areas solely for the use by pedestrian or other non-motorized means of transportation when economically feasible and in the public interest. For purposes of this clause, the Administrator shall also consult with the Secretary of the Interior; and

"(xviii) program to encourage the voluntary removal from use and the marketplace of pre-1980 model year light duty vehicles and pre-1980 model light duty trucks.".

GENERAL PLANNING REQUIREMENTS

SEC. 104. (a) SUBMISSION OF PLANS.—Section 110(a)(1) of the Clean Air Act is amended by striking "(1)" after "(a)" and by striking "nine" each time it appears and inserting in lieu thereof "twenty-four".

(b) STATE IMPLEMENTATION PLAN ELEMENTS.—Section 110 of the Clean Air Act is amended by striking subsection (a)(2) and subsection (a)(3)(A) and inserting the following:

"(b) MAINTENANCE PLANS.—

"(1) Whenever an area containing all or part of a metropolitan statistical area or consolidated metropolitan statistical area is designated attainment or unclassifiable with respect to a national ambient air quality standard, the Administrator shall, and in other cases may, require the State containing such area to submit an implementation plan (including such emissions inventories as the Administrator may prescribe) that provides for maintenance of such standard for at least twenty years from the date such plan is submitted. Every ten years after submission of the last twenty-year maintenance plan, the State shall submit an updated twenty-year maintenance plan.

"(2) Any plan required to be submitted pursuant to paragraph (1) shall meet the applicable requirements of subsection (c) (concerning general plan requirements).

"(3) Any plan required to be submitted pursuant to paragraph (1) shall be submitted by the State in accordance with such schedules as the Administrator may reasonably prescribe.

"(c) GENERAL REQUIREMENTS FOR IMPLEMENTATION PLAN SUBMITTALS.—Each implementation plan submitted by a State under this Act shall be adopted by the State after reasonable notice and public hearing. Each such plan shall—

"(1) include enforceable emission limitations and other control measures, means, or techniques as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of this Act;

"(2) provide for establishment and operation of appropriate devices, methods, systems, and procedures necessary to—

"(A) monitor, compile, and analyze data on ambient air quality, and

"(B) upon request, make such data available to the Administrator;

"(3) include a program to provide for the enforcement of the measures described in paragraph (1), and regulation of the modification and construction of any stationary source within the areas covered by the plan as necessary to assure that national ambient air quality standards are achieved and maintained, including a permit program as required in parts C and D;

"(4) contain adequate provisions—

"(A) prohibiting any source or other type of emissions activity within the State from emitting any air pollutant in amounts which will—

"(i) contribute significantly to nonattainment in or interfere with maintenance by, any other State with respect to any such national primary or secondary ambient air quality standard,

"(ii) interfere with measures required to be included in the applicable implementation plan for any other State under part C to prevent significant deterioration of air quality or to protect visibility, or

"(iii) contribute to atmospheric loadings of pollutants or their transformation products which may reasonably be anticipated to cause or contribute to an adverse effect on public health or welfare or the environment in any other State,

"(B) insuring compliance with the applicable requirements of sections 126 and 115 (relating to interstate and international pollution abatement);

"(5) provide—

"(A) necessary assurances that the State (or, except where the Administrator deems inappropriate, the general purpose local government or governments, or a regional agency designated by the State or general purpose local governments for such purpose) will have adequate personnel, funding, and authority under State (and, as appropriate, local) law to carry out such implementation plan (and is not prohibited by any provision of Federal or State law from carrying out such implementation plan or portion thereof), including a statement from the attorney general (or the attorney for those relevant State (or, as appropriate, local) air pollution control agencies which have independent legal counsel) that the laws of such State (or locality) provide adequate authority to carry out such implementation plan,

"(B) requirements that the State comply with the requirements respecting State boards under section 128, and

"(C) necessary assurances that, where the State has relied on a local or regional government, agency, or instrumentality for the implementation of any plan provision, the State has responsibility for ensuring adequate implementation of such plan provisions;

"(6) require, as may be prescribed by the Administrator—

"(A) the installation, maintenance, and replacement of equipment, and the implementation of other necessary steps, by owners or operators of stationary sources to monitor emissions from such sources,

"(B) periodic reports on the nature and amounts of emissions and emissions-related data from such sources, and

"(C) correlation of such reports by the State agency with any emission limitations or standards established pursuant to this Act, which reports shall be available at reasonable times for public inspection;

"(7) provide for authority comparable to that in section 303 and adequate contingency plans to implement such authority;

"(8) provide for revision of such plan—

"(A) from time to time as may be necessary to take account of revisions of such national primary or secondary ambient air quality standard or the availability of improved or more expeditious methods of attaining such standard, and

"(B) except as provided in section 110(h)(2), whenever the Administrator finds on the basis of information available to him that the plan is substantially inadequate to attain the national ambient air quality standard which it implements or to otherwise comply with any additional requirements established under this Act;

"(9) in the case of a plan or plan revision for an area designated as nonattainment under section 107, meet the applicable requirements of part D (relating to nonattainment areas);

"(10) meet the applicable requirements of section 121 (relating to consultation), section 127 (relating to public notification), and part C (relating to prevention of significant deterioration of air quality and visibility protection);

"(11) provide for—

"(A) the performance of such air quality modeling as the Administrator may prescribe for the purpose of predicting the effect on ambient air quality of any emissions of any air pollutant for which the Administrator has established a national ambient air quality standard, and

"(B) the submission, upon request, of data related to such air quality modeling to the Administrator;

"(12) require the owner or operator of each major stationary source to pay to the permitting authority, as a condition of any permit required under this Act, a fee sufficient to cover—

"(A) the reasonable costs of reviewing and acting upon any application for such a permit, and

"(B) if the owner or operator receives a permit for such source, the reasonable costs of implementing and enforcing the terms and conditions of any such permit (not including any court costs or other costs associated with any enforcement action).

"(d) ENVIRONMENTAL PROTECTION AGENCY ACTION ON PLAN SUBMISSIONS.—

"(1)(A) The Administrator shall promulgate minimum criteria that any plan submission must meet before the Administrator is required to act on such submission under this subsection.

"(B) Within sixty days of the Administrator's receipt of a plan or plan revision, the Administrator shall determine whether each part of the plan or revision meets the minimum criteria established pursuant to subparagraph (A). Any plan or plan revision that a State submits to the Administrator, and that has not been determined by such date to have failed to meet the minimum criteria established pursuant to subparagraph (A), shall on that date be deemed by operation of law to meet such minimum criteria.

"(C) Where the Administrator determines that a plan submission (or part thereof) does not meet the minimum criteria established pursuant to subparagraph (A), the State shall be treated as not having made the submission (or, in the Administrator's discretion, part thereof).

"(2) Within twelve months of a determination by the Administrator (or a determination deemed by operation of law) under paragraph (1) that a State has submitted a plan or plan revision (or, in the Administrator's discretion, part thereof) that meets the

minimum criteria established pursuant to paragraph (1), the Administrator shall act on the submission in accordance with paragraph (3).

"(3) In the case of any submittal on which the Administrator is required to act under paragraph (2), the Administrator shall—

"(A) approve such submittal as a whole if it meets all of the applicable requirements of this Act, or

"(B) disapprove the submittal in whole (or approve it in part, based on criteria established by the Administrator, and, simultaneously with such partial approval or subsequently disapprove it in part) if it does not meet all of the applicable requirements of this Act.

"(4) Whenever the Administrator finds that the applicable implementation plan for any area is substantially inadequate to attain or maintain the relevant national ambient air quality standard, or to otherwise comply with any requirement of this Act, the Administrator shall require the State to revise the plan as necessary to correct such inadequacies. The Administrator shall notify the State of the inadequacies, and may establish reasonable deadlines for the submission of such plan revisions. Such findings and notice shall be public. Any finding under this paragraph shall, to the extent the Administrator deems appropriate, subject the State to the requirements of this Act to which the State was subject when it developed and submitted the plan for which such finding was made, except that the Administrator may adjust any dates applicable under such requirements as appropriate (except that the Administrator may not adjust any attainment date except as prescribed under part D).

"(5) Whenever the Administrator determines that his action approving, disapproving, or promulgating any plan or plan revision (or part thereof), was in error, the Administrator may, in the same manner as the approval, disapproval, or promulgation, revise such action as appropriate without requiring any further submission from the State. Such determination and the basis thereof shall be provided to the State and be public.

"(e) PLAN REVISIONS.—(1) Each revision to an implementation plan submitted by a State under this Act shall be adopted by the State after reasonable notice and public hearing. The Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement of this Act.

"(2)(A) Except as provided in subparagraph (B), each State that contains a nonattainment area shall fully implement all provisions of any implementation plan for such area that has been approved by the Administrator, in accordance with the schedules contained in the plan.

"(B) The State shall not relax a provision or schedule described in subparagraph (A) unless the Administrator has approved an alternative control measure pursuant to paragraph (3) of this subsection relating to such provision or schedule.

"(3) Nothing in this Act shall prohibit a State that contains a nonattainment area from revising the implementation plan of such State for such area to substitute an alternative control measure for a control measure in effect at the time of such revision (hereinafter referred to as an 'existing control measure'), if the State convincingly demonstrates, to the satisfaction of the Administrator, that the existing control measure is not otherwise required under this Act or under guidelines or regulations issued or promulgated by the Administrator and the alternative control measure—

"(A) is not included in the implementation plan to be revised;

"(B) is not otherwise required by this Act;

"(C) will provide a degree of emissions control that is equal to or greater than the degree of emissions control that the full implementation of the existing control measure would provide; and

"(D) will provide such degree of emissions control as expeditiously as would the full implementation of the existing control measure.

"(4) If the Administrator determines, after reasonable notice and public comment, that—

"(A) the State described in paragraph (3) has made a convincing demonstration required under such paragraph; and

"(B) the proposed revision to the implementation plan of the State meets the requirements of paragraph (1), the Administrator shall approve such revision.

"(f) FEDERAL IMPLEMENTATION PLANS.—

"(1) The Administrator may, after notice and opportunity for public comment, promulgate regulations setting forth an implementation plan, or portion thereof, for a State whenever the Administrator—

"(A) finds a State has failed to submit an implementation plan or revisions as required by this section or part C or D;

"(B) determines that a plan, or portion thereof, submitted by a State is not in accordance with the requirements of this section or part C or D.

"(2) With respect to each failure of a State described in section 176(a)(1) (A) or (B) as to a particular nonattainment area (but in no event, except as provided in paragraph (1), with respect to more than one such failure in any single year as to a particular area and pollutant), twelve months after the application under section 176(a)(1) or (3) of the first sanction applied with respect to such failure, and annually thereafter until such sanction is rescinded or the Administrator determines that the area has attained the relevant national ambient air quality standard (whichever is earlier), the Administrator shall promulgate, as a Federal measure to be included in the applicable implementation plan for the area—

"(A) in the case of an ozone nonattainment area—

"(i) a measure or combination of measures sufficient to achieve, within three years of such promulgation, volatile organic compound emission reductions from baseline emissions of at least three per centum of baseline emissions in such areas. Such baseline emissions and per centum emission reductions shall be calculated in accordance with the provisions of section 183(b)(3)(C)(i), (ii) and (iii). For purposes of meeting the requirements of this subparagraph, reductions in emissions of oxides of nitrogen, to the extent they will occur by the applicable deadline, may be substituted for all or part of the reductions of emissions of volatile organic compounds required by this clause at no less than one-to-one ratio (oxides of nitrogen to volatile organic compounds) if the Administrator determines that such reductions of emissions of oxides of nitrogen, together with whatever reductions of emissions of volatile organic compounds the Administrator is promulgating to meet the relevant requirements of this clause, would result in a reduction in ozone concentrations at least equivalent to that which would occur from the reductions in volatile organic compound emissions required under this clause. In the event a measure or combination of measures promulgated by the Administrator under this clause for a particular area in a particular year would achieve greater reductions in emissions of the relevant pollutant than the amount required under this clause, the Administrator may credit such excess emissions reductions toward meeting any emissions reductions requirement applicable for such area under this subparagraph in a subsequent year;

"(ii) as one of the measure or measures promulgated under clause (i) for the first year such promulgation is required, the control measure from the following list that will achieve the greatest reductions in emissions of volatile organic compounds in the area (unless the Administrator determines that other measures are more appropriate or each measure described in subclauses (I) through (III) is already substantially included in the applicable implementation plan for the relevant area)—

"(I) the measure required under section 183(a)(1)(B) (relating to a system for vapor recovery of emissions from the refueling of motor vehicles);

"(II) the measure required under section 183(a)(1)(A) (relating to an enhanced vehicle inspection and maintenance program to reduce hydrocarbon emissions); or

"(III) a measure requiring the application of reasonably available control technology for all sources of volatile organic compounds in the area covered by a Control Techniques Guideline (CTG) document issued by the Administrator and all other stationary sources in the area that have the potential to emit at least twenty-five tons per year of volatile organic compounds; and

"(B) in the case of a pollutant other than ozone, at least one control measure that will result in significant reductions in emissions of such pollutant.

"(3) In the event any court of the United States is presented with a request to modify an order or settlement agreement entered by the court implementing the requirements of section 110(c) of the Clean Air Act as in effect before the date of enactment of the Clean Air Act Amendments of 1990, such court shall, in considering and ruling on such request, consider the effect of such Amendments (including the changes made by such Amendments to the requirements for Federal implementation plans, the development of State implementation plans, and attainment dates) on such settlement agreement or order.

"(g) SAVINGS CLAUSE.—(1) Any provision of any applicable implementation plan or any revision thereof that was approved or promulgated by the Administrator pursuant to this section as in effect prior to the date of enactment of the Clean Air Act Amendments of 1990 shall remain in effect as part of such applicable implementation plan, except to the extent that a revision to such provision is approved or promulgated by the Administrator pursuant to this Act.

"(2) In the case of an area to which, immediately prior to the date of enactment of the Clean Air Act Amendments of 1990, the prohibition on construction or modification of major stationary sources prescribed in section 110(a)(2)(I) as in effect immediately prior to the date of enactment of the Clean Air Act Amendments of 1990 applied by virtue of a finding of the Administrator that the State containing such area had not submitted an implementation plan meeting the requirements of section 172(b)(6) (relating to establishment of a permit program) or

172(a)(1) (to the extent such requirements relate to provision for attainment of the primary national ambient air quality standard for sulfur oxides by December 31, 1982) as in effect immediately prior to the date of enactment of the Clean Air Act Amendments of 1990, no major stationary source of the relevant air pollutant or pollutants shall be constructed or modified in such area until the Administrator finds that the plan for such area meets the applicable requirements of section 172(c)(6)(A) (as redesignated by this Act), insofar as they relate to the permit requirements for construction of new or modified major stationary sources, and section 173(a) (relating to construction permit programs for such sources) or subpart 5 of part D (relating to attainment of the primary national ambient air quality standard for sulfur dioxide in effect as of the date of enactment of this paragraph), respectively.".

(c) CONFORMING AMENDMENTS.—Section 110 of the Clean Air Act is amended as follows:

(1) Redesignate subparagraph (B) of section 110(a)(3) as paragraph (1) of section 110(h) and, in this newly designated paragraph, strike the phrase "paragraph (2) of this subsection" and insert "subsection (c)".

(2) Redesignate subparagraph (C) of section 110(a)(3) as paragraph (2) of section 110(h) and, in this newly designated paragraph—

(i) strike the word "subsection" after the phrase "approved under this" and insert "section",

(ii) strike the reference to subsection (c) and insert "subsection (f)", and

(iii) strike "section 110 (f) or (g)" and insert "section 110 (l) or (m)" and in newly designated subsection (l)(1)(A), after "implementation plan" insert "or of any requirement under section 411 (concerning excess emissions penalties or offsets) of title IV of the Act".

(3) Delete subparagraph (D) of section 110(a)(3).

(4) Delete paragraph (4) of section 110(a).

(5) Delete paragraph (5) of section 110(a).

(6) Redesignate paragraph (6) of subsection (a) as subsection (i).

(7) Delete subsection (b).

(8) Delete paragraph (1), (2), (4), and (5) of subsection (c) and redesignate paragraph (c)(3) as subsection (j).

(9) Strike subsection (d) and add the following new subsection after subsection (j):

"(k) APPLICABLE IMPLEMENTATION PLAN.—(1) For purposes of this Act, an applicable implementation plan is the portion (or portions) of the implementation plan, or most recent revision thereof, which has been approved under this section or promulgated under subsection (f) and which implements the requirements of the Act. Such term includes any portion of an implementation plan which has been submitted by a State and approved by the Administrator. Notwithstanding any other provision of this Act, each provision of such implementation plan (and each permit in effect under such plan) shall remain in effect, and shall be enforced under this Act, until a revision of such plan is approved by the Administrator or a plan is promulgated by the Administrator under subsection (f).".

(10) Delete subsection (e).

(11) Redesignate subsections (f) through (j) as subsections (l) through (p).

(12) In newly designated subsection (m), strike "the required four month period" and inserting "twelve months of submission of the proposed plan revision".

(13) In newly designated subsection (n)—

(i) strike "one year after the date of enactment of the Clean Air Act Amendments of 1977 and annually thereafter" and insert "five years after the date of enactment of the Clean Air Act Amendments of 1990, and every three years thereafter"; and

(ii) strike the second sentence of paragraph (1).

(14) In newly designated subsection (o)—

(i) strike "110(f) or (g)" and inserting "110(l) or (m)"; and

(ii) strike "110(a)(3) and insert (110(e)".

(d) Section 110 of the Clean Air Act is amended by adding at the end the following:

"(q) SMALL BUSINESS STATIONARY SOURCE TECHNICAL AND ENVIRONMENTAL COMPLIANCE ASSISTANCE PROGRAM.—

"(1) Each State shall, after reasonable notice and public hearings, adopt and submit to the Administrator as part of the State implementation plan for such State or as a revision to such State implementation plan under this section, plans for establishing a small business stationary source technical assistance program. Such submission shall be made within 24 months after the date of enactment of this subsection. The Administrator shall approve such program if it includes, as appropriate, the following:

"(A) adequate mechanisms for developing, collecting, evaluating, and coordinating information concerning compliance methods and technologies for small business stationary sources (as defined in paragraph (6));

"(B) adequate mechanisms for advising small business stationary sources on pollution prevention, including providing information concerning alternative technologies, process changes, chemical products, and methods of operation that help reduce air pollution;

"(C) a designated State office within the relevant State agency to serve as ombudsman for small business stationary sources in connection with the implementation of this Act;

"(D) adequate mechanisms to assure that small business stationary sources receive notice of their rights under this Act in such manner and form as to assure reasonably adequate time for such sources to evaluate compliance methods and any relevant or applicable proposed or final regulation or standard issued under this Act; and

"(E) Such a program, may, at the discretion of the States include a voluntary Compliance Agreement for Term permits as described in paragraph (3) of this subsection.

"(2) The Administrator shall establish within 9 months after the date of the enactment of this section a small business stationary source technical assistance program. Such program shall—

"(A) assist the States in the development of the program required under paragraph (1) of this subsection and section 112(m);

"(B) issue technical guidance for the use of the States in the implementation of these programs that includes alternative control technologies and pollution prevention methods applicable to small business stationary sources.

"(3) The State may establish a permit program under part B of title III for small business stationary sources located within a nonattainment area, ozone transport area, or subject to a standard under section 112. Such program may provide that—

"(A) a small business stationary source may obtain a Compliance Agreement for Term permit under this subsection as a substitute for any general permit issued under section 353(e);

"(B) such Compliance Agreement for Term permit may be developed after consultation with the small business stationary source or with duly authorized representatives of the small business stationary sources;

"(C) Compliance Agreement for Term permits issued under this subsection to small business stationary source shall require compliance with applicable emission limitations, pollution control measures, and recordkeeping and reporting requirements under this Act: *Provided,* That methods of compliance with any such standard or requirement may be modified for a small business stationary source in such permit based on the technical and financial capability of the small business stationary source or group of sources and the availability of less burdensome alternatives, and, in particular, pollution prevention measures, that will achieve equivalent emission reductions consistent with the public health, welfare, and environmental protection goals and deadlines of this Act;

"(D) any Compliance Agreement for Term permit issued to a small business stationary source under this subsection shall be issued in accordance with the procedures under part B of title III of this Act, and shall be subject to review by the Administrator, as provided in such part;

"(E) the State (or the Administrator) may reduce any fee required under this Act to take into account the financial resources of a small business stationary source;

"(F) requirements for continuous emission monitoring will not be imposed on a small business stationary source (or sources) unless the State (or the Administrator) has determined, on the basis of substantial evidence, that such requirements are necessary and appropriate.

"(4) With respect to small business stationary sources, in exercising prosecutorial discretion under section 113(c) of this Act, in issuing orders under section 113(d) of this Act, or in determining the amount of any penalty to be assessed under this Act, the United States, the State, and the court shall take into consideration (in addition to such other factors as justice may require) the size of the business, the economic impact of the penalty on the business, the violator's full compliance history and good faith efforts to comply, the duration of the violation as established by credible evidence, payment by the violator of penalties previously assessed for the same violation, the economic benefit of noncompliance, and the seriousness of the violation.

"(5) Compliance with the terms and conditions of a permit issued in accordance with the requirements of part B of title III and this subsection shall be deemed compliance with all requirements of the Act that are explicitly addressed by such terms and conditions: *Provided, however,* That compliance with the terms and conditions of a permit so issued shall not alter, modify, or otherwise affect the authority of the Administrator under section 303 (emergency powers) or the requirement to comply with any order issued under section 303.

"(6) For purposes of this subsection, the term 'small business stationary source' is a small business concern as defined by the Small Business Act, section 632 of title 15, United States Code and regulations promulgated by the Environmental Protection Agency: *Provided,* That for any small business compliance program promulgated pursuant to paragraph (3) of this subsection, a 'small business stationary source' is further

defined as any stationary source of air pollutants regulated under this Act that emits or has the potential to emit not greater than 100 tons per year of any criteria pollutant or of oxides of nitrogen or volatile organic compounds (or 50 tons of such compounds in any severe or extreme nonattainment area) and not greater than 10 tons per year for any pollutant or 25 tons per year for any combination of pollutants which have been listed as hazardous air pollutants under section 112. The Administrator, in consultation with the Administrator of the Small Business Administration and after providing notice and opportunity for public comment, may exclude from this definition any category or subcategory of sources that the Administrator determines to have sufficient technical and financial capabilities to meet the requirements of this Act without the application of this subsection.

"(7)(A) The Administrator, acting through the Director of the Office of Small Business Advocacy (hereinafter referred to as the 'Director') to monitor the Small Business Environmental Compliance Assistance Program under this subsection. In carrying out such monitoring activities the Director shall—

"(i) render advisory opinions on the overall effectiveness of the Small Business Environmental Compliance Assistance Program, difficulties encountered, and degree and severity of enforcement;

"(ii) make periodic reports to the Congress on the compliance of the Small Business Environmental Compliance Assistance Program with the requirements of the Paperwork Reduction Act, the Regulatory Flexibility Act, and the Equal Access to Justice Act;

"(iii) review information to be issued by the Small Business Environmental Compliance Assistance Program for small business stationary sources to ensure that the information is understandable by the layperson; and

"(iv) have the Small Business Environmental Compliance Assistance Program serve as the secretariat for the development and dissemination of such reports and advisory opinions.

"(8)(A) There shall be created a Compliance Advisory Panel (hereinafter referred to as the 'Panel') on the State level of not less than 7 small business owners. This Panel shall—

"(i) render advisory opinions concerning the effectiveness of the Small Business Compliance Assistance Program, difficulties encountered, and degree and severity of enforcement;

"(ii) make periodic reports to the Administrator concerning the compliance of the State Small Business Environmental Compliance Assistance Program with the requirements of the Paperwork Reduction Act, the Regulatory Flexibility Act, and the Equal Access to Justice Act;

"(iii) review information for small stationary sources to assure such information is understandable by the layperson; and

"(iv) have the Small Business Environmental Compliance Assistance Program serve as the secretariat for the development and dissemination of such reports and advisory opinions.

"(B) The Panel shall consist of—

"(i) 2 members selected by the Governor;

"(ii) 2 members selected by the State legislature (1 member each by the majority and minority leadership of the lower house, or in the case of a unicameral State legislature, 2 members each shall be selected by the majority leadership and the minority leadership, respectively, of such legislature, and clause (iii) shall not apply);

"(iii) 2 members selected by the State legislature (1 member each by the majority and minority leadership of the upper house, or the equivalent State entity); and

"(iv) 1 member selected by the head of the department or agency of the State responsible for air pollution permit programs.".

FEDERAL FACILITIES

SEC. 105. The second sentence of section 118(a) of the Clean Air Act is amended to read as follows: "The preceding sentence shall apply (A) to any requirement whether substantive or procedural (including any recordkeeping or reporting requirement, any requirement respecting permits and any other requirement whatsoever), (B) to any requirement to pay a fee or charge imposed by any State or local agency to defray the costs of its air pollution regulatory program, (C) to the exercise of any Federal, State, or local administrative authority, and (D) to any process and sanction, whether enforced in Federal, State, or local courts, or in any other manner.".

GENERAL PROVISIONS FOR NONATTAINMENT AREAS

SEC. 106. (a) HEADING.—Part D of the Clean Air Act is amended by inserting "SUBPART 1—NONATTAINMENT AREAS IN GENERAL" immediately after the heading "PART D—PLAN REQUIREMENTS FOR NONATTAINMENT AREAS."

(b) APPLICABILITY.—Subpart 1 of part D of the Clean Air Act is amended by adding a new section 170 as follows:

"APPLICABILITY

"SEC. 170. Each provision of this subpart applies as set forth herein, except to the extent it is inconsistent with a provision in another subpart, in which case the provision in such other subpart shall apply.".

(c) DEFINITIONS.—Section 171 of the Clean Air Act is amended—

(1) by amending paragraph (2) to read as follows:

"(2) The term 'nonattainment area' means, for any air pollutant, an area which is designated 'nonattainment' with respect to that pollutant pursuant to section 107."; and

(2) by adding the following sentence at the end of paragraph (4): "Where the applicable implementation plan for a nonattainment area defines 'major stationary source' as a combination of discrete operations, units or other pollutant emitting activities, the terms 'modification' and 'modified' include each change to such a source, as described in section 111(a)(4), that results in a net increase in emissions from such source, regardless of the amount of such increase."

(d) PERMITS.—

(1) Section 172 of the Clean Air Act is amended as follows:

(A) Subsection (a) is amended to read as follows:

"(a) ATTAINMENT DATES FOR NONATTAINMENT AREAS.—(1) The attainment date for an area designated nonattainment with respect to a primary national ambient air quality standard shall be the date by which attainment can be achieved as expeditiously as practicable, but no later than five years from the date such area was designated nonattainment under section 107, except that the Administrator may extend the attainment date to the extent the Administrator determines appropriate, for a period no greater than ten years from the date of designation as nonattainment, considering the severity of nonattainment and the availability and feasibility of pollution control measures.

"(2) The attainment date for an area designated nonattainment with respect to a secondary national ambient air quality standard shall be within a reasonable time after the date such area was designated nonattainment under section 107.";

(B) Subsection (c) is deleted, subsection (b) is redesignated as subsection (c), the heading "NONATTAINMENT PLAN PROVISIONS.—" is inserted after "(c)", the text following "The" through "subsection (a)" in the first sentence is deleted, and the following is inserted in lieu thereof: "provisions of an applicable implementation plan for a State relating to attainment and maintenance of national ambient air quality standards in any nonattainment area";

(C) Section 172(c)(6) (as redesignated by subparagraph (B) is amended to read as follows:

"(6)(A) require permits for the construction and operation of new or modified major stationary sources, and, beginning not later than three years after the date of enactment of the Clean Air Act Amendments of 1990, for the operation of all major stationary sources, in accordance with section 173 (relating to permit requirements); and

"(B) include provisions for permit fees that meet the requirements of section 351(b)(3) (except that for purposes of this subparagraph, the term 'regulated pollutant' in section 351(b)(3)(B) shall be defined as the pollutant or pollutants (or, in the case of ozone, the precursors of such pollutant) for which the area is designated nonattainment (except that carbon monoxide shall be excluded from this reference)). Provisions comparable to the provisions of section 351(b)(3)(C) (concerning fee collection by the Administrator) shall apply with respect to the permit fees required under this subparagraph (except that for purposes of this subparagraph, the references under section 351(b)(3)(C)(i) to 'section 351(d)', 'section 351(i)', and 'this title' shall be considered references to section 176(a)(1)(A)-(B), section 176(a)(1)(C), and title I of the Clean Air Act, respectively).";

(D) A new subsection (b) is added as follows:

"(b) SCHEDULE FOR PLAN SUBMISSIONS.—At the time the Administrator designates an area as nonattainment with respect to a national ambient air quality standard under section 107, the Administrator shall establish a schedule according to which the State containing such area shall submit a plan or plan revision (including the plan items) meeting the applicable requirements of subsection (c) and section 110(c). Such schedule must, at a minimum, include a date or dates, extending no later than two years from the date of the nonattainment designation, for the submission of a plan or plan revision (including the plan items) meeting the applicable requirements of subsection (c) and section 110(c)."; and

(E) A new subsection (d) is added as follows:

"(d) PROHIBITION ON USE OF OLD GROWTH ALLOWANCE.—Any growth allowance included in an applicable implementation plan to meet the requirements of section 172(b)(5) (as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1990) shall not be valid for use in any area that received or receives a notice under section 110(a)(2)(H)(ii) (as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1990)

or under section 110(d)(4) that its applicable implementation plan containing such allowances is substantially inadequate.".

(2) Section 173 of the Clean Air Act is amended by inserting "(a) CONSTRUCTION PERMITS.—" after "SEC. 173.", by deleting "and operate" in the first sentence, by substituting "172(c)" for "172(b)" each time it appears, by inserting "and" at the end of subsection (a)(2), and by replacing the semicolon and "and" at the end of subsection (a)(3) with a period and deleting paragraph (4) of subsection (a), and by adding the following at the end thereof:

"(b) OPERATING PERMITS.—

"(1) Each operating permit issued as required pursuant to this part for a new or existing stationary source shall—

"(A) be for a fixed term not to exceed five years and shall require compliance with applicable emission limitations and with such monitoring measures as are appropriate for adequately determining compliance with such limitations;

"(B) require the permittee to submit quarterly reports to the permitting authority containing the results of the monitoring required under subparagraph (A) and, no less often than every six months, certification to the permitting authority that demonstrates compliance with the permit. Any report or certification required to be submitted by a permittee under this title shall be signed by a responsible corporate official who shall certify its accuracy;

"(C) require that the permittee promptly report any violations of the permit or other requirements under this Act to the permitting authority and a program for correcting these violations including a schedule for implementation of the corrections; and

"(D) set forth inspection and entry requirements to assure compliance with the permit terms and conditions.

"(2) Applicants for, and recipients of, any permit issued pursuant to this part shall be subject to fee requirements sufficient to cover all reasonable costs of developing and administering the permit program in accordance with the provisions of section 172(c)(6)(B).

"(3) Before issuing any permit pursuant to the provisions of this part the State shall provide notice of the application and an opportunity for a public hearing on the conditions to be included in the permit.

"(4) No permit may be issued pursuant to this part if the Administrator within sixty days objects to its issuance as not meeting the goals and objectives of this Act.

"(5) A copy of each permit and certification shall be submitted by the permittee, or by the permitting authority (as determined by the permitting authority), to the Administrator and shall be available to the public in the same manner as is provided for records and reports under section 114(c). No such permit may be issued unless the permitting authority or its agent has conducted an on-site inspection of the source to which such permit is issued. Not later than six months after the enactment of this subsection the Administrator shall publish guidelines for permit programs under this part. Such guidelines may be revised from time to time as the Administrator deems appropriate.".

(e) OFFSETS.—Section 173 is further amended by adding at the end thereof the following new subsection:

"(c) OFFSETS.—A new or modified major stationary source may comply with any offset requirement in effect under this part for increased emissions of any air pollutant by obtaining enforceable emissions reductions of such air pollutant from other sources in the same nonattainment area. Such enforceable emissions reductions shall be in effect by the time a new or modified source commences operation and shall assure that the total tonnage of increased emissions of the air pollutant from the new or modified source shall be offset by a greater reduction in the actual emissions of such air pollutant from other sources in the area. Emissions reductions otherwise required by this Act for a pollutant shall not be creditable as emissions reductions for purposes of any such offset requirement to the extent this Act requires the reduction of the pollutant.

"(d) Every five years, beginning in the fifth year after enactment of this subsection, the Administrator shall submit a report to Congress concerning the extent to which the fees required under this Act are adequate to meet State and local agency expenses associated with permitting and other implementation activities required under this Act.

"(e) The permitting authority of a State or political subdivision shall allow a source to offset by alternative or innovative means emission increases from rocket engine and motor firing, and cleaning related to such firing, at an existing or modified major source that tests rocket engines or motors under the following conditions:

"(1) any modification proposed is solely for the purpose of expanding the testing of rocket engines or motors at an existing source that is currently permitted to test such engines;

"(2) the source demonstrates to the satisfaction of the permitting authority of the State or political subdivision that it has used all reasonable means to obtain offsets, as determined on an annual basis, for the emissions increases beyond permitted levels, that all available offsets are being used, and that sufficient offsets are not available to the source;

"(3) the source has obtained a finding from the Department of Defense, Department of Transportation, National Aeronautics and Space Administration or other appropriate Federal agency, that the testing of rocket motors or engines at the facility is required for a program essential to the national interest; and

"(4) the source will comply with an alternative measure, imposed by the permitting authority, designed to offset any emission increases beyond permitted levels not directly offset by the source. In lieu of imposing any alternative offset measures, the permitting authority may impose an emissions fee, which shall be an amount no greater than 1.5 times the average cost of stationary source control measures adopted in that area during the previous three years. The permitting authority shall utilize the fees in a manner that maximizes the emissions reductions in that area.".

(f) PLANNING PROCEDURES.—Section 174 of the Clean Air Act is amended to read as follows:

"PLANNING PROCEDURES

"SEC. 174. (a) For any ozone, carbon monoxide or PM-10 nonattainment area, the Governor of the State containing such areas and elected officials of affected local governments shall, prior to the date required for submittal of the inventories described under sections 182(a), 188(a), and 192(a), jointly review and update as necessary the planning procedures adopted pursuant to this subsection as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1990 or develop new planning procedures pursuant to this subsection, as appropriate. In preparing such procedures the State and local elected officials shall determine which elements of a revised implementation plan will be developed, adopted, and implemented (through means including enforcement) by the State and which by local governments or regional agencies, or any combination of local governments, regional agencies, or the State. The implementation plan required by this part shall be prepared by an organization certified by the State, in consultation with elected officials of local government in the affected area, and representatives of the State air quality planning agency, the State transportation planning agency, the metropolitan planning organization designated to conduct the continuing, cooperative and comprehensive transportation planning process for the area under section 134 of title 23, United States Code, the organization responsible for the air quality attainment and maintenance planning process under regulations implementing this Act, and any other organization with responsibilities for developing, submitting, or implementing the plan required by this part.

"(b) The preparation of implementation plan provisions and subsequent plan revisions under the continuing transportation-air quality planning process described in section 108(e) shall be coordinated with the continuing, cooperative and comprehensive transportation planning process required under section 134 of title 23, United States Code, and such planning processes shall take into account the requirements of this part. The Administrator shall consult with, and make recommendations to, the Secretary of Transportation within nine months from the date of enactment of the Clean Air Act Amendments of 1990 on changes to the Department of Transportation policies and planning and programming process that will assist the planning and implementation process of this part.

"(c) In the case of a nonattainment area that is included within more than one State, the affected States may jointly, through interstate compact or otherwise, undertake and implement all or part of the planning procedures described in this section.

"(d)(1) The head of each Federal agency may, in consultation with local health or air pollution control authorities within a nonattainment area, determine whether the implementation of an alternative work schedule plan for such agency in accordance with the provisions of paragraph (2) will reduce air pollution within such nonattainment area.

"(2) If there is a determination under paragraph (1) that an alternative work schedule plan would reduce air pollution within a nonattainment area without jeopardizing the mission of the agency or hindering its service to the public, such head of the agency shall—

"(i) implement an alternative work schedule plan in accordance with the provisions of subchapter II of chapter 61 of title 5, United States Code, for employees of such agency within such area; and

"(ii) to the greatest degree practicable, include employees within such area performing services pursuant to a contract with such agency in a similar alternative work schedule to coordinate and maximize the reduction of such air pollution.".

(g) SANCTIONS.—Section 176 of the Clean Air Act is amended by—

(1) inserting in the heading "SANCTIONS AND" before "LIMITATIONS";

(2) deleting subsection (b) and redesignating subsections (c) and (d) as (b) and (c), respectively; and

(3) amending subsection (a) to read as follows:

"(a) SANCTIONS.—

"(1) For any implementation plan or plan revision required under this part (or required in response to a finding of substantial inadequacy as described in section 110(d)(4)), at such time as—

"(A) a State fails to make the required plan submission, or the plan or plan revision submitted by the State does not satisfy the minimum criteria established under section 110(d)(1)(A),

"(B) the Administrator disapproves the submission in whole or in part, or

"(C) the Administrator finds that any requirement of the approved plan (or approved part of the plan) is not being implemented, the Administrator shall publish in the Federal Register a determination of whether the State is making reasonable efforts to cure the relevant failure. If the Administrator determines that the State is not making reasonable efforts to cure the failure, the Administrator shall simultaneously apply, with respect to the relevant area within such State, at least one of the sanctions specified in paragraph (2). No sanction under paragraph (2) that is imposed because of a failure by a State may be applied, based on such failure, outside the borders of that State.

"(2) The following sanctions are available to the Administrator for the purpose of implementing paragraphs (1) and (3)—

"(A) a prohibition by the Administrator on the construction or modification of any major stationary source of the relevant pollutant or pollutants in a nonattainment area (or portion thereof, where the Administrator determines by rule that the State failure relates exclusively to such portion). Where the State failure relates to ozone, the Administrator may apply such prohibition with respect to both the nonattainment area and the area within twenty-five miles of the boundary of such area. For purposes of this subparagraph, the term 'major stationary source' shall have the meaning provided in section 302(j), except that, where the State failure relates to ozone, 'twenty-five' shall be substituted for 'one hundred' in that section;

"(B)(i) a prohibition, applicable to a nonattainment area, on the approval by the Secretary of Transportation of any projects or the awarding by the Secretary of any grants, under title 23, United States Code, other than projects or grants specified under clause (ii). Such prohibition shall become effective upon the selection by the Administrator of this sanction;

"(ii) projects or grants that may be approved, notwithstanding the prohibition in clause (i), are the following—

"(I) capital programs for improved public transit;

"(II) construction or restriction of certain roads or lanes solely for the use of passenger buses or high occupancy vehicles;

"(III) planning for and implementation of requirements for employers to reduce employee work-trip-related vehicle emissions;

"(IV) highway ramp metering, traffic signalization, and related programs that improve traffic flow and achieve a net emission reduction;

"(V) fringe and transportation corridor parking facilities serving multiple occupancy vehicle programs or transit operations;

"(VI) programs for inspection and maintenance of vehicle emission control systems;

"(VII) programs for the conversion of publicly-owned fleet vehicles to vehicles that use low-polluting fuels, or to otherwise control fleet vehicle operations and miles traveled;

"(VIII) programs to limit or restrict vehicle use in downtown areas or other areas of emission concentration particularly during periods of peak use, through road use charges, tolls, parking surcharges, or other pricing mechanisms, vehicle restricted zones or periods, or vehicle registration programs;

"(IX) programs for breakdown and accident scene management, nonrecurring congestion, and vehicle information systems, to reduce congestion and emissions; and,

"(X) such other transportation-related programs as the Administrator, in consultation with the Secretary of Transportation, finds would improve air quality and would not encourage single occupancy vehicle capacity.

In considering such measures, the State should seek to ensure adequate access to downtown, other commercial, and residential areas, and avoid increasing or relocating emissions and congestion rather than reducing them. Notwithstanding the requirements of title 23, United States Code, or any other provision of law, any Federal funds made available to a State to carry out the provisions of such title shall be available without limitation to implement the programs and provisions of this subparagraph in nonattainment areas, and the State share shall not be required to exceed 10 per centum of the cost of such programs.

"(iii) Nothing in this paragraph shall preclude the Secretary of Transportation from approving projects or awarding grants under title 23, United States Code, for (I) elimination of highway safety hazards pursuant to sections 130, 152, and 402 of such title, or (II) rehabilitation or replacement of deteriorated highway bridges, provided that such projects or grants will add no significant additional right-of-way and are determined by the Administrator to be consistent with maintaining air quality;

"(iv) whether or not the conditions under paragraph (1) calling for application of a sanction are satisfied, the Governor of a State containing a nonattainment area for ozone or carbon monoxide may elect to use in such area (or areas) all or part of the funds available to the State for such area (or areas) under title 23, United States Code, for projects specified in clause (ii).

"(C) a prohibition of any public water system regulated under title XIV of the Public Health Service Act from providing drinking water service in the nonattainment area (or portion thereof, where the State failure relates exclusively to such portion) to any structure to which such service was not provided before the Administrator's choice of this sanction. The Administrator may not prohibit any public water system from providing water service to any customer requiring such service to correct an existing public health hazard;

"(D) the withholding by the Administrator of all or part of the grants for support of air pollution planning and control programs that the Administrator is authorized to award under section 105.

"(3) Not later than twelve months after the Administrator makes a determination under paragraph (1) that a State is making reasonable efforts to cure the relevant failure, the Administrator shall make a final determination, which shall be published in the Federal Register, of whether the State has cured such failure. If the Administrator determines that the State has not cured such failure, the Administrator shall immediately apply, with respect to the relevant area within such State, at least one of the sanctions specified in paragraph (2).

"(4) The Administrator may, in the Administrator's discretion, apply any sanction or sanctions listed in paragraph (2) to address any of the failures specified in subsection (1) relating to any plan required under this title.

"(5)(A) Within six months following the applicable attainment date for any nonattainment area, the Administrator shall determine, based on the area's air quality as of the attainment date, whether the area attained the standard by that date.

"(B) Upon making the determination under clause (A), the Administrator shall publish a notice in the Federal Register identifying each area that the Administrator has determined to have failed to attain. The Administrator may revise or supplement such determination at any time based on more complete information or analysis concerning the area's air quality as of the attainment date.

"(6) No person shall construct or modify a major stationary source of any pollutant in a nonattainment area for such pollutant after the date forty-two months from the date of enactment of the Clean Air Act Amendments of 1990 or the date forty-two months from the date such area was designated nonattainment for such pollutant, whichever is later, unless, as of the later of such dates, the Administrator has approved a plan submission for the area meeting the requirements of section 172(c)(6) with respect to such pollutant as those requirements relate to the construction of new or modified major stationary sources. Before the later of the dates set forth in this subsection, no State shall issue a permit for construction or modification of a major stationary source unless such permit meets the requirements of section 173(a).

"(7) Whenever—

"(A) an ozone nonattainment area fails to achieve the emissions reductions required under section 183(b)(2) or (3),

"(B) a carbon monoxide nonattainment area fails to achieve the emissions reductions of a mile-stone required under section 188(g)(3), or

"(C) a PM-10 nonattainment area fails to achieve the emission reduction of a milestone required under section 192(e)(2), but no later than twelve months after passage of the date for achieving such reductions, the Administrator shall notify the State containing such nonattainment area of such failure. No later than nine months after such notification, the State shall submit to the Administrator a revision to the applicable implementation plan adequate to achieve the emissions reductions that the area failed to achieve before such plan revision was due. Such revision shall provide that such emissions reductions shall be achieved by the end of the next complete three-year period (described in section 183(b)) or milestone period (described in section 188(e) or section 192(e)), as the case may be. Notwithstanding any other provision of this Act, the Administrator shall act on such revision under section 110(d)(3) no later than six months after the date on which the State submits such revision.".

(g) TRANSPORTATION SYSTEM IMPACTS ON CLEAN AIR.—Section 108(f) of the Clean Air

Act is amended by adding at the end thereof the following new paragraphs:

"(3) The Secretary of Transportation and the Administrator shall submit to Congress by January 1, 1992, and every three years thereafter a report that—

"(A) reviews and analyzes existing State and local air quality-related transportation programs including specifically any analyses of whether adequate funding is available to complete transportation projects identified in State implementation plans in the time required by applicable State implementation plans and any Federal efforts to promote those programs;

"(B) evaluates the extent to which the Department of Transportation's existing air quality-related transportation programs and such Department's proposed budget will achieve the goals of and compliance with the Clean Air Act; and

"(C) recommends what, if any, changes to such existing programs and proposed budget as well as any statutory authority relating to air quality-related transportation programs that would improve the achievement of the goals of and compliance with the Clean Air Act.

"(4) Within one hundred and twenty calendar days of submitting each report, the Secretary of Transportation in cooperation with the Administrator shall undertake all appropriate steps within existing authority and available resources to implement the recommended changes to the existing programs and proposed budget specified in subparagraph (3)(C).".

(h) CONFORMITY REQUIREMENTS.—Section 176(b) of the Clean Air Act (as redesignated by subsection (g)) is amended by deleting the second sentence, by striking "(1)", "(2)", "(3)" and "(4)" where they appear, by inserting "(1)" after "(b)", and by adding the following at the end thereof: "Conformity to a plan means—

"(A) conformity to a plan's purpose of eliminating or reducing the severity and number of violations of the national ambient air quality standards and achieving expeditious attainment of such standards; and

"(B) that such activities will not, considering any growth likely to result from such activities—

"(i) cause or contribute to any new violation of any standard in any area;

"(ii) increase the frequency or severity of any existing violation of any standard in any area; or

"(iii) delay timely attainment of any standard or any required interim emission reductions or other milestones in any area.

"(2) Any transportation plan or program developed pursuant to title 23, United States Code, or the Urban Mass Transportation Act shall implement all relevant transportation provisions of any implementation plan approved under this Act applicable to all or part of the area covered by such transportation plan or program. No Federal agency may approve, accept or fund any transportation plan, program or project unless such plan, program or project has been found to conform to this Act and any implementation plan in effect under this Act. In particular—

"(A) no transportation plan or transportation improvement program may be adopted by a metropolitan planning organization designated under title 23, United States Code, or the Urban Mass Transportation Act, or be found to be in conformity by an air quality planning agency, department or officer until a final determination has been made that emissions expected from implementation of such plans and programs are consistent with estimates of emissions from motor vehicles and necessary emissions reductions contained in the State's implementation plan, and that the plan or program will, considering any growth likely to result from such plan or program, conform to the requirements of paragraph (1)(B);

"(B) no metropolitan planning organization or other recipient of funds under title 23, United States Code, or the Urban Mass Transportation Act shall adopt or approve a transportation improvement program of projects until it determines that such program provides for timely implementation of transportation control measures consistent with schedules included in the applicable implementation plan;

"(C) no transportation project may be adopted or approved by a metropolitan planning organization or any recipient of funds designated under title 23, United States Code, or the Urban Mass Transportation Act, or found in conformity by an air quality planning agency, or approved, accepted, or funded by the Department of Transportation unless—

"(i) such a project comes from a conforming plan and program;

"(ii) the design, scope, and emissions from such project have not changed significantly since the conformity finding regarding the plan and program from which the project derived;

"(iii) emissions from such a project remain consistent with emissions reduction schedules in the applicable implementation plan; and

"(iv) it is demonstrated, in any case where such a demonstration was not made during the process to determine the conformity of the plan and program from which project derived, that the project is consistent with the provisions of paragraph (1)(B).

With regard to subparagraphs (A), (B), and (C) of paragraph (2), the requirements of such subparagraphs shall comprise the statutory criteria for making transportation project conformity determinations under this Act.

The determinations required by this subsection shall be made by Federal, State and local agencies as prescribed pursuant to criteria and procedures which shall be promulgated by the Administrator no later than one year after the date of enactment of the Clean Air Act Amendments of 1990. Such procedures shall include a requirement that each State containing an ozone or carbon monoxide nonattainment area shall submit to the Administrator within eighteen months of such date of enactment, a revision to its implementation plan that includes, for each such nonattainment area, criteria and procedures for assessing the conformity of any plan, program or project subject to the conformity requirements of this subsection.".

(i) MAINTENANCE PLANS.—Subpart 1 of part D of the Clean Air Act is amended by adding a new section 179 as follows:

"MAINTENANCE PLANS

"SEC. 179. (a) PLAN REQUIREMENTS.—The maintenance plan required under section 107(d)(5)(C) as a precondition for redesignation of an area shall—

"(1) comply with the provisions of section 110(b)(2);

"(2) provide for the maintenance of the national ambient air quality standard of the relevant air pollutant in such area for a period of twenty years after attainment; and

"(3) include the following provisions—

"(A) an identification of sources, including area and mobile sources, that are expected to contribute to increases in emissions of such pollutant after attainment of a national ambient air quality standard;

"(B) a quantitative estimate of emissions increases from such sources for each three-year period following attainment;

"(C) an identification of transportation control measures, emission control limitations or standards, or permit requirements as may be necessary to limit emissions or permissible emission increases; and

"(D) an identification of contingency measures to be implemented in the event of an exceedance of the air quality standard sufficient to correct any air pollution problem which may lead to redesignation as a nonattainment area.

"(b) PLAN REVISIONS.—Maintenance provisions required by this section shall be updated every ten years and submitted to the Administrator for approval pursuant to section 110 and this part as a revision to the implementation plan.".

ADDITIONAL REQUIREMENTS FOR OZONE NONATTAINMENT AREAS

SEC. 107. Part D of the Clean Air Act is amended by adding the following new subpart at the end thereof:

"SUBPART 2—ADDITIONAL PROVISIONS REGARDING OZONE NONATTAINMENT AREAS

"CLASSIFICATION OF OZONE NONATTAINMENT AREAS

"SEC. 181. (a) CLASSIFICATION BY OPERATION OF LAW.—Each area designated nonattainment for ozone under section 107(f)(3) is hereby classified by operation of law in one of the following categories based upon the percentage by which such standard is exceeded:

"Area classification	Amount by which standard exceeded
Moderate ozone nonattainment area.	Not greater than 20 per centum
Serious ozone nonattainment area.	More than 20 per centum but less than 50 per centum
Severe ozone nonattainment area.	Equal to or greater than 50 per centum but not more than 120 per centum
Extreme ozone nonattainment area.	More than 120 per centum

"(b) DATA AND METHODS FOR CLASSIFICATION.—For purposes of determining the percentage by which the national primary ambient air quality standard for ozone is exceeded in any area—

"(1) the most recent monitoring data available as determined by the Administrator shall be used; and

"(2) the interpretation methodology issued by the Administrator most recently before the date of enactment of this subpart for determining attainment of the standard shall be applicable (including the design value, reference methods, and guidelines for interpretation of ozone air quality standards).

Not later than thirty days after the enactment of this subpart, the Administrator shall publish a notice of the percentages by which the national primary ambient air quality standard for ozone was exceeded in each area referred to in subsection (a).

"(c) DEADLINES FOR ATTAINMENT.—The following deadlines apply to the ozone nonattainment areas classified in accordance with subsection (a):

"Area classification	Applicable attainment date (in years after enactment of the Clean Air Act Amendments of 1989)
Moderate Area	5 years
Serious Area	10 years
Severe Area	15 years
Extreme Area	20 years.

"(d) REFERENCES TO TERMS.—Any reference in this subpart to a 'moderate area', a 'serious area' a 'severe area', or an 'extreme area' shall be considered a reference to a moderate ozone nonattainment area, a serious ozone nonattainment area, a severe ozone nonattainment area, or an extreme ozone nonattainment area as classified under this section.

"(e) Any area that is not designated nonattainment for ozone under section 107 as of the date of enactment of this section, and that is subsequently redesignated to nonattainment for ozone under section 107, shall, at the time of the redesignation, be classified by operation of law in accordance with the table under subsection (a). Upon its classification, the area shall be subject to the same requirements under section 110, subpart 1 of this part, and this subpart that would have applied had the area been so classified as of the time of the classification under subsection (a), except that any absolute, fixed date applicable in connection with any such requirement is extended by operation of law by a period equal to the length of time between the date of enactment of this section and the date the area is classified.

"REQUIREMENTS APPLICABLE TO ALL OZONE NONATTAINMENT AREAS

"SEC. 182. (a) INVENTORIES.—Not later than one year after the date of enactment of this subpart in the case of each State that contains a nonattainment area or portion thereof classified pursuant to section 181(a), or in the case of a State containing an area subsequently designated nonattainment pursuant to section 107(d)(5) and classified pursuant to this subpart, within eighteen months of such classification, such State shall submit to the Administrator—

"(1) for each such area, a comprehensive, accurate, current inventory of actual emissions of volatile organic compounds and oxides of nitrogen from all sources in such area. Such inventory shall be of emissions in the calendar year of enactment, or such other calendar year between 1987 and the year of enactment, inclusive, approved by the Administrator (or in the calendar year of classification, in the case of an area subsequently designated nonattainment under section 107(d)(5) and classified pursuant to this subpart). Each such inventory shall be prepared in accordance with the guidance required to be published by the Administrator pursuant to section 108(g)(2), if such guidance is available. Revisions of each such inventory shall be submitted every three years thereafter until the area for which the inventory is prepared is redesignated attainment, and then shall be submitted, to the extent required, in accordance with the maintenance plan; and

"(2)(A) a revision to the State implementation plan that contains a requirement that the owner or operator of each stationary source of oxides of nitrogen or volatile organic compounds within an ozone nonattainment area or portion thereof in such State provide the State with a statement in such form as the Administrator may prescribe (or the State may prescribe, if the Administrator does not) for classes or categories of sources, showing the actual emissions from that source during the previous calendar year of oxides of nitrogen and volatile organic compounds. The first such statement shall be submitted as expeditiously as practicable but no later than 18 months after the date such revision is submitted to the Administrator, and shall show such emissions for the calendar year in which the revision referred to in the first sentence of this subparagraph was required to be submitted to the Administrator, or another appropriate year if such emission data are shown not to be reasonably available. Subsequent statements shall be submitted at least annually thereafter. The State shall make such statements, or the data contained therein, available to the Environmental Protection Agency, upon request.

"(B) The State may waive the application of subparagraph (A) to any class or category of stationary sources which emit less than twenty-five tons per year of oxides of nitrogen or volatile organic compounds if the State, in its submissions under paragraph (1), provides an inventory of emissions from such class or category of sources based on guidelines provided by the Administrator under section 108(g)(2) (relating to inventories).

"(b) IMPLEMENTATION OF CURRENT REQUIREMENTS.—Each State containing an ozone nonattainment area or portion thereof shall—

"(1) not later than eighteen months after the date of enactment of this subpart, fully implement all provisions of any implementation plan for the attainment of the ozone air quality standard for each such area or areas which have been approved by the Administrator prior to the date of enactment of this subpart, and

"(2) within six months after the date of enactment of this subpart, submit a revision or revisions to the applicable implementation plan to include provisions to correct requirements in (or add requirements to) the plan concerning reasonably available control technology as were required under section 172(b) (as in effect immediately before the date of enactment of this subpart), including a requirement to implement within one year after submission reasonably available control technology with respect to all sources of volatile organic compounds in such area or areas covered by a control technique guideline issued before the date of enactment of this subpart.

"(c) PERMIT REQUIREMENT.—Each State containing an area or portion thereof classified pursuant to section 181(a) or subsequently classified pursuant to section 107 and this subpart shall, not later than eighteen months after the date of such classification submit to the Administrator a revision to the implementation plan for each such area requiring an operating permit (including permit fees) as provided in sections 172(c)(6) and 173(b) for each new or existing major stationary source of volatile organic compounds or oxides of nitrogen located within any such nonattainment area. It shall be unlawful to operate any such major stationary source without a permit issued pursuant to an approved implementation plan beginning thirty-six months after the date of enactment of this subpart.

"(d) Notwithstanding any other provision of this Act, any State implementation plan submittal required for any ozone nonattainment area (or portion thereof) not designated nonattainment prior to the date of enactment of the Clean Air Act Amendments of 1990, that is required to be submitted within six or twelve months from the date of enactment, classification, or designation of such area, shall be required to be submitted within six or twelve months, as the case may be, of the date the area (or portion thereof) is included within the boundaries of an area designated nonattainment under section 107(f)(3)(B).

"REQUIREMENTS FOR SPECIFIC CLASSES OF OZONE NONATTAINMENT AREAS

"SEC. 183. (a) REQUIREMENTS FOR MODERATE AREAS.—Each State containing an area classified as a moderate nonattainment area pursuant to section 181(a) or subsequently so classified pursuant to section 107(d)(5) and this subpart, shall, with respect to the moderate area, submit to the Administrator, by the dates provided, the following revisions to the applicable implementation plan:

"(1) within one year of the date of classification, a revision that requires implementation, within one year of submission of such revision, of requirements in either paragraph (A) or (B)—

"(A) an enhanced vehicle emissions control inspection and maintenance program to reduce in-use emissions of volatile organic compounds and oxides of nitrogen from motor vehicles, which program shall include each of the following elements—

"(i) require coverage of all light-duty vehicles registered in, at a minimum, each metropolitan statistical area (as defined by the Office of Management and Budget) with a population of one hundred thousand or more according to the 1980 Census,

"(ii) direct inspection of components of vehicle emission control systems (including evidence of misfueling) and, where such components have been rendered inoperative, the repair or replacement of such components,

"(iii) computerized emission analyzers,

"(iv) if a provision waiving the requirements for repairing the emission control system in the event of failure is included, a provision that such waiver shall apply only when the costs of repair exceed $200,

"(v) enforcement through denial of vehicle registration (except for any program in operation prior to the effective date of this section whose enforcement mechanism is demonstrated to the Administrator to be more effective than the applicable vehicle registration program in assuring that noncomplying vehicles are not operated on public roads), and

"(vi) any requirements the Administrator may prescribe under section 202(j)(3) (pertaining to onboard emission diagnostic systems), or

"(B) a requirement that all owners or operators of gasoline dispensing systems within the area install and operate a system designed to (i) prevent discharge of hydrocarbon vapors into the ambient air, (ii) direct vapor displaced from the automotive fuel system to a system where organic compounds in the displaced vapor are recovered, and (iii) prevent vehicle fuel tank overflows or spillage on fill nozzle disconnect. The requirement of this subparagraph shall apply only to facilities which dispense more than twenty thousand gallons of gasoline per month. The Administrator may revise or waive the requirements of this subparagraph, as appropriate, after such time as the Administrator determines that onboard emissions control systems required under this Act are in widespread use throughout the motor vehicle fleet.

Each vehicle inspection and maintenance program required by this paragraph shall

include such additional elements as are necessary to assure that the program would achieve a reduction in emissions of volatile organic compounds equivalent to a reduction of four thousand seven hundred tons of such emissions per million vehicles covered in the year of enactment of this subpart (if such program had been operating in such year). The Administrator may establish an alternative performance standard with respect to such programs for nonattainment areas located in California, if the Administrator finds that such alternative standard is necessary to reflect lower average emissions of volatile organic compounds from vehicles operating in such State. Any area which is already operating a vehicle emission control inspection and maintenance program or for which the implementation plan, as of the date of enactment of this subpart, includes a specific schedule for implementation of such a program shall comply with subparagraph (A);

"(2)(A) an ozone nonattainment area for which the design value, as determined by the Administrator under section 181(a), is less than .13 parts per million, as determined under section 181(a), shall not be required to comply with the requirements of subsection (a)(1) (pertaining to inspection and maintenance and refueling programs) unless such compliance is needed to bring the area into attainment with the primary ambient air quality standard for ozone by the date specified in section 181(c);

"(B) for any such area that is not required to comply with the requirements of subsection (a)(1), the plan for which already includes, or was required by section 172(b)(11)(B) (as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1990) to have included, a specific schedule for implementation of a vehicle emission control inspection and maintenance program, the State shall submit, immediately after the date of enactment of this section, a revision that includes any provisions necessary to provide for a vehicle inspection and maintenance program;

"(3) within one year after the date of classification, a revision that contains a permit program which meets the requirements of sections 172(c)(6) (as it relates to requirements for permits for the construction of new or modified major stationary sources), and 173(a).

"(b) REQUIREMENTS FOR SERIOUS AREAS.—Each State containing an area classified as a serious area pursuant to section 181(a) or subsequently so classified pursuant to section 107(d)(5) and this subpart shall, with respect to the serious area, make the submissions described under subsection (a) and in addition submit to the Administrator the following revisions to the applicable implementation plan and other items:

"(1) an inventory that meets the requirements of section 182(a)(1) and, where all or part of such area is in a metropolitan statistical area (MSA) or consolidated metropolitan statistical area (CMSA), includes emissions from all sources within such MSA or CMSA, whichever is applicable, plus the twenty-five-mile radius around such area;

"(2) no later than one year after the date of classification, a revision to provide for, and a demonstration that the plan as revised will provide for, within three years after classification, emissions reductions of volatile organic compounds of 12 per centum from actual anthropogenic emissions in the calendar year of classification. Emissions reductions that will occur by the applicable deadline from measures required under either the applicable implementation plan or rules promulgated by the Administrator (other than rules promulgated under section 211(h)) may be credited toward the required 12 per centum reduction. The provisions of paragraph (3)(D)(ii) (relating to carryforward of excess reductions) shall apply with respect to reductions in excess of the required 12 per centum reduction;

"(3) no later than three years from the date of classification a revision which demonstrates, based on photochemical grid modeling or any other analytical method determined by the Administrator, in the Administrator's discretion, to be at least as effective, that the plan, as revised—

"(A) will provide for attainment by the applicable attainment date;

"(B) will result in volatile organic compound emission reductions from emissions reported in the initial inventory required under section 182(a)(1) equal to 12 per centum (in addition to the reductions required under paragraph (2)), averaged over the three-year period beginning with the fourth year after the date of classification. Emissions reductions may be credited towards the 12 per centum reduction requirement to the extent they will occur by the applicable deadline from measures required under either the applicable implementation plan or rules promulgated by the Administrator (other than rules promulgated under section 211(h)); and

"(C) will result in volatile organic compound emission reductions from baseline emissions equal to at least 3 per centum of baseline emissions each year, averaged over each consecutive three-year period beginning with the seventh year after the date of classification, and extending until the area attains the primary ambient air quality standard for ozone:

"(i) For purposes of this subparagraph, the term 'baseline emissions' means emissions reported in the initial inventory required under section 182(a)(1), excluding emissions that would be eliminated under the regulations described in clauses (iii) (I) and (II).

"(ii) Except as provided under clause (iii), emissions reductions are creditable toward the per centum reductions required under this subparagraph to the extent they will occur, by the applicable deadline, from measures required under either the applicable implementation plan or rules promulgated by the Administrator.

"(iii) Emission reductions from the following measures are not creditable toward the per centum reductions required under this subparagraph:

"(I) Any measure relating to motor vehicle tailpipe or evaporative emissions promulgated by the Administrator by the date of enactment of this section.

"(II) Regulations concerning Reid Vapor Pressure promulgated by the Administrator by the date of enactment of this section or required to be promulgated under section 211(h).

"(III) Measures required under section 182(b)(2) (concerning corrections to implementation plans).

"(iv) The demonstration referred to in this paragraph may, in order to meet the requirements of this subparagraph, provide for emission reductions in an amount less than 3 per centum of the baseline emissions if the State (following a public hearing, and by a statement signed by the Governor as a nondelegable action) demonstrates to the satisfaction of the Administrator that the plan reflecting such lesser amount includes all measures that can feasibly be implemented in the area (in light of technological achievability, costs, and any nonair quality and other air quality-related health and environmental impacts).

"(D)(i) The demonstration referred to in this paragraph shall explicitly quantify projections with respect to emissions and necessary emission reductions from motor vehicles, using estimates for growth in vehicle miles traveled, congestion levels, and other relevant parameters that are used by the agency or agencies responsible for transportation planning for the area.

"(ii) Any area that achieves, or the demonstration for which projects, a reduction in emissions in excess of that required by this paragraph, as determined by the Administrator, may credit such excess emissions reductions toward the next three-year reduction requirement period.

"(iii) The revision referred to in this paragraph may provide that reductions in emissions of oxides of nitrogen, to the extent they will occur by the applicable deadline from measures required under either the applicable implementation plan or fuels promulgated by the Administrator (calculated in accordance with the requirements of subclause (I) or (II)), may be substituted for the reductions of volatile organic compounds required by this subparagraph at no less than a one-for-one ratio (nitrogen oxides to volatile organic compounds) if a State demonstrates to the satisfaction of the Administrator that such reductions of oxides of nitrogen, together with remaining reductions of volatile organic compounds, would result in a reduction in ozone concentrations at least equivalent to that which would occur from the reductions in volatile organic compound emissions required under this subparagraph. A State may request, and the Administrator may provide, technical assistance in making this demonstration.

"(I) In the case of the per centum reductions required under subparagraph (B), the reductions in oxides of nitrogen shall not include reductions attributable to Federal motor vehicle standards.

"(II) In the case of the per centum reductions required under subparagraph (C), the reductions in oxides of nitrogen shall not include reductions identified in subparagraph (C)(iii).

"(4)(A) beginning in the first calendar year that commences on or after the date one year after the date of classification, annual reports on measures adopted or implemented during the preceding calendar year and any failure to implement measures scheduled for implementation during such year;

"(B) beginning with the fourth such report and in each third such report thereafter, a demonstration by the State as to whether current vehicle miles traveled, congestion levels and other relevant parameters are consistent with those used for the demonstration required in paragraph (2) or for emissions projections pursuant to paragraph (3)(B)(i). Where such parameters and emissions levels exceed the levels projected for purposes of the area's three-year emissions reduction demonstration, the State shall, within one year, develop and submit a revision to the applicable implementation plan that includes a transportation control measures program consisting of measures from, but not limited to, section 108(f) that will reduce emissions to levels that are consistent with emission levels projected in such demonstration. In considering such measures, the State should ensure adequate

access to downtown, other commercial, and residential areas and should avoid measures that increase or relocate emissions and congestion rather than reduce them. Such revision shall be developed in accordance with guidance issued by the Administrator pursuant to section 108(e) and with the requirements of section 174(b) and shall include implementation and funding schedules that achieve expeditious emissions reductions in accordance with implementation plan projections;

"(5) within one year of the date of classification, a revision that satisfies the requirements of subparagraphs (A) (pertaining to vehicle inspection and maintenance) and (B) (pertaining to vapor recovery during vehicle fueling) of subsection (a)(1);

"(6) within twelve months of classification, a revision to require implementation of reasonably available control technology for all stationary sources of volatile organic compounds that are not covered by a control technique guideline or listed pursuant to section 185(a) and that have the potential to emit 100 tons or more per year of such compounds and for all stationary sources of oxides of nitrogen that have the potential to emit one hundred tons or more per year of such pollutant. Such revision shall require the implementation of such technology no later than two years after classification and, in the case of volatile organic compounds, shall provide that reductions of 80 per centum or more from uncontrolled levels be achieved unless the State determines for a category of sources that such level of reductions is not technologically or economically feasible, in which case the required reduction shall be the maximum that is technologically and economically feasible;

"(7) within the timeframes provided in that section, such revisions as are required by section 212(a)(8) to implement the clean alternative fuel vehicle program with respect to the Federal Government fleet program described in section 212(a)(1)(B).

"(c) REQUIREMENTS FOR SEVERE AREAS.—Each State containing an area classified as a severe area pursuant to section 181(a) or subsequently so classified pursuant to section 107(d)(5) and this subpart shall, with respect to the severe area, comply with the requirements of subsections (a) and (b) (except that the requirements of subsection (b)(6) concerning implementation of reasonably available control technology by stationary sources of volatile organic compounds shall apply with respect to such sources that have the potential to emit fifty tons or more per year of such compounds) and in addition submit to the Administrator the following revisions to the applicable implementation plan and other items:

"(1) within two years after the date of classification, a revision that identifies and adopts specific enforceable strategies and transportation control measures to offset any growth in emissions from growth in vehicle miles traveled or numbers of vehicle trips in such area and to attain reduction in motor vehicle emissions as necessary, in combination with other emission reduction requirements of this subpart, to comply with the requirements of subsection (b)(3)(B) (pertaining to periodic three-year emissions reduction requirements). The State shall consider measures specified in section 108(f), and choose from among and implement such measures as necessary to demonstrate attainment with the national ambient air quality standards; in considering such measures, the State should ensure adequate access to downtown, other commercial, and residential areas and should avoid measures that increase or relocate emissions and congestion rather than reduce them;

"(2) within one year after the date of classification, a revision requiring employers in such area to implement programs to reduce work-related vehicle trips and miles traveled by employees. Such revision shall be developed in accordance with guidance issued by the Administrator pursuant to section 108(f) and shall, at a minimum, require that each employer of one hundred or more persons in such area increase average passenger occupancy per vehicle in commuting trips between home and the workplace during peak travel periods by not less than 25 per centum above the average vehicle occupancy for all such trips in the area at the time the revision is submitted. The guidance of the Administrator may specify average vehicle occupancy rates which vary for locations within a nonattainment area (suburban, center city, business district) or among nonattainment areas reflecting existing occupancy rates and the availability of high occupancy modes. The revision shall provide that each employer subject to a vehicle occupancy requirement shall submit a compliance plan within two years after the date the revision is submitted which shall convincingly demonstrate compliance with the requirements of this paragraph not later than four years after such date. An employer may demonstrate in such plan compliance with a vehicle occupancy rate less than 25 per centum greater than the average in the area, if expenditures by the employer in implementing the compliance plan are equal to or greater than the cost of providing employees with parking spaces at the location of the workplace;

"(3) within the timeframes provided by that section, such revisions as are required by section 212(a)(8) to implement the clean alternative fuel vehicle program with respect to the private fleet program described in section 212(a)(1)(C) and the general vehicle requirements described in section 212(a)(2).

"(d) REQUIREMENTS FOR EXTREME AREAS.—

"(1) When all or part of an extreme area is in a metropolitan statistical area (MSA) or consolidated metropolitan statistical area (CMSA), the boundaries of the extreme area for the purposes of this subpart shall be defined, by operation of law, as the boundary of such MSA or CMSA, as applicable, plus twenty-five miles. If a State demonstrates to the satisfaction of the Administrator within sixty days of such designation that with respect to a portion of such area—

"(A) sources in that portion do not contribute to violations of the standards, and

"(B) there is a geographical basis for excluding that portion,

the Administrator may approve a State's request to exclude such portion from the nonattainment area. The Administrator shall determine whether or not to exclude such portion within sixty days of receiving the State's request.

"(2) Each State in which an extreme area or portion thereof is located shall, with respect to the extreme area, comply with the requirements of subsections (a), (b), and (c) and in addition submit to the Administrator revisions to the applicable implementation plan that comply with subsection (b) (2) and (3) (pertaining to initial and periodic per centum emission reduction requirements) except that in addition to the required reductions in emissions of volatile organic compounds, the State shall submit revisions providing for initial and triennial 12 per centum reductions in emissions of oxides of nitrogen.

"(3) The Administrator may approve provisions of an implementation plan for an extreme area which anticipate development or improvement of control technologies, and an attainment demonstration based on such provisions, if the State demonstrates to the satisfaction of the Administrator that:

"(A) such provisions are not necessary to achieve the periodic emission reductions required by paragraphs (2) and (3) of subsection (b) during the first ten years after enactment of this subsection;

"(B) the State has submitted enforceable commitments to develop and adopt contingency measures to be implemented as set forth herein if the anticipated technologies do not achieve planned reductions. The contingency measures shall be submitted to the Administrator no later than three years prior to proposed implementation of the plan provisions. The contingency measures shall be adequate to produce emission reductions sufficient to, in conjunction with other approved plan provisions, achieve the periodic emission reductions required by paragraph (3) of subsection (b) and attainment by the applicable dates. If the Administrator determines that an extreme non-attainment area has failed to achieve an emissions reduction requirement set forth in paragraph (3) of subsection (b) or to attain by the applicable date, and that such failure is due in whole or part to an inability to fully implement provisions approved pursuant to this subsection, the Administrator shall require the State to implement the contingency measures to the extent necessary to assure compliance with paragraph (3) of subsection (b) or to achieve attainment; and

"(C) the plan contains enforceable, adopted measures establishing an economic incentive program that the Administrator determines is adequate, when considered in conjunction with other enforceable plan measures, to induce the development or improvement of the anticipated technologies.

"(4) An implementation plan for an extreme area revised in compliance with this section may include measures providing economic incentives and disincentives, such as differential emission fees, marketable permits, road use and congestion fees, and emission charges, in combination with or as a supplement to regulatory requirements.

"(5) An implementation plan for an extreme nonattainment area may provide that the offset provisions of this part shall not be applicable to a modification of an existing source if such modification consists of installation of equipment required to comply with a plan provision establishing a system-wide average emission limit applicable to steam electric generating units of an electric utility system which are located within the nonattainment area: *Provided*, That such limit will be no greater than 0.25 pounds of oxides of nitrogen per net megawatt hour of generation averaged over a twenty-four-hour period, commencing no later than December 31, 1999.

"(e) CERTAIN NON-SELF-GENERATING AREAS.—

"(1) Notwithstanding any other provision of section 181 or this section, a State containing an ozone nonattainment area that does not include and is not adjacent to any part of a metropolitan statistical area or, where one exists, a consolidated metropolitan statistical area (as defined by the Office

of Management and Budget), which area is determined by the Administrator to be non-self-generating within the meaning of paragraph (2), shall be treated by operation of law as satisfying the requirements of this section if it complies with regulations promulgated by the Administrator. Such regulations shall be promulgated no later than January 1, 1991, and shall, at a minimum, require compliance with the provisions of section 182 and such other measures as the Administrator determines appropriate to provide for the attainment and maintenance of the national ambient air quality standard for ozone.

"(2) The Administrator may determine an ozone nonattainment area to be non-self-generating if the Administrator finds that sources of volatile organic compounds and oxides of nitrogen emissions within the area do not make a significant contribution to the ozone concentrations measured in the area or in other areas.

"FAILURE TO ATTAIN

"SEC. 184. (a) FAILURE TO ATTAIN.—For any ozone nonattainment area that fails to attain the primary ozone air quality standard by the date applicable to such area pursuant to section 181, the Administrator shall—

"(1) in the case of a moderate area reclassify such area as a serious area, in the case of a serious area, reclassify such area as a severe area, and in the case of a severe area, reclassify such area as an extreme area. From the date of reclassification each such area shall be subject to the provisions of this subpart, including the attainment date, that are applicable to the classification to which the area has been reclassified; and

"(2) assure that the provisions of the implementation required by section 184(e) (pertaining to emissions for major stationary sources) are enforced.

"(b) FEE FOR FAILURE TO ATTAIN.—

"(1) The revision to the applicable implementation plan required under section 183(a)(1) (relating to the State implementation plan submittal required for all ozone nonattainment areas) shall provide that if the area has failed to attain by—

"(A) in the case of moderate, serious, and severe ozone nonattainment areas, the end of the fifteenth calendar year beginning after enactment of this section; and

"(B) in the case of extreme ozone nonattainment areas, the applicable attainment date;

each major stationary source of volatile organic compounds located in the area shall, except as otherwise provided under paragraph (4), pay a fee, computed in accordance with paragraph (2), for each calendar year beginning after the date identified in subparagraph (A) or (B), as applicable, until the area is redesignated as an attainment area.

"(2)(A) The fee shall equal $5,000, adjusted in accordance with subparagraph (B), per ton of VOC emitted during the calendar year in excess of 80 per centum of the amount of emissions allowed under the applicable implementation plan (in accordance with such guidance as the Administrator may provide), during the year identified under paragraph (1) (A) or (B), as applicable.

"(B) The fee amount under subparagraph (A) shall be adjusted annually, beginning in the year beginning after the year of enactment, by the percentage, if any, by the which the Producer Price Index for the most recent calendar year ending before the beginning of such year exceeds the Producer Price Index for the calendar year 1989.

"(3) For areas with a total population under two hundred thousand which fail to attain the standard by the applicable attainment date, no sanction under this or any other section of the Act shall apply if the area can demonstrate, consistent with guidance issued by the Administrator, that attainment in the area is prevented because of ozone or ozone precursors transported from other areas. The prohibition applies only in cases in which the area has met all requirements and implemented all measures applicable to the area under this Act.

"ADDITIONAL FEDERAL MEASURES TO CONTROL OZONE POLLUTION

"SEC. 185. (a) CONTROL TECHNIQUES GUIDELINES.—

"(1) Not later than six months after the date of enactment of this subpart, the Administrator shall publish a list of at least twelve categories of stationary sources for which control technique guidelines, in accordance with subsection 108(b), have not previously been published and which the Administrator considers to make the most significant contribution to the formation of ozone air pollution. The categories shall be divided into three groups (with an equal number of categories in each group) and the Administrator shall establish a schedule for publication of guidelines for each of such groups at the time of publication of the list of categories.

"(2) The Administrator shall publish control technique guidelines for sources within the categories listed under paragraph (1). The guidelines shall be published for the first group of such sources within the first eighteen months after publication of the list and for at least one additional group in each succeeding eighteen-month period until guidelines have been published for all listed categories.

"(3) Within thirty-six months after the date of enactment of this subpart, and every four years thereafter, the Administrator shall review and, if necessary, update control technology guidelines including those issued before the enactment of this subpart. The Administrator may publish such additional guidelines as the Administrator deems necessary.

"(4) For other source categories not covered by paragraph (1) but for which a control technique guideline would, as determined by the Administrator, further the purposes of this Act and provide guidance to the States, such as commercial bakeries, the Administrator shall issue a control technique guideline not later than thirty-six months after enactment of this subpart.

"(b) VOLATILE ORGANIC COMPOUNDS EMISSIONS FROM LOADING AND UNLOADING OF CERTAIN VESSELS.—Within two years after the enactment of this subpart, the Administrator shall publish a control technique guideline, in accordance with section 108(c), regarding control of volatile organic compound emissions from the loading or unloading of petroleum products onto or from vessels. Such emissions shall be considered to be direct emissions of the onshore terminal for all purposes under this Act.

"(c) VOLATILE ORGANIC COMPOUNDS EMISSIONS FROM AEROSPACE COATINGS AND SOLVENTS.—Within two years after the enactment of this subpart, the Administrator shall publish a control techniques guideline for all aerospace coating and solvent applications (including military and commercial applications), after consultation with the Department of Defense, the Federal Aviation Administration, the National Air and Space Administration, and the affected industry. In evaluating VOC reduction strategies, the guidelines shall take into account the applicable requirements of section 112 and the need to protect stratospheric ozone.

"(d) CONSUMER OR COMMERCIAL PRODUCTS.—

"(1) Within three years after the date of enactment of this subpart, the Administrator shall submit to the Congress a final report on emissions of ozone precursors from consumer or commercial products which emit significant quantities of ozone precursors, and include recommendations for the control of such emissions. The Administrator shall commence such study not later than sixty days after the date of the enactment of this subpart. The report shall consider the costs and technological feasibility of controlling emissions of ozone precursors from consumer or commercial products, as well as the amount of emissions reductions from consumer or commercial products that would be necessary for areas designated nonattainment for ozone to attain and maintain the national ambient air quality standard for ozone. In addition, the report shall estimate the total amount of reductions of emissions of ozone precursors that is appropriate and achievable from regulation of consumer or commercial products.

"(2)(A) Within one year of submission of the report required under paragraph (1), the Administrator shall propose, and within two years of such submission shall promulgate, regulations to aid in the attainment of the ozone ambient air quality standard by decreasing emissions of ozone precursors from classes or categories of consumer or commercial products. Such regulations shall be designed to achieve reductions from the product categories selected by the Administrator to a level equal to the level that would be achieved by the application of reasonably available controls to each such class or category of consumer or commercial products and shall, at a minimum, achieve, within two years after promulgation, reductions in nationwide anthropogenic emissions of volatile organic compounds of at least one per centum below the level of such emissions in the calendar year of enactment of this subpart.

"(B) Such regulations may include any system or systems of implementation as the Administrator may deem appropriate, including but not limited to requirements for registration and labeling, self-monitoring and reporting, prohibitions, or limitations concerning the manufacture, processing, distributions, use, consumption, or disposal of the product.

"(C) The regulations may exempt health-use products for which the Administrator determines there are not suitable substitutes.

"(3) Any standard established under this subsection shall be treated, for purposes of sections 113, 114, 120, 304, and 307 and other enforcement provisions of this Act, as a standard under section 111.

"(4) Each State may develop and submit to the Administrator a procedure under State law for implementing and enforcing regulations promulgated under this subsection. If the Administrator finds the State procedure adequate, he shall approve such procedure. Nothing in this paragraph shall prohibit the Administrator from enforcing any applicable regulations under this subsection.

"(5) For the purposes of this subsection—

"(A) the term 'reasonably available controls' means the degree of emissions reduction that the Administrator determines, on the basis of technological and economic feasibility, health, environmental, and energy impacts, is reasonably achievable through the application of any equipment measures, processes methods, systems or techniques, including, but not limited to, chemical reformulation, product or feedstock substitution, repackaging, or directions for use, consumption, storage, or disposal;

"(B) the term 'consumer or commercial products' means any substance, product, or article (including any container or packaging) held by any person, the use, consumption, storage, disposal, destruction, or decomposition of which may result in the release of volatile organic compounds. The term does not include fuels or fuel additives as defined under section 211, or motor vehicles, non-road vehicles, and non-road engines as defined under section 216.

"(e) HAZARDOUS WASTE FACILITIES.—The Administrator shall, not later than March 31, 1991, and after notice and opportunity for public comment, promulgate regulations pursuant to section 3004(n) of the Solid Waste Disposal Act controlling emissions of volatile organic compounds and other pollutants from treatment, storage, and disposal facilities subject to such Act which shall, at a minimum, achieve within three years after promulgation, a 90 per centum reduction in uncontrolled emissions of volatile organic compounds from such facilities.

"CONTROL OF INTERSTATE OZONE AIR POLLUTION

"SEC. 186. (a) OZONE TRANSPORT REGIONS.—The area comprising the States of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Virginia, and the consolidated metropolitan statistical area including the District of Columbia is established as an ozone transport region. The Administrator may add any State or portion of a State to any region established under this subsection or establish other ozone transport regions, consisting of two or more States, when the Administrator determines that the interstate transport of air pollutants from such State or States significantly contributes to concentrations of ozone or ozone precursors in any nonattainment area in another State classified under section 181(a) as a serious, severe, or extreme area for ozone. The ozone transport commission established under subsection (b) for any ozone transport region may remove any State or portion of a State from the region if the commission determines that the control of emissions in that State or portion of a State pursuant to this section will not significantly contribute to the attainment of the primary ambient air quality standard for ozone in any nonattainment area.

"(b) OZONE TRANSPORT COMMISSIONS.—Not later than six months after enactment of this subpart, the Administrator shall establish an ozone transport commission for the ozone transport region established by the first sentence of subsection (a). Not later than three months after the establishment of any other ozone transport region, the Administrator shall establish an ozone transport commission for the region. Each ozone transport commission shall be comprised of the following members—

"(1) an air pollution control official representing each State in the region, appointed by the Governor or as provided under State law;

"(2) the Administrator (or an employee designated by the Administrator from the headquarters office of the Environmental Protection Agency); and

"(3) the Regional Administrator (or an employee designated by the Regional Administrator) for each Environmental Protection Agency regional office for each Environmental Protection Agency region affected by the ozone transport region concerned.

Decisions of each ozone transport commission may be made only by a majority vote of all members other than the Regional Administrators (or designees thereof).

"(c) PLAN PROVISIONS FOR STATES IN OZONE TRANSPORT REGIONS.—Not later than two years after the enactment of this subpart (or nine months after the subsequent inclusion of a State in an established ozone transport region), each State included within an ozone transport region shall submit a State implementation plan or revision thereof to the Administrator which requires the following—

"(1) that each area in such State that is in an ozone transport region, that is not a nonattainment area, and that is a metropolitan statistical area or part thereof with a population of 100,000 or more, comply with the provisions of section 183(a)(1)(A) (pertaining to vehicle inspection and maintenance programs);

"(2) implementation of reasonably available control technology with respect to—

"(A) all sources of volatile organic compounds in the State covered by a control techniques guideline issued before the date of enactment of this subpart.

"(B) all sources of volatile organic compounds or oxides of nitrogen in the State covered by a control techniques guideline issued by the Administrator after the date of enactment of this subpart, and

"(C) all stationary sources that have the potential to emit one hundred or more tons of volatile organic compounds and that are not covered by a control technique guideline or listed pursuant to section 185(a); and

"(3) a requirement that all owners or operators of gasoline dispensing systems within the area install and operate a system designed to (i) prevent discharge of hydrocarbon vapors into the ambient air, (ii) direct vapor displaced from the automotive fuel system to a system where organic compounds in the displaced vapor are recovered, and (iii) prevent vehicle fuel tank overflows or spillage on fill nozzle disconnect. The requirement of this subparagraph shall apply only to facilities which dispense more than fifty thousand gallons of gasoline per month. The Administrator may revise or waive the requirements of this subparagraph, as appropriate, after such time as the Administrator determines that onboard emissions control systems required under this Act are in widespread use throughout the motor vehicle fleet.

"(d) ADDITIONAL CONTROL MEASURES.—

"(1) Upon petition of any State within an ozone transport region, the commission may, after notice and opportunity for comment, develop a plan of additional control measures to be applied within all or a part of such transport region if the commission determines such measures are necessary to bring any area in such region into attainment by the dates provided by this subpart. The commission shall transmit such plan to the Administrator.

"(2) Whenever the Administrator receives a plan prepared by a commission pursuant to paragraph (1) (the date of receipt of which is hereinafter in this section referred to as the receipt date), the Administrator shall—

"(A) immediately publish in the Federal Register a notice stating that the plan is available and that written data, views, or comments on the plan may be submitted to the Administrator within ninety days beginning on the receipt date; and

"(B) commence a review of the plan to determine whether the control measures in the plan are necessary to bring any area in such region into attainment by the dates provided by this subpart and are otherwise consistent with this Act.

"(3) In undertaking the review required under paragraph (2)(B), the Administrator shall consult with members of the commission of the affected States and shall take into account the data, views and comments received pursuant to paragraph (2)(A).

"(4) Within one hundred and twenty days after the receipt date, the Administrator shall determine whether to approve, disapprove, or partially disapprove and partially approve the plan; shall notify the commission in writing of such approval, disapproval or partial disapproval; and shall publish such determination in the Federal Register. If the Administrator fails to act within one hundred and twenty days, the plan shall be deemed approved. If the Administrator disapproves or partially disapproves a plan, the Administrator shall specify—

"(A) why any disapproved additional control measures are not necessary to bring any area in such region into attainment by the dates provided by this subpart or are otherwise not consistent with the Act; and

"(B) recommendations concerning actions that could be taken by the commission to conform the disapproved portion of the plan to the requirements of this section.

"(5) Upon approval or partial approval of a plan submitted by a commission, the Administrator shall issue to each State which is included in the transport region and to which a requirement of the approved plan applies, a finding under section 110(d)(4) that the implementation plan for such State is inadequate to meet the requirements of section 110(c)(4). Such finding shall require each such State to revise its implementation plan to include the approved additional control measures within one year after the finding is issued.

"(e) EXEMPT AREAS.—(1) Upon petition of any State within an ozone transport region, the Administrator, after seeking written views of the commission and after publishing a written finding in the Federal Register, may exempt any area within such State from one or more of the requirements of subsection (c) if the State demonstrates to the satisfaction of the Administrator that stationary or mobile sources within the area do not contribute to nonattainment in any other area in such region. The Administrator shall make a determination under this paragraph within nine months following receipt of a petition.

"(2) The requirements of subsection (c)(3) shall not apply to any State that contains no ozone nonattainment area or portion thereof unless the Administrator determines that such requirements are necessary to achieve attainment in any area in an adjoining State or the Governor of the State containing no ozone nonattainment area determines, pursuant to State law, that such requirements should apply in such State.

"(f) PETITIONS.—Any State or political subdivision may petition the Administrator to make a determination that any other State or portion thereof should be included

within an ozone transport region under this section. The petitioning State shall include with such petition such evidence as is available to it regarding the contribution made by sources located in (or operating in) the State (or portion thereof) which is the subject of the petition to ozone concentrations in the petitioning State. Within one hundred and twenty days after receipt of any petition under this subsection and after a public hearing, the Administrator shall include the State (or portion thereof) within an ozone transport region or deny the petition.

"(g) BEST AVAILABLE AIR QUALITY MONITORING AND MODELING.—For purposes of this section, not later than six months after the enactment of subpart, the Administrator shall promulgate criteria for purposes of determining the contribution of sources in one area to concentrations of ozone in another area which is a nonattainment area for ozone. Such criteria shall require that the best available air quality monitoring and modeling techniques be used for purposes of making such determinations.".

ADDITIONAL REQUIREMENTS FOR CARBON MONOXIDE NONATTAINMENT AREAS

SEC. 108. NEW REQUIREMENTS FOR CARBON MONOXIDE NONATTAINMENT AREAS.—Part D of title I of the Clean Air Act is amended by adding the following new subpart after subpart 2:

"Subpart 3—Additional Provisions Regarding Carbon Monoxide Nonattainment Areas

"CLASSIFICATION OF CARBON MONOXIDE NONATTAINMENT AREAS

"SEC. 187. (a) CLASSIFICATION BY OPERATION OF LAW.—Each area designated nonattainment for carbon monoxide under section 107(f)(3) is hereby classified by operation of law in one of the following categories based upon the percentage by which the national primary ambient air quality standard for carbon monoxide averaged over an eight-hour period was exceeded in that area:

"Area classification	Percentage exceedance
Moderate	Not Greater than 55 per centum
Serious	Greater than 55 per centum.

Any reference in this subpart to a 'moderate nonattainment area' or a 'serious nonattainment area' shall be considered a reference to a moderate or serious carbon monoxide nonattainment area as classified under this subsection (or as subsequently reclassified under this subpart). Any reference in this subpart to the 'carbon monoxide air quality standard' shall be considered a reference to the national primary ambient air quality standard for carbon monoxide averaged over an eight-hour period.

"(b) DATA AND METHODS FOR CLASSIFICATION.—For purposes of calculating the percentage by which the carbon monoxide air quality standard is exceeded in any area—

"(1) the most recent monitoring data available as determined by the Administrator, shall be used; and

"(2) the interpretation methodology issued by the Administrator most recently before the date of enactment of this subpart for purposes of determining attainment of the standard shall be applicable.

Not later than thirty days after the date of enactment of this subpart the Administrator shall publish a notice identifying the percentage by which each area referred to in subsection (a) exceeds the carbon monoxide air quality standard and the classification of each area as moderate or serious.

"(c) DEADLINES FOR ATTAINMENT.—The following deadlines apply to the carbon monoxide nonattainment areas classified in accordance with subsection (a)—

"Area Classification	Applicable attainment date (in years after enactment of this subpart)
Moderate	5 years
Serious	10 years.

"(d) NEW STANDARD.—If the Administrator revises the carbon monoxide air quality standard after the enactment of this subpart, the Administrator shall, within six months after the revision, promulgate requirements applicable to all areas which have not attained the revised standard and shall require the submission of implementation plans or revisions to such plans for such areas within twenty-four months after the revision of the standard. Such requirements shall provide for controls which are not less stringent than the controls applicable to areas classified under subsection (a) and shall provide for attainment of such revised standard according to a schedule which is comparable to that specified in subsection (c).

"(e) Any area that is not designated nonattainment for carbon monoxide under section 107 as of the date of enactment of this section, and that is subsequently redesignated to nonattainment for carbon monoxide under section 107, shall, at the time of the redesignation, be classified by operation of law in accordance with the table under subsection (a). Upon its classification, the area shall be subject to the same requirements under section 110, subpart 1 of this part, and this subpart that would have applied had the area been so classified as of the time of the classification under subsection (a), except that any absolute, fixed date applicable in connection with any such requirement is extended by operation of law by a period equal to the length of time between the date of enactment of this section and the date the area is classified.

"REQUIREMENTS APPLICABLE TO ALL CARBON MONOXIDE NONATTAINMENT AREAS

"SEC. 188. (a) INVENTORIES.—Each State containing a nonattainment area classified pursuant to section 187(a) shall, not later than one year after the date of enactment of this subpart and every three years thereafter, submit an inventory of carbon monoxide emissions from stationary and mobile sources located within each such area as provided in the guidelines issued by the Administrator pursuant to section 108(g). The initial inventory shall report emissions occurring in the calendar year immediately preceding enactment of this section or the subsequent year. Any area subsequently designated nonattainment pursuant to section 107(d)(5) and classified pursuant to this subpart shall submit (and update as provided in this subsection) a carbon monoxide emissions inventory for the calendar year of classification beginning eighteen months after the date of classification. Guidance for inventory preparation published by the Administrator pursuant to section 108(g) shall contain factors for estimating carbon monoxide emissions from wood stoves and other small combustion sources.

"(b) MONITORING.—The enhanced monitoring program required by section 108(g) shall include the use of mobile monitors for carbon monoxide to determine the geographic extent of any nonattainment problem for such pollutant within an area. Monitoring pursuant to such guidelines shall be commenced in all areas classified pursuant to section 187(a) or subsequently pursuant to section 107(d)(5) and this subpart not later than eighteen months after such classification. The Administrator may require through guidance or by rule the use of mobile monitoring devices for carbon monoxide in areas designated as attainment areas.

"(c) EXISTING COMMITMENTS.—

"(1) Not later than eighteen months after the date of enactment of this section each State containing an area classified nonattainment pursuant to section 187(a) shall fully implement all provisions of any implementation plan for the attainment of the carbon monoxide air quality standard for such area or areas which have been submitted to the Administrator for approval (whether or not approved) prior to the date of enactment of this section.

"(2) Each State containing an area classified pursuant to section 187(a) shall promptly and fully implement any additional measures not previously proposed by the State but required by subpart 1.

"(3) Nothing in this Act shall prohibit a State containing an area classified nonattainment pursuant to section 187(a) from revising its implementation plan to substitute an alternative control measure for an existing control measure if the State demonstrates that:

"(A) the alternative control measure—

"(i) is not already included in the implementation plan;

"(ii) is not otherwise required by this Act;

"(iii) will provide an equal or greater degree of carbon monoxide emissions control as full implementation of the existing control measure would provide; and

"(iv) will be implemented not later than 18 months after the date of enactment of this Act; and

(B) the existing control measure is not otherwise required under this Act or under guidelines or regulations issued by the Administrator.

When the State makes such a demonstration, the Administrator shall approve a revision to the implementation plan which incorporates the alternative control measure.

"(d) PERMIT REQUIREMENT.—

"(1) Each State containing an area classified pursuant to section 187(a) or which contains an area subsequently classified pursuant to section 107 and this subpart shall not later than eighteen months after the date of such classification submit to the Administrator for approval a revision to the implementation plan for each such area requiring an operating permit (including permit fees) as provided in sections 172(a)(6) and 173(b) for each new or existing major stationary source of carbon monoxide emissions located within any such nonattainment areas. It shall be unlawful for any person to operate a major source of carbon monoxide emissions without a permit issued pursuant to an approved implementation plan beginning thirty-six months after the date of enactment of this subpart.

"(2) Each permit issued pursuant to this subsection shall require the installation of continuous emission monitoring for carbon monoxide emissions from the source.

"(e) ATTAINMENT DEMONSTRATION AND MILESTONES.—

"(1) Each State containing a moderate or serious nonattainment area shall, after notice and opportunity for public comment but not later than twenty-four months after such area has been designated nonattainment, submit to the Administrator for approval revisions to the implementation plan for each such area which demonstrate, as provided in section 110 and this part, attainment of the carbon monoxide air quality standard by the deadline for attainment for such area or areas as provided in section 187(c).

"(2)(A) Notwithstanding the provisions of paragraph (1), revisions demonstrating attainment under this subsection shall not be required for any moderate nonattainment area for which the design value in the most recent calendar year immediately preceding enactment of this section did not exceed the carbon monoxide air quality standard by more than 10 per centum: *Provided*, That, within three months after the date of enactment of this subpart the Governor of such State submits to the Administrator a detailed statement of the measures to be undertaken in such area which will assure attainment of the carbon monoxide air quality standard by not later than thirty-six months after such date of enactment.

"(B) In the event that a moderate nonattainment area for which an attainment demonstration has not been submitted pursuant to subparagraph (A) does not attain the carbon monoxide air quality standard by the date thirty-six months after the date of enactment of this subpart, the State in which such area is located shall, after notice and opportunity for public comment, submit within an additional twelve-month period revisions to the implementation plan for the area making such demonstration and such area shall be subject to all of the requirements of this subpart applicable to moderate nonattainment areas including implementation of a vehicle inspection and maintenance program pursuant to subsection (i) and the deadlines for attainment established by section 187(c).

"(3) Revisions demonstrating attainment submitted to the Administrator for approval under this subsection shall contain quantitative milestones to be achieved in each year in which an inventory is required under subsection (a) until the area is reclassified attainment and which demonstrate, as defined in section 171(1), reasonable further progress toward attainment by the date applicable to the area under section 187(c). Milestones proposed for inclusion in an implementation plan under this paragraph may be stated as—

"(A) reductions in vehicle miles traveled or vehicle trips in the nonattainment area, or both, during periods when the standard is likely to be violated;

"(B) reductions in tons of emissions of carbon monoxide emitted annually in the nonattainment area;

"(C) reductions in the design value for carbon monoxide averaged over an eight-hour period for the area;

"(D) reductions in the number of exceedances of the national carbon monoxide air quality standard which would be expected to occur each year; or

"(E) any combination of the above.

"(4) Revisions demonstrating attainment submitted to the Administrator for approval under this subsection shall contain one or more contingency measures sufficient to reduce (singly or in combination) carbon monoxide emissions in the nonattainment area as reported in the most recent inventory by not less than 5 per centum for moderate nonattainment areas and not less than 10 per centum for serious nonattainment areas. The revisions shall provide for automatic implementation of the measures in the event the area does not attain the carbon monoxide air quality standard by the date applicable to the area as provided in section 187(c). Contingency measures may be implemented only in part if all measures are not necessary to assure attainment of such standard as determined by the Administrator. Implementation of contingency measures shall not be delayed by any extension granted pursuant to section 190(d)(1).

"(5) The Administrator may not approve any revisions submitted pursuant to this subsection unless such revisions taken as a whole convincingly demonstrate attainment by not later than the dates specified in section 187(c). Notwithstanding the provisions of this paragraph, the Administrator may order that any or all requirements contained in such revisions be implemented and enforced pending submission of additional revisions of the implementation plan which can be approved as demonstrating attainment of the carbon monoxide air quality standard by the dates applicable under section 187(c).

"(f) CONTINUING AUDITS OF IMPLEMENTATION PLANS.—

"(1) The Administrator shall conduct an audit of each implementation plan for carbon monoxide for each area designated nonattainment for the carbon monoxide air quality standard to determine whether the State (or local air pollution control agency) is adequately implementing and enforcing each provision of the plan and achieving the milestones established pursuant to subsection (e). Audits shall be conducted not less frequently than every three years and shall be scheduled, to the extent practicable, in years immediately following the compilation of an inventory as provided by subsection (a).

"(2) If the Administrator finds that any provision required by section 110, section 172(a) (1) through (10), section 173 or this subpart is not being adequately implemented and enforced, the Administrator shall promptly notify the State in which the area is located and shall impose the sanctions required by section 190 until such time as full implementation is achieved.

"(3) If the Administrator finds that any milestone established pursuant to subsection (e) has not been achieved by the applicable date, the Administrator shall require the State in which the area is located to promptly submit revisions to its plan, including provisions which may be identified by the Administrator, assuring achievement of the milestone as expeditiously as practicable but not later than eighteen months after the date originally scheduled for achieving the milestone. The Administrator shall also impose the sanctions required by section 190 until such time as the milestone is achieved.

"(g) VEHICLE INSPECTION AND MAINTENANCE PROGRAM.—Each State containing an area classified nonattainment pursuant to section 187(a) or which contains an area subsequently classified nonattainment and which is required to submit revisions to the implementation plan for such area demonstrating attainment pursuant to subsection (e) shall, not later than one year after the date of such classification, submit a revision to the applicable plan providing for implementation of a vehicle inspection and maintenance program which achieves carbon monoxide emissions reductions equivalent to a reduction of fifty-two thousand tons of such emissions per million vehicles covered in the year of enactment of this subpart (if the program had been operating in such year) and includes each of the elements in clauses (i) through (vi) of section 183(a)(1)(A).

"(h) OXYGENATED FUELS.—Revisions demonstrating attainment submitted pursuant to subsection (g) shall contain provisions implementing and enforcing an oxygenated fuels program for each moderate or serious nonattainment area as provided in section 211(e).

"(i) Notwithstanding any other provision of this Act, any State implementation plan submittal required for any carbon monoxide nonattainment area (or portion thereof) not designated nonattainment prior to the date of enactment of the Clean Air Act Amendments of 1990, that is required to be submitted within twelve months from the date of enactment, classification, or designation of such area, shall be required to be submitted within twelve months of the date the area (or portion thereof) is included within the boundaries of an area designated nonattainment under section 107(f)(3)(B).

"REQUIREMENTS APPLICABLE TO SERIOUS CARBON MONOXIDE NONATTAINMENT AREAS

"SEC. 189. (a) TRANSPORTATION CONTROL MEASURES.—In revisions submitted pursuant to section 188(e) for any serious nonattainment area, the State shall consider measures specified in section 108(f), and choose from among and implement such measures as necessary to demonstrate attainment with the national ambient air quality standards. In considering such measures, the State should ensure adequate access to downtown, other commercial, and residential areas and should avoid measures that increase or relocate emissions and congestion rather than reduce them.

"(b) EMPLOYER RIDERSHIP PROGRAM.—Revisions demonstrating attainment submitted pursuant to section 188(e) for any serious nonattainment area shall contain provisions requiring employers in such area to implement programs to reduce work-related vehicle trips and miles traveled by employees. Such revision shall be developed in accordance with guidance issued by the Administrator pursuant to section 108(f) and shall, at a minimum, require that each employer of one hundred or more persons increase average passenger occupancy per vehicle in commuting trips between home and the workplace during peak travel periods by not less than 25 per centum above the average vehicle occupancy for all such trips in the area at the time the revision is submitted. The guidance of the Administrator may specify vehicle occupancy rates which vary for locations within a nonattainment area (suburban, center city, business district) or among nonattainment areas reflecting existing occupancy rates and the availability of high occupancy modes. The revision shall provide that each employer subject to a vehicle occupancy requirement shall submit a compliance plan within two years after the date the revision is submitted which shall convincingly demonstrate compliance with the requirements of this subsection not later than four years after the date the revison is submitted. An employer may demonstrate in such plan compliance with a vehicle occupancy rate less than 25 per centum greater than the average in the area, if expenditures by the employer in implementing the compliance plan are equal to or

greater than the cost of providing employees with parking spaces at the location of the workplace.

"FAILURE TO ATTAIN STANDARD

"SEC. 190. (a) FAILURE TO ATTAIN.—The Administrator shall reclassify any moderate nonattainment area failing to attain, as provided in section 187(c), the carbon monoxide air quality standard by the date five years after the date of enactment of this subpart as a serious nonattainment area, and such area shall from the time of reclassification be subject to the provisions of this subpart applicable to serious nonattainment areas. The Administrator may grant a one-year extension of the attainment date established by section 187(c) for a moderate nonattainment area before reclassification provided that the State has fully implemented all provisions in the implementation plan for the area and the area has not exceeded the carbon monoxide air quality standard by more than 10 per centum in the two years prior to such date. Not more than two one-year extensions may be granted to any area under this subsection. Within twelve months of reclassification, the State shall submit to the Administrator for approval revisions to the implementation plan for such area as may be necessary to comply with the requirements for serious nonattainment areas.

"(b) In the case of an area classified as a serious nonattainment area in which the carbon monoxide air quality standard is not attained by the date provided in section 187(c), the State in which such area is located shall, after notice and opportunity for public comment, submit within twelve months after the applicable attainment deadline plan revisions which provide for attainment of the carbon monoxide air quality standard as provided in section 172(a), and, from the date of such submission until attainment, for an annual reduction in carbon monoxide emissions within the area of not less than 5 per centum of the amount of such emissions as reported in the most recent inventory prepared for such area.".

ADDITIONAL REQUIREMENTS FOR PM-10 NONATTAINMENT AREAS

SEC. 109. (a) NEW REQUIREMENTS FOR PM-10 NONATTAINMENT AREAS.—Part D of title I of the Clean Air Act is amended by adding the following new subpart after subpart 3:

"Subpart 4—Additional Provisions for PM-10 Nonattainment Areas

"ATTAINMENT DEADLINES FOR PM-10 NONATTAINMENT AREAS

"SEC. 191. (a) DEADLINES FOR ATTAINMENT.—State implementation plans required for any PM-10 nonattainment area not meeting the national ambient air quality standard for particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers (as measured by such method as the Administrator may determine) under this subpart shall demonstrate attainment as expeditiously as practicable but not later than the date five years after the date on which such area was designated nonattainment for PM-10. The attainment deadline for areas designated nonattainment pursuant to subparagraph (A) or (B) of section 107(f)(4) shall not extend beyond December 31, 1994. The Administrator may extend the deadline applicable to any area under this subsection upon a showing by the State that—

"(1) attainment within five years is impracticable because measures or technology to reduce PM-10 emissions are not available or secondary aerosols account for a significant portion of PM-10 levels in such area;

"(2) the State will implement all reasonably available control measures including all measures and control technology requirements described in any guidance issued by the Administrator pursuant to section 195; and

"(3) reasonable further progress toward attainment will be achieved and demonstrated at regular intervals until the attainment date, as provided in section 192(e).

No extension provided under authority of this subsection may extend for a period beyond the date ten years after the date on which an area has been designated nonattainment.

"(b) NEW STANDARD.—If the Administrator revises the particulate matter air quality standard after the date of enactment of this subpart, the Administrator shall, within six months after such revision, promulgate requirements applicable to all areas which have not attained the revised standard and shall require the submission of implementation plans or revisions to such plans for such areas within twenty-four months after the revision of the standard. Such requirements shall provide for controls which are not less stringent than the controls applicable to areas designated nonattainment for PM-10 and shall provide for attainment of such revised standard.

"REQUIREMENTS APPLICABLE TO PM-10 NONATTAINMENT

"SEC. 192. (a) INVENTORIES.—Each State containing an area designated nonattainment pursuant to section 107(f)(4) shall, not later than one year after the date of enactment of this subpart and every three years thereafter, submit an inventory of PM-10 (and PM-10 precursors) emissions from stationary and mobile sources located within each such area as provided in guidelines issued by the Administrator pursuant to section 108(g). Any area subsequently designated nonattainment pursuant to section 107 or this subpart shall submit (and update as provided in this subsection) such emissions inventories beginning eighteen months after the date of designation. Guidance for inventory preparation issued by the Administrator pursuant to section 108(g) shall contain factors for estimating PM-10 (and PM-10 precursors) emissions from area and natural sources.

"(b) APPROVED SIPS.—Nothing in this section shall be interpreted to require preparation and submission of plan revisions for areas for which the State has submitted and the Administrator has approved a plan revision pursuant to regulations promulgated on August 7, 1987 (52 Federal Register 29383) if such plan revisions otherwise meet the requirements of this subpart.

"(c) PERMIT REQUIREMENTS.—

"(1) Each State containing an area designated nonattainment for PM-10 pursuant to section 107(f)(4) or which contains an area subsequently designated nonattainment for PM-10 pursuant to section 107 or this subpart shall not later than eighteen months after the date of such designation submit to the Administrator for approval a revision to the implementation plan for each such area requiring an operating permit (including permit fees) as provided in sections 172(a)(6) and 173(b) for each new or existing major source of PM-10 or PM-10 precursor emissions located within such areas. It shall be unlawful for any person to operate a major source of PM-10 or PM-10 precursor emissions without a permit issued pursuant to an approved implementation plan beginning thirty-six months after the date of enactment of this subpart.

"(2) Each permit issued pursuant to this subpart shall require monitoring of PM-10 or PM-10 precursor emissions from the permitted source not less frequently than monthly. The owner or operator shall periodically (but not later than twenty-four hours after any violation is detected) report the results of such monitoring to the State in which the source is located.

"(d) ATTAINMENT DEMONSTRATION AND MILESTONES.—

"(1) Each State containing an area designated nonattainment pursuant to section 107(f)(4) shall, after notice and opportunity for public comment but not later than twenty-four months after such designation, submit to the Administrator for approval revisions to the implementation plan for each such area which demonstrate attainment of the PM-10 air quality standard by the date provided in section 191(a).

"(2) Plan revisions demonstrating attainment submitted to the Administrator for approval under this subsection shall contain quantitative milestones which are to be achieved in each year in which an inventory is required under subsection (a) until the area is redesignated attainment and which demonstrate, as defined in section 171(1), reasonable further progress toward attainment by the date applicable under section 191(a).

"(3) If a State includes in a plan revision an attainment date for an area which is after the date five years after the date of designation of such area as nonattainment for PM-10, the State shall commit to implementing each of the guidelines for control technology and measures which the Administrator promulgates pursuant to section 194 for each class or category of PM-10 or PM-10 precursor emission sources in the area. If the Administrator promulgates guidelines which are applicable to such classes and categories of sources after the date on which a plan revision is required by this subsection, the State shall further revise its plan within one year after the promulgation of such additional guidelines to provide for prompt implementation.

"(4) Plan revisions demonstrating attainment submitted to the Administrator for approval under this subsection shall contain one or more contingency measures sufficient to reduce (singly or in combination) PM-10 or PM-10 precursor emissions in the nonattainment area as reported in the most recent inventory by not less than 10 per centum. The plan revision shall provide for automatic implementation of the contingency measures in the event the area does not attain the PM-10 air quality standard by the date established pursuant to section 191(a). Implementation of contingency measures shall not be delayed by any extension granted pursuant to section 193(d).

"(5) The Administrator may not approve any revisions submitted pursuant to this subsection unless such revisions taken as a whole convincingly demonstrate attainment by not later than the dates applicable under section 191(a). Notwithstanding the provisions of this paragraph, the Administrator may order that any or all requirements contained in a plan revision be implemented and enforced pending submission of additional revisions of the implementation plan which can be approved as demonstrating attainment of the PM-10 air quality standard by the dates applicable under section 191(a).

"(e) CONTINUING AUDITS OF IMPLEMENTATION PLANS.—

"(1) The Administrator shall conduct an audit of each implementation plan for PM-10 for each area designated nonattainment pursuant to section 107(f)(4) to determine whether the State (or local pollution control agency) is adequately implementing and enforcing each provision of the plan and achieving the milestones established pursuant to subsection (d). Audits shall be conducted not less frequently than every three years and shall be scheduled, to the extent practicable, in years immediately following the compilation of an inventory as provided in subsection (a).

"(2) If the Administrator finds that any provision required by section 110, subpart 1 or this subpart is not being adequately implemented and enforced, the Administrator shall promptly notify the State in which the area is located and shall impose sanctions required by section 193 until such time as full implementation is achieved.

"(3) If the Administrator finds that any milestone established pursuant to subsection (d) has not been achieved by the applicable date, the Administrator shall require the State in which the area is located to promptly submit revisions to its plan, including provisions which may be identified by the Administrator, assuring achievement of the milestone as expeditiously as practicable but not later than eighteen months after the date originally scheduled. The Administrator shall also impose the sanctions required in section 194 until such time as the milestone is achieved.

"(f) WAIVERS FOR CERTAIN AREAS.—The Administrator may, on a case-by-case basis, waive a requirement applicable to an area granted an extension under subsection 191(a) where he determines that nonanthropogenic sources of PM-10 are the principal cause of the violation of the PM-10 standard in the area, except that no requirement for reasonably available control measures or best available control measures applicable to anthropogenic sources which make a significant contribution to PM-10 levels and which are required pursuant to an extension granted under subsection 191(a) shall be waived. The Administrator may also waive a specific date for attainment of the standard where he determines that nonanthropogenic sources of PM-10 in combination with extraordinary meterological conditions or emissions of PM-10 emanating from outside the United States, contribute significantly to the violation of the PM-10 standard in the area.

"FAILURE TO COMPLY OR ATTAIN STANDARD

"SEC. 193. (a) The Administrator may, for any area, grant a one-year extension of the attainment date established pursuant to section 191(a) provided that—

"(A) the State has fully implemented all provisions in the implementation plan for the area;

"(B) the area does not exceed the PM-10 standard averaged annually; and

"(C) the area has not exceeded the PM-10 air quality standard averaged over twenty-four hours by more than 10 per centum in the two years prior to such date.

Not more than two one-year extensions may be granted pursuant to the authority of this subsection.

"(b) In the case of an area designated nonattainment pursuant to section 107(f)(4) in which the PM-10 standard is not attained by the date provided in section 191(a) (and considering any extension provided in paragraph (1)), the State in which such area is located shall, after notice and opportunity for public comment, submit within twelve months after the applicable attainment date, plan revisions which provide for attainment of the PM-10 air quality standard as provided in section 172(a), and, from the date of such submission until attainment, for an annual reduction in PM-10 or PM-10 precursor emissions within the area of not less than 5 per centum of the amount of such emissions as reported in the most recent inventory prepared for such area.

"(c) Within three years after enactment, the Administrator shall review pertinent information and report to the Congress on the need to modify subsection (b) to take into account infeasible requirements that might be placed on certain rural areas of the country where a substantial percentage of ambient PM-10 concentration in the area is caused by the suspension of natural soils in the ambient air due to non-industrial, anthropogenic activities. Included in this review shall be a recommendation on whether exemptions from the 5 per centum annual reduction requirement should be granted to certain areas. In making such recommendations, the Administrator shall consider the presence and concentration of potentially toxic substances in the mix of particulate emissions in the area, and the technological and economic feasibility of various control measures.

"GUIDELINES FOR PM-10 SOURCES

"SEC. 194. (a) INITIAL GUIDELINES.—Not later than eighteen months after the date of enactment of this section, the Administrator shall promulgate control technique guidelines with respect to reasonably available control technology and best available control technology for PM-10 (and PM-10 precursor) emissions from major stationary sources. At the same time, the Administrator shall publish guidelines with respect to reasonably available control measures and best available control measures for controlling PM-10 (and PM-10 precursor) emissions from area sources which cause or contribute to PM-10 nonattainment. At a minimum, guidelines published under this subsection shall include identification of technology and measures for combustion sources including wood smoke, prescribed burning for silviculture and agriculture, and urban fugitive dust.

"(b) WOODSTOVE CURTAILMENT.—In addition to the guidelines required by subsection (a), the Administrator shall, not later than twelve months after the date of enactment of this subpart, publish guidelines for the curtailment of residential wood burning as a reasonably available control measure under this subpart. Each State containing an area or areas which are designated nonattainment for PM-10 and for which residential wood burning contributes 20 per centum or more of PM-10 levels shall, not later than twenty-four months after the date of designation of such area or areas as nonattainment for PM-10, submit a plan revision for each such area providing for the implementation of guidelines issued under this subsection. A State may elect to exempt wood heaters that have certified under the Environmental Protection Agency's Wood Heater Certification Program from any such curtailment.

"(c) ADDITIONAL GUIDELINES.—Not later than six months after the date for submission of plans and plan revisions pursuant to section 192(e)(1), the Administrator shall publish a list of all other classes and categories of sources of PM-10 emissions which States have indicated will prevent attainment of the PM-10 air quality standard within five years after the date of enactment of this subpart because control technology is not available. Not later than forty-eight months after the date of enactment of this subpart, the Administrator shall publish control technique guidelines and guidelines for area sources (as provided in subsection (a)) for each such class or category.".

(b) PM-10 INCREMENTS IN PSD AREAS.—Section 166 of the Clean Air Act is amended by adding the following new subsection:

"(f) PM-10 INCREMENTS.—The Administrator is authorized to substitute, for the maximum allowable increases in particulate matter specified in section 163(b) and section 165(d)(2)(C)(iv), maximum allowable increases in particulate matter with an aerodynamic diameter smaller than or equal to ten micrometers. Such substituted maximum allowable increases shall be at least as stringent in effect as those specified in the provisions for which they are substituted. Until the Administrator promulgates regulations under the authority of this section, the current maximum allowable increases in concentrations of particulate matter shall remain in effect.".

(c) WOODSTOVE MODERNIZATION.—(1) Section 194 of the Clean Air Act is further amended by adding at the end thereof the following new subsection:

"(d) INCENTIVES FOR WOODSTOVE MODERNIZATION.—Not later than forty-eight months after the date of enactment of this subpart, the Administrator shall publish guidelines which may be used by States in implementing programs to encourage the modernization of wood-burning stoves. Such guidelines shall—

"(1) encourage the use to the maximum extent practicable of the exemption under subsection (b) from woodstove curtailment as a means of prompting woodstove owners to convert to wood heaters certified under the Environmental Protection Agency's Wood Heater Certification Program, and

"(2) describe how the State might implement either a low-interest guaranteed loan or grant program to assist low-income woodstove owners in modernizing to less-polluting heating sources, such as any EPA Phase II certified wood heater, solar heating system, or other demonstrably less polluting heating source.".

(2) It is the sense of the Senate that of the receipts received from any fees levied on emissions of substances regulated under this Act and dedicated for the use of the Environmental Protection Agency, an appropriate amount should be made available through section 105 of the Clean Air Act to assist States in wood heater modernization programs as described pursuant to section 194(d)(2).

ADDITIONAL REQUIREMENTS FOR AREAS DESIGNATED NONATTAINMENT FOR SULFUR DIOXIDE, NITROGEN OXIDES, OR LEAD

SEC. 109A. NEW REQUIREMENTS FOR AREAS DESIGNATED NONATTAINMENT FOR SULFUR DIOXIDE, NITROGEN OXIDES, OR LEAD.—Part D of title I of the Clean Air Act is amended by adding the following new subpart after subpart 4:

"Subpart 5—Additional Provisions for Areas Designated Nonattainment for Sulfur Dioxide, Nitrogen Oxides, or Lead

"PLAN SUBMISSION DEADLINES

"SEC. 195. (a) Any State containing an area designated or redesignated under section 107(f) as nonattainment with respect to the national primary air quality standards for sulfur dioxide, nitrogen oxides, or lead subsequent to the date of enactment of this

section shall submit to the Administrator, within 18 months of the designation or redesignation, an applicable implementation plan meeting the requirements of section 110 and this part.

"(b) Any State containing an area designated nonattainment with respect to national primary ambient air quality standards for sulfur dioxide or nitrogen oxides as of the date of enactment of this section, but lacking a fully approved implementation plan complying with the requirements of this Act (including part D) as in effect immediately prior to the date of enactment of this section, shall submit to the Administrator, within 18 months of enactment of this section, an implementation plan meeting the requirements of section 110 and subpart 1 (except as otherwise prescribed by section 196).

"ATTAINMENT DATES

"SEC. 196. (a) Implementation plans required under section 195(a) shall provide for attainment of the relevant primary standard as expeditiously as practicable but no later than 5 years from the date of the nonattainment designation or redesignation.

"(b) Except as provided in subsection (c), implementation plans required under section 195(b) shall provide for attainment of the relevant primary national ambient air quality standard within 5 years from the date of enactment of this section.

"(c) Implementation plans for nonattainment areas for sulfur dioxide or nitrogen oxides with plans that were approved by the Administrator before the date of enactment of this subpart but, subsequent to such approval, were found by the Administrator to be substantially inadequate, shall provide for attainment of the relevant primary standard within 5 years from the date of such finding.

INTERSTATE POLLUTION

SEC. 110. (a) Section 126 of the Clean Air Act is amended as follows:

(1) by adding a new subsection as follows:

"(d) Emissions of air pollutant which, by itself or in combination, reaction, or transformation, adversely affects the public health or welfare of another State, is a violation of this section.";

(2) in subparagraph (B) of subsection (a)(1), by striking "in excess of the national ambient air quality standards";

(3) in subsection (b)—

(A) in the first sentence, following "major source", by inserting "or group of sources"; and

(B) by striking "110(a)(2)(E)(i)" and inserting in lieu thereof "110(c)(4) or this section"; and

(4) in subsection (c)—

(A) in the first sentence, following the words "violation of", inserting "this section and"; and

(B) striking "110(a)(2)(E)(i)" wherever it appears and inserting in lieu thereof "110(c)(4) or this section".

(b) Section 302(h) of the Clean Air Act is amended by inserting before the period ", whether caused by transformation, conversion, or combination with other air pollutants".

(c) Section 304(a)(1) of the Clean Air Act is amended by—

(1) striking "or" after "Act" and inserting a comma in lieu thereof, and

(2) inserting at the end thereof the following: "or (C) section 126,".

VISIBILITY

SEC. 111. Section 169A of the Clean Air Act is amended by adding the following new section:

"STUDIES

"SEC. 169B. (a)(1) The Administrator, in conjunction with the National Park Service and other appropriate Federal agencies, shall conduct research to identify and evaluate sources and source regions of both visibility impairment and regions that provide predominantly clean air in class I areas. A total of $8,000,000 per year for 5 years is authorized to be appropriated for the Environmental Protection Agency and the other Federal agencies to conduct this research. The research shall include—

"(A) expansion of current visibility related monitoring in class I areas;

"(B) assessment of current sources of visibility impairing pollution and clean air corridors;

"(C) adaptation of regional air quality models for the assessment of visibility;

"(D) studies of atmospheric chemistry and physics of visibility.

"(2) Based on the findings available from the research required in subsection (a)(1) of this section as well as other available scientific and technical data, studies, and other available information pertaining to visibility source-receptor relationships, the Administrator shall conduct an assessment and evaluation that identifies, to the extent possible, sources and source regions of visibility impairment including natural sources as well as source regions of clear air for class I areas. The Administrator shall produce interim findings from this study within 3 years of enactment.

"IMPACTS OF OTHER PROVISIONS

"(b) Within 24 months of enactment, the Administrator shall conduct an assessment of the progress and improvements in visibility in class I areas that are likely to result from the implementation of the provisions of the Clean Air Act Amendments of 1990 other than the provisions of this section. Every five years thereafter the Administrator shall conduct an assessment of actual progress and improvement in visibility in class I areas. The Administrator shall prepare a written report on each assessment and transmit copies of these reports to the appropriate committees of Congress.

"ESTABLISHMENT OF VISIBILITY TRANSPORT REGIONS AND COMMISSIONS

"(c)(1) AUTHORITY TO ESTABLISH VISIBILITY TRANSPORT REGIONS.—Whenever, upon the Administrator's motion or by petition from the Governors of at least two affected States, the Administrator has reason to believe that the current or projected interstate transport of air pollutants from one or more States contributes significantly to visibility impairment in class I areas located in the affected States, the Administrator may establish a transport region for such pollutants that includes such States. The Administrator, upon the Administrator's own motion or upon petition from the Governor of any affected State, or upon the recommendations of a transport commission established under subsection (b) of this section may—

"(A) add any State or portion of a State to a visibility transport region when the Administrator determines that the interstate transport of air pollutants from such State significantly contributes to visibility impairment in a class I area located within the transport region, or

"(B) remove any State or portion of a State from the region whenever the Administrator has reason to believe that the control of emissions in that State or portion of the State pursuant to this section will not significantly contribute to the protection or enhancement of visibility in any class I area in the region.

"(2) VISIBILITY TRANSPORT COMMISSIONS.—Whenever the Administrator establishes a transport region under subsection (c)(1) of this section, the Administrator shall establish a transport commission comprised of (as a minimum) each of the following members:

"(A) the Governor of each State in the Visibility Transport Region, or the Governor's designee.

"(B) The Administrator or the Administrator's designee; and

"(C) A representative of each Federal agency charged with the direct management of each class I area or areas within the Visibility Transport Region.

"(3) All representatives of the Federal Government shall be ex officio members.

"(4) The visibility transport commissions shall be exempt from the requirements of the Federal Advisory Committee Act (5 U.S.C. Appendix 2, Section 1).

"(5) Sections 113(a)(1) and 113(a)(2) are revised to add 'or of implementing section 169B' after 'air pollution'.

"DUTIES OF VISIBILITY TRANSPORT COMMISSIONS

"(d) A VISIBILITY TRANSPORT COMMISSION.—

"(1) shall assess the scientific and technical data, studies, and other currently available information, including studies conducted pursuant to subsection (a)(1), pertaining to adverse impacts on visibility from potential or projected growth in emissions from sources located in the Visibility Transport Region; and

"(2) shall, within four years of establishment, issue a report to the Administrator recommending what measures, if any, should be taken under the Clean Air Act to remedy such adverse impacts. The report required by this subsection shall address at least the following measures:

"(A) the establishment of clean air corridors, in which additional restrictions on increases in emissions may be appropriate to protect visibility in affected class I areas;

"(B) the imposition of the requirements of part D of this title affecting the construction of new major stationary sources or major modifications to existing sources in such clean air corridors specifically including the alternative siting analysis provisions of section 172(b)(11)(A) of this title; and

"(C) the promulgation of regulations under section 169A of this title to address long range strategies for addressing regional haze which impairs visibility in affected class I areas.

"DUTIES OF THE ADMINISTRATOR

"(e)(1) The Administrator shall, taking into account the studies pursuant to subsection (a)(1) and the reports pursuant to subsection (d)(2) and any other relevant information, within eighteen months of receipt of the report referred to in subsection (d)(2) of this section, carry out the Administrator's regulatory responsibilities under section 169A, including criteria for measuring 'reasonable progress' toward the national goal.

"(2) Any regulations promulgated under section 169A of this title pursuant to this subsection shall require affected States to

revise within 12 months their implementation plans under section 110 of this title to contain such emission limits, schedules of compliance, and other measures as may be necessary to carry out regulations promulgated pursuant to this subsection.

"GRAND CANYON VISIBILITY TRANSPORT COMMISSION

"(f) The Administrator pursuant to subsection (c)(1) shall, within 12 months, establish a visibility transport commission for the region affecting the visibility of the Grand Canyon National Park.

"(g) NOTICE TO FEDERAL LAND MANAGERS.—Section 165(d)(2)(A) of the Clean Air Act is amended to read as follows:

"'(2)(A) Upon transmitting a copy of a permit application and notice under paragraph (1) to the Administrator, the State shall also provide a copy of such permit application to any Federal land manger and any Federal official charged with direct responsibility for management of any lands within a class I area, or an area described in paragraph (1) or (2) of section 164(a), which may be affected by emissions from the proposed facility. The Administrator shall require applications submitted under paragraph (1) to contain sufficent information to enable the appropriate Federal land manager of such Federal lands to determine the potential effects of such facility on the air quality related values (including visibility) of such Federal lands.'.

"(h) IDENTIFICATION OF POTENTIAL ADVERSE IMPACTS.—Section 165(d)(2)(b) of the Clean Air Act is amended, after the words 'affirmative responsibilities to' add the words 'identify and'.".

OUTER CONTINENTAL SHELF ACTIVITIES

SEC. 112. Title III of the Clean Air Act is amended by adding the following new section after section 326:

"AIR POLLUTION FROM OUTER CONTINENTAL SHELF ACTIVITIES

"SEC. 327. (a).—

"(1) Due to severe and unique air quality problems in California, Congress finds that Outer Continental Shelf ("OCS") oil and gas activities (which, for the purposes of this section, shall include activities of vessels associated with OCS facilities, including in transit activities of vessels associated with the OCS facility they service and within twenty-five miles of such facility) offshore California significantly affect air districts in that State. Therefore, based on such finding, the Secretary of the Interior, pursuant to authorities granted under section 5(a)(8) of the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1334(a)(8) ("OCSLA")), shall promulgate regulations to reduce this significant effect by limiting emissions of air pollutants from OCS activities in the area adjacent to California. Such regulations shall be promulgated only after consultation with appropriate state and local agencies and after obtaining the written concurrence of the Administrator of the Environmental Protection Agency. In order to assist the Secretary in formulating these regulations, the Administrator shall provide the Secretary with a draft of proposed regulations that meet the requirements of this section. The regulations shall be as stringent, in terms of the level of pollution control technologies and the emission offset requirements, as those regulations applied onshore for onshore sources of air pollution in California air districts adjacent to the portion of the OCS in which the activities are occurring. Such regulations may incorporate by reference, as appropriate, the rules of the adjacent onshore air districts. However, the construction phase offset requirement may be averaged over a number of consecutive years such that the annual construction phase offset requirement is reduced down to the level of the peak annual development/production phase offset requirement. In such event, construction phase offsets shall continue at such level until all construction emissions are offset. In addition, the Secretary may substitute a pollution control technology with an alternative technology that achieves the same level of emission control. The OCS requirements shall not impose a greater burden of air pollution control on OCS sources than is imposed on onshore sources, and shall not require pollution control technology that is technically infeasible or that causes an unreasonable threat to health and safety. Based on the above criteria, and after obtaining the written concurrence of the Administrator and providing for public comment, the Secretary may waive an OCS requirement and impose another requirement in its place. The Administrator shall delineate OCS air districts on the basis of their location relative to adjacent onshore air districts. Such OCS air districts shall extend a distance of twenty-five miles from the shoreline, with such outer boundary subject to review and extension by the Administrator in the event that a new exploration plan or development and production plan involving OCS activities beyond that boundary is proposed pursuant to section 1340 or section 1351 of OCSLA. OCS equipment contained in a plan of exploration or development and production plan approved by the Secretary prior to enactment of this section shall be considered to be existing sources. The Secretary shall promulgate the regulations required by this section within one hundred and eighty days of enactment of this section and shall update those regulations as necessary to maintain consistency with onshore regulations in accordance with the provisions of this section. The authority of this section shall supersede any inconsistent authorities under this Act or the OCSLA, but in no case shall allow violation of national ambient air quality standards.

"(2) There is hereby established a Project Emission Reduction Fund ("Fund") to acquire or create emissions offsets to mitigate emissions of air pollutants from OCS activities. This Fund shall be a separate account in the Treasury into which the Secretary or his designee shall deposit fees collected pursuant to this section. Fees shall be payable, through the Secretary or his designee, to the Fund by the owner or operator of any facility that is subject to regulation under this section and for which such owner or operator seeks to obtain emissions offsets, as required by regulation pursuant to paragraph (1), through participation in the Fund. The Fund shall be available for acquisition or creation of emissions offsets directly or through cooperative agreements with State or local agencies. The regulation may provide that in lieu of deposit of fees in the Fund, the Secretary may approve the direct transfer of such fees from the owner or operator to the person or entity implementing the emission reduction project upon the approval of an emission reduction plan by the Secretary. All emissions offsets obtained through this Fund shall meet all offset requirements established by the Secretary pursuant to regulations promulgated under paragraph (1). The Fund shall be used to acquire or create only those emissions offsets which are not already required by the applicable implementation plan or other laws or regulations. The Secretary may, with the consent of the Administrator, allow the Fund to be used to pay for an early implementation of emission control measures planned for the future under the applicable implementation plan or other relevant laws or regulations. In the event of such early implementation of emission control measures, the reductions shall be credited as offsets against OCS emissions only for the period for which the reductions are not otherwise required under the applicable implementation plan or other relevant law or regulation in effect at the time the emission control measures are approved. The Secretary, in consultation with appropriate State and local agencies and with the written concurrence of the Administrator, shall promulgate regulations necessary for the operation of this Fund within one hundred and eighty days of enactment of this section.

"(b) REQUIREMENTS FOR OTHER OFFSHORE AREAS.—For portions of the OCS that are adjacent to States other than California, the Secretary shall consult with the Administrator to assure coordination of air pollution control regulation for OCS emissions and emissions in adjacent onshore areas. Concurrently with this obligation, the Secretary shall complete within three years of enactment of this section and submit to the relevant congressional committees a research study examining the impacts of current and future emissions from OCS activities in such areas on adjacent onshore areas that fail to meet the national ambient air quality standards for either ozone or nitrogen dioxide. Based on the results of this study, the Secretary shall, in consultation with the Administrator, determine if any additional actions are necessary and, if so, develop a plan to implement such actions. The Secretary shall make a periodic review of new OCS activities to determine if any additional actions are necessary. There are authorized to be appropriated such sums as may be necessary to provide funding for the study required under this section.".

INDIAN TRIBES

SEC. 113. (a) Title III of the Clean Air Act is amended by adding the following at the end thereof:

"INDIAN TRIBES

"SEC. 328. (a) IN GENERAL.—Subject to the provisions of subsection (b), the Administrator—

"(1) is authorized to treat Indian tribes as States under this Act,

"(2) may delegate to such tribes primary responsibility for assuring air quality and enforcement of air pollution control, and

"(3) may provide such tribes grant and contract assistance to carry out functions provided by this title.

"(b) EPA REGULATIONS.—

"(1) The Administrator shall, within eighteen months after the enactment of this section, promulgate final regulations specifying those provisions of this Act for which it is appropriate to treat Indian tribes as States. Such treatment shall be authorized only if—

"(A) the Indian tribe is recognized by the Secretary of the Interior and has a governing body carrying out substantial governmental duties and powers;

"(B) the functions to be exercised by the Indian tribe are within the area of the tribal government's jurisdiction; and

"(C) the Indian tribe is reasonably expected to be capable, in the Administrator's judgment, of carrying out the functions to

be exercised in a manner consistent with the terms and purposes of this title and of all applicable regulations.

"(2) Indian tribes shall not be treated as States for purposes of the last sentence of section 105(c). For any other provision of this Act where treatment of Indian tribes as identical to States is inappropriate, administratively infeasible or otherwise inconsistent with the purposes of this Act, the Administrator may include in the regulations promulgated under this section, other means for administering such provision in a manner that will achieve the purpose of this section and such other provision. Nothing in this section shall be construed to allow Indian tribes to assume or maintain primary responsibility for assuring air quality and enforcement of air pollution control in a manner less protective of public health or welfare than this Act requires of a State. An Indian tribe shall not be required to exercise criminal jurisdiction for purposes of complying with the preceding sentence.".

(b) Section 302(e) is amended by inserting ", or an Indian tribe or authorized tribal organization or Alaska Native village or organization" at the end thereof.

MISCELLANEOUS AND CONFORMING AMENDMENTS

SEC. 114. (a) Section 106 of the Clean Air Act is amended by inserting—

(1) after "section 107" the following: "or of implementing section 186 (relating to control of interstate ozone air pollution)";

(2) after "program costs of" the following: "any commission established under section 186 (relating to control of interstate ozone air pollution) or"; and

(3) in the last sentence after "such agency" in each place it appears the following: "or such commission".

(b)(1) SURFACE COAL MINE FUGITIVE EMISSIONS.—Prior to any use of the Industrial Source Complex (ISC) Model using AP-42 Compilation of Air Pollutant Emission Factors to determine the effect on air quality of fugitive particulate emissions from surface coal mines, for purposes of new source review or for purposes of demonstrating compliance with national ambient air quality standards for particulate matter applicable to periods of twenty-four hours or less, under section 110 or parts C or D of title I of the Clean Air Act, the Administrator shall analyze the accuracy of such model and emission factors and make revisions as may be necessary to eliminate any significant over-prediction of air quality effect of fugitive particulate emissions from such sources. Such revisions shall be completed not later than four years after the date of enactment of this subpart.

(2) Until such time as the Administrator develops a revised model for surface mine fugitive emissions, the State may use alternative empirical based modeling approaches pursuant to guidelines issued by the Administrator.

(c) INCREMENT EXEMPTIONS.—Section 163(c)(1) of the Clean Air Act is amended by—

(1) replacing the comma and "and" at the end of subparagraph (C) with a period;

(2) replacing the period at the end of subparagraph (D) with a comma and "and"; and

(3) adding a new subparagraph (E), to read as follows:

"(E) except for purposes of determining compliance with the maximum allowable increases in ambient concentrations in any area designated as class I under this part, concentrations of particulate matter attributable to the increase in fugitive emissions resulting directly or indirectly from surface coal mines.".

(d) Section 163(c) of the Clean Air Act is amended by—

(1) replacing the comma and "and" at the end of subparagraph (D) with a period;

(2) replacing the period at the end of subparagraph (E) with a comma and "and" and

(3) adding a new subparagraph (F) to read as follows:

"(F) except for purposes of determining compliance with the maximum allowable increases in ambient concentrations in any area designated as class I under this part, concentrations of particulate matter attributable to the increase in fugitive emissions resulting directly or indirectly from hardrock and noncoal mining.".

ROLE OF SECONDARY STANDARDS

SEC. 115. (a) The Administrator shall request the National Academy of Sciences to prepare a report to the Congress on the role of national secondary ambient air quality standards in protecting welfare and the environment. The report shall:

(1) include information on the adverse effects on welfare and the environment which are caused by ambient concentrations of pollutants listed pursuant to section 108 and other pollutants which may be listed;

(2) estimate welfare and environmental costs incurred as a result of such effects;

(3) examine the role of secondary standards and the State implementation planning process in preventing such effects;

(4) determine ambient concentrations of each such pollutant which would be adequate to protect welfare and the environment from such effects;

(5) estimate the costs of meeting secondary standards which are protective of welfare and the environment; and

(6) consider other means consistent with the goals and objectives of the Clean Air Act which may be more effective than secondary standards in preventing or mitigating such effects.

(b) The report shall be transmitted to the Congress not later than three years after the date of enactment of this section. There are authorized to be appropriated such sums as are necessary to carry out this section.

INTERNATIONAL BORDER AREAS

SEC. 116. Subpart 1 of part D of title I of the Clean Air Act is amended by adding at the end thereof the following new section:

"INTERNATIONAL BORDER AREAS

"SEC. 180. (a) IMPLEMENTATION PLANS AND REVISIONS.—Notwithstanding any other provision of law, an implementation plan or plan revision required under this Act shall be approved by the Administrator if—

"(1) such plan or revision meets all the requirements applicable to it under the Act other than a requirement that such plan or revision demonstrate attainment and maintenance of the relevant national ambient air quality standards by the attainment date specified under the applicable provision of this Act, or in a regulation promulgated under such provision, and

"(2) the submitting State establishes to the satisfaction of the Administrator that the implementation plan of such State would be adequate to attain and maintain the relevant national ambient air quality standards by the attainment date specified under the applicable provision of this Act, or in a regulation promulgated under such provision, but for emissions emanating from outside of the United States.

"(b) ATTAINMENT OF OZONE LEVELS.—Notwithstanding any other provision of law, any State that establishes to the satisfaction of the Administrator that, with respect to an ozone nonattainment area in such State, such State would have attained the national ambient air quality standard for ozone by the applicable attainment date, but for emissions emanating from outside of the United States, shall not be subject to the provisions of section 184.

"(c) ATTAINMENT OF CARBON MONOXIDE LEVELS.—Notwithstanding any other provision of law, any State that establishes to the satisfaction of the Administrator, with respect to a carbon monoxide nonattainment area in such State, that such State has attained the national ambient air quality standard for carbon monoxide by the applicable attainment date, but for emissions emanating from outside of the United States, shall not be subject to the provisions of section 190.

"(d) ATTAINMENT OF PM-10 LEVELS.—Notwithstanding any other provision of law, any State that establishes to the satisfaction of the Administrator that, with respect to a PM-10 nonattainment area in such State, such State would have attained the national ambient air quality standard for carbon monoxide by the applicable attainment date, but for emissions emanating from outside the United States, shall not be subject to the provisions of section 193.".

ENVIRONMENTAL IMPACT STATEMENT

SEC. 117. (a) The Secretary of the Interior and the Secretary of Agriculture, in consultation with the Administrator of the Environmental Protection Agency and the Director of the Centers for Disease Control, shall each prepare an environmental impact statement on the Federal forest fire management policy applicable to lands within their respective jurisdictions.

(b) Such environmental impact statements shall address, among other things, the health effects of cancer causing chemicals in wood smoke and the impacts of smoke and particulates from forest fires on visibility in class I areas and regional haze.

(c) Based upon such environmental impact statements, the Secretary of the Interior and the Secretary of Agriculture shall determine whether to modify the Federal forest fire management policies applicable to lands within their respective jurisdictions.

(d)(1) The Secretary of the Interior and the Secretary of Agriculture, in consultation with the Administrator of the Environmental Protection Agency shall, where appropriate, install temporary air quality monitors at sites where natural fires are allowed to burn as well as adjacent to such sites where humans reside.

(2) The appropriate Secretary, in consultation with the Administrator, shall determine the nature and location of such monitors, the time and duration of such monitoring activity, and other appropriate criteria related to the monitoring program.

ESTABLISHMENT OF PROGRAM TO MONITOR AND IMPROVE AIR QUALITY IN REGIONS ALONG THE BORDER BETWEEN THE UNITED STATES AND THE UNITED STATES OF MEXICO

SEC. 118. (a) IN GENERAL.—The Administrator of the Environmental Protection Agency (hereinafter referred to as the "Administrator") is authorized, after consultation with the Department of State and the affected States, to negotiate with representatives of the United States of Mexico to authorize a program to monitor and improve

air quality in regions along the border between the United States and the United States of Mexico. The program authorized under this section shall not extend beyond July 1, 1995.

(b) MONITORING AND REMEDIATION.—

(1) MONITORING.—The monitoring component of programs conducted under this section shall identify and determine sources of pollutants for which National ambient air quality standards (hereinafter referred to as "NAAQS") and other air quality goals have been established in regions along the border between the United States and the United States of Mexico. Any such monitoring component of the program shall include, but not be limited to, the collection of meteorological data, the measurement of air quality, the compilation of an emissions inventory, and shall be sufficient to the extent necessary to successfully support the use of a state-of-the-art mathematical air modeling analysis. Any such monitoring component of the program shall collect and produce data projecting the level of emission reductions necessary in both the United States of Mexico and the United States to bring about attainment of both primary and secondary NAAQS, and other air quality goals, in regions along the border in the United States. Any such monitoring component of the program shall include to the extent possible, data from monitoring programs undertaken by other parties.

(2) REMEDIATION.—The Administrator is authorized to negotiate with appropriate representatives of the United States of Mexico to develop joint remediation measures to reduce the level of airborne pollutants to achieve and maintain primary and secondary NAAQS, and other air quality goals, in regions along the border between the United States and the United States of Mexico. Such joint remediation measures may include, but not be limited to measures included in the Environmental Protection Agency's Control Techniques and Control Technology documents. Any such remediation program shall also identify those control measures implementation of which in the United States of Mexico would be expedited by the use of material and financial assistance of the United States.

(c) ANNUAL REPORTS.—The Administrator shall, each year the program authorized in this section is in operation, report to Congress on the progress of the program in bringing nonattainment areas along the border of the United States into attainment with primary and secondary NAAQS. The report issued by the Administrator under this paragraph shall include recommendations on funding mechanisms to assist in implementation of monitoring and remediation efforts.

(d) FUNDING AND PERSONNEL.—The Administrator may, where appropriate, make available, subject to the appropriations, such funds, personnel, and equipment as may be necessary to implement the provisions of this section. In those cases where direct financial assistance of the United States is provided to implement monitoring and remediation programs in the United States of Mexico, the Administrator shall develop grant agreements with appropriate representatives of the United States of Mexico to assure the accuracy and completeness of monitoring data and the performance of remediation measures which are financed by the United States. With respect to any control measures within the United States of Mexico funded by the United States, the Administrator shall, to the maximum extent practicable, utilize resources of the United States of Mexico where such utilization would reduce costs to the United States. Such funding agreements shall include authorization for the Administrator to—

(1) review and agree to plans for monitoring and remediation;

(2) inspect premises, equipment and records to insure compliance with the agreements established under and the purposes set forth in this Act; and

(3) where necessary, develop grant agreements with affected States to carry out the provisions of the Act.

STATES AUTHORITY TO REGULATE

SEC. 119. (a) The Administrator and the Secretary of Transportation, in consultation with the Secretary of Defense, shall commence a study and investigation of the testing of uninstalled aircraft engines in enclosed test cells that shall address at a minimum the following issues and such other issues as they shall deem appropriate—

(1) the circumstances under which control of emissions of oxides of nitrogen from test cells would assist in attaining national ambient air quality standards;

(2) whether technologies exist to control emissions of oxides of nitrogen from test cells;

(3) the effectiveness of such technologies;

(4) the cost of implementing such technologies;

(5) whether such technologies affect the safety, design, structure, operation, or performance of aircraft engines; and

(6) whether such technologies impair the effectiveness and accuracy of aircraft engine safety design, and performance tests conducted in test cells.

(b) Not later than twenty-four months after enactment of the amendment made by this section, the Administrator and the Secretary of Transportation shall submit to Congress a report of the study conducted under this section.

(c) For any standard applied to aircraft engine test cells in the State of Connecticut following the enactment of this amendment and upon completion of the study conducted under this section, the State or political subdivision thereof may adopt or attempt to enforce any standard respecting emissions of oxides of nitrogen from test cells if the State or political subdivision thereof finds that such standard does not affect the safety, design, structure, operation, or performance of aircraft engines, and does not impair the effectiveness and accuracy of aircraft engine tests conducted in test cells, and the Secretary of Transportation concurs with such a finding.

TITLE II—MOBILE SOURCES

EMISSIONS STANDARDS FOR CERTAIN MOTOR VEHICLES

SEC. 201. (a) Section 202 of the Clean Air Act is amended by adding the following new subsection:

"(g) MODEL YEARS AFTER 1992.—(1) The regulations under subsection (a) applicable to emissions of nonmethane hydrocarbons (NMHC), total hydrocarbons (HC), oxides of nitrogen (NO_x), carbon monoxide (CO) and particulates (PM) from the light duty motor vehicles and engines specified in tables 1a and 1b shall contain standards which provide that such emissions from 40 and 80 per centum of each manufacturer's 1993 and 1994 model year vehicles, respectively, and 100 per centum of 1995 through 2003 model year vehicles may not exceed the levels specified in the tables. The remaining 60 and 20 per centum of each manufacturer's 1993 and 1994 model year vehicles, respectively, shall be subject to the emissions standards in effect with respect to 1992 model year vehicles. Except as provided below in paragraphs (2) and (3), the emissions standards prescribed under this paragraph shall apply to vehicles from 2004 and later model years.

"TABLE 1a.—EMISSIONS STANDARDS FOR GASOLINE-FUELED LIGHT-DUTY VEHICLES

Pollutant	Standard	
	Column A [1]	Column B [2]
NMHC	0.25 gpm	0.31 gpm.
HC	0.31 gpm	0.39 gpm.
NO_x	0.4 gpm	0.5 gpm.
CO	3.4 gpm	4.2 gpm.

"TABLE 1b.—EMISSIONS STANDARDS FOR DIESEL-FUELED LIGHT-DUTY VEHICLES

Pollutant	Standard	
	Column A [1]	Column B [2]
NMHC	0.25 gpm	0.31 gpm.
HC	0.31 gpm	0.39 gpm.
NO_x	1.0 gpm	1.25 gpm.
PM	0.08 gpm	0.10 gpm.
CO	3.4 gpm	4.2 gpm.

[1] In the case of the standards under column A, the applicable useful life shall be 5 years or 50,000 miles, whichever first occurs.

[2] In the case of the standards under column B, the applicable useful life shall be 10 years or 100,000 miles, whichever first occurs.

"(2)(A) If more than eleven ozone nonattainment areas outside of the State of California classified as serious under section 181(a) each have four or more exceedances of an ozone level of 0.12 parts per million in the period from January 1, 1999, through December 31, 2001, then the regulations under subsection (a) applicable to emissions of total hydrocarbons (HC), oxides of nitrogen (NO_x), carbon monoxide (CO), and particulates (PM) from the light-duty vehicles and engines specified in tables 1c and 1d below shall contain standards which provide that such emissions from 2004 and later model year vehicles may not exceed the levels specified in the tables.

"TABLE 1c.—EMISSIONS STANDARDS FOR GASOLINE-FUELED LIGHT-DUTY VEHICLES

Pollutant	Standard
HC	0.125 gpm.
NO_x	0.2 gpm.
CO	1.7 gpm.

"TABLE 1d.—EMISSIONS STANDARDS FOR DIESEL-FUELED LIGHT-DUTY VEHICLES

Pollutant	Standard
HC	0.125 gpm.
NO_x	0.7 gpm.
CO	1.7 gpm.
PM	0.08 gpm.

"(B) If these standards do not go into effect pursuant to subparagraph (A), they shall go into effect with respect to vehicles

from 2007 and later model years if more than eleven ozone nonattainment areas outside of the State of California classified as serious under section 181(a) each have four or more exceedances of an ozone level of 0.12 parts per million in the period from January 1, 2002, through December 31, 2004.

"(3) The regulations under subsection (a) applicable to all light-duty vehicles distributed for sale in model years 2004 and thereafter in ozone nonattainment areas that are classified as severe or extreme under section 181(a) and that have an ozone design value at or above 0.15 parts per million as of December 31, 2000, shall contain standards that provide that emissons from such vehicles may not exceed the levels specified in tables 1e and 1f.

"TABLE 1e.—EMISSIONS STANDARDS FOR GASOLINE-FUELED LIGHT-DUTY VEHICLES

Pollutant	Standard
HC	0.6 gpm. total vehicle emissions
NO_x	0.2 gpm.
CO	1.7 gpm.

"TABLE 1f.—EMISSIONS STANDARDS FOR GASOLINE-FUELED LIGHT-DUTY VEHICLES

Pollutant	Standard
HC	0.6 gpm. total vehicle emissions
NO_x	0.7 gpm.
CO	1.7 gpm.
PM	0.08 gpm.

The 0.6 gpm total vehicle hydrocarbon emissions standard specified in Tables 1e and 1f shall be revised as appropriate by regulation by the Administrator if the Administrator determines that the total hydrocarbon emissions standard that is equivalent to a 0.125 gpm exhaust hydrocarbon emissions standard vehicle when operating on model year 1990 certification gasoline (indolene) with a Reid vapor pressure of 9.0 pounds per square inch, is a standard other than 0.6 gpm. When the provisions of this paragraph apply to an area to which the provisions of section 212(a)(2) also apply, the hydrocarbon in-use total vehicle emissions standard of this paragraph supersedes the 0.66 gpm or other hydrocarbon in-use standard established under section 212(a)(2) in that area. Except for section 212(a)(2)(A)(iv) and the requirements in section 212(a)(2)(B)(ii) concerning the specification of a reformulated gasoline, all other provisions of section 212(a) applicable to the hydrocarbon in-use standards apply to the hydrocarbon in-use standard of this paragraph.

"(4) The Administrator shall—

"(A) survey all available measures for the control of emissions of hydrocarbons, oxides of nitrogen and carbon monoxide from mobile sources or stationary sources, other than measures that are required to be implemented pursuant to this title (prior to the year 2003) or pursuant to title I; and

"(B) assess such measure in terms of—

"(i) the technological feasibility and cost effectiveness of such measures;

"(ii) the ability of the Federal, State, or local governments to implement and enforce such measures;

"(iii) the effect of such measures on emissions in nonattainment areas and ozone transport areas, including the effects on emissions associated with interregional travel; and

"(iv) the degree to which such measures differ in their effectiveness in emissions reductions on an area-by-area basis.

"(5) If the Administrator determines that any available measures surveyed pursuant to paragraph (4)—

"(A) would result in actual reductions in emissions of hydrocarbons, oxides of nitrogen, and carbon monoxide, on a pollutant-by-pollutant basis, at least equal to the reductions attributable to the emissions standards specified in tables 1c and 1d for model years 2004 and after;

"(B) would achieve such reductions in the same time period as the standards specified in tables 1c and 1d for model years 2004 and after, which reductions would be equitably dispersed on a regional basis and at least as consistent and durable over time as the reductions attributable to such standards; and

"(C) would be more cost effective in terms of cost per unit of emissions reduced than the emissions standards specified in tables 1c and 1d for model years 2004 and after,

the President may submit to the Congress a proposal to adopt such other available measures in lieu of the standards specified in tables 1c and 1d for model years 2004 and after.

"(6) The survey and assessment required by paragraph (4) shall be submitted to the Congress not later than June 30, 1999, together with any proposal submitted pursuant to paragraph (5).

"(7) During the one-hundred-and-twenty-calendar-day period beginning on the date that the President submits a proposal to the Congress pursuant to paragraphs (5) and (6), it shall be in order as a matter of highest privilege in each House of Congress to consider a bill embodying such proposal.

"(8)(A) Effective with respect to the model years specified in table 2 below, the regulations under subsection (a) applicable to emissions of nonmethane hydrocarbons (NMHC), total hydrocarbons (HC), oxides of nitrogen (NO_x), carbon monoxide (CO) and particulates (PM) from motor vehicles and motor vehicle engines in the classes specified in table 2 shall contain standards which provide that such emissions may not exceed the levels specified in table 2.

"(B) Notwithstanding any other provision of law, upon the completion of the regulations promulgated under this paragraph to accomplish the emission standards specified in table 2, the Administrator shall not promulgate additional regulations establishing emission standards under this paragraph that would be effective prior to January 1, 2002.

"TABLE 2.—EXHAUST EMISSIONS STANDARDS FOR GASOLINE AND DIESEL-FUELED TRUCKS AND BUSES

Vehicle or engine type	Pollutant	Model years	Standard [1]
Trucks (3,751 lbs or more but less than 5,750 lbs, loaded vehicle weight).	NMHC	1995 and after	0.32 gpm.
	HC	1995 and after	0.38 gpm.
	NO_x	1995 and after	0.7 gpm.
	CO	1995 and after	4.4 gpm.
Trucks (5,750 lbs loaded vehicle weight or more but less than 8500 lbs GVW).	NMHC	1995 and after	0.39 gpm.
	HC	1995 and after	0.46 gpm.
	NO_x	1995 and after	1.1 gpm.
	CO	1995 and after	5.0 gpm.
	PM	1995 and after	0.12 gpm.
Heavy duty trucks	NO_x	1991 through 1997.	5.0 gbh.
	NO_x	1998 and after	4.0 gph.
	PM	1991–93	0.25 gbh.
	PM	1994 and after	0.1 gbh.
Heavy duty urban buses	PM	1991	0.25 gbh.
Heavy duty urban buses	PM	1992 and after	0.1 gbh.

[1] Standards are expressed in grams per mile (gpm) or grams per brake horsepower hour (gbh).

"(9) Effective with respect to model years after 1992, any motor vehicle with a loaded vehicle weight of three thousand seven hundred and fifty pounds or less, as determined by the Administrator, shall be a light duty vehicle.".

(b) REVISED STANDARDS.—Subparagraph (C) of section 202(b)(1) of the Clean Air Act is amended to read as follows:

"(C) The Administrator may promulgate regulations under subsection (a)(1) revising any standard prescribed or previously revised under this subsection, as needed to protect public health or welfare, taking costs, energy, and safety into account. Any revised standard shall require a reduction of emissions from the standard that was previously applicable. Any such revision under this title may provide for a phase-in of the standard.".

CARBON MONOXIDE EMISSIONS AT COLD TEMPERATURES

SEC. 202. Section 202 of the Clean Air Act is amended by adding the following new subsection:

"(h) COLD CO STANDARD.—The Administrator shall promulgate regulations under subsection (a) applicable to emissions of carbon monoxide from light duty vehicles and light duty trucks when tested at twenty degrees Fahrenheit. Such regulations shall contain standards which provide that, with respect to model years 1993 through 1999, emissions of carbon monoxide in the case of light duty vehicles may not exceed ten grams per mile and, in the case of light duty trucks, thirteen grams per mile. Such regulations shall also contain standards that provide that with respect to model year 2000 and thereafter, emissions of carbon monoxide in the case of light duty vehicles may not exceed three and four-tenths grams per mile, and, in the case of light duty trucks, four and four-tenths grams per mile.".

CONTROL OF VEHICLE REFUELING EMISSIONS

SEC. 203. Section 202(a)(6) of the Clean Air Act is amended to read as follows:

"(6)(A) The Administrator shall promulgate regulations applicable to all motor vehicles requiring that such vehicles be equipped with vehicle-based ('onboard') systems for control of evaporative emissions during refueling. Except as provided in subparagraph (B), such regulations shall take effect, with respect to light duty vehicles, beginning in model year 1993, and, with respect to other vehicles, at the earliest date the Administrator determines is feasible, and shall require that such systems provide a minimum evaporative emission capture efficiency of 95 per centum.

"(B) No later than June 30, 1991, the Secretary of Transportation shall complete a study to assess the impacts on motor vehicle safety of the use of onboard systems for the control of evaporative emissions during refueling. Such study shall consider any spe-

cial safety considerations which may arise in the use of onboard systems in recreational vehicles (as defined by the Secretary of Transportation). If the Secretary of Transportation determines that such onboard systems will present an unreasonable motor vehicle safety risk, the Secretary shall report to the Administrator and Congress in accordance with subparagraph (C). If no legislation concerning the use of onboard systems has been enacted within twelve months after the receipt of the Secretary's report, the regulations requiring the use of onboard systems shall go into effect as of model year 1995.

"(C)(i) A determination by the Secretary pursuant to subparagraph (B) which includes proposed amendments to this paragraph shall be transmitted in legislative form as a special message to the Speaker of the House of Representatives and to the President of the Senate not later than July 15, 1991.

"(ii) any bill introduced with respect to a special message shall be referred to the Committee on Environment and Public Works in the Senate and the Committee on Energy and Commerce in the House of Representatives.

"(iii)(I) If the committee to which a bill with respect to a special message has been referred has not reported it at the end of sixty calendar days of continuous session of the Congress after its introduction, it is in order to move to discharge the committee from further consideration of the bill.

"(II) A motion to discharge may be made only by an individual favoring the bill, may be made only if supported by one-fifth of the Members of the House involved (a quorum being present), and is highly privileged in the House and privileged in the Senate (except that it may not be made after the committee has reported a bill with respect to the special message); and debate thereon shall be limited to not more than one hour, the time to be divided in the House equally between those favoring and those opposing the bill or resolution, and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(iv)(I) When the Energy and Commerce Committee of the House of Representatives has reported, or has been discharged from further consideration of, a bill with respect to the special message, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the bill. The motion shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(II) Debate on any bill with respect to the special message shall be limited to not more than ten hours, which shall be divided equally between those favoring and those opposing the bill. A motion further to limit debate shall not be debatable.

"(III) Motions to postpone, made with respect to the consideration of a bill with respect to a special message, and motions to proceed to the consideration of other business, shall be decided without debate.

"(IV) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to a bill with respect to a special message shall be decided without debate.

"(V) Except to the extent specifically provided in the preceding provisions of this subsection, consideration of any bill with respect to a special message and amendments thereto (or any conference report thereon) shall be governed by the Rules of the House of Representatives applicable to other bills and resolutions, amendments, and conference reports in similar circumstances.

"(v)(I) Debate in the Senate on any bill with respect to a special message, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than fifteen hours. The time shall be equally divided between, and controlled by, the Majority Leader and the Minority Leader or their designees.

"(II) Debate in the Senate on any amendment to a bill with respect to a special message shall be limited to two hours, to be equally divided between, and controlled by, the mover and the manager of the bill. Debate on any amendment to an amendment, to such a bill, and debate on any debatable motion or appeal in connection with such a bill shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the bill, except that in the event the manager of the bill is in favor of any such amendment, motion, or appeal, the time in opposition thereto, shall be controlled by the minority leader or his designee. No amendment that is not germane to the provisions of a bill with respect to a special message shall be received. Such leaders, or either of them, may, from the time under their control on the passage of a bill with respect to a special message or impoundment resolution, allot additional time to any Senator during the consideration of any amendment, debatable motion, or appeal.

"(III) A motion to further limit debate is not debatable. A motion to recommit (except a motion to recommit with instructions to report back within a specified number of days, not to exceed three, not counting any day on which the Senate is not in session) is not in order. Debate on any such motion to recommit shall be limited to one hour, to be equally divided beteween, and controlled by, the mover and the manager of the bill.

"(IV) The conference report on a bill with respect to a special message shall be in order in the Senate at any time after the third day (excluding Saturdays, Sundays, and legal holidays) following the day on which such a conference report is reported and is available to Members of the Senate. A motion to proceed to the consideration of the conference report may be made even though a previous motion to the same effect has been disagreed to.

"(V) During the consideration of the Senate of the conference report on any bill with respect to a special message, debate shall be limited to two hours, to be equally divided between, and controlled by, the majority leader and minority leader or their designees. Debate on any debatable motion or appeal related to the conference report shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the conference report.

"(VI) Should the conference report be defeated, debate on any request for a new conference and the appointment of conferees shall be limited to one hour, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee, and should any motion be made to instruct the conferees before the conferees are named, debate on such motion shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report. Debate on any amendment to any such instructions shall be limited to twenty minutes, to be equally divided between and controlled by, the mover and the manager of the conference report. In all cases when the manager of the conference report is in favor of any motion, appeal, or amendment, the time in opposition shall be under the control of the minority leader or his designee.

"(VII) In any case in which there are amendments in disagreement, time on each amendment shall be limited to thirty minutes, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee. No amendment that is not germane to the provisions of such amendments shall be received.".

EVAPORATIVE EMISSIONS

SEC. 204. Section 202 of the Clean Air Act is amended by adding the following new subsection:

"(i) EVAPORATIVE EMISSIONS.—Within eighteen months after the enactment of this subsection the Administrator shall promulgate regulations under subsection (a) applicable to evaporative emissions of hydrocarbons, including emissions during vehicle operation, from all gasoline-fueled motor vehicles. Such regulations shall take effect beginning in model year 1994 and shall require the greatest degree of emission reduction achievable by means expected to be available during any model year to which such regulations apply.".

ONBOARD EMISSION DIAGNOSTIC SYSTEMS

SEC. 205. Section 202 of the Clean Air Act is amended by adding the following new subsection:

"(j) ONBOARD EMISSION DIAGNOSTIC SYSTEMS.—

"(1) Within eighteen months after enactment of this subsection, the Administrator shall promulgate regulations under subsection (a) requiring manufacturers to install on all new light duty vehicles and light duty trucks diagnostic systems capable of—

"(A) accurately identifying for the useful life as established under this section, emission-related systems deterioration or malfunction including, at a minimum, the catalytic converter and oxygen sensor, which could cause or result in failure of the vehicles to comply with emission standards established under this section,

"(B) alerting the vehicle's owner or operator to the likely need for emission-related components or systems maintenance or repair,

"(C) storing and retrieving fault codes specified by the Administrator, and

"(D) providing access to stored information in a manner specified by the Administrator.

The Administrator may, in the Administrator's discretion, promulgate regulations requiring manufacturers to install such onboard diagnostic systems on heavy-duty vehicles and engines.

"(2) The regulations required under paragraph (1) with respect to light duty vehicles and light duty trucks shall take effect no later than model year 1994.

"(3) The Administrator shall by regulation require States that have implementation plans containing motor vehicle inspection and maintenance programs to amend their plans within two years of promulgation of such regulations to provide for inspection of onboard diagnostic systems (as prescribed by regulations under paragraph (1) of this subsection) and the maintenance or repair of malfunctions or system deterioration identified by or affecting such diagnostic system. Such regulation shall not be inconsistent with the provisions for warranties promulgated under section 207 (a) and (b).

"(4) In promulgating the regulations under this subsection, the Administrator shall require—

"(A) that any connectors through which the emission control diagnostics system is accessed for inspection, diagnosis, service, or repair shall be standard and uniform on all motor vehicles and motor vehicle engines;

"(B) that access to the emission control diagnostics system through such connectors shall be unrestricted and shall not require any access code or any device which is only available from a vehicle manufacturer; and

"(C) that the output of the data from the emission control diagnostics system through such connectors shall be usable without the need for any decoding information or device.

"(5) INFORMATION AVAILABILITY.—The Administrator, by regulation, shall require manufacturers to provide promptly any person engaged in the business of diagnosing, or selling parts or of repairing or servicing motor vehicles or motor vehicle engines, and EPA for the use by any such persons, with any and all information needed to make use of the emission control diagnostics systems prescribed under this subsection and such other information including instructions for making emission related diagnosis and repairs.".

CLEAN ALTERNATIVE FUELS PROGRAM

SEC. 206. (a) DEFINITIONS.—Section 216 of the Clean Air Act is amended by adding the following new paragraphs at the end:

"(7) The term 'clean alternative fuel' includes methanol or a mixture containing methanol and gasoline, ethanol or a mixture containing ethanol and gasoline, reformulated gasoline, natural gas, liquefied petroleum gas, electricity, or any other fuel or power source provided that such fuel or power source, when used in a motor vehicle, results in compliance with the emissions standards prescribed under section 212(a).

"(8) The term 'covered fleet operator' means any person who, on or after January 1, 1990, controls the operation of twenty or more light-duty vehicles or light-duty trucks that are centrally maintained and use as their primary fuel source, a central refueling station, which are registered in, or primarily operating in, any area which has a 1988 ozone design value of 0.18 parts per million or greater or area for which a Governor requests coverage pursuant to section 212(a)(6); and who, on or after such date, provides a facility or facilities for the central refueling and maintenance of such vehicles in the normal course of business. For purposes of this paragraph—

"(i) the term person means an individual, corporation, partnership, association, State, municipality, and political subdivision of a State; and

"(ii) each motor vehicle operated by person controlling, controlled by or under common control with any person shall be treated, under regulations of the Administrator, as operated by a single person.

"(9) The term 'baseline vehicle' as used in section 212 means a light-duty vehicle meeting exhaust emission standards of 0.25 grams per mile NMHC for five years or 50,000 miles, meeting the evaporative emissions standard under section 202(i), operating on model year 1990 certification gasoline (indolene) with a Reid vapor pressure of 9.0 pounds per square inch which, as of the date of enactment, is calculated to produce total in-use emissions (exhaust, evaporative, and refueling) of ozone-forming volatile organic compounds of 0.95 grams per vehicle mile.

"(10) The term 'carcinogenic air pollutants' as used in section 212 means benzene, 1,3-butadiene, gasoline refueling vapors, polycyclic organic material (POM), including POM in diesel particulates, and formaldehyde.

"(11) The term 'ozone-forming volatile organic compound emissions' includes tail pipe, evaporative, refueling, and running loss emissions, adjusted for reactivity.".

(b) CLEAN FUEL REQUIREMENTS.—Section 212 of the Clean Air Act is amended to read as follows:

"CLEAN FUEL REQUIREMENTS

"SEC. 212. (a) CLEAN ALTERNATIVE FUEL VEHICLE PROGRAM.—The Administrator shall promulgate, and may from time to time revise, regulations that provide for the following:

"(1) FLEET VEHICLE REQUIREMENTS.—

"(A) EMISSIONS STANDARDS.—Not later than October 1, 1992 the Administrator shall promulgate regulations under section 202(a) applicable to vehicles certified and made available for purchase or placement into use pursuant to subparagraphs (B) and (C) which shall contain, in addition to the standards otherwise applicable, standards that yield when the vehicle is operated exclusively on clean alternative fuels—

"(i) for light-duty vehicles, total in-use emissions (exhaust, evaporative, and refueling) of ozone-forming volatile organic compounds not in excess of 0.25 grams per vehicle mile,

"(ii) for light-duty vehicles, total in-use emissions of carcinogenic air pollutants not in excess of a level that, in the Administrator's judgment, may be reasonably anticipated to achieve a 75 per centum reduction in the annual incidence of human cancer reasonably attributable to such emissions from baseline vehicles, on a per vehicle basis,

"(iii) for light-duty vehicles, emissions of formaldehyde not in excess of 0.015 grams per mile, and

"(iv) for light-duty trucks, reductions in emissions of ozone-forming volatile organic compounds, carcinogenic air pollutants and formaldehyde equivalent to the reductions for light-duty vehicles required by clauses (i)-(iii).

In-use compliance with the additional standards prescribed under this subparagraph shall be determined in accordance with paragraph (4).

"(B) FEDERAL GOVERNMENT PROGRAM.—

"(i) For model years 1995 and 1996, 30 per centum, for model years 1997 and 1998, 60 per centum, and for model years after model year 1998, 90 per centum, of all light-duty vehicles and light-duty trucks purchased or leased for more than one hundred and twenty days by any agency, department, instrumentality, or any quasi- or independent instrumentality of the United States and primarily operating in each of the areas classified as serious, severe or extreme ozone nonattainment areas under section 181(a), shall comply with the emissions standards prescribed under subparagraph (A).

"(ii) With respect to vehicle model years 1995 and 1996 only, the Administrator may include a lesser percentage of such vehicles under this subparagraph if the Administrator determines that the required percentage cannot be feasibly achieved or would impose unreasonable costs. For model years after 1998 the Administrator may require a percentage less than 90 per centum, but in no event less than 60 per centum, if the Administrator determines that a higher percentage would impose unreasonable costs, including costs associated with vehicle acquisition, fueling facilities, operation, maintenance, safety, reliability and resale value.

"(iii) REQUIRED OPERATION.—The Administrator of General Services, the Postmaster General, and the Secretary of Defense, with the concurrence of the Administrator, after consultation with the Secretary of Energy, shall, before October 1, 1993, issue regulations to ensure that a vehicle acquired pursuant to this subparagraph—

"(I) shall be supplied with appropriate clean alternative fuel in its primary area of operation, using commercially available fueling facilities to the maximum extent practicable; and

"(II) shall be operated exclusively on such fuel except when operated so as to make it impracticable to obtain such fuel.

"(iv) CONSIDERATION.—

"(I) Funds appropriated for carrying out this subparagraph shall be applied on a priority basis, for expenditure first in areas of the United States which the Administrator determines have the most severe air pollution problems.

"(II) A Federal officer or agency responsible for deciding which types of clean alternative fuel vehicles to acquire in order to comply with this subparagraph shall consider as a factor in such decision which types of vehicles yield the greatest reduction in pollutants emitted per dollar spent.

"(v) COST OF VEHICLES TO FEDERAL AGENCY.—Notwithstanding the provisions of section 211 of the Federal Property and Administrative Services Act of 1949, as amended, the Administrator of General Services shall not include the incremental costs of clean alternative fuel vehicles in the amount to be reimbursed by Federal agencies if the Administrator of General Services determines that appropriations provided pursuant to this subparagraph are sufficient to provide for the incremental cost of such vehicles over the cost of comparable conventional fueled vehicles.

"(vi) LIMITATIONS ON APPROPRIATIONS.—Funds appropriated pursuant to the authorization under this subparagraph shall be applicable only—

"(I) to the portion of the cost of acquisition, maintenance and operation of vehicles acquired under this subparagraph which exceeds the cost of acquisition, maintenance and operation of comparable conventional fueled vehicles;

"(II) to the portion of the costs of fuel storage and dispensing equipment attributable to such vehicles which exceeds the costs for such purposes required for conventional fuel vehicles; and

"(III) to the portion of the costs of acquisition of clean alternative fuel vehicles which represents a reduction in revenue from the disposal of such vehicles as com-

pared to revenue resulting from the disposal of comparable conventional fueled vehicles.

"(vii) VEHICLE COSTS.—The incremental cost of vehicles acquired under this subparagraph over the cost of comparable conventional fueled vehicles shall not be applied to any calculation with respect to a limitation under law on the maximum cost of individual vehicles which may be required by the United States.

"(viii) EXEMPTIONS.—The requirements of this subparagraph shall not apply to vehicles—

"(I) with respect to which the Secretary of Defense has certified to the Administrator that an exemption is needed based on national security consideration; or

"(II) used for law enforcement or emergency purposes.

"(ix) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be required to carry out the provisions of this subparagraph: *Provided,* That such sums as are appropriated for the Administrator of General Services pursuant to the authorization under this subparagraph shall be added to the General Supply Fund established in section 109 of the Federal Property and Administrative Services Act of 1949, as amended.

"(x) Nothing in this subparagraph shall be construed to require conversion of new or existing vehicles capable of operating on gasoline or diesel fuel only to a clean alternative fuel in order to achieve compliance with this subparagraph.

"(C) PRIVATE FLEET PROGRAM.—For model years 1997 and thereafter, 30 percent of all light-duty vehicles or light-duty trucks purchased for use or placed into service in fleets of vehicles registered in or primarily operated in areas classified as severe or extreme ozone nonattainment areas pursuant to section 181(a) having a 1980 population of two hundred and fifty thousand or more, by a covered fleet operator shall comply with the emission standards prescribed under subparagraph (A). The Administrator shall by regulation establish a program under which any State may grant a covered fleet operator an appropriate amount of credits toward compliance with the requirements prescribed under this subparagraph only for purchasing or placing into service more vehicles meeting the emission standards prescribed under this subparagraph than the regulations prescribed under this subparagraph require or vehicles which achieve greater emissions reductions than those required by subparagraph (A). The Governor of any such State shall issue appropriate credits to each covered fleet operator for the use of fleet vehicles in excess of the percentage required under this subparagraph or which achieve greater emission reductions than those required under subparagraph (A). The Governor shall also issue appropriate credit to owners and operators of clean alternative fuel vehicles who have been designated as covered fleet operators pursuant to subparagraph (L) for vehicles meeting the requirements of subparagraph (A) and operating within the nonattainment areas but not subject to the requirements of this subsection. Any person granted such credits may trade, sell, or otherwise transfer some or all of such credits to a covered fleet operator within such nonattainment area who may use such credits to demonstrate compliance with the requirements of this subparagraph.

"(D) FUEL USE.—Vehicles purchased or placed into service pursuant to subparagraph (C) shall be exclusively operated on the clean alternative fuel needed by those vehicles to comply with the emissions standards prescribed under subparagraph (A), when operated by a covered fleet operator in the nonattainment area.

"(E) EXEMPTION FROM REQUIREMENTS.—This paragraph shall not apply to law enforcement or emergency vehicles, retail rental fleets, automobile dealer demonstration vehicles, or motor vehicle manufacturer demonstration, test and evaluation vehicles, as defined by the Administrator.

"(F) CONVERSIONS.—

"(i) The Administrator shall by regulation set standards and requirements for the conversion of new (as determined by the Administrator) gasoline or diesel-powered vehicles into vehicles that satisfy the emissions standards prescribed under subparagraph (A). Such vehicles shall be subject to the provisions of sections 203, 204, and 205, the certification requirements of section 206, the requirements of section 207, the requirements of section 208, and the enforcement provisions of paragraph (4). Any person who obtains such certification shall be considered a manufacturer for purposes of sections 203, 204, 205, 206, 207, and 208 and paragraph (4). A vehicle converted in accordance with these regulations shall be considered equivalent to a purchase of a vehicle for purposes of determining compliance with the requirements of subparagraph (C).

"(ii) Nothing in this paragraph shall be construed to require conversion of new or existing vehicles capable of operating on gasoline or diesel fuel only to a vehicle capable of operating on a clean alternative fuel in order to achieve compliance with subparagraph (C).

"(G) EMISSIONS OF OXIDES OF NITROGEN.—If the Administrator determines that it is not technically feasible for light-duty vehicles satisfying the emissions standards prescribed under subparagraph (A) to satisfy the applicable emissions standard for oxides of nitrogen prescribed under tables 1a and 1c of section 202(g), the Administrator may by regulation modify the emissions standard for oxides of nitrogen as it applies to such vehicles as follows: for model years 1995 through 1997, emissions of oxides of nitrogen may not exceed 1.0 gram per vehicle mile and, for model years 1998 through 2000, emissions of oxides of nitrogen may not exceed 0.7 grams per vehicle mile. The Administrator may grant equivalent waivers for the same two three-year periods for emissions standards for oxides of nitrogen prescribed under section 202(g) for light-duty trucks.

"(H) VEHICLE AVAILABILITY.—The Administrator shall promulgate regulations as the Administrator finds necessary to assure that the vehicles needed to permit compliance with the requirements of subparagraphs (B) and (C) are certified under section 206 and made available for purchase or placement into use. Nothing in this subparagraph shall authorize the Administrator to mandate the production or sale of a specific quantity of vehicles by any motor vehicle manufacturer.

"(I) INCENTIVES.—

"(i) Any State which obligates the operator of a clean alternative fuel vehicle controlled by a covered fleet operator in compliance with subparagraph (C) to comply with the transportation control measures specified in section 108(f)(1)(A)(iv) (relating to trip-reduction ordinances) or (vii) (relating to vehicle operational restrictions) may not credit toward the emission reduction requirement under section 183(b)(3)(B) any emission reduction pursuant to subparagraph (C).

"(ii) Notwithstanding the provisions of clause (i), a State may credit under section 183(b)(3)(B) any emission reductions pursuant to subparagraph (C) if the State demonstrates to the satisfaction of the Administrator that any increase in emissions which would result from traffic congestion caused by the operation of such fleet vehicles exceeds the emission reductions attributable (directly or indirectly) to the use of clean alternative fuel vehicles under subparagraph (C).

"(J) FUEL CHOICE.—The choice of available clean alternative fuel vehicles and clean alternative fuels shall be made by covered fleet operators subject to the requirements of subparagraph (C).

"(K) EXEMPTION.—

"(i) The Administrator shall establish by rule not later than twenty-four months after the date of enactment of this subsection standards to be used to determine the availability of suitable clean alternative fuels or clean alternative fuel vehicles, taking into consideration vehicle size and type, driving range, cargo area, unique requirements for vehicle use, and other factors which may create undue hardship for covered fleet operators.

"(ii) The Governor of any State under an approved implementation plan shall, upon a showing by a covered fleet operator that a suitable clean alternative fuel is not available or a suitable clean alternative fuel vehicle is not available from any vehicle manufacturer in accordance with the applicable standards established under clause (i), and that excess credits are not reasonably available under the fleet program to offset the requirements of subparagraph (C) exempt such operator from the requirements of this subsection for a period of one year. A covered fleet operator may certify annually thereafter that such suitable clean alternative fuel or clean alternative fuel vehicle and credits to offset the requirements of subparagraph (C) are not reasonably available, and the Governor shall provide further annual exemption from the requirements of this subsection upon such certification, unless the Governor finds that the requirements of this subparagraph have not been met.

"(L) CREDITS FOR OTHER FLEET OPERATORS.—

"(i) The Administrator may on the Administrator's own motion or in response to a petition from any person establish in-use emission standards under subparagraph (A) for vehicles or engine families, other than light-duty vehicles, which yield total emissions reductions (exhaust, evaporative and refueling) per vehicle of not less than 75 per centum in ozone-forming volatile organic compounds and not less than 75 per centum in the annual incidence of human cancer attributable to emissions of carcinogenic air pollutants from levels that would otherwise occur under the requirements of this title.

"(ii) The operator of any fleet of light-duty trucks or other vehicles meeting the emissions standards established pursuant to clause (i) or the operator of a fleet of light-duty vehicles meeting the standards established pursuant to subparagraph (A) who is not otherwise covered by the requirements of this paragraph, may elect to be designated a covered fleet operator under an approved State implementation plan and receive credits pursuant to subparagraph (C) for each new vehicle which such operator purchases and operates as authorized and

granted by a State under its implementation plan.

"(2) GENERAL VEHICLE REQUIREMENTS.—

"(A) EMISSIONS STANDARDS.—The regulations under section 202(a) applicable to light-duty vehicles that are certified and made available in areas classified as severe and extreme ozone nonattainment areas pursuant to section 181(a), having a 1980 population of two hundred and fifty thousand or more, shall contain in addition to the standards otherwise applicable, standards that yield—

"(i) effective with respect to the model years specified in table 1 below, total in-use emissions (exhaust, evaporative and refueling) of ozone-forming volatile organic compounds (VOCs) not in excess of the levels specified in the table (except that the Administrator shall adjust the calculation of the total in-use emissions (exhaust, evaporative, and refueling) of ozone-forming volatile organic compound emissions from the baseline vehicle not sooner than one year or later than two years after the date of enactment of the Clean Air Act Amendments of 1990 and shall at the same time adjust the standard in table 1 applicable to model years 1999 and after by an amount reflecting the proportion by which the baseline vehicle emissions are less than 0.95 grams per vehicle mile),

"TABLE 1

Pollutant	Model years	Standards
VOCs	1995 through 1988	0.75 gpm.
VOCs	1999 and after	0.66 gpm.

"(ii) total in-use emissions of carcinogenic air pollutants from light-duty vehicles manufactured during the model years 1995 through 1998 and during and after the model year 1999 not in excess of a level that, in the Administrator's judgment, may be reasonably anticipated to achieve a 12 per centum reduction and a 27 per centum reduction, respectively, in the annual incidence of human cancer attributable to such emissions from baseline vehicles on a per vehicle basis (if the Administrator determines that it is not technically feasible to reduce emissions of carcinogenic air pollutants so as to attain a 27 per centum reduction in the annual incidence of human cancer, the Administrator may modify the carcinogenic air pollutant emissions standards by regulation six months prior to the start of each model year after 1998 to limit such emissions to a level that may be reasonably anticipated to achieve a reduction of no less than 18 per centum in the annual incidence of human cancer attributable to such emissions from baseline vehicles), and

"(iii) emissions of formaldehyde not in excess of 0.015 gpm.

In-use compliance with the standards prescribed under this subparagraph shall be determined in accordance with paragraph (4). The regulations containing standards applicable to model years 1995 through 1998 shall be promulgated no later than April 1, 1991, and the regulations containing standards applicable to model years beginning with the 1999 model year shall be promulgated no later than September 1, 1994;

"(iv) Light-duty vehicle manufacturers may apply for a two-year renewable waiver of the table 1 emission standards (and including any adjustment pursuant to clause (i)) for model years 1999 and thereafter. Any such waiver request must include a demonstration that the table 1 emission standards cannot be met with a vehicle that—

"(I) uses the reformulated gasoline specified in subparagraph (B)(ii);

"(II) meets all standards under section 202(g) for model years 1993 through 2003;

"(III) meets on-board refueling requirements as required by section 202(j) or achieves an equivalent additional emissions reduction from a system not otherwise required by section 202; and

"(IV) includes such minor technical modifications as are necessary to optimize vehicle emission performance on the reformulated gasoline specified in subparagraph (B)(ii).

If such a waiver is requested and, if by rule, the Administrator determines that the demonstration required has been made, the Administrator shall grant the waiver request. If such waiver is granted, the Administrator must set an interim performance standard at a level that can be met with a vehicle meeting the above requirements.

"(B) SELECTION OF FUELS.—

"(i) No later than January 1, 1992, the Administrator shall conclude a rulemaking to determine the clean alternative fuels that will be made available pursuant to the regulations prescribed under paragraph (5) for vehicles for model years 1995 through 1998 and to determine the certification specifications for such fuels. In determining the specifications for each fuel or fuels to be made available, the Administrator shall select the specifications resulting in the maximum level of emissions reductions that can be achieved to the extent that it is needed to meet the standards applicable to model years 1995 through 1998, provided that such specifications will result in the establishment of a cost effective combination of fuel or fuels and motor vehicle technology. Such specifications shall include at least one standard for a reformulated gasoline that will meet the standards prescribed under subparagraph (A) when utilized in gasoline-fueled vehicles satisfying the emissions standards prescribed under section 202(g) for model years 1995 through 1998. Any manufacturer who elects to meet the requirements of this subparagraph using the reformulated gasoline specified by the Administrator is in compliance, if the vehicles produced by such manufacturer for sale in the covered areas comply with the standards established under sections 202 and 206 of this Act that are generally applicable to light-duty vehicles in the model year in which they are produced.

"(ii) No later than September 1, 1995, the Administrator shall conclude a rulemaking to determine the clean alternative fuels that will be made available pursuant to the regulations prescribed under paragraph (5) for vehicles for model years 1999 and thereafter and to determine the certification specifications for such fuels. In determining the specifications for each fuel or fuels to be made available, the Administrator shall select the specifications resulting in the maximum level of emissions reductions that can be achieved to the extent that it is needed to meet the standards applicable to model years 1999 and thereafter: *Provided,* That such specifications will result in the establishment of a cost effective combination of fuel or fuels and motor vehicle technology. Such specifications shall include at least one reformulated gasoline that will achieve the standards required in this subsection when utilized in gasoline-fueled vehicles satisfying the emissions standards prescribed under section 202(g) for model year 1999 and thereafter, unless the Administrator determines that it is not technologically or economically feasible to achieve such standards with fuel changes alone. In such case, the Administrator must specify a reformulated gasoline achieving the maximum emissions reductions that are economically and technologically feasible. The regulations promulgated pursuant to that proceeding shall be promulgated no later than September 1, 1996.

"(iii) Clean alternative fuels for which certification specifications have been established shall be made available pursuant to regulations prescribed under paragraph (5).

"(C) EMISSIONS CREDITS.—The Administrator shall by regulation grant a manufacturer an appropriate amount of credits toward compliance with the emission standards prescribed under this subsection for selling vehicles that are certified to achieve emission reductions greater than those required by such standards. Such regulations shall also grant credits toward compliance with emissions standards prescribed under this paragraph or paragraph (3) for selling vehicles that are certified to meet the emissions standards prescribed by paragraph (1)(A) in quantities required by paragraph (1) (B) or (C). Implementation plan revisions submitted by States pursuant to paragraph (8) may also establish programs to grant manufacturers credits toward compliance with emissions standards prescribed under this subsection for selling vehicles that are certified to achieve emissions reductions greater than those otherwise required by such plan (but not less than the emissions reductions required by this paragraph) or for selling vehicles meeting the emissions standards prescribed in paragraph (1)(A) in quantities greater than prescribed by subparagraph (1)(B) or (1)(C). A manufacturer may use such credits to demonstrate compliance with the standards established by this paragraph in the model year in which the credits were earned or in following model years, or may transfer some or all of the credits for use by one or more other manufacturers in demonstrating compliance with such emissions standards. Credits granted pursuant to this subparagraph shall not be used to modify in any way emissions standards or other requirements applicable to vehicles under any other section of this Act, nor shall credits granted under the Administrator's regulations or the plan of any State for exceeding requirements with respect to vehicles sold in a particular nonattainment area be used to modify the requirements including emissions standards established under this section applicable to vehicles sold in other areas. The Administrator (or a State pursuant to an implementation plan revision) may make the credits available for use after consideration of enforceability, environmental and economic factors and upon such terms and conditions as he finds appropriate.

"(3) CALIFORNIA VEHICLE PROGRAM.—The applicability of section 209 shall be deemed to be waived with respect to standards adopted by the State of California as part of a program to limit motor vehicle emissions through the use of clean alternative fuels. Such State standards may include standards requiring vehicles that operate on clean alternative fuels to meet emissions standards that differ from those prescribed under paragraphs (1) and (2).

"(4) COMPLIANCE WITH STANDARDS.—In determining compliance by vehicles and engines in actual use with the emission standards prescribed under this subsection by

testing in-use vehicles on certification-type fuels, only vehicles that have been obviously abused or tampered with in a manner that would likely affect emissions performance may be excluded from the sample tested pursuant to section 207(c) (with appropriate adjustments to the above standards determined by the Administrator to be necessary to reflect the exclusion of such vehicles from the sample). When a vehicle that operates on two kinds of fuel is certified or tested, it shall be certified or tested on each fuel only after all traces of the other fuel that can practically be removed from the vehicle's fuel system have been removed.

The Administrator may require a manufacturer to remedy nonconforming engines or vehicles pursuant to section 207(c) either (A) when a substantial number of vehicles fails to comply with the applicable emissions standards prescribed under this subsection or (B) when the average emissions performance of the tested sample does not satisfy the applicable emissions standards prescribed under this subsection. Recall procedures established under this paragraph apply only to standards promulgated pursuant to this section. Any manufacturer who chooses to meet the standards established by paragraph (2)(A) for model years 1995 through 1998 by using reformulated gasoline specified by the Administrator and who complies with the standards established by sections 202 and 206 shall not be subject to recall under this paragraph.

"(5) FUEL AVAILABILITY.—The clean alternative fuels needed to operate vehicles so that they comply with the emissions standards prescribed under paragraph (1), (2), or (3) shall be made available by fuel providers in areas subject to the clean alternative fuel vehicle program and, as the Administrator finds necessary, along major nationwide transportation corridors at such time as vehicle manufacturers project sales of dedicated clean alternative fuel vehicles other than reformulated gasoline, in a manner to be specified by the Administrator. Before requiring availability in such transportation corridors, the Administrator shall determine, in consultation with the Department of Energy and the Department of Transportation, that production and distribution of such clean alternative fuel vehicles to such corridors is feasible. For purposes of supplying vehicles with the clean alternative fuels needed to comply with the emission standards prescribed under paragraphs (2) and (3), at a minimum one such fuel (and at a maximum one fuel in addition to reformulated gasoline) shall be offered for retail sale at service stations dispensing at least fifty thousand gallons of motor vehicle fuel per month, on average, in the areas in which such vehicles are required to be made available. The Governor of any State in which the requirements of this paragraph apply, may modify such requirements exempting some service stations for a period not longer than four years after such requirements first apply, provided that information available to the Governor indicates that such fuels will be readily available throughout the area. If a service station would have to remove or replace one or more motor vehicle fuel underground storage tanks and accompanying piping in order to comply with the provisions of this section, and it had removed and replaced such tank or tanks and accompanying piping prior to the date on which this section is enacted, it shall not be required to comply with this subsection until a period of seven years has passed from the date of the removal and replacement of such tank or tanks:

"(A) The Administrator shall determine the types and amounts of clean alternative fuels necessary to operate vehicles so that they comply with the emissions standards prescribed under paragraph (1), (2), or (3) based on motor vehicle manufacturers' projections of future sales of vehicles capable of complying with those emissions standards, and consultations with the affected State and local governments. The Administrator shall not require the availability of any fuel, other than reformulated gasoline, if vehicle manufacturers do not project sales of motor vehicles operating on fuels other than reformulated gasoline. Any information provided by a motor vehicle manufacturer pursuant to this subparagraph shall, at the request of the manufacturer, be protected as a trade secret pursuant to subsection (c)(2). Each motor vehicle manufacturer must submit its projections of sales to the Administrator in accordance with regulations to be promulgated by the Administrator. Not later than January 1, 1992, the Administrator shall provide notification of the types and amounts of clean alternative fuels that the Administrator determines are initially needed to supply such vehicles and that shall be distributed by persons who first introduce for sale motor vehicle fuel into the areas that are subject to the clean alternative fuels program, according to their relative market share. The required types and amounts shall be adjusted based on the information provided to the Administrator pursuant to this paragraph as needed to reflect changes in the number or nature of vehicles that the Administrator reasonably expects will occur and the Administrator shall periodically revise the notification required by this subparagraph.

"(B) The Administrator may by regulation grant a person subject to the requirements prescribed under this paragraph an appropriate amount of credits for exceeding such requirements, and any person granted credits may transfer some or all of the credits for use by one or more persons in demonstrating compliance with such requirements.

"(C) The Administrator may by regulation establish requirements for colorization, odorization, luminosity or other similar requirements for any fuel required under this paragraph, other than reformulated gasoline, as the Administrator finds necessary to reduce or eliminate an unreasonable risk to public health, welfare or safety associated with its use or to ensure acceptable vehicle maintenance and performance characteristics.

"(6)(A) PROGRAM SCOPE.—In addition to the areas specified in paragraphs (1) and (2), the emissions standards prescribed under either of those paragraphs shall apply in any other area at the request of the Governor of the State in which the area is located, upon the approval of the Administrator. The Administrator shall approve any such request where the Governor of the State has made a determination that inclusion of the area in the clean alternative fuel vehicle program is appropriate and would result in progress toward attainment of any national ambient air quality standard and the Administrator finds that such request and such determination is not arbitrary or capricious. Any such additional requirements resulting from such approval shall become applicable after such period as the Administrator finds by rule necessary for the requisite vehicles and fuels to be made available, giving appropriate consideration to model availability and the cost of compliance within such period. The Administrator shall approve a revision to a State implementation plan proposed under this paragraph, if the Administrator determines that it is feasible to produce the quantities of clean alternative fuel vehicles and clean alternative fuels called for in the time frame established in the State implementation plan. In assessing State implementation plans and the availability of clean alternative fuels under this paragraph, the Administrator shall give priority to the sale of clean alternative fuel vehicles and clean alternative fuels in severe and extreme ozone nonattainment areas. (The Administrator shall publish the request submitted by a Governor of a State in the Federal Register upon receipt. Such notice shall constitute a notice of proposed rulemaking on the period of time that may be necessary for the requisite vehicles and fuels to be made available, and shall be deemed to comply with the requirements concerning notices of proposed rulemaking contained in sections 553 through 557 of title 5 of the United States Code (related to notice and comment).)

"(B) The Governor of a State containing an area classified as a serious carbon monoxide nonattainment area under section 187(a) with a population of 250,000 or more, who requests that the standards specified in subparagraph (1)(A) apply in such area, may request that in addition to such standards a certification standard for carbon monoxide emissions apply to vehicles made available for purchase or placement into use in such area pursuant to subparagraphs (1)(B) and (1)(C). The certification standard requested pursuant to this paragraph shall not be less than 1.0 grams per mile for emissions of carbon monoxide from light duty vehicles and an equivalent level for emissions from light duty trucks. The Administrator shall approve a request for a certification standard under this paragraph if the Administrator determines that no fewer than two motor vehicle manufacturers are already producing vehicle models (not including conversions pursuant to subparagraph (1)(F)) for purchase or placement into use under paragraph (1) that meet the requested certification standard and that all other requirements of these paragraphs are met. The credit provisions in subparagraph (1)(C) and the exemption provisions in subparagraph (1)(K) shall apply with respect to certification standards approved pursuant to this provision. The requirements of paragraph (4) shall not apply with respect to such certification standards. When a vehicle that operates on two kinds of fuels is certified for the purposes of this provision, it shall be certified on one fuel only after all traces of the other fuel that can practically be removed from the vehicle's fuel system have been removed.

"(7) INCREASE PROGRAM REQUIREMENTS.—

"(A) REQUEST.—The Governor of any State containing any area specified in paragraphs (1) or (2) or an area included in the clean alternative fuel vehicle program pursuant to paragraph (6) may submit to the Administrator a request either—

"(i) to increase the percentage of new fleet vehicles purchased or placed into use by covered fleet operators that are required to meet the emission standards prescribed under paragraph (1);

"(ii) to require that all light-duty vehicles certified and made available in the area in 1995 or later model years meet the emissions standards prescribed under paragraphs (1) or (3); or

"(iii) both (i) and (ii).

"(B) PLAN REVISIONS.—The Administrator shall approve any such request where the Governor of the State has made a determination that the request is appropriate and would result in progress toward attainment of any national ambient air quality standard within the State, if the Administrator finds that such determination is not arbitrary or capricious. The Administrator shall approve a revision to a State implementation plan proposed under this paragraph, if the Administrator determines that it is feasible to produce the quantities of clean alternative fuel vehicles and clean alternative fuels called for in the time frame established in the State implementation plan. In assessing State implementation plans and the availability of clean alternative fuels under this paragraph, the Administrator shall give priority to the sale of clean alternative fuel vehicles and clean alternative fuels in severe and extreme ozone nonattainment areas.

"(C) MODIFICATION OF FEDERAL REQUIREMENTS.—If the Administrator approves one or more such requests, he shall by regulation and as appropriate—

"(i) increase the percentages of fleet vehicles required to meet the emission standards prescribed under paragraph (1) in the relevant area or areas by the amount requested,

"(ii) revise the regulations prescribed under section 202(a) so that the emission standards prescribed under paragraphs (1) or (3) apply to all vehicles certified and are made available in the relevant area or areas, and

"(iii) revise the requirements prescribed under paragraph (5) regarding the availability of the clean alternative fuels needed by vehicles to comply with the emission standards prescribed under paragraphs (1), (2), or (3), as appropriate.

"(D) OTHER PROGRAMS.—

"(i) The Governor of any State may request either that less than all of the vehicles certified and made available in the area meet the emissions standards prescribed under paragraph (1) or that less than all of the vehicles certified and made available in the area meet the emissions standards prescribed under paragraph (3): *Provided,* That the Governor also proposes specific incentives to encourage the purchase of such vehicles. The Administrator shall only approve the plan revision if the Administrator determines that in his judgment, the purchase incentives included in the State Implementation Plan will achieve a level of purchase of such vehicles in quantities proposed in the plan. The Administrator shall approve a revision to a State implementation plan proposed under this paragraph, if the Administrator determines that it is feasible to produce the quantities of clean alternative fuel vehicles and clean alternative fuels called for in the time frame established in the State implementation plan. In assessing State implementation plans and the availability of clean alternative fuels under this paragraph, the Administrator shall give priority to the sale of clean alternative fuel vehicles and clean alternative fuels in severe and extreme ozone nonattainment areas.

"(ii) If the Administrator approves a revision to a State Implementation Plan pursuant to clause (i), the Administrator shall require motor vehicle manufacturers selling vehicles in the area to—

"(I) Begin the production and distribution in the necessary quantities of vehicles certified to meet the applicable requirements to the area at a time and in a manner that accords with normal business practices; and

"(II) Make reasonable efforts to promote and sell the vehicles, at a price comparable to the price at which the vehicles are sold in other areas.

"(iii) The Administrator may on his own motion or in response to a petition review the implementation of the revision to determine whether purchases of vehicles have achieved their expected levels. If such purchases have not achieved expected levels after a period of one year, the Administrator shall conduct such a review. If, pursuant to such review, the Administrator determines that motor vehicle manufacturers have complied with the requirements of subparagraph (ii) and expected purchase levels have not been met, then manufacturers shall be deemed to have satisfied their obligations under this paragraph, and the State shall be required to revise its implementation plan so as to increase incentives to purchase the vehicles or to reduce the expected levels of purchase of such vehicles.

"(iv) No sanction or penalty may be imposed on a motor vehicle manufacturer for failure to produce or sell specific quantities of vehicles, if the manufacturer has in good faith complied with the requirements of subparagraph (ii).

"(E) IMPLEMENTATION OF ADDITIONAL REQUIREMENTS.—Any additional requirements prescribed under this paragraph shall become applicable after such period as the Administrator finds by rule is necessary for the requisite vehicles and fuels to be made available, giving appropriate consideration to model availability and the cost of compliance within such period. (The Administrator shall publish the request submitted by a State in the Federal Register upon receipt. Such notice shall constitute a notice of proposed rulemaking on the period of time that may be necessary for the requisite vehicles and fuels to be made available and shall be deemed to comply with the requirements concerning notices of proposed rulemaking contained in section 553 through 557 of title 5 of the United States Code (related to notice and comment).) Any regulations promulgated by the Administrator under paragraph (1) or (2) that provide for credits to be granted toward compliance with requirements prescribed under those paragraphs shall also be applicable to any requirements prescribed under this paragraph.

"(8) REVISIONS TO STATE IMPLEMENTATION PLANS.—

"(A) REQUIRED REVISIONS.—Except to the extent that substitute provisions have been approved by the Administrator under subparagraph (B) the State shall submit to the Administrator, within forty-two months of enactment of this section, a revision to the applicable implementation plan for each area subject to requirements prescribed under paragraphs (1) and (2) to include such measures as may be necessary to promote and ensure the effectiveness of the clean alternative fuel vehicle program prescribed under this subsection. Such revisions shall include provisions establishing the private fleet program prescribed under paragraph (1)(C) and such vehicle registration provisions as may be necessary to ensure the effectiveness of the requirements prescribed under paragraph (2), which shall be based on guidance developed by the Administrator. Each State shall develop its implementation plan revision with respect to fleet programs after consultation with covered fleet operators, vehicle manufacturers, fuel producers and distributors, and other interested parties, taking into consideration vehicle operational range, specialty uses, vehicle fuel availability, costs, safety and resale value. Such a revision shall also be submitted for each area included in the clean alternative fuel vehicle program under paragraph (6) within twelve months of the inclusion of such area in the clean alternative fuel vehicle program. A revision to the applicable implementation plan shall also be submitted for each area for which a request to increase program requirements pursuant to subparagraph (7) is made at the time of such request. In the event the State of California adopts a program pursuant to paragraph (3) to limit motor vehicle emissions through the use of clean alternative fuels, it shall submit a revision to the applicable implementation plan or plans within twelve months of the adoption of such program.

"(B) REVISIONS TO IMPLEMENT SUBSTITUTE PROGRAM.—The Administrator shall approve, as a substitute for all or a portion of the clean alternative fuel vehicle program prescribed under this section, any revision to the relevant applicable implementation plan that in the Administrator's judgment will achieve long-term emissions reductions in ozone-forming volatile organic compounds and carcinogenic air pollutants equal to or greater than those reasonably expected to be achieved by the program, or the percentage thereof attributable to the portion of the clean alternative fuel vehicle program for which the revision is to substitute. The Administrator may approve such revision only if it consists exclusively of provisions other than those required under this Act for the area. Any State seeking approval of such revision with respect to the requirements established by paragraph (1) or by paragraph (2) for model years 1995 through 1998 must submit the revision to the Administrator within twenty-four months of enactment of this paragraph. Any State seeking approval of such revision with respect to the requirements established by paragraph (2) for model years 1999 and thereafter must submit the revision to the Administrator within sixty months of enactment of this section. The Administrator must approve or disapprove any such revision within six months of receipt of such revision. (The Administrator shall publish the revision submitted by a State in the Federal Register upon receipt.) Such notice shall constitute a notice of proposed rulemaking on whether or not to approve such revision and shall be deemed to comply with requirements concerning notices of proposed rulemaking contained in sections 553 through 557 of title 5 of the United States (related to notice and comment). However, no authority not expressly granted to the Administrator by law is conferred by this section.

"(C) REFORMULATED GASOLINE REVISIONS.—Any State in which there is a serious, severe or extreme ozone nonattainment area may propose as a revision to the applicable implementation plan for such area or areas a requirement that the reformulated gasoline specified by the Administrator as a clean alternative fuel pursuant to subparagraph (2)(B) be offered for sale and sold in such area or areas beginning on October 1, 1994. The Administrator may delay the date on which reformulated gasoline is to be offered for sale and sold to a date later than October 1, 1994, in order to provide adequate lead time for such fuel to be made available in the necessary quantities. In assessing proposed implementation plan revisions pursuant to this subparagraph and the availability of reformulated gasoline, the Administrator shall give priority to the sale of refor-

mulated gasoline in severe and extreme ozone nonattainment areas.

"(9) REVISIONS TO FUEL AVAILABILITY AND OTHER REQUIREMENTS.—If one or more areas are exempted from the clean alternative fuel vehicle program under paragraph (8)(b), are included in the program under paragraph (6), or increase program requirements under paragraph (7), the Administrator by regulation shall revise, as appropriate, the requirements prescribed under paragraph (5) regarding the availability of clean alternative fuels needed by vehicles to comply with the emissions standards prescribed under by paragraphs (1), (2) and (3) in such area or areas. Any additional requirements prescribed under this paragraph shall become applicable after such period as the Administrator finds by rule is necessary for the requisite vehicles and fuels to be made available, giving appropriate consideration to model availability and the cost of compliance within such period.

"(10) STUDIES TO BE UNDERTAKEN BY THE ADMINISTRATOR.—

"(A) Not later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990, the Health Effects Institute, after consultation with the Environmental Protection Agency, the National Institute of Health, the Department of Energy, the Department of Health and Human Services, the Department of Transportation, and the Office of Management and Budget, shall complete an analysis of the risk of carcinogenic effects, if any, associated with the use of methanol as a motor vehicle fuel and, if such a risk exists, of the need for and feasibility of controlling emissions of methanol.

"(B) The Administrator may also conduct an analysis of the risk of carcinogenic effects posed by any air pollutant associated with motor vehicles and motor vehicle fuels. After completing such an analysis, the Administrator shall by regulation include the air pollutant within the definition of the term 'carcinogenic air pollutants' contained in section 216(11) if the Administrator determines that the pollutant poses such a risk.

"(C) The Secretary of Energy shall report to the Congress not later than July 1, 1993 on the relationship between electric vehicle use and electric generation capacity and the potential to meet additional electric energy demand which may be associated with use of electric vehicles using off-peak capacity.

"(11) CONVENTIONAL GASOLINE.—Not later than July 1, 1992, the Administrator shall promulgate regulations ensuring that, beginning on January 1, 1993, gasoline sold on a nationwide basis does not result in per gallon emissions of volatile organic compounds, oxides of nitrogen, carbon monoxide, and overall emissions of carcinogenic air pollutants in excess of per gallon emissions of such pollutants attributable to gasoline sold in calendar year 1989.

"(b) TANK AND FUEL SYSTEM SAFETY.—The Secretary of Transportation shall, in accordance with the National Motor Vehicles Traffic Safety Act of 1966, promulgate applicable regulations regarding the safety and use of fuel storage cylinders and fuel systems in vehicles capable of operating on clean alternative fuels.

"(c) INFORMATION COLLECTION.—

"(1) For purposes of enforcing regulations implementing this section, the Administrator may by regulation require manufacturers, importers, distributors, and retailers of motor vehicles or motor vehicle fuels to establish and maintain records, make reports, and provide information concerning the sales of (A) motor vehicles capable of operating on clean alternative fuel, and (B) clean alternative fuels. Nothing in this subsection shall be construed to limit the Administrator's authority under sections 114, 206, 208 or 211.

"(2) Any records, reports or information obtained under this section shall be available to the public, except that upon a showing satisfactory to the Administrator by any person that records, reports, or information, or particular portions thereof (other than emission data), to which the Administrator has access under this subsection would, if made public, divulge methods or processes entitled to protection as trade secrets of such person, the Administrator shall consider such record, report, or information or particular portion thereof confidential in accordance with the purposes of section 1905 of title 18 of the United States Code. Any authorized representative of the Administrator (including an authorized contractor acting as a representative of the Administrator) shall be considered an employee of the United States for purposes of section 1905 of title 18 of the United States Code. Nothing in this section shall prohibit the Administrator or authorized representative of the Administrator (including any authorized contractor acting as a representative of the Administrator) from disclosing records, reports, or information to other officers, employees, or authorized representatives of the United States (including any authorized contractor acting as a representative of the Administrator) concerned with carrying out this Act or, when relevant, in any proceeding under this Act. Nothing in this section shall authorize the withholding of information by the Administrator or any officer or employee under his control (including any authorized contractor acting as a representative of the Administrator) from the duly authorized committees of the Congress.

"(d) CONSULTATION WITH DEPARTMENT OF ENERGY AND DEPARTMENT OF TRANSPORTATION.—The Administrator shall consult with the Secretaries of the Department of Energy and the Department of Transportation in carrying out the Administrator's duties under this section.".

(c) CONFORMING AMENDMENT.—Section 202(a)(4) of the Clean Air Act is amended by striking the phrase "standards prescribed under this subsection" every place it occurs and inserting the phrase "requirements prescribed under this title".

(d) STUDY OF ULTRA-CLEAN VEHICLES.—

(1) Section 216 of the Clean Air Act is amended by adding the following new subsection:

"(13) The term 'ultra-clean vehicle' means any light-duty vehicle powered by batteries, fuel cells, hydrogen, or any comparably low-polluting power source. In determining whether a power source is comparably low-polluting, the Administrator shall consider the level of emissions of air pollutants from vehicles using the power source, the level of emissions from plants and refineries generating or processing power for such vehicles and the contribution of such emissions to ambient levels of air pollutants. For purposes of this subsection, battery-powered vehicles include hybrid vehicles which are powered primarily by a battery and also have a secondary power source.".

(2) Section 202 of the Clean Air Act is amended by adding the following new subsection:

"(m) ULTRA-CLEAN VEHICLES.—

"(1) The Administrator, in coordination with the Department of Energy and the Department of Transportation, and other appropriate Federal agencies, shall—

"(A) conduct a survey of available and forseeable technologies for the production of ultra-clean vehicles and the feasibility and cost effectiveness of using such technologies to reduce pollutant emissions from mobile sources;

"(B) develop a plan to foster joint public-private development of practical and economical ultra-clean vehicle technologies and encourage the gradual introduction of ultra-clean vehicles into use; and

"(C) take into consideration the conclusions and recommendations made by the Interagency Commission on Alternative Fuels.

"(2) The survey and plan required by this subsection shall be completed and submitted to the Congress no later than December 31, 1992.".

LIGHT DUTY VEHICLE USEFUL LIFE

SEC. 207. Section 202(d)(1) of the Clean Air Act is amended to read as follows:

"(1)(A) in the case of light duty vehicles and light duty vehicle engines manufactured during or before the 1994 model year, be a period of use of five years or of fifty thousand miles (or the equivalent), whichever first occurs;

"(B) in the case of light duty vehicles and light duty engines manufactured in the model year 1995 and thereafter, be a period of use of ten years or one hundred thousand miles (or the equivalent), whichever first occurs;".

RESEARCH ON HEAVY-DUTY VEHICLES

SEC. 208. RESEARCH ON HEAVY-DUTY VEHICLES.—Section 103 of the Clean Air Act is amended by adding at the end thereof the following new subsection:

"( ) The Administrator, in cooperation with the Secretary of Energy and the Administrator of the Urban Mass Transportation Administration, and such other agencies as the Administrator deems appropriate, shall establish a research and technology assessment center to provide for the development and evaluation of less-polluting heavy-duty engines and fuels for use in buses, heavy-duty trucks, and non-road engines and vehicles, which shall be located at a high-altitude site that represents high-altitude conditions. In establishing and funding such a center, the Administrator shall give preference to proposals which provide for local cost-sharing of facilities and recovery of costs of operation through utilization of such facility for the purposes of this section.".

WARRANTIES

SEC. 209. Section 207 of the Clean Air Act is amended as follows:

(a) strike out "its useful life (as determined under section 202(d))" in each place it appears in subsection (b) and insert in lieu thereof "warranty period (as determined under subsection (i))";

(b) strike so much of section 207(b) as follows the third sentence thereof;

(c) add the following new subsection at the end thereof:

"(i) WARRANTY PERIOD.—

"(1) For purposes of subsection (a)(1) and subsection (b), the warranty period, in the case of light duty vehicles and light duty vehicle engines manufactured during or before the 1994 model year shall be the useful life (as determined under section 202(d)). For the purposes of such subsec-

tions, the warranty period, in the case of such vehicles and engines manufactured during model year 1995 and thereafter, shall be the first two years or twenty-four thousand miles of use (whichever first occurs), except as provided in paragraph (2).

"(2) In the case of a specified major emission control component, the warranty period for purposes of subsection (a)(1) and subsection (b) shall be eight years or eighty thousand miles of use (whichever first occurs). As used in this paragraph, the term 'specified major emission control component' means only a catalytic converter, on board emission control diagnostic device, including any device installed for the purpose of storing or processing emissions related diagnostic information, but not including any parts or other systems which it monitors except specified major emissions control components, or electronic emissions control unit, except that the Administrator may designate any other pollution control device or component as a specified major emission control component if—

"(A) the device or component was not in general use on vehicles and engines manufactured prior to the model year 1990; and

"(B) the Administrator determines that the retail cost (exclusive of installation costs) of such device or component exceeds $200 (in 1989 dollars, adjusted for inflation or deflation as calculated by the Administrator at the time of such determination).

Nothing in this Act shall be interpreted to mean that parts other than those specified by the Administrator as major emission control components shall be construed to be warranted under this Act for eight years or eighty thousand miles.

"(3) Subparagraph (A) of subsection (b)(2) shall apply only where the Administrator has made a determination that the instructions concerned conform to the requirements of subsection (c)(3).''; and

(d) amend subsection (a)(1) by adding the following at the end thereof: "In the case of vehicles and engines manufactured in the model year 1995 and thereafter such warranty shall require that the vehicle or engine is free from any such defects for the period of two years or twenty-four thousand miles of use (whichever first occurs), except that for a specified major emission control component (as defined in subsection (i)) such warranty shall require that such component is free from any such defects for the period of eight years or eighty thousand miles of use (whichever first occurs).".

NON-ROAD ENGINES

SEC. 210. (a) DEFINITIONS.—Section 216 of the Clean Air Act is amended by adding the following new subsections:

"(8) The term 'non-road engine' means an internal combustion engine (including the fuel system) that is not used in a motor vehicle or in a vehicle designed solely for competition which is not capable of operating on streets and highways, or which is not subject to standards promulgated under section 111 (pertaining to new stationary sources) or to regulation under part B of this title (pertaining to aircraft emissions).

"(9) The term 'non-road vehicle' means a vehicle that is powered by a non-road engine and that is not a motor vehicle.".

(b) Subsection (1) of section 219 of the Clean Air Act (as redesignated by section 206) is amended by striking the phrase "new motor vehicles or new motor vehicle engines" every place it occurs and inserting in its place "new motor vehicles, new motor vehicle engines, new non-road vehicles or new non-road engines".

(c) The Clean Air Act is amended by adding a new section 217 as follows:

"EMISSION STANDARDS FOR NON-ROAD ENGINES AND VEHICLES

"SEC. 217. (a) LIST OF CATEGORIES.—Not later than twenty-four months after the date of enactment of this section and after notice and opportunity for public comment the Administrator shall publish (and from time to time revise) a list of all categories of non-road engines and non-road vehicles together with estimates of the contribution of each category to ambient ozone and carbon monoxide levels in nonattainment areas and to oxides of nitrogen and total particulate levels.

"(b) EMISSION STANDARDS.—Whenever the Administrator determines that emissions from categories of non-road engines or vehicles contribute significantly to concentrations of ozone, carbon monoxide or to oxides of nitrogen or particulate levels or otherwise contribute to air pollution that may reasonably be anticipated to endanger public health or welfare, the Administrator shall promulgate regulations applicable to emissions from new vehicles or engines in such categories. Such standards shall achieve the greatest degree of emission reduction achievable through the application of technology which the Administrator determines will be available for the engines or vehicles to which such standards apply, giving appropriate consideration to the cost of applying such technology within the period of time available to manufacturers and to noise, energy, and safety factors associated with the application of such technology. In determining what degree of reduction will be available, the Administrator shall first consider standards equivalent in stringency to standards for comparable motor vehicles or engines (if any) regulated under section 202, taking into account the technological feasibility, costs, safety, noise and energy factors associated with achieving standards of such stringency.

"(c) ENFORCEMENT.—The standards under this section shall be subject to the same provisions of title II as are applicable in the case of standards under section 202, and shall be enforced in the same manner as the standards under section 202, with such modifications as the Administrator deems appropriate.".

PROHIBITION ON PRODUCTION OF ENGINES REQUIRING LEADED GASOLINE

SEC. 211. The Clean Air Act is amended by adding a new section 218 as follows:

"PROHIBITION ON PRODUCTION OF ENGINES REQUIRING LEADED GASOLINE

"SEC. 218. The Administrator shall promulgate regulations applicable to motor vehicle engines and non-road engines manufactured after model year 1992 that prohibit the manufacture, sale, or introduction into commerce of any engine that requires leaded gasoline.".

MOTOR VEHICLE TESTING AND CERTIFICATION

SEC. 212. (a) IDLE TEST.—Section 206(a) of the Clean Air Act is amended by adding the following new paragraph at the end thereof:

"(4) Not later than one year after the enactment of this paragraph, the Administrator shall promulgate regulations adding an idle test and idle test mode to the Federal test procedure for light duty vehicles. Such modified test procedure shall be used for the certification of light duty vehicles and engines manufactured during or after model year 1992.".

(b) PRODUCTION LINE TESTING.—Section 206(b) of the Clean Air Act is amended by adding the following at the end thereof:

"(3) The Administrator shall revise the regulations under this section regarding selective enforcement auditing of new light duty vehicles (as set forth in section 86.610 of subpart G of part 86 of title 40 of the Code of Federal Regulations) such that the maximum percentage of failing vehicles that, for purposes of sampling inspection, can be considered satisfactory as a process average for purposes of such selective enforcement audits shall be 10 per centum. Such revised regulations shall apply with respect to motor vehicles manufactured after the model year 1991.".

(c) REVISION OF CERTAIN TEST PROCEDURES.—Section 206 of the Clean Air Act is amended by adding the following new subsection:

"(h) Within eighteen months after the enactment of this subsection and at least every four years thereafter, the Administrator shall review and revise as necessary the regulations under subsection (a) and (b) of this section regarding the testing of motor vehicles and motor vehicle engines to insure that vehicles are tested under circumstances which reflect the actual current driving conditions under which motor vehicles are used, including conditions relating to fuel, temperature, acceleration and altitude. Such revised test procedures shall include testing of evaporative emissions (including running losses) as well as tail-pipe emissions and shall provide for the testing of trucks with a gross vehicle weight rating of six thousand pounds or more in a loaded mode approximating such rating.".

(d) AVERAGING.—Section 202 of the Clean Air Act is amended by adding the following new subsection:

"(l) AVERAGING.—(1) Each emission standard under this section shall apply to, and be met by, each and every vehicle or engine sold, offered for sale, introduced into commerce, or imported, and may not be met or complied with by the average of the performance of various vehicles, engines, engine families, or models manufactured by the same manufacturer.

"(2) Paragraph (1) shall not apply to emission standards applicable to heavy duty vehicles or engines. The Administrator may by regulation provide for manufacturers to demonstrate compliance with emission standards for heavy duty vehicles or engines by averaging credits for emission reductions between engine families of the same manufacturers, by banking credits over time, and by trading credits with other manufacturers.

"(3) By June 1, 1994, the Administrator shall complete and submit to Congress a study of the impacts on costs, economic efficiency, emission reductions and environmental impacts from any rule adopted by the Administrator under this subsection permitting trading, banking, and averaging.".

(e) ESTABLISHMENT OF A HIGH-ALTITUDE RESEARCH CENTER.—Section 103 of the Clean Air Act is amended by adding at the end thereof the following new subsection:

"( ) The Administrator shall designate at least one center at high-altitude conditions to provide research on after-market emission components, dual-fueled vehicles and conversion kits, the effects of tampering on emissions equipment, testing of alternate fuels and conversion kits, and the development of curricula, training courses and materials to maximize the effectiveness of inspection and maintenance programs as they

relate to promoting effective control of vehicle emissions at high-altitude elevations. Preference shall be given to existing vehicle emissions testing and research centers that have established reputations for vehicle emissions research and development and training, and that possess in-house Federal Test Procedure capacity.".

IN-USE COMPLIANCE—RECALL

SEC. 213. (a) USE OF INFORMATION FROM STATE PROGRAMS.—Section 207(c) of the Clean Air Act is amended by adding the following new paragraph at the end thereof:

"(4) In making determinations of nonconformity under this subsection, the Administrator shall take into account information collected under any State vehicle emission control inspection and maintenance program. Any State in which such a program is operating may petition the Administrator to make a determination of nonconformity under paragraph (1) on the basis of information collected in such program. The Administrator shall act upon such petition within sixty days of receipt of such petition.".

(b) RECALL TESTING AT MANUFACTURER'S EXPENSE.—Section 207(c) of the Clean Air Act is further amended by adding the following new paragraph:

"(5) If the Administrator has reason to believe that in-use vehicles or engines may not conform to regulations prescribed under section 202, the Administrator may require the manufacturer of such vehicles or engines to pay the costs that the Administrator incurs in procuring and testing such vehicles or engines. Such reason to believe shall be based on data or information available to the Administrator, including but not limited to, field surveys, State vehicle emission control inspection and maintenance programs and consumer complaints.".

(c) IN-USE TESTING AT HIGH-ALTITUDE.—Section 207(c) of the Clean Air Act is further amended by adding the following new paragraph:

"(6) The Administrator shall maintain through fiscal year 1995 at least one testing center which shall be located at a site that represents high-altitude conditions to ascertain whether, when in actual use throughout their useful life (as determined under section 202(d)), each class of vehicle and engine to which regulations under section 202 apply conforms to the emission standards of such regulations. The Administrator shall, in cooperation with the States, conduct routine testing of a representative sample of classes or categories of vehicles and engines to which regulations under section 202 apply. In carrying out such tests, the Administrator shall assure that the testing procedures and methods are of sufficient accuracy and consistency to carry out the purposes of this section. For the purposes of this paragraph, the term 'high-altitude conditions' refers to high altitude as defined in Environmental Protection Agency regulations in effect as of the enactment of this Act. Preference shall be given to existing in-use vehicle emission testing and research centers located at high-altitude conditions.".

(d) RECALL TESTING OF CLEAN ALTERNATIVE FUEL VEHICLES.—Section 207(c) of the Clean Air Act is further amended by adding the following new paragraph:

"(7) In determining in-use compliance by vehicles and engines in actual use with the emissions standards prescribed under section 212(a), the provisions of this section shall be applied with such modifications as are necessary to reflect the provisions of section 212(a)(4).".

FUEL VOLATILITY

SEC. 214. Section 211 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(h) EVAPORATIVE EMISSIONS FROM MOTOR VEHICLE FUELS.—

"(1) The Administrator shall promulgate regulations to reduce evaporative emissions from motor vehicle fuels.

"(2) Regulations under this subsection shall include a standard for gasoline volatility which shall apply to all gasoline sold, offered for sale, or introduced into commerce or imported for use in motor vehicles during the high ozone period of each year, as determined by the Administrator under paragraph (3). Effective with respect to gasoline sold in the second high ozone period which commences after the date of enactment of the Clean Air Act Amendments of 1990, the standard shall require that such gasoline sold, or offered for sale, or introduced into commerce for use in motor vehicles in class C areas (as defined by the American Society of Testing Materials as of said date of enactment) shall not exceed a Reid vapor pressure of nine pounds per square inch, except that the Administrator may establish a lower Reid vapor pressure as necessary and appropriate to achieve further overall reductions in motor vehicle emissions contributing to the formation of ozone, taking into account safety, enforceability, driveability, and public health. The Administrator shall establish standards for gasoline volatility for Class B and Class A areas that achieve comparable overall reductions in motor vehicle emissions to those achieved by the standard for Class C areas, taking into account appropriate variables such as temperature and humidity.

"(3) For purposes of regulations referred to in paragraph (2), the high ozone period shall be the period between May 16 and September 15 each year or such longer period as the Administrator establishes for any region to cover periods of potential ozone air pollution in excess of the standard for ozone for the region.

"(4) For fuel blends containing gasoline and 10 per centum denatured anhydrous ethanol, the Reid vapor pressure limitation pursuant to this subsection shall be one pound per square inch greater than the applicable Reid vapor pressure limitations established under paragraph (2): *Provided, however,* That a distributor, blender, marketer, reseller, carrier, retailer, or wholesale purchaser-consumer shall be deemed to be in full compliance with the provisions of this subsection and the regulations promulgated thereunder, if it can demonstrate (by showing receipt of a certification or other evidence acceptable to the Administrator) that (A) the gasoline portion of the blend complies with the Reid vapor pressure limitations promulgated pursuant to this subsection, and (B) the ethanol portion of the blend does not exceed its waiver condition under subsection (f)(4).

"(5) The provisions of this subsection shall apply only to the forty-eight contiguous States and the District of Columbia.".

DESULFURIZATION

SEC. 215. Section 211 of the Clean Air Act is amended by adding the following new subsection to the end thereof:

"(i) DESULFURIZATION OF DIESEL FUEL.—

"(1) Effective October 1, 1993, no person shall manufacture, sell, offer for sale, supply, offer for supply, dispense, transport or introduce into commerce motor vehicle diesel fuel which contains a concentration of sulfur in excess of 0.05 per centum (by weight) or which fails to meet a cetane index minimum of 40.

"(2) No later than twelve months after the enactment of this subsection, the Administrator shall promulgate regulations to implement and enforce the requirements of paragraph (1). The Administrator shall require manufacturers and importers of diesel fuel not intended for use in motor vehicles to dye such fuel in order to segregate it from motor vehicle diesel fuel. The Administrator may establish an equivalent aromatic level to the cetane index specification in paragraph (1).

"(3) The sulfur content of fuel required to be used in the certification of 1991 through 1993 model year heavy-duty diesel vehicles and engines shall not exceed 0.10 per centum (by weight). The sulfur content and cetane index minimum of fuel required to be used in certification of 1994 and later model year heavy-duty diesel vehicles and engines shall comply with the regulations promulgated under paragraph (2).

"(4) The requirements of paragraph 1 of this subsection shall not apply to diesel fuel produced by any refinery which has a crude oil or bona fide feedstock capacity (as determined by the Administrator) of less than 25,000 barrels per day, is located on the North Slope of Alaska, and whose products are sold or transferred on the North Slope for use to support oil or mineral exploration, production or development activity. It shall not be a violation of this title to transfer, sell for use in, or to use any such fuel in motor vehicles located in and operated solely on the North Slope of Alaska.".

LEAD PHASEDOWN

SEC. 216. Section 211 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(j) PROHIBITION ON LEADED GASOLINE FOR HIGHWAY USE.—Effective January 1, 1992, it shall be unlawful for any person to sell, offer for sale, supply, offer for supply, dispense, transport, or introduce into commerce, for use as fuel in any motor vehicle (as defined in section 219(2)) any gasoline which contains lead or lead additives. The Administrator shall extend the January 1, 1992, deadline annually for up to three years, if the Administrator determines in consultation with the Secretary of Agriculture, that unavailability of gasoline containing lead or lead additives for such vehicles will reduce the availability of such gasoline for farm vehicles and that adequate alternatives to gasoline containing lead or lead additives are unavailable for use in gasoline powered farm vehicles.".

FUEL QUALITY

SEC. 217. Section 211 of the Clean Air Act is amended by adding the following new subsection to the end thereof:

"(k) FUEL QUALITY.—

"(1) Not later than thirty-six months after the date of enactment of this subsection the Administrator shall, after notice and opportunity for public comment, promulgate regulations establishing specifications for fuel quality which will minimize, to the extent economically and technically achievable, emissions (including evaporative emissions) of hydrocarbons, carbon monoxide, oxides of nitrogen, particulate matter and hazardous air pollutants over the useful life of vehicles and engines certified for manufacture under this title. Such regulations may prohibit the presence of fuel impurities and

other substances or mandate the use of additives to achieve the purposes of this subsection. The regulations shall be effective for fuels sold, offered for sale, supplied, offered for supply, dispensed, transported, or introduced into commerce on and after January 1, 1994. In the event that the Administrator does not promulgate the regulations required by this paragraph, effective January 1, 1994, it shall be unlawful to sell, offer for sale, supply, offer for supply, dispense, transport, or introduce into commerce any fuel for use in a gasoline-powered vehicle unless such fuel contains additives effective in preventing the accumulation of deposits in fuel-injected engines.

"(2) CLEAN FUELS FOR CONVENTIONAL VEHICLES.—(A) Within one year of enactment of the Clean Air Amendments of 1990, the Administrator, pursuant to paragraph (1), shall promulgate regulations establishing specifications for reformulated gasoline to be used in conventional gasoline fueled motor vehicles in any nonattainment area with a 1989 ozone design value equal to or exceeding 0.18 parts per million. Such regulations shall prohibit any person from selling, offering for sale, dispensing, supplying offering for supply, transporting or introducing into commerce in such area or areas any gasoline not meeting the requirements of this paragraph for use in gasoline fueled motor vehicles. Such regulations shall take effect in accordance with the phase in schedule set forth in subparagraph (B). Such regulations shall be incorporated in the final regulations promulgated pursuant to paragraph (1).

"(B) Subject to the limitations set forth in subsection (h) and section 212(a)(11), the specifications for fuel quality promulgated pursuant to subparagraph (A) shall, at a minimum, provide for—

"(i) a maximum aromatic hydrocarbon content by volume of not greater than 30 per centum as of January 1, 1992; of not greater than 28 per centum as of January 1, 1994, and of not greater than 25 per centum as of January 1, 1996;

"(ii) a maximum benzene content by volume which shall be the lowest concentration by benzene accompanying the maximum aromatic hydrocarbon content under clause (i) that can be achieved without additional capital investment but, in no event may such maximum benzene content be greater than 1.0 per centum by volume;

"(iii) during the high ozone season (as defined by the Administrator), a 15 per centum reduction in the ozone-forming potential of volatile organic compounds and no increase in oxides of nitrogen emitted from existing vehicles (as determined by the Administrator) using such fuel compared to conventional gasoline with a Reid vapor pressure of 9.0 pounds per square inch sold in calendar year 1989; and

"(iv) subject to paragraph (D), an oxygen content by weight equal to or greater than 2.0 per centum as of January 1, 1992, 2.5 per centum as of January 1, 1993, and 2.7 per centum as of January 1, 1994, except where a higher oxygen content is required under section 211(l) or section 188, except as provided in subparagraph (D).

"(C) The regulations promulgated under paragraph (A) shall include procedures under which the Administrator shall certify fuels as complying with the specifications established pursuant to paragraph (B).

"(D) The Administrator may waive, in whole or in part, the requirements of paragraph (2)(B)(iv) upon a determination by the Administrator that the use of oxygenated fuels would prevent or interfere with the attainment by such area of a national primary ambient air quality standard (or a State or local ambient air quality standard) for any air pollutant other than carbon monoxide.

"(E) Sellers of fuels subject to this paragraph with an oxygen content higher than the percentages specified in subparagraph (B)(iv) shall be eligible for credits in accordance with the terms and conditions of section 211(l)(2).

"(F) The regulations promulgated under this paragraph shall include procedures under which the Administrator may certify fuels as complying with the specifications established pursuant to subparagraph (B). The regulations shall establish a procedure by which the Administrator may certify a gasoline as complying with such specifications if such gasoline (i) complies with the specification in clauses (iii) and (iv) of subparagraph (B) and (ii) achieves equivalent or greater emission reductions that are achieved by a gasoline meeting the specifications established pursuant to clauses (i) and (ii) of subparagraph (B).

"(3)(A) Any State in which there is a moderate or serious ozone non-attainment area may propose as a revision of the applicable implementation plan for such area or areas a requirement that reformulated gasoline sold, offered for sale, dispensed, supplied, offered for supply, transported or introduced into commerce in such area or areas for use in gasoline fueled motor vehicles shall be subject to all the requirements of this subsection beginning on the date specified in the revision.

"(B) For the purposes of paragraph (A), the Administrator may delay, for not to exceed three years, the date on which reformulated gasoline which meets the specifications in paragraph 2(B) is to be offered for sale or sold in order to provide adequate lead time for such fuel to be made available in necessary quantities. The decision of the Administrator to provide such delay shall be accompanied by an explanation of the reasons for such delay.".

OXYGENATED FUELS

SEC. 218. Section 211 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(l)(1) Except as provided in paragraph (2) and effective October 1, 1991, no person shall, during the period from October 1 to March 31 each year, sell, offer for sale, supply, offer for supply, dispense, transport, or introduce into commerce in any area classified as nonattainment for carbon monoxide any gasoline fuel for use in a motor vehicle unless the oxygen content of such fuel shall be 3.1 per centum or greater. Not later than twelve months after the enactment of this subsection, the Administrator shall submit to the Congress a report on the feasibility and effectiveness of requiring the provisions in this paragraph to be applied to all cities of 100,000 population or greater regardless of their attainment status. At the request of a State with respect to any area designated as nonattainment for carbon monoxide, the Administrator may reduce the period specified in the preceding sentence, if the State can demonstrate that because of meteorological conditions, a shorter period will assure that there will be no exceedances of the carbon monoxide standard outside of the time that such fuels are to be sold.

"(2) The Administrator shall, not later than twelve months after the date of enactment of this subsection, promulgate regulations allowing the exchange of marketable oxygen credits between sellers of fuels with an oxygen content higher than that required by paragraph (1) and other sellers of fuels to offset the sale or use of fuels with a lower content than required: *Provided*, That such exchanges shall not be permitted between sellers located in different nonattainment areas and that the average oxygen content of fuels sold in any area that is nonattainment for carbon monoxide be 3.1 per centum or greater.

"(3) The Administrator may waive, in whole or in part, the requirements of this subsection in any area upon a demonstration by the State to the satisfaction of the Administrator that the use of oxygenated fuels would prevent or interfere with the attainment by such area of a national primary ambient air quality standard (or a State or local ambient air quality standard) for any air pollutant other than carbon monoxide.

"(4) The Administrator may waive in whole or in part the requirements of this subsection in any carbon monoxide nonattainment area in Alaska if the Administrator finds that prevailing temperatures in that area cause engine or fuel system malfunctions in vehicles using fuels meeting such requirements. The Administrator shall conduct a study to determine the effect of cold temperatures on fuels which meet the oxygen content requirements of this subsection and the feasibility of using such fuels during periods of sustained cold temperatures.

"(5) Any person selling or offering for sale oxygenated fuel at retail outlets pursuant to this subsection shall be required under regulations promulgated by the Administrator to label the fuel dispensing system with a notice that the fuel is oxygenated and will reduce carbon monoxide emissions from motor vehicles.".

MISFUELING

SEC. 219. Section 211 of the Clean Air Act is amended by deleting subsection (g) and inserting the following new subsection:

"(g)(1) No person shall introduce, or cause or allow the introduction of, leaded gasoline into any motor vehicle which is labeled 'unleaded gasoline only,' which is equipped with a gasoline tank filler inlet designed for the introduction of unleaded gasoline, which is a 1990 or later model year motor vehicle, or which such person knows or should know is a vehicle designed solely for the use of unleaded gasoline.

"(2) Beginning October 1, 1993, no person shall introduce or cause or allow the introduction into any motor vehicle of diesel fuel which such person knows or should know contains a concentration of sulfur in excess of 0.05 per centum (by weight) or which fails to meet a cetane index minimum of 40.".

URBAN BUSES

SEC. 220. (a) Section 216 of the Clean Air Act is amended by adding the following new paragraph at the end thereof:

"(13) the term 'urban bus' has the meaning provided under regulations of the Administrator promulgated under section 202(a).".

(b) Section 212 of the Clean Air Act, as amended by section 206, is further amended by adding at the end thereof the following new subsection:

"(e)(1) Not later than twelve months after the enactment of this section, the Administrator shall promulgate regulations requiring the use of low polluting fuels in new urban buses operated primarily in a metro-

politan statistical area or consolidated metropolitan statistical area (as defined by the United States Office of Management and Budget) with a 1980 population of one million persons or more. The regulations shall provide that all new urban buses beginning with the model year 1997 purchased or placed into service by owners or operators of urban buses in such areas must be capable of operating, and must be exclusively operated, on low polluting fuels. The Administrator shall prescribe a schedule phasing in the applicability of the requirements established by this subsection over the 1991 through 1997 model years as follows: (A) for metropolitan statistical areas or consolidated metropolitan statistical areas with a population of one million five hundred thousand persons or more, 10 per centum of new urban buses purchased or placed into service in model year 1991; 25 per centum of new urban buses purchased or placed into service in model year 1992; 60 per centum of new urban buses purchased or placed into service in model year 1993; and 100 per centum of new urban buses purchased or placed into service in 1994 and later model years; and (B) for metropolitan statistical areas or consolidated metropolitan statistical areas with a population of less than one million five hundred thousand persons but more than one million persons, 10 per centum of new urban buses purchased or placed into service in model year 1993; 25 per centum of new urban buses purchased or placed into service in model year 1995; 60 per centum of new urban buses purchased or placed into service in 1996; and 100 per centum of new urban buses purchased or placed into service in 1997 and later model years. Emissions of particulate matter from buses purchased or placed into service as required by this subsection shall not exceed 0.10 grams per brake horsepower-hour.

"(2) Not later than twelve months after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate regulations requiring that, beginning January 1, 1992, any urban bus operating in any area specified in paragraph (1) shall, at the time of any major engine overhaul, be retrofitted so as to comply with the emissions standards under section 202(a) applicable for model years 1992 and after to new urban buses.".

ENFORCEMENT

SEC. 221. (a) TESTING.—Section 203(a)(2) of the Clean Air Act is amended by inserting before the semicolon at the end thereof the following: ", or to refuse to pay for procurement or testing under section 207(c)".

(b) TAMPERING WITH VEHICLE EMISSION CONTROLS.—(1) Section 203(a)(3) of the Clean Air Act is amended to read as follows:

"(3)(A) for any person to remove or render inoperative any device or element of design installed on or in a motor vehicle or motor vehicle engine in compliance with regulations under this title prior to its sale and delivery to the ultimate purchaser, or for any person knowingly to remove or render inoperative any such device or element of design after such sale and delivery to the ultimate purchaser; or

"(B) for any person to manufacture or sell, or offer to sell, any part or component intended for use with, or as part of, any motor vehicle or motor vehicle engine, where a principal effect of such part or component is to bypass, defeat, or render inoperative any device or element of design installed on or in a motor vehicle or motor vehicle engine in compliance with regulations under this title, and where such person knows or should know that such part or component is being offered for sale for such use or put to such use; or".

(2) At the end of section 203(a) of the Clean Air Act insert the following: "No action with respect to any device or element of design referred to in paragraph (3)(A) shall be treated as a prohibited act under that paragraph until the vehicle or engine on which such device or element of design had been installed (i) has been subsequently released from the custody and control of the person performing such action, if such person is a manufacturer, dealer, or person engaged in the business of repairing, servicing, selling, leasing or trading motor vehicles or motor vehicle engines (or an employee or agent of such a person), or (ii) has been subsequently operated on a street or highway, if the person performing such action is a person who operates a fleet of motor vehicles or any person other than a person listed in (i).".

(c) PROHIBITED ACTS.—(1) Section 203(a)(4) of the Clean Air Act is amended by striking out the period at the end and inserting in lieu thereof: "; and".

(2) Section 203(a) of the Clean Air Act is amended by inserting the following new paragraphs after paragraph (a)(4):

"(5) for any owner or operator of urban buses to purchase or place into service a new bus that does not comply with the requirements of section 212 or regulations prescribed under such section; or

"(6) for any person to manufacture, except for export, sell, or introduce into commerce a motor vehicle engine or nonroad engine (or a vehicle containing such an engine) that does not comply with the requirements of section 218 or regulations prescribed under such section.".

(d) CIVIL AND ADMINISTRATIVE PENALTIES.—Section 205 of the Clean Air Act is amended to read as follows:

"SEC. 205. (a) CIVIL PENALTIES.—Any person who violates paragraph (1), (2), (4), (5) or (6) of section 203(a) or regulations prescribed under paragraph (a)(1), (a)(2), (a)(6), or (a)(7) (except (a)(7)(C)(iii)) of section 212 or any manufacturer or dealer who violates paragraph (3)(A) of section 203(a) of this title shall be subject to a civil penalty of not more than $25,000. Any other person who violates paragraph (3)(A) or any person who violates paragraph (3)(B) of such section 203(a) shall be subject to a civil penalty of not more than $2,500. Any such violation with respect to paragraph (1), (3)(A), (4), (5) or (6) of section 203(a) or regulations prescribed under paragraph (a)(1), (a)(2), (a)(6), or (a)(7) (except (a)(7)(C)(iii)) of section 212 of this title shall constitute a separate offense with respect to each motor vehicle or motor vehicle engine. Any such violation with respect to paragraph (3)(B) of section 203(a) shall constitute a separate offense with respect to each part or component. Any such violation with respect to paragraph (2) of section 203(a) or regulations prescribed under section 212(c) shall constitute a separate offense with respect to each day of violation.

"(b) CIVIL ACTIONS.—The Administrator may commence a civil action to assess and recover any civil penalty prescribed in subsection (a) of this section, subsection (d) of section 211 (pertaining to fuels and fuel additives), subsection (b) of section 216 (pertaining to emissions of carbon dioxide), or subsection (c) of section 217 (pertaining to nonroad engines and vehicles). Any action under this subsection may be brought in the district court of the United States for the district in which the violation is alleged to have occurred or in which the defendant resides or has his principal place of business, and such court shall have jurisdiction to assess such civil penalty. In determining the amount of any civil penalty to be assessed under this subsection, the court shall consider the seriousness of the violation, the economic benefit (if any) resulting from the violation, the size of the violator's business, the violator's history of compliance with this title, any good faith efforts to comply with the applicable requirements, action taken to remedy the violation, the economic impact of the penalty on the violator, and such other matters as justice may require. In any such action, subpoenas for witnesses who are required to attend a district court in any district may run into any other district.

"(c) ADMINISTRATIVE ASSESSMENTS.—(1) The Administrator may assess a civil penalty prescribed in subsection (a) of this section, subsection (d) of section 211 (pertaining to fuels or fuel additives), subsection (b) of section 216 (pertaining to emissions of carbon dioxide) or subsection (c) of section 217 (pertaining to nonroad engines and vehicles), except that the maximum amount of any civil penalty sought against each violator in a penalty assessment proceeding under this paragraph shall not exceed $200,000. Assessment of a civil penalty under this subsection shall be by an order made on the record after opportunity for a hearing in accordance with sections 554 and 556 of title 5, United States Code. The Administrator may issue rules for discovery and other procedures for hearings under this paragraph. Before issuing such an order, the Administrator shall give written notice to the person to be assessed an administrative penalty of the Administrator's proposal to issue such order and provide such person an opportunity to request such a hearing on the order, within 15 days of the date the notice is received by such person. The Administrator may compromise, modify, or remit, with or without conditions, any administrative penalty which may be imposed under this subsection.

"(2) In determining the amount of any civil penalty assessed under this subsection, the Administrator shall consider the seriousness of the violation, the economic benefit (if any) resulting from the violation, the size of the violator's business, the violator's history of compliance with this title, any good-faith efforts to comply with the applicable requirements, action taken to remedy the violation the economic impact on the violator, and such other matters as justice may require.

"(3)(A) Action by the Administrator under this subsection shall not affect or limit the Administrator's authority to enforce any provision of this Act, except that any violation—(i) with respect to which the Administrator has commenced and is diligently prosecuting an action under this subsection, or (ii) for which the Administrator has issued a final order not subject to further judicial review and the violator has paid a penalty assessment under this subsection, shall not be the subject of civil penalty action under subsection (b).

"(B) No action by the Administrator under this subsection shall affect any person's obligation to comply with any section of this Act.

"(4) An order issued under this subsection shall become final thirty days after its issuance unless a petition for judicial review is filed under paragraph (5).

"(5) Any person against whom a civil penalty is assessed in accordance with this subsection may obtain review of such assessment in the United States District Court for the District of Columbia or for the district in which the violation is alleged to have occurred, in which such person resides or where such person's principal place of business is located, by filing a notice in such court within the thirty-day period beginning on the date the civil penalty order is issued and by simultaneously sending a copy of such notice by certified mail to the Administrator and the Attorney General. The Administrator shall file in such court a certified copy, or certified index, as appropriate, of the record on which the order was issued within thirty days. Such court shall not set aside or remand such order unless there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or unless the Administrator's assessment of the penalty constitutes an abuse of discretion, and such court shall not impose additional civil penalties for the same violation unless the Administrator's assessment of the penalty constitutes an abuse of discretion. In any such proceeding, the United States may seek to recover civil penalties assessed under this section.

"(6) If any person fails to pay an assessment of a civil penalty imposed by the Administrator as provided in this subsection—

"(A) after the order making the assessment has become final, or

"(B) after a court in an action brought under paragraph (5) has entered a final judgment in favor of the Administrator,

the Administrator shall request the Attorney General to bring a civil action in an appropriate district court to recover the amount assessed (plus interest at rates established pursuant to 26 U.S.C. 6621(a)(2) from the date of the final order or the date of the final judgment, as the case may be). In such an action, the validity, amount, and appropriateness of such penalty shall not be subject to review. Any person who fails to pay on a timely basis the amount of an assessment of a civil penalty as described in the first sentence of this paragraph shall be required to pay, in addition to such amount and interest, the United States' enforcement expenses, including attorneys fees and costs for collection proceedings, and a quarterly nonpayment penalty for each quarter during which such failure to pay persists. Such nonpayment penalty shall be in an amount equal to 20 per centum of the aggregate amount of such person's penalties and nonpayment penalties which are unpaid as of the beginning of such quarter.".

(e) ENFORCEMENT OF SECTION 211.—Section 211(d) of the Clean Air Act is amended to read as follows:

"(d) ENFORCEMENT.—(1) CIVIL PENALTIES.—Any person who violates subsection (a), (f), (g), (j), or (l) of this section or the regulations prescribed under subsection (c), (h), (i), (k) or (l) of this section or paragraph (a)(5), (a)(7)C)(iii), (a)(9) or (a)(11) of section 212 or who fails to furnish any information or conduct any tests required by the Administrator under subsection (b) of this section, or any owner or operator of urban buses who violates regulations prescribed under section 212 concerning operation of such buses on low polluting fuel, shall be liable to the United States for a civil penalty of not more than the sum of $25,000 for each and every day of each such violation or the amount of economic benefit resulting from the violation. Any violation with respect to a regulation prescribed under subsection (c) of this section or paragraph (a)(5), (a)(7)(C)(iii), (a)(9), or (a)(11) of section 212 which establishes a regulatory standard based upon a multiday averaging period shall constitute a separate day of violation for each and every day in the averaging period. Such civil penalties shall be assessed in accordance with the provisions of subsections (b) and (c) of section 205.

"(2) INJUNCTIVE AUTHORITY.—The district courts of the United States shall have jurisdiction to restrain violations of subsection (a), (f), (g), (j), or (l) of this section and of the regulations prescribed under subsection (c), (h), (i), (k), or (l) of this section or under paragraph (a)(5), (a)(9), or (a)(11) or subsection (e) of section 212, to award other appropriate relief, and to compel the furnishing of information and the conduct of tests required by the Administrator under subsection (b) of this section. Actions to restrain such violations and compel such actions shall be brought by and in the name of the United States. In any such action, subpoenas for witnesses who are required to attend a district court in any district may run into any other district.".

(f) INJUNCTIVE RELIEF.—

(1) Section 204(a) of the Clean Air Act is amended by inserting the following phrases immediately after "section 203 (a)": "and of the regulations prescribed under paragraph (a)(1), (a)(2), (a)(6), or (a)(7) of section 212, to compel the establishment and maintenance of records, the making of reports, and the provision of information under subsection (c) of section 212, and to award other appropriate relief".

(2) Section 204(b) of the Clean Air Act is amended by inserting a comma and the words "compel such actions, and award such relief" immediately after "violations".

COORDINATION OF FEDERAL TRANSPORTATION AND ENVIRONMENTAL POLICIES

SEC. 222. (a) FINDINGS.—The Congress finds that—

(1) it is Federal policy, as reflected in the Clean Air Act, to require the use of new technologies and low polluting fuels by public transportation vehicles to further improve air quality;

(2) the installation and use of new technologies and low polluting fuels by public transportation vehicles will require substantial capital investment, and could significantly increase the costs of operating such vehicles;

(3) under existing Federal transportation policy, Federal funding for maintenance, improvement, and expansion of public transportation systems is very limited;

(4) it is in the public interest that such new technologies and low polluting fuels be brought into use in the appropriate timeframe, and that public transportation systems become more available and efficient; and

(5) Federal surface transportation programs must be reauthorized by September 30, 1991.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that—

(1) increased use of multipassenger and public transportation vehicles should be strongly encouraged by Federal, State, and local governments;

(2) Federal transportation policy should reflect environmental policy and concerns; and

(3) the upcoming reauthorization of Federal surface transportation programs should—

(A) take into account and authorize appropriate Federal funding of additional costs imposed on State and local entities relating to environmental requirements contained in this Act;

(B) encourage increased State and local funding for public transportation systems; and

(C) provide various regions, States, and localities with the flexibility to best meet their transportation and environmental needs.

FEDERAL COMPLIANCE

SEC. 223. (a) GENERAL COMPLIANCE.—Section 118 of the Clean Air Act is amended by inserting "GENERAL COMPLIANCE.—" after "SEC. 118. (a)".

(b) SPECIFIC COMPLIANCE.—Section 118 is further amended by adding at the end thereof the following new subsections:

"(c) IMPLEMENTATION PLAN PROVISIONS.—Each department, agency, and instrumentality of executive, legislative, and judicial branches of the Federal Government shall comply with all applicable provisions of any implementation plan submitted by a State and approved by the Administrator as provided in section 110(a) and part D.

"(d) EMISSION INVENTORIES.—Each department, agency, and instrumentality of executive, legislative, and judicial branches of the Federal Government shall submit all relevant and requested information regarding air pollutant emissions as expeditiously as possible following a request for such information from an appropriate Federal, State, or local agency.

"(e) GOVERNMENT VEHICLES.—Each department, agency, and instrumentality of executive, legislative, and judicial branches of the Federal Government shall comply with all applicable provisions of a valid inspection and maintenance program established under the provisions of section 183(a)(1)(A) or section 188(g) except for such vehicles that are considered military tactical vehicles.

"(f) VEHICLES OPERATED ON FEDERAL INSTALLATIONS.—Each department, agency, and instrumentality of executive, legislative, and judicial branches of the Federal Government having jurisdiction over any property or facility shall require all owners of non-federally owned motor vehicles which operate on the property or facility to furnish proof of compliance with the requirements of any vehicle inspection and maintenance program established under the provisions of section 183(a)(1)(A) or section 188(g). The installation shall use one of the following methods to establish proof of compliance—

"(1) presentation by the vehicle owner of a valid certificate of compliance from the vehicle inspection and maintenance program;

"(2) presentation by the vehicle owner of proof of vehicle registration within the geographic area covered by the vehicle inspection and maintenance program (except for any program whose enforcement mechanism is not through the denial of vehicle registration);

"(3) another method approved by the vehicle inspection and maintenance program administrator.".

ETHANOL SUBSTITUTE FOR DIESEL

SEC. 224. Within one year after the enactment of this Act, the Administrator shall contract with a laboratory which has done research on alcohol esters of rapeseed oil to evaluate the feasibility, engine performance, emissions, and production capability associated with an alternative to diesel fuel

composed of ethanol and high erucic rapeseed oil. The Administrator shall submit a report on the results of this research to Congress within three years of the issuance of such contract.

FUEL AND FUEL ADDITIVE IMPORTERS

SEC. 225. Section 211 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(m) FUEL AND FUEL ADDITIVE IMPORTERS AND IMPORTATION.—For the purposes of this section, the term 'manufacturer' includes an importer and the term 'manufacture' includes importation.".

EPA STUDY OF MAGNETIC LEVITATION

SEC. 226. The Administrator of the Environmental Protection Agency shall provide for the analysis of the health and environmental aspects of magnetic levitation technology, and shall report to the Congress and the President on such activity not later than six months after the date of enactment of the Clean Air Act Amendments of 1990.

TITLE III—AIR TOXICS

HAZARDOUS AIR POLLUTANTS

SEC. 301. Section 112 of the Clean Air Act is amended to read as follows:

"HAZARDOUS AIR POLLUTANTS

"SEC. 112. (a) DEFINITIONS.—

"(1) The term 'major source' means any stationary source (including all emission points and units of such source located within a contiguous area and under common control) of air pollutants that emits, considering installed and operating controls, in the aggregate, ten tons per year or more of any hazardous air pollutant or twenty-five tons per year or more of any combination of hazardous air pollutants. The Administrator may establish a lesser quantity, or in the case of radionuclides different criteria, for a major source than that specified in the previous sentence, on the basis of the potency of the air pollutant, persistence, potential for bioaccumulation, other characteristics of the air pollutant, or other relevant factors. Notwithstanding the provisions of this paragraph, emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any pipeline compressor station shall not be aggregated with emissions from other similar units, whether or not such units are in a contiguous area or under common control, to determine whether such wells or stations are major sources. Notwithstanding the provisions of this paragraph, the Administrator shall not be required to aggregate the emissions of a research or laboratory facility with emissions of other units within a contiguous area and under common control, to determine whether such a research or laboratory facility is a major source, but such emissions shall be aggregated with such other units for purposes of determining whether such units are subject to regulation under subsections (f) and (g). For purposes of this section, 'research or laboratory facility' means any stationary source whose primary purpose is to conduct research and development into new processes and products: *Provided,* That such source is operated under the close supervision of technically trained personnel, and does not produce a substantial quantity of products for commercial sale in commerce.

"(2) The term 'area source' means any stationary source of hazardous air pollutants that is not a major source.

"(3) The term 'stationary source' means any facility or installation or unit of such facility or installation which emits or may emit any hazardous air pollutant.

"(4) The term 'new source' means a source the construction or reconstruction of which is commenced after the Administrator first proposes regulations under this section establishing emissions standards applicable to such source.

"(5) The term 'hazardous air pollutant' means any air pollutant listed pursuant to subsection (b).

"(6) For purposes of this section, the term 'adverse environmental effects' means any threat of significant adverse effects, which may reasonably be anticipated, to wildlife, aquatic life, or other natural resources including disruption of local ecosystems, impacts on populations of endangered or threatened species, significant degradation of environmental quality over broad areas, or other comparable effects.

"(7) The term 'electric utility steam generating unit' means any fossil fuel fired steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than twenty-five megawatts electrical output to any utility power distribution system.

"(8) The term 'owner or operator' means any person who owns, leases, operates, controls, or supervises a stationary source.

"(9) The term 'existing unit' means any stationary source other than a new source.

"(10) The term 'carcinogenic effect' shall have the meaning provided by the Administrator under Guidelines for Carcinogenic Risk Assessment.

"(b) LIST OF POLLUTANTS.—

"(1) The Congress establishes for purposes of this section a list of hazardous air pollutants as follows:

CAS number	Chemical name
75070	Acetaldehyde
60355	Acetamide
75058	Acetonitrile
98862	Acetophenone
53963	2-Acetylaminofluorine
107028	Acrolein
79061	Acrylamide
79107	Acrylic acid
107131	Acrylonitrile
107051	Allyl chloride
92671	4-Aminobiphenyl
7664417	Ammonia
62533	Aniline
90040	o-Anisidine
1332214	Asbestos
71432	Benzene (including benzene from gasoline)
92875	Benzidine
98077	Benzotrichloride
100447	Benzyl chloride
92524	Biphenyl
117817	Bis(2-ethylhexyl)phthalate (DEHP)
542881	Bis(chloromethyl)ether
75252	Bromoform
106990	1,3-Butadiene
156627	Calcium cyanamide
105602	Caprolactam
133062	Captan
63252	Carbaryl
75150	Carbon disulfide
56235	Carbon tetrachloride
463581	Carbonyl sulfide
120809	Catechol
133904	Chloramben
57749	Chlordane
7782505	Chlorine
79118	Chloroacetic acid
532274	2-Chloroacetophenone
108907	Chlorobenzene
510156	Chlorobenzilate
67663	Chloroform
107302	Chloromethyl methyl ether
126998	Chloroprene
1319773	Cresols/Cresylic acid (isomers and mixture)
95487	o-Cresol
108394	m-Cresol
106445	p-Cresol
98828	Cumene
94757	2,4-D, salts and esters
3547044	DDE
334883	Diazomethane
132649	Dibenzofurans
96128	1,2-Dibromo-3-chloropropane
84742	Dibutylphthalate
106467	1,4-Dichlorobenzene(p)
91941	3,3-Dichlorobenzidene
111444	Dichloroethyl ether (Bis(2-chloroethyl)ether)
542756	1,3-Dichloropropene
62737	Dichlorvos
111422	Diethanolamine
121697	N,N-Diethyl aniline (N,N-Dimethylaniline)
64675	Diethyl sulfate
119904	3,3-Dimethoxybenzidine
60117	Dimethyl aminoazobenzene
119937	3,3'-Dimethyl benzidine
79447	Dimethyl carbamoyl chloride
68122	Dimethyl formamide
57147	1,1-Dimethyl hydrazine
131113	Dimethyl phthalate
77781	Dimethyl sulfate
534521	4,6-Dinitro-o-cresol, and salts
51285	2,4-Dinitrophenol
121142	2,4-Dinitrotoluene
123911	1,4-Dioxane (1,4-Diethyleneoxide)
122667	1,2-Diphenylhydrazine
106898	Epichlorohydrin (1-Chloro-2,3-epoxypropane)
106887	1,2-Epoxybutane
140885	Ethyl acrylate
100414	Ethyl benzene
51796	Ethyl carbamate (Urethane)
75003	Ethyl chloride (Chloroethane)
106934	Ethylene dibromide (Dibromoethane)
107062	Ethylene dichloride (1,2-Dichloroethane)
107211	Ethylene glycol
151564	Ethylene imine (Aziridine)
75218	Ethylene oxide
96457	Ethylene thiourea
75343	Ethylidene dichloride (1,1-Dichloroethane)
50000	Formaldehyde
76448	Heptachlor
118741	Hexachlorobenzene
87683	Hexachlorobutadiene
77474	Hexachlorocyclopentadiene
67721	Hexachloroethane
822060	Hexamethylene-1,6-diisocyanate
680319	Hexamethylphosphoramide
110543	Hexane
302012	Hydrazine
7647010	Hydrochloric acid
7664393	Hydrogen fluoride (Hydrofluoric acid)
7783064	Hydrogen sulfide
123319	Hydroquinone
78591	Isophorone
58899	Lindane (all isomers)
108316	Maleic anhydride
67561	Methanol
72435	Methoxychlor
74839	Methyl bromide (Bromomethane)
74873	Methyl chloride (Chloromethane)
71556	Methyl chloroform (1,1,1-Trichloroethane)
78933	Methyl ethyl ketone (2-Butanone)
60344	Methyl hydrazine
74884	Methyl iodide (Iodomethane)
108101	Methyl isobutyl ketone (Hexone)
624839	Methyl isocyanate
80626	Methyl methacrylate
1634044	Methyl tert butyl ether
101144	4,4-Methylene bis(2-chloroaniline)
75092	Methylene chloride (Dichloromethane)
101688	Methylene diphenyl diisocyanate (MDI)
101779	4,4'-Methylenedianiline
91203	Naphthalene
98953	Nitrobenzene
92933	4-Nitrobiphenyl
100027	4-Nitrophenol
79469	2-Nitropropane
684935	N-Nitroso-N-methylurea
62759	N-Nitrosodimethylamine
59892	N-Nitrosomorpholine
56382	Parathion
82688	Pentachloronitrobenzene (Quintobenzene)
87865	Pentachlorophenol
108952	Phenol
106503	p-Phenylenediamine
75445	Phosgene
7803512	Phosphine
7723140	Phosphorus
85449	Phthalic anhydride
1336363	Polychlorinated biphenyls (Aroclors)
1120714	1,3-Propane sultone
57578	beta-Propiolactone
123386	Propionaldehyde
114261	Propoxur (Baygon)
78875	Propylene dichloride (1,2-Dichloropropane)
75569	Propylene oxide
75558	1,2-Propylenimine (2-Methyl aziridine)
91225	Quinoline
106514	Quinone
100425	Styrene
96093	Styrene oxide
1746016	2,3,7,8-Tetrachlorodibenzo-p-dioxin
79345	1,1,2,2-Tetrachloroethane
127184	Tetrachloroethylene (Perchloroethylene)
7550450	Titanium tetrachloride
108883	Toluene
95807	2,4-Toluene diamine
584849	2,4-Toluene diisocyanate
95534	o-Toluidine

CAS number	Chemical name
8001352	Toxaphene (chlorinated camphene)
120821	1,2,4-Trichlorobenzene
79005	1,1,2-Trichloroethane
79016	Trichloroethylene
95954	2,4,5-Trichlorophenol
88062	2,4,6-Trichlorophenol
121448	Triethylamine
1582098	Trifluralin
540841	2,2,4-Trimethylpentane
108054	Vinyl acetate
593602	Vinyl bromide
75014	Vinyl chloride
75354	Vinylidene chloride (1,1-Dichloroethylene)
1330207	Xylenes (isomers and mixture)
95476	o-Xylenes
108383	m-Xylenes
106423	p-Xylenes
0	Antimony Compounds
0	Arsenic Compounds (inorganic including arsine)
0	Beryllium Compounds
0	Cadmium Compounds
0	Chromium Compounds
0	Cobalt Compounds
0	Coke Oven Emissions
0	Cyanide Compounds [1]
0	Glycol ethers [2]
0	Lead Compounds
0	Manganese Compounds
0	Mercury Compounds
0	Mineral fibers [3]
0	Nickel Compounds
0	Polycyclic Organic Matter [4]
0	Radionuclides (including radon) [5]
0	Selenium Compounds

Note.—For all listings above which contain the word "compounds" and for glycol ethers, the following applies: Unless otherwise specified, these listings are defined as including any unique chemical substance that contains the named chemical (i.e., antimony, arsenic, etc.) as part of that chemical's infrastructure.

[1] X'CN where X = H' or any other group where a formal dissociation may occur. For example KCN or $Ca(CN)_2$

[2] includes mono- and di- ethers of ethylene glycol, diethylene glycol, and triethylene glycol $R-(OCH2CH2)_n-OR'$ where
n = 1, 2, or 3
R = alkyl or aryl groups
R' = R, H, or groups which, when removed, yield glycol ethers with the structure: $R-(OCH2CH)_n-OH$
Polymers are excluded from the glycol category

[3] includes glass microfibers, glass wool fibers, rock wool fibers, and slag wool fibers, each characterized as "respirable" (fiber diameter less than 3.5 micrometers) and possessing an aspect ratio (fiber length divided by fiber diameter) greater than or equal to 3, as emitted from production of fiber and fiber products.

[4] includes organic compounds with more than one benzene ring, and which have a boiling point greater than or equal to 100°C

[5] a type of atom which spontaneously undergoes radioactive decay.

"(2) The Administrator shall, from time to time, but not less often than every five years, review and revise the list established by paragraph (1) adding pollutants which present, or may present, through inhalation or other routes of exposure, a threat of adverse human health effects (including, but not limited to, substances which are known to be, or may reasonably be anticipated to be, carcinogenic, mutagenic, teratogenic, neurotoxic, which cause reproductive dysfunction, or which are acutely or chronically toxic but not including effects for which a pollutant has been listed pursuant to section 108 of this Act) or adverse environmental effects whether through ambient concentrations, bioaccumulation, deposition, or otherwise, but not including releases subject to regulation under section 129 as a result of emissions to the air. No substance, practice, process, or activity regulated under title V of this Act shall be subject to regulation under this section solely due to its adverse effects on the environment.

"(3)(A) Any person may petition the Administrator to modify the list established by paragraph (1) by adding or deleting a substance or, in case of listed pollutants without CAS numbers (other than coke oven emissions, mineral fibers, or polycyclic organic matter) removing certain unique chemical substances. Any such petition shall include a showing by the petitioner that there is adequate data on the health effects of the pollutant or other evidence adequate to support the petition. Within twelve months after receipt of a petition the Administrator shall either grant the petition or publish a statement of the reasons for not granting the petition. The Administrator may not deny a petition on the basis of inadequate resources or time for review.

"(B) The Administrator shall add a substance to the list upon a showing by the petitioner or on the Administrator's own determination that the substance is an air pollutant and that emissions, ambient concentrations, bioaccumulation or deposition of the substance are known to cause or may reasonably be anticipated to cause adverse effects to human health or adverse environmental effects, or that the substance is an air pollutant that qualifies, as a result of emissions to the air of such pollutant, for addition to the list established under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986.

"(C) The Administrator shall remove a substance from the list upon a showing by the petitioner or on the Administrator's own determination that there is adequate data on the health and environmental effects of substance to determine that emissions, ambient concentrations, bioaccumulation or deposition of the substance may not reasonably be anticipated to cause any adverse effects to human health or adverse environmental effects, or that the substance qualifies for deletion from the list established under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986. Action by the Administrator pursuant to section 313(d)(3) of such Act prior to the date of enactment of this paragraph shall constitute a deletion for the purposes of this section.

"(D) The Administrator shall remove one or more unique chemical substances that contain a listed hazardous air pollutant not having a CAS number (other than coke oven emissions, mineral fibers, or polycyclic organic matter) upon a showing by the petitioner or on the Administrator's own determination that such unique chemical substances that contain the named chemical of such listed hazardous air pollutant meets the removal requirements of subparagraph (C). The Administrator must grant or deny a removal petition prior to promulgating any emission standards pursuant to subsection (d) applicable to any source category or subcategory of a listed hazardous air pollutant without a CAS number listed under subsection (b) for which a removal petition has been filed within ninety days of the enactment of this subparagraph.

"(4) If the Administrator determines that information on the health or environmental effects of a substance is not sufficient to make a determination required by this subsection, the Administrator may use the authorities of the Comprehensive Environmental Response, Compensation, and Liability Act and other information-gathering authorities under such Act and other laws administered by the Agency to acquire such information.

"(5) The Administrator may establish test measures and other analytic procedures for monitoring and measuring emissions, ambient concentrations, deposition, and bioaccumulation of hazardous air pollutants.

"(6) Not later than twelve months after the date of enactment of the Clean Air Act Amendments of 1990 or within six months of adding any substance to the list established by paragraph (1), the Administrator shall establish significant emission levels for any listed substance for purposes of the preconstruction requirements of section 165.

"(7) The Administrator may not list elemental lead as a hazardous air pollutant pursuant to this subsection.

"(c) LIST OF SOURCE CATEGORIES.—

"(1) Not later than twelve months after the date of enactment of this paragraph and after notice and opportunity for public comment, the Administrator shall publish (and from time to time revise) a list including all categories and subcategories of major sources of hazardous air pollutants which shall, to the extent practicable, be consistent with the list of source categories established pursuant to section 111 and part C of this Act.

"(2) The Administrator shall list under this subsection and designate for regulation under subsection (d) each category or subcategory of area sources which the Administrator finds presents a threat of adverse effects to human health or the environment (by such sources individually or in the aggregate) warranting regulation under this section except that the Administrator shall not list oil and gas production and exploration wells (with its associated equipment) as an area source category under this section.

"(3) In addition to those categories and subcategories of sources designated for regulation pursuant to paragraphs (1) and (2), the Administrator may at any time designate additional categories and subcategories of sources of hazardous air pollutants according to the same criteria for designation applicable under such paragraphs and at the time of designation shall establish a date for the promulgation of emissions standards under subsection (d).

"(4) At the time of setting a standard for any category or subcategory of sources pursuant to subsection (d), (f), or (g), the Administrator shall also establish a minimum emissions rate for each hazardous air pollutant emitted by sources in the category or subcategory reflecting the criteria for listing a hazardous air pollutant established by subsection (b)(2). All sources in the category or subcategory emitting more than the minimum emissions rate for any hazardous air pollutant shall be subject to standards promulgated under subsection (d), (f), or (g). In no event shall the minimum emissions rate be greater than ten tons per year for any one hazardous air pollutant or twenty-five tons per year for any combination of such pollutants.

"(5) Notwithstanding the provisions of paragraph (4), the Administrator may establish a minimum emissions rate of more than ten tons for a category or subcategory and a pollutant for which a health effects threshold can be established, *Provided:* That the minimum emissions rate assures, with an ample margin of safety, such threshold will not be exceeded within the vicinity of the sources in the category and that no adverse environmental effects will occur as the result of emissions from the sources individually or in combination with emissions from other similar sources.

"(6) With respect to alkylated lead compounds, polycyclic organic matter, hexachlorobenzene, mercury, polychlorinated biphenyls, 2,3,7,8-tetrachlorodibenzofurans and 2,3,7,8-tetrachlorodibenzo-p-dioxin, the Administrator shall establish minimum emissions rates for categories and subcategories of sources assuring that sources accounting for not less than 90 per centum of the aggregate emissions of each such pollutant are subject to standards under subsection (d)(2) or (d)(4).

"(7) Notwithstanding the provisions of paragraph (1), the Administrator may delete from the list any source category for which—

"(A) the hazardous air pollutants emitted by sources in the category (in quantities greater than ten tons per year for any pollutant or twenty-five tons per year for any combination of pollutants from a source) are all known, probable or possible human carcinogens with no other adverse health or environmental effect; and

"(B) no source in the category emits a hazardous air pollutant in quantities which may cause a lifetime risk of carcinogenic effects greater than one in one million to the individual in the population who is most exposed to emissions of such pollutant from a source in the category.

"(8) Where the sole reason for the inclusion of a source category on the list required under this subsection is the emission of a unique chemical substance, the Administrator shall withdraw the source category from the list if it is approprate because of action taken under either subparagraphs (C) or (D) of section (b)(3).

"(d) EMISSIONS STANDARDS.—

"(1) The Administrator shall promulgate emissions standards for every category or subcategory of sources of hazardous air pollutants designated for regulation pursuant to subsection (c). The Administrator may distinguish among classes, types and sizes of sources within a category or subcategory in establishing such standards, except that, there shall be no delay in the compliance date for any standard applicable to any source under subsection (i) as the result of the authority provided by this sentence.

"(2) Emissions standards promulgated under this subsection and applicable to new or existing sources of hazardous air pollutants shall require the maximum degree of reduction in emissions of each hazardous air pollutant emitted by any source in the category or subcategory (including a prohibition on such emissions, where achievable) that the Administrator, taking into consideration the cost of achieving such emissions reduction, and any non-air-quality health and environmental impacts and energy requirements, determines is achievable for new or existing sources in the category or subcategory to which such emissions standard applies, through application of measures, processes, methods, systems or techniques including, but not limited to, measures which—

"(A) reduce the volume of such pollutants through process changes, substitution of materials, or other modifications,

"(B) enclose systems or processes to eliminate emissions,

"(C) collect, capture, or treat such pollutants when released from a process, stack, storage, or fugitive emissions point,

"(D) are design, equipment, work practice, or operational standards (including requirements for operator training or certification as provided in subsection (h)), or

"(E) are a combination of the above:

Provided, however, That none of the measures described in subparagraphs (A) through (D) shall compromise any patent or trademark or require the release of any trade secret or other intellectual property right.

"(3) The degree of reduction in emissions that is deemed achievable for new sources in a category or subcategory shall not be less stringent than the most stringent emissions level that is achieved in practice by a source in the same category or subcategory, as determined by the Administrator, and may be more stringent where feasible. Emissions standards under this subsection for existing sources in a category or subcategory may be less stringent than standards for new sources in a similar category or subcategory: *Provided,* That, the emissions limitation for existing sources in the category or subcategory shall not be less stringent, and may be more stringent than—

"(A) the average emissions limitation achieved by the best performing 10 per centum of the existing sources (for which the Administrator has emissions information) in the category or subcategory for categories or subcategories with thirty or more sources, or

"(B) the average emissions limitation achieved by the best performing three sources (for which the Administrator has emissions information: *Provided,* That the Administrator has made reasonable efforts to obtain such information) in the category or subcategory for categories or subcategories with fewer than thirty sources.

The Congress finds that an average reduction of 90 per centum (95 per centum in the case of particulates) from uncontrolled levels is an appropriate benchmark for emissions standards applicable to existing sources in a category or subcategory under this subsection.

"(4)(A) With respect to pollutants for which a health threshold can be established, the Administrator may consider such threshold level, with an ample margin of safety, when establishing emissions standards under this subsection.

"(B) Standards for sources of ammonia shall be established pursuant to this subsection within the time established by subsection (e)(1)(C). The Administrator shall establish a health threshold for ammonia before standards are required to be promulgated pursuant to subsection (e)(1)(C). Emission standards for sources of ammonia shall be established at levels which protect public health with an ample margin of safety.

"(5) With respect only to categories and subcategories of area sources listed pursuant to subsection (c)(2), the Administrator is authorized, in addition to the authorities provided in paragraph (2) and subsections (f) and (g), to promulgate standards or requirements applicable to sources in such categories or subcategories which provide for the use of cost-effective and generally achievable control technologies or management practices by such sources to reduce emissions of hazardous air pollutants.

"(6) The Administrator shall review, and revise as necessary (taking into account developments in practices, processes, and control technologies), emissions standards promulgated under this section no less often than every seven years.

"(7) No emissions standard or other requirement promulgated under this section shall be interpreted, construed or applied to diminish or replace the requirements of a more stringent emission limitation or other applicable requirement established pursuant to section 111, part C, section 172(b) (3) or (6), or other authority of this Act or a standard issued under State authority.

"(8) Not later than two years after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate regulations establishing emission standards for coke oven facilities. Such regulations shall assure that such sources will not exceed—

"(i) 8 per centum leaking doors;

"(ii) 1 per centum leaking lids;

"(iii) 5 per centum leaking offtakes; and

"(iv) sixteen seconds visible emissions per charge, as modified by any necessary technical corrections.

"(9) Notwithstanding the provisions of paragraph (2), for categories and subcategories of sources of hazardous air pollutants engaged in mining, extraction, beneficiation, and processing of nonferrous ores, concentrates, minerals, metals, and related in-process materials, the Administrator shall not consider the substitution of, or other changes in, metal- or mineral-bearing raw materials that are used as feedstocks or material inputs, or metal- or mineral-bearing materials processed or derived from such feedstocks or materials in setting emissions standards, work practice standards, operating standards or other prohibitions, requirements or limitations under this section for such categories and subcategories. The prohibition of the preceding sentence shall not apply to the substitution, modification, or changes of chemicals (not including metal- or mineral-bearing materials) used in mining, extraction, beneficiation, or processing of nonferrous ores, concentrates, minerals, metals, and related in-process materials which is necessary to reduce air emissions of such chemicals and for which substitutes that are safe and effective in performing the intended function of the chemical to be substituted are reasonably available.

"(10) Emissions standards promulgated under this subsection shall be effective upon promulgation.

"(11) No standard for radionuclide emissions from facilities licensed by the Nuclear Regulatory Commission (or an Agreement State) is required to be promulgated under this section if the Administrator determines, after consultation with the Nuclear Regulatory Commission, that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act provides an ample margin of safety to protect the public health. Nothing in this subsection shall preclude or deny the right of any State or political subdivision thereof to adopt or enforce any standard or limitation respecting emissions of radionuclides which is more stringent than the standard or limitation in effect under section 111 or section 112.

"(e) SCHEDULE FOR STANDARDS AND REVIEW.—

"(1) The Administrator shall promulgate regulations establishing emissions standards for categories and subcategories of sources designated for regulation pursuant to subsection (c) as expeditiously as practicable, assuring that—

"(A) emissions standards for categories or subcategories of sources of acrylonitrile, benzene, 1,3-butadiene, cadmium, carbon tetrachloride, chloroform, chromium, ethylene dichloride, ethylene oxide, methylene chloride, perchloroethylene, trichloroethylene, and coke oven emissions are promulgated not later than twenty-four months after the date of enactment of the Clean Air Act Amendments of 1990;

"(B) emissions standards for 25 per centum of the categories and subcategories designated pursuant to subsection (c) (1) and (2) shall be promulgated not later than four years after the date of enactment of the Clean Air Act Amendments of 1990;

"(C) emissions standards for 50 per centum of the categories or subcategories designated pursuant to subsection (c) (1) and (2) shall be promulgated not later than six years after the date of enactment of the Clean Air Act Amendments of 1990; and

"(D) emissions standards for all categories and subcategories designated for regulation pursuant to subsection (c) (1) and (2) shall be promulgated not later than ten years after the date of enactment of the Clean Air Act Amendments of 1990.

"(2) In determining priorities for scheduling the promulgation of standards pursuant to subparagraphs (1) (B), (C), and (D), the Administrator shall consider—

"(A) the known or anticipated adverse effects of such pollutants on human health and the environment;

"(B) exposure to and the location of major sources of such pollutants including risks to individuals most exposed and the consequent urgency of a national standard;

"(C) the quantity of hazardous air pollutants that sources in each category or subcategory emit; and

"(D) the efficiency of grouping the categories or subcategories according to the pollutants emitted or the processes or technologies used.

"(3) Not later than twenty-four months after the date of enactment of the Clean Air Act Amendments of 1990 and after opportunity for comment, the Administrator shall publish a schedule establishing a date for the promulgation of emissions standards for each category and subcategory of sources listed pursuant to subsection (c) (1) and (2) which shall be consistent with the requirements of paragraphs (1) and (2). The determination of priorities for the promulgation of standards pursuant to this paragraph is not a rulemaking and shall not be subject to judicial review, except that, failure to promulgate any standard pursuant to the schedule established by this paragraph shall be subject to review under section 304 of this Act.

"(4) If, under other provisions of this Act, the Administrator is proposing or promulgating requirements applicable to a class of sources similar to a category or subcategory listed pursuant to this section, the Administrator may simultaneously propose or promulgate emissions standards under this section for such category or subcategory notwithstanding the priorities established by paragraph (2). Nothing in this paragraph shall be construed or applied to stay a deadline for control requirements otherwise applicable under this or other law.

"(5)(A) The Administrator shall conduct, and transmit to the Congress not later than three years after the date of enactment of this paragraph, a study of emissions of hazardous air pollutants which are particulates from electric utility steam generation units, considering the rate and mass of such emissions, the health and environmental effects of such emissions, technologies which are available to control such emissions and the costs of such technologies.

"(B) The Administrator shall conduct, and transmit to the Congress not later than four years after the date of enactment of this paragraph, a study of mercury emissions from electric utility steam generating units considering the rate and mass of such emissions, the health and environmental effects of such emissions, technologies which are available to control such emissions, and the costs of such technologies.

"(C) The National Institute of Environmental Health Sciences shall conduct, and transmit to the Congress not later than four years after the date of enactment of this paragraph, a study to determine the threshold level of mercury.

"(D) Notwithstanding the requirements of subsection (e), standards under subsection (d) for the control of emissions of hazardous air pollutants which are particulates and mercury emissions from electric utility steam generation units shall be promulgated not sooner or later than five years after the date of enactment of this paragraph. The studies required by subparagraphs (A), (B), and (C) shall be placed in the relevant docket for any rulemaking that would establish emissions standards under subsection (d) for particulates or mercury from electricity utility steam generating units and shall be considered by the Administrator, along with other public comments, before any such standard is promulgated. Such standards shall be consistent with the requirements of subsection (d) and take into account such information on cost and feasibility as is contained in the study required by subparagraph (B). Electric utility steam generating units shall be in compliance with such standards not later than eight years after the date of enactment of this paragraph.

"(E) Notwithstanding the provisions of this section, the Administrator shall not be required to promulgate standards to control emissions of organic or inorganic acid gases from electric utility steam generating units unless the Administrator finds that such standards are warranted to protect public health or the environment. Nothing in this section shall be construed to authorize the Administrator to promulgate standards requiring use of flue gas stream scrubbing technology by electric utility steam generating units for the control of hazardous air pollutants.

"(F) Notwithstanding the provisions of this section, the Administrator shall not promulgate standards to control emissions of any hazardous air pollutant, other than mercury, which is emitted in gaseous form from electric utility steam generating units, if the emissions of such pollutant are less than ten tons per year.

"(G) Emissions of organic and inorganic acid gases shall be included in determining whether an electric utility steam generating unit is a major source of hazardous air pollutants which are particulates of mercury under this section.

"(6) Notwithstanding the provisions of paragraph (1), the Administrator shall promulgate standards pursuant to subsection (d) applicable to publicly owned treatment works (as defined in title II of the Federal Water Pollution Control Act) not earlier or later than five years after the date of enactment of this paragraph.

"(7) The Administrator shall consider, but need not adopt, the recommendations contained in the report of the National Academy of Sciences prepared pursuant to subsection (r) and the views of the Science Advisory Board, with respect to such report. Prior to the evaluation of remaining risks pursuant to paragraph (8), and after notice and opportunity for comment, the Administrator shall publish revised Guidelines for Carcinogenic Risk Assessment or a detailed explanation of the reasons that any recommendations contained in the report of the National Academy of Sciences will not be implemented. The publication of such revised Guidelines shall not be a final Agency action for purposes of section 307.

"(8)(A) If legislation recommended by the Risk Assessment and Management Commission established by subsection (u) in accordance with this section or alternative legislation providing for the regulation of risks to public health resulting from exposure to emissions of hazardous air pollutants after application of controls in accordance with subsection (d) is not enacted by a date five years after the date of enactment of the Clean Air Act Amendments of 1990, the provisions of this paragraph and subsections (f) and (i)(4) through (i)(8) shall become effective on such date.

"(B) Not later than three years after the initial promulgation of emissions standards for a category or subcategory of sources pursuant to subsection (d), the Administrator shall commence an evaluation of the risks to human health and the environment resulting from emissions of hazardous air pollutants by sources in the category or subcategory remaining after application of such standards. If the Administrator finds as the result of such evaluation, that emissions of hazardous air pollutants from sources in the category or subcategory (or portion thereof), individually or in the aggregate, after application of the prescribed standards, present a significant risk of adverse effects on public health or a threat of adverse environmental effects, the Administrator shall complete, within two years after the date of commencement, such evaluation and revise standards applicable to such category or subcategory (or portion thereof) using the authorities of subsection (f) or (g), as appropriate.

"(C) The Administrator shall take such steps as are necessary, including studies pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, to assure that adequate data on the health and environmental effects of any hazardous air pollutant emitted by sources in a category or subcategory subject to review under this paragraph are available at the commencement of the evaluation.

"(D) To the extent that standards promulgated under subsection (d) do not eliminate lifetime risks of carcinogenic effects greater than one in one million to the individual in the population who is most exposed to emissions of a pollutant (or stream of pollutants) from a source in the category or subcategory (as determined according to Guidelines for Carcinogenic Risk Assessment published by the Administrator), the Administrator shall use the authorities of subsection (f) to revise the standards applicable to such pollutant (or stream of pollutants) and categories or subcategories. To the extent that standards promulgated under subsection (d) do not reduce emissions to a level at or below the threshold for adverse health effects, with an ample margin of safety, for pollutants other than carcinogens, the Administrator shall use the authorities of subsection (g) to revise the standards applicable to such pollutants and categories or subcategories. With respect to any hazardous air pollutant which is both a carcinogen and causes adverse health effects for which a threshold exists, the Administrator shall establish standards pursuant to subsection (f) for sources of such pollutant, unless a more stringent standard than would be promulgated pursuant to subsection (f)(1)(A) is necessary to assure that such threshold, with an ample margin of safety, will not be exceeded. The Administrator shall in any such case establish a standard under subsection (g) in lieu of the standard which would be applicable under (f)(1)(A).

"(E) The Administrator shall not be required to conduct any review under this paragraph or promulgate emissions limitations under subsections (f) or (g) for any category or subcategory of area sources which is listed pursuant to subsection (c)(2)

and for which an emissions standard is promulgated pursuant to subsection (d)(5).

"(F) In establishing standards for the control of unique chemical substances of listed pollutants without CAS numbers under subsection (f) or (g) the Administrator shall establish such standards with respect to the health and environmental effects of the substances actually emitted by sources and direct transformation byproducts of such emissions in the categories or subcategories.

"(G)(i) Any recommendation of the Risk Assessment and Management Commission established by subsection (u) which includes proposed amendments to this section shall be transmitted in legislative form as a special message to the Speaker of the House of Representatives and to the President of the Senate not later than forty-two months after the date of enactment of this paragraph.

"(ii) Any bill introduced with respect to a special message shall be referred to the Committee on Environment and Public Works in the Senate and the Committee on Energy and Commerce in the House of Representatives.

"(iii)(I) If the committee to which a bill with respect to a special message has been referred has not reported it at the end of sixty calendar days of continuous session of the Congress after its introduction, it is in order to move to discharge the committee from further consideration of the bill.

"(II) A motion to discharge may be made only by an individual favoring the bill, may be made only if supported by one-fifth of the Members of the House involved (a quorum being present), and is highly privileged in the House and privileged in the Senate (except that it may not be made after the committee has reported a bill with respect to the special message); and debate thereon shall be limited to not more than one hour, the time to be divided in the House equally between those favoring and those opposing the bill or resolution, and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(iv)(I) When the Energy and Commerce Committee of the House of Representatives has reported, or has been discharged from further consideration of, a bill with respect to the special message, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the bill. The motion shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(II) Debate on any bill with respect to the special message shall be limited to not more than ten hours, which shall be divided equally between those favoring and those opposing the bill. A motion further to limit debate shall not be debatable.

"(III) Motions to postpone, made with respect to the consideration of a bill with respect to a special message, and motions to proceed to the consideration of other business, shall be decided without debate.

"(IV) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to a bill with respect to a special message shall be decided without debate.

"(V) Except to the extent specifically provided in the preceding provisions of this subsection, consideration of any bill with respect to a special message and amendments thereto (or any conference report thereon) shall be governed by the Rules of the House of Representatives applicable to other bills and resolutions, amendments, and conference reports in similar circumstances.

"(v)(I) Debate in the Senate on any bill with respect to a special message, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than fifteen hours. The time shall be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

"(II) Debate in the Senate on any amendment to a bill with respect to a special message shall be limited to two hours, to be equally divided between, and controlled by, the mover and the manager of the bill. Debate on any amendment to an amendment, to such a bill, and debate on any debatable motion or appeal in connection with such a bill shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the bill, except that in the event the manager of the bill is in favor of any such amendment, motion, or appeal, the time in opposition thereto, shall be controlled by the minority leader or the minority leader's designee. No amendment that is not germane to the provisions of a bill with respect to a special message shall be received. Such leaders, or either of them, may, from the time under their control on the passage of a bill with respect to a special message, allot additional time to any Senator during the consideration of any amendment, debatable motion, or appeal.

"(III) A motion to further limit debate is not debatable. A motion to recommit (except a motion to recommit with instructions to report back within a specified number of days, not to exceed three, not counting any day on which the Senate is not in session) is not in order. Debate on any such motion to recommit shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the bill.

"(IV) The conference report on a bill with respect to a special message shall be in order in the Senate at any time after the third day (excluding Saturdays, Sundays, and legal holidays) following the day on which such a conference report is reported and is available to Members of the Senate. A motion to proceed to the consideration of the conference report may be made even though a previous motion to the same effect has been disagreed to.

"(V) During the consideration of the Senate of the conference report on any bill with respect to a special message, debate shall be limited to two hours, to be equally divided between, and controlled by, the majority leader and minority leader or their designees. Debate on any debatable motion or appeal related to the conference report shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the conference report.

"(VI) Should the conference report be defeated, debate on any request for a new conference and the appointment of conferees shall be limited to one hour, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or minority leader's designee, and should any motion be made to instruct the conferees before the conferees are named, debate on such motion shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report. Debate on any amendment to any such instructions shall be limited to twenty minutes, to be equally divided between and controlled by, the mover and the manager of the conference report. In all cases when the manager of the conference report is in favor of any motion, appeal, or amendment, the time in opposition shall be under the control of the minority leader or the minority leader's designee.

"(VII) In any case in which there are amendments in disagreement, time on each amendment shall be limited to thirty minutes, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or the minority leader's designee. No amendment that is not germane to the provisions of such amendments shall be received.

"(vi) Beginning on the date one hundred and eighty calendar days following the submission of the report of the Risk Assessment and Management Commission established by subsection (u), a bill consisting of any draft legislation accompanying the report shall be privileged in both the House of Representatives and the Senate. In the Senate, such legislation shall be subject to a limitation of debate of fifteen hours, equally divided between the majority leader and the minority leader. Relevant amendments to the legislation shall be in order. At the conclusion of the fifteen-hour period, no intervening action shall be in order, and the bill shall be read a third time followed by a vote on final passage. This subparagraph is enacted as an exercise of the rulemaking power of the House of Representatives and of the Senate.

"(f) ADDITIONAL REGULATION OF CARCINOGENS.—

"(1) The Administrator is authorized to promulgate emissions standards under this subsection applicable to categories or subcategories of sources of any hazardous air pollutant which is a known, probable, or possible human carcinogen. For each such pollutant (or stream of pollutants containing carcinogens) the Administrator shall establish two simultaneously applicable standards including—

"(A) a standard which eliminates all lifetime risks of carcinogenic effects greater than one in ten thousand to the individual in the population who is most exposed to emissions of a pollutant (or stream of pollutants) from a source in the category or subcategory; and

"(B) a standard which eliminates all lifetime risks of carcinogenic effects greater than one in one million to the individual in the population who is most exposed to emissions of a pollutant (or stream of pollutants) from a source in the category or subcategory.

No consideration of cost, cost effectiveness, economic, energy, or other factors or technological feasibility shall be included in the determination of the appropriate level of any emissions standard under this subsection.

"(2) Any standards promulgated under this subsection shall be effective upon the date of promulgation.

"(g) STANDARDS TO PROTECT HEALTH AND THE ENVIRONMENT.—

"(1) The Administrator is authorized to promulgate emissions standards under this

subsection applicable to categories or subcategories of sources of any hazardous air pollutant which is not a carcinogen. The Administrator shall establish any emission standard or standards under this subsection at the level which, in the judgment of the Administrator, provides an ample margin of safety to protect the public health, unless a more stringent standard is required to protect the environment. No consideration of costs, cost effectiveness, economic, energy, or other factors or technological feasibility shall be included in the determination of the appropriate level of any emission standard or the margin of safety to protect the public health under this subsection.

"(2) Any emission standard established pursuant to this subsection shall become effective upon promulgation.

"(h) WORK PRACTICE STANDARDS AND OTHER REQUIREMENTS.—

"(1)(A) In addition to any numerical emissions limitation established under this section, the Administrator is authorized to promulgate a design, equipment, work practice, or operational standard (including requirements for operator training or certification), or combination thereof, applicable to sources in categories or subcategories listed pursuant to subsection (c) and consistent with the provisions of subsection (d), (f), or (g). The Administrator shall promulgate such standards whenever it is not feasible to prescribe or enforce an emission standard for a category or subcategory for control of hazardous air pollutants (or a stream of such pollutants). In the event the Administrator promulgates a design or equipment standard under this paragraph, the Administrator shall include as part of such standard such requirements as will assure the proper operation and maintenance of any such element of design or equipment.

"(B) For the purpose of this paragraph, the phrase 'not feasible to prescribe or enforce an emission standard' means any situation in which the Administrator determines that (i) a pollutant (or stream of pollutants) listed pursuant to subsection (b) cannot be emitted through a conveyance designed and constructed to emit or capture such pollutant, or that any requirement for, or use of, such a conveyance would be inconsistent with any Federal, State, or local law, or (ii) the application of measurement methodology to a particular category or subcategory of sources is not practicable due to technological and economic limitations.

"(C) If after notice and opportunity for public hearing, any person establishes to the satisfaction of the Administrator that an alternative means of emission limitation will achieve a reduction in emissions of any air pollutant (or stream of pollutants) at least equivalent to the reduction in emissions of such pollutant achieved under the requirements of subparagraph (A), the Administrator shall permit the use of such alternative by the source for purposes of compliance with this section with respect to such pollutant.

"(D) Any standard promulgated under subsections (d), (f), or (g) shall include a numerical emissions limitation whenever it is feasible to promulgate and enforce a standard in such terms.

"(2) For the purposes of developing or assisting in the development of any standard, requirement, or regulation, conducting any study, or enforcing the provisions of this section, the Administrator (or a State with an approved program under subsection (l)) may require the owner or operator of any facility which emits air pollutants subject to this section or stores any substance subject to section 129 of this Act to monitor for the presence of such pollutant in the emissions (both point and nonpoint) from such source and in the ambient air within the vicinity of the facility, to install and maintain leak detection systems, and to keep records and make reports on the results of such monitoring and leak detection.

"(3)(A) Emissions standards promulgated pursuant to this section shall include, where appropriate, leak prevention, detection and correction requirements consistent with the provisions of subsection (d)(2) and may include monitoring, recordkeeping, reporting, vapor recovery, secondary containment, or other requirements, which shall be applicable to devices and systems (including pumps, compressors, valves, flanges, connectors, containers, and vessels) from which there may be emissions of any pollutant subject to this section.

"(B) Regulations under this paragraph may require the owner or operator of a source to carry out an annual audit and safety inspection to locate and correct all leaks and other preventable routine or episodic releases of any air pollutant subject to this section. The results of such inspection and the results of any other safety inspection, survey, or audit carried out with respect to the source shall be available to the Administrator, to the State in which the source is located, and to the public, consistent with the provisions of sections 322, 323, and 324 of the Emergency Planning and Community Right-to-Know Act of 1986.

"(4) Any design, equipment, work practice, or operational standard, audit or monitoring requirement or any combination thereof, described in this subsection shall be treated as an emission standard for purposes of the provisions of this Act (other than the provisions of this subsection).

"(i) SCHEDULE FOR COMPLIANCE.—

"(1) After the effective date of any emission standard, limitation, or regulation under subsection (d), (f), (g), or (h), no person may construct any new major source or reconstruct any existing major source subject to such emission standard, regulation or limitation unless the Administrator (or a State with a permit program approved under subsection (j)) determines that such source, if properly constructed and operated, will comply with the standard, regulation or limitation except that a source otherwise subject to subsection (f) or (g), may in the alternative, seek approval of an emissions limitation under paragraph (3) or (4), as appropriate.

"(2) After the effective date of any emissions standard, limitation or other requirement promulgated under this section, no person may operate any source in violation of such standard, limitation or regulation or an alternative emissions limitation established pursuant to paragraph (3) or (4), except in the case of an existing source, the Administrator shall establish a compliance date or dates for each category or subcategory of existing sources, which shall provide for compliance as expeditiously as practicable, but in no event later than three years after the effective date of such standard, except as provided in paragraphs (3) through (14).

"(3) With respect to standards established pursuant to subsection (g), the Administrator (or a State with an approved program) shall establish an alternative emissions limitation if the owner or operator of a source provides a site-specific health assessment, performed in accordance with regulations promulgated by the Administrator under paragraph (6). Such alternative emissions limitation shall be established to protect public health with an ample margin of safety (unless a more stringent limitation is necessary to protect the environment) based on the results of the site-specific health assessment.

"(4)(A) With respect to standards established pursuant to subsection (f), the Administrator (or a State with an approved program) shall, after consultation with the State in which the source is located, grant a source an alternative emissions limitation, if the Administrator (or the State) determines, based on a site-specific health assessment provided by the owner or operator of the source and other information prepared in accordance with rules issued under paragraph (6), that such alternative emissions limitation provides that the actual person living within the vicinity of the source who is most exposed to emissions of any hazardous air pollutant from the source will not experience an individual lifetime risk of carcinogenic effects exceeding one in ten thousand as the result of such exposure. No alternative emissions limitation applicable to a source and authorized by this paragraph shall be less stringent than an emission standard established pursuant to subsection (d) applicable to such source. Any alternative emissions limitation shall be reviewed at the time the permit for the source is renewed to assure that such controls and mitigation measures as are being employed continue to be effective.

"(B) An alternative emissions limitation established under this paragraph shall, to the extent possible using available technology and operational controls, reduce the expected risk of carcinogenic effects to the actual person living within the vicinity of the source most exposed to emissions of any hazardous air pollutant from the source to a level not exceeding one in one million. To the extent that such level cannot be achieved, the Administrator (or a State with an approved program) shall assure that all available technology and operational controls are employed and that the alternative emissions limitation is reviewed at the time the permit for the source is renewed to determine whether further technology and operational controls are available. The Administrator (or the State) may require the owner or operator of the source to conduct research and development on improved or more effective control technologies or management practices as a condition for any alternative emissions limitation or permit renewal established pursuant to this paragraph.

"(5)(A) Any request for an alternative emissions limitation under paragraph (3) or (4) shall be submitted within one year of the date on which an emission standard applicable to an existing source is promulgated pursuant to subsection (f) or (g). Any request for an alternative emissions limitation for any source shall include all supporting information as required by rule which is necessary for the Administrator (or the State with an approved program) to make a determination with respect to the eligibility of the source for an alternative emissions limitation. The site-specific health assessment submitted by the owner or operator of the source in support of a request for an alternative emission limitation shall comply with rules for preparing such health assessments which have been promulgated by the Administrator pursuant to paragraph (6).

"(B) The Administrator (or the State with an approved program) shall make a determination upon any request one year before the date of compliance established for the emissions standard promulgated pursuant to subsection (f) or (g) and the alternative emissions limitation shall be effective upon the date of compliance, except that the Administrator (or the State with an approved program) can provide the owner or operator of the source one additional year to comply with the alternative emissions limitation upon a showing by the owner or operator of the source that additional time is necessary to comply.

"(C) If a State has an approved program and initial authority to grant an alternative emissions limitation and a complete application has been timely filed by the owner or operator of the source, but the State has failed to act on such application, the Administrator shall review and approve or disapprove such application by a date not later than three years after the relevant standard has been promulgated. The Administrator may provide the source up to two years from the date an alternative emission limitation is established to comply with such limitation, but in no event longer than five years after the relevant standard was originally promulgated under subsection (f) or (g).

"(D) A new source subject to an emissions standard under subsection (f) or (g) shall be in compliance with any applicable alternative emissions limitation before operation of the source commences.

"(E) The Administrator shall review and approve or disapprove, after an opportunity for public comment, each alternative emissions limitation granted by a State to a source under this subsection which is less stringent than an emissions standard promulgated under subsection (f)(1)(A) and which would otherwise be applicable to such source. The Administrator's decision to approve or disapprove an alternative emissions limitation pursuant to this subparagraph shall not be subject to judicial review. Nothing in this subparagraph shall restrict the right of any person to judicial review of a permit.

"(6)(A) Not later than five years after the date of enactment of this paragraph, the Administrator shall, after notice and opportunity for public comment, promulgate rules for site-specific health assessments to be prepared in support of applications for alternative emissions limitations pursuant to paragraphs (3) and (4). In promulgating such regulations, the Administrator shall provide methods for submitting and including in the health assessment information including, but not limited to, configuration of the facility, actual meteorology and terrain of the site, dispersion modeling reflecting actual rates of operation of the source, direct and indirect exposure pathways, and typical lifestyles (including length of residency within the vicinity of the source) and patterns of activity of the residents of the area. To the extent that actual information is not submitted or governed by the last sentence of this subparagraph, the model used to conduct the health assessment shall include the default assumptions from the Agency's standard model. Regulations promulgated under this paragraph shall require use of unit risk factors for each hazardous air pollutant as determined by the Administrator, provide methods for estimating exposure for the actual person most exposed to emissions of any hazardous air pollutant from the source, specify dispersion modeling methodology and monitoring methods and require that all data collected in the assessment must be available for inspection by the Administrator (or the State with an approved program). For purposes of estimating exposure to any hazardous air pollutant from the source, exposure parameters with respect to lifestyles and activity patterns are to be based on information gathered by the Administrator concerning persons living under comparable socioeconomic conditions and reflecting expected exposure of one standard deviation above the mean level of exposure which would be expected for such persons.

"(B) The health assessments supporting applications for alternative emissions limitations under paragraph (3) or (4) shall identify the actual person most exposed to emissions of any hazardous air pollutant from the source and shall determine risks of carcinogenic effects to such person.

"(7) Each alternative emission limitation established pursuant to paragraph (3) or (4) shall be implemented through a permit under subsection (j). Prior to the issuance of any such permit, the Administrator (or the State with an approved program) shall publish a notice of the request for an alternative emissions limitation along with a brief analysis prepared by the Administrator (or the State) of the site-specific health assessment or site-specific health risk assessment provided by the owner or operator and make the analysis along with the health assessment available to the public (prior to the public hearing). The Administrator (or the State with an approved program) shall provide an opportunity to comment on the site-specific health assessment in writing and at a public hearing held within the vicinity of the source during the permit process. The notice of the hearing shall be published in a general circulation newspaper and include sufficient information as necessary to provide a reasonable explanation of the health assessment. The health assessment shall be made available to the public not less than 60 days before such hearing. The Administrator (or the State with an approved program) shall respond to any written comments received from the public on the health assessment at the time of permit issuance incorporating any alternative emissions limitation.

"(8)(A) With respect to standards promulgated pursuant to subsection (f)(1)(B) the Administrator (or a State acting pursuant to a program approved under subsection (l)) may grant an existing source a temporary exception from the standard, if the Administrator (or the State) determines, based on specific information provided by the owner or operator of the source and other information, that the standard cannot be achieved by the source using all available technology and operational controls and that the source will implement a risk-reduction program employing all such technology and controls. For purposes of this section, consideration of cost is implicit in the term 'available'. Controls which are so expensive that they force closure of the source or would severely impair its continuation as an economic entity are not 'available'. The Administrator (or the State) may require the owner or operator of the source to conduct research and development on improved or more effective control technologies or management practices as a condition for any temporary exception or permit renewal pursuant to this paragraph.

"(B) Any request for an exception under this paragraph shall be submitted within six months of the date of promulgation of the applicable standard and shall include all information necessary for the Administrator (or the State) to make a determination with respect to the eligibility of a source for an exception. The Administrator (or the State) shall review and approve or disapprove any request within one year of submittal. Any request failing to meet the requirements of this subparagraph shall be deemed denied.

"(C) An exception may only be granted under this paragraph, if the Administrator (or the State) has provided notice of the proposed exception and has provided an opportunity for public comment and a public hearing on the conditions of the proposed exception. The Administrator may review, on appeal by any person or on the Administrator's own motion, and reverse any exception granted by a State under this paragraph. The Administrator shall make a determination with respect to any appeal within one hundred and eighty days.

"(D) An exception granted under this paragraph shall be reviewed upon renewal of the permit for the source, and may be extended after a further determination subject to the same terms and conditions as applicable in the first instance.

"(9) The President may exempt any source from compliance with paragraph (1) or (2) for a period of not more than two years if the President finds that the technology to implement such standards is not available and the operation of such source is required for reasons of national security. An exemption under this paragraph may be extended for one or more additional periods, each period not to exceed two years. The President shall make a report to Congress with respect to each exemption (or extension thereof) made under this paragraph.

"(10)(A) The Administrator (or a State acting pursuant to a program approved under subsection (l)) shall exempt any existing source from an emissions standard promulgated pursuant to subsection (d) upon a showing by the owner or operator of such source that it has achieved a voluntary reduction of 90 per centum or more in emissions of hazardous air pollutants (95 per centum or more in the case of a pollutant which is a particulate) which are listed in subsection (e)(1)(A) from the source on or before the date three years after the date of enactment of this paragraph and has achieved a voluntary reduction of 90 per centum or more in emissions of all other hazardous air pollutants (95 per centum or more in the case of pollutants which are particulates) from the source on or before the date four years after the date of enactment of this paragraph.

"(B) The reduction shall be determined with respect to verifiable and actual emissions in a base year not earlier than calendar year 1985: *Provided,* That, there is no evidence that emissions in the base year are artificially or substantially greater than emissions in other years prior to implementation of emissions reduction measures. Emissions data satisfying at a minimum all requirements imposed pursuant to section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 shall be considered 'verifiable and actual' for the purpose of establishing base year emissions.

"(C) For each source granted an exemption under this paragraph there shall be established by a permit issued pursuant to subsection (j) an enforceable emissions limitation for hazardous air pollutants reflecting the reduction which qualifies the source for an exemption under this paragraph. An

exemption under this paragraph shall not include an exemption from standards or requirements promulgated pursuant to subsection (f) or (g) and the Administrator shall review emissions from sources granted exemptions under this paragraph according to the provisions of subsection (e)(8) at the same time that other sources in the category or subcategory are reviewed.

"(D) For purposes of this paragraph, the term 'voluntary' means not otherwise required by a Federal air pollution control law or regulation.

"(E) The Administrator shall promulgate regulations to carry out the provisions of this paragraph as expeditiously as practicable, but not later than twelve months after the date of enactment of the Clean Air Act Amendments of 1990. Such regulations may include fees sufficient to offset the costs of reviewing applications for exemptions submitted under this paragraph. Revenues from such fees received by the Administrator shall, notwithstanding the provisions of the Miscellaneous Receipts Act, be used for the purpose of administering this section.

"(F) With respect to pollutants for which high risks of adverse human health effects may be associated with exposure to small quantities including, but not limited to, chlorinated dioxins and furans, the Administrator shall by regulation limit the use of offsetting reductions in emissions of other hazardous air pollutants from the source as counting toward the 90 per centum reduction in such high-risk pollutants qualifying for an exemption under this paragraph.

"(11) Notwithstanding the requirements of this section, no existing source that has installed—

"(A) reasonably available control technology (which achieves a reduction of 80 per centum or more from uncontrolled levels of hazardous air pollutants emitted by the source or which requires a substantial capital investment (as determined by the Administrator) by the source),

"(B) best available control technology (as defined in section 169(3)),

"(C) technology required to meet a lowest achievable emissions rate, or

"(D) has voluntarily achieved (as certified to the Administrator) on or after January 1, 1993, a reduction of 90 per centum in the emissions of the hazardous air pollutants emitted by the source,

prior to the promulgation of a standard under this section applicable to such source and the same pollutant (or stream of pollutants) controlled pursuant to an action described in subparagraph (A), (B), (C), or (D) shall be required to comply with such standard under this section until the date five years after the date on which such installation or reduction has been achieved, as determined by the Administrator. The Administrator may issue such rules and guidance as are necessary to implement this paragraph.

"(12)(A) If at any source a hazardous air pollutant is subject to regulation under this section because the source emits more than the minimum emissions rate of other pollutants, the Administrator (or a State acting pursuant to a program approved under subsection (l)) may, at the request of the owner or operator of the source, waive the requirements applicable to such pollutant where emissions of the pollutant are in de minimis amounts and do not present a significant risk of adverse effects to human health or adverse environmental effects and control of the pollutant would require installation of additional and separate control technologies for that pollutant only.

"(B) Applications for waivers under this paragraph shall be submitted not later than four months after the effective date of the relevant standard and the Administrator (or the State) shall make a determination on any application within six months of submission. Applications which are not complete shall be deemed denied without further opportunity for reapplication. An application for a waiver under this paragraph shall not stay the applicant's obligation to comply with emissions standards applicable to other pollutants. Applications shall be accompanied by fees adequate to offset all direct and indirect costs of reviewing such applications. Not later than eighteen months after the date of enactment of this paragraph, the Administrator shall publish guidance on procedures for application and review.

"(13) A source for which construction or reconstruction is commenced after the date an emissions standard applicable to such source is proposed pursuant to subsection (d) but before the date an emissions standard applicable to such source is proposed pursuant to subsection (f) or (g) shall not be required to comply with the emissions standard under subsection (f) or (g) until the date ten years after the date construction or reconstruction is commenced.

"(14)(A)(i) Any source of coke oven emissions which achieves the emissions limitation specified in clause (ii) beginning on or before January 1, 1995, and continues to achieve such limitation after such date, and complies with the provisions of clause (iii) shall not be required to achieve emissions limitations promulgated under subsection (d), (f), or (g) until January 1, 2020.

"(ii) Sources of coke oven emissions qualifying for an extension under this subparagraph shall not exceed—

"(I) 3 per centum leaking doors (5 per centum leaking doors for six meter batteries);

"(II) 1 per centum leaking lids;

"(III) 4 per centum leaking offtakes; and

"(IV) Sixteen seconds visible emissions per charge.

"(iii) Sources of coke oven emissions qualifying for an extension under this subparagraph shall make available not later than January 1, 2000, to the surrounding communities the results of any risk assessment performed by the Administrator to determine the appropriate level of any emissions standard established by the Administrator pursuant to subsection (f) or the results of the risk assessment performed by such source pursuant to paragraph (3) or (4).

"(iv) Notwithstanding the provisions of this section, including paragraph (6)(D), reconstruction of any source of coke oven emissions qualifying for an extension shall not subject such source to emissions limitations under subsections (f) or (g) more stringent than those established in subparagraph (A)(ii) or subparagraph (B)(iii).

"(B)(i) Any source of coke oven emissions which is not owned or operated by an integrated steel company, and which was in operation on January 1, 1990, may elect to meet the standards and schedule specified in this subparagraph.

"(ii) A source electing the regulatory schedule under this subparagraph shall meet the standards established in subsection (d)(8) not later than three years after date of enactment and the standards established under clause (B)(iii) not later than ten years after the date of enactment of the Clean Air Act Amendments of 1990.

"(iii) Not later than seven years after the date of enactment of this paragraph, the Administrator shall promulgate emissions standards for categories of coke oven emissions qualifying under this subparagraph with the presumption that such standards will include a standard for leaking doors as specified in subparagraph (A)(ii)(I) unless determined otherwise by the Administrator. Standards under this clause shall be established pursuant to the authorities of subsection (d).

"(iv) Any source of coke oven emissions which is not owned or operated by an integrated steel company and which meets emission standards pursuant to clauses (ii) and (iii) and which complies with the provisions of subparagraph (A)(iii) shall not be required to meet emissions standards which would otherwise be applicable to the source under subsection (f) or (g) until January 1, 2020.

"(C) The Administrator shall promulgate monitoring, reporting and recordkeeping, and other requirements including national test methods, as necessary, to implement and enforce standards under this paragraph and subsections (d), (f), and (g).

"(D) Any facility qualifying under this subparagraph and requesting an alternative emissions limitation under subsection (i), shall submit the requisite information under subsection (i), two years prior to the date of compliance for the facility under subparagraph (A)(ii) or (B)(iv).

"(j) PERMIT PROGRAM.—

"(1) Except as provided in paragraph (2) and after the date of enactment of this section, it shall be unlawful for any person to construct a new source, or for the owner or operator of any source to emit any air pollutant, subject to any emissions standard under this section, except in compliance with a permit issued by the Administrator (or a State acting pursuant to a program approved under subsection (l)) under this subsection. The Administrator shall promulgate within twelve months after the date of enactment of this subsection regulations establishing the minimum elements of a permit program. These elements shall include—

"(A) requirements for permit applications, including a standard application form and fees sufficient to offset the direct and indirect cost of processing applications;

"(B) requirements for monitoring (including continuous emissions monitoring, unless determined to be unavailable or inappropriate) the mass and rate of emissions for each hazardous air pollutant emitted by the source according to test procedures established by the Administrator, reporting of monitoring results not less frequently than annually and the maintenance of such records with respect to monitoring which the Administrator shall require;

"(C) a requirement that permittees pay an annual fee sufficient to offset all direct and indirect costs of administering the program (if such fees are paid to the Administrator, the Administrator may, notwithstanding any requirement of the Miscellaneous Receipts Act, expend such receipts for the purposes of administering the provisions of this section); and

"(D) a requirement that any State seeking approval of a program pursuant to subsection (l) have adequate personnel and funding to administer the program and adequate authority to—

"(i) issue permits that apply, and assure compliance by all sources within the State

with, each applicable standard, regulation or requirement under this section;

"(ii) issue permits for a fixed term, not to exceed five years;

"(iii) terminate or modify permits for cause, including establishment of a new emissions standard applicable to the source;

"(iv) enforce permits and the requirement to obtain a permit, including adequate civil and criminal penalties;

"(v) provide public notice of each application for a permit and an opportunity for public hearing before a determination on each such application; and

"(vi) assure that no permit will be issued if the Administrator timely objects to its issuance.

No fee schedule established by the Administrator under this subsection shall be designed with the purpose of supporting other aspects of any State air pollution control program including elements for control of area sources or prevention of accidents. Nothing in this subsection shall prevent a State from imposing additional permit fees, except that, the Administrator shall not approve any program pursuant to subsection (l), if revenues from such fees are used for purposes other than the development and implementation of programs to control the emissions of hazardous air pollutants. When issuing permits in the absence of an approved State program, the Administrator shall comply with the guidelines issued to implement this paragraph.

"(2)(A) Notwithstanding the requirements of paragraph (1), an existing source in a category or subcategory subject to an emissions standard under this section may continue operations prior to the issuance of a permit, provided that, the owner or operator of the source certifies to the Administrator (or to the State) that the source will comply with all applicable standards and requirements under this section. Certification pursuant to this paragraph shall be provided not later than six months after the effective date of any applicable standard or revision of a standard under this section. The certification shall be accompanied by a compliance plan describing means by which the source intends to achieve the standard on and after the compliance date established by subsection (i) and shall be signed by a responsible official of the business concern owning or operating the source.

"(B) Upon receipt of any certification, the Administrator (or the State) shall issue a temporary operating permit for the source, unless within thirty days the Administrator (or the State) notifies the owner or operator of the source that the certification does not adequately demonstrate compliance with all applicable standards and requirements under this section. Any temporary permit issued under this paragraph shall be for a term not exceeding one year and shall be enforceable to the same extent as any standard or other requirement promulgated under this section.

"(C) Within six months of the issuance of any temporary operating permit for any source under this paragraph, the Administrator (or the State) shall complete a review of the operations of such source, including an inspection at the site of the source, to determine whether a full operating permit under this subsection should be issued. If upon conclusion of such review (including any right to administrative appeal, but not including pendency of any judicial proceeding), the Administrator (or the State) determines that a permit should not be issued, the temporary permit granted under this paragraph shall be suspended immediately.

"(D) The Administrator shall require that certifications under this paragraph be accompanied by a fee sufficient to offset the full administrative costs of reviewing certifications.

"(3)(A) In the event that the Administrator fails to promulgate a standard for a category or subcategory of sources by the date established pursuant to subsection (e)(1)(A) or (e)(3), and beginning six months after such date, it shall be unlawful for the owner or operator of any source in such category or subcategory to emit any hazardous air pollutant except in compliance with a permit issued by the Administrator (or a State acting pursuant to a program approved under subsection (l)) under this paragraph.

"(B) The permit shall be issued pursuant to the provisions of paragraph (1) and such other provisions as are necessary to carry out the objectives of this Act. In preparing applications for permits under this paragraph, the owner or operator of the source shall commit to the installation and operation of technology and practices to control emissions of hazardous air pollutants which are the best technology and practices available for such source, as certified by an independent, registered professional engineer.

"(C) Each permit issued under this paragraph shall include an enforceable emission limitation for each hazardous air pollutant emitted by the source and no such pollutant may be emitted in amounts exceeding the applicable limitation immediately for new sources and, as expeditiously as practicable, but not later than the date three years after the permit is issued for existing sources.

"(D) If the Administrator subsequently promulgates a standard which would be applicable in lieu of the emissions limitations established by permit under this paragraph, the Administrator (or the State) shall revise such permit upon the next renewal to reflect the standards promulgated by the Administrator.

"(E) Paragraph (2) shall not be available to any source requiring a permit under this paragraph.

"(4) The Administrator shall suspend the issuance of permits by the Agency in any State promptly upon approval of a program for that State under subsection (l).

"(5)(A) Each State shall transmit to the Administrator a copy of each permit application (but not including certifications for temporary permits) and including any application for an extension or modification submitted under this section, and shall provide for notice of each permit proposed to be issued by the State.

"(B) No permit shall be issued if the Administrator within sixty days objects in writing to its issuance as not in compliance with the requirements of this section. The Administrator shall provide with the objection a statement of the reasons for the objection and the terms and conditions that the Administrator would impose if the permit were issued by the Administrator.

"(C) If the State fails within ninety days after the date of the objection to submit a permit revised to meet the objection, the Administrator shall have authority to issue or deny the permit.

"(D) Nothing in this paragraph shall be interpreted, construed, or applied to require the Administrator to review each permit to be issued by a State, provided that the Administrator conducts an audit program which assures that State permitting activities are consistent with the goals and objectives of this section.

"(6) To the maximum extent practicable, permits issued under this section shall be consolidated with other permits required under this Act.

"(k) AREA SOURCE PROGRAM.—

"(1) The Congress finds that emissions of hazardous air pollutants from area sources may individually, or in the aggregate, present significant risks to public health in urban areas. Considering the large number of persons exposed and the risks of carcinogenic and other adverse health effects from hazardous air pollutants, ambient concentrations characteristic of large urban areas should be reduced to levels substantially below those currently experienced. It is the purpose of this subsection to achieve a substantial reduction in emissions of hazardous air pollutants from area sources and an equivalent reduction in the public health risks associated with such sources including a reduction of not less than 75 per centum in the incidence of cancer attributable to emissions from such sources.

"(2) The Administrator shall, after consultation with State and local air pollution control officials, conduct a program of research with respect to sources of hazardous air pollutants in urban areas and shall include within such program—

"(A) ambient monitoring for a broad range of hazardous air pollutants (including, but not limited to, volatile organic compounds, metals, pesticides and products of incomplete combustion) in a representative number of urban locations;

"(B) analysis to characterize the sources of such pollution with a focus on area sources and the contribution that such sources make to public health risks from hazardous air pollutants; and

"(C) consideration of atmospheric transformation and other factors which can elevate public health risks from such pollutants.

Health effects considered under this program shall include, but not be limited to, carcinogenicity, mutagenicity, teratogenicity, neurotoxicity, reproductive dysfunction, and other acute and chronic effects including the role of such pollutants as precursors of ozone or acid aerosol formation. The Administrator shall report the preliminary results of such research not later than three years after the date of enactment of this paragraph.

"(3)(A) Considering information collected pursuant to the monitoring program authorized by paragraph (2), the Administrator shall, not later than five years after the date of enactment of this subsection and after notice and opportunity for public comment, prepare and transmit to the Congress a comprehensive strategy to control emissions of hazardous air pollutants from area sources in urban areas.

"(B) The strategy shall (i) identify not less than ten hazardous air pollutants which, as the result of emissions from area sources, present the greatest threat to public health in the largest number of urban areas and which are or will be listed pursuant to subsection (b) and (ii) identify the source categories or subcategories emitting such pollutants which are or will be listed pursuant to subsection (c). When identifying categories and subcategories of sources under this subparagraph, the Administrator shall assure that sources accounting for 90 per centum or more of the aggregate emissions of each of the ten iden-

tified hazardous air pollutants are subject to standards pursuant to subsection (d) or this subsection.

"(C) The strategy shall include a schedule of specific actions to substantially reduce the public health risks posed by the release of hazardous air pollutants from area sources which will be implemented by the Administrator under authority of this or other laws (including, but not limited to, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, and the Resource Conservation and Recovery Act) or by the States. Requirements applicable to mobile sources or to fuels shall be established pursuant to title II of this Act. The strategy shall have as a goal a reduction in the incidence of cancer attributable to exposure to hazardous air pollutants by 75 per centum, considering control of emissions of hazardous air pollutants from all stationary and mobile sources and resulting from measures implemented by the Administrator or by the States under this or other laws.

"(D) The strategy may also identify research needs in monitoring, analytical methodology, modeling or pollution control techniques and recommendations for changes in law that would further the goals and objectives of this subsection.

"(E) Nothing in this subsection shall be interpreted to preclude or delay implementation of actions with respect to area sources of hazardous air pollutants under consideration pursuant to this or any other law and which may be promulgated before the strategy is prepared.

"(F) The Administrator shall implement the strategy as expeditiously as practicable assuring that all sources are in compliance with all requirements not later than nine years after the date of enactment of this subsection.

"(G) As part of such strategy the Administrator shall provide for ambient monitoring and emissions modeling in urban areas as appropriate to demonstrate that the goals and objectives of the strategy are being met.

"(4) In addition to the national urban air toxics strategy authorized by paragraph (3), the Administrator shall also encourage and support areawide strategies developed by State or local air pollution control agencies which are intended to reduce risks from emissions by areas sources within a particular urban area. From the funds available for grants under this section, the Administrator shall set aside not less than 10 per centum to support areawide strategies addressing hazardous air pollutants emitted by area sources and shall award such funds on a demonstration basis to those States with innovative and effective strategies. At the request of State or local air pollution control officials, the Administrator shall prepare guidelines for control technologies or management practices which may be applicable to various categories or subcategories of area sources.

"(5) The Administrator shall report to the Congress at intervals not later than eight and ten years after the date of enactment of this subsection on actions taken under this subsection and other parts of this Act to reduce the risk to public health posed by the release of hazardous air pollutants from area sources. The reports shall also identify specific metropolitan areas which continue to experience high risk to public health as the result of emissions from area sources.

"(6) The Administrator shall prepare a report with recommendations on health impacts of mobile source benzene emissions considering both fuel and vehicle-based control strategies to be submitted to the Environment and Public Works Committee of the Senate and the Energy and Commerce Committee of the House of Representatives not later than twenty-four months after the date of the enactment of the Clean Air Act Amendments of 1990.

"(l) STATE PROGRAMS.—

"(1) Each State may develop and submit to the Administrator for approval a program for the implementation and enforcement (including a review of enforcement delegations previously granted) of emission standards and other requirements for air pollutants subject to this section or requirements for the prevention and mitigation of sudden, accidental releases pursuant to section 129. A program submitted by a State under this subsection may provide for partial or complete delegation of the Administrator's authorities and responsibilities to implement and enforce emissions standards and prevention requirements but shall not include authority to set standards less stringent than those promulgated by the Administrator under this Act.

"(2) Not later than twelve months after the date of enactment of this paragraph, the Administrator shall publish guidance which would be useful to the States in developing programs for submittal under this subsection. Guidance shall, at a minimum, include permitting requirements for new and existing sources of air pollutants subject to this section. The guidance shall also provide for the registration of all facilities producing, processing, handling, or storing any substance listed pursuant to section 129 in amounts greater than the threshold quantity. The Administrator shall include as an element in such guidance an optional program for the review of high-risk point sources of air pollutants including, but not limited to, hazardous air pollutants listed pursuant to subsection (b).

"(3) The Administrator shall establish and maintain an air toxics clearinghouse, control technology center and risk information center to provide technical assistance and information to the States and local agencies and, on a cost reimbursable basis, to others on—

"(A) measures, methods, practices and techniques effective in reducing emissions of air pollutants subject to this section or section 129;

"(B) risk assessment;

"(C) ambient monitoring and modeling and emissions measurement and modeling.

The Administrator may conduct research on methods for preventing, measuring and controlling emissions and evaluating associated health and environmental risks. All information collected under this paragraph shall be available to the public.

"(4) Upon application of a State, the Administrator may make grants, subject to such terms and conditions as the Administrator deems appropriate, to such State for the purpose of assisting the State in developing and implementing a program for submittal and approval under this subsection. Programs assisted under this paragraph may include program elements addressing air pollutants other than those specifically subject to this section or section 129. Grants under this paragraph may include support for high-risk point source review as provided in paragraph (2) and support for the development and implementation of areawide area source programs pursuant to subsection (k).

"(5) Not later than one hundred and eighty days after receiving a program submitted by a State, and after notice and opportunity for public comment, the Administrator shall either approve or disapprove such program. The Administrator shall disapprove any program submitted by a State, if the Administrator determines that—

"(A) the authorities contained in the program (including conditions in permits) are not adequate to assure compliance by all sources within the State with each applicable standard, regulation, or requirement established by the Administrator under this section;

"(B) adequate authority does not exist, or adequate resources (including revenues from permit fees) are not available, to implement the program;

"(C) the schedule for implementing the program (including the schedule for issuing permits) and assuring compliance by affected sources is not sufficiently expeditious; or

"(D) the program is otherwise not in compliance with the guidance issued by the Administrator under paragraph (2) or is not likely to satisfy, in whole or in part, the objectives of this Act.

If the Administrator disapproves a State program, the Administrator shall notify the State of any revisions or modifications necessary to obtain approval. The State may revise and resubmit the proposed program for review and approval pursuant to the provisions of this subsection.

"(6) Whenever the Administrator determines, after public hearing, that a State is not administering and enforcing a program approved pursuant to this subsection in accordance with the guidance published pursuant to paragraph (2) or the requirements of paragraph (5), the Administrator shall so notify the State and, if action which will assure prompt compliance is not taken within ninety days, the Administrator shall withdraw approval of the program. The Administrator shall not withdraw approval of any program unless the State shall have been notified and the reasons for withdrawal shall have been stated in writing and made public.

"(7) Nothing in this subsection shall prohibit the Administrator from enforcing any applicable emission standard or requirement under this section or section 129.

"(8) The Administrator may after notice and opportunity for public comment approve programs developed and submitted by a local pollution control agency (after consultation with the State) pursuant to this subsection and any such agency implementing an approved program may take any action authorized to be taken by a State under this section.

"(m) STATE AUTHORITY.—Nothing in this section shall preclude, deny, or limit any right of any State or political subdivision thereof to adopt or enforce any regulation, requirement or standard (including any procedural requirement) which is more stringent than a regulation, requirement, or standard in effect under this section or that applies to a substance not subject to this section. Nothing in this section shall authorize any State to impose any standard, limitation or requirement on the emissions of radionuclides from facilities licensed by the Nuclear Regulatory Commission where such standard, limitation or requirement would be barred by other Federal law including the Atomic Energy Act.

"(n) ATMOSPHERIC DEPOSITION TO GREAT LAKES AND COASTAL WATERS.—

"(1) The Administrator shall conduct a program to identify and assess the extent of atmospheric deposition of hazardous air pollutants and other air pollutants to the Great Lakes, Lake Champlain and coastal waters. As part of such program, the Administrator shall—

"(A) monitor Great Lakes and coastal waters, including monitoring of Great Lakes waters through the monitoring network established pursuant to paragraph (2) of this subsection and designing and deploying an atmospheric monitoring network for coastal waters pursuant to paragraph (4);

"(B) investigate the sources and deposition rates of atmospheric deposition of air pollutants (and their atmospheric transformation precursors);

"(C) conduct research to develop and improve monitoring methods and to determine the relative contribution of atmospheric pollutants to total pollution loadings to Great Lakes and coastal waters;

"(D) evaluate any adverse effects to human health or the environment caused by such deposition (including effects resulting from indirect exposure pathways) and assess the contribution of such deposition to violations of water quality standards established pursuant to the Federal Water Pollution Control Act and drinking water standards established pursuant to the Safe Drinking Water Act; and

"(E) sample for such pollutants in biota, fish, and wildlife of Great Lakes, Lake Champlain and coastal waters and characterize the sources of such pollutants.

"(2) The Administrator shall oversee, in accordance with Annex 15 of the Great Lakes Water Quality Agreement, the establishment and operation of a Great Lakes atmospheric deposition network to monitor atmospheric deposition of hazardous air pollutants and other air pollutants to the Great Lakes.

"(A) As part of the network provided for in this paragraph, and not later than December 31, 1990, the Administrator shall establish in each of the five Great Lakes at least one facility capable of monitoring the atmospheric deposition of hazardous air pollutants in both dry and wet conditions.

"(B) The Administrator shall use the data provided by the network to identify and track the movement of hazardous air pollutants through the Great Lakes, to determine the portion of water pollution loadings attributable to atmospheric deposition of such pollutants, and to support development of remedial action plans and other management plans as required by the Great Lakes Water Quality Agreement.

"(C) The Administrator shall assure that the data collected by the Great Lakes atmospheric deposition monitoring network is in a format compatible with databases sponsored by the International Joint Commission, Canada, and the several States of the Great Lakes region.

"(3) The Administrator shall establish at Lake Champlain an atmospheric deposition station to monitor deposition of hazardous air pollutants and other pollutants within the Lake Champlain watershed. The Administrator shall determine the role of air deposition in the pollutant loadings of Lake Champlain, investigate the sources of air pollutants deposited in the watershed, evaluate the health and environmental effects of such pollutant loadings and shall sample such pollutants in biota, fish and wildlife within the watershed as necessary to characterize such effects.

"(4) The Administrator shall design and deploy atmospheric deposition monitoring networks for coastal waters and their watersheds and shall make any information collected through such networks available to the public. As part of this effort, the Administrator shall conduct research to develop and improve deposition monitoring methods, and to determine the relative contribution of atmospheric pollutants to pollutant loadings.

"(5) Within two years of the date of enactment of this Act and biennially thereafter, the Administrator shall submit to the Congress a report on the results of any monitoring, studies, and investigations conducted pursuant to this subsection. Such report shall include, at a minimum, an assessment of—

"(A) the contribution of atmospheric deposition to pollution loadings in the Great Lakes, Lake Champlain and coastal waters;

"(B) the environmental and human health effects of any pollution which is attributable to atmospheric deposition to the Great Lakes, Lake Champlain, and coastal waters;

"(C) the source or sources of any pollution to Great Lakes, Lake Champlain, and coastal waters which is attributable to atmospheric deposition;

"(D) whether pollution loadings in Great Lakes, Lake Champlain, or coastal waters cause or contribute to violations of drinking water standards pursuant to the Safe Drinking Water Act or water quality standards pursuant to the Federal Water Pollution Control Act; and

"(E) a description of any revisions of the requirements, standards, and limitations pursuant to this Act and other applicable Federal laws as are necessary to assure protection of human health and the environment.

"(o) PUBLICLY OWNED TREATMENT WORKS.—The Administrator may conduct, in cooperation with the owners and operators of publicly owned treatment works, studies to characterize emissions of hazardous air pollutants emitted by such facilities, to identify industrial, commercial and residential discharges which contribute to such emissions and to demonstrate control measures for such emissions. When promulgating any standard under this section applicable to publicly owned treatment works, the Administrator shall consider control measures which include pretreatment of discharges causing emissions of hazardous air pollutants and process or product substitutions or limitations which may be effective in reducing such emissions. The Administrator may prescribe uniform sampling, modeling and risk assessment methods for use in implementing this subsection.

"(p) HYDROGEN SULFIDE.—The Administrator is directed to assess the hazards to public health and the environment resulting from the emission of hydrogen sulfide associated with the extraction of oil and natural gas resources. To the extent practicable, the assessment shall build upon and not duplicate work conducted for an assessment pursuant to section 8002(m) of the Solid Waste Disposal Act and shall reflect consultation with the States. The assessment shall include a review of existing State and industry control standards, techniques, and enforcement. The Administrator shall report to the Congress within twenty-four months of the enactment of this subsection with the findings of such assessment, together with any recommendations, and shall develop and implement a control strategy for emissions of hydrogen sulfide as appropriate to protect human health and the environment, based on the findings of such assessment, using authorities under this Act including section 111 and this section.

"(q) SAVINGS CLAUSE.—No amendment to this section made by the Clean Air Act Amendments of 1990 shall affect any emission standard for a hazardous air pollutant which has been promulgated prior to the enactment of such Act. Emissions standards for categories and subcategories of sources of radionuclides for which standards were proposed at 54 Federal Register 9612 (March 7, 1989) except sources which are subject to licensing by the Nuclear Regulatory Commission and including any emission standards for a new subcategory of grate calcination elemental phosphorus plants, shall be established in accordance with section 112 of the Clean Air Act as in effect prior to the enactment of this subsection.

"(r) NATIONAL ACADEMY OF SCIENCES STUDY OF RISK ASSESSMENT.—

"(1) Within three months of enactment of this subsection, the Administrator shall enter into appropriate arrangements with the National Academy of Sciences to conduct a review of—

"(A) risk assessment methodology used by the Environmental Protection Agency to determine the carcinogenic risk associated with exposure to hazardous air pollutants from source categories and subcategories subject to the requirements of this section; and

"(B) improvements in such methodology.

"(2) In conducting such review, the National Academy of Sciences should consider, but not be limited to, the following:

"(A) the techniques used for estimating and describing the carcinogenic potency to humans of hazardous air pollutants; and

"(B) the techniques used for estimating exposure to hazardous air pollutants (for hypothetical and actual maximally exposed individuals as well as other exposed individuals).

"(3) To the extent practicable, the Academy shall evaluate and report on the methodology for assessing the risk of adverse human health effects other than cancer for which safe thresholds of exposure may not exist, including, but not limited to, inheritable genetic mutations, birth defects, and reproductive dysfunctions.

"(4) A report on the results of such review shall be submitted to the Senate Committee on Environment and Public Works, the House Committee on Energy and Commerce, the Risk Assessment and Management Commission established by subsection (u) and the Administrator not later than twenty-four months after the date of enactment of the Clean Air Act Amendments of 1990.

"(5) The Administrator shall assist the Academy in gathering any information the Academy deems necessary to carry out this subsection. The Administrator may use any authority under this Act to obtain information from any person, and to require any person to conduct tests, keep and produce records, and make reports respecting research or other activities conducted by such person as necessary to carry out this subsection.

"(6) Of the funds authorized to be appropriated to the Administrator by this Act, such amounts as are required shall be available to carry out this subsection.

"(s) ANNUAL REPORT.—Not later than January 15, 1991, and every three years thereafter, the Administrator shall prepare and transmit to the Congress a comprehensive report on the measures taken by the Agency

and by the States to implement the provisions of this section and section 129. The Administrator shall maintain a database on pollutants and sources subject to the provisions of this section and shall include aggregate information from the database, in each annual report. The report shall include, but not be limited to—

"(1) a status report on standard-setting under subsections (d), (f), and (g);

"(2) information with respect to compliance with such standards including the costs of compliance experienced by sources in various categories and subcategories;

"(3) development and implementation of the national urban air toxics program;

"(4) recommendations of the Chemical Safety and Hazard Investigation Board with respect to the prevention and mitigation of sudden, accidental releases; and

"(5) such recommendations for additional legislation to achieve the purposes of this section and section 129 as the Administrator may deem appropriate.

"(t) COKE OVEN PRODUCTION TECHNOLOGY STUDY.—

"(1) The Secretary of the Department of Energy and the Administrator of the Environmental Protection Agency shall jointly undertake a six-year research program to assess coke oven production emission control technologies and to assist in the development and commercialization of technically practicable and economically viable control technologies which have the potential for significant reduction in emissions of hazardous air pollutants from coke oven production facilities. In identifying control technologies, the Secretary and the Administrator shall consider the range of existing coke oven operations and battery design as well as alternatives to existing coke oven production design.

"(2) The Secretary and the Administrator is authorized to enter into agreements with persons who propose to develop, install, and operate coke production emission control technologies which have the potential for significant emissions reductions of hazardous air pollutants provided that Federal funds shall not exceed 50 per centum of the cost of any project assisted pursuant to this subsection.

"(3) The Secretary shall prepare annual reports to Congress on the status of the research program and at the completion of the study shall make recommendations to the Administrator as to the lowest achievable emissions rate for the coke oven emissions category or subcategories thereof.

"(4) There are authorized to be appropriated $5,000,000 for each of the fiscal years 1991 through 1996 to carry out the research program authorized by this subsection.

"(u) RISK ASSESSMENT AND MANAGEMENT COMMISSION.—

"(1) There is hereby established a Risk Assessment and Management Commission (hereafter referred to in this subsection as the 'Commission'), which shall commence proceedings not later than eighteen months after the date of enactment of this subsection and which shall make a full investigation of the policy implications and appropriate uses of risk assessment in the regulation under this section of hazardous air pollutants that present a risk of carcinogenic effects.

"(2) The Commission shall consider the report of the National Academy of Sciences pursuant to subsection (r) and based on that report and its own deliberations the Commission shall consider—

"(A) the use and limitations of risk assessment in establishing emission standards for hazardous air pollutants that present a risk of carcinogenic effects and the suitability of risk assessment for such purposes;

"(B) the most appropriate methods for measuring and describing cancer risks from exposure to hazardous air pollutants considering such alternative approaches as the lifetime risk of cancer or other effects to the individual or individuals most exposed to emissions from a source or sources on both an actual and worst case basis, the range of such risks, the total number of health effects avoided by emissions reductions, reductions in the number of persons exposed at various levels of risk, the incidence of cancer, and other public health factors;

"(C) methods to reflect uncertainties in measurement and estimation techniques, the existence of synergistic or antagonistic effects among pollutants, the accuracy of extrapolating human health risks from animal exposure data, and the existence of unquantified direct or indirect effects on human health in risk assessment studies;

"(D) risk management policy issues including the use of lifetime cancer risks to individuals most exposed, incidence of cancer, the cost and technical feasibility of emission reduction measures and the use of site-specific actual exposure information in setting emissions standards applicable to sources of hazardous air pollutants; and

"(E) and comment on the degree to which it is possible or desirable to have the risk assessment methodology relating to hazardous air pollutants conducted under this section be part of a consistent risk assessment methodology, or a consistent standard of acceptable risk, among various government programs.

"(3) Such Commission shall be composed of ten members who shall have knowledge or experience in fields of risk assessment or risk management, including three members to be appointed by the President, two members to be appointed by the Speaker of the House of Representatives, one member to be appointed by the minority leader of the House of Representatives, two members to be appointed by the majority leader of the Senate, one member to be appointed by the minority leader of the Senate, and one member to be appointed by the President of the National Academy of Sciences. Appointments shall be made not later than eighteen months after the date of enactment of this subsection.

"(4) The Administrator and the heads of all other departments, agencies, and instrumentalities of the executive branch of the Federal Government shall assist the Commission in gathering such information as the Commission deems necessary to carry out this subsection.

"(5)(A) In the conduct of the study required by this subsection, the Commission is authorized to contract with nongovernmental entities that are competent to perform research or investigations within the Commission's mandate, and to hold public hearings, forums, and workshops to enable full public participation.

"(B) The Commission may appoint and fix the pay of such staff as it deems necessary. The Commission may request the temporary assignment of personnel from the Environmental Protection Agency or other Federal agencies to assist it.

"(C) The members of the Commission who are not officers or employees of the United States, while attending conferences or meetings of the Commission or while otherwise serving at the request of the Chair, shall be entitled to receive compensation at a rate not in excess of the maximum rate of pay for grade GS-18, as provided in the General Schedule under section 5332 of title 5 of the United States Code, including travel time, and while away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence as authorized by law for persons in the Government service employed intermittently.

"(6) A report containing the results of all Commission studies and investigations under this subsection, together with any appropriate legislative recommendations (presented in the form of a bill proposing amendments to this section) or administrative recommendations, shall be submitted to the President and to the Congress not later than forty-two months after the date of enactment of this section. In such report, the Commission shall make recommendations with respect to the appropriate regulation of any risks of carcinogenic effects remaining after application of emissions standards under subsection (d) to a category or subcategory of hazardous air pollutants, including an assessment of the residual risk reduction approaches in subsection (f) and (i). The Commission shall cease to exist upon the date determined by the Commission, but not later than nine months after the submission of such report.

"(7) There are authorized to be appropriated such sums as are necessary to carry out the activities of the Commission established by this subsection.

"(8) Any emissions standards established pursuant to this section for a category or subcategory of sources of emissions of ammonia shall not apply to a cargo tank (commonly known as a nurse tank and considered an implement of husbandry) transporting anhydrous ammonia, and operated by a private carrier exclusively for agricultural purposes, as described in the regulations under 49 Code of Federal Regulations 173.315(m), as in effect on the date immediately preceding the date of the enactment of the Clean Air Act Amendments of 1990.

"(v) HEALTH AND ENVIRONMENTAL EFFECTS OF PESTICIDE USE.—

"(1) The authorities of this section shall not be available for the purpose of protecting public health or the environment from adverse effects which may result from the use of a pesticide in a commercial agricultural operation where such use is regulated pursuant to the authority of the Federal Insecticide, Fungicide and Rodenticide Act.

"(2) For purposes of this subsection, the term 'commercial agricultural operation' means any activity conducted for the production of one or more agricultural products or commodities and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.

"(w) NATURAL URBAN AIR TOXICS RESEARCH CENTERS.—

"(1) The Administrator shall oversee the creation of a National Urban Air Toxics Research Center, to be located at a university, a hospital or other facility capable of undertaking and maintaining similar research capabilities in the areas of epidemiology, oncology, toxicology, pulmonary medicine, pathology and biostatistics. The geographic site of the National Urban Air Toxics Research Center should be further directed to Harris County, Texas, in order to take full advantage of the well developed scientific community presence currently on-site at the Texas Medical Center as well as the exten-

sive data previously compiled from the comprehensive monitoring system currently in place.

"(2) The National Urban Air Toxics Research Center shall be governed by a Board of Directors to be comprised of nine numbers, the appointment of which shall be allocated pro rata among the Speaker of the House, the Majority Leader of the Senate and the President. The members of the Board of Directors shall be selected based on their respective academic and professional backgrounds and expertise in matters relating to public health, environmental pollution, and industrial hygene. The duties of the Board of Directors shall be to determine policy and research guidelines, submit views from Center sponsors and the public and issue periodic reports of Center findings and activities.

"(3) The Board of Directors shall be advised by a Scientific Advisory Panel, the thirteen members of which shall be appointed by the Board, and to include eminent members of the scientific and medical communities. The Panel membership may include scientists with relevant experience from the National Institute of Environmental Health Sciences, the Center for Disease Control, the Environmental Protection Agency, the National Cancer Institute and others, and the Panel shall conduct peer review and evaluate research results. The Panel shall assist the Board in developing the research agenda, reviewing proposals and applications and advise on the awarding of research grants.

"(4) The Center shall be established and funded with both Federal and private source funds.".

OTHER PROVISIONS

SEC. 302. (a) When establishing emissions standards for styrene under section 112 of the Clean Air Act, the Administrator shall list boat manufacturing as a separate subcategory unless the Administrator finds that such listing would be inconsistent with the goals and requirements of such Act.

(b) Not later than twenty-four months after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall complete a review and, if appropriate, revise the unit risk estimate for the carcinogenic efforts of 1,3-butadiene.

(c) Prior to establishing standards under section 112(d) for sources employing Frasch sulfur extraction and processing technology, the Administrator shall establish a health threshold for hydrogen sulfide. Emissions standards with respect to hydrogen sulfide for sources employing Frasch sulfur extraction and processing technology shall be established at levels which protect public health with an ample margin of safety, unless a more stringent standard is necessary to protect the environment.

CHEMICAL PROCESS SAFETY MANAGEMENT

SEC. 303. (a) The Secretary of Labor shall act under the Occupational Safety and Health Act of 1970 (29 U.S.C. 653) to prevent accidental releases of chemicals which could pose a threat to employees. Not later than twelve months after the date of enactment of this section, the Secretary of Labor, in coordination with the Administrator, shall promulgate, pursuant to the Occupational Safety and Health Act, a chemical process safety standard designed to protect employees from hazards associated with accidental releases of highly hazardous chemicals in the work place.

(b) The Secretary shall include as part of such standard a list of highly hazardous chemicals, which include toxic, flammable, highly reactive, and explosive substances. The list of such chemicals may include those chemicals listed by the Administrator under section 302 of the Emergency Planning and Community Right to Know Act of 1986, title III of the Superfund Amendments and Reauthorization Act (SARA). The Secretary may make additions to such list when a substance is found to pose a threat of serious injury or fatality in the event of an accidental release in the workplace.

(c) Such standard shall, at minimum, require employers to—

(1) develop and maintain written safety information identifying, workplace chemical and process hazards, equipment used in the processes, and, technology used in the processes;

(2) perform a workplace hazard assessment, including, as appropriate, identification of potential sources of accidental releases, an identification of any previous release within the facility which had a likely potential for catastrophic consequences in the workplace, estimation of the workplace effects of a range of releases, estimation of the health and safety effects of such a range on employees;

(3) consult with workers and their representatives on the development and conduct of hazard assessments and the development of chemical accident prevention plans and provide access to these and other records required under the standard;

(4) establish a system to respond to the workplace hazard assessment findings, which shall address prevention, mitigation and emergency responses;

(5) periodically review the workplace hazard assessment and response system;

(6) develop and implement written operating procedures for the chemical process including procedures for each operating phase, operating limitations, and safety and health considerations;

(7) provide written safety and operating information to employees and train employees in operating procedures, emphasizing hazards and safe practices;

(8) ensure contractors and contract employees are provided appropriate information and training;

(9) train and educate employees and contractors in emergency response in a manner as comprehensive and effective as that required by the regulation promulgated pursuant to section 126(b) of SARA;

(10) establish a quality assurance program to ensure that initial process related equipment, maintenance materials, and spare parts are fabricated and installed consistent with design specifications;

(11) establish maintenance systems for critical process related equipment including written procedures, employee training, appropriate inspections, and testing of such equipment to ensure ongoing mechanical integrity;

(12) conduct pre-start up safety reviews of all newly installed or modified equipment;

(13) establish and implement written procedures to manage change to process chemicals, technology, equipment, and facilities; and

(14) investigate every incident which results in or could have resulted in a major accident in the workplace, with any findings to be reviewed by operating personnel and modifications made if appropriate.

(d) Nothing in this section may be construed to diminish the authority of the States and political subdivisions thereof as described in section 304(k).

ACCIDENT PREVENTION

SEC. 304. The Clean Air Act is amended by adding the following new section at the end of part A of title I:

"PREVENTION OF SUDDEN, ACCIDENTAL RELEASES

"SEC. 129. (a) PURPOSE AND GENERAL DUTY.—It shall be the objective of the regulations and programs authorized under this section to prevent the sudden, accidental release and to minimize the consequences of any such release of any substance listed pursuant to subsection (c) or any other extremely hazardous substance. The owners and operators of facilities producing, processing, handling, or storing such substances have a general duty to identify hazards resulting from such releases using appropriate hazard assessment techniques, to design and maintain a safe facility taking such steps as are necessary to prevent releases, and to minimize the consequences of sudden, accidental releases which do occur. Nothing in this subsection shall be interpreted, construed, or applied to create any liability for compensation for bodily injury or property damages to any person which may result from sudden, accidental releases of such substances.

"(b) DEFINITIONS.—

"(1) The term 'accidental release' means the direct or indirect introduction of an extremely hazardous substance into the air under circumstances which are not routine and which are not authorized pursuant to any permit or emission limitation or standard under any other provision of this Act or any other Federal law. Such term shall not include a release from a vent or relief value, or a release that results from a disturbance in a process (commonly referred to as a 'process upset') that is planned and designed to prevent catastrophic events.

"(2) The term 'facility' means all buildings, structures, equipment, installations or substance emitting stationary activities or any other point or nonpoint source of a release. The term 'facility' does not include the right-of-way of a railroad outside of any railroad yard.

"(c) LIST OF SUBSTANCES.—The Administrator shall, not later than twelve months after the date of enactment of this section, propose and, not later than twenty-four months after such date, promulgate, a list of not less than fifty substances which may, as the result of sudden events, be released in concentrations that may reasonably be anticipated to cause acute adverse health effects in humans. The list shall be drawn from, but not be limited to, those substances on the list established by section 302 of the Emergency Planning and Community Right-to-Know Act of 1986 and shall include those substances with the greatest likelihood to cause death, injury, property damage, or evacuations as the result of sudden, accidental releases. The initial list shall include sulfuric acid, chlorine, anhydrous ammonia, hydrochloric acid, methyl chloride, ethylene oxide, toluene, vinyl chloride, methyl alcohol, nitric acid (94 per centum by weight or more HNO_3), styrene, tetrachloroethylene, ammonia, hydrogen sulfide, acetone, methylene chloride, benzene, methyl ethyl ketone, toluene diisocyanate, phosgene, sulfur dioxide (10 per centum or more by volume), formaldehyde (gas), butadiene, hydrofluoric acid, and acrylonitrile. The Administrator shall from time to time (but not less often than every five years) review and revise the list established by this subsection adding substances which, as a result of sudden events, may be

released in concentrations that may reasonably be anticipated to cause acute adverse health effects in humans. At the time any substance is placed on such list, the Administrator shall establish a threshold quantity for such substance, taking into account the toxicity (including short- and long-term health effects), reactivity, volatility, dispersibility, combustibility, or flammability of the substance.

"(d) HAZARD ASSESSMENTS.—

"(1) Not later than twelve months after a substance is listed under subsection (c), the owner or operator of each facility at which such substance is present in amounts greater than the threshold quantity shall conduct and complete a hazard assessment for each such substance present at the facility. The Administrator is authorized to establish a greater threshold quantity for, or to exempt entirely, any substance that is a nutrient used in agriculture when held by a farmer. The purpose of such assessment shall be to anticipate the consequences of a range (including worst case events) of sudden, accidental releases of such substances from the facility and to provide information that may aid in the prevention, or mitigation, of or response to such releases.

"(2) Not later than twelve months after the date of enactment of this subsection the Administrator shall propose and not later than twenty-four months after such date publish guidance with respect to the preparation of hazard assessments. In preparing such guidance, the Administrator shall consider the extent to which each of the following elements should be required:

"(A) basic data on the facility, units at the facility which contain or process substances listed under subsection (c) (including the longitude and latitude of such units), facility operating procedures, population of the nearby communities, and the meteorology of the area where the facility is located;

"(B) an identification of the potential sources of sudden, accidental release from the facility of substances listed under subsection (c);

"(C) an identification of any previous such releases from the facility for which a report was required under this or other laws, including the amounts released, frequencies, and durations;

"(D) an identification of a range (including worst case events) of potential releases from the facility including an estimate of the size, concentration, and duration of such potential releases and a correlation of such factors with the distance from the source of release;

"(E) a determination of potential exposure (including the concentration and duration of exposure) for all persons who may be put at risk as the result of a sudden, accidental release from the facility;

"(F) a determination of the probability of exposure as the result of various release scenarios including consideration of meteorological factors;

"(G) information on the toxicity of the substances listed under subsection (c) present at the facility and;

"(H) a review of the efficacy of various release prevention and control measures, including process changes or substitution of materials.

The Administrator shall prepare and distribute information on the health effects and other hazards associated with each extremely hazardous substance listed pursuant to subsection (c) which shall be included, pursuant to subparagraph (G), in each hazard assessment prepared under this subsection.

"(3) Each hazard assessment prepared pursuant to this subsection shall be updated every five years, except that any hazard assessment for a facility shall be updated within six months of any facility alteration which may substantially increase (as determined under rules promulgated by the Administrator) the likelihood of an accidental release of an extremely hazardous substance from the facility or the severity of the consequences of such release. Hazard assessments shall not be required to include potential releases from rolling stock infrequently and temporarily located at the facility but may be required to consider hazards with respect to the substances contained in rolling stock which are regularly present.

"(4) To the maximum extent practicable, the Administrator shall coordinate requirements for hazard assessments under this section, including a review of the standard required under section 303 of the Clean Air Act Amendments of 1990, with any comparable requirements that may be imposed by the Occupational Safety and Health Administration including joint promulgation of regulations: *Provided*, That, impacts of potential releases on human health and property outside the boundary of the facility are fully considered in any such regulation, that hazard assessments are available to the public as provided in this subsection, and that nothing in such regulation is interpreted, construed, or applied to preclude or diminish the right of any State or a political subdivision thereof to impose requirements for hazard assessment or accident prevention and mitigation more stringent than those established under such regulations. In exercising any authority under this section, the Administrator shall not, for purposes of section 653(b)(1) of title 29, be deemed to be exercising statutory authority to prescribe or enforce standards or regulations affecting occupational safety and health.

"(5) To the extent practicable, and where there are a large number of small facilities with similar business and operating characteristics which are likely to present similar risks of sudden, accidental releases of extremely hazardous substances, the Administrator shall facilitate compliance with the requirements of this subsection by designing generic hazard identification and assessment tools including training manuals, checklists, and workbooks which would be useful to the owners and operators of such facilities. The Administrator is authorized to cooperate with trade associations and other organizations representing such facilities and other advisory groups to develop hazard identification and assessment materials and to conduct training programs in the use of such materials.

"(6) Hazard assessments prepared pursuant to the requirements of this subsection shall be available to the Administrator, to the Chemical Safety and Hazard Investigation Board, to the State in which the facility is located, to any local emergency planning entity or public safety agency having responsibility for planning or response with respect to sudden, accidental releases which may occur at such facility, and to the public subject to the conditions of sections 322, 323, and 324 of the Emergency Planning and Community Right-to-Know Act of 1986. The Administrator shall conduct compliance audits of hazard assessments prepared pursuant to this subsection reviewing not less than 1.4 per centum each year.

"(7) After the effective date of any hazard assessment requirement promulgated pursuant to this subsection and applicable to a facility, it shall be unlawful for any person to operate such facility until such hazard assessment has been prepared or updated as provided in this subsection. For purposes of sections 113, 114, 116, 120, 303, 304 and 307 and any other enforcement provisions of this Act, any requirement imposed under this subsection shall be treated as a standard in effect under section 112.

"(8) As a part of the guidance published pursuant to paragraph (2), the Administrator may collect and publish information on accident scenarios and consequences covering a range of possible events for substances listed under subsection (c). The Administrator shall establish a program of long-term research to develop and disseminate information on methods and techniques of hazard assessment which may be useful in improving and validating the procedures employed in the preparation of hazard assessments under this subsection.

"(e) CHEMICAL SAFETY BOARD.—

"(1) There is hereby established within the Environmental Protection Agency an independent safety board to be known as the Chemical Safety and Hazard Investigation Board.

"(2) The Board shall consist of three members, including a chairperson, who shall be appointed by the President, by and with the advice and consent of the Senate. Members of the Board shall be appointed on the basis of technical qualification, professional standing, and demonstrated knowledge in the fields of accident reconstruction, safety engineering, human factors, chemical safety, toxicology, or chemical regulation.

"(3) The terms of office of members of the Board shall be five years. Any member of the Board, including the chairperson, as determined by the President, may be removed for inefficiency, neglect of duty, or malfeasance in office.

"(4) The chairperson shall be the chief executive officer of the Board and shall exercise the executive and administrative functions of the Board including the selection, appointment and compensation of such officers and employees as are necessary to carry out the functions of the Board.

"(5) The Board shall—

"(A) investigate (or cause to be investigated), determine and report to the public in writing the facts, conditions, and circumstances and the cause or probable cause of any sudden, accidental release involving the production, processing, handling, or storage of chemical substances resulting in a fatality, serious injury, or substantial property damages;

"(B) issue periodic reports to the Congress, Federal, State, and local agencies, including the Environmental Protection Agency and the Occupational Safety and Health Administration, concerned with the safety of chemical production, processing, handling and storage, and other interested persons recommending measures to reduce the likelihood or the consequences of sudden, accidental releases and proposing corrective steps to make chemical production, processing, handling, and storage as safe and free from risk of injury as is possible and may include in such reports proposed rules or orders which should be issued by the Administrator under the authority of this section or the Secretary of Labor under the Occupational Safety and Health Act to prevent or minimize the consequences of any release of substances that may have an acute adverse effect on human health as a result of sudden events; and

"(C) establish by regulation requirements binding on persons for reporting accidental releases subject to the Board's investigatory jurisdiction under this paragraph: *Provided,* That, reporting releases to the National Response Center, in lieu of the Board directly, shall satisfy such regulations: *Provided further,* That, the Center shall promptly notify the Board of any releases which are within the Board's jurisdiction.

"(6) The Board shall coordinate its activities under paragraph (5) with investigations and studies conducted by other agencies of the United States having a responsibility to protect public health and safety. The Board shall enter into a memorandum of understanding with the National Transportation Safety Board to assure coordination of functions and to limit duplication of activities which shall designate the National Transportation Safety Board as the lead agency for the investigation of releases which are transportation related. The Board shall enter into a memorandum of understanding with the Occupational Safety and Health Administration so as to limit duplication of activities. In no event shall the Board forego an investigation where a sudden, accidental release involving the production, processing, handling, or storage of a chemical substance causes a fatality or serious injury among the general public, or had the potential to cause substantial property damage or a number of deaths or injuries among the general public.

"(7) The Board is authorized to conduct research and studies with respect to the potential for the sudden, accidental release of substances subject to section 302 of the Emergency Planning and Community Right-to-Know Act of 1986 and other extremely hazardous substances, whether or not an accidental release has occurred, where there is evidence which indicates the presence of a potential hazard or hazards. To the extent practicable, the Board shall conduct such studies in cooperation with other Federal agencies having emergency response authorities, State and local governmental agencies and associations and organizations from the industrial, commercial, and nonprofit sectors.

"(8) No part of the conclusions, findings, or recommendations of any report of the Board relating to any accidental release or the investigation thereof shall be admitted as evidence or used in any action or suit for damages arising out of any matter mentioned in such report.

"(9) Not later than eighteen months after the date of enactment of this section, the Board shall publish a report accompanied by recommendations to the Administrator on the use of hazard assessments in preventing the occurrence and minimizing the consequences of sudden, accidental releases of extremely hazardous substances. The recommendations shall include a list of extremely hazardous substances (including threshold quantities for such substances) and categories of facilities for which hazard assessments would be an appropriate measure to aid in the prevention of accidental releases and to minimize the consequences of those releases that do occur. The recommendations shall also include a description of the information and analysis which would be appropriate to include in any hazard assessment. The Board shall also make recommendations with respect to the role of risk management plans as provided for in subsection (f)(2) in preventing accidental releases. The Board may from time to time review and revise its recommendations under this paragraph.

"(10) Whenever the Board submits a recommendation with respect to the safety of chemical production, processing, handling, and storage to the Administrator, the Administrator shall respond to such recommendation formally and in writing not later than one hundred and eighty days after receipt thereof. The response to the Board's recommendation by the Administrator shall indicate whether the Administrator will—

"(A) initiate a rulemaking or issue such orders as are necessary to implement the recommendation in full or in part, pursuant to any timetable contained in the recommendation;

"(B) decline to initiate a rulemaking or issue orders as recommended.

Any determination by the Administrator not to implement a recommendation of the Board or to implement a recommendation only in part, including any variation from the schedule contained in the recommendation, shall be accompanied by a statement from the Administrator setting forth the reasons for such determination.

"(11) The Board may make recommendations with respect to the safety of chemical production, processing, handling, and storage to the Secretary of Labor. Whenever the Board submits such recommendation, the Secretary shall respond to such recommendation formally and in writing not later than one hundred and eighty days after receipt thereof. The response to the Board's recommendation shall indicate whether the Secretary will—

"(A) initiate rulemaking or issue such orders as are necessary to implement the recommendation in full or in part, pursuant to any timetable contained in the recommendation;

"(B) decline to initiate a rulemaking or issue orders as recommended.

Any determination by the Secretary not to implement a recommendation, or to implement a recommendation only in part, including any variation from the schedule contained in the recommendation, shall be accompanied by a statement from the Secretary setting forth the reasons for such determination.

"(12) The Board, or upon authority of the Board, any member thereof, any administrative law judge employed by or assigned to the Board, or any officer or employee duly designated by the Board, may for the purpose of carrying out duties authorized by paragraph (5)(A)—

"(A) hold such hearings, sit and act at such times and places, administer such oaths, and require by subpoena or otherwise attendance and testimony of such witnesses and the production of evidence and may require by order that any person engaged in the production, processing, handling, or storage of chemical substances submit written reports and responses to requests and questions within such time and in such form as the Board may require; and

"(B) upon presenting appropriate credentials and a written notice of inspection authority, enter any property where a sudden, accidental release causing a fatality, serious injury or substantial property damage has occurred and do all things therein necessary for a proper investigation pursuant to paragraph (5)(a) and inspect at reasonable times records, files, papers, processes, controls, and facilities and take such samples as are relevant to such investigation.

Whenever the Administrator or the Board conducts an inspection of a facility pursuant to this section, workers and their representatives shall have the same rights to participate in such inspections as provided for in the Occupational Safety and Health Act.

"(13) The Board is authorized to establish such procedural and administrative rules as are necessary to the exercise of its functions and duties. The Board is authorized without regard to section 5 of title 41 of the United States Code to enter into contracts, leases, cooperative agreements or other transactions as may be necessary in the conduct of the duties and functions of the Board with any other agency, institution, or person.

"(14) After the effective date of any reporting requirement promulgated pursuant to paragraph (5)(C) it shall be unlawful for any person to fail to report any release of any extremely hazardous substance as required by such paragraph. The Administrator is authorized to enforce any regulation or requirement established by the Board pursuant to paragraph (5)(C) using the authorities of section 113. Any request for information from the owner or operator of a facility made by the Board or by the Administrator under this section shall be treated, for purposes of sections 113, 114, 116, 120, 303, 304 and 307 and any other enforcement provisions of this Act, as a request made by the Administrator under section 114 and may be enforced by the chairperson of the Board or by the Administrator as provided in such sections.

"(15) The Administrator shall provide to the Board such support and facilities as may be necessary for operation of the Board.

"(16) Any records, reports, or information obtained by the Board shall be available to the public, except that upon a showing satisfactory to the Board by any person that records, reports, or information, or particular part thereof (other than release or emissions data) to which the Board has access, if made public, is likely to cause substantial harm to the person's competitive position, the Board shall consider such record, report, or information or particular portion thereof confidential in accordance with section 1905 of title 18 of the United States Code, except that such record, report, or information may be disclosed to other officers, employees, and authorized representatives of the United States concerned with carrying out this Act or when relevant under any proceeding under this Act. This paragraph does not constitute authority to withhold records, reports, or information from the Congress.

"(17) Whenever the Board submits or transmits any budget estimate, budget request, supplemental budget request, or other budget information, legislative recommendation, prepared testimony for congressional hearings, recommendation or study to the President, the Administrator, or the Director of the Office of Management and Budget, it shall concurrently transmit a copy thereof to the Congress. No officer or agency of the United States shall have authority to require the Board to submit its budget requests or estimates, legislative recommendations, prepared testimony, comments, recommendations or reports to any officer or agency of the United States for approval or review prior to the submission of such recommendations, testimony, comments or reports to the Congress. In the performance of their functions as established by this Act, the members, officers and employees of the Board shall not be responsible to or subject to supervision or direction of any officer or employee or agent of any other part of the Environmental Protection Agency or any other agency of the

United States except that the President may remove any member of the Board for inefficiency, neglect of duty or malfeasance in office.

"(18) The Board shall submit an annual report to the President and to the Congress which shall include, but not be limited to, information on sudden, accidental releases which have been investigated by or reported to the Board during the previous year, recommendations for legislative or administrative action which the Board has made, the actions which have been taken by the Administrator or the heads of other agencies to implement such recommendations, an identification of priorities for study and investigation in the succeeding year, progress in the development of risk-reduction technologies and the response to and implementation of significant research findings on chemical safety in the public and private sector.

"(19) There are authorized to be appropriated to carry out the provisions of this subsection not to exceed $12,000,000 in each of the fiscal years ending September 30, 1990, 1991, 1992, 1993, and 1994.

"(f) ACCIDENT PREVENTION.—(1) In order to prevent the release of substances listed pursuant to subsection (c) or other extremely hazardous substances (which may cause acute adverse effects on human health as the result of sudden events) from devices and systems (including, but not limited to, pumps, compressors, valves, flanges, connectors, containers, and vessels but not including rolling stock), the Administrator shall promulgate release prevention, detection, and correction requirements which shall include monitoring, recordkeeping, reporting, training, vapor recovery, secondary containment, and other design, equipment, work practice, and operational requirements. Regulations promulgated under this subsection may make distinctions between various types, classes, and kinds of facilities, devices, and systems taking into consideration factors including, but not limited to, the size, location, process, process controls, quantity of substances handled, potency of substances, and response capabilities present at any facility.

"(2) The regulations under this subsection may require the owner or operator of any facility handling an extremely hazardous substance to prepare and implement a risk management plan to detect and prevent or minimize the potential for an accidental release of extremely hazardous substances and to provide prompt emergency response in the event of a release. The Administrator may require that such plans be reviewed by an independent engineer and that any deficiencies identified be corrected.

"(3) In carrying out the authority of this subsection, the Administrator shall consult with the Secretary of Labor and seek to coordinate any requirements under this subsection with any requirements established for comparable purposes by the Occupational Safety and Health Administration. Nothing in this section shall be interpreted, construed, or applied to impose requirements affecting, or to grant the Administrator, the Chemical Safety and Hazard Investigation Board, or any other agency any authority to regulate (including requirements for hazard assessment), the accidental release of radionuclides arising from the construction and operation of facilities licensed by the Nuclear Regulatory Commission.

"(4) After the effective date of any regulation or requirement imposed under this subsection or subsection (g), it shall be unlawful for any person to operate a facility subject to such requirement in violation of such requirement.

"(g) DETECTION.—Within thirty-six months of enactment of this subsection, the Administrator shall conduct a study and report to Congress, assessing the best available technology to monitor devices and systems (including, but not limited to, pumps, compressors, valves, flanges, pipes, and pipelines, connnectors, processes, containers and vessels), storage facilities, and transfer points adequate to detect immediately and report concurrently to the facility operator accidental release of such substances from facilities regulated under this section. Such study shall include an assessment of the cost effectiveness and feasibility of each technology. The study shall build upon and not duplicate work conducted pursuant to section 305(b) of the Emergency Planning and Community Right-to-Know Act of 1986. After reviewing the findings of the study, the Administrator shall, within twenty-four months after completion, promulgate regulations, taking cost effectiveness and technological feasibility into account, with respect to accidental leak detection monitoring requirements.

"(h) ORDER AUTHORITY.—

"(1) In addition to any other action taken, when the Administrator determines that there may be an imminent and substantial endangerment to the public health or welfare or the environment because of an actual or threatened release of a substance listed pursuant to subsection (c) or other extremely hazardous substance from a facility, the Administrator may secure such relief as may be necessary to abate such danger or threat, and the district court of the United States in the district in which the threat occurs shall have jurisdiction to grant such relief as the public interest and the equities of the case may require. The Administrator may also, after notice to the State in which the facility is located, take other action under this subsection including, but not limited to, issuing such orders as may be necessary to protect human health, welfare, or the environment.

"(2) Any person who willfully violates, or fails or refuses to comply with, any order of the Administrator under paragraph (1) may, in an action brought in the appropriate United States district court to enforce such order, be fined not more than $25,000 for each day in which such violation occurs or failure to comply continues.

"(3) Within one hundred and eighty days after enactment of this section, the Administrator shall publish guidance for using the order authorities established by this subsection. Such guidance shall provide for the coordinated use of the authorities of this subsection with other emergency powers authorized by section 106 of the Comprehensive Environmental Response, Compensation, and Liability Act, sections 311(c), 308, 309, and 504(a) of the Federal Water Pollution Control Act, sections 3007, 3008, 3013, and 7003 of the Solid Waste Disposal Act, sections 1445 and 1431 of the Safe Drinking Water Act, sections 5 and 7 of the Toxic Substances Control Act, and sections 113, 114, and 303 of this Act.

"(i) ENFORCEMENT.—Each requirement under this section shall, for purposes of sections 113, 114, 116, 120, 304 and 307 and other enforcement provisions of this Act, be treated as a standard in effect under section 112.

"(j) PRESIDENTIAL REVIEW.—The President shall conduct a review of release prevention, mitigation, and response authorities of the various Federal agencies and shall clarify and coordinate agency responsibilities to assure the most effective and efficient implementation of such authorities and to identify any deficiencies in authority or resources which may exist. The President may utilize the resources and solicit the recommendations of the Board in conducting such review. At the conclusion of such review, but not later than twenty-four months after the date of enactment of this section, the President shall transmit a message to the Congress on the release prevention, mitigation, and response activities of the Federal Government making such recommendations for change in law as the President may deem appropriate. Nothing in this subsection shall be interpreted, construed, or applied to authorize the President to modify or reassign release prevention, mitigation, or response authorities otherwise established by law.

"(k) STATE AUTHORITY.—Nothing in this section shall preclude, deny, or limit any right of a State or political subdivision thereof to adopt or enforce any regulation, requirement, or standard (including any procedural requirement) that is more stringent than a regulation, requirement, or standard in effect under this section or that applies to a substance not subject to this section.

"(l) AUTHORIZATION.—There are authorized to be appropriated to the Administrator such sums as may be necessary to carry out the provisions of this section.".

CONFORMING AMENDMENTS

SEC. 305. (a) Section 111(d)(1) of the Clean Air Act is amended by striking "112(b)(1)(A)" and inserting in lieu thereof "112(b)".

(b) Section 111 of the Clean Air Act is amended by striking paragraphs (g)(5) and (g)(6) and redesignating the succeeding paragraphs accordingly. Such section is further amended by striking "or section 112" in paragraph (g)(5) as redesignated in the preceding sentence.

(c) Section 114(a) of the Clean Air Act is amended by striking "or" after "section 111," and by inserting ", or any accident prevention regulation under section 129," after "section 112".

(d) Section 118(b) of the Clean Air Act is amended by striking "112(c)" and inserting in lieu thereof "112(i)(9)".

(e) Section 302(k) of the Clean Air Act is amended by adding before the period at the end thereof ", and any design, equipment, work practice, or operational standard authorized by this Act constitutes a violation of an 'emission standard' whether or not an air pollutant is emitted to the ambient air".

(f) Section 304(b)(1) of the Clean Air Act is amended by striking "112(c)(1)(B)" and inserting in lieu thereof "112".

(g) Section 307(b)(1) is amended by striking "112(c)" and inserting in lieu thereof "112".

MUNICIPAL WASTE COMBUSTION: AIR EMISSIONS

SEC. 306. (a) Part A of title I of the Clean Air Act is amended by adding the following new section at the end thereof:

"MUNICIPAL WASTE COMBUSTION

"SEC. 130. (a) NEW SOURCE PERFORMANCE STANDARDS.—

"(1)(A) The Administrator shall establish performance standards and other requirements pursuant to section 111 and this section for each category of solid waste incineration units. Such standards shall include

emissions limitations and other requirements applicable to new units and guidelines (under section 111(d) and this section) and other requirements applicable to existing units.

"(B) Standards under section 111 and this section applicable to solid waste incineration units with capacity greater than 250 tons per day combusting municipal waste shall be promulgated not later than six months after the date of enactment of this section.

"(C) Standards under section 111 and this section applicable to solid waste incineration units with capacity equal to or less than 250 tons per day combusting municipal waste or units combusting hospital waste, medical waste and infectious waste shall be promulgated not later than twenty-four months after the date of enactment of this section.

"(D) Standards under section 111 and this section applicable to solid waste incineration units combusting commercial or industrial waste shall be proposed not later than thirty-six months after the date of enactment of this section and promulgated not later than forty-eight months after the date of enactment of this section.

"(E) Not later than eighteen months after the date of enactment of this section, the Administrator shall publish a schedule for the promulgation of standards under section 111 and this section applicable to other categories of solid waste incineration units.

"(2) Standards applicable to solid waste incineration units promulgated under section 111 and this section shall reflect the greatest degree of emission reduction achievable through application of the best available control technologies and practices which the Administrator determines at the time of promulgation (or revision, in the case of a revision of a standard)—

"(A) has been achieved in practice by a solid waste incineration unit in the same category, excluding periods of malfunction or misoperation, or

"(B) is contained in a State or local regulation or any permit for solid waste incineration units in the category, and will be implemented at such units,

whichever is more stringent, unless the Administrator determines that such degree of emissions limitation will not be achievable by units to which the standards apply or was adopted for reasons that are not nationally applicable or is otherwise not appropriate as a nationally applicable standard. In determining the emissions limitation to be required under section 111 and pursuant to this subsection, the Administrator shall take into account the performance of all units which achieve, in whole or in part, emissions limitations more stringent than current standards and may subsequently exclude units from consideration only to the extent provided in this subparagraph. The Administrator shall distinguish among classes, types (including mass-burn, refuse-derived fuel, modular and other types of units), and sizes of units within a category in establishing such standards. Emissions limitations and other requirements applicable to existing units may be less stringent than such limitations and requirements applicable to new units.

"(3) Standards under section 111 and this section applicable to solid waste incineration units shall be based on methods and technologies for removal or destruction of pollutants before, during, or after combustion, and shall incorporate siting requirements that minimize, on a site-specific basis, to the maximum extent practicable, potential risks to human health or the environment.

"(4) The performance standards promulgated under section 111 and this section and applicable to solid waste incineration units shall specify opacity (as appropriate) numerical emission limitations for the following substances or mixtures: particulate matter (total and fine), sulfur dioxide, hydrogen chloride, oxides of nitrogen, carbon monoxide, lead, cadmium, mercury, and dioxins and dibenzofurans. The Administrator may promulgate numerical emissions limitations or provide for the monitoring of post combustion concentration of surrogate substances, parameters or periods of residence time in excess of stated temperatures with respect to pollutants other than those listed in this paragraph.

"(5) Not later than five years following the initial promulgation of any performance standards and other requirements under this section and section 111 applicable to a category of solid waste incineration units, and at five year intervals thereafter, the Administrator shall review, and in accordance with this section and section 111, revise such standards and requirements.

"(b) EXISTING UNITS.—

"(1) Performance standards under this section and section 111 for solid waste incineration units shall include guidelines promulgated pursuant to section 111(d) and this section applicable to existing units. Such guidelines shall include as provided in this section each of the elements required by subsection (a) (emissions limitations), subsection (c) (monitoring), subsection (d) (source separation, recycling and ash management), subsection (e) (operator training) and subsection (f) (permits) of this section.

"(2) Not later than one year after the Administrator promulgates guidelines for a category of solid waste incineration units, each State in which units in the category are operating shall submit to the Administrator a plan to implement and enforce the guidelines with respect to such units. The State plan shall be at least as protective as the guidelines promulgated by the Administrator and shall provide that each unit subject to the guidelines shall be in compliance with all requirements of this section not later than three years after the State plan is approved by the Administrator but not later than five years after the guidelines were promulgated. The Administrator shall approve or disapprove any State plan within one hundred and eighty days of the submission, and if a plan is disapproved, the Administrator shall state the reasons for disapproval in writing. Any State may modify and resubmit a plan which has been disapproved by the Administrator.

"(3) The Administrator shall develop, implement and enforce a plan for existing solid waste incineration units within any category located in any State which has not submitted an approvable plan under this subsection with respect to units in such category within two years after the date on which the Administrator promulgated the relevant guidelines. Such plan shall assure that each unit subject to the plan is in compliance with all provisions of the guidelines not later than five years after the date the relevant guidelines were promulgated.

"(4) Publicly owned existing municipal waste incinerators which are permitted by a State agency responsible for the protection from contamination of the water resource of the State and for the enforcement of a coordinated statewide solid waste management program designed to achieve a 30 per centum reduction by the end of 1994 of municipal solid waste prior to final disposal or inceneration, and which, after recycling, utilize resource recovery for at least 75 per centum of their solid waste management disposal technology for their solid waste flow control area, and for which either of the following applies: (A) a health risk assessment completed prior to the effective date of enactment of this section in accordance with State regulatory guidelines has concluded that the associated health risk is negligible; or (B) a retrofit of acid gas scrubbing or baghouse particulate control systems would cause diversion of refuse to a landfill where the municipal waste incinerator does not control tipping fees or accessibility, shall be deemed to be in compliance with paragraphs (2) (C) and (D), when such incenerators are equipped with a dry sorbent injection system which is installed and operated in accordance with guidelines published by the Administrator.

The Administrator shall promulgate a schedule for compliance with the standards required by this subsection. In no event shall such schedule provide for compliance with such standards later than the date six years after the enactment of this section.

"(c) MONITORING.—The Administrator shall, as part of each performance standard promulgated pursuant to subsection (a) and section 111, promulgate regulations requiring the owner or operator of each solid waste incineration unit—

"(1) to monitor emissions from the unit at the point at which such emissions are emitted into the ambient air (or within the stack, combustion chamber or pollution control equipment, as appropriate) and at such other points as necessary to protect human health and the environment;

"(2) to monitor such other parameters relating to the operation of the unit and its pollution control technology as the Administrator determines are appropriate; and

"(3) to report the results of such monitoring.

Such regulations shall contain provisions regarding the frequency of monitoring, test methods, and procedures validated on solid waste incineration units, and the form and frequency of reports containing the results of monitoring and shall require that any monitoring reports or test results indicating an exceedance of any standard under this section shall be reported separately and in a manner that facilitates review for purposes of enforcement actions. Such regulations shall require that copies of the results of such monitoring be maintained on file at the facility concerned and that copies shall be made available for inspection and copying by interested members of the public during business hours.

"(d) SOURCE SEPARATION, RECYCLING AND ASH MANAGEMENT.—

"(1) As part of any performance standard or guidelines for solid waste incineration units combusting municipal waste promulgated pursuant to this section and section 111, the Administrator shall include regulations for recycling applicable to jurisdictions served by such units. Such regulations shall provide, beginning twelve months after promulgation of performance standards under subsection (a)(2), that no permit shall be issued under this Act to a solid waste incineration unit combusting municipal waste unless each of the jurisdictions served by the municipal waste incineration unit (as designated by the State in accord-

ance with section 4006 of the Solid Waste Disposal Act) has been certified by the director of the solid waste program for the State in which the unit is to be located in compliance or subject to an enforceable schedule to be in compliance with all solid waste planning requirements under the Solid Waste Disposal Act with respect to planning and the director has approved a plan for each jurisdiction (enforceable pursuant to subsection (h) against the jurisdiction) which will achieve a municipal waste recycling rate of at least 25 per centum of the municipal waste (but not including construction waste) generated within the service area of the unit, (i) before such unit begins operation or four year after a permit is issued for the unit, whichever is later, if such unit is a new unit, and (ii) not later than five years after the date of enactment of this section if such unit is an existing unit. If the director determines that recycling at such rate is not economically feasible or that recycling capacity does not exist to achieve such rate, the director shall establish an alternative rate. Any determination under the preceding sentence shall be reviewed not less frequently than every two years. The director may provide additional time, but not to exceed five additional years, for jurisdictions served by an existing unit to achieve the recycling rate required by this subparagraph: *Provided,* That any such extension shall include annual milestones which demonstrate progress toward achieving the required rate. The Administrator (or a State with a program approved under subsection (g)) is authorized to use the authorities of section 113 to enforce the requirements established under this paragraph. Yard waste shall not be credited for more than 40 per centum of the recycled waste volume for purposes of the recycling requirement under this paragraph.

"(2)(A) At the time of promulgating any performance standard for a category of solid waste incineration units, the Administrator shall publish guidelines identifying items or materials that should be removed from municipal or solid waste to be combusted in such units, the removal of which has been demonstrated in the judgment of the Administrator to reduce the concentration of the pollutants identified in subsection (a)(5) over and above the concentration of such pollutants after treatment by the post-combustion technologies set forth in subsection (a) (3) and (4) (to the extent that standards for the category of units are based on the availability of such technologies for units in the category).

"(B) Nothing in this section or section 4011 of the Solid Waste Disposal Act shall authorize the Administrator to prohibit or limit the mining, processing or manufacture of any product, article or substance for any purpose.

"(C) Regulations under this section shall require the operator of any solid waste incineration unit to establish contractual requirements or other appropriate notification and inspection procedures sufficient to assure that the unit does not receive any waste required to be placed in a facility permitted under section 3005 of the Solid Waste Disposal Act.

"(3) Except as provided in this subsection, the Administrator shall not require solid waste recycling or materials separation with regard to the waste combusted by a solid waste incineration unit pursuant to the authority under this Act. Nothing in this section shall diminish the authority of the Administrator to require recycling and materials separation under the Solid Waste Disposal Act.

"(4) Effective twelve months after the date of enactment of this section, the disposal or combustion of lead-acid batteries in solid waste incineration units is prohibited. The Administrator shall publish guidelines with respect to the management of discarded lead-acid batteries.

"(5)(A) Beginning twelve months after the date of enactment of this section, no permit may be issued under this Act to a solid waste incineration unit unless an ash management plan has been submitted for the ash from such unit. The application for each permit to be issued to a new or modified municipal waste incineration unit or renewal or issuance of a permit for an existing unit, shall include a reasonable demonstration of adequate capacity to treat, manage, or dispose of the ash produced by the unit for a period of not less than five years in compliance with the requirements of section 4011 of the Solid Waste Disposal Act. Demonstrations required by this paragraph shall be updated every five years as required by subsection (f).

"(B) The Administrator may promulgate regulations or issue guidelines for the implementation of this paragraph which shall provide that, to the extent practicable, demonstrations are based on the characteristics of ash from the solid waste incineration unit as determined by testing methods prescribed pursuant to section 4011 of the Solid Waste Disposal Act. The initial demonstration required for new or modified solid waste incineration units under this paragraph shall be based on the characteristics of the ash from units of comparable design (including pollution control equipment and ash treatment systems) combusting similar waste streams.

"(C) Notwithstanding any other provision of this Act or the Solid Waste Disposal Act, no person may operate a solid waste incineration unit unless adequate capacity is available to treat, manage or dispose of the ash produced by the unit in compliance with section 4011 of the Solid Waste Disposal Act.

"(e) OPERATOR TRAINING.—Not later than twenty-four months after the enactment of this section, the Administrator shall develop and promote a model State program for the training of solid waste incineration unit operators. The Administrator may authorize any State or private entity to implement a State program for the training of solid waste incineration unit operators if the State or private entity has adopted a program which is at least as effective as the model program developed by the Administrator. Beginning on the date thirty-six months after the date on which performance standards and guidelines are promulgated under subsection (a) and section 111 for any category of solid waste incineration units it shall be unlawful to operate any unit in the category unless each person with control over processes affecting emissions from such unit has satisfactorily completed a training program meeting the requirements established by the Administrator under this subsection.

"(f) PERMITS.—Beginning thirty-six months after the promulgation of a performance standard under subsection (a) and section 111 applicable to a category of solid waste incineration units, each unit in the category shall operate pursuant to a permit issued under this subsection and part B of title III. Notwithstanding any other provision of this Act, each permit for a solid waste incineration unit combusting municipal waste issued under this Act shall be issued for a period of up to thirty years and shall be reviewed every five years after date of issuance or reissuance. Each permit shall continue in effect after the date of issuance until the date of termination, unless the Administrator or State determines—

"(1) that the unit is not in compliance with all standards and conditions contained in the permit; or

"(2) capacity to treat or dispose of the ash from such unit in compliance with section 4011 of the Solid Waste Disposal Act for a five-year period after such determination has not been demonstrated.

Such determination shall be made at regular intervals during the term of the permit, such intervals not to exceed five years, and only after public comment and public hearing. No permit for a solid waste incineration unit may be issued under this Act by an agency, instrumentality or person that is also responsible, in whole or part, for the design and construction or operation of the unit. Notwithstanding any other provision of this subsection, the Administrator or the State shall require the owner or operator of any unit to comply with emissions limitations or implement any other measures, if the Administrator or the State determines that emissions in the absence of such limitations or measures may reasonably be anticipated to endanger public health or the environment. The Administrator's determination under the preceding sentence is a discretionary decision.

"(g) STATE PROGRAMS.—Any State may submit to the Administrator a proposed State program for implementation and concurrent enforcement of the requirements of this section. The Administrator shall approve or disapprove any State program proposed under this subsection within one hundred and eighty days of submission. Whenever the Administrator determines that a State is not enforcing the requirements of this section in a manner equivalent to Federal enforcement, the Administrator shall withdraw the authorization for such State. Each State program approved under this subsection shall, at a minimum, include permitting requirements for each new and existing solid waste incineration unit located in the State. Any permit issued by a State may be reviewed and withdrawn by the Administrator on the Administrator's own motion or upon a showing by any person that the conditions contained in such permit are not in compliance with the requirements of this Act.

"(h) EFFECTIVE DATE AND ENFORCEMENT.—

"(1) Performance standards and other requirements promulgated pursuant to this section and section 111 and applicable to new solid waste incineration units shall be effective as of the date six months after the date of promulgation.

"(2) Performance standards and other requirements promulgated pursuant to this section and section 111 and applicable to existing solid waste incineration units shall be applicable as expeditiously as practicable after approval of a State plan under subsection (b)(2) (or promulgation of a plan by the Administrator under subsection (b)(3)) but in no event later than five years after the date of such standards of requirements are promulgated.

"(3) After the effective date of any performance standard, emissions limitation or other requirement promulgated pursuant to this section, it shall be unlawful for any

owner or operator of any solid waste incineration unit to which such standard, limitation or requirement applies to operate such unit in violation of such limitation, standard or requirement or for any other person to violate an applicable requirement of this section.

"(4) For purposes of sections 111(e), 113, 114, 116, 120, 303, 304, 307 and other provisions for the enforcement of this Act, each performance standard, emissions limitation or other requirement established pursuant to this section including any requirement for recycling imposed under subsection (d) by the Administrator or a State or local government, shall be treated in the same manner as a standard of performance under section 111 which is an emissions limitation. Actions to enforce compliance with the recycling requirements of subsection (d)(1) may only be brought against the governments of the jurisdictions served by the unit, unless it is established by agreement between the governments of the jurisdictions served by the unit and the owner or operator of the unit that the owner or operator will be responsible for compliance with some or all aspects of the requirements of subsection (d)(1) in which case an action to enforce may be brought against the owner or operator of the facility with regard to the aspects of the recycling requirement for which it is responsible.

"(5) Any civil penalty imposed by a court against a unit of local government under this Act for violations of this section shall be paid into a trust fund or comparable mechanism established by a court or the State and shall be applied in support of public programs or activities, as authorized by the court (or a fund administrator appointed by the court), that serve to enhance the protection of human health and the environment of the persons residing within the jurisdiction of such unit of local government but shall not be used to comply with requirements established under this section, section 111 or section 4011 of the Solid Waste Disposal Act.

"(i) DEFINITIONS.—As used in this section—

"(1) The term 'solid waste incineration unit' means a distinct operating unit of any facility which combusts any solid waste material from commercial or industrial establishments or the general public (including single and multiple residences, hotels, and motels). Such term does not include incinerators or other units required to have a permit under section 3005 of the Solid Waste Disposal Act. The term 'solid waste incineration unit' does not include (A) materials recovery facilities (including primary or secondary smelters) which combust waste for the primary purpose of recovery metals, (B) qualifying small power production facilities, as defined in section 3(17)(C) of the Federal Power Act (16 U.S.C. 769 (17)(C)), or qualifying cogeneration facilities, as defined in section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)), which burn homogeneous waste (such as units which burn tires or used oil, but not including refuse-derived fuel) for the production of electric energy or in the case of qualifying cogeneration facilities which burn homogeneous waste for the production of electric energy and steam or forms of useful energy (such as heat) which are used for industrial, commercial, heating or cooling purposes, or (C) air curtain incinerators provided that such incinerators only burn wood wastes, yard wastes and clean lumber and that such incinerators comply with opacity limitations to be established by the Administrator by rule.

"(2) The term 'new solid waste incineration unit' means a solid waste incineration unit the construction or modification of which is commenced after the Administrator proposes requirements under this section establishing emissions standards or other requirements which would be applicable to such unit. Any solid waste incineration unit which combusts municipal waste and is granted an operating permit with a term of thirty years pursuant to subsection (f) shall be considered a new solid waste incineration unit for the purposes of this section upon the expiration date of such permit.

"(3) The term 'modified solid waste incineration unit' means a solid waste incineration unit at which modifications have occurred after the effective date of a standard under subsection (a) if (A) the cumulative cost of the modifications, over the life of the unit, exceed 50 per centum of the original cost of construction and installation of the unit (not including the cost of any land purchased in connection with such construction or installation) updated to current costs, or (B) the modification is a physical change in or change in the method of operation of the unit which increases the amount of any air pollutant emitted by the unit for which standards have been established under this section or section 111.

"(4) The term 'existing solid waste incineration unit' means a solid waste incineration unit which is not a new or modified solid waste incineration unit.

"(5) The term 'municipal waste' means refuse (or refuse-derived fuel) collected from the general public more than 30 per centum of which consists of paper, wood, yard wastes, food wastes, plastics, leather, rubber, and other combustible materials and noncombustible materials such as glass and metal including household wastes and waste from institutional, commercial, and industrial sources, but does not include industrial process wastes or medical wastes.

"(6) The terms 'solid waste' and 'medical waste' shall have the meanings established by the Administrator pursuant to the Solid Waste Disposal Act.

"(j) OTHER AUTHORITY.—

"(1) Nothing in this section shall preclude or deny the right of any State or political subdivision thereof to adopt or enforce any regulation, requirement, or standard relating to solid waste incineration units that is more stringent than a regulation, requirement, or standard in effect under this section or under any other provision of this Act.

"(2) Nothing in this section shall diminish the authority of the Administrator or a State to establish any other requirements under any other authority of law, including the authority to establish for any such air pollutant a national ambient air quality standard, except that no solid waste incineration unit subject to performance standards under this section and section 111 shall be subject to standards under section 112 of this Act. Solid waste incineration units shall not be affected units for purposes of title IV of this Act.

"(3) No requirement of an applicable implementation plan under section 165 (relating to construction of facilities in regions identified pursuant to section 107(d)(1) (D) or (E)) or under section 172(b)(6) (relating to permits for construction and operation in nonattainment areas) may be used to weaken the standards in effect under this section.".

(b) Section 169(1) of the Clean Air Act is amended by striking "two hundred and" after "municipal incinerators capable of charging more than".

(c) Prior to the promulgation of any performance standard for solid waste incineration units combusting municipal waste under section 111 or section 130 of the Clean Air Act, the Administrator shall review the availability of acid gas scrubbers as a pollution control technology for small new units and for existing units (as defined in 54 Federal Register 52190-52304 (December 20, 1989)), taking into account the provisions of subsection (a)(2) of section 130 of the Clean Air Act.

ASH MANAGEMENT AND DISPOSAL

SEC. 307. (a) Subtitle D of the Solid Waste Disposal Act is amended by adding the following new section:

"MUNICIPAL WASTE COMBUSTION ASH

"SEC. 4011. (a) IN GENERAL.—(1) Not later than eighteen months after the date of enactment of this section, the Administrator shall promulgate regulations for the management, handling, storage, treatment, transportation, reuse, recycling, and disposal of ash from municipal waste incineration units, as may be necessary to protect human health and the environment. Notwithstanding other provisions of this Act, the management, handling, storage, treatment, transportation, reuse, recycling, and disposal of ash from municipal waste incineration units shall be subject to this section and subtitle and not subject to the provisions of subtitle C. The provisions of section 3007, 3008, and 3013 shall apply to ash from municipal waste incineration units and the requirements of this section to the same extent that such sections apply to hazardous wastes and the requirements of subtitle C.

"(2) For the purposes of this section, the term—

"(A) 'municipal waste incineration unit' means a solid waste incineration unit combusting municipal waste as such terms are defined in section 130 of the Clean Air Act; and

"(B) 'treatment' means any method, technique, or process designed to change the physical, chemical, or biological character or composition of any ash so as to remove or permanently fix in place any constituent of the ash which, in the event of mismanagement during transportation, storage, reuse or disposal, may pose a threat to human health or the environment and includes testing of such ash to assure that criteria promulgated under subsection (e) are satisfied.

"(3) Regulations promulgated under this section may establish requirements that apply to fly ash separately, to bottom ash separately, or to the combination of fly ash and bottom ash.

"(b) DISPOSAL.—(1) Regulations promulgated under subsection (a) for the disposal of ash from municipal waste incineration units in landfills shall require—

"(A) the installation of a double liner consisting of one flexible membrane liner and a composite liner with a leachate collection system above and between such liners, in accordance with paragraph (2); and

"(B) groundwater monitoring.

"(2) The requirement of paragraph (1)(A) may be satisfied by the installation of liners designed, operated, and constructed of materials to prevent the migration of any constituent into and through such liners during the period such facility remains in oper-

ation (including any post-closure monitoring period). For the purposes of this section the term 'composite liner' means a liner which consists of a flexible membrane liner and at least a 3-foot thick layer of recompacted clay or other natural material with a hydraulic conductivity of no more than 1×10^{-7} centimeter per second. The provisions of this paragraph apply prior to and after the promulgation of regulations under paragraph (1).

"(3)(A) Notwithstanding the requirement of paragraph (1)(A), regulations promulgated under subsection (a) shall authorize the placement of ash from municipal waste incineration units in a monofill (containing only ash from such units) with a composite liner designed, operated and constructed of materials to prevent the migration of any constituent into and through such liner during the period the monofill remains in operation (including any post-closure monitoring period), ground water monitoring and a leachate collection system.

"(B) For the purpose of paragraph (4), a monofill (containing only ash from municipal waste incineration units) with two or more flexible membrane liners, a leachate collection system above and between such liners and ground water monitoring is determined to be an alternative design which will prevent the migration of any hazardous constituent into ground water or surface water at least as effectively as the design requirements of subparagraph (A).

"(C) If fly ash is to be disposed in a monofill containing solely or substantially fly ash, such ash shall be treated pursuant to treatment standards established under this section before disposal or such monofill shall be constructed with an additional liner and a leachate detection and collection system between the liners.

"(D) Requirements under this paragraph are minimum requirements and the Administrator shall promulgate more stringent requirements applicable where necessary to assure that releases from a monofill will not contaminate ground water or surface water or otherwise pose a threat of adverse effects on human health or the environment.

"(4) The design requirements of paragraphs (1) and (3) shall not apply if the owner or operator of a solid waste management unit utilizing an alternative design demonstrates to the State, and the State finds, that the alternative design will prevent the migration of any hazardous constituent into the ground water or surface water at least as effectively as the design requirements of paragraph (1) or (3) of this subsection. The State shall not solely or substantially rely upon location characteristics to make any determination under this paragraph. States may authorize such alternative design requirements only under a permit program approved by the Administrator as required under subsection (f) of this section. The Administrator may review, on appeal by any person or on the Administrator's own motion, and reverse any determination made by a State under this subsection. The Administrator shall make a decision on any appeal within one hundred and eighty days.

"(5) Liner requirements imposed under paragraph (1) or (3) of this subsection or subsection (c) shall include provisions for quality control and quality assurance with respect to the design and installation of the liners.

"(6) Nothing in this section shall be interpreted, construed or applied to require the routine testing of ash which is disposed in a landfill or monofill meeting the requirements of this subsection.

"(c) DISPOSAL IN SANITARY LANDFILLS.—Regulations promulgated under subsection (a) may allow disposal of ash from municipal waste incineration units in sanitary landfills with at a minimum one liner, leachate collection and ground water monitoring and otherwise meeting the requirements of revised criteria promulgated under section 4010(c), if (1) such ash is routinely tested and does not fail any criteria under subsection (e); and (2) any fly ash so disposed (including any fly ash combined with bottom ash) has undergone treatment (as defined in subsection (a)) in accordance with regulations for treatment promulgated under this section and such treated fly ash is separately tested and does not fail any criteria established under subsection (e). For the purposes of this section, the mixing of fly ash and bottom ash, or the mixing of such ash with other solid waste, without the introduction of chemical stabilization agents, does not constitute treatment. Ash may not be disposed of in units that are created as a result of vertical expansion of an existing waste disposal facility unless the owner or operator of such facility demonstrates, and the State finds, that there will be no settling (that would impair the integrity of any required liner, leachate collection or leak detection system, final cover, or any other structural component of the landfill containment system) of the waste upon which the proposed unit is to be built. In no event may such ash be disposed in a landfill from which the Administrator or the State has determined there is a release into ground water or surface water, unless such release would not require corrective action pursuant to Federal or State law or regulation or landfill that is in violation of Federal or State regulations or other requirements.

"(d) REUSE.—(1) The regulations under this section shall include such requirements applicable to the reuse and recycling of the ash from municial waste incineration units, including criteria and routine testing procedures, as may be necessary to protect human health and the environment. The Administrator shall develop such regulations for the specific end uses of such reused or recycled ash. In developing such regulations, the Administrator shall consider, to the extent feasible and appropriate, all potential pathways of human and environmental exposure, including both short-term and long-term, to hazardous constituents of such ash from such recycling and reuse. The pathways to be considered shall include, but not be limited to, inhalation, ingestion as a consequence of incorporation of the ash or any hazardous constitutents into the food chain, ingestion of potable water or aquatic organisms contaminated by surface runoff, leaching or percolation of such ash or its hazardous constituents into ground water or surface water, ingestion or inhalation of soil particles contaminated with such ash, and dermal contact with such ash. At a minimum the Administrator shall consider with respect to such recyling and reuse, appropriate methods to determine leaching, total chemical analysis, respirability, and toxicity.

"(2) Such regulations shall require treatment of ash from municipal waste incineration units before any such ash is recycled or reused to protect human health and the environment. Such regulations shall specify those levels or methods of treatment that, taking into account the potential pathways of exposure identified in paragraph (1)—

"(A) substantially reduce the likelihood of migration of ash or its hazardous constituents so that short-term and long-term threats to human health and the environment are minimized;

"(B) satisfy any criteria and routine testing procedures included in the regulations under paragraph (1); and

"(C) assure that the recycling or reuse of such ash is protective of human health and the environment.

"(3) If the Administrator fails to promulgate regulations under this subsection, no person may reuse or recycle ash from a municipal waste incineration unit after the date thirty-six months after the date of enactment of this section unless such ash is treated and leachate from an extraction procedure toxicity test applied to such ash does not exceed standards established pursuant to section 1412 of the Safe Drinking Water Act.

"(e) CRITERIA AND TESTING.—(1) For the purposes of developing regulations for the management, handling, storage, treatment, transportation, reuse, recycling, and disposal of ash from municipal waste incineration units under this section, the Administrator shall, not later than eighteen months after the date of enactment, promulgate criteria and testing procedures for identifying the characteristics of ash from municipal waste incineration units that may pose a hazard to human health or the environment. In considering potential hazards to human health and the environment, the Administrator shall consider, to the extent appropriate and feasible, all potential pathways of human or environmental exposure to constituents of such ash, including, but not limited to, inhalation, ingestion as a consequence of incorporation of the ash or any constituent into the food chain, ingestion of potable water or aquatic organisms contaminated by surface runoff, leaching or percolation of such ash or its constituents into ground water or surface water, ingestion or inhalation of soil particles contaminated with such ash, and dermal contact with such ash (including, for all such pathways, situations of disposal or reuse). At a minimum, the Administrator shall consider appropriate methods to determine leaching, total chemical analysis, respirability, and toxicity. The criteria and accompanying testing procedures promulgated by the Administrator under this subsection shall reflect the heterogeneous characteristics of municipal solid waste and ash from municipal waste incineration units, including seasonal variations in the constituents of such solid waste and ash. Leaching procedures established under this subsection shall include testing under acidic and native conditions. Test leachate from any ash containing a substance in concentrations exceeding and maximum contaminant level for such substance established pursuant to section 1412 of the Safe Drinking Water Act by a factor of one hundred or more shall, unless the Administrator establishes a more stringent requirement, constitute a failure of the test required by this section.

"(2) When disposal of ash occurs pursuant to subsection (c) or (d), the Administrator shall require the owner or operator of any municipal waste incineration unit or any facility handling, transporting, storing, treating, reusing, recylcing, or disposing of ash from such unit to test such ash in accordance with the appropriate criteria and testing procedures promulgated under this subsection. If fly ash and bottom ash are combined, such combined ash must also be

tested in accordance with such criteria and testing procedures, including, as the Administrator determines necessary, the separate testing of bottom ash and fly ash.

"(3) Any ash which fails in any characteristic under the appropriate criteria and testing procedures promulgated by the Administrator under this subsection shall be disposed of in a facility in compliance with subsection (b) (1) or (3), or shall be treated (as defined in subsection (a)) in accordance with regulations promulgated under subsection (a) and shall be demonstrated to satisfy all applicable criteria promulgated under this subsection before disposal (pursuant to subsection (c)) or reuse (pursuant to subsection (d)).

"(4) The Administrator shall seek to validate the criteria and testing procedures established pursuant to this subsection by conducting a program of analysis of leachate produced at facilities disposing or reusing ash from municipal waste incineration units.

"(f) PERMITS.—(1) Beginning thirty months after the date of enactment of this section any facility receiving ash from municipal waste incineration units for the purpose of treatment, storage, reuse, recycling, or disposal shall be subject to a permit program or other system of prior approval and conditions comparable to those required by section 4005(c).

"(2) Before the issuance of a permit or other prior approval to any person with respect to any facility for treatment, storage, reuse, recycling or disposal of incinerator ash, the Administrator or the State shall provide for public notice and the opportunity for an informal public hearing, in accordance with the provisions of section 7004(b)(2) of this Act.

"(g) CORRECTIVE ACTION.—

(1) Corrective action regulations issued pursuant to subsection 4010(c) when promulgated, shall apply to any facility regulated under this section. The Administrator may establish such additional requirements for units regulated under this section as may be necessary to protect human health and the environment.

(2)(A) Until such time as regulations are promulgated pursuant to paragraph (1), whenever on the basis of any information the Administrator determines that there is or has been a release of any hazardous constituent from a facility regulated under this section, the Administrator may issue an order requiring corrective action or such other response measure as the Administrator deems necessary to protect human health or the environment or the Administrator may commence a civil action in the United States district court in the district in which the facility is located for appropriate relief, including a temporary or permanent injunction.

"(B) Any order issued under this subsection may include a suspension or revocation of authorization to operate, shall state with reasonable specificity the nature of the required corrective action or other response measure, and shall specify a time for compliance. If any person named in an order fails to comply with the order, the Administrator may assess, and such person shall be liable to the United States for, a civil penalty in an amount not to exceed $25,000 for each day of noncompliance with the order.

"(C) Regulations promulgated under subsection (a) shall require corrective action for all releases pursuant to Federal or State law or regulation of hazardous constituents from any solid waste management unit at a facility seeking a permit under this section, regardless of the time at which waste was placed in such unit. Permits issued under this section shall contain schedules of compliance for such corrective action and assurances of financial responsibility for completing such corrective action.

"(h) CLOSURE.—Regulations promulgated under subsection (a) shall establish requirements for the proper closure of facilities treating, storing, or disposing of ash from municipal waste incineration units, for the post-closure monitoring and care of such facilities for a period of not less than thirty years, and for assurances of financial responsibility for closure, post-closure care and corrective action.

"(i) STATE PROGRAMS.—(1) Beginning eighteen months after the date of enactment of this section, any State may submit to the Administrator a proposed program for implementation and concurrent enforcement of the requirements of this section which may be considered and approved by the Administrator in accordance with the procedures established in section 4007. State programs approved under this subsection shall contain provisions assuring that each facility receiving ash from a municipal incineration unit obtains a permit or other form of prior approval as provided in subsection (f). Whenever the Administrator determines that a State is not enforcing the requirements of this section in a manner equivalent to Federal enforcement, the Administrator shall withdraw the authorization of such State program under this subsection.

"(2) Nothing in this section shall prohibit any State or political subdivision thereof from imposing any requirement with respect to the management, handling, storage, treatment, transportation, reuse, recycling or disposal of ash from municipal waste incineration units which is more stringent than any requirement established under this section.

"(j) EFFECTIVE DATES.—(1) Regulations promulgated under this section shall be effective upon promulgation, except that requirements promulgated pursuant to subsection (b) or (c) with respect to the disposal of ash from municipal waste incineration units shall be effective on and after the date forty-eight months after the date of enactment of this section.

"(2) Beginning eighteen months after the date of enactment of this section and until the effective date of disposal requirements promulgated pursuant to subsection (b) or (c), ash from municipal waste incineration units shall not be disposed in landfills unless such landfills have, at a minimum, one liner, leachate collection and ground water monitoring and otherwise meet the criteria for sanitary landfills issued under this subtitle.

"(3) Notwithstanding the provisions of paragraph (2), the Administrator of a State may grant on a case-by-case basis a variance from the requirement that ash from each municipal waste incineration unit be disposed in a facility with a liner, leachate collection and ground water monitoring beginning eighteen months after enactment of this section, on a showing by the owner or operator of any such unit that sufficient capacity to dispose of ash in compliance with such requirements is not available for the unit taking cost into consideration. No variance granted under this paragraph shall extend for a period longer than thirty months after the date of enactment of this section.

"(4) Notwithstanding the provisions of paragraph (1), the Administrator of a State may grant on a case-by-case basis a variance from the requirement that ash from municipal waste incineration units be disposed only in landfills meeting the requirements of subsection (b) or (c) beginning forty-eight months after the date of enactment of this section, on a showing by the owner or operator of any such unit that good faith efforts were made to satisfy such requirement but the unit will fail to do so for reasons not in control of the owner or operator of such unit. No variance granted under this paragraph shall extend for a period longer than seventy-two months after the date of enactment of this section.

"(5) If the Administrator fails to promulgate regulations under subsection (a) for the disposal of ash from municipal incineration units, no person may dispose of ash in a landfill after forty-eight months after the date of enactment of this section unless such landfill satisfies the requirements of subsection (b)(1) or (b)(3).

"(k) PROHIBITION.—(1) Beginning on the effective date of any regulation or requirement under this section it shall be unlawful to manage, handle, store, treat, transport, reuse, recycle, or dispose of ash from a municipal waste incineration unit otherwise than in accordance with such regulation or requirement or a State program approved pursuant to subsection (i).

"(2) Prior to and after the effective date of regulations under this section, the Administrator may use the authorities of section 3008 to enforce the requirements of this section. In the case of a violation in a State which is authorized to implement and enforce a program under subsection (i), the Administrator shall give notice to the State in which a violation has occurred prior to issuing an order or commencing civil action under section 3008.".

(b) The table of contents for subtitle D of the Solid Waste Disposal Act is amended by adding the following new item at the end thereof:

"Sec. 4011. Municipal waste combustion ash.".

(c) Subsection (i) of section 3001 of the Solid Waste Disposal Act is repealed.

CONSULTATION

SEC. 308. Notwithstanding the provisions of the Federal Advisory Committee Act, prior to promulgation of any regulations, requirements, or guidelines pursuant to section 130 of the Clean Air Act or section 4011 of the Solid Waste Disposal Act, the Administrator shall consult with elected officials of State and local governments, or their representatives or representatives of their organizations which may develop plans, administer programs, issue permits, promulgate regulations or take corrective action under such sections to receive their advice and recommendations on such regulations, requirements and guidelines.

DEVELOPMENT OF REFUSE DERIVED FUEL PLANT

SEC. 309. The Tennessee Valley Authority, (hereinafter referred to as the "TVA") in cooperation with regional waste authorities in the Tennessee Valley is authorized and directed to develop a plan for the construction of a combustion unit capable of using refuse derived fuel, with specific analysis of construction of the facility at the site of the TVA steam generation plant located at Gallatin, Tennessee. The TVA shall submit to Congress not later than ninety days after the date of enactment of this Act a report setting forth its plan for completion of such a facility.

EMISSIONS STUDY

SEC. 310. The Administrator shall conduct, and transmit to Congress not later than two years after the enactment of this Act, a study of the emissions of hazardous air pollutants from motor vehicle tire incineration facilities and the feasibility of substituting appropriate tire recycling procedures for current and projected tire incineration facilities. There are authorized to be appropriated such sums as may be necessary.

TITLE IV—ACID DEPOSITION CONTROL

ACID DEPOSITION CONTROL

SEC. 401. The Clean Air Act is amended by adding the following new title:

"TITLE IV—ACID DEPOSITION CONTROL

"FINDINGS AND PURPOSES

"SEC. 401. (a) FINDINGS.—The Congress finds that—

"(1) the presence of acidic compounds and their precursors in the atmosphere and in deposition from the atmosphere represents a threat to natural resources, ecosystems, materials, visibility, and public health;

"(2) the principal sources of the acidic compounds and their precursors in the atmosphere are emissions of sulfur and nitrogen oxides from the combustion of fossil fuels;

"(3) the problem of acid deposition is of national and international significance;

"(4) strategies and technologies for the control of precursors to acid deposition exist now that are economically feasible, and improved methods are expected to become increasingly available over the next decade;

"(5) current and future generations of Americans will be adversely affected by delaying measures to remedy the problem;

"(6) reduction of total atmospheric loading of sulfur dioxide and nitrogen oxides will enhance protection of the public health and welfare and the environment; and

"(7) control measures to reduce precursor emissions from steam-electric generating units should be initiated without delay.

"(b) PURPOSES.—The purpose of this title is to reduce the adverse effects of acid deposition through reductions in annual emissions of sulfur dioxide of ten million tons from 1980 emission levels, and, in combination with other provisions of this Act, of nitrogen oxides emissions of approximately two million tons from 1980 emission levels, in the forty-eight contiguous States and the District of Columbia. It is the intent of this title to effectuate such reductions by requiring compliance by affected sources with prescribed emission limitations by specified deadlines, which limitations may be met through alternative methods of compliance provided by an emission allocation and transfer system. It is also the purpose of this title to encourage energy conservation, use of renewable and clean alternative technologies, and pollution prevention as a long-range strategy for reducing air pollution and other adverse impacts of energy production and use.

"DEFINITIONS

"SEC. 402. As used in this title—

"(a) The term 'affected source' means a source that includes one or more affected units.

"(b) The term 'affected unit' means a unit that is subject to emission reduction requirements or limitations under sections 403(e), 404, 405, 406, 407, 409, or 410 of this title.

"(c) The term 'allowance' means an authorization, issued to an affected source by the Administrator under this title, to emit, during or after a specified calendar year, one ton of sulfur dioxide.

"(d) The term 'baseline' means the annual quantity of fossil fuel consumed by an affected unit, measured in millions of British Thermal Units ('mmBtu's'), calculated as follows:

"(1) For each utility unit that was in commercial operation prior to January 1, 1985, the baseline shall be the annual average quantity of mmBtu's consumed in fuel during calendar years 1985, 1986, and 1987, as recorded by the Department of Energy pursuant to Form 767. For any utility unit for which such form was not filed, the baseline shall be the level specified for such unit in the 1985 National Acid Precipitation Assessment Program (NAPAP) Emissions Inventory, Version 2, National Utility Reference File (NURF). For non-utility units, the baseline is the NAPAP Emissions Inventory, Version 2. The Administrator may exclude periods during which a unit is shutdown for a continuous period of four months or longer.

"(2) For any other non-utility unit that is not included in the NAPAP Emissions Inventory, Version 2, the baseline shall be the annual average quantity, in mmBtu consumed in fuel by that unit, as calculated pursuant to a method which the administrator shall prescribe by regulation to be promulgated not later than eighteen months after enactment of the Clean Air Act Amendments of 1990.

"(3) CORRECTION OF DATA.—The Administrator shall, upon application or on his own motion, by December 31, 1991, correct any factual errors in data from which affected Phase II units' baselines or actural 1985 emission rates have been calculated. Corrected data shall be used for purposes of issuing allowances under the title. Such corrections shall not be subject to judicial review, nor shall the failure of the Administrator to correct an alleged factual error in such reports be subject to judicial review.

"(e) The term 'capacity factor' means the ratio between the actual electric output from a unit and the potential electric output from that unit.

"(f) The term 'compliance plan' means a plan submitted pursuant to section 408 describing how the source will comply with all applicable requirements under this title, including a schedule and description of the method or methods for compliance and certification by the owner or operator that the source is in compliance with the requirements of this title.

"(g) The term 'continuous emission monitoring system' (CEMS) means the equipment as required by section 412, used to sample, analyze, measure, and provide on a continuous basis a permanent record of emissions and flow (expressed in pounds per million British thermal units (lbs/mmBtu), pounds per hour (lbs/hr) or such other form as the Administrator may prescribe by regulations under section 412 of this title).

"(h) The term 'existing unit' means a unit (including units subject to section 111) that commenced commercial operation before the date of enactment of the Clean Air Act Amendments of 1990. Any unit that commenced commercial operation before the date of enactment of the Clean Air Act Amendments of 1990 which is modified, reconstructed, or repowered after the date of enactment of the Clean Air Act Amendments of 1990 shall continue to be deemed an existing unit for the purposes of this title. For the purposes of this title, existing units shall not include simple combustion turbines.

"(i) The term 'generator' means a device that produces electricity and which is reported as a generating unit pursuant to Department of Energy Form 860.

"(j) The term 'new unit' means a unit that commences commercial operation on or after the date of enactment of the Clean Air Act Amendments of 1990.

"(k) The term 'permitting authority' means the Administrator, or the State or local air pollution control agency, with an approved permitting program under part B of title III of the Act.

"(l) The term 'repowering' means replacement of an existing coal-fired boiler with one of the following clean coal technologies: atmospheric or pressurized fluidized bed combustion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the Administrator, in consultation with the Secretary of Energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler generation efficiency and with significantly greater solid waste reduction relative to the performance of technology in widespread commercial use as of the date of enactment of the Clean Air Act Amendments of 1990. For the purpose of this title, the term 'repowering' shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.

"(m) The term 'reserve' means the bank of allowances established by the Administrator either under section 404(a)(2) or under section 405(a)(2).

"(n) The term 'State' means one of the forty-eight contiguous States and the District of Columbia.

"(o) The term 'unit' means a fossil fuel-fired combustion device.

"(p) The term 'actual 1985 emission rate', for electric utility units means the annual sulfur dioxide or nitrogen oxides emission rate in pounds per million Btu as reported in the NAPAP Emissions Inventory, Version 2, National Utility Reference File. For non-utility units, the term 'actual 1985 emission rate' means the annual sulfur dioxide or nitrogen oxides emission rate in pounds per million Btu as reported in the NAPAP Emission Inventory, Version 2.

"(q) The term 'utility unit' means a unit that serves a generator in any State that produces electricity for sale. For purposes of this title, a unit that cogenerates steam and electricity shall be considered a utility unit if the unit supplies more than one-third of its potential electric output capacity and more than twenty-five megawatts electrical output to any utility power distribution system for sale.

"(r) The term 'allowable 1985 emissions rate' means a federally enforceable emissions limitation for sulfur dioxide or oxides of nitrogen, applicable to the unit in 1985. Where the emissions limitation for a unit is not expressed in pounds of emissions per million Btu, or the averaging period of that emissions limitation is not expressed on an annual basis, the Administrator shall determine the annual equivalent of that emissions limitation to establish the allowable 1985 emissions rate.

"(s) The term 'qualifying phase I technology' means a technological system of continuous emission reduction which achieves a 90 per centum reduction in emissions of a pollutant from the emissions that would have resulted from the use of fuels which were not subject to treatment prior to combustion.

"(t) The term 'alternative method of compliance' means a method of compliance in accordance with one or more of the following authorities:

"(1) the purchase and use of allowances in addition to those allocated to a unit directly by the Administrator, at sale in accordance with section 403(a)(2);

"(2) the purchase and use of allowances in addition to those allocated to a unit directly by the Administrator, at auction in accordance with section 403(a)(3);

"(3) the use of transferred allowances held between allowance holders pursuant to section 403(b);

"(4) a substitution plan submitted and approved in accordance with subsections 404 (b) and (c);

"(5) a phase I extension plan approved by the Administrator under section 404(d), using qualifying phase I technology as determined by the Administrator in accordance with that section; or

"(6) repowering with a qualifying clean coal technology under section 409.

"(u) The term 'commenced' as applied to construction of any new electric utility unit means that an owner or operator has undertaken a continuous program of construction or that an owner or operator has entered into a contractual obligation to undertake and complete, within a reasonable time, a continuous program of construction.

"(v) The term 'commenced commercial operation' means to have begun to generate electricity for sale.

"(w) The term 'construction' means fabrication, erection, or installation of an affected unit.

"(x) The term 'industrial source' means a unit that does not serve a generator that produces electricity, a 'non-utility unit' as defined in this section, or a process source as defined in section 410(e).

"(y) The term 'non-utility unit' means a unit that serves a generator that produces electricity which sells no more than one-third of its potential electric output capacity and no more than twenty-five megawatts electrical output to any utility power distribution system.

"(z) The term 'designated representative' means a responsible person or official authorized by the owner or operator of a unit to represent the owner or operator in matters pertaining to the holding, transfer, or disposition of allowances allocated to a unit, and the submission of and compliance with permits, permit applications, and compliance plans for the unit.

"(aa) The term 'life-of-the-unit, firm power contractual arrangement' means a contractual arrangement under which a utility receives a specified amount or percentage of capacity and associated energy generated by a specified generating unit (or units) and pays its proportional amount of such unit's total costs, for the life of the unit.

"SULFUR DIOXIDE ALLOWANCE PROGRAM FOR EXISTING AND NEW UNITS

"SEC. 403. (a) ALLOCATIONS OF ANNUAL ALLOWANCES FOR EXISTING AND NEW UNITS.—(1) For the emission limitation programs under this title, the Administrator shall allocate annual allowances for the unit, to be held or distributed by the designated representative of the owner or operator of each affected unit at an affected source in accordance with this title, in an amount equal to the annual tonnage emission limitation calculated under section 404, 405, 406, 409, or 410 except as otherwise specifically provided elsewhere in this title. Except as provided in sections 405(a)(2) and 410, beginning January 1, 2000, the Administrator shall not allocate or issue annual allowances to emit sulfur dioxide pursuant to section 405 in such an amount as would result in total annual emissions of sulfur dioxide from utility units in excess of 8.90 million tons: *Provided,* That the Administrator shall not take into account unused allowances carried forward by owners and operators of affected units or by other persons holding such allowances, following the year for which they were issued. If necessary to meeting the restrictions imposed in the preceding sentence, the Administrator shall reduce, pro rata, the annual allowances allocated for each unit subject to the requirements of section 405, based on allowances allocated pursuant to subsections (b) (1), (3), (4) and (5); (c) (1), (2) and (3); (d)(4); (e); (f); (g) (1), (2) and (4); (h) (1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d), of section 405. Subject to the provisions of paragraphs (2) and (3) of this subsection, the Administrator shall issue allowances for each affected unit at an affected source annually, as provided in paragraphs (2) and (3) and section 408. If an existing unit is, or would be, subject to the requirements of section 404, 405, or 406 is removed from operation after the date of enactment of the Clean Air Act Amendments of 1990, such removal from operation shall not affect the number of allowances allocated or issued for the unit annually as provided in section 408.

"(2)(A) FIXED PRICE SALE OF ALLOWANCES.—In accordance with the provisions of this paragraph, the Administrator, pursuant to regulations promulgated not later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990, shall offer and sell allowances, at a price of $1,500 per ton (adjusted for inflation to the date of payment based on the Consumer Price Index beginning on the date of enactment of the Clean Air Act Amendments of 1990 and annually thereafter) in accordance with regulations for the use of allowances pursuant to subsection (b). The number of allowances offered and sold under this paragraph that can become usable in any given calendar year shall not exceed one hundred thousand. The Administrator shall offer to sell the maximum number of allowances permitted under this subparagraph and shall complete such sales as provided further under this paragraph. No allowance offered and sold under this paragraph shall become usable (i) prior to the year 2000, and (ii) until two calendar years after the calendar year in which it has been offered.

"(B) Beginning ninety days after the promulgation of regulations and anytime thereafter, an applicant under this paragraph may submit an application or applications for the purchase of allowances. An applicant shall demonstrate that (i) the applicant is, or will be, an owner or operator of a unit subject to subsection (e), and (ii) the applicant has entered into binding agreements to construct the unit for which the allowances are being sought or that the public service commission with jurisdiction over the unit has given its approval for the construction and operation of the unit. No applications may be: (i) for the purchase of more than the number of allowances needed to operate the unit, for which allowances are being sought, for a period of twenty years, or (ii) for the purchase of allowances that become useable in a given calendar year in an amount greater than the number of allowances needed to operate the unit, for which allowances are being sought, for a period of one year.

"(C) The Administrator shall approve or disapprove applications no later than ninety days after submission by the applicant. Notwithstanding the fact that the approval of applications may exhaust the supply of allowances available to subsequent applicants in a given year, the Administrator shall consider applications in order of submission and, subject to the restrictions of subparagraph (A), approve such applications if the requirements of subparagraph (B) are met. If an application that would otherwise be approved would exhaust the supply of allowances in a given year, the Administrator shall offer to sell only those allowances in the application that are still available to be offered. The Administrator shall calculate an estimated purchase price to the applicant according to subparagraph (A) and rules promulgated under this paragraph. Such estimated purchase price shall reflect the discounted present value of the payments that the applicant would otherwise make if it were to pay for the allowances applied for on a year-to-year basis, and shall provide for the use of a discount rate equal to an interest rate on short-term borrowing by the Department of the Treasury. Each applicant shall be required to pay earnest money equal to one half per centum of the estimated purchase price within six months of approval of the application. Upon the receipt of such payment the Administration shall issue to the applicant a letter certifying that the applicant is eligible to purchase allowances as specified in the approved application and stating that such eligibility shall expire one year and one day prior to the calendar year in which any of the allowances becomes useable. Within 90 days of receipt of such payment, the Administrator shall distribute such payment pro-rata to the owners or operators of affected units from whose allocations allowances may be deducted under subparagraph (D).

"(D) The Administrator shall promulgate regulations not later than thirty-six months after the date of enactment of the Clean Air Act Amendments of 1990 specifying: (i) one or more payment options (accounting for the earnest money paid for under subparagraph (C)) for purchase of allowances applied for under this paragraph, and (ii) methods by which an applicant can decrease, without penalty, the number of allowances purchased relative to the number of allowances applied for. Not later than one year and one day prior to the calendar year in which any of the allowances that have been reserved in accordance with an approved application become useable, the applicant who wishes to purchase such reserved allowances shall make a payment to the Administrator as specified in regulations promulgated under this subparagraph. If the applicant does not make such payment, the earnest money paid under subparagraph (C) shall be forfeited and the applicant's eligibility to purchase the allowances applied for shall expire. Following each payment specified in the regulations, the Administrator shall issue the allowances

paid for to the approved applicant and on a pro-rata basis deduct, from the allowances allocated pursuant to subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (d)(4); (e); (f); (g) (1), (2) and (4); (h) (1) and (3); (i); (j) and the equivalent of the emissions limitations requirements of paragraphs (5) and (6) of subsection (d), of section 405 for the calendar year for which the purchased allowances are issued, allowances in an amount equal to the number of purchased allowances issued. The Administrator shall record the transfers of allowances as a result of each sale in accordance with the requirements of subsection (b). Within ninety days of the issuance of allowances, all funds collected as a result of the sale of such allowances under this paragraph shall be disbursed on a pro-rata basis to the owners or operators of the affected units from whose allocations the allowances are deducted. No funds transferred from a purchaser to the owners or operators of the affected units from whose allocations the allowances are deducted shall be treated for any purpose as revenue of the United States. Any allowances that are available for sale under this paragraph, and that remain unsold as of one year prior to the calendar year in which they become useable, shall be added to the allowances available for sale at auction under paragraph (3).

"(3)(A) ALLOWANCE AUCTION—In accordance with the provisions of this paragraph, the Administrator shall conduct auctions of allowances no less than twice in each calendar year beginning in calendar year 1995 and in each year thereafter. In conducting such auctions the Administrator, in accordance with the requirements for the use of allowances pursuant to subsection (b), may sell both allowances which are useable in the calendar year in which an auction is held and allowances which are not useable until a specified calendar year following the auction: *Provided*, That—

"(i) no allowance sold in an auction under this paragraph shall be useable prior to the year 2000;

"(ii) except for allowances contributed under subparagraph (D) of this paragraph and allowances added under subparagraph (D) of paragraph (2), the total number of allowances sold in auctions under this paragraph that can become useable in any given calendar year shall not exceed one hundred thousand; and

"(iii) in each calendar year beginning with the year 2000, the number of allowances that have been previously sold at auction and that become useable in such year together with the number of allowances that are offered for sale at auction in such year and become useable in such year shall not be less than one hundred thousand.

In each auction the Administrator shall offer to sell long-term streams of allowances consisting of allowances that are not useable until specified calendar years following the auction. Such long-term streams shall be sufficient to permit the operation of units that in the aggregate would use no less than seven thousand five hundred allowances per year for a period beginning no earlier than the calendar year following such auction and not less than fifteen years thereafter. Allowances not sold in long-term streams shall be offered no later than two years from the calendar year in which they become useable. Not later than thirty-six months after the enactment of the Clean Air Act Amendments of 1990, the Administrator, after consultation with the Secretary of the Treasury and the Chairman of the Federal Energy Regulatory Commission, shall promulgate regulations setting forth the method by which each auction shall be conducted. The regulations shall assure that the auction is open to any person who may hold allowances pursuant to this section and shall not require that a minimum price be met for the purchase of allowances. Allowances awarded at auction may be used for any purpose subject to the provisions of this title. Persons awarded allowances pursuant to each auction shall be required to pay a specified per centum of the total purchase price within a specified period of time subsequent to the date of award, as set forth in the regulations promulgated under this paragraph, except as otherwise provided in subparagraph (B). Upon the receipt of such payment the Administrator shall issue to the person a letter certifying that the person is eligible to purchase allowances as specified according to the bid and award and stating that such eligibility shall expire one year prior to the calendar year in which any of the allowances becomes useable. Within ninety days of receipt of such payment, the Administrator shall distribute such payment pro-rata to the owners or operators of affected units from whose allocations allowances may be deducted under subparagraph (B).

"(B) Not later than one year prior to the calendar year in which any of the allowances awarded to a person becomes useable, such person who wishes to purchase such awarded allowances shall pay to the Administrator the balance of the purchase price. In the case of an award of allowances in which one or more allowances are useable in the year of award, the person who wishes to purchase such allowances shall pay the full purchase price within a specified period of time less than a year after the award, as set forth in the regulations promulgated under this paragraph. If the person does not consummate a purchase, any amount previously paid shall be forfeited and the person's eligibility to purchase such allowances shall expire. The Administrator shall issue the auctioned allowances as purchased to the person and on a pro rata basis deduct, from the allowances allocated pursuant to subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (e); (f); (g) (1), (2), and (4); (h) (1) and (3); (i); (j) and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d), of section 405 for the calendar year for which the purchased allowances are issued, allowances in an amount equal to the number of purchased allowances issued.

"(C) Within ninety days of the issuance of allowances, all funds collected as a result of the sale of allowances under this paragraph shall be disbursed to the owners or operators of the affected units from whose allocations the allowances are deducted. Such disbursement shall be on a pro-rata basis except with respect to proceeds from the sale of contributed allowances under subparagraph (D). No funds transferred from a purchaser to the owners or operators of the affected units from whose allocations the allowances are deducted shall be treated for any purpose as revenue of the United States. The Administrator shall make information publicly available concerning the nature, price, and results of each auction including the prices of successful bids and shall record the transfers of allowances as a result of each auction and purchase in accordance with the requirements of subsection (b).

"(D) Any holder of allowances may contribute to any auction allowances and shall receive the proceeds from the auction of such allowances. Allowances contributed for auction under this subparagraph may be useable in the calendar year in which an auction is held or may not be useable until a specified calendar year following the auction in accordance with the requirements for allowance use specified in subsection (b). Allowances that are contributed and sold shall be deducted from the allowances allocated to the owner or operator making the contribution. The holder of such allowances may specify a minimum sale price and time of payment provided that the Administrator finds that doing so would not interfere with the purposes and functioning of the auction.

"(4) The regulations promulgated under paragraphs (2) and (3) and the discretion exercised by the Administrator in conducting sales and auctions shall be consistent with the competitive functioning of a national market for allowances and preservation of competition in the electric power industry. Pursuant to rulemaking after public notice and comment the Administrator may at any time after the year 2001 decrease the number of allowances sold in, and modify other terms of, the sales and auctions provided under paragraphs (2) and (3) if the Administrator finds that such changes would be consistent with the competitive functioning of a national market for allowances and the preservation of competition in the electric power industry. Pursuant to the regulations the Administrator may by delegation or contract provide for the conduct of sales or auctions under the Administrator's supervision by other departments or agencies of the United States Government or by nongovernmental agencies, groups, or organizations.

"(b) ALLOWANCE TRANSFER SYSTEM.—Allowances issued under this title may be transferred among designated representatives of the owners or operators of affected sources under this title and any other person who lawfully holds such allowances, as provided by the allowance system regulations to be promulgated by the Administrator not later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990. Such regulations shall establish the allowance system prescribed under this section, including, but not limited to, requirements for the issuance, transfer, and use of allowances under this title. Such regulations shall prohibit the use of any allowance prior to the calendar year for which the allowance was issued, and shall provide, consistent with the purposes of this title, for the identification of unused allowances, and for such unused allowances to be carried forward and added to allowances allocated in subsequent years, including allowances issued to units subject to phase I requirements (as described in section 404) which are applied to emissions limitations requirements in phase II (as described in section 405). Transfers of allowances shall not be effective until written certification of the transfer, signed by a responsible official of each party to the transfer, is received and recorded by the Administrator. Such regulations shall permit the transfer of allowances prior to the issuance of such allowances. Recorded pre-issuance transfers shall be deducted by the Administrator from the number of allowances which would otherwise be issued to the transferor, and added to those allowances issued to the transferee. Pre-issuance transfers shall not affect the prohibition contained in this subsection

against the use of allowances prior to the year for which they are issued.

"(c) INTERPOLLUTANT TRADING.—Not later than January 1, 1994, the Administrator shall furnish to the Congress a study evaluating the environmental and economic consequences of amending this title to permit trading sulfur dioxide allowances, for nitrogen oxides allowances.

"(d) ALLOWANCE TRACKING SYSTEM.—The Administrator shall promulgate, not later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990, a system for issuing, recording, and tracking allowances, which shall specify all necessary procedures and requirements for an orderly and competitive functioning of the allowance system. All allowance allocations and transfers shall, upon recordation by the Administrator, be deemed a part of each unit's permit requirements pursuant to section 408, without any further permit review and revision. If the Administrator determines that the use of a code that prescribes safety standards for equipment design, procedures, and systems developed by a professional organization or entity (including the American National Standards Institute and the American Society of Mechanical Engineers) is appropriate, the Administrator shall require the use of such code.

"(e) NEW UTILITY UNITS.—After January 1, 2000, it shall be unlawful for a new utility unit to emit an annual tonnage of sulfur dioxide in excess of the number of allowances to emit held for the unit by the unit's owner or operator. Such new utility units shall not be eligible for an allocation of sulfur dioxide allowances under subsection (a)(1), unless the unit is subject to the provisions of subsection (g) (2) or (3) of section 405. New utility units may obtain allowances from any unit allocated allowances under this title. The owner or operator of any new utility unit in violation of this subsection shall be liable for fulfilling the obligations specified in section 411 of this title.

"(f) NATURE OF ALLOWANCES.—An allowance issued under this title is a limited authorization to emit sulfur dioxide or nitrogen oxides in accordance with the provisions of this title. Such allowance may be limited, revoked, or otherwise modified in accordance with the provisions of this title or other authority of the Administrator. Such allowance does not constitute a property right.

"(g) PROHIBITION.—It shall be unlawful for any person to hold, use, or transfer any allowance issued under this title, except in accordance with regulations issued by the Administrator. It shall be unlawful for any affected unit to emit sulfur dioxide in excess of the number of allowances held for use for that unit for that year by the owner or operator of the unit. Allowances may not be used prior to the calendar year for which they were issued. Nothing in this section or in the allowance system regulations shall relieve the Administrator of the Administrator's permitting, monitoring and enforcement obligations under this Act, nor relieve affected sources of their requirements and liabilities under this Act.

"(h) Nothing in this title shall be construed to interfere with or impair any program for competitive bidding for power supply in a State in which such program is established.

"(i) APPLICABILITY OF THE ANTITRUST LAWS.—

"(1) Nothing in this section affects—

"(A) the applicability of the antitrust laws to the transfer, use, or sale of allowances, or

"(B) the authority of the Federal Energy Regulatory Commission under any provision of law respecting unfair methods of competition or anticompetitive acts or practices.

"(2) As used in this section, 'antitrust laws' means those Acts set forth in section 1 of the Clayton Act (15 U.S.C. 12), as amended.

"PHASE I SULFUR DIOXIDE REQUIREMENTS

"SEC. 404. (a) EMISSION LIMITATIONS.—(1) After January 1, 1995, each source that includes one or more affected units listed in table A is an affected source under this section. After January 1, 1995, it shall be unlawful for any affected unit (other than an eligible phase I unit under section 404(d)(2)) to emit sulfur dioxide in excess of the tonnage limitation stated as a total number of allowances in table A for phase I, unless (i) the emissions reduction requirements applicable to such unit have been achieved pursuant to subsection (b) or (d), or (ii) the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions. The owner or operator of any unit in violation of this section shall be fully liable for such violation including, but not limited to, liability for fulfilling the obligations specified in section 411 of this title.

"(2) Not later than December 31, 1991, the Administrator shall determine the total tonnage of reductions in the emissions of sulfur dioxide from all utility units in calendar year 1995 that will occur as a result of compliance with the emissions limitation requirements of this section, and shall establish a reserve of allowances equal in amount to the number of tons determined thereby not to exceed a total of 3.50 million tons. In making such a determination, the Administrator shall compute for each unit subject to the emissions limitation requirements of this section the difference between: (A) the product of its baseline multiplied by the lesser of each unit's allowable 1985 emissions rate and its actual 1985 emissions rate, divided by 2,000, and (B) the product of each unit's baseline multiplied by 2.50 lbs/mmBtu divided by 2,000, and sum the computations. The Administrator shall adjust the foregoing calculation to reflect projected calendar year 1995 utilization of the units subject to the emissions limitations of this section that the Administrator finds would have occurred in the absence of the imposition of such requirements. Not later than June 1, 1996, the Administrator shall adjust, if necessary, the number of allowances remaining in the reserve to reflect the actual emissions reductions achieved by such units during calendar year 1995 as measured by CEMS pursuant to section 412. Such an adjustment shall be deemed necessary if the sum of the reductions actually achieved in calendar year 1995 and the number of allowances issued from the reserve, created pursuant to this paragraph, in calendar year 1995 to eligible phase I extension units pursuant to subsection (d) does not equal the reductions projected by the Administrator for calendar year 1995. In making any such adjustment, the Administrator shall take into account, inter alia, whether emissions reductions achieved by any unit subject to the requirements of this section resulted from reduced utilization of the unit as compared with its baseline or from shutting the unit down and whether additional emissions of sulfur dioxide from units not subject to the emissions limitations of this section occurred as a result of those units' provision of electrical generation to compensate for the reduced output resulting from any affected unit's reduced utilization or shutdown. Pursuant to subsection (d), the Administrator shall issue allowances from the reserve established hereinunder until the earlier of such time as all such allowances in the reserve are issued or December 31, 1999.

"(b) SUBSTITUTIONS.—The owner or operator of an affected unit under subsection (a) may include in its section 408 permit application and proposed compliance plan a proposal to reassign, in whole or in part, the affected unit's sulfur dioxide reduction requirements to any other unit(s) under the control of such owner or operator. Such proposal shall specify—

"(1) the designation of the substitute unit or units to which any part of the reduction obligations of subsection (a) shall be required, in addition to, or in lieu of, any original affected units designated under such subsection;

"(2) the original affected unit's baseline, the actual and allowable 1985 emissions rate for sulfur dioxide, and the authorized annual allowance allocation stated in table A;

"(3) calculation of the annual average tonnage for calendar years 1985, 1986, and 1987, the substitute unit or units, based on the baseline for each unit, as defined in section 402(d), multiplied by the lesser of the unit's allowable 1985 emissions rate;

"(4) the emissions rates and tonnage limitations that would be applicable to the original and substitute affected units under the substitution proposal;

"(5) documentation, to the satisfaction of the Administrator, that the reassigned tonnage limits will, in total, achieve the same or greater emissions reduction than would have been achieved by the original affected unit and the substitute unit or units without such substitution; and

"(6) such other information as the Administrator may require.

"(c) ADMINISTRATOR'S ACTION ON SUBSTITUTION PROPOSALS.—

"(1) The Administrator shall take final action on such substitution proposal in accordance with section 408(c): *Provided*, That the substitution proposal fulfills the requirements of this subsection. The Administrator may approve a substitution proposal in whole or in part and with such modifications or conditions as may be consistent with the orderly functioning of the allowance system and which will ensure the emissions reductions contemplated by this title. If a proposal does not meet the requirements of subsection (b), the Administrator shall disapprove it. The owner or operator of a unit listed in table A shall not substitute another unit or units without the prior approval of the Administrator.

"(2) Upon approval of a substitution proposal, each substitute unit, and each source with such unit, shall be deemed affected under this title, and the Administrator shall issue a permit to the original and substitute affected source and unit in accordance with the approved substitution plan and section 408. The Administrator shall allocate allowances for the original and substitute affected units in accordance with the approved substitution proposal pursuant to section 403. It shall be unlawful for any source or unit that is allocated allowances pursuant to this section to emit sulfur dioxide in excess of the emissions limitation provided for in the approved substitution permit and plan unless the owner or operator of each unit governed by the permit and approved substitution plan holds for use allowances to

emit not less than the units total annual emissions. The owner or operator of any original or substitute affected unit operated in violation of this subsection shall be fully liable for such violation, including liability for fulfilling the obligations specified in section 411 of this title. If a substitution proposal is disapproved, the Administrator shall issue allowances to the original affected unit or units in accordance with subsection (a).

"(d) ELIGIBLE PHASE I EXTENSION UNITS.—(1) The owner or operator of any affected unit subject to an emissions limitation requirement under this section may petition the Administrator in its permit application under section 408 for an extension of two years of the deadline for meeting such requirement, provided that the owner or operator of any such unit holds for use allowances to emit not less than the unit's total annual emissions for each of the two years of the period of extension. To qualify for such an extension, the affected unit must either employ a qualifying phase I technology, or transfer its phase I emissions reduction obligation to a unit employing a qualifying phase I technology. Such transfer shall be accomplished in accordance with a compliance plan, submitted and approved under section 408, that shall govern operations at all units included in the transfer, and that specifies the emissions reduction requirements imposed pursuant to this title.

"(2) Such extension proposal shall—

"(A) specify the unit or units proposed for designation as an eligible phase I extension unit;

"(B) provide an executed contract, which may be contingent upon the Administrator approving the proposal, for the design engineering, and construction of the qualifying phase I technology for the extension unit, or for the unit or units to which the extension unit's emission reduction obligation is to be transferred;

"(C) specify the unit's or units' baseline, actual 1985 emissions rate, allowable 1985 emissions rate, and projected utilization for calendar years 1995 through 1999;

"(D) require CEMS on both the eligible phase I extension unit or units and the transfer unit or units beginning no later than January 1, 1995; and

"(E) specify the emission limitation and number of allowances expected to be necessary for annual operation after the qualifying phase I technology has been installed.

"(3) The Administrator shall review and take final action on each extension proposal in order of receipt, consistent with section 408, and for an approved proposal shall designate the unit or units as an eligible phase I extension unit. The Administrator may approve an extension proposal in whole or in part, and with such modifications or conditions as may be necessary, consistent with the orderly functioning of the allowance system, and to ensure the emissions reductions contemplated by the title.

"(4) In order to determine the number of proposals eligible for allocations from the reserve and the number of allowances remaining available after each proposal is acted upon, the Administrator shall reduce the total number of allowances remaining available in the reserve by the number of allowances calculated according to subparagraphs (A), (B) and (C) until either no allowances remain available in the reserve for further allocation or all approved proposals have been acted upon. If no allowances remain available in the reserve for further allocation before all proposals have been acted upon by the Administrator, any pending proposals shall be disapproved. The Administrator shall calculate allowances equal to—

"(A) the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or the projected emissions tonnage for calendar year 1995 of each eligible phase I extension unit, as designated under paragraph (3), and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000;

"(B) the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or the projected emissions tonnage for calendar year 1996 of each eligible phase I extension unit, as designated under paragraph (3), and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000; and

"(C) the difference between the product of each unit's baseline multiplied by an emission rate of 1.20 lbs/mmBtu, divided by 2,000, and the tonnage level specified under subparagraph (E) of paragraph (2) of this subsection multiplied by a factor of 3.

"(5) Each eligible phase I extension unit shall receive allowances determined under subsection (a)(1) or (c) of this section. In addition, in calendar year 1995, the Administrator shall issue to each eligible phase I extension unit, from the allowance reserve created pursuant to subsection (a)(2), allowances equal to the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or its projected emissions tonnage for calendar year 1995 and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000. In calendar year 1996, the Administrator shall issue to each eligible unit, from the allowance reserve created pursuant to subsection (a)(2), allowances equal to the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or its projected emissions tonnage for calendar year 1996 and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000. It shall be unlawful for any source or unit subject to an approved extension plan under this subsection to emit sulfur dioxide in excess of the emissions limitations provided for in the permit and approved extension plan, unless the owner or operator of each unit governed by the permit and approved plan holds for use allowances to emit not less than the unit's total annual emissions.

"(6) In addition to allowances specified in paragraph (5), the Administrator shall issue to the owner or operator of each eligible phase I extension unit employing qualifying phase I technology, for calendar years 1997, 1998, and 1999, additional allowances, from any remaining allowances in the reserve created pursuant to subsection (a)(2), following the reduction provided for in paragraph (4), not to exceed the difference between (A) the product of each eligible unit's baseline times an emission rate of 1.20 lbs/mmBtu, divided by 2,000, and (B) the tonnage level specified under subparagraph (D) of paragraph (2) of this subsection. However, the number of allowances issued shall be reduced, on a pro rata basis, as the result of any adjustment by the Administrator's June 1, 1996 recalculation of the level of the reserve under subsection (a)(2) of this section.

"(7) After January 1, 1997, in addition to any liability under this Act, including under section 411, if any eligible phase I extension unit employing qualifying phase I technology or any transfer unit under this subsection emits sulfur dioxide in excess of the annual tonnage limitation specified in the extension plan, as approved in paragraph (3) of this subsection, the Administrator shall, in the calendar year following such excess, deduct allowances equal to the amount of such excess from such unit's annual allowance allocation.

"(e) RENEWABLE ENERGY TECHNOLOGY RESERVE.—(1) Notwithstanding any other provision of law, beginning on January 1, 1995, the Administrator may allocate from a Renewable Energy Technology Reserve a tonnage amount equal to a total of 80,000 tons of allowances for emissions of sulfur dioxide pursuant to section 403, in an annual amount to be determined by the Administrator subject to paragraph (2) to owners or operators of affected units at affected sources. Such allowances shall be allocated to an owner or operator described in this subparagraph in an amount calculated pursuant to paragraph (2) if, beginning on January 1, 1991, such owner or operator—

"(A) generates electricity at a new renewable energy power plant (as defined in paragraph (4)); or

"(B) purchases electric energy generated at a new renewable energy power plant owned or operated by any person other than the owner or operator of an affected source.

"(2) The Administrator shall allocate annual allowances from the Renewable Energy Technology Reserve pursuant to paragraph (1) as follows:

"(A) Any annual allowance allocated under this subparagraph shall be allocated in a tonnage amount equal to the number of kilowatt hours generated or purchased by the owner or operator (as described in paragraph (1)), multiplied by the emissions rate of the lowest emitting coal- or oil-fired unit of the operating company applying for the allowance (as defined by the Administrator in concurrence with the Secretary of Energy, and excluding any oil- and gas-fired unit with an average annual fuel consumption for calendar year 1985 that, on a Btu basis, exceeded 90 per centum consumption in the form of natural gas), divided by 2,000. (The product of such calculation shall be divided by one hundred to reflect the conversion rate between Btu's and kilowatt hours, assuming a heat transfer of ten thousand Btu's per kilowatt hour).

"(B) Allowances allocated under this paragraph shall be allocated in accordance with the order of receipt of applications for such allowances.

"(3) Beginning on January 1, 2000, the Administrator shall deduct a tonnage amount equal to eight thousand tons per year for a period of ten years from the annual allocation of allowances for units subject to requirements of section 405 on a pro rata basis. Such allowances shall be deposited in the Renewable Energy Technology Reserve. The pro rata share for each such unit shall be calculated on the basis of the allowances that would be allocated pursuant to subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (d)(4); (e); (f); (g) (1), (2), and (4); (h) (1) and (3); (i); (j) and the equivalent of the emissions limitations requirements of paragraphs (5) and (6), of subsection (d); of section 405.

"(4) As used in this subsection, the term 'new renewable energy power plant' means a power plant for which construction is initiated on or after January 1, 1991, or which realizes a significant increase in energy output (as defined and determined by the Administrator, in concurrence with the Secretary of Energy) attributable to the replacement of renewable energy equipment (as defined and determined by the Administrator, in concurrence with the Secretary of Energy) installed prior to January 1, 1991, by more efficient of productive renewable energy equipment (as determined by the Administrator in concurrence with the Secretary of Energy), and that operates primarily on energy derived from—

"(A) solar sources;

"(B) geothermal sources;

"(C) biomass sources; or

"(D) wind sources.

"(f) APPLICATION FOR ALLOWANCES FROM THE RENEWABLE ENERGY TECHNOLOGY RESERVE.—The owner or operator of an affected unit under subsection (a) may submit an application to the Administrator at any time after January 1, 1991, for allowances from the Renewable Energy Technology Reserve to be calculated using the formula described in subparagraph (A) of subsection (e)(2). Such application shall include—

"(1) the number of kilowatt hours the affected units generated or purchased from a new renewable energy power plant as defined in subsection (e)(4); and

"(2) documentation of kilowatt hours generated or purchased as recorded in a certified meter reading from the point of entry into the utility grid, or in an executed sales contract.

"(g) ACTION BY ADMINISTRATOR.—(1) The Administrator, in consultation with the Secretary of Energy, shall approve or disapprove an application submitted pursuant to subsection (f) not later than six months after receipt of the application. If an application proposal does not meet the requirements of subsection (f), the Administrator shall disapprove the application.

"(2) If the Administrator approves an application submitted pursuant to subsection (f), the Administrator shall notify the applicant in writing of the number of allowances to be received pursuant to this paragraph. On or after January 1, 1995, the Administrator shall allocate allowances for the affected units in accordance with the amount specified in the written notification described in this subparagraph, upon written request by the owner or operator of the affected units at the affected source.

"PHASE II SULFUR DIOXIDE REQUIREMENTS

"SEC. 405. (a) APPLICABILITY.—(1) After January 1, 2000, each steam-electric existing utility unit as provided below is subject to the limitations or requirements of this section. Each utility unit subject to an annual sulfur dioxide tonnage emission limitation under this section is an affected unit under this title. Each source that includes one or more affected units is an affected source. In the case of an existing unit that was not in operation during calendar year 1985, the emission rate for a calendar year after 1985, as determined by the Administrator, shall be used in lieu of the 1985 rate. The owner or operator of any unit operated in violation of this section shall be fully liable under this Act for fulfilling the obligations specified in section 411 of this title.

"(2) Following the issuance of permits pursuant to section 408 to the owners or operators of units subject to the emissions limitation requirements of this section, the Administrator shall calculate the total tonnage of reductions in the emissions of sulfur dioxide from all utility units in calendar year 2000, achieved as result of compliance by units subject to this section with the emissions limitation requirements of subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (d)(4); (e); (f); (g) (1), (2), and (4); (h) (1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d). In calculating such reductions the Administrator shall compute for each unit subject to the emissions limitation requirements of section 404 the difference between: (A) the product of each unit's baseline multiplied by 2.50 lbs/mmBtu divided by 2,000, and (B) the product of each unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000. For each unit not subject to section 404, but subject to the emissions limitation requirements of subsections (b) and (c) of this section, except for those units granted an extension pursuant to section 409, the Administrator shall compute the difference between: (A) the product of each unit's baseline multiplied by the lesser of its allowable 1985 emissions rate and its actual 1985 emissions rate, divided by 2,000, and (B) the product of each unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000, and sum the computations. The Administrator shall adjust the foregoing calculation to reflect the utilization of such plants that the Administrator finds would have occurred in the absence of the imposition of emissions limitation requirements. The Administrator shall establish a reserve of allowances equal in number to the tons so calculated and adjusted to reflect the actual emissions reductions achieved during calendar year 2000, as measured by CEMS pursuant to section 412, up to a limit of 5.30 million allowances. If the Administrator determines that the total of actual emissions reductions achieved in calendar year 2000 is less than 5.30 million tons, the Administrator shall deduct from each unit's annual allocation its pro rata share of 10 per centum of the difference between 5.30 million tons and actual emissions reductions achieved in calendar year 2000. Each unit's pro rata share shall be calculated on the basis of allowances that would be allocated in subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (d)(4); (e); (f); (g) (1), (2), and (4); (h) (1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d). Notwithstanding any other provision of this paragraph, pursuant to section 403, subsections (b)(2), (c)(3), (d)(3) (A) and (B), (g)(3), (h)(2) of this section, and section 406(a), the Administrator shall issue annually 530,000 allowances from the reserve established hereunder for calendar years 2000 through 2009.

"(b) UNITS EQUAL TO, OR ABOVE, 75 MWE AND 1.20 LBS/MMBTU.—(1) Except as otherwise provided in paragraph (3), after January 1, 2000, it shall be unlawful for any existing utility unit that serves a generator with nameplate capacity equal to, or greater, than 75 MWe and an actual 1985 emission rate equal to or greater than 1.20 lbs/mmBtu (excluding units subject to section 111 of the Act or to a federally enforceable emissions limitation for sulfur dioxide equivalent to an annual rate of less than 1.20 lbs/mmBtu) to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's baseline multiplied by an emission rate equal to 1.20 lbs/mmBtu, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) with an actual 1985 emissions rate greater than 1.20 lbs/mmBtu and less than 2.50 lbs/mmBtu and a baseline capacity factor of less than 60 per centum, allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to 1.20 lbs/mmBtu multiplied by 50 per centum of the difference, on a Btu basis, between the unit's baseline and the unit's fuel consumption at a 60 per centum capacity factor.

"(3) After January 1, 2000, it shall be unlawful for any existing utility unit with an actual 1985 emissions rate equal to or greater than 1.20 lbs/mmBtu whose annual average fuel consumption during 1985, 1986, and 1987 on a Btu basis exceeded 90 per centum in the form of lignite coal which is located in a State in which, as of July 1, 1989, no county or portion of a county was designated non-attainment under section 107 of this Act for any pollutant subject to the requirements of section 109 of this Act to exceed an annual sulfur dioxide tonnage limitation equal to the product of the unit's baseline multiplied by the lesser of the unit's actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds allowances to emit not less than the unit's total annual emissions.

"(4) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) for which was issued a prohibition order or a proposed prohibition order (from burning oil), which unit subsequently converted to coal between January 1, 1980 and December 31, 1985, allowances equal to the difference between (A) the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of its actual or allowable emissions rate during the first full calendar year after conversion, divided by 2,000, and (B) the number of allowances allocated for the unit pursuant to paragraph (1): *Provided*, That the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of five thousand. If necessary to meeting the restriction imposed in the preceding sentence the Administrator shall reduce, pro rata, the annual allowances allocated and issued for each unit under this paragraph.

"(c) COAL OR OIL-FIRED UNITS BELOW 75 MWE AND ABOVE 1.20 LBS/MMBTU.—

"(1) Except as otherwise provided in paragraph (3), after January 1, 2000, it shall be unlawful for a coal or oil-fired existing utility unit that serves a generator with nameplate capacity of less than 75 MWe and an actual 1985 emission rate equal to, or greater than, 1.20 lbs/mmBtu (excluding units subject to section 111 of the Act or to a federally enforceable emissions limitation for sulfur dioxide equivalent to an annual rate of less than 1.20 lbs/mmBtu) and which is a unit owned by a utility operating company whose aggregate nameplate fossil fuel steam-electric capacity is equal to, or greater than, 250 MWe to exceed an annual sulfur dioxide emissions limitation equal to the product of the unit's baseline multiplied by an emission rate equal to 1.20 lbs/mmBtu, divided by 2,000, unless the owner or operator of such unit holds allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, it shall be unlawful for a coal or oil-fired existing utility unit that serves a generator with nameplate capacity of less than 75 MWe and an actual 1985 emission rate equal to, or greater than, 1.20 lbs/mmBtu (excluding units subject to section 111 of the Act or to a federally enforceable emissions limitation for sulfur dioxide equivalent to an annual rate of less than 1.20 lbs/mmBtu) and which is a unit owned by a utility operating company whose aggregate nameplate fossil fuel steam-electric capacity is less than 250 MWe to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of its actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(3) After January 1, 2000, it shall be unlawful for any existing utility unit with a nameplate capacity below 75 MWe and an actual 1985 emissions rate equal to, or greater than, 1.20 lbs/mmBtu which became operational on or before December 31, 1965, which is owned by a utility operating company with a total fossil fuel steam-electric generating capacity greater than 250 MWe

and less than 450 MWe which serves fewer than 78,000 electrical customers as of the date of enactment of the Clean Air Act Amendments of 1990 to exceed an annual sulfur dioxide emissions tonnage limitation equal to the product of its baseline multiplied by the lesser of its actual or allowable 1985 emission rate, divided by 2,000, unless the owner or operator holds for use allowances to emit not less than the units total annual emissions. After January 1, 2010, it shall be unlawful for each unit subject to the emissions limitation requirements of this paragraph to exceed an annual emissions tonnage limitation equal to the product of its baseline multiplied by an emissions rate of 1.20 lbs/mmBtu, divided by 2,000, unless the owner or operator holds for use allowances to emit not less than the unit's total annual emissions.

"(4) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) with an actual 1985 emissions rate equal to, or greater than, 1.20 lbs/mmBtu and less than 2.50 lbs/mmBtu and a baseline capacity factor of less than 60 per centum, allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to 1.20 lbs/mmBtu multiplied by 50 per centum of the difference, on a Btu basis, between the unit's baseline and the unit's fuel consumption at a 60 per centum capacity factor.

"(d) COAL-FIRED UNITS BELOW 1.20 LBS/MMBTU.—

"(1) After January 1, 2000, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate is less than 0.60 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's baseline multiplied by the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate is equal to, or greater than, 0.60 lbs/mmBtu and less than 1.20 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of its actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(3)(A) At the election of an operating company, after January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1), allowances in an amount equal to either (i) the product of the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions rate multiplied by the difference, on a Btu basis, between the unit's baseline and its fuel consumption at a 60 per centum capacity factor, or (ii) 20 per centum of the allowances allocated for the unit pursuant to paragraph (1) and section 403. Allocations made pursuant to clause (i) shall include allowances subject to the restrictions imposed pursuant to section 403(a)(1) as well as allowances from the reserve created pursuant to subsection (a)(2) of this section.

"(B) At the election of the operating company, after January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (2), allowances in an amount equal to either (i) the product of the lesser of the unit's allowable 1985 emissions rate or its actual 1985 emissions rate multiplied by the difference, on a Btu basis, between the unit's baseline and its fuel consumption at a 60 per centum capacity factor, divided by 2,000, or (ii) 20 per centum of the allowances allocated for the unit pursuant to paragraph (2) and section 403. Allocations made pursuant to clause (i) shall include allowances subject to the restrictions imposed pursuant to section 403(a)(1) as well as allowances from the reserve created pursuant to subsection (a)(2) of this section.

"(C) An operating company with units subject to the emissions limitation requirements of this subsection may elect only one formula for the allocation of allowances as provided under subparagraphs (A) and (B), which elected formula shall apply to the annual allowance allocation for each and every unit in the operating company subject to the emissions limitation requirements of this subsection. The Administrator shall issue allowances pursuant to subparagraphs (A) and (B) only in accordance with this subparagraph.

"(4) Notwithstanding any other provision of this section, at the election of the owner or operator, after January 1, 2000, the Administrator shall allocate and issue in lieu of allocation, pursuant to paragraph (1), (2), (3), (5), or (6), allowances for a unit subject to the emissions limitation requirements of this subsection which commenced commercial operation on or after January 1, 1981 and before December 31, 1985, which was subject to, and in compliance with, section 111 of the Act in an amount equal to the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the unit's allowable 1985 emissions rate, divided by 2,000.

"(5) After January 1, 2010, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate of less than 0.60 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's baseline multiplied by the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions rate and a numerical factor of 120 per centum, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(6) After January 1, 2010, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate is equal to, or greater than, 0.60 lbs/mmBtu and less than 1.20 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of its actual 1985 emissions rate or its allowable 1985 emissions rate and a numerical factor of 120 per centum, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(7) For the purposes of this section, in the case of an oil- and gas-fired unit which has been awarded a clean coal technology demonstration grant as of January 1, 1991, by the United States Department of Energy, such unit may use any three consecutive years between 1980 and 1989 in calculating its baseline, as defined in section 402(d)(1).

"(e) OIL AND GAS-FIRED UNITS EQUAL TO OR GREATER THAN 0.60 LBS/MMBTU AND LESS THAN 1.20 LBS/MMBTU.—After January 1, 2000, it shall be unlawful for any oil and gas-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is equal to, or greater than, 0.60 lbs/mmBtu, but less than 1.20 lbs/mmBtu to exceed an annual sulfur dioxide tonnage limitation equal to the product of the unit's baseline multiplied by the lesser of the unit's allowable 1985 emissions rate or its actual 1985 emissions rate and a numerical factor of 120 per centum divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(f) OIL AND GAS-FIRED UNITS LESS THAN 0.60 LBS/MMBTU.—After January 1, 2000, it shall be unlawful for any oil and gas-fired utility unit the lesser of whose actual or allowable 1985 emission rate is less than 0.60 lbs/mmBtu and whose average annual fuel consumption during 1985, 1986, and 1987 on a Btu basis was 90 per centum or less in the form of natural gas to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions and a numerical factor of 120 per centum, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(g) UNITS THAT COMMENCE OPERATION BETWEEN 1985 AND DECEMBER 31, 1995.—(1) After January 1, 2000, it shall be unlawful for any utility unit that has commenced commercial operation on or after January 1, 1985, but not later than September 30, 1990 to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2,000 unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, the Administrator shall allocate and issue to the owner or operator of any utility unit that commences commercial operation, or has commenced commercial operation, on or after October 1, 1990, but not later than December 31, 1992 allowances in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.30 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2,000: *Provided*, That after January 1, 2000, the Administrator shall allocate and issue for each unit with a nameplate capacity equal to, or greater than, 1,000 MWe that commences, or has commenced commercial operation, on or after October 1, 1990, but not later than June 30, 1991, allowances in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.50 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2,000.

"(3) After January 1, 2000, the Administrator shall allocate and issue to the owner or operator of any utility unit that has commenced construction before December 31, 1990 and that commences commercial operation between January 1, 1993 and Decem-

ber 31, 1995, allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.30 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu, divided by 2,000.

"(4) After January 1, 2000, it shall be unlawful for any existing utility unit that has completed conversion from predominantly gas fired operation to coal fired operation between January 1, 1985 and December 31, 1987, for which there has been issued a proposed or final prohibition order pursuant to section 301(b) of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 et seq, repealed 1987) to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 1.20 lbs/mmBtu or the unit's allowable 1987 sulfur dioxide emissions rate, divided by 2,000, unless the owner or operator of such unit has obtained allowances equal to its actual emissions.

"(5) Any unit that is a qualifying small power production facility or qualifying cogeneration facility within the meaning of section 3(17)(C) or 3(18)(B) of the Federal Power Act (16 U.S.C. (17)(c) or 796 (18)) that—

"(A) has commenced operation as of December 31, 1989, or

"(B) has entered into a power sales contract prior to December 31, 1989, shall not be subject to the emissions limitations pursuant to this section, or to any other provisions of this title, except if the Administrator has approved a designation of such unit under section 410.

"(h) OIL AND GAS-FIRED UNITS LESS THAN 10 PER CENTUM OIL CONSUMED.—(1) After January 1, 2000, it shall be unlawful for any oil- and gas-fired utility unit whose average annual fuel consumption during 1985, 1986 and 1987 on a Btu basis exceeded 90 per centum in the form of natural gas to exceed an annual sulfur dioxide tonnage limitation equal to the product of the unit's baseline multiplied by the unit's actual 1985 emissions rate divided by 2,000 unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) Beginning January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to the unit's baseline multiplied by 0.050 lbs/mmBtu, divided by 2,000.

"(3) Beginning January 1, 2010, the Administrator shall allocate and issue annualy for each unit subject to the emissions limitation requirements of paragraph (1) allowances in an amount equal to the unit's baseline multiplied by 0.050 lbs/mmBtu, divided by 2,000.

"(i)(1) In addition to allowances allocated pursuant to this section, the Administrator shall allocate and issue annually allowances for each unit, subject to an emissions limitation requirement under this section, and located in a State that—

"(A) has experienced a growth in population in excess of 25 per centum between 1980 and 1988 according to State Population and Household Estimates, With Age, Sex, and Components of Change: 1981-1988 issued by the United States Department of Commerce, and

"(B) had an installed capacity of more than 30,000,000 kw in 1988,

in an amount equal to the difference between (A) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of this section applicable to the unit adjusted to reflect the unit's annual average fuel consumption on a Btu basis of any three consecutive calendar years between 1980 and 1989 (inclusive) as elected by the owner or operator and (B) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of this section: *Provided,* That the number of allowances allocated and issued pursuant to this subsection shall not exceed an annual total of 40,000. If necessary to meeting the 40,000 allowance restriction imposed under this subsection the Administrator shall reduce, pro rata, the additional annual allowances allocated and issued to each unit under this subsection.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of subsection (b)(1), (A) the lesser of whose actual or allowable 1980 emissions rate has declined by 50 per centum or more as of the date of enactment of the Clean Air Act Amendments of 1990, (B) whose actual emissions rate is less than 1.2 lbs/mmBtu as of January 1, 2000, (C) which commenced operation after January 1, 1970 and (D) which is owned by a utility company whose combined kilowatt-hour sales have increased by more than 20 per centum between calendar year 1980 and the date of enactment of the Clean Air Act Amendments of 1990, allowances in an amount equal to the difference between (i) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1) adjusted to reflect the unit's annual average fuel consumption on a Btu basis for any three consecutive years between 1980 and 1989 (inclusive) as elected by the owner or operator and (ii) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1): *Provided,* That the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of 5,000. If necessary to meeting the 5,000-allowance restriction imposed in the last clause of the preceding sentence the Administrator shall reduce, pro rata, the additional allowances allocated and issued to each unit pursuant to this paragraph.

"(j) CERTAIN MUNICIPALLY-OWNED POWER PLANTS.—(1) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally-owned oil and gas-fired utility unit with nameplate capacity equal to, or less than, 40 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.20 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2,000.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally-owned coal-fired utility unit with nameplate capacity less than 25 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.20 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2,000.

"ALLOWANCES FOR STATES WITH EMISSIONS RATES AT OR BELOW 0.80 LBS/MMBTU

"SEC. 406. (a) ELECTION OF GOVERNOR.—In addition to allocations of allowances pursuant to subsections (b) (1), (3), (4) and (5); (c) (1), (2) and (3); (d)(4); (e); (f); (g) (1), (2) and (4); (h) (1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d), of section 405, upon the election of the Governor of any State, with a 1985 state-wide annual sulfur dioxide emissions rate equal to or less than, 0.80 lbs/mmBtu, averaged over all fossil fuel-fired utility steam generating units, the Administrator, in lieu of allocations pursuant to subsections (b)(2), (c)(3), (d)(3) (A)(i) and (B)(i), (g)(3), and (h)(2) of section 405, shall allocate and issue allowances from the reserve created pursuant to section 405(a)(2) to all such units in the State in an amount equal to 125,000 multiplied by the unit's pro rata share of electricity generated in calendar year 1985 at fossil fuel-fired utility steam units in all States eligible for the election.

"(b) NOTIFICATION OF ADMINISTRATOR.—Not later than January 1, 1997, each Governor of a State eligible to make an election under paragraph (a) shall notify the Administrator of such election. In the event that the Governor of any such State fails to notify the Administrator of the Governor's elections, the Administrator shall allocate and issue allowances pursuant to section 405.

"(c) ALLOWANCES AFTER JANUARY 1, 2010.—After January 1, 2010, the Administrator shall allocate and issue allowances to units subject to the provisions of this section pursuant to section 405.

"NITROGEN OXIDES EMISSION REDUCTION PROGRAM

"SEC. 407. (a) APPLICABILITY.—On the date that a coal-fired utility unit becomes an affected unit pursuant to sections 404, 405, 409, or on the date a unit subject to the provisions of section 404(d) or 409(b), must meet the SO_2 reduction requirements, each such unit shall become an affected unit for purposes of this section and shall be subject to the emission limitations for nitrogen oxides set forth herein.

"(b) EMISSION LIMITATIONS.—(1) Not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, the Administrator shall by regulation establish annual allowable emission limitations for nitrogen oxides for the types of utility boilers listed below, which limitations shall not exceed the rates listed below: *Provided,* That the Administrator may set a rate higher than that listed for any type of utility boiler if the Administrator finds that the maximum listed rate for that boiler type cannot be achieved using low NO_x burner technology. The maximum allowable emission rates are as follows:

"(A) for tangentially-fired boilers, 0.45 lb/mmBtu;

"(B) for dry bottom wall-fired boilers and for cell burners, 0.50 lb/mmBtu.

After January 1, 1995, it shall be unlawful for any unit that is an affected unit on that date and is of the type listed in this paragraph to emit nitrogen oxides in excess of the emission rates set by the Administrator pursuant to this paragraph.

"(2) Not later than January 1, 1997, the Administrator shall, by regulation, establish

allowable emission limitations on a lb/mmBtu, annual average basis, for nitrogen oxides for the following types of utility boilers:

"(A) wet bottom wall-fired boilers;

"(B) cyclones;

"(C) all other types of utility boilers.

The Administrator shall base such rates on the degree of reduction achievable through the retrofit application of the best system of continuous emission reduction, taking into account available technology, costs and energy and environmental impacts; and which is comparable to the costs of nitrogen oxides controls set pursuant to subsection (b)(1). Not later than January 1, 1997, the Administrator may revise the applicable emission limitations for tangentially-fired and dry bottom, wall-fired boilers (including cell burners) to be more stringent if the Administrator determines that more effective low NO_x burner technology is available: *Provided,* That, no unit that is an affected unit pursuant to section 404 and that is subject to the requirements of subsection (b)(1), shall be subject to the revised emission limitations, if any.

"(c) REVISED PERFORMANCE STANDARDS.—(1) Not later than January 1, 1993, the Administrator shall propose revised standards of performance to section 111 for nitrogen oxides emissions from fossil-fuel fired steam generating units, including both electric utility and nonutility units. Not later than January 1, 1994, the Administrator shall promulgate such revised standards of performance. Such revised standards of performance shall reflect improvements in methods for the reduction of emissions of oxides of nitrogen.

"(d) ALTERNATIVE EMISSION LIMITATIONS.—The permitting authority shall, upon request of an owner or operator of a unit subject to this section, authorize an emission limitation less stringent than the applicable limitation established under subsection (b)(1) or (b)(2) upon a determination that—

"(1) a unit subject to subsection (b)(1) cannot meet the applicable limitation using low NO_x burner technology; or

"(2) a unit subject to subsection (b)(2) cannot meet the applicable rate using the technology on which the Administrator based the applicable emission limitation.

The permitting authority shall base such determination upon a showing satisfactory to the permitting authority, in accordance with regulations established by the Administrator not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, that the owner or operator—

"(1) has properly installed appropriate control equipment designed to meet the applicable emission rate;

"(2) has properly operated such equipment for a period of fifteen months (or such other period of time as the Administrator determines through the regulations), and provides operating and monitoring data for such period demonstrating that the unit cannot meet the applicable emission rate; and

"(3) has specified an emission rate that such unit can meet on an annual average basis.

The permitting authority shall issue an operating permit for the unit in question, in accordance with section 408 and part B of title III—

"(i) that permits the unit during the demonstration period referred to in subparagraph (2) above, to emit at a rate in excess of the applicable emission rate;

"(ii) at the conclusion of the demonstration period to revise the operating permit to reflect the alternative emission rate demonstrated in paragraphs (2) and (3) above.

Units subject to subsection (b)(1) for which an alternative emission limitation is established shall not be required to install any additional control technology beyond low NO_x burners. Nothing in this section shall preclude an owner or operator from installing and operating an alternative NO_x control technology capable of achieving the applicable emission limitation.

"(e) EMISSIONS AVERAGING.—In lieu of complying with the applicable emission limitations under subsection (b) (1), (2), or (d), the owner or operator of two or more units subject to one or more of the applicable emission limitations set pursuant to these sections, may petition the permitting authority for alternative contemporaneous annual emission limitations for such units that ensure that (1) the actual annual emission rate in pounds of nitrogen oxides per million Btu averaged over the units in question is a rate that is less than or equal to (2) the Btu-weighted average annual emission rate for the same units if they had been operated, during the same period of time, in compliance with limitations set in accordance with the applicable emission rates set pursuant to subsections (b) (1) and (2).

"If the permitting authority determines, in accordance with regulations issued by the Administrator not later than eighteen months after enactment of the Clean Air Act Amendments of 1990; that the conditions in the paragraph above can be met, the permitting authority shall issue operating permits for such units, in accordance with section 408 and part B of title III, that allow alternative contemporaneous annual emission limitations. Such emission limitations shall only remain in effect while both units continue operation under the conditions specified in their respective operating permits.

"PERMITS AND COMPLIANCE PLANS

"SEC. 408. (a) PERMIT PROGRAM.—This title shall be implemented by operating permits issued in accordance with the provisions of this section and part B of title III of this Act. Not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate regulations consistent with regulations required to be promulgated under title III of this Act to implement a Federal permit program to issue permits for affected sources under this title. Following promulgation, the Administrator shall issue a permit in accordance with this title and part B of title III to implement the requirements of sections 403, 404, 410, 411, 412, 413, and 414. Such permit shall supersede any permit application and proposed compliance plan submitted by the owner or operator under subparagraph (1). Any permit issued by the Administrator, or by a State with a permit program approved under part B of title III of this Act, shall prohibit each of the following:

"(1) exceedances of applicable sulfur dioxide or nitrogen oxide emissions limitations,

"(2) annual emissions of sulfur dioxide or nitrogen oxides in excess of the applicable emissions limitation under this title, unless, in the case of sulfur dioxide, the owner or operator holds allowances to emit not less than the total annual emissions of the affected unit or source,

"(3) the use of any allowance prior to the year for which it was issued, and

"(4) contravention of any other provision of the permit.

"(b) PERMIT APPLICATIONS AND COMPLIANCE PLANS GENERALLY.—Permit applications required by this seciton shall be submitted by the designated representative of the owner or operator of the unit, shall identify each person on whose behalf allowances will be received, and shall specify the nature and extent of the interest of each person. Each permit application shall be submitted by the designated representative of the owner or operator and shall be accompanied by a compliance plan for the source to comply with its requirements under this title. The compliance plan shall provide all necessary information on the schedule and means by which the source will comply with its annual tonnage emissions limitation, as provided under this title, including specification of the owner's or operator's intent to use an alternative method of compliance, and the owner's or operator's certification that such owner or operator will comply with the requirements of this title in all circumstances, including, but not limited to, those in which such owner or operator fails for whatever reason to secure any such additional allowances necessary to achieve compliance. The Administrator may also require—

"(1) for a source, a demonstration of compliance with any other applicable emissions limitation or requirement under this Act, and

"(2) from the owner or operator of two or more affected sources, an integrated compliance plan providing an overall plan for achieving compliance at the affected sources.

"(c) FIRST PHASE PERMITS.—The Administrator shall issue permits to the affected sources under section 404 as follows—

"(1)(A) Not later than thirty months after the date of enactment of the Clean Air Act Amendments of 1990, the designated representative of the owner or operator of each affected source under sections 404 and 407 shall submit a permit application and proposed compliance plan for that source in accordance with regulations issued by the Administrator. The permit application and proposed compliance plan shall be binding on the owner and operator, and be enforceable for purposes of this Act, until a permit is issued by the Administrator for the source pursuant to this section and title III of this Act. During pendency of the permit application and proposed compliance plan, the designated representative of the owner or operator may amend such application or plan automatically provided that the Administrator is given prior notification of such amendment.

"(B) In the case of a compliance plan for an affected source under sections 404 and 407 for which the owner or operator proposes to meet the requirements of that section by reducing utilization of the unit as compared with the baseline prescribed in section 402(d), or by shutting down the unit, the owner or operator shall include in the proposed compliance plan a specification of the unit or units that will provide electrical generation to compensate for the reduced output at the affected source, or a demonstration that such reduced utilization will be accomplished through energy conservation or improved unit efficiency. The unit to be used for such compensating generation, which is not otherwise an affected unit under sections 404 and 407, shall be deemed an affected unit under section 404, subject to all of the requirements for such units

under this title, except that allowances shall be allocated to such compensating unit in the amount of an annual limitation equal to the product of the unit's baseline multiplied by the lesser of the unit's actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000.

"(2) The Administrator shall review each proposed compliance plan to determine whether it satisfies the requirements of this title, and shall approve or disapprove such plan within six months after receipt of a complete submission. The Administrator may approve a compliance plan in whole or in part, and with such modifications or conditions as may be necessary consistent with the orderly functioning of the allowance system and to ensure the emissions reductions contemplated by this title.

"(d) SECOND PHASE PERMITS.—(1) To implement sections 403, 405, 406, 407, 409, 410, 411, 412, 413, and 414, each State in which one or more sources subject to those sections are located, shall submit a comprehensive and enforceable permit program to the Administrator for approval in accordance with this title and part B of title III. The Administrator shall approve any permit program meeting the requirements of this title and part B of title III.

"(2) The designated representative of the owner or operator of each affected source under section 405, including an affected unit under section 409, shall submit a permit application and proposed compliance plan (which shall include a description of any alternative method of compliance) for that source to the permitting authority, not later than January 1, 1994.

"(3) Not later than July 1, 1995, each State with an approved permit program pursuant to this section and part B of title III of this Act shall issue permits with all necessary compliance plan requirements and conditions to the owners and operators of existing affected sources under section 405, that satisfy the requirements of this Act. In the case of a State without an approved permit program, or a State that fails to issue permits to all of its existing affected sources by July 1, 1995, the Administrator shall, not later than July 1, 1996, issue a permit with all necessary compliance plan requirements and conditions to the owner or operator of each such affected source. The Administrator or permitting authority may approve a compliance plan in whole or in part and with such modifications or conditions as may be necessary consistent with the orderly functioning of the allowance system and to ensure the emissions reductions contemplated by this title.

"(4) The owner or operator of any unit subject to the requirements of section 406 shall submit a permit application and proposed compliance plan for such unit to the permitting authority not later than July 1, 1997. Not later than January 1, 1998, the permitting authority shall issue a permit to the owner or operator that satisfies the requirements of this title and part B of title III, including any appropriate monitoring reporting requirements.

"(5) The designated representative of the owner or operator of any unit subject to the requirements of section 407 shall submit a permit application and proposed compliance plan for such unit to the permitting authority, not later than January 1, 1997. The Administrator shall, not later than July 1, 1998, issue a permit and compliance plan to the owner or operator of each such affected source that has not been issued a State permit. The permitting authority shall issue a permit to the owner or operator that satisfies the requirements of this title and part B of title III, including any appropriate monitoring and reporting requirements.

"(e) NEW UNIT PERMITS.—(1) Each State shall submit a comprehensive and enforceable operating permit program for new units to the Administrator for approval, as provided under part C of title III. The Administrator shall take final action on complete new unit permit program submittals within one year of their receipt.

"(2) The designated representative of the owner or operator of each source that includes one or more new units shall submit a permit application and proposed compliance plan to the permitting authority not later than twenty-four months prior to January 1, 2000, or to commencing commercial operation of the new unit, whichever is later. The permitting authority shall issue a permit and compliance plan to the owner or operator of the new unit that satisfies the requirements of this title and part B of title III, including any appropriate monitoring and reporting requirements.

"(f) ELECTION UNIT PERMITS.—(1) Each State shall submit a comprehensive and enforceable operating permit program for election units under section 410 to the Administrator for approval, as provided under part B of title III. The Administrator shall take final action on complete election unit permit program submittals within one year of their receipt.

"(2) The owner or operator of each source that includes one or more election units shall submit a permit application and proposed compliance plan to the permitting authority with the proposed election designation. The permitting authority shall issue a permit and compliance plan to the owner or operator of the election unit that satisfies the requirements of this title and part B of title III, including any appropriate monitoring and reporting requirements.

"(g) AMENDMENT OF APPLICATION AND COMPLIANCE PLAN.—At any time after the submission of a permit application and proposed compliance plan under this section, the permit applicant may submit a revised permit application and compliance plan, in accordance with the requirements of this section or part B of title III.

"(h) PROHIBITION.—It shall be unlawful for an owner or operator and its designated representative (1) to fail to submit a permit application or proposed compliance plan in accordance with the deadlines specified in this section or otherwise to fail to comply with regulations implementing this section, or (2) to operate any source subject to this title except in compliance with the terms and requirements of a permit application and proposed compliance plan, or a permit and compliance plan issued by the Administrator or a State with an approved permit program.

"(i) MULTIPLE OWNERS.—No permit under this section shall be issued to an affected unit until the designated representative of the owner or operator has filed a certification concerning the holding and distribution of allowances. Where there are multiple holders of a legal or equitable title to or a leasehold interest in such a unit, or where a utility purchases power from an affected unit under life-of-the-unit, firm power contractual arrangements, the certification shall (1) state that allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual share or, (2) if such multiple holders have expressly provided for a different distribution of allowances by contract, state that allowances will be deemed to be held or distributed in accordance with the contract. A passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based, either directly or indirectly, upon the revenues or income from the affected unit shall not be deemed to be a holder of a legal, equitable, leasehold, or contractual interest for the purpose of holding or distributing allowances as provided in this subsection, unless expressly provided for in the leasehold agreement. Except as otherwise provided in this subsection, where all legal or equitable title to or interest in an affected unit is held by a single person, the certification shall state that all allowances received by the unit are deemed to be held for that person.

"REPOWERED SOURCES

"SEC. 409. (a) AVAILABILITY.—Not later than December 31, 1997, the owner or operator of an existing unit subject to the requirement of section 405 may demonstrate to the permitting authority that one or more units will be repowered with a qualifying clean coal technology to comply with the requirements under section 405. The owner or operator shall, as part of any such demonstration, provide, not later than January 1, 2000, satisfactory documentation of a preliminary design and engineering effort for such repowering and an executed and binding contract for the majority of the equipment to repower such unit and such other information as the Administrator may require by regulation.

"(b) EXTENSION.—(1) An owner or operator satisfying the requirements of subsection (a) shall be granted an extension of the emission limitation requirement compliance date for that unit from January 1, 2000, to December 31, 2003. The extension shall be specified in the permit issued to the source under section 408, together with any compliance schedule and other requirements necessary to meet second phase requirements by the extended date. Any unit that is granted an extension under this section shall not be eligible for a waiver under section 111(j) of this Act, and shall continue to be subject to requirements under this title as if it were a unit subject to section 405.

"(2) If (A) the owner or operator of an existing unit has been granted an extension under paragraph (1) in order to repower such unit with a clean coal unit, and (B) such owner or operator thereafter satisfies the Administrator (i) that the clean coal technology to be utilized by such unit is economically or technologically infeasible, (ii) that by January 1, 2000, the owner or operator has demonstrated to the Administrator a good faith effort to achieve compliance with the requirements of subsection (a), and (iii) that such existing unit will be retrofitted or repowered with equipment utilizing another clean coal technology or other available control technology, then such extension shall continue until December 31, 2003.

"(c) ALLOWANCES.—(1) For the period of the extension under this section, the Administrator shall issue to the owner or operator of the affected unit, annual allowances for sulfur dioxide equal to the affected unit's baseline multiplied by the lesser of the unit's federally approved State Implementation Plan emissions limitation or its actual emission rate for 1995. Such allowances may not be transferred or used by any other source to meet emission requirements

under this title. The source owner or operator shall notify the Administrator sixty days in advance of the date on which the affected unit for which the extension has been granted is to be removed from operation to install the repowering technology.

"(2) Effective on that date, the unit shall be subject to the requirements of section 405. Allowances for the year in which the unit is removed from operation to install the repowering technology shall be calculated as the product of the unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000, and prorated accordingly, and are transferable.

"(3) Allowances for such existing utility units for calendar years after the year the repowering is complete shall be calculated as the product of the existing unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000.

"(d) CONTROL REQUIREMENTS.—Any unit qualifying for an extension under this section that does not increase actual hourly emissions for any pollutant regulated under the Act shall not be subject to any standard of performance under section 111 of this Act.

"(e) EXPEDITED PERMITTING.—State permitting authorities and, where applicable, the Administrator, are encouraged to give expedited consideration to permit applications under parts C and D of title I of this Act for any source qualifying for an extension under this section.

"(f) PROHIBITION.—It shall be unlawful for the owner or operator of a repowered source to fail to comply with the requirement of this section, or any regulations of permit requirements to implement this section, including the prohibition against emitting sulfur dioxide in excess of allowances held.

"ELECTION FOR ADDITIONAL SOURCES

"SEC. 410. (a) APPLICABILITY.—The owner or operator of any unit that is not; nor will become, an affected unit under section 403(e), 404, or 405, or that is a process source under subsection (e), that emits sulfur dioxide, may elect to designate that unit or source to become an affected unit and to receive allowances under this title. An election shall be submitted to the Administrator for approval, along with a permit application and proposed compliance plan in accordance with section 408. The Administrator shall approve a designation that meets the requirements of this section, and such designated unit, or source, shall be issued allowances, and be an affected unit for purposes of this title.

"(b) ESTABLISHMENT OF BASELINE.—The baseline for a unit designated under this section shall be established by the Administrator by regulation, based on fuel consumption and operating data for the unit for calendar years 1985, 1986, and 1987, or if such data is not available, the Administrator may prescribe a baseline based on alternative representative data.

"(c) EMISSION LIMITATIONS.—Annual emissions limitations for sulfur dioxide shall be equal to the product of the baseline multiplied by the lesser of the unit's 1985 actual or allowable emission rate in lbs/mmBtu, or, if the unit did not operate in 1985, by the lesser of the unit's actual or allowable emission rate for a calendar year after 1985 (as determined by the Administrator), divided by 2,000.

"(d) PROCESS SOURCES.—The Administrator shall establish a program under which the owner or operator of a process source that emits sulfur dioxide may elect to designate that source as an affected unit for the purpose of receiving allowances under this title. The Administrator shall, by regulation, define the sources that may be designated; specify the emissions limitation; specify the operating, emission baseline, and other data requirements; prescribe CEMS or other monitoring requirements; and promulgate permit, reporting, and any other requirements necessary to implement such a program.

"(e) ALLOWANCES AND PERMITS.—The Administrator shall issue allowances to an affected unit under this section in an amount equal to the emissions limitation calculated under subsection (c) or (d), in accordance with section 403. Such allowance may be used in accordance with, and shall be subject to, the provisions of section 403. Affected sources under this section shall be subject to the requirements of sections 403, 408, 411, 412, 413, and 414.

"(f) LIMITATION.—Any unit designated under this section shall not transfer or bank allowances produced as a result of reduced utilization or shutdown: *Provided*, That, such allowances may be transferred or carried forward for use in subsequent years to the extent that the reduced utilization or shutdown results from the replacement of thermal energy from the unit designated under this section, with thermal energy generated by any other unit or units subject to the requirements of this title, and the designated unit's allowances are transferred or carried forward for use at such other replacement unit or units. In no case may the Administrator allocate to a source designated under this section allowances in an amount greater than the emissions resulting from operation of the source in full compliance with the requirements of this Act. No such allowances shall authorize operation of a unit in violation of any other requirements of this Act.

"(g) IMPLEMENTATION.—The Administrator shall issue regulations to implement this section not later than eighteen months after enactment of the Clean Air Act Amendments of 1990.

"(h) SMALL DIESEL REFINERIES.—The Administrator shall issue allowances to owners or operators of small diesel refineries who produce diesel fuel after October 1, 1993, meeting the requirements of subsection 211(i) of this Act.

"(A) ALLOWANCE PERIOD.—Allowances may be issued under this subsection only for the period from October 1, 1993, through December 31, 1999.

"(B) ALLOWANCE DETERMINATION.—The number of allowances issued pursuant to this paragraph shall equal the annual number of pounds of sulfur dioxide reduction attributable to desulfurization by a small refinery divided by 2,000. For the purposes of this calculation, the concentration of sulfur removed from diesel fuel shall be the difference between 0.274 per centum (by weight) and 0.050 per centum (by weight).

"(C) REFINERY ELIGIBILITY.—As used in this subsection, the term 'small refinery' shall mean a refinery or portion of a refinery—

"(i) which has bona fide crude oil throughput of less than eighteen million two hundred and fifty thousand barrels per year, as reported to the Department of Energy, and

"(ii) which is owned or controlled by a refiner with a total combined bona fide crude oil throughput of less than fifty million one hundred eighty-seven thousand and five hundred barrels per year, as reported to the Department of Energy.

"(D) LIMITATION PER REFINERY.—The maximum number of allowances that can be annually issued to a small refinery pursuant to this subsection is one thousand and five hundred.

"(E) LIMITATION ON TOTAL.—In any given year, the total number of allowances issued pursuant to this subsection shall not exceed thirty-five thousand.

"EXCESS EMISSIONS PENALTY

"SEC. 411. (a) EXCESS EMISSIONS PENALTY.—The owner or operator of any unit or process source subject to the requirements of sections 403, 404, 405, 406, 407 or 409, or designated under section 410, that emits sulfur dioxide or nitrogen oxides for any calendar year in excess of the unit's emissions limitation requirement or, in the case of sulfur dioxide, of the allowances the owner or operator holds for use for the unit for that calendar year shall be liable for the payment of an excess emissions penalty, except where such emissions were authorized pursuant to section 110(l). That penalty shall be calculated on the basis of the number of tons emitted in excess of the unit's emissions limitation requirement or, in the case of sulfur dioxide, of the allowances the operator holds for use for the unit for that year, multiplied by 2,000. Any such penalty shall be due and payable without demand to the Administrator as provided in regulations to be issued by the Administrator by no later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990. Any such fee shall be deposited in the United States Treasury pursuant to the Miscellaneous Receipts Act. Any penalty due and payable under this section shall not diminish the liability of the unit's owner or operator for any fine, penalty or assessment against the unit for the same violation under any other section of this Act.

"(b) EXCESS EMISSIONS OFFSET.—The owner or operator of any affected source that emits sulfur dioxide during any calendar year in excess of the unit's emissions limitation requirement or of the allowances held for use for the unit for the calendar year, shall be liable to offset the excess emissions by an equal tonnage amount in the following calendar year, or such longer period as the Administrator may prescribe. The owner or operator of the source shall, within sixty days after the end of the year in which the excess emissions occured, submit to the Administrator, and to the State in which the source is located, a proposed plan to achieve the required offsets. Upon approval of the proposed plan by the Administrator, as submitted, modified or conditioned, the plan shall be deemed at a condition of the operating permit for the unit without further review or revision of the permit. The Administrator shall also deduct allowances equal to the excess tonnage from those issued for the source for the calendar year, or succeeding years during which offsets are required, following the year in which the excess emissions occurred.

"(c) PENALTY ADJUSTMENT.—The Administrator shall, by regulation, adjust the penalty specified in subsection (a) for inflation, based on the Consumer Price Index, on the date of enactment and annually thereafter.

"(d) PROHIBITION.—It shall be unlawful for the owner or operator of any source liable for a penalty and offset under this section to fail (1) to pay the penalty under subsection (a), (2) to provide, and thereafter comply with, a compliance plan as required

by subsection (b), or (3) to offset excess emissions as required by subsection (b).

"MONITORING, REPORTING, AND RECORDKEEPING REQUIREMENTS

"SEC. 412. (a) APPLICABILITY.—The owner and operator of any source subject to this title shall be required to install and operate CEMS on each affected unit at the source, and to quality assure the data for sulfur dioxide, nitrogen oxides, opacity and volumetric flow at each such unit. The Administrator shall, by regulations issued not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, specify the requirements for CEMS, for any alternative monitoring system that is demonstrated as providing information with the same precision, reliability, accessibility, and timeliness as that provided by CEMS, and for recordkeeping and reporting of information from such systems. Such regulations may include limitations or the use of alternative compliance methods by units equipped with an alternative monitoring system as may be necessary to preserve the orderly functioning of the allowance system, and which will ensure the emissions reductions contemplated by this title.

"(b) FIRST PHASE REQUIREMENTS.—Not later than thirty-six months after enactment of the Clean Air Act Amendments of 1990, the owner or operator of each affected unit under section 404, including, but not limited to, units that become affected units pursuant to subsections (b) and (c) and eligible units under subsection (d), shall install and operate CEMS, quality assure the data, and keep records and reports in accordance with the regulations issued under subsection (a).

"(c) SECOND PHASE REQUIREMENTS.—Not later than January 1, 1995, the owner or operator of each affected unit that has not previously met the requirements of subsections (a) and (b) shall install and operate CEMS, quality assure the data, and keep records and reports in accordance with the regulations issued under subsection (a).

"(d) UNAVAILABILITY OF EMISSIONS DATA.—If CEMS data or data from an alternative monitoring system approved by the Administrator under subsection (a) is not available for any affected unit during any period of a calendar year in which such data is required under this title, and the owner or operator cannot provide information, satisfactory to the Administrator, on emissions during that period, the Administrator shall deem the unit to be operating in an uncontrolled manner during the entire period for which the data was not available and shall, by regulation which shall be issued not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, prescribe means to calculate emissions for that period. The owner or operator shall be liable for excess emissions fees and offsets under section 411 in accordance with such regulations. Any fee due and payable under this subsection shall not diminish the liability of the unit's owner or operator for any fine, penalty, fee or assessment against the unit for the same violation under any other section of this Act.

"(e) PROHIBITION.—It shall be unlawful for the owner or operator of any source subject to this title to operate a source without complying with the requirements of this section, and any regulations implementing this section.

"GENERAL COMPLIANCE WITH OTHER PROVISIONS.

"SEC. 413. Except as expressly provided, compliance with the requirements of this title shall not exempt or exclude the owner or operator of any source subject to this title from compliance with any other applicable requirements of this Act.

"ENFORCEMENT

"SEC. 414. It shall be unlawful for any person subject to this title to violate any prohibition of, requirement of, or regulation promulgated pursuant to this title shall be a violation of this Act. In addition to the other requirements and prohibitions provided for in this title, the operation of any affected unit to emit sulfur dioxide in excess of allowances held for use for such unit shall be deemed a violation, with each ton emitted in excess of allowances held constituting a separate violation.

"CLEAN COAL TECHNOLOGY REGULATORY INCENTIVES.

"SEC. 415. (a) DEFINITION.—For purposes of this section, 'clean coal technology' means any technology, including technologies applied at the precombustion, combustion, or post combustion stage, at a new or existing facility which will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, process steam, or industrial products, which is not in widespread use as of the date of enactment of this title.

"(b) FEDERAL RATE INCENTIVES.—(1) Within twenty-four months after enactment of this section, the Federal Energy Regulatory Commission shall complete a rulemaking to establish a demonstration program for regulatory incentives to promote the development of clean coal technologies and other innovative control technologies that limit powerplant emissions. The regulatory incentives shall include—

"(A) establishment of an incentive rate of return for clean coal or other innovative emission control technologies that recognizes their inherent risk; and

"(B) allowance of a ten- to twenty-year amortization period to recover the capital costs of a clean coal or other innovative emission control technology.

"(2) The Federal Energy Regulatory Commission demonstration program is subject to the following—

"(A) the program initially will have a five-year life;

"(B) the program will cover no more than four units in each technology class; and

"(C) the technology classes eligible for the program should be reasonably likely to realize significant cost reductions when employed.

"(3) At the end of the five-year demonstration program, the Federal Energy Regulatory Commission shall review the merits of the program and determine whether it should be extended or made permanent.

"(c) FERC PREAPPROVAL OF PRUDENCE FOR CLEAN COAL TECHNOLOGY COSTS.—The Federal Energy Regulatory Commission shall establish a process for negotiating with potential developers of clean coal technology or other innovative control technology projects to agree upon cost caps for future projects and preapproval of the prudency of expenses for those projects if the expenses fall within the agreed-upon cap.

"(d) PRIORITY FOR UNITS LOCATED IN STATES WITH INCENTIVE PROGRAMS.—To the extent practicable, the Federal Energy Regulatory Commission shall, in the selection of units which will be provided incentive rate treatment under subsections (b) or (c), give priority to units located in States where—

"(1) the State regulatory commission with jurisdiction over the retail rates of the utility seeking such incentive rate treatment has approved comparable incentives for inclusion in the utility's retail rates, or, if the utility makes no retail sales, where comparable retail rate treatment has been approved for other utilities which make retail sales in the State or States in which the wholesale customers of the utility seeking such incentive rate treatment are located; and

"(2) the State regulatory commission accords, to the extent relevant and within its jurisdiction, similar incentives to noninvestor-owned utilities on a basis no less favorable than that accorded to investor-owned utilities within its jurisdiction.

"(e) REVISED REGULATIONS FOR CLEAN COAL TECHNOLOGY DEMONSTRATIONS.—

"(1) APPLICABILITY.—This subsection applies to physical or operational changes to existing facilities for the sole purpose of installation, operation, cessation, or removal of a temporary or permanent clean coal technology demonstration project. For the purposes of this section, a clean coal technology demonstration project shall mean a project conducted under title II, section 101(d) of the Further Continuing Appropriations Act of 1985 (section 5903(d) of title 42 of the United States Code), or subsequent appropriations, up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency. The Federal ' contribution for a qualifying project shall be at least 20 per centum of the total cost of the demonstration project.

"(2) TEMPORARY PROJECTS.—Installation, operation, cessation, or removal of a temporary clean coal technology demonstration project that is operated for a period of five years or less, and which complies with the State implementation plans for the State in which the project is located and other requirements necessary to attain and maintain the national ambient air quality standards during and after the project is terminated, shall not subject such facility to the requirements of section 111 or part C or D of title I.

"(3) PERMANENT PROJECTS.—(A) For permanent clean coal technology demonstration projects that constitute repowering as defined in section 402(l) of this title, any qualifying project shall not be subject to standards of performance under section 111 or to the review and permitting requirements of part C for any pollutant the potential emissions of which will not increase as a result of the demonstration project.

"(B) Any permanent clean coal technology demonstration project that constitutes a retrofit project and, notwithstanding the provisions of paragraph (1), any other utility unit pollution control project, including, but not limited to, alterations that allow the use of natural gas as a fuel, where such project constitutes a retrofit pollution control project and where such project complies with the State implementation plans for the State in which the project is located, and with other requirements necessary to attain and maintain the national ambient air quality standards shall not be deemed to be a major modification subject to the review and permitting requirements of part C or D of title I: *Provided*, That the project will not result in a significant net increase in actual emissions of any pollutant regulated under this Act. For purposes of this subsection, the Administrator shall presume

that a retrofit project will not result in an increase in the capacity utilization of the source. This presumption may be overcome if the Administrator concludes, based on information submitted pursuant to regulations or interpretative rulings promulgated under this section, that there is a likelihood that hours of operation or rates of production will increase because of the retrofit project. For purposes of this subsection, 'retrofit project' is defined as the permanent installation or operation of an emissions control system or device designed primarily to improve the control or prevention of emissions of any air pollutant, other than a repowering as defined in section 402(1) of this title.

"(4) EPA REGULATIONS.—Not later than twelve months after the date of enactment, the Administrator shall promulgate regulations or interpretive rulings to revise requirements under section 111 and parts C and D, as appropriate, to facilitate projects consistent in this subsection. With respect to parts C and D, such regulations or rulings shall apply to all areas in which EPA is the permitting authority. In those instances in which the State is the permitting authority under part C or D, any State may adopt and submit to the Administrator for approval revisions to its implementation plan to apply the regulations or rulings promulgated under this subsection.

"(f) ENCOURAGEMENT OF STATE INCENTIVE PROGRAMS.—Because the use of clean coal technologies is in the national interest, States, including their agencies and political subdivisions which regulate public utility rates and charges, are encouraged to provide additional incentives for their implementation. Those incentives may include, but are not limited to—

"(1) preapproval of recovery of capital costs and other expenses, within reasonable bounds agreed upon before project construction;

"(2) elimination of retroactive 'used and useful' reviews for clean coal technologies;

"(3) rapid amortization of clean coal technology expenditures; and

"(4) immediate recovery of a portion of clean coal technology expenses through a fuel adjustment clause or by some other method.".

FOSSIL FUEL USE

SEC. 402. (a) Any person who enters into a contract under which such person receives hydroelectric energy in return for the provision of electric energy by such person shall use allowances held by such person as necessary to satisfy such person's obligations under such contract.

(b) A Federal Power Marketing Administration shall not be subject to the provisions and requirements of this title with respect to electric energy generated by hydroelectric facilities and marketed by such Power Marketing Administration. Any person who sells or provides electric energy to a Federal Power Marketing Administration shall comply with the provisions and requirements of this title.

REPEAL OF PERCENT REDUCTION

SEC. 403. (a) REPEAL.—Section 111(a)(1) of the Clean Air Act is amended to read as follows:

"(1) The term 'standard of performance' means a standard for emissions of air pollutants which reflects the degree of emission limitation achievable through the application of the best system of emission reduction which (taking into account the cost of achieving such reduction and any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated.".

(b) REVISED REGULATIONS.—Not later than three years after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate revised regulations for standards of performance for new fossil fuel fired electric utility units commencing construction after the date on which such regulations are proposed that, at a minimum, require any source subject to such revised standards to emit sulfur dioxide at a rate not greater than would have resulted from compliance by such source with the applicable standards of performance under this section prior to such revision.

(c) APPLICABILITY.—The provisions of subsections (a) and (b) apply only so long as the provisions of section 403(e) of the Clean Air Act remain in effect.

(d) BACT DETERMINATIONS.—Section 169(3) of the Clean Air Act is amended by inserting: ", clean fuels," after "including fuel cleaning,".

ACID DEPOSITION STANDARDS

SEC. 404. Not later than thirty-six months after the date of enactment of this Act, the Administrator of the Environmental Protection Agency shall transmit to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the feasibility and effectiveness of an acid deposition standard or standards to protect sensitive and critically sensitive aquatic and terrestrial resources. The study required by this section shall include, but not be limited to, consideration of the following matters:

(a) identification of the sensitive and critically sensitive aquatic and terrestrial resources in the United States and Canada which may be affected by the deposition of acidic compounds;

(b) description of the nature and numerical value of a deposition standard or standards that would be sufficient to protect such resources;

(c) description of the use of such standard or standards in other Nations or by any of the several States in acid deposition control programs;

(d) description of the measures that would need to be taken to integrate such standard or standards with the control program required by title IV of the Clean Air Act;

(e) description of the state of knowledge with respect to source-receptor relationships necessary to develop a control program on such standard or standards and the additional research that is on-going or would be needed to make such a control program feasible; and

(f) description of the impediments to implementation of such control program and the cost-effectiveness of deposition standards compared to other control strategies including ambient air quality standards, new source performance standards and the requirements of title IV of the Clean Air Act.

NATIONAL ACID LAKES REGISTRY

SEC. 405. The Administrator of the Environmental Protection Agency shall create a National Acid Lakes Registry that shall list, to the extent practical, all lakes that are known to be acidified due to acid deposition, and shall publish such list within one year of the enactment of this Act. Lakes shall be added to the registry as they become acidic or as data become available to show they are acidic. Lakes shall be deleted from the registry as they become nonacidic.

INDUSTRIAL SO_2 EMISSIONS

SEC. 406. (a) Not later than January 1, 1995 and every five years thereafter, the Administrator of the Environmental Protection Agency shall transmit to the Congress a report containing an inventory of national annual sulfur dioxide emissions from industrial sources, including units subject to section 405(g)(5) of the Clean Air Act, for all years for which data are available, as well as the likely trend in such emissions over the following twenty-year period. The reports shall also contain estimates of the actual emission reduction in each year resulting from promulation of the diesel fuel desulfurization regulations under section 214.

(b) Whenever the inventory required by this section indicates that sulfur dioxide emissions from industrial sources, including units subject to section 405(g)(5) of the Clean Air Act, may reasonably be expected to reach levels greater than 5.60 million tons per year, the Administrator of the Environmental Protection Agency shall take such actions under the Clean Air Act as may be appropriate to ensure that such emissions do not exceed 5.60 million tons per year. Such actions may include the promulgation of new and revised standards of performance for new sources, including units subject to section 405(g)(5) of the Clean Air Act, under section 111(b), as well as promulgation of standards of performance for existing sources, including units subject to section 405(g)(5) of the Clean Air Act, under authority of this section. For an existing source regulated under this section, "standard of performance" means a standard which the Administrator determines is applicable to that source and which reflects the degree of emission reduction achievable through the application of the best system of continuous emission reduction which (taking into consideration the cost of achieving such emission reduction, and any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated for that category of sources.

(c) Regulations promulgated under section 405(b) shall not prohibit a source from electing to become an affected unit under section 410.

SENSE OF THE CONGRESS ON EMISSION REDUCTIONS COSTS

SEC. 407. It is the sense of the Congress that the Clean Air Act Amendments of 1990, through the allowance program, allocates the costs of achieving the required reductions in emissions of sulfur dioxide and oxides of nitrogen among sources in the United States. Broad based taxes and emissions fees that would provide for payment of the costs of achieving required emissions reductions by any party or parties other than the sources required to achieve the reductions are undesirable.

CONTINUATION OF THE NATIONAL ACID PRECIPITATION ASSESSMENT PROGRAM

SEC. 408. (a) The National Acid Precipitation Assessment Program created by Public Law 96-294 shall be continued pursuant to this section. The Chairman of the Joint Chairs of the National Acid Precipitation Task Force shall be the Administrator of the Environmental Protection Agency.

(b) The Task Force shall sponsor monitoring and research in the Federal agencies and in the scientific community that is necessary to understand the effects of the emissions control program created by this title. The Task Force shall undertake cost-benefit

analyses of the effects of the emissions control program created by this title.

(c) The Task Force shall provide for the collection of information regarding—

(1) natural and anthropogenic emissions of the precursors of acid deposition;

(2) actual levels of all types of acid deposition;

(3) the status of ecosystems (including forests and terrestrial waters), materials, and visibility affected by acid deposition; and

(4) the costs and benefits of the control program created by this title.

The Task Force shall assure that this data is interpreted in such a way as to allow interested persons to determine as accurately as possible the total effects of the emissions control program created by this title.

(d) The Task Force shall provide for the maintenance and updating of models that describe the interaction of emissions with the atmosphere such as the Regional Acid Deposition Model, and models that describe the response of ecosystems to acid deposition.

(e) The Task Force shall make a unified budget recommendation. Every two years beginning in 1992, the Task Force shall submit a report to the President and the Congress describing the results of its investigations and analysis of the effects of the emissions control program contained in this title.

(f)(1) The Administrator of the Environmental Protection Agency shall sponsor monitoring and research and submit to Congress annual and periodic assessment reports on—

(A) the occurrence and effects of acid deposition on surface waters located in that part of the United States west of the Mississippi River;

(B) the occurrence and effects of acid deposition on high elevation ecosystems (including forests, and surface waters); and

(C) the occurrence and effects of episodic acidification, particularly with respect to high elevation watersheds.

(2) The Administrator of the Environmental Protection Agency shall analyze data generated from the studies conducted under paragraph (1), data from the Western Lakes Survey and other appropriate research and utilize predictive modeling techniques that take into account the unique geographic, elimatological, and atmospheric conditions which exist in the western United States to determine the potential occurrence and effects of acid deposition due to any projected increases in the emission of sulfur dioxide and nitrogen oxides in that part of the United States located west of the Mississippi River. The Task Force shall include the results of the project conducted under this paragraph in the reports issued to Congress under paragraph (1).

(g) There are authorized to be appropriated the amount of $10,000,000 per year to carry out the purposes of this section, to remain available until expended.

MONITOR ACID RAIN PROGRAM IN CANADA

SEC. 409. (a) The Administrator of the Environmental Protection Agency, in consultation with the Secretary of State, the Secretary of Energy, and other persons the Administrator deems appropriate, shall prepare and submit a report to Congress on January 1, 1994, January 1, 1999, and January 1, 2005.

(b) The report to Congress shall analyze the current emission levels of sulfur dioxide and nitrogen oxides in each of the provinces participating in Canada's acid rain control program, the amount of emission reductions of sulfur dioxide and oxides of nitrogen achieved by each province, the methods utilized by each province in making those reductions, the costs to each province and the employment impacts in each province of making and maintaining those reductions.

(c) Beginning on Janaury 1, 1999, the reports shall also assess the degree to which each province is complying with its stated emissions cap.

REPORT ON CLEAN COAL TECHNOLOGIES EXPORT PROGRAMS

SEC. 410. The Secretary of Energy in consultation with the Secretary of Commerce shall provide a report to the Congress within one year of enactment of this legislation which will identify, inventory and analyze clean coal technologies export programs within United States Government agencies including the Departments of State, Commerce, and Energy and at the Export-Import Bank and the Overseas Private Investment Corporation. The study shall address the effectiveness of interagency coordination of export promotion and determine the feasibility of establishing an interagency commission for the purpose of promoting the export and use of clean coal technologies.

ACID DEPOSITION RESEARCH BY THE UNITED STATES FISH AND WILDLIFE SERVICE

SEC. 411. There are authorized to be appropriated to the United States Fish and Wildlife Service of the Department of the Interior an amount equal to $500,000 to fund research related to acid deposition and the monitoring of high altitude mountain lakes in the Wind River Reservation, Wyoming, to be conducted through the Management Assistance Office of the United States Fish and Wildlife Service located in Lander, Wyoming and the University of Wyoming.

STUDY OF BUFFERING AND NEUTRALIZING AGENTS

SEC. 412. There are authorized to be appropriated to the United States Fish and Wildlife Service of the Department of the Interior an amount equal to $250,000 to fund a study to be conducted in conjunction with the University of Wyoming of the effectiveness of various buffering and neutralizing agents used to restore lakes and streams damaged by acid deposition.

TITLE V—PERMITS

PERMITS

SEC. 501. The Clean Air Act is amended—

(1) by inserting after the heading "TITLE III—GENERAL" the subheading "PART A—MISCELLANEOUS"; and

(2) by adding at the end of title III the following:

"PART B—PERMITS

"DEFINITIONS

"SEC. 350. As used in this part—

"(1) The term 'affected source' shall have the meaning given in title IV of this Act.

"(2) The term 'major source' means any stationary source (or any group of stationary sources located within a contiguous area and under common control) that—

"(A) is a major source as defined under section 112 or part D of this Act; or

"(B) is a major stationary source or major emitting facility as defined in section 302(j).

"(3) For sources subject to standards issued under section 112 of this Act, the terms 'new source', 'stationary source', and 'area source' shall have the meaning given in that section.

"(4) For sources subject to standards issued under section 111 of this Act, the terms 'new source', 'modification', 'existing source', 'stationary source', and 'owner or operator' shall have the meaning given in that section.

"(5) The term 'schedule of compliance' means a schedule of remedial measures including an enforceable sequence of actions or operations leading to compliance with an applicable implementation plan, emission standard, emission limitation, or emission prohibition.

"(6) The term 'permitting authority' means the Administrator, or the air pollution control agency authorized by the Administrator to carry out a permit program under this part.

"PERMIT PROGRAMS

"SEC. 351. (a) After the effective date of any permit program approved or promulgated under this part, it shall be unlawful for any person: (i) to violate any requirement of a permit issued under this part, or (ii) to operate a major source, any source subject to title IV of this Act, any other source (including an area source) subject to standards or regulations under section 111 or 112, any source required to have a permit under parts C or D of this Act, or any other source designated by regulations promulgated by the Administrator, except in compliance with a permit issued by a permitting authority under this title. Nothing in this subsection shall be construed to alter the requirements of sections 165, 172, and 173 regarding the requirement that a permit be obtained prior to construction. The Administrator may, in the Administrator's discretion, after notice and opportunity for public comment, promulgate regulations to exempt one or more source categories from a permit program and the requirement of this part to have a permit, if the Administrator finds that such an exemption is warranted and would be consistent with protection of the public health, welfare and the environment.

"(b) Not later than twelve months after the date of enactment of this part, the Administrator shall promulgate regulations establishing the minimum elements of a permit program to be administered under this Act by any air pollution control agency. These elements shall include:

"(1) Requirements for permit applications, including a standard application form and criteria for determining in a timely fashion when such applications are complete.

"(2) Monitoring and reporting requirements.

"(3)(A) A requirement under State or local law that the owner or operator of each source subject to the requirement to obtain a permit under this part pay an annual fee, or the equivalent over some other period, sufficient to cover all reasonable costs of developing and administering the permit program, including, but not limited to, the reasonable costs of—

"(i) reviewing and acting upon any application for such a permit,

"(ii) if the owner or operator receives a permit for such source, whether before or after the date of enactment of this section, implementing and enforcing the terms and conditions of any such permit (not including any court costs or other costs associated with any enforcement action),

"(iii) emissions and ambient monitoring,

"(iv) preparing generally applicable regulations or guidance,

"(v) modeling, analyses, and demonstrations, and

"(vi) preparing inventories and tracking emissions.

"(B) The total amount of fees collected by the permitting authority shall conform to the following requirements:

"(i) The Administrator shall not approve a program as meeting the requirements of this paragraph unless the air pollution control agency demonstrates that, except as otherwise provided in clauses (ii) through (v) of this subparagraph, the program will result in the collection, in the aggregate, from all sources subject to subparagraph (A), of an amount not less than $25 per ton of each regulated pollutant, or such lesser amount that the Administrator determines, after notice and opportunity for public comment, adequately reflects the costs of the program.

"(ii) As used in this subparagraph, the term 'regulated pollutant' shall mean: (I) a volatile organic compound; (II) each pollutant regulated under section 111 or 112; and (III) each pollutant for which a national primary ambient air quality standard has been promulgated (except that carbon monoxide shall be excluded from this reference).

"(iii) In calculating the amount to be collected on a per ton basis under clause (i), the permitting authority shall exclude emissions of regulated pollutants from any source that are in excess of four thousand tons per year.

"(iv) The requirements of clause (i) to collect the amount specified under such clause shall not apply if the permitting authority demonstrates that collecting an amount less than the amount specified under clause (i) will satisfy the requirements of subparagraph (A).

"(v) The fee calculated under clause (i) shall be increased (consistent with the need to cover reasonable costs) in each year beginning after the year of enactment of this section by the percentage, if any, by which the Producer Price Index for the most recent calendar year ending before the beginning of such year exceeds the Producer Price Index for the calendar year 1989.

"(C) Any fee required to be collected by an air pollution control agency under this subsection shall be utilized to support the air pollution control program of such agency.

"(4) Requirements for adequate personnel and funding to administer the program.

"(5) A requirement that the permitting authority have adequate authority to—

"(A) issue permits that apply, and assure compliance by all sources required to have a permit under this part with each applicable standard, regulation or requirement under this Act;

"(B) issue permits for a fixed term, not to exceed five years;

"(C) assure that permits include emission limitations and other conditions required by section 353(a);

"(D) terminate, modify, or revoke and reissue permits for cause;

"(E) enforce permits, permit fee requirements, and the requirement to obtain a permit, including authority to recover civil penalties in a maximum amount of not less than $10,000 per day for each violation, and to seek appropriate criminal penalties;

"(F) assure that no permit will be issued if the Administrator objects to its issuance in a timely manner under section 354; and

"(G) grant limited extensions of a permit's term upon a timely and complete application for renewal, pending final action upon the renewal application by the permitting authority.

"(6) A requirement that the permitting authority establish and implement adequate procedures for processing permit applications expeditiously, and for public notice, including offering an opportunity for public comment and a hearing, on any permit application. These procedures shall include a requirement that the permitting authority include in public notices of any application for a permit that would amend or alter an applicable implementation plan an explicit statement describing the ways in which the permit would amend or alter such plan.

"(7) A requirement that all permit applications, compliance plans, permits, and monitoring or compliance reports filed under section 352 shall be made available to the public, subject to section 114 of this Act.

"(c) Each permit issued under this part shall include conditions providing for review and revision prior to expiration of the permit term for purposes of—

"(A) incorporating requirements of this Act that become applicable to the permitted source prior to expiration of the permit term, where such review and revision may be necessary to protect the public health or welfare and the environment; and

"(B) correcting any material mistake or material error made in establishing the emission standards or limitations, or other requirements of the permit.

"(d) A single permit may be issued for a facility with multiple sources.

"(e)(1) Each permit application or request for permit modification or renewal shall be acted upon by the permitting authority as expeditiously as practicable, and, except as provided in paragraph (2), final action upon any such application or request for modification or renewal shall be required to be taken by the authority not later than twelve months after receipt of a complete application or request.

"(2) Notwithstanding the requirement of paragraph (1), a permitting authority may extend the twelve-month deadline for final action on a permit application or request for modification or renewal if the authority determines that, as a result of technical complexity or insufficient administrative resources, it is not possible to take final action within twelve months as provided in paragraph (1). Such extension may be for a period not to exceed eighteen months and may not be further extended nor renewed.

"(f) Not later than three years after the enactment of this part, the Governor of each State shall develop and submit to the Administrator a permit program under State or local law or under an interstate compact meeting the requirements of this title. In addition, the Governor shall submit a legal opinion from the attorney general (or the attorney for those State air pollution control agencies that have independent legal counsel), or from the chief legal officer of an interstate agency, that the laws of the State, locality or the interstate compact provide adequate authority to carry out the program. Not later than one year after receiving a program, and after notice and opportunity for public comment, the Administrator shall approve or disapprove such program, in whole or in part. The Administrator shall approve a program to the extent that the program meets the requirements of this Act, including the regulations issued under subsection (b) of this section. If the program is disapproved, in whole or in part, the Administrator shall notify the Governor of any revisions or modifications necessary to obtain approval. The Governor shall revise and resubmit the program for review under this section within one hundred and eighty days after receiving notification. If the Governor fails within such period to resubmit an approvable program, the Administrator—

"(1) shall apply at least one of the sanctions specified in section 176(a) of this Act other than the sanction specified in section 176(a)(2); and

"(2) unless required to act pursuant to subsection (j) of this section, may in the Administrator's discretion promulgate, administer, and enforce a program, or partial program, under this part.

"(g) The Administrator shall suspend the issuance of Federal permits promptly upon approval and implementation of a permit program under this section, but may retain jurisdiction over permits that have been federally issued, but for which the administrative or judicial review process is not complete. The Administrator shall continue to administer and enforce federally issued permits under this part until they are replaced by a permit issued under an approved permitting program. Nothing in this provision shall be construed to limit the Administrator's ability to enforce permits issued by a State.

"(h) INTERIM APPROVAL.—If a program (including a partial permit program) submitted under this part substantially meets the requirements of this part, but is not fully approvable, the Administrator may by rule grant the program interim approval. In the notice of final rulemaking, the Administrator shall specify the changes that must be made before the program can receive full approval. An interim approval under this subsection shall expire on a date set by the Administrator not later than two years after such approval, and may not be renewed.

"(i) EFFECTIVE DATE.—The effective date of a permit program, or interim program, approved under this part, shall be the effective date of approval by the Administrator.

"(j) Whenever the Administrator makes a preliminary determination that a permitting authority is not adequately administering and enforcing a program, or portion thereof, in accordance with the requirements of this part, the Administrator shall notify the permitting authority of such determination and the reasons therefore. Such notice shall be made public. If the permitting authority fails to take action to assure adequate administration and enforcement, the Administrator may in the Administrator's discretion, but not before ninety days after issuing such notice, take one or more of the following actions:

"(1) withdraw approval of the program or portion by rule;

"(2) apply any of the sanctions specified in section 176(a) of this Act other than the sanction specified in section 176(a)(2); or

"(3) promulgate a program, or portion of a program, under this part.

"(k) In the event the Administrator determines that (1) a permitting authority is not adequately administering and enforcing a program, or a portion thereof, in accordance with the requirements of this part and (2) such permitting authority has failed to take action to assure adequate administration and enforcement of such a program within sixty months after enactment of this part, or two years after receiving notice from the Administrator under subsection (i) of this section, whichever is later, the Administrator shall promulgate, administer and enforce a program under this part to assure compliance with the requirements of this part.

"PERMIT APPLICATIONS

"SEC. 352. (a) Any source specified in section 351(a) shall become subject to a permit program and, except as provided in subsection (g), shall be required to have a permit, on the later of the following dates:

"(1) the effective date of a permit program or partial or interim permit program applicable to the source; or

"(2) the date such source becomes subject to section 351(a).

"(b) The regulations required by section 351(b) shall include a requirement that the owner or operator submit with the permit application a compliance plan describing (1) how the source will comply with all new requirements applicable to the source under this Act, including a schedule for achieving compliance with such new requirements, and (2) in the event the source is not in compliance with all existing applicable requirements of this Act at the time it submits the permit application, a description of how the source will comply with all such requirements, including a schedule for achieving compliance with such requirements. The compliance plan shall include a schedule under which the owner or operator will submit progress reports to the permitting authority no less frequently than every six months. The regulations shall further require any owner or operator submitting a compliance plan to certify periodically that the facility is in compliance with any applicable requirements under this Act, and to report promptly any violations of such requirements to the permitting authority.

"(c) The owner or operator of any source required to have a permit shall, not later than thirty months after the date on which the source becomes subject to a permit program approved or promulgated under this part, or such earlier date as the permitting authority shall establish by regulations, submit to the permitting authority a compliance plan in accordance with subsection (b) of this section and an application for a permit signed by a responsible official, who shall certify the accuracy of the information submitted.

"(d)(1) Each permitting authority shall, in consultation with the Administrator, establish by regulations a schedule for the submission of all or part of the application by sources or categories of sources (including any class, type, or size within such category) within the thirty-month period in a manner that minimizes administrative burdens. Such schedules shall be based on the nature and amount of emissions from the sources or categories of sources, similar air quality considerations, and such other factors as may be relevant.

"(2) The schedules established pursuant to paragraph (1) shall provide that, to the maximum extent practicable:

"(i) those sources that represent the most significant contributions or potential contributions to air pollution shall be required to submit permit applications not later than ten months after the date on which such sources become subject to a permit program approved or promulgated under this part;

"(ii) those sources that represent significant contributions or potential contributions to air pollution shall be required to submit permit applications not later than twenty months after the date on which such sources become subject to a permit program approved or promulgated under this part; and

"(iii) all other sources shall be required to submit permit applications not later than thirty months after the date on which such sources become subject to a permit program approved or promulgated under this part.

"(e)(1) To the maximum extent practicable, each of the three permit tiers established by the permitting authority under subsection (d) shall include not less than one-third of all sources estimated by the permitting authority to be subject to the permit program approved or promulgated under this part (other than sources subject to section 408 of this Act).

"(2) All sources subject to section 408 of this Act shall be subject to the provisions of this part, except that such sources shall submit their permit applications in accordance with the schedule established under section 408 in lieu of the schedules established under subsection (d) of this section.

"(3) The regulations required by this subsection and section 351(b) shall, with respect to sources subject to section 112 of this Act, incorporate the requirements of subsection 112(j).

"(f) No permit shall be issued to any source located in a nonattainment area unless (A) the permitting authority has made the determinations required under section 173 of this Act, and (B) the conditions of section 173 are satisfied.

"(g) Except for sources required to have a permit prior to construction under sections 165, 172, or 173, if an applicant has submitted a timely and complete application for a permit required by this part, but final action has not been taken on the application, the source's failure to have a permit shall not be a violation of this Act, unless the delay in final action was due to the failure of the applicant to timely submit information required or requested to process the application. No source required to have a permit under this part shall be in violation of section 351(a) before the date on which the source is required to submit an application under subsection (c) of this section.

"(h) A copy of each permit application, compliance plan, emissions or compliance monitoring report, certification, and each permit issued under this part, shall be available to the public. If an applicant or permittee is required to submit information entitled to protection from disclosure under section 114(c) of this Act, the applicant or permittee may submit such information separately. The requirements of section 114(c) shall apply to such information. The contents of a permit or of a compliance plan shall not be entitled to protection under section 114(c).

"PERMIT REQUIREMENTS AND CONDITIONS

"SEC. 353. (a) Each permit issued under this part shall include enforceable emission limitations and standards, a schedule of compliance in accordance with section 352(b), and such other conditions and measures as are necessary to assure prompt and continuing compliance with applicable requirements of this Act.

"(b) The Administrator may by rule prescribe procedures and methods for determining compliance and for monitoring and analysis of pollutants regulated under this Act.

"(c) Each permit issued under this part shall set forth inspection, entry, monitoring, compliance certification, and reporting requirements to assure compliance with the permit terms and conditions. Such monitoring and reporting requirements shall conform to any applicable regulations under subsection (b) of this section. Any report required to be submitted by a permit issued to a corporation under this part shall be signed by a responsible corporate official, who shall certify its accuracy.

"(d) A permit for a source that is an affected source under title IV shall prohibit the emission of sulfur dioxide in excess of the allowances acquired by the source through trading or otherwise under title IV. No permit modification shall be required for increases in emissions that are authorized by allowances acquired through trading or otherwise under title IV, *Provided*, That any such increase complies with other requirements of the Act.

"(e) The permitting authority may, after notice and opportunity for public hearing, issue a general permit covering numerous similar sources. Any general permit shall comply with all requirements applicable to permits under this part. No source covered by a general permit shall thereby to relieved from the obligation to file an application under section 352.

"(f) The permitting authority may issue a single permit to an owner or operator authorizing emissions from similar operations at multiple temporary locations. No such permit shall be issued unless it includes conditions that will assure compliance with all the requirements of this Act at all authorized locations, including, but not limited to, ambient standards and compliance with any applicable increment or visability requirements under part C of title I. Any such permit shall in addition require the owner or operator to notify the permitting authority in advance of each change in location. The permitting authority may require a separate permit fee for operations at each location.
